Plato's birthplace — Athens

EUTHYPHRO

Translated by Benjamin Jowett

This is one of Plato's earliest dialogues, which is dated after 399 BC. Taking place during the weeks leading up to Socrates' trial, the dialogue features Socrates and Euthyphro, a man well-known for claiming to be a religious expert. The crux of the dialogue is identifying a definition for piety. The dialogue is set near the king-archon's court, where the two men encounter each other. They are both there for preliminary hearings before possible trials .

The argument of this dialogue is based largely on "definition by division". Socrates goads Euthyphro to offer one definition after another for the word *piety*. The hope is to use a clear definition as the basis for Euthyphro to teach Socrates the answer to the question, "What is piety?", ostensibly so that Socrates can use this to defend himself against the charge of impiety. It is clear that Socrates wants a definition of piety that will be universally true, against which all actions can be measured to determine whether or not they are pious.

Bust of Socrates

INTRODUCTION.

In the *Meno*, Anytus had parted from Socrates with the significant words: 'That in any city, and particularly in the city of Athens, it is easier to do men harm than to do them good;' and Socrates was anticipating another opportunity of talking with him. In the *Euthyphro*, Socrates is awaiting his trial for impiety. But before the trial begins, Plato would like to put the world on their trial, and convince them of ignorance in that very matter touching which Socrates is accused. An incident which may perhaps really have occurred in the family of Euthyphro, a learned Athenian diviner and soothsayer, furnishes the occasion of the discussion.

This Euthyphro and Socrates are represented as meeting in the porch of the King Archon. (Compare *Theaet.*) Both have legal business in hand. Socrates is defendant in a suit for impiety which Meletus has brought against him (it is remarked by the way that he is not a likely man himself to have brought a suit against another); and Euthyphro too is plaintiff in an action for murder, which he has brought against his own father. The latter has originated in the following manner: — A poor dependant of the family had slain one of their domestic slaves in Naxos. The guilty person was bound and thrown into a ditch by the command of Euthyphro's father, who sent to the interpreters of religion at Athens to ask what should be done with him. Before the messenger came back the criminal had died from hunger and exposure.

This is the origin of the charge of murder which Euthyphro brings against his father. Socrates is confident that before he could have undertaken the responsibility of such a prosecution, he must have been perfectly informed of the nature of piety and impiety; and as he is going to be tried for impiety himself, he thinks that he cannot do better than learn of Euthyphro (who will be admitted by everybody, including the judges, to be an unimpeachable authority) what piety is, and what is impiety. What then is piety?

Euthyphro, who, in the abundance of his knowledge, is very willing to undertake all the responsibility, replies: That piety is doing as I do, prosecuting your father (if he is guilty) on a charge of

murder; doing as the gods do — as Zeus did to Cronos, and Cronos to Uranus.

Socrates has a dislike to these tales of mythology, and he fancies that this dislike of his may be the reason why he is charged with impiety. ‘Are they really true?’ ‘Yes, they are;’ and Euthyphro will gladly tell Socrates some more of them. But Socrates would like first of all to have a more satisfactory answer to the question, ‘What is piety?’ ‘Doing as I do, charging a father with murder,’ may be a single instance of piety, but can hardly be regarded as a general definition.

Euthyphro replies, that ‘Piety is what is dear to the gods, and impiety is what is not dear to them.’ But may there not be differences of opinion, as among men, so also among the gods? Especially, about good and evil, which have no fixed rule; and these are precisely the sort of differences which give rise to quarrels. And therefore what may be dear to one god may not be dear to another, and the same action may be both pious and impious; e.g. your chastisement of your father, Euthyphro, may be dear or pleasing to Zeus (who inflicted a similar chastisement on his own father), but not equally pleasing to Cronos or Uranus (who suffered at the hands of their sons).

Euthyphro answers that there is no difference of opinion, either among gods or men, as to the propriety of punishing a murderer. Yes, rejoins Socrates, when they know him to be a murderer; but you are assuming the point at issue. If all the circumstances of the case are considered, are you able to show that your father was guilty of murder, or that all the gods are agreed in approving of our prosecution of him? And must you not allow that what is hated by one god may be liked by another? Waiving this last, however, Socrates proposes to amend the definition, and say that ‘what all the gods love is pious, and what they all hate is impious.’ To this Euthyphro agrees.

Socrates proceeds to analyze the new form of the definition. He shows that in other cases the act precedes the state; e.g. the act of being carried, loved, etc. precedes the state of being carried, loved, etc., and therefore that which is dear to the gods is dear to the gods because it is first loved of them, not loved of them because it is dear to them. But the pious or holy is loved by the gods because it is pious

or holy, which is equivalent to saying, that it is loved by them because it is dear to them. Here then appears to be a contradiction, — Euthyphro has been giving an attribute or accident of piety only, and not the essence. Euthyphro acknowledges himself that his explanations seem to walk away or go round in a circle, like the moving figures of Daedalus, the ancestor of Socrates, who has communicated his art to his descendants.

Socrates, who is desirous of stimulating the indolent intelligence of Euthyphro, raises the question in another manner: 'Is all the pious just?' 'Yes.' 'Is all the just pious?' 'No.' 'Then what part of justice is piety?' Euthyphro replies that piety is that part of justice which 'attends' to the gods, as there is another part of justice which 'attends' to men. But what is the meaning of 'attending' to the gods? The word 'attending,' when applied to dogs, horses, and men, implies that in some way they are made better. But how do pious or holy acts make the gods any better? Euthyphro explains that he means by pious acts, acts of service or ministration. Yes; but the ministrations of the husbandman, the physician, and the builder have an end. To what end do we serve the gods, and what do we help them to accomplish? Euthyphro replies, that all these difficult questions cannot be resolved in a short time; and he would rather say simply that piety is knowing how to please the gods in word and deed, by prayers and sacrifices. In other words, says Socrates, piety is 'a science of asking and giving' — asking what we want and giving what they want; in short, a mode of doing business between gods and men. But although they are the givers of all good, how can we give them any good in return? 'Nay, but we give them honour.' Then we give them not what is beneficial, but what is pleasing or dear to them; and this is the point which has been already disproved.

Socrates, although weary of the subterfuges and evasions of Euthyphro, remains unshaken in his conviction that he must know the nature of piety, or he would never have prosecuted his old father. He is still hoping that he will condescend to instruct him. But Euthyphro is in a hurry and cannot stay. And Socrates' last hope of knowing the nature of piety before he is prosecuted for impiety has disappeared. As in the Euthydemus the irony is carried on to the end.

The Euthyphro is manifestly designed to contrast the real nature

of piety and impiety with the popular conceptions of them. But when the popular conceptions of them have been overthrown, Socrates does not offer any definition of his own: as in the *Laches* and *Lysis*, he prepares the way for an answer to the question which he has raised; but true to his own character, refuses to answer himself.

Euthyphro is a religionist, and is elsewhere spoken of, if he be the same person, as the author of a philosophy of names, by whose 'prancing steeds' Socrates in the *Cratylus* is carried away. He has the conceit and self-confidence of a Sophist; no doubt that he is right in prosecuting his father has ever entered into his mind. Like a Sophist too, he is incapable either of framing a general definition or of following the course of an argument. His wrong-headedness, one-sidedness, narrowness, positiveness, are characteristic of his priestly office. His failure to apprehend an argument may be compared to a similar defect which is observable in the rhapsode *Ion*. But he is not a bad man, and he is friendly to Socrates, whose familiar sign he recognizes with interest. Though unable to follow him he is very willing to be led by him, and eagerly catches at any suggestion which saves him from the trouble of thinking. Moreover he is the enemy of *Meletus*, who, as he says, is availing himself of the popular dislike to innovations in religion in order to injure Socrates; at the same time he is amusingly confident that he has weapons in his own armoury which would be more than a match for him. He is quite sincere in his prosecution of his father, who has accidentally been guilty of homicide, and is not wholly free from blame. To purge away the crime appears to him in the light of a duty, whoever may be the criminal.

Thus begins the contrast between the religion of the letter, or of the narrow and unenlightened conscience, and the higher notion of religion which Socrates vainly endeavours to elicit from him. 'Piety is doing as I do' is the idea of religion which first occurs to him, and to many others who do not say what they think with equal frankness. For men are not easily persuaded that any other religion is better than their own; or that other nations, e.g. the Greeks in the time of Socrates, were equally serious in their religious beliefs and difficulties. The chief difference between us and them is, that they were slowly learning what we are in process of forgetting. Greek

mythology hardly admitted of the distinction between accidental homicide and murder: that the pollution of blood was the same in both cases is also the feeling of the Athenian diviner. He had not as yet learned the lesson, which philosophy was teaching, that Homer and Hesiod, if not banished from the state, or whipped out of the assembly, as Heracleitus more rudely proposed, at any rate were not to be appealed to as authorities in religion; and he is ready to defend his conduct by the examples of the gods. These are the very tales which Socrates cannot abide; and his dislike of them, as he suspects, has branded him with the reputation of impiety. Here is one answer to the question, 'Why Socrates was put to death,' suggested by the way. Another is conveyed in the words, 'The Athenians do not care about any man being thought wise until he begins to make other men wise; and then for some reason or other they are angry:' which may be said to be the rule of popular toleration in most other countries, and not at Athens only. In the course of the argument Socrates remarks that the controversial nature of morals and religion arises out of the difficulty of verifying them. There is no measure or standard to which they can be referred.

The next definition, 'Piety is that which is loved of the gods,' is shipwrecked on a refined distinction between the state and the act, corresponding respectively to the adjective (*philon*) and the participle (*philoumenon*), or rather perhaps to the participle and the verb (*philoumenon* and *phileitai*). The act is prior to the state (as in Aristotle the *energeia* precedes the *dunamis*); and the state of being loved is preceded by the act of being loved. But piety or holiness is preceded by the act of being pious, not by the act of being loved; and therefore piety and the state of being loved are different. Through such subtleties of dialectic Socrates is working his way into a deeper region of thought and feeling. He means to say that the words 'loved of the gods' express an attribute only, and not the essence of piety.

Then follows the third and last definition, 'Piety is a part of justice.' Thus far Socrates has proceeded in placing religion on a moral foundation. He is seeking to realize the harmony of religion and morality, which the great poets Aeschylus, Sophocles, and Pindar had unconsciously anticipated, and which is the universal want of all men. To this the soothsayer adds the ceremonial element,

‘attending upon the gods.’ When further interrogated by Socrates as to the nature of this ‘attention to the gods,’ he replies, that piety is an affair of business, a science of giving and asking, and the like. Socrates points out the anthropomorphism of these notions, (compare *Symp.*; *Republic*; *Politicus*.) But when we expect him to go on and show that the true service of the gods is the service of the spirit and the co-operation with them in all things true and good, he stops short; this was a lesson which the soothsayer could not have been made to understand, and which every one must learn for himself.

There seem to be altogether three aims or interests in this little Dialogue: (1) the dialectical development of the idea of piety; (2) the antithesis of true and false religion, which is carried to a certain extent only; (3) the defence of Socrates.

The subtle connection with the *Apology* and the *Crito*; the holding back of the conclusion, as in the *Charmides*, *Lysis*, *Laches*, *Protagoras*, and other Dialogues; the deep insight into the religious world; the dramatic power and play of the two characters; the inimitable irony, are reasons for believing that the *Euthyphro* is a genuine Platonic writing. The spirit in which the popular representations of mythology are denounced recalls *Republic II*. The virtue of piety has been already mentioned as one of five in the *Protagoras*, but is not reckoned among the four cardinal virtues of *Republic IV*. The figure of *Daedalus* has occurred in the *Meno*; that of *Proteus* in the *Euthydemus* and *Io*. The kingly science has already appeared in the *Euthydemus*, and will reappear in the *Republic* and *Statesman*. But neither from these nor any other indications of similarity or difference, and still less from arguments respecting the suitableness of this little work to aid Socrates at the time of his trial or the reverse, can any evidence of the date be obtained.

EUTHYPHRO

PERSONS OF THE DIALOGUE: Socrates, Euthyphro.

SCENE: The Porch of the King Archon.

EUTHYPHRO: Why have you left the Lyceum, Socrates? and what are you doing in the Porch of the King Archon? Surely you cannot be concerned in a suit before the King, like myself?

SOCRATES: Not in a suit, Euthyphro; impeachment is the word which the Athenians use.

EUTHYPHRO: What! I suppose that some one has been prosecuting you, for I cannot believe that you are the prosecutor of another.

SOCRATES: Certainly not.

EUTHYPHRO: Then some one else has been prosecuting you?

SOCRATES: Yes.

EUTHYPHRO: And who is he?

SOCRATES: A young man who is little known, Euthyphro; and I hardly know him: his name is Meletus, and he is of the deme of Pitthis. Perhaps you may remember his appearance; he has a beak, and long straight hair, and a beard which is ill grown.

EUTHYPHRO: No, I do not remember him, Socrates. But what is the charge which he brings against you?

SOCRATES: What is the charge? Well, a very serious charge, which shows a good deal of character in the young man, and for which he is certainly not to be despised. He says he knows how the youth are corrupted and who are their corruptors. I fancy that he must be a wise man, and seeing that I am the reverse of a wise man, he has found me out, and is going to accuse me of corrupting his young friends. And of this our mother the state is to be the judge. Of all our political men he is the only one who seems to me to begin in the right way, with

the cultivation of virtue in youth; like a good husbandman, he makes the young shoots his first care, and clears away us who are the destroyers of them. This is only the first step; he will afterwards attend to the elder branches; and if he goes on as he has begun, he will be a very great public benefactor.

EUTHYPHRO: I hope that he may; but I rather fear, Socrates, that the opposite will turn out to be the truth. My opinion is that in attacking you he is simply aiming a blow at the foundation of the state. But in what way does he say that you corrupt the young?

SOCRATES: He brings a wonderful accusation against me, which at first hearing excites surprise: he says that I am a poet or maker of gods, and that I invent new gods and deny the existence of old ones; this is the ground of his indictment.

EUTHYPHRO: I understand, Socrates; he means to attack you about the familiar sign which occasionally, as you say, comes to you. He thinks that you are a neologian, and he is going to have you up before the court for this. He knows that such a charge is readily received by the world, as I myself know too well; for when I speak in the assembly about divine things, and foretell the future to them, they laugh at me and think me a madman. Yet every word that I say is true. But they are jealous of us all; and we must be brave and go at them.

SOCRATES: Their laughter, friend Euthyphro, is not a matter of much consequence. For a man may be thought wise; but the Athenians, I suspect, do not much trouble themselves about him until he begins to impart his wisdom to others, and then for some reason or other, perhaps, as you say, from jealousy, they are angry.

EUTHYPHRO: I am never likely to try their temper in this way.

SOCRATES: I dare say not, for you are reserved in your behaviour, and seldom impart your wisdom. But I have a benevolent habit of pouring out myself to everybody, and would even pay for a listener, and I am afraid that the Athenians may think me too talkative. Now if, as I was saying, they would only laugh at me, as you say that they

laugh at you, the time might pass gaily enough in the court; but perhaps they may be in earnest, and then what the end will be you soothsayers only can predict.

EUTHYPHRO: I dare say that the affair will end in nothing, Socrates, and that you will win your cause; and I think that I shall win my own.

SOCRATES: And what is your suit, Euthyphro? are you the pursuer or the defendant?

EUTHYPHRO: I am the pursuer.

SOCRATES: Of whom?

EUTHYPHRO: You will think me mad when I tell you.

SOCRATES: Why, has the fugitive wings?

EUTHYPHRO: Nay, he is not very volatile at his time of life.

SOCRATES: Who is he?

EUTHYPHRO: My father.

SOCRATES: Your father! my good man?

EUTHYPHRO: Yes.

SOCRATES: And of what is he accused?

EUTHYPHRO: Of murder, Socrates.

SOCRATES: By the powers, Euthyphro! how little does the common herd know of the nature of right and truth. A man must be an extraordinary man, and have made great strides in wisdom, before he could have seen his way to bring such an action.

EUTHYPHRO: Indeed, Socrates, he must.

SOCRATES: I suppose that the man whom your father murdered was one of your relatives — clearly he was; for if he had been a stranger you would never have thought of prosecuting him.

EUTHYPHRO: I am amused, Socrates, at your making a distinction between one who is a relation and one who is not a relation; for surely the pollution is the same in either case, if you knowingly associate with the murderer when you ought to clear yourself and him by proceeding against him. The real question is whether the murdered man has been justly slain. If justly, then your duty is to let the matter alone; but if unjustly, then even if the murderer lives under the same roof with you and eats at the same table, proceed against him. Now the man who is dead was a poor dependant of mine who worked for us as a field labourer on our farm in Naxos, and one day in a fit of drunken passion he got into a quarrel with one of our domestic servants and slew him. My father bound him hand and foot and threw him into a ditch, and then sent to Athens to ask of a diviner what he should do with him. Meanwhile he never attended to him and took no care about him, for he regarded him as a murderer; and thought that no great harm would be done even if he did die. Now this was just what happened. For such was the effect of cold and hunger and chains upon him, that before the messenger returned from the diviner, he was dead. And my father and family are angry with me for taking the part of the murderer and prosecuting my father. They say that he did not kill him, and that if he did, the dead man was but a murderer, and I ought not to take any notice, for that a son is impious who prosecutes a father. Which shows, Socrates, how little they know what the gods think about piety and impiety.

SOCRATES: Good heavens, Euthyphro! and is your knowledge of religion and of things pious and impious so very exact, that, supposing the circumstances to be as you state them, you are not afraid lest you too may be doing an impious thing in bringing an action against your father?

EUTHYPHRO: The best of Euthyphro, and that which distinguishes him, Socrates, from other men, is his exact knowledge of all such matters. What should I be good for without it?

SOCRATES: Rare friend! I think that I cannot do better than be your disciple. Then before the trial with Meletus comes on I shall challenge him, and say that I have always had a great interest in

religious questions, and now, as he charges me with rash imaginations and innovations in religion, I have become your disciple. You, Meletus, as I shall say to him, acknowledge Euthyphro to be a great theologian, and sound in his opinions; and if you approve of him you ought to approve of me, and not have me into court; but if you disapprove, you should begin by indicting him who is my teacher, and who will be the ruin, not of the young, but of the old; that is to say, of myself whom he instructs, and of his old father whom he admonishes and chastises. And if Meletus refuses to listen to me, but will go on, and will not shift the indictment from me to you, I cannot do better than repeat this challenge in the court.

EUTHYPHRO: Yes, indeed, Socrates; and if he attempts to indict me I am mistaken if I do not find a flaw in him; the court shall have a great deal more to say to him than to me.

SOCRATES: And I, my dear friend, knowing this, am desirous of becoming your disciple. For I observe that no one appears to notice you — not even this Meletus; but his sharp eyes have found me out at once, and he has indicted me for impiety. And therefore, I adjure you to tell me the nature of piety and impiety, which you said that you knew so well, and of murder, and of other offences against the gods. What are they? Is not piety in every action always the same? and impiety, again — is it not always the opposite of piety, and also the same with itself, having, as impiety, one notion which includes whatever is impious?

EUTHYPHRO: To be sure, Socrates.

SOCRATES: And what is piety, and what is impiety?

EUTHYPHRO: Piety is doing as I am doing; that is to say, prosecuting any one who is guilty of murder, sacrilege, or of any similar crime — whether he be your father or mother, or whoever he may be — that makes no difference; and not to prosecute them is impiety. And please to consider, Socrates, what a notable proof I will give you of the truth of my words, a proof which I have already given to others: — of the principle, I mean, that the impious,

whoever he may be, ought not to go unpunished. For do not men regard Zeus as the best and most righteous of the gods? — and yet they admit that he bound his father (Cronos) because he wickedly devoured his sons, and that he too had punished his own father (Uranus) for a similar reason, in a nameless manner. And yet when I proceed against my father, they are angry with me. So inconsistent are they in their way of talking when the gods are concerned, and when I am concerned.

SOCRATES: May not this be the reason, Euthyphro, why I am charged with impiety — that I cannot away with these stories about the gods? and therefore I suppose that people think me wrong. But, as you who are well informed about them approve of them, I cannot do better than assent to your superior wisdom. What else can I say, confessing as I do, that I know nothing about them? Tell me, for the love of Zeus, whether you really believe that they are true.

EUTHYPHRO: Yes, Socrates; and things more wonderful still, of which the world is in ignorance.

SOCRATES: And do you really believe that the gods fought with one another, and had dire quarrels, battles, and the like, as the poets say, and as you may see represented in the works of great artists? The temples are full of them; and notably the robe of Athene, which is carried up to the Acropolis at the great Panathenaea, is embroidered with them. Are all these tales of the gods true, Euthyphro?

EUTHYPHRO: Yes, Socrates; and, as I was saying, I can tell you, if you would like to hear them, many other things about the gods which would quite amaze you.

SOCRATES: I dare say; and you shall tell me them at some other time when I have leisure. But just at present I would rather hear from you a more precise answer, which you have not as yet given, my friend, to the question, What is ‘piety’? When asked, you only replied, Doing as you do, charging your father with murder.

EUTHYPHRO: And what I said was true, Socrates.

SOCRATES: No doubt, Euthyphro; but you would admit that there are many other pious acts?

EUTHYPHRO: There are.

SOCRATES: Remember that I did not ask you to give me two or three examples of piety, but to explain the general idea which makes all pious things to be pious. Do you not recollect that there was one idea which made the impious impious, and the pious pious?

EUTHYPHRO: I remember.

SOCRATES: Tell me what is the nature of this idea, and then I shall have a standard to which I may look, and by which I may measure actions, whether yours or those of any one else, and then I shall be able to say that such and such an action is pious, such another impious.

EUTHYPHRO: I will tell you, if you like.

SOCRATES: I should very much like.

EUTHYPHRO: Piety, then, is that which is dear to the gods, and impiety is that which is not dear to them.

SOCRATES: Very good, Euthyphro; you have now given me the sort of answer which I wanted. But whether what you say is true or not I cannot as yet tell, although I make no doubt that you will prove the truth of your words.

EUTHYPHRO: Of course.

SOCRATES: Come, then, and let us examine what we are saying. That thing or person which is dear to the gods is pious, and that thing or person which is hateful to the gods is impious, these two being the extreme opposites of one another. Was not that said?

EUTHYPHRO: It was.

SOCRATES: And well said?

EUTHYPHRO: Yes, Socrates, I thought so; it was certainly said.

SOCRATES: And further, Euthyphro, the gods were admitted to have enmities and hatreds and differences?

EUTHYPHRO: Yes, that was also said.

SOCRATES: And what sort of difference creates enmity and anger? Suppose for example that you and I, my good friend, differ about a number; do differences of this sort make us enemies and set us at variance with one another? Do we not go at once to arithmetic, and put an end to them by a sum?

EUTHYPHRO: True.

SOCRATES: Or suppose that we differ about magnitudes, do we not quickly end the differences by measuring?

EUTHYPHRO: Very true.

SOCRATES: And we end a controversy about heavy and light by resorting to a weighing machine?

EUTHYPHRO: To be sure.

SOCRATES: But what differences are there which cannot be thus decided, and which therefore make us angry and set us at enmity with one another? I dare say the answer does not occur to you at the moment, and therefore I will suggest that these enmities arise when the matters of difference are the just and unjust, good and evil, honourable and dishonourable. Are not these the points about which men differ, and about which when we are unable satisfactorily to decide our differences, you and I and all of us quarrel, when we do quarrel? (Compare Alcib.)

EUTHYPHRO: Yes, Socrates, the nature of the differences about which we quarrel is such as you describe.

SOCRATES: And the quarrels of the gods, noble Euthyphro, when they occur, are of a like nature?

EUTHYPHRO: Certainly they are.

SOCRATES: They have differences of opinion, as you say, about good and evil, just and unjust, honourable and dishonourable: there would have been no quarrels among them, if there had been no such differences — would there now?

EUTHYPHRO: You are quite right.

SOCRATES: Does not every man love that which he deems noble and just and good, and hate the opposite of them?

EUTHYPHRO: Very true.

SOCRATES: But, as you say, people regard the same things, some as just and others as unjust, — about these they dispute; and so there arise wars and fightings among them.

EUTHYPHRO: Very true.

SOCRATES: Then the same things are hated by the gods and loved by the gods, and are both hateful and dear to them?

EUTHYPHRO: True.

SOCRATES: And upon this view the same things, Euthyphro, will be pious and also impious?

EUTHYPHRO: So I should suppose.

SOCRATES: Then, my friend, I remark with surprise that you have not answered the question which I asked. For I certainly did not ask you to tell me what action is both pious and impious: but now it would seem that what is loved by the gods is also hated by them. And therefore, Euthyphro, in thus chastising your father you may very likely be doing what is agreeable to Zeus but disagreeable to Cronos or Uranus, and what is acceptable to Hephaestus but unacceptable to Here, and there may be other gods who have similar differences of opinion.

EUTHYPHRO: But I believe, Socrates, that all the gods would be

agreed as to the propriety of punishing a murderer: there would be no difference of opinion about that.

SOCRATES: Well, but speaking of men, Euthyphro, did you ever hear any one arguing that a murderer or any sort of evil-doer ought to be let off?

EUTHYPHRO: I should rather say that these are the questions which they are always arguing, especially in courts of law: they commit all sorts of crimes, and there is nothing which they will not do or say in their own defence.

SOCRATES: But do they admit their guilt, Euthyphro, and yet say that they ought not to be punished?

EUTHYPHRO: No; they do not.

SOCRATES: Then there are some things which they do not venture to say and do: for they do not venture to argue that the guilty are to be unpunished, but they deny their guilt, do they not?

EUTHYPHRO: Yes.

SOCRATES: Then they do not argue that the evil-doer should not be punished, but they argue about the fact of who the evil-doer is, and what he did and when?

EUTHYPHRO: True.

SOCRATES: And the gods are in the same case, if as you assert they quarrel about just and unjust, and some of them say while others deny that injustice is done among them. For surely neither God nor man will ever venture to say that the doer of injustice is not to be punished?

EUTHYPHRO: That is true, Socrates, in the main.

SOCRATES: But they join issue about the particulars — gods and men alike; and, if they dispute at all, they dispute about some act which is called in question, and which by some is affirmed to be just, by others to be unjust. Is not that true?

EUTHYPHRO: Quite true.

SOCRATES: Well then, my dear friend Euthyphro, do tell me, for my better instruction and information, what proof have you that in the opinion of all the gods a servant who is guilty of murder, and is put in chains by the master of the dead man, and dies because he is put in chains before he who bound him can learn from the interpreters of the gods what he ought to do with him, dies unjustly; and that on behalf of such an one a son ought to proceed against his father and accuse him of murder. How would you show that all the gods absolutely agree in approving of his act? Prove to me that they do, and I will applaud your wisdom as long as I live.

EUTHYPHRO: It will be a difficult task; but I could make the matter very clear indeed to you.

SOCRATES: I understand; you mean to say that I am not so quick of apprehension as the judges: for to them you will be sure to prove that the act is unjust, and hateful to the gods.

EUTHYPHRO: Yes indeed, Socrates; at least if they will listen to me.

SOCRATES: But they will be sure to listen if they find that you are a good speaker. There was a notion that came into my mind while you were speaking; I said to myself: 'Well, and what if Euthyphro does prove to me that all the gods regarded the death of the serf as unjust, how do I know anything more of the nature of piety and impiety? for granting that this action may be hateful to the gods, still piety and impiety are not adequately defined by these distinctions, for that which is hateful to the gods has been shown to be also pleasing and dear to them.' And therefore, Euthyphro, I do not ask you to prove this; I will suppose, if you like, that all the gods condemn and abominate such an action. But I will amend the definition so far as to say that what all the gods hate is impious, and what they love pious or holy; and what some of them love and others hate is both or neither. Shall this be our definition of piety and impiety?

EUTHYPHRO: Why not, Socrates?

SOCRATES: Why not! certainly, as far as I am concerned, Euthyphro, there is no reason why not. But whether this admission will greatly assist you in the task of instructing me as you promised, is a matter for you to consider.

EUTHYPHRO: Yes, I should say that what all the gods love is pious and holy, and the opposite which they all hate, impious.

SOCRATES: Ought we to enquire into the truth of this, Euthyphro, or simply to accept the mere statement on our own authority and that of others? What do you say?

EUTHYPHRO: We should enquire; and I believe that the statement will stand the test of enquiry.

SOCRATES: We shall know better, my good friend, in a little while. The point which I should first wish to understand is whether the pious or holy is beloved by the gods because it is holy, or holy because it is beloved of the gods.

EUTHYPHRO: I do not understand your meaning, Socrates.

SOCRATES: I will endeavour to explain: we, speak of carrying and we speak of being carried, of leading and being led, seeing and being seen. You know that in all such cases there is a difference, and you know also in what the difference lies?

EUTHYPHRO: I think that I understand.

SOCRATES: And is not that which is beloved distinct from that which loves?

EUTHYPHRO: Certainly.

SOCRATES: Well; and now tell me, is that which is carried in this state of carrying because it is carried, or for some other reason?

EUTHYPHRO: No; that is the reason.

SOCRATES: And the same is true of what is led and of what is seen?

EUTHYPHRO: True.

SOCRATES: And a thing is not seen because it is visible, but conversely, visible because it is seen; nor is a thing led because it is in the state of being led, or carried because it is in the state of being carried, but the converse of this. And now I think, Euthyphro, that my meaning will be intelligible; and my meaning is, that any state of action or passion implies previous action or passion. It does not become because it is becoming, but it is in a state of becoming because it becomes; neither does it suffer because it is in a state of suffering, but it is in a state of suffering because it suffers. Do you not agree?

EUTHYPHRO: Yes.

SOCRATES: Is not that which is loved in some state either of becoming or suffering?

EUTHYPHRO: Yes.

SOCRATES: And the same holds as in the previous instances; the state of being loved follows the act of being loved, and not the act the state.

EUTHYPHRO: Certainly.

SOCRATES: And what do you say of piety, Euthyphro: is not piety, according to your definition, loved by all the gods?

EUTHYPHRO: Yes.

SOCRATES: Because it is pious or holy, or for some other reason?

EUTHYPHRO: No, that is the reason.

SOCRATES: It is loved because it is holy, not holy because it is loved?

EUTHYPHRO: Yes.

SOCRATES: And that which is dear to the gods is loved by them,

and is in a state to be loved of them because it is loved of them?

EUTHYPHRO: Certainly.

SOCRATES: Then that which is dear to the gods, Euthyphro, is not holy, nor is that which is holy loved of God, as you affirm; but they are two different things.

EUTHYPHRO: How do you mean, Socrates?

SOCRATES: I mean to say that the holy has been acknowledged by us to be loved of God because it is holy, not to be holy because it is loved.

EUTHYPHRO: Yes.

SOCRATES: But that which is dear to the gods is dear to them because it is loved by them, not loved by them because it is dear to them.

EUTHYPHRO: True.

SOCRATES: But, friend Euthyphro, if that which is holy is the same with that which is dear to God, and is loved because it is holy, then that which is dear to God would have been loved as being dear to God; but if that which is dear to God is dear to him because loved by him, then that which is holy would have been holy because loved by him. But now you see that the reverse is the case, and that they are quite different from one another. For one (theophiles) is of a kind to be loved cause it is loved, and the other (osion) is loved because it is of a kind to be loved. Thus you appear to me, Euthyphro, when I ask you what is the essence of holiness, to offer an attribute only, and not the essence — the attribute of being loved by all the gods. But you still refuse to explain to me the nature of holiness. And therefore, if you please, I will ask you not to hide your treasure, but to tell me once more what holiness or piety really is, whether dear to the gods or not (for that is a matter about which we will not quarrel); and what is impiety?

EUTHYPHRO: I really do not know, Socrates, how to express what I

mean. For somehow or other our arguments, on whatever ground we rest them, seem to turn round and walk away from us.

SOCRATES: Your words, Euthyphro, are like the handiwork of my ancestor Daedalus; and if I were the sayer or propounder of them, you might say that my arguments walk away and will not remain fixed where they are placed because I am a descendant of his. But now, since these notions are your own, you must find some other gibe, for they certainly, as you yourself allow, show an inclination to be on the move.

EUTHYPHRO: Nay, Socrates, I shall still say that you are the Daedalus who sets arguments in motion; not I, certainly, but you make them move or go round, for they would never have stirred, as far as I am concerned.

SOCRATES: Then I must be a greater than Daedalus: for whereas he only made his own inventions to move, I move those of other people as well. And the beauty of it is, that I would rather not. For I would give the wisdom of Daedalus, and the wealth of Tantalus, to be able to detain them and keep them fixed. But enough of this. As I perceive that you are lazy, I will myself endeavour to show you how you might instruct me in the nature of piety; and I hope that you will not grudge your labour. Tell me, then — Is not that which is pious necessarily just?

EUTHYPHRO: Yes.

SOCRATES: And is, then, all which is just pious? or, is that which is pious all just, but that which is just, only in part and not all, pious?

EUTHYPHRO: I do not understand you, Socrates.

SOCRATES: And yet I know that you are as much wiser than I am, as you are younger. But, as I was saying, revered friend, the abundance of your wisdom makes you lazy. Please to exert yourself, for there is no real difficulty in understanding me. What I mean I may explain by an illustration of what I do not mean. The poet (Stasinus) sings —

‘Of Zeus, the author and creator of all these things, You will not tell: for where there is fear there is also reverence.’

Now I disagree with this poet. Shall I tell you in what respect?

EUTHYPHRO: By all means.

SOCRATES: I should not say that where there is fear there is also reverence; for I am sure that many persons fear poverty and disease, and the like evils, but I do not perceive that they reverence the objects of their fear.

EUTHYPHRO: Very true.

SOCRATES: But where reverence is, there is fear; for he who has a feeling of reverence and shame about the commission of any action, fears and is afraid of an ill reputation.

EUTHYPHRO: No doubt.

SOCRATES: Then we are wrong in saying that where there is fear there is also reverence; and we should say, where there is reverence there is also fear. But there is not always reverence where there is fear; for fear is a more extended notion, and reverence is a part of fear, just as the odd is a part of number, and number is a more extended notion than the odd. I suppose that you follow me now?

EUTHYPHRO: Quite well.

SOCRATES: That was the sort of question which I meant to raise when I asked whether the just is always the pious, or the pious always the just; and whether there may not be justice where there is not piety; for justice is the more extended notion of which piety is only a part. Do you dissent?

EUTHYPHRO: No, I think that you are quite right.

SOCRATES: Then, if piety is a part of justice, I suppose that we should enquire what part? If you had pursued the enquiry in the previous cases; for instance, if you had asked me what is an even number, and what part of number the even is, I should have had no

difficulty in replying, a number which represents a figure having two equal sides. Do you not agree?

EUTHYPHRO: Yes, I quite agree.

SOCRATES: In like manner, I want you to tell me what part of justice is piety or holiness, that I may be able to tell Meletus not to do me injustice, or indict me for impiety, as I am now adequately instructed by you in the nature of piety or holiness, and their opposites.

EUTHYPHRO: Piety or holiness, Socrates, appears to me to be that part of justice which attends to the gods, as there is the other part of justice which attends to men.

SOCRATES: That is good, Euthyphro; yet still there is a little point about which I should like to have further information, What is the meaning of 'attention'? For attention can hardly be used in the same sense when applied to the gods as when applied to other things. For instance, horses are said to require attention, and not every person is able to attend to them, but only a person skilled in horsemanship. Is it not so?

EUTHYPHRO: Certainly.

SOCRATES: I should suppose that the art of horsemanship is the art of attending to horses?

EUTHYPHRO: Yes.

SOCRATES: Nor is every one qualified to attend to dogs, but only the huntsman?

EUTHYPHRO: True.

SOCRATES: And I should also conceive that the art of the huntsman is the art of attending to dogs?

EUTHYPHRO: Yes.

SOCRATES: As the art of the oxherd is the art of attending to oxen?

EUTHYPHRO: Very true.

SOCRATES: In like manner holiness or piety is the art of attending to the gods? — that would be your meaning, Euthyphro?

EUTHYPHRO: Yes.

SOCRATES: And is not attention always designed for the good or benefit of that to which the attention is given? As in the case of horses, you may observe that when attended to by the horseman's art they are benefited and improved, are they not?

EUTHYPHRO: True.

SOCRATES: As the dogs are benefited by the huntsman's art, and the oxen by the art of the oxherd, and all other things are tended or attended for their good and not for their hurt?

EUTHYPHRO: Certainly, not for their hurt.

SOCRATES: But for their good?

EUTHYPHRO: Of course.

SOCRATES: And does piety or holiness, which has been defined to be the art of attending to the gods, benefit or improve them? Would you say that when you do a holy act you make any of the gods better?

EUTHYPHRO: No, no; that was certainly not what I meant.

SOCRATES: And I, Euthyphro, never supposed that you did. I asked you the question about the nature of the attention, because I thought that you did not.

EUTHYPHRO: You do me justice, Socrates; that is not the sort of attention which I mean.

SOCRATES: Good: but I must still ask what is this attention to the gods which is called piety?

EUTHYPHRO: It is such, Socrates, as servants show to their

masters.

SOCRATES: I understand — a sort of ministration to the gods.

EUTHYPHRO: Exactly.

SOCRATES: Medicine is also a sort of ministration or service, having in view the attainment of some object — would you not say of health?

EUTHYPHRO: I should.

SOCRATES: Again, there is an art which ministers to the ship-builder with a view to the attainment of some result?

EUTHYPHRO: Yes, Socrates, with a view to the building of a ship.

SOCRATES: As there is an art which ministers to the house-builder with a view to the building of a house?

EUTHYPHRO: Yes.

SOCRATES: And now tell me, my good friend, about the art which ministers to the gods: what work does that help to accomplish? For you must surely know if, as you say, you are of all men living the one who is best instructed in religion.

EUTHYPHRO: And I speak the truth, Socrates.

SOCRATES: Tell me then, oh tell me — what is that fair work which the gods do by the help of our ministrations?

EUTHYPHRO: Many and fair, Socrates, are the works which they do.

SOCRATES: Why, my friend, and so are those of a general. But the chief of them is easily told. Would you not say that victory in war is the chief of them?

EUTHYPHRO: Certainly.

SOCRATES: Many and fair, too, are the works of the husbandman, if

I am not mistaken; but his chief work is the production of food from the earth?

EUTHYPHRO: Exactly.

SOCRATES: And of the many and fair things done by the gods, which is the chief or principal one?

EUTHYPHRO: I have told you already, Socrates, that to learn all these things accurately will be very tiresome. Let me simply say that piety or holiness is learning how to please the gods in word and deed, by prayers and sacrifices. Such piety is the salvation of families and states, just as the impious, which is displeasing to the gods, is their ruin and destruction.

SOCRATES: I think that you could have answered in much fewer words the chief question which I asked, Euthyphro, if you had chosen. But I see plainly that you are not disposed to instruct me — clearly not: else why, when we reached the point, did you turn aside? Had you only answered me I should have truly learned of you by this time the nature of piety. Now, as the asker of a question is necessarily dependent on the answerer, whither he leads I must follow; and can only ask again, what is the pious, and what is piety? Do you mean that they are a sort of science of praying and sacrificing?

EUTHYPHRO: Yes, I do.

SOCRATES: And sacrificing is giving to the gods, and prayer is asking of the gods?

EUTHYPHRO: Yes, Socrates.

SOCRATES: Upon this view, then, piety is a science of asking and giving?

EUTHYPHRO: You understand me capitally, Socrates.

SOCRATES: Yes, my friend; the reason is that I am a votary of your science, and give my mind to it, and therefore nothing which you say will be thrown away upon me. Please then to tell me, what is the

nature of this service to the gods? Do you mean that we prefer requests and give gifts to them?

EUTHYPHRO: Yes, I do.

SOCRATES: Is not the right way of asking to ask of them what we want?

EUTHYPHRO: Certainly.

SOCRATES: And the right way of giving is to give to them in return what they want of us. There would be no meaning in an art which gives to any one that which he does not want.

EUTHYPHRO: Very true, Socrates.

SOCRATES: Then piety, Euthyphro, is an art which gods and men have of doing business with one another?

EUTHYPHRO: That is an expression which you may use, if you like.

SOCRATES: But I have no particular liking for anything but the truth. I wish, however, that you would tell me what benefit accrues to the gods from our gifts. There is no doubt about what they give to us; for there is no good thing which they do not give; but how we can give any good thing to them in return is far from being equally clear. If they give everything and we give nothing, that must be an affair of business in which we have very greatly the advantage of them.

EUTHYPHRO: And do you imagine, Socrates, that any benefit accrues to the gods from our gifts?

SOCRATES: But if not, Euthyphro, what is the meaning of gifts which are conferred by us upon the gods?

EUTHYPHRO: What else, but tributes of honour; and, as I was just now saying, what pleases them?

SOCRATES: Piety, then, is pleasing to the gods, but not beneficial or dear to them?

EUTHYPHRO: I should say that nothing could be dearer.

SOCRATES: Then once more the assertion is repeated that piety is dear to the gods?

EUTHYPHRO: Certainly.

SOCRATES: And when you say this, can you wonder at your words not standing firm, but walking away? Will you accuse me of being the Daedalus who makes them walk away, not perceiving that there is another and far greater artist than Daedalus who makes them go round in a circle, and he is yourself; for the argument, as you will perceive, comes round to the same point. Were we not saying that the holy or pious was not the same with that which is loved of the gods? Have you forgotten?

EUTHYPHRO: I quite remember.

SOCRATES: And are you not saying that what is loved of the gods is holy; and is not this the same as what is dear to them — do you see?

EUTHYPHRO: True.

SOCRATES: Then either we were wrong in our former assertion; or, if we were right then, we are wrong now.

EUTHYPHRO: One of the two must be true.

SOCRATES: Then we must begin again and ask, What is piety? That is an enquiry which I shall never be weary of pursuing as far as in me lies; and I entreat you not to scorn me, but to apply your mind to the utmost, and tell me the truth. For, if any man knows, you are he; and therefore I must detain you, like Proteus, until you tell. If you had not certainly known the nature of piety and impiety, I am confident that you would never, on behalf of a serf, have charged your aged father with murder. You would not have run such a risk of doing wrong in the sight of the gods, and you would have had too much respect for the opinions of men. I am sure, therefore, that you know the nature of piety and impiety. Speak out then, my dear Euthyphro, and do not hide your knowledge.

EUTHYPHRO: Another time, Socrates; for I am in a hurry, and must go now.

SOCRATES: Alas! my companion, and will you leave me in despair? I was hoping that you would instruct me in the nature of piety and impiety; and then I might have cleared myself of Meletus and his indictment. I would have told him that I had been enlightened by Euthyphro, and had given up rash innovations and speculations, in which I indulged only through ignorance, and that now I am about to lead a better life.

APOLOGY

Translated by Henry Cary

This is a copy of the speech given by Socrates when he unsuccessfully defended himself against the charges of “corrupting the young, and by not believing in the gods in whom the city believes” in 399BC. Plato’s Apology is generally regarded as the most reliable source of information about Socrates’ trial.

Except for two brief exchanges with Meletus, where the monologue becomes a dialogue, the text is written in the first person from Socrates’ point of view, as though it were his actual speech at the trial. During the course of the speech, Socrates twice mentions Plato as being present.

The Apology begins with Socrates saying he doubts whether the men of Athens (the jury) have been truly persuaded by his accusers. Socrates goes on to suggest that philosophy begins with a sincere admission of ignorance; he later clarifies this, stating that whatever wisdom he has, comes from his knowledge that he knows nothing.

Socrates’ speech proves how he was a master orator, who is eloquent, persuasive and wise. Nevertheless, the speech (which we can only trust to being what Socrates really said) did not win him acquittal and so he was sentenced to death.

A Victorian depiction of Socrates' trial

Another depiction of Socrates' trial

INTRODUCTION.

Of all writers of speculative philosophy, both ancient and modern, there is probably no one who has attained so eminent a position as Plato. What Homer was to Epic poetry, what Cicero and Demosthenes were to oratory, and what Shakespeare was to the drama of England, Plato was to ancient philosophy, not unapproachable nor unapproached, but possessing an inexplicable but unquestioned supremacy.

The authentic records of his life are meagre, and much that has been written concerning him is of a speculative nature. He was born at Athens in the year 427 B.C. His father's name was Ariston, and his mother's family, which claimed its descent from Solon, included among its members many Athenian notables, among whom was Oritias, one of the thirty tyrants.

In his early youth Plato applied himself to poetry and painting, both of which pursuits he relinquished to become the disciple and follower of Socrates. It is said that his name was originally Aristocles, but that it was changed to Plato on account of the breadth of his shoulders and forehead. He is also said to have been an expert wrestler and to have taken part in several important battles.

He was the devoted friend and pupil of Socrates, and during the imprisonment of his master he attended him constantly, and committed to writing his last discourses on the immortality of the soul.

After the death of Socrates it is supposed that Plato took refuge with Euclides in Megara, and subsequently extended his travels into Magna Graecia and Egypt.

Upon his return to Athens he taught those who came to him for instruction in the grove named Academus, near the Cephissus, and thus founded the first great philosophical school, over which he continued to preside until the day of his death. Above the entrance to this grove was inscribed the legend: "Let no one ignorant of geometry enter here." Here he was attended by persons of every description, among the more illustrious of whom were Aristotle, Lycurgus, Demosthenes and Isocrates.

There is a story to the effect that Plato three times visited Sicily, once upon the invitation of the elder Dionysius, and twice at the earnest solicitations of the younger. The former he is said to have so seriously offended as to cause the tyrant to have him seized on his return home and sold as a slave, from which state of bondage he was, however, released by Anicerius of Cyrene.

The people of his time thought more of him than they did of all their other philosophers, and called him the Divine Plato. So great was the regard and veneration for him that it was considered better to err with Plato than be right with any one else.

The writings of Plato are numerous, and most of them are in the form of dialogues. The following pages contain translations of three of his works, viz.: "The Apologia," "The Crito" and "The Phædo," all of which have reference to the trial, imprisonment and death of Socrates.

"The Apologia" represents Socrates on trial for his life, undertaking his own defence, though unaccustomed to the language of the courts, the occasion being, as he says, the first time he has ever been before a court of justice, though seventy years of age. Plato was present at the trial, and no doubt gives us the very arguments used by the accused. Two charges were brought against Socrates — one that he did not believe in the gods recognized by the State, the other that he had corrupted the Athenian youth by his teachings. Socrates does not have recourse to the ordinary methods adopted by orators on similar occasions. He prefers to stand upon his own integrity and innocence, uninfluenced by the fear of that imaginary evil, death. He, therefore, does not firmly grapple with either of the charges preferred against him. He neither denies nor confesses the first accusation, but shows that in several instances he conformed to the religious customs of his country, and that he believes in God more than he fears man. The second charge he meets by a cross-examination of his accuser, Melitus, whom he reduces to the dilemma of charging him with corrupting the youth designedly, which would be absurd, or with doing so undesignedly, for which he could not be liable to punishment.

His defence, however, avails him nothing, and he is condemned by the judges to die by drinking the poisonous hemlock. In the

closing part of "The Apologia" Socrates is represented as commenting upon the sentence which has been passed upon him, and as expressing his belief that in going to his death he is only passing to a better and a happier life.

In "The Crito" Socrates is represented in conversation with a friend of his named Crito, who had been present at his trial, and who had offered to assist Socrates in paying a fine, had a fine been the sentence imposed. Crito visits Socrates in his confinement to bring to him the intelligence that the ship, the arrival of which was to be the signal for his death upon the following day, would arrive forthwith, and to urge him to adopt the means of escape which had already been prepared. Socrates promises to follow the advice of Crito if, upon a full discussion of the matter, it seems right to do so. In the conversation which ensues Socrates argues that it is wrong to return evil for evil and that the obligations which a citizen owes to his State are more binding than those which a child owes his parents or a slave his master, and, therefore, it is his duty to submit to the laws of Athens at whatever cost to himself. Crito has no answer to make to this argument, and Socrates thereupon decides to submit to his fate.

Plato is said to have had two objects in writing this dialogue: First, to acquit Socrates of the charge of corrupting the Athenian youth; and, second, to establish the fact that it is necessary under all circumstances to submit to the established laws of his country.

"The Phædo" relates the manner in which Socrates spent the last day of his life and the circumstances attending his death. He is visited by a number of his friends, among whom are Phædo, Simmias and Crito. When his friends arrive they find him sitting upon a bed rubbing his legs, which have just been released from bonds. He remarks upon the unaccountable connection between pleasure and pain, and from this the conversation gradually turns to a consideration of the question of the immortality of the soul. He convinces his listeners of the pre-existence of the soul; but they are still skeptical as to its immortality, urging that its pre-existence and the fact that it is more durable than the body does not preclude the possibility of its being mortal. Socrates, however, argues that contraries cannot exist in the same thing at the same time, as, for example, the same object cannot partake of both magnitude and

littleness at the same time. In like manner, heat while it is heat can never admit the idea of cold. Life and death are contraries and can never coexist; but wherever there is life there is soul, so that the soul contains that which is contrary to death and can never admit death; consequently the soul is immortal.

Having convinced his listeners, Socrates bathes and takes leave of his children and the women of his family. Thereupon the officer appears and tells him it is time for him to drink the poison. At this his friends commence to weep and are rebuked by Socrates for their weakness. He drinks the poison calmly and without hesitation, and then begins to walk about, still conversing with his friends. His limbs soon grow stiff and heavy and he lays himself down upon his back. His last words are: "Crito, we owe a cock to Æsculapius; pay it, therefore, and do not neglect it."

THE APOLOGY OF SOCRATES.

I know not, O Athenians! how far you have been influenced by my accusers for my part, in listening to them I almost forgot myself, so plausible were their arguments however, so to speak, they have said nothing true. But of the many falsehoods which they uttered I wondered at one of them especially, that in which they said that you ought to be on your guard lest you should be deceived by me, as being eloquent in speech. For that they are not ashamed of being forthwith convicted by me in fact, when I shall show that I am not by any means eloquent, this seemed to me the most shameless thing in them, unless indeed they call him eloquent who speaks the truth. For, if they mean this, then I would allow that I am an orator, but not after their fashion for they, as I affirm, have said nothing true, but from me you shall hear the whole truth. Not indeed, Athenians, arguments highly wrought, as theirs were, with choice phrases and expressions, nor adorned, but you shall hear a speech uttered without premeditation in such words as first present themselves. For I am confident that what I say will be just, and let none of you expect otherwise, for surely it would not become my time of life to come before you like a youth with a got up speech. Above all things, therefore, I beg and implore this of you, O Athenians! if you hear me defending myself in the same language as that in which I am accustomed to speak both in the forum at the counters, where many of you have heard me, and elsewhere, not to be surprised or disturbed on this account. For the case is this: I now for the first time come before a court of justice, though more than seventy years old; I am therefore utterly a stranger to the language here. As, then, if I were really a stranger, you would have pardoned me if I spoke in the language and the manner in which I had been educated, so now I ask this of you as an act of justice, as it appears to me, to disregard the manner of my speech, for perhaps it may be somewhat worse, and perhaps better, and to consider this only, and to give your attention to this, whether I speak what is just or not; for this is the virtue of a judge, but of an orator to speak the truth.

2. First, then, O Athenians! I am right in defending myself against

the first false accusations alleged against me, and my first accusers, and then against the latest accusations, and the latest accusers. For many have been accusers of me to you, and for many years, who have asserted nothing true, of whom I am more afraid than of Anytus and his party, although they too are formidable; but those are still more formidable, Athenians, who, laying hold of many of you from childhood, have persuaded you, and accused me of what is not true: "that there is one Socrates, a wise man, who occupies himself about celestial matters, and has explored every thing under the earth, and makes the worse appear the better reason." Those, O Athenians! who have spread abroad this report are my formidable accusers; for they who hear them think that such as search into these things do not believe that there are gods. In the next place, these accusers are numerous, and have accused me now for a long time; moreover, they said these things to you at that time of life in which you were most credulous, when you were boys and some of you youths, and they accused me altogether in my absence, when there was no one to defend me. But the most unreasonable thing of all is, that it is not possible to learn and mention their names, except that one of them happens to be a comic poet. Such, however, as, influenced by envy and calumny, have persuaded you, and those who, being themselves persuaded, have persuaded others, all these are most difficult to deal with; for it is not possible to bring any of them forward here, nor to confute any; but it is altogether necessary to fight, as it were with a shadow, in making my defense, and to convict when there is no one to answer. Consider, therefore, as I have said, that my accusers are twofold, some who have lately accused me, and others long since, whom I have made mention of; and believe that I ought to defend myself against these first; for you heard them accusing me first, and much more than these last.

Well. I must make my defense, then, O Athenians! and endeavor in this so short a space of time to remove from your minds the calumny which you have long entertained. I wish, indeed, it might be so, if it were at all better both for you and me, and that in making my defense I could effect something more advantageous still: I think, however, that it will be difficult, and I am not entirely ignorant what the difficulty is. Nevertheless, let this turn out as may be pleasing to

God, I must obey the law and make my defense.

3. Let us, then, repeat from the beginning what the accusation is from which the calumny against me has arisen, and relying on which Melitus has preferred this indictment against me. Well. What, then, do they who charge me say in their charge? For it is necessary to read their deposition as of public accusers. "Socrates acts wickedly, and is criminally curious in searching into things under the earth, and in the heavens, and in making the worse appear the better cause, and in teaching these same things to others." Such is the accusation: for such things you have yourselves seen in the comedy of Aristophanes, one Socrates there carried about, saying that he walks in the air, and acting many other buffooneries, of which I understand nothing whatever. Nor do I say this as disparaging such a science, if there be any one skilled in such things, only let me not be prosecuted by Melitus on a charge of this kind; but I say it, O Athenians! because I have nothing to do with such matters. And I call upon most of you as witnesses of this, and require you to inform and tell each other, as many of you as have ever heard me conversing; and there are many such among you. Therefore tell each other, if any one of you has ever heard me conversing little or much on such subjects. And from this you will know that other things also, which the multitude assert of me, are of a similar nature.

4. However not one of these things is true; nor, if you have heard from any one that I attempt to teach men, and require payment, is this true. Though this, indeed, appears to me to be an honorable thing, if one should be able to instruct men, like Gorgias the Leontine, Prodicus the Cean, and Hippias the Elean. For each of these, O Athenians! is able, by going through the several cities, to persuade the young men, who can attach themselves gratuitously to such of their own fellow-citizens as they please, to abandon their fellow-citizens and associate with them, giving them money and thanks besides. There is also another wise man here, a Parian, who, I hear, is staying in the city. For I happened to visit a person who spends more money on the sophists than all others together: I mean Callias, son of Hipponicus. I therefore asked him, for he has two sons, "Callias," I said, "if your two sons were colts or calves, we should have had to choose a master for them, and hire a person who would make them

excel in such qualities as belong to their nature; and he would have been a groom or an agricultural laborer. But now, since your sons are men, what master do you intend to choose for them? Who is there skilled in the qualities that become a man and a citizen? For I suppose you must have considered this, since you have sons. Is there any one," I said, "or not?" "Certainly," he answered. "Who is he?" said I, "and whence does he come? and on what terms does he teach?" He replied, "Evenus the Parian, Socrates, for five minæ." And I deemed Evenus happy, if he really possesses this art, and teaches admirably. And I too should think highly of myself, and be very proud, if I possessed this knowledge, but I possess it not, O Athenians.

5. Perhaps, one of you may now object: "But, Socrates, what have you done, then? Whence have these calumnies against you arisen? For surely if you had not busied yourself more than others, such a report and story would never have got abroad, unless you had done something different from what most men do. Tell us, therefore, what it is, that we may not pass a hasty judgment on you." He who speaks thus appears to me to speak justly, and I will endeavor to show you what it is that has occasioned me this character and imputation. Listen, then: to some of you perhaps I shall appear to jest, yet be assured that I shall tell you the whole truth. For I, O Athenians! have acquired this character through nothing else than a certain wisdom. Of what kind, then, is this wisdom? Perhaps it is merely human wisdom. For in this, in truth, I appear to be wise. They probably, whom I have just now mentioned, possessed a wisdom more than human, otherwise I know not what to say about it; for I am not acquainted with it, and whosoever says I am, speaks falsely, and for the purpose of calumniating me. But, O Athenians! do not cry out against me, even though I should seem to you to speak somewhat arrogantly. For the account which I am going to give you is not my own; but I shall refer to an authority whom you will deem worthy of credit. For I shall adduce to you the god at Delphi as a witness of my wisdom, if I have any, and of what it is. You doubtless know Chærepho: he was my associate from youth, and the associate of most of you; he accompanied you in your late exile, and returned with you. You know, then, what kind of a man Chærepho was, how

earnest in whatever he undertook. Having once gone to Delphi, he ventured to make the following inquiry of the oracle (and, as I said, O Athenians! do not cry out), for he asked if there was any one wiser than I. The Pythian thereupon answered that there was not one wiser; and of this, his brother here will give you proofs, since he himself is dead.

6. Consider, then, why I mention these things: it is because I am going to show you whence the calumny against me arose. For when I heard this, I reasoned thus with myself, What does the god mean? What enigma is this? For I am not conscious to myself that I am wise, either much or little. What, then, does he mean by saying that I am the wisest? For assuredly he does not speak falsely: that he could not do. And for a long time I was in doubt what he meant; afterward, with considerable difficulty, I had recourse to the following method of searching out his meaning. I went to one of those who have the character of being wise, thinking that there, if anywhere, I should confute the oracle, and show in answer to the response that This man is wiser than I, though you affirmed that I was the wisest. Having, then, examined this man (for there is no occasion to mention his name; he was, however, one of our great politicians, in examining whom I felt as I proceed to describe, O Athenians!), having fallen into conversation with him, this man appeared to be wise in the opinion of most other men, and especially in his own opinion, though in fact he was not so. I thereupon endeavored to show him that he fancied himself to be wise, but really was not. Hence I became odious, both to him and to many others who were present. When I left him, I reasoned thus with myself: I am wiser than this man, for neither of us appears to know anything great and good; but he fancies he knows something, although he knows nothing; whereas I, as I do not know anything, so I do not fancy I do. In this trifling particular, then, I appear to be wiser than he, because I do not fancy I know what I do not know. After that I went to another who was thought to be wiser than the former, and formed the very same opinion. Hence I became odious to him and to many others.

7. After this I went to others in turn, perceiving indeed, and grieving and alarmed, that I was making myself odious; however, it appeared necessary to regard the oracle of the god as of the greatest

moment, and that, in order to discover its meaning, I must go to all who had the reputation of possessing any knowledge. And by the dog, O Athenians! for I must tell you the truth, I came to some such conclusion as this: those who bore the highest reputation appeared to me to be most deficient, in my researches in obedience to the god, and others who were considered inferior more nearly approaching to the possession of understanding. But I must relate to you my wandering, and the labors which I underwent, in order that the oracle might prove incontrovertible. For after the politicians I went to the poets, as well the tragic as the dithyrambic and others, expecting that here I should in very fact find myself more ignorant than they. Taking up, therefore, some of their poems, which appeared to me most elaborately finished, I questioned them as to their meaning, that at the same time I might learn something from them. I am ashamed, O Athenians! to tell you the truth; however, it must be told. For, in a word, almost all who were present could have given a better account of them than those by whom they had been composed. I soon discovered this, therefore, with regard to the poets, that they do not effect their object by wisdom, but by a certain natural inspiration, and under the influence of enthusiasm, like prophets and seers; for these also say many fine things, but they understand nothing that they say. The poets appeared to me to be affected in a similar manner; and at the same time I perceived that they considered themselves, on account of their poetry, to be the wisest of men in other things, in which they were not. I left them, therefore, under the persuasion that I was superior to them, in the same way that I was to the politicians.

8. At last, therefore, I went to the artisans. For I was conscious to myself that I knew scarcely anything, but I was sure that I should find them possessed of much beautiful knowledge. And in this I was not deceived; for they knew things which I did not, and in this respect they were wiser than I. But, O Athenians! even the best workmen appeared to me to have fallen into the same error as the poets; for each, because he excelled in the practice of his art, thought that he was very wise in other most important matters, and this mistake of theirs obscured the wisdom that they really possessed. I therefore asked myself, in behalf of the oracle, whether I should

prefer to continue as I am, possessing none, either of their wisdom or their ignorance, or to have both as they have. I answered, therefore, to myself and to the oracle, that it was better for me to continue as I am.

9. From this investigation, then, O Athenians! many enmities have arisen against me, and those the most grievous and severe, so that many calumnies have sprung from them, and among them this appellation of being wise; for those who are from time to time present think that I am wise in those things, with respect to which I expose the ignorance of others. The god, however, O Athenians! appears to be really wise, and to mean this by his oracle: that human wisdom is worth little or nothing; and it is clear that he did not say this to Socrates, but made use of my name, putting me forward as an example, as if he had said, that man is the wisest among you, who, like Socrates, knows that he is in reality worth nothing with respect to wisdom. Still, therefore, I go about and search and inquire into these things, in obedience to the god, both among citizens and strangers, if I think any one of them is wise; and when he appears to me not to be so, I take the part of the god, and show that he is not wise. And, in consequence of this occupation, I have no leisure to attend in any considerable degree to the affairs of the state or my own; but I am in the greatest poverty through my devotion to the service of the god.

10. In addition to this, young men, who have much leisure and belong to the wealthiest families, following me of their own accord, take great delight in hearing men put to the test, and often imitate me, and themselves attempt to put others to the test; and then, I think, they find a great abundance of men who fancy they know something, although they know little or nothing. Hence those who are put to the test by them are angry with me, and not with them, and say that "there is one Socrates, a most pestilent fellow, who corrupts the youth." And when any one asks them by doing or teaching what, they have nothing to say, for they do not know; but, that they may not seem to be at a loss, they say such things as are ready at hand against all philosophers; "that he searches into things in heaven and things under the earth, that he does not believe there are gods, and that he makes the worse appear the better reason." For they would

not, I think, be willing to tell the truth that they have been detected in pretending to possess knowledge, whereas they know nothing. Therefore, I think, being ambitious and vehement and numerous, and speaking systematically and persuasively about me, they have filled your ears, for a long time and diligently calumniating me. From among these, Melitus, Anytus and Lycon have attacked me; Melitus being angry on account of the poets, Anytus on account of the artisans and politicians, and Lycon on account of the rhetoricians. So that, as I said in the beginning, I should wonder if I were able in so short a time to remove from your minds a calumny that has prevailed so long. This, O Athenians! is the truth; and I speak it without concealing or disguising anything from you, much or little; though I very well know that by so doing I shall expose myself to odium. This, however, is a proof that I speak the truth, and that this is the nature of the calumny against me, and that these are its causes. And if you will investigate the matter, either now or hereafter, you will find it to be so.

11. With respect, then, to the charges which my first accusers have alleged against me, let this be a sufficient apology to you. To Melitus, that good and patriotic man, as he says, and to my later accusers, I will next endeavor to give an answer; and here, again, as there are different accusers, let us take up their deposition. It is pretty much as follows: "Socrates," it says, "acts unjustly in corrupting the youth, and in not believing in those gods in whom the city believes, but in other strange divinities." Such is the accusation; let us examine each particular of it. It says that I act unjustly in corrupting the youth. But I, O Athenians! say that Melitus acts unjustly, because he jests on serious subjects, rashly putting men upon trial, under pretense of being zealous and solicitous about things in which he never at any time took any concern. But that this is the case I will endeavor to prove to you.

12. Come, then, Melitus, tell me, do you not consider it of the greatest importance that the youth should be made as virtuous as possible?

Mel. I do.

Socr. Well, now, tell the judges who it is that makes them better, for it is evident that you know, since it concerns you so much; for,

having detected me in corrupting them, as you say, you have cited me here, and accused me: come, then, say, and inform the judges who it is that makes them better. Do you see, Melitus, that you are silent, and have nothing to say? But does it not appear to you to be disgraceful, and a sufficient proof of what I say, that you never took any concern about the matter? But tell me, friend, who makes them better?

Mel. The laws.

Socr. I do not ask this, most excellent sir, but what man, who surely must first know this very thing, the laws?

Mel. These, Socrates, the judges.

Socr. How say you, Melitus? Are these able to instruct the youth, and make them better?

Mel. Certainly.

Socr. Whether all, or some of them, and others not?

Mel. All.

Socr. You say well, by Juno! and have found a great abundance of those that confer benefit. But what further? Can these hearers make them better, or not?

Mel. They, too, can.

Socr. And what of the senators?

Mel. The senators, also.

Socr. But, Melitus, do those who attend the public assemblies corrupt the younger men? or do they all make them better?

Mel. They too.

Socr. All the Athenians, therefore, as it seems, make them honorable and good, except me; but I alone corrupt them. Do you say so?

Mel. I do assert this very thing.

Socr. You charge me with great ill-fortune. But answer me: does it appear to you to be the same, with respect to horses? Do all men make them better, and is there only some one that spoils them? or does quite the contrary of this take place? Is there some one person who can make them better, or very few; that is, the trainers? But if the generality of men should meddle with and make use of horses, do they spoil them? Is not this the case, Melitus, both with respect to horses and all other animals? It certainly is so, whether you and

Anytus deny it or not. For it would be a great good-fortune for the youth if only one person corrupted, and the rest benefited them. However, Melitus, you have sufficiently shown that you never bestowed any care upon youth; and you clearly evince your own negligence, in that you have never paid any attention to the things with respect to which you accuse me.

13. Tell us further, Melitus, in the name of Jupiter, whether is it better to dwell with good or bad citizens? Answer, my friend; for I ask you nothing difficult. Do not the bad work some evil to those that are continually near them, but the good some good?

Mel. Certainly.

Socr. Is there any one that wishes to be injured rather than benefited by his associates? Answer, good man; for the law requires you to answer. Is there any one who wishes to be injured?

Mel. No, surely.

Socr. Come, then, whether do you accuse me here, as one that corrupts the youth, and makes them more depraved, designedly or undesignedly?

Mel. Designedly, I say.

Socr. What, then, Melitus, are you at your time of life so much wiser than I at my time of life, as to know that the evil are always working some evil to those that are most near to them, and the good some good; but I have arrived at such a pitch of ignorance as not to know that if I make any one of my associates depraved, I shall be in danger of receiving some evil from him; and yet I designedly bring about this so great evil, as you say? In this I can not believe you, Melitus, nor do I think would any other man in the world. But either I do not corrupt the youth, or, if I do corrupt them, I do it undesignedly: so that in both cases you speak falsely. But if I corrupt them undesignedly, for such involuntary offenses it is not usual to accuse one here, but to take one apart, and teach and admonish one. For it is evident that if I am taught, I shall cease doing what I do undesignedly. But you shunned me, and were not willing to associate with and instruct me; but you accuse me here, where it is usual to accuse those who need punishment, and not instruction.

14. Thus, then, O Athenians! this now is clear that I have said; that Melitus never paid any attention to these matters, much or little.

However, tell us, Melitus, how you say I corrupt the youth? Is it not evidently, according to the indictment which you have preferred, by teaching them not to believe in the gods in whom the city believes, but in other strange deities? Do you not say that, by teaching these things, I corrupt the youth?

Mel. Certainly I do say so.

Socr. By those very gods, therefore, Melitus, of whom the discussion now is, speak still more clearly both to me and to these men. For I can not understand whether you say that I teach them to believe that there are certain gods (and in that case I do believe that there are gods, and am not altogether an atheist, nor in this respect to blame), not, however, those which the city believes in, but others; and this it is that you accuse me of, that I introduce others. Or do you say outright that I do not myself believe that there are gods, and that I teach others the same?

Mel. I say this: that you do not believe in any gods at all.

Socr. O wonderful Melitus, how come you to say this? Do I not, then, like the rest of mankind, believe that the sun and moon are gods?

Mel. No, by Jupiter, O judges! for he says that the sun is a stone, and the moon an earth.

Socr. You fancy that you are accusing Anaxagoras, my dear Melitus, and thus you put a slight on these men, and suppose them to be so illiterate as not to know that the books of Anaxagoras of Clazomene are full of such assertions. And the young, moreover, learn these things from me, which they might purchase for a drachma, at most, in the orchestra, and so ridicule Socrates, if he pretended they were his own, especially since they are so absurd? I ask then, by Jupiter, do I appear to you to believe that there is no god?

Mel. No, by Jupiter, none whatever.

Socr. You say what is incredible, Melitus, and that, as appears to me, even to yourself. For this man, O Athenians! appears to me to be very insolent and intemperate and to have preferred this indictment through downright insolence, intemperance, and wantonness. For he seems, as it were, to have composed an enigma for the purpose of making an experiment. Whether will Socrates the wise know that I

am jesting, and contradict myself, or shall I deceive him and all who hear me? For, in my opinion, he clearly contradicts himself in the indictment, as if he should say, Socrates is guilty of wrong in not believing that there are gods, and in believing that there are gods. And this, surely, is the act of one who is trifling.

15. Consider with me now, Athenians, in what respect he appears to me to say so. And do you, Melitus, answer me; and do ye, as I besought you at the outset, remember not to make an uproar if I speak after my usual manner.

Is there any man, Melitus, who believes that there are human affairs, but does not believe that there are men? Let him answer, judges, and not make so much noise. Is there any one who does not believe that there are horses, but that there are things pertaining to horses? or who does not believe that there are pipers, but that there are things pertaining to pipes? There is not, O best of men! for since you are not willing to answer, I say it to you and to all here present. But answer to this at least: is there any one who believes that there are things relating to demons, but does not believe that there are demons?

Mel. There is not.

Socr. How obliging you are in having hardly answered; though compelled by these judges! You assert, then, that I do believe and teach things relating to demons, whether they be new or old; therefore, according to your admission, I do believe in things relating to demons, and this you have sworn in the bill of indictment. If, then, I believe in things relating to demons, there is surely an absolute necessity that I should believe that there are demons. Is it not so? It is. For I suppose you to assent, since you do not answer. But with respect to demons, do we not allow that they are gods, or the children of gods? Do you admit this or not?

Mel. Certainly.

Socr. Since, then, I allow that there are demons, as you admit, if demons are a kind of gods, this is the point in which I say you speak enigmatically and divert yourself in saying that I do not allow there are gods, and again that I do allow there are, since I allow that there are demons? But if demons are the children of gods, spurious ones, either from nymphs or any others, of whom they are reported to be,

what man can think that there are sons of gods, and yet that there are not gods? For it would be just as absurd as if any one should think that there are mules, the offspring of horses and asses, but should not think there are horses and asses. However, Melitus, it can not be otherwise than that you have preferred this indictment for the purpose of trying me, or because you were at a loss what real crime to allege against me; for that you should persuade any man who has the smallest degree of sense that the same person can think that there are things relating to demons and to gods, and yet that there are neither demons, nor gods, not heroes, is utterly impossible.

16. That I am not guilty, then, O Athenians! according to the indictment of Melitus, appears to me not to require a lengthened defense; but what I have said is sufficient. And as to what I said at the beginning, that there is a great enmity toward me among the multitude, be assured it is true. And this it is which will condemn me, if I am condemned, not Melitus, nor Anytus, but the calumny and envy of the multitude, which have already condemned many others, and those good men, and will, I think, condemn others also; for there is no danger that it will stop with me.

Perhaps, however, some one may say, "Are you not ashamed, Socrates, to have pursued a study from which you are now in danger of dying?" To such a person I should answer with good reason, You do not say well, friend, if you think that a man, who is even of the least value, ought to take into the account the risk of life or death, and ought not to consider that alone when he performs any action, whether he is acting justly or unjustly, and the part of a good man or bad man. For, according to your reasoning, all those demi-gods that died at Troy would be vile characters, as well all the rest as the son of Thetis, who so far despised danger in comparison of submitting to disgrace, that when his mother, who was a goddess, spoke to him, in his impatience to kill Hector, something to this effect, as I think, "My son, if you revenge the death of your friend Patroclus, and slay Hector, you will yourself die, for," she said, "death awaits you immediately after Hector;" but he, on hearing this, despised death and danger, and dreading much more to live as a coward, and not avenge his friend, said, "May I die immediately when I have inflicted punishment on the guilty, that I may not stay here an object of

ridicule, by the curved ships, a burden to the ground?" — do you think that he cared for death and danger? For thus it is, O Athenians! in truth: wherever any one has posted himself, either thinking it to be better, or has been posted by his chief, there, as it appears to me, he ought to remain and meet danger, taking no account either of death or anything else in comparison with disgrace.

17. I then should be acting strangely, O Athenians! if, when the generals whom you chose to command me assigned me my post at Potidæa, at Amphipolis, and at Delium, I then remained where they posted me, like any other person, and encountered the danger of death; but when the deity, as I thought and believed, assigned it as my duty to pass my life in the study of philosophy, and examining myself and others, I should on that occasion, through fear of death or any thing else whatsoever, desert my post, strange indeed would it be; and then, in truth, any one might justly bring me to trial, and accuse me of not believing in the gods, from disobeying the oracle, fearing death, and thinking myself to be wise when I am not. For to fear death, O Athenians! is nothing else than to appear to be wise, without being so; for it is to appear to know what one does not know. For no one knows but that death is the greatest of all good to man; but men fear it, as if they well knew that it is the greatest of evils. And how is not this the most reprehensible ignorance, to think that one knows what one does not know? But I, O Athenians! in this, perhaps, differ from most men; and if I should say that I am in any thing wiser than another, it would be in this, that not having a competent knowledge of the things in Hades, I also think that I have not such knowledge. But to act unjustly, and to disobey my superior, whether God or man, I know is evil and base. I shall never, therefore, fear or shun things which, for aught I know, maybe good, before evils which I know to be evils. So that, even if you should now dismiss me, not yielding to the instances of Anytus, who said that either I should not appear here at all, or that, if I did appear, it was impossible not to put me to death, telling you that if I escaped, your sons, studying what Socrates teaches, would all be utterly corrupted; if you should address me thus, "Socrates, we shall not now yield to Anytus, but dismiss you, on this condition, however, that you no longer persevere in your researches nor study philosophy; and if

hereafter you are detected in so doing, you shall die” — if, as I said, you should dismiss, me on these terms, I should say to you, “O Athenians! I honor and love you; but I shall obey God rather than you; and so long as I breathe and am able, I shall not cease studying philosophy, and exhorting you and warning any one of you I may happen to meet, saying, as I have been accustomed to do: ‘O best of men! seeing you are an Athenian, of a city the most powerful and most renowned for wisdom and strength, are you not ashamed of being careful for riches, how you may acquire them in greatest abundance, and for glory, and honor, but care not nor take any thought for wisdom and truth, and for your soul, how it maybe made most perfect?’” And if any one of you should question my assertion, and affirm that he does care for these things, I shall not at once let him go, nor depart, but I shall question him, sift and prove him. And if he should appear to me not to possess virtue, but to pretend that he does, I shall reproach him for that he sets the least value on things of the greatest worth, but the highest on things that are worthless. Thus I shall act to all whom I meet, both young and old, stranger and citizen, but rather to you, my fellow-citizens, because ye are more nearly allied to me. For be well assured, this the deity commands. And I think that no greater good has ever befallen you in the city than my zeal for the service of the god. For I go about doing nothing else than persuading you, both young and old, to take no care either for the body, or for riches, prior to or so much as for the soul, how it may be made most perfect, telling you that virtue does not spring from riches, but riches and all other human blessings, both private and public, from virtue. If, then, by saying these things, I corrupt the youth, these things must be mischievous; but if any one says that I speak other things than these, he misleads you. Therefore I must say, O Athenians! either yield to Anytus, or do not, either dismiss me or not, since I shall not act otherwise, even though I must die many deaths.

18. Murmur not, O Athenians! but continue to attend to my request, not to murmur at what I say, but to listen, for, as I think, you will derive benefit from listening. For I am going to say other things to you, at which, perhaps, you will raise a clamor; but on no account do so. Be well assured, then, if you put me to death, being such a

man as I say I am, you will not injure me more than yourselves. For neither will Melitus nor Anytus harm me; nor have they the power; for I do not think that it is possible for a better man to be injured by a worse. He may perhaps have me condemned to death, or banished, or deprived of civil rights; and he or others may perhaps consider these as mighty evils; I, how ever, do not consider them so, but that it is much more so to do what he is now doing, to endeavor to put a man to death unjustly. Now, therefore, O Athenians! I am far from making a defense on my behalf, as any one might think, but I do so on your own behalf, lest by condemning me you should offend at all with respect to the gift of the deity to you. For, if you should put me to death, you will not easily find such another, though it may be ridiculous to say so, altogether attached by the deity to this city as to a powerful and generous horse, somewhat sluggish from his size, and requiring to be roused by a gad-fly; so the deity appears to have united me, being such a person as I am, to the city, that I may rouse you, and persuade and reprove every one of you, nor ever cease besetting you throughout the whole day. Such another man, O Athenians! will not easily be found; therefore, if you will take my advice, you will spare me. But you, perhaps, being irritated like drowsy persons who are roused from sleep, will strike me, and, yielding to Anytus, will unthinkingly condemn me to death; and then you will pass the rest of your life in sleep, unless the deity, caring for you, should send some one else to you. But that I am a person who has been given by the deity to this city, you may discern from hence; for it is not like the ordinary conduct of men, that I should have neglected all my own affairs, and suffered my private interest to be neglected for so many years, and that I should constantly attend to your concerns, addressing myself to each of you separately, like a father, or elder brother, persuading you to the pursuit of virtue. And if I had derived any profit from this course, and had received pay for my exhortations, there would have been some reason for my conduct; but now you see yourselves that my accusers, who have so shamelessly calumniated me in everything else, have not had the impudence to charge me with this, and to bring witnesses to prove that I ever either exacted or demanded any reward. And I think I produce a sufficient proof that I speak the truth, namely, my poverty.

19. Perhaps, however, it may appear absurd that I, going about, thus advise you in private and make myself busy, but never venture to present myself in public before your assemblies and give advice to the city. The cause of this is that which you have often and in many places heard me mention; because I am moved by a certain divine and spiritual influence, which also Melitus, through mockery, has set out in the indictment. This began with me from childhood, being a kind of voice which, when present, always diverts me from what I am about to do, but never urges me on. This it is which opposed my meddling in public politics; and it appears to me to have opposed me very properly. For be well assured, O Athenians! if I had long since attempted to intermeddle with politics, I should have perished long ago, and should not have at all benefited you or myself. And be not angry with me for speaking the truth. For it is not possible that any man should be safe who sincerely opposes either you, or any other multitude, and who prevents many unjust and illegal actions from being committed in a city; but it is necessary that he who in earnest contends for justice, if he will be safe for but a short time, should live privately, and take no part in public affairs.

20. I will give you strong proofs of this, not words, but what you value, facts. Hear, then, what has happened to me, that you may know that I would not yield to any one contrary to what is just, through fear of death, at the same time by not yielding I must perish. I shall tell you what will be displeasing and wearisome, yet true. For I, O Athenians! never bore any other magisterial office in the city, but have been a senator: and our Antiochean tribe happened to supply the Prytanes when you chose to condemn in a body the ten generals who had not taken off those that perished in the sea-fight, in violation of the law, as you afterward all thought. At that time I alone of the Prytanes opposed your doing anything contrary to the laws, and I voted against you; and when the orators were ready to denounce me, and to carry me before a magistrate, and you urged and cheered them on, I thought I ought rather to meet the danger with law and justice on my side, than through fear of imprisonment or death, to take part with you in your unjust designs. And this happened while the city was governed by a democracy. But when it became an oligarchy, the Thirty, having sent for me with four others

to the Tholus, ordered us to bring Leon the Salaminian from Salamis, that he might be put to death; and they gave many similar orders to many others, wishing to involve as many as they could in guilt. Then, however, I showed, not in word but in deed, that I did not care for death, if the expression be not too rude, in the smallest degree; but that all my care was to do nothing unjust or unholy. For that government, strong as it was, did not so overawe me as to make me commit an unjust action; but when we came out from the Tholus, the four went to Salamis, and brought back Leon; but I went away home. And perhaps for this I should have been put to death, if that government had not been speedily broken up. And of this you can have many witnesses.

21. Do you think, then, that I should have survived so many years if I had engaged in public affairs, and, acting as becomes a good man, had aided the cause of justice, and, as I ought, had deemed this of the highest importance? Far from it, O Athenians! nor would any other man have done so. But I, through the whole of my life, if I have done anything in public, shall be found to be a man, and the very same in private, who has never made a concession to any one contrary to justice, neither to any other, nor to any one of these whom my calumniators say are my disciples. I, however, was never the preceptor of any one; but if any one desired to hear me speaking, and to see me busied about my own mission, whether he were young or old, I never refused him. Nor do I discourse when I receive money, and not when I do not receive any, but I allow both rich and poor alike to question me, and, if any one wishes it, to answer me and hear what I have to say. And for these, whether any one proves to be a good man or not, I cannot justly be responsible, because I never either promised them any instruction or taught them at all. But if any one says that he has ever learned or heard anything from me in private which all others have not, be well assured that he does not speak the truth.

22. But why do some delight to spend so long a time with me? Ye have heard, O Athenians! I have told you the whole truth, that they delight to hear those closely questioned who think that they are wise but are not; for this is by no means disagreeable. But this duty, as I say, has been enjoined me by the deity, by oracles, by dreams, and by

every mode by which any other divine decree has ever enjoined anything to man to do. These things, O Athenians! are both true, and easily confuted if not true. For if I am now corrupting some of the youths, and have already corrupted others, it were fitting, surely, that if any of them, having become advanced in life, had discovered that I gave them bad advice when they were young, they should now rise up against me, accuse me, and have me punished; or if they were themselves unwilling to do this, some of their kindred, their fathers, or brothers, or other relatives, if their kinsman have ever sustained any damage from me, should now call it to mind. Many of them, however, are here present, whom I see: first, Crito, my contemporary and fellow-burgher, father of this Critobulus; then Lysanias of Sphettus, father of this Æschines; again, Antiphon of Cephissus, father of Epigenes. There are those others, too, whose brothers maintained the same intimacy with me, namely, Nicostratus, son of Theodotus, brother of Theodotus — Theodotus indeed is dead, so that he could not deprecate his brother's proceedings — and Paralus here, son of Demodocus, whose brother was Theages; and Adimantus, son of Ariston, whose brother is this Plato; and Æantodorus, whose brother is this Apollodorus. I could also mention many others to you, some one of whom certainly Melitus ought to have adduced in his speech as a witness. If, however, he then forgot to do so, let him now adduce them; I give him leave to do so, and let him say it, if he has anything of the kind to allege. But, quite contrary to this, you will find, O Athenians! all ready to assist me, who have corrupted and injured their relatives, as Melitus and Anytus say. For those who have been themselves corrupted might perhaps have some reason for assisting me; but those who have not been corrupted, men now advanced in life, their relatives, what other reason can they have for assisting me, except that right and just one, that they know that Melitus speaks falsely, and that I speak the truth.

23. Well, then, Athenians, these are pretty much the things I have to say in my defense, and others perhaps of the same kind. Perhaps, however, some among you will be indignant on recollecting his own case, if he, when engaged in a cause far less than this, implored and besought the judges with many tears, bringing forward his children in order that he might excite their utmost compassion, and many others

of his relatives and friends, whereas I do none of these things, although I may appear to be incurring the extremity of danger. Perhaps, therefore, some one, taking notice of this, may become more determined against me, and, being enraged at this very conduct of mine, may give his vote under the influence of anger. If, then, any one of you is thus affected — I do not, however, suppose that there is — but if there should be, I think I may reasonably say to him: “I, too, O best of men, have relatives; for, to make use of that saying of Homer, I am not sprung from an oak, nor from a rock, but from men, so that I, too, O Athenians! have relatives, and three sons, one now grown up, and two boys: I shall not, however, bring any one of them forward and implore you to acquit me.” Why, then, shall I not do this? Not from contumacy, O Athenians! nor disrespect toward you. Whether or not I am undaunted at the prospect of death is another question; but, out of regard to my own character, and yours, and that of the whole city, it does not appear to me to be honorable that I should do any thing of this kind at my age, and with the reputation I have, whether true or false. For it is commonly agreed that Socrates in some respects excels the generality of men. If, then, those among you who appear to excel either in wisdom, or fortitude, or any other virtue whatsoever, should act in such a manner as I have often seen some when they have been brought to trial, it would be shameful, who appearing indeed to be something, have conducted themselves in a surprising manner, as thinking they should suffer something dreadful by dying, and as if they would be immortal if you did not put them to death. Such men appear to me to bring disgrace on the city, so that any stranger might suppose that such of the Athenians as excel in virtue, and whom they themselves choose in preference to themselves for magistracies and other honors, are in no respect superior to women. For these things, O Athenians! neither ought we to do who have attained to any height of reputation, nor, should we do them, ought you to suffer us; but you should make this manifest, that you will much rather condemn him who introduces these piteous dramas, and makes the city ridiculous, than him who quietly awaits your decision.

24. But, reputation apart, O Athenians! it does not appear to me to be right to entreat a judge, or to escape by entreaty; but one ought to

inform and persuade him. For a judge does not sit for the purpose of administering justice out of favor, but that he may judge rightly, and he is sworn not to show favor to whom he pleases, but that he will decide according to the laws. It is, therefore, right that neither should we accustom you, nor should you accustom yourselves, to violate your oaths; for in so doing neither of us would act righteously. Think not then, O Athenians! that I ought to adopt such a course toward you as I neither consider honorable, nor just, nor holy, as well, by Jupiter! on any other occasion, and now especially when I am accused of impiety by this Melitus. For clearly, if I should persuade you, and by my entreaties should put a constraint on you who are bound by an oath, I should teach you to think that there are no gods, and in reality, while making my defense, should accuse myself of not believing in the gods. This, however, is far from being the case; for I believe, O Athenians! as none of my accusers do, and I leave it to you and to the deity to judge concerning me in such way as will be best both for me and for you.

[Socrates here concludes his defense, and, the votes being taken, he is declared guilty by a majority of voices. He thereupon resumes his address.]

25. That I should not be grieved, O Athenians! at what has happened — namely, that you have condemned me — as well many other circumstances concur in bringing to pass; and, moreover this, that what has happened has not happened contrary to my expectation; but I much rather wonder at the number of votes on either side. For I did not expect that I should be condemned by so small a number, but by a large majority; but now, as it seems, if only three more votes had changed sides, I should have been acquitted. So far as Melitus is concerned, as it appears to me, I have been already acquitted; and not only have I been acquitted, but it is clear to every one that had not Anytus and Lycon come forward to accuse me, he would have been fined a thousand drachmas, for not having obtained a fifth part of the votes.

26. The man, then, awards me the penalty of death. Well. But what shall I, on my part, O Athenians! award myself? Is it not clear that it will be such as I deserve? What, then, is that? Do I deserve to suffer, or to pay a fine? for that I have purposely during my life not

remained quiet, but neglecting what most men seek after, money-making, domestic concerns, military command, popular oratory, and, moreover, all the magistracies, conspiracies, and cabals that are met with in the city, thinking that I was in reality too upright a man to be safe if I took part in such things, I therefore did not apply myself to those pursuits, by attending to which I should have been of no service either to you or to myself; but in order to confer the greatest benefit on each of you privately, as I affirm, I thereupon applied myself to that object, endeavoring to persuade every one of you not to take any care of his own affairs before he had taken care of himself in what way he may become the best and wisest, nor of the affairs of the city before he took care of the city itself; and that he should attend to other things in the same manner. What treatment, then, do I deserve, seeing I am such a man? Some reward, O Athenians! if, at least, I am to be estimated according to my real deserts; and, moreover, such a reward as would be suitable to me. What, then, is suitable to a poor man, a benefactor, and who has need of leisure in order to give you good advice? There is nothing so suitable, O Athenians! as that such a man should be maintained in the Prytaneum, and this much more than if one of you had been victorious at the Olympic games in a horserace, or in the two or four horsed chariot race: for such a one makes you appear to be happy, but I, to be so; and he does not need support, but I do. If, therefore, I must award a sentence according to my just deserts, I award this, maintenance in the Prytaneum.

27. Perhaps, however, in speaking to you thus, I appear to you to speak in the same presumptuous manner as I did respecting commiseration and entreaties; but such is not the case, O Athenians! it is rather this: I am persuaded that I never designedly injured any man, though I can not persuade you of this, for we have conversed with each other but for a short time. For if there were the same law with you as with other men, that in capital cases the trial should last not only one day, but many, I think you would be persuaded; but it is not easy in a short time to do away with, great calumnies. Being persuaded, then, that I have injured no one, I am far from intending to injure myself, and of pronouncing against myself that I am deserving of punishment, and from awarding myself any thing of the

kind. Through fear of what? lest I should suffer that which Melitus awards me, of which I say I know not whether it be good or evil? Instead of this, shall I choose what I well know to be evil, and award that? Shall I choose imprisonment? And why should I live in prison, a slave to the established magistracy, the Eleven? Shall I choose a fine, and to be imprisoned until I have paid it? But this is the same as that which I just now mentioned, for I have not money to pay it. Shall I, then, award myself exile? For perhaps you would consent to this award. I should indeed be very fond of life, O Athenians! if I were so devoid of reason as not to be able to reflect that you, who are my fellow-citizens, have been unable to endure my manner of life and discourses, but they have become so burdensome and odious to you that you now seek to be rid of them: others, however, will easily bear them. Far from it, O Athenians! A fine life it would be for me at my age to go out wandering, and driven from city to city, and so to live. For I well know that, wherever I may go, the youth will listen to me when I speak, as they do here. And if I repulse them, they will themselves drive me out, persuading the elders; and if I do not repulse them, their fathers and kindred will banish me on their account.

28. Perhaps, however, some one will say, Can you not, Socrates, when you have gone from us, live a silent and quiet life? This is the most difficult thing of all to persuade some of you. For if I say that that would be to disobey the deity, and that, therefore, it is impossible for me to live quietly, you would not believe me, thinking I spoke ironically. If, on the other hand, I say that this is the greatest good to man, to discourse daily on virtue, and other things which you have heard me discussing, examining both myself and others, but that a life without investigation is not worth living for, still less would you believe me if I said this. Such, however, is the case, as I affirm, O Athenians! though it is not easy to persuade you. And at the same time I am not accustomed to think myself deserving of any ill. If, indeed, I were rich, I would amerce myself in such a sum as I should be able to pay; for then I should have suffered no harm, but now — for I can not, unless you are willing to amerce me in such a sum as I am able to pay. But perhaps I could pay you a mina of silver: in that sum, then, I amerce myself. But Plato here, O Athenians! and Crito

Critobulus, and Apollodorus bid me amerce myself in thirty minæ, and they offer to be sureties. I amerce myself, then, to you in that sum; and they will be sufficient sureties for the money.

[The judges now proceeded to pass the sentence, and condemned Socrates to death; whereupon he continued:]

29. For the sake of no long space of time, O Athenians! you will incur the character and reproach at the hands of those who wish to defame the city, of having put that wise man, Socrates, to death. For those who wish to defame you will assert that I am wise, though I am not. If, then, you had waited for a short time, this would have happened of its own accord; for observe my age, that it is far advanced in life, and near death. But I say this not to you all, but to those only who have condemned me to die. And I say this, too, to the same persons. Perhaps you think, O Athenians! that I have been convicted through the want of arguments, by which I might have persuaded you, had I thought it right to do and say any thing, so that I might escape punishment. Far otherwise: I have been convicted through want indeed, yet not of arguments, but of audacity and impudence, and of the inclination to say such things to you as would have been most agreeable for you to hear, had I lamented and bewailed and done and said many other things unworthy of me, as I affirm, but such as you are accustomed to hear from others. But neither did I then think that I ought, for the sake of avoiding danger, to do any thing unworthy of a freeman, nor do I now repent of having so defended myself; but I should much rather choose to die, having so defended myself, than to live in that way. For neither in a trial nor in battle is it right that I or any one else should employ every possible means whereby he may avoid death; for in battle it is frequently evident that a man might escape death by laying down his arms, and throwing himself on the mercy of his pursuers. And there are many other devices in every danger, by which to avoid death, if a man dares to do and say every thing. But this is not difficult, O Athenians! to escape death; but it is much more difficult to avoid depravity, for it runs swifter than death. And now I, being slow and aged, am overtaken by the slower of the two; but my accusers, being strong and active, have been overtaken by the swifter, wickedness. And now I depart, condemned by you to death; but they condemned

by truth, as guilty of iniquity and injustice: and I abide my sentence, and so do they. These things, perhaps, ought so to be, and I think that they are for the best.

30. In the next place, I desire to predict to you who have condemned me, what will be your fate; for I am now in that condition in which men most frequently prophesy — namely, when they are about to die. I say, then, to you, O Athenians! who have condemned me to death, that immediately after my death a punishment will overtake you, far more severe, by Jupiter! than that which you have inflicted on me. For you have done this, thinking you should be freed from the necessity of giving an account of your lives. The very contrary, however, as I affirm, will happen to you. Your accusers will be more numerous, whom I have now restrained, though you did not perceive it; and they will be more severe, inasmuch as they are younger, and you will be more indignant. For if you think that by putting men to death you will restrain any one from upbraiding you because you do not live well, you are much mistaken; for this method of escape is neither possible nor honorable; but that other is most honorable and most easy, not to put a check upon others, but for a man to take heed to himself how he may be most perfect. Having predicted thus much to those of you who have condemned me, I take my leave of you.

31. But with you who have voted for my acquittal I would gladly hold converse on what has now taken place, while the magistrates are busy, and I am not yet carried to the place where I must die. Stay with me, then, so long, O Athenians! for nothing hinders our conversing with each other, while we are permitted to do so; for I wish to make known to you, as being my friends, the meaning of that which has just now befallen me. To me, then, O my judges! and in calling you judges I call you rightly — a strange thing has happened. For the wonted prophetic voice of my guardian deity on every former occasion, even in the most trifling affairs, opposed me if I was about to do any thing wrong; but now that has befallen me which ye yourselves behold, and which any one would think, and which is supposed to be the extremity of evil; yet neither when I departed from home in the morning did the warning of the god oppose me, nor when I came up here to the place of trial, nor in my address when I

was about to say any thing; yet on other occasions it has frequently restrained me in the midst of speaking. But now it has never, throughout this proceeding, opposed me, either in what I did or said. What, then, do I suppose to be the cause of this? I will tell you: what has befallen me appears to be a blessing; and it is impossible that we think rightly who suppose that death is an evil. A great proof of this to me is the fact that it is impossible but that the accustomed signal should have opposed me, unless I had been about to meet with some good.

32. Moreover, we may hence conclude that there is great hope that death is a blessing. For to die is one of two things: for either the dead may be annihilated, and have no sensation of any thing whatever; or, as it is said, there are a certain change and passage of the soul from one place to another. And if it is a privation of all sensation, as it were a sleep in which the sleeper has no dream, death would be a wonderful gain. For I think that if any one, having selected a night in which he slept so soundly as not to have had a dream, and having compared this night with all the other nights and days of his life, should be required, on consideration, to say how many days and nights he had passed better and more pleasantly than this night throughout his life, I think that not only a private person, but even the great king himself, would find them easy to number, in comparison with other days and nights. If, therefore, death is a thing of this kind, I say it is a gain; for thus all futurity appears to be nothing more than one night. But if, on the other hand, death is a removal from hence to another place, and what is said be true, that all the dead are there, what greater blessing can there be than this, my judges? For if, on arriving at Hades, released from these who pretend to be judges, one shall find those who are true judges, and who are said to judge there, Minos and Rhadamanthus, Æacus and Triptolemus, and such others of the demi-gods as were just during their own life, would this be a sad removal? At what price would you not estimate a conference with Orpheus and Musæus, Hesiod and Homer? I indeed should be willing to die often, if this be true. For to me the sojourn there would be admirable, when I should meet with Palamedes, and Ajax, son of Telamon, and any other of the ancients who has died by an unjust sentence. The comparing my sufferings with theirs would, I think, be

no unpleasing occupation. But the greatest pleasure would be to spend my time in questioning and examining the people there as I have done those here, and discovering who among them is wise, and who fancies himself to be so, but is not. At what price, my judges, would not any one estimate the opportunity of questioning him who led that mighty army against Troy, or Ulysses, or Sisyphus, or ten thousand others whom one might mention both men and women — with whom to converse and associate, and to question them, would be an inconceivable happiness? Surely for that the judges there do not condemn to death; for in other respects those who live there are more happy than those who are here, and are henceforth immortal, if, at least, what is said be true.

33. You, therefore, O my judges! ought to entertain good hopes with respect to death, and to meditate on this one truth, that to a good man nothing is evil, neither while living nor when dead, nor are his concerns neglected by the gods. And what has befallen me is not the effect of chance; but this is clear to me, that now to die, and be freed from my cares is better for me. On this account the warning in no way turned me aside; and I bear no resentment toward those who condemned me, or against my accusers, although they did not condemn and accuse me with this intention, but thinking to injure me: in this they deserve to be blamed.

Thus much, however, I beg of them. Punish my sons when they grow up, O judges! pain them as I have pained you, if they appear to you to care for riches or anything else before virtue; and if they think themselves to be something when they are nothing, reproach them as I have done you, for not attending to what they ought, and for conceiving themselves to be something when they are worth nothing. If ye do this, both I and my sons shall have met with just treatment at your hands.

But it is now time to depart — for me to die, for you to live. But which of us is going to a better state is unknown to every one but God.

CRITO

Translated by Henry Cary

This is a short but important dialogue, which relates a conversation between Socrates and his wealthy friend Crito, whilst Socrates awaits his execution. The dialogue concerns the theme of justice and how injustice should be dealt with. Socrates argues that injustice should not be answered with injustice, and refuses Crito's offer to finance his escape from prison. The dialogue also contains an ancient statement of the social contract theory of government.

The dialogue begins with Socrates waking up to the presence of Crito in his prison cell and inquires whether it is early in the day. Crito informs Socrates that it is indeed early and that he, Crito, chose to let Socrates sleep in peace, especially given Socrates' current distressful circumstance of awaiting his own execution. Crito explains that he admires the peaceful manner in which Socrates has heretofore lived and the level of calm that Socrates displays in the face of death. Socrates replies that it is only fitting that he react in such a manner given his age and expresses surprise that the guard has let Crito in to his cell at such an early hour. Crito informs Socrates that he is well-acquainted with the guard and has done him a certain benefaction.

Prison of Socrates, on the south-western edge of the Agora, Athens

INTRODUCTION TO THE CRITO.

It has been remarked by Stallbaum that Plato had a twofold design in this dialogue — one, and that the primary one, to free Socrates from the imputation of having attempted to corrupt the Athenian youth; the other, to establish the principle that under all circumstances it is the duty of a good citizen to obey the laws of his country. These two points, however, are so closely interwoven with each other, that the general principle appears only to be illustrated by the example of Socrates.

Crito was one of those friends of Socrates who had been present at his trial, and had offered to assist in paying a fine, had a fine been imposed instead of the sentence of death. He appears to have frequently visited his friend in prison after his condemnation; and now, having obtained access to his cell very early in the morning, finds him composed in a quiet sleep. He brings intelligence that the ship, the arrival of which would be the signal for his death on the following day, is expected to arrive forthwith, and takes occasion to entreat Socrates to make his escape, the means of which were already prepared. Socrates thereupon, having promised to follow the advice of Crito if, after the matter had been fully discussed, it should appear to be right to do so, proposes to consider the duty of a citizen toward his country; and having established the divine principle that it is wrong to return evil for evil, goes on to show that the obligations of a citizen to his country are even more binding than those of a child to its parent, or a slave to his master, and that therefore it is his duty to obey the established laws, at whatever cost to himself.

At length Crito admits that he has no answer to make, and Socrates resolves to submit himself to the will of Providence.

CRITO.

SOCRATES, CRITO.

Socr. Why have you come at this hour, Crito? Is it not very early?

Cri. It is.

Socr. About what time?

Cri. Scarce day-break.

Socr. I wonder how the keeper of the prison came to admit you.

Cri. He is familiar with me, Socrates, from my having frequently come hither; and he is under some obligations to me.

Socr. Have you just now come, or some time since?

Cri. A considerable time since.

Socr. Why, then, did you not wake me at once, instead of sitting down by me in silence?

Cri. By Jupiter! Socrates, I should not myself like to be so long awake, and in such affliction. But I have been for some time wondering at you, perceiving how sweetly you slept; and I purposely did not awake you, that you might pass your time as pleasantly as possible. And, indeed, I have often before throughout your whole life considered you happy in your disposition, but far more so in the present calamity, seeing how easily and meekly you bear it.

Socr. However, Crito, it would be disconsonant for a man at my time of life to repine because he must needs die.

Cri. But others, Socrates, at your age have been involved in similar calamities, yet their age has not hindered their repining at their present fortune.

Socr. So it is. But why did you come so early?

Cri. Bringing sad tidings, Socrates, not sad to you, as it appears, but to me, and all your friends, sad and heavy, and which I, I think, shall bear worst of all.

Socr. What tidings? Has the ship arrived from Delos, on the arrival of which I must die?

Cri. It has not yet arrived, but it appears to me that it will come to-day, from what certain persons report who have come from Sunium, and left it there. It is clear, therefore, from these messengers, that it will come to day, and consequently it will be necessary, Socrates, for you to die to-morrow.

2. Socr. But with good fortune, Crito, and if so it please the gods, so be it. I do not think, however, that it will come to day.

Cri. Whence do you form this conjecture?

Socr. I will tell you. I must die on the day after that on which the ship arrives.

Cri. So they say who have the control of these things.

Socr. I do not think, then, that it will come to-day, but to-morrow. I conjecture this from a dream which I had this very night, not long ago, and you seem very opportunely to have refrained from waking me.

Cri. But what was this dream?

Socr. A beautiful and majestic woman, clad in white garments seemed to approach me, and to call to me and say, "Socrates, three days hence you will reach fertile Pythia".

Cri. What a strange dream, Socrates!

Socr. Very clear, however, as it appears to me, Crito.

3. Cri. Very much so, as it seems. But, my dear Socrates, even now be persuaded by me, and save yourself. For if you die, not only a single calamity will befall me, but, besides being deprived of such a

friend as I shall never meet with again, I shall also appear to many who do not know you and me well, when I might have saved you had I been willing to spend my money, to have neglected to do so. And what character can be more disgraceful than this — to appear to value one's riches more than one's friends? For the generality of men will not be persuaded that you were unwilling to depart hence, when we urged you to it.

Socr. But why, my dear Crito, should we care so much for the opinion of the many? For the most worthy men, whom we ought rather to regard, will think that matters have transpired as they really have.

Cri. Yet you see, Socrates, that it is necessary to attend to the opinion of the many. For the very circumstances of the present case show that the multitude are able to effect not only the smallest evils, but even the greatest, if any one is calumniated to them.

Socr. Would, O Crito that the multitude could effect the greatest evils, that they might also effect the greatest good, for then it would be well. But now they can do neither; for they can make a man neither wise nor foolish; but they do whatever chances.

4. Cri. So let it be, then. But answer me this, Socrates: are you not anxious for me and other friends, lest, if you should escape from hence, informers should give us trouble, as having secretly carried you off, and so we should be compelled either to lose all our property, or a very large sum, or to suffer something else besides this? For, if you fear any thing of the kind, dismiss your fears; for we are justified in running the risk to save you — and, if need be, even a greater risk than this. But be persuaded by me, and do not refuse.

Socr. I am anxious about this, Crito, and about many other things.

Cri. Do not fear this, however; for the sum is not large on receipt of which certain persons are willing to save you, and take you hence. In the next place, do you not see how cheap these informers are, so that there would be no need of a large sum for them? My fortune is at your service, sufficient, I think, for the purpose; then if, out of regard

to me, you do not think right to spend my money, these strangers here are ready to spend theirs. One of them, Simmias the Theban, has brought with him a sufficient sum for the very purpose. Cebes, too, is ready, and very many others. So that, as I said, do not, through fears of this kind, hesitate to save yourself, nor let what you said in court give you any trouble, that if you went from hence you would not know what to do with yourself. For in many places, and wherever you go, men will love you; and if you are disposed to go to Thessaly, I have friends there who will esteem you very highly, and will insure your safety, so that no one in Thessaly will molest you.

5. Moreover, Socrates, you do not appear to me to pursue a just course in giving yourself up when you might be saved; and you press on the very results with respect to yourself which your enemies would press, and have pressed, in their anxiety to destroy you. Besides this, too, you appear to me to betray your own sons, whom, when it is in your power to rear and educate them, you will abandon, and, so far as you are concerned, they will meet with such a fate as chance brings them, and, as is probable, they will meet with such things as orphans are wont to experience in a state of orphanage. Surely one ought not to have children, or one should go through the toil of rearing and instructing them. But you appear to me to have chosen the most indolent course; though you ought to have chosen such a course as a good and brave man would have done, since you profess to have made virtue your study through the whole of your life; so that I am ashamed both for you and for us who are your friends, lest this whole affair of yours should seem to be the effect of cowardice on our part — your appearing to stand your trial in the court, since you appeared when it was in your power not to have done so, the very manner in which the trial was conducted, and this last circumstance, as it were, a ridiculous consummation of the whole business; your appearing to have escaped from us through our indolence and cowardice, who did not save you; nor did you save yourself, when it was practicable and possible, had we but exerted ourselves a little. Think of these things, therefore, Socrates, and beware, lest, besides the evil that will result, they be disgraceful both to you and to us; advise, then, with yourself; though, indeed, there is

no longer time for advising — your resolve should be already made. And there is but one plan; for in the following night the whole must be accomplished. If we delay, it will be impossible and no longer practicable. By all means, therefore, Socrates, be persuaded by me, and on no account refuse.

6. Socr. My dear Crito, your zeal would be very commendable were it united with right principle; otherwise, by how much the more earnest it is, by so much is it the more sad. We must consider, therefore, whether this plan should be adopted or not. For I not now only, but always, am a person who will obey nothing within me but reason, according as it appears to me on mature deliberation to be best. And the reasons which I formerly professed I can not now reject, because this misfortune has befallen me; but they appear to me in much the same light, and I respect and honor them as before; so that if we are unable to adduce any better at the present time, be assured that I shall not give in to you, even though the power of the multitude should endeavor to terrify us like children, by threatening more than it does now, bonds and death, and confiscation of property. How, therefore, may we consider the matter most conveniently? First of all, if we recur to the argument which you used about opinions, whether on former occasions it was rightly resolved or not, that we ought to pay attention to some opinions, and to others not; or whether, before it was necessary that I should die, it was rightly resolved; but now it has become clear that it was said idly for argument's sake, though in reality it was merely jest and trifling. I desire then, Crito, to consider, in common with you, whether it will appear to me in a different light, now that I am in this condition, or the same, and whether we shall give it up or yield to it. It was said, I think, on former occasions, by those who were thought to speak seriously, as I just now observed, that of the opinions which men entertain some should be very highly esteemed and others not. By the gods! Crito, does not this appear to you to be well said? For you, in all human probability, are out of all danger of dying to-morrow, and the present calamity will not lead your judgment astray. Consider, then; does it not appear to you to have been rightly settled that we ought not to respect all the opinions of men, but some we should, and

others not? Nor yet the opinions of all men, but of some we should, and of others not? What say you? Is not this rightly resolved?

Cri. It is.

Socr. Therefore we should respect the good, but not the bad?

Cri. Yes.

Socr. And are not the good those of the wise, and the bad those of the foolish?

Cri. How can it be otherwise?

7. Socr. Come, then: how, again, were the following points settled? Does a man who practices gymnastic exercises and applies himself to them, pay attention to the praise and censure and opinion of every one, or of that one man only who happens to be a physician, or teacher of the exercises?

Cri. Of that one only.

Socr. He ought, therefore, to fear the censures and covet the praises of that one, but not those of the multitude.

Cri. Clearly.

Socr. He ought, therefore, so to practice and exercise himself, and to eat and drink, as seems fitting to the one who presides and knows, rather than to all others together.

Cri. It is so.

Socr. Well, then, if he disobeys the one, and disregards his opinion and praise, but respects that of the multitude and of those who know nothing, will he not suffer some evil?

Cri. How should he not?

Socr. But what is this evil? Whither does it tend, and on what part of him that disobeys will it fall?

Cri. Clearly on his body, for this it ruins.

Socr. You say well. The case is the same, too, Crito, with all other things, not to go through them all. With respect then, to things just and unjust, base and honorable, good and evil, about which we are now consulting, ought we to follow the opinion of the multitude, and to respect it, or that of one, if there is any one who understands, whom we ought to reverence and respect rather than all others together? And if we do not obey him, shall we not corrupt and injure that part of ourselves which becomes better by justice, but is ruined by injustice? Or is this nothing?

Cri. I agree with you, Socrates.

8. Socr. Come, then, if we destroy that which becomes better by what is wholesome, but is impaired by what is unwholesome, through being persuaded by those who do not understand, can we enjoy life when that is impaired? And this is the body we are speaking of, is it not?

Cri. Yes.

Socr. Can we, then, enjoy life with a diseased and impaired body?

Cri. By no means.

Socr. But can we enjoy life when that is impaired which injustice ruins but justice benefits? Or do we think that to be of less value than the body, whatever part of us it may be, about which injustice and justice are concerned?

Cri. By no means.

Socr. But of more value?

Cri. Much more.

Socr. We must not then, my excellent friend, so much regard what the multitude will say of us, but what he will say who understands the just and the unjust, the one, even truth itself. So that at first you did not set out with a right principle, when you laid it down that we

ought to regard the opinion of the multitude with respect to things just and honorable and good, and their contraries. How ever, some one may say, are not the multitude able to put us to death?

Cri. This, too, is clear, Socrates, any one might say so.

Socr. You say truly. But, my admirable friend, this principle which we have just discussed appears to me to be the same as it was before. And consider this, moreover, whether it still holds good with us or not, that we are not to be anxious about living but about living well.

Cri. It does hold good.

Socr. And does this hold good or not, that to live well and Honorable and justly are the same thing?

Cri. It does.

9. Socr. From what has been admitted, then, this consideration arises, whether it is just or not that I should endeavor to leave this place without the permission of the Athenians. And should it appear to be just, we will make the attempt, but if not, we will give it up. But as to the considerations which you mention, of an outlay of money, reputation, and the education of children, beware, Crito, lest such considerations as these in reality belong to these multitudes, who rashly put one to death, and would restore one to life, if they could do so, without any reason at all. But we, since reason so requires, must consider nothing else than what we just now mentioned, whether we shall act justly in paying money and contracting obligations to those who will lead me hence, as well they who lead me as we who are led hence, or whether, in truth, we shall not act unjustly in doing all these things. And if we should appear in so doing to be acting unjustly, observe that we must not consider whether from remaining here and continuing quiet we must needs die, or suffer any thing else, rather than whether we shall be acting unjustly.

Cri. You appear to me to speak wisely, Socrates, but see what we are to do.

Socr. Let us consider the matter together, my friend, and if you have any thing to object to what I say, make good your objection, and I will yield to you, but if not, cease, my excellent friend, to urge upon me the same thing so often, that I ought to depart hence against the will of the Athenians. For I highly esteem your endeavors to persuade me thus to act, so long as it is not against my will. Consider, then, the beginning of our inquiry, whether it is stated to your entire satisfaction, and endeavor to answer the question put to you exactly as you think right.

Cri. I will endeavor to do so.

10. Socr. Say we, then, that we should on no account deliberately commit injustice, or may we commit injustice under certain circumstances, under others not? Or is it on no account either good or honorable to commit injustice, as we have often agreed on former occasions, and as we just now said? Or have all those our former admissions been dissipated in these few days, and have we, Crito, old men as we are, been for a long time seriously conversing with each other without knowing that we in no respect differ from children? Or does the case, beyond all question, stand as we then determined? Whether the multitude allow it or not, and whether we must suffer a more severe or a milder punishment than this, still is injustice on every account both evil and disgraceful to him who commits it? Do we admit this, or not?

Cri. We do admit it.

Socr. On no account, therefore, ought we to act unjustly.

Cri. Surely not.

Socr. Neither ought one who is injured to return the injury, as the multitude think, since it is on no account right to act unjustly.

Cri. It appears not.

Socr. What, then? Is it right to do evil, Crito, or not?

Cri. Surely it is not right, Socrates.

Socr. But what? To do evil in return when one has been evil-entreated, is that right, or not?

Cri. By no means.

Socr. For to do evil to men differs in no respect from committing injustice.

Cri. You say truly.

Socr. It is not right, therefore, to return an injury, or to do evil to any man, however one may have suffered from him. But take care, Crito, that in allowing these things you do not allow them contrary to your opinion, for I know that to some few only these things both do appear, and will appear, to be true. They, then, to whom these things appear true, and they to whom they do not, have no sentiment in common, and must needs despise each other, while they look to each other's opinions. Consider well, then, whether you coincide and think with me, and whether we can begin our deliberations from this point — that it is never right either to do an injury or to return an injury, or when one has been evil-entreated, to revenge one's self by doing evil in return, or do you dissent from, and not coincide in this principle? For so it appears to me, both long since and now, but if you in any respect think otherwise, say so and inform me. But if you persist in your former opinions, hear what follows.

Cri. I do persist in them, and think with you. Speak on, then.

Socr. I say next, then, or rather I ask; whether when a man has promised to do things that are just he ought to do them, or evade his promise?

Cri. He ought to do them.

11. Socr. Observe, then, what follows. By departing hence without the leave of the city, are we not doing evil to some, and that to those to whom we ought least of all to do it, or not? And do we abide by what we agreed on as being just, or do we not?

Cri. I am unable to answer your question, Socrates; for I do not

understand it.

Socr. Then, consider it thus. If, while we were preparing to run away, or by whatever name we should call it, the laws and commonwealth should come, and, presenting themselves before us, should say, "Tell me, Socrates, what do you purpose doing? Do you design any thing else by this proceeding in which you are engaged than to destroy us, the laws, and the whole city, so far as you are able? Or do you think it possible for that city any longer to subsist, and not be subverted, in which judgments that are passed have no force, but are set aside and destroyed by private persons?" — what should we say, Crito, to these and similar remonstrances? For any one, especially an orator, would have much to say on the violation of the law, which enjoins that judgments passed shall be enforced. Shall we say to them that the city has done us an injustice, and not passed a right sentence? Shall we say this, or what else?

Cri. This, by Jupiter! Socrates.

12. Socr. What, then, if the laws should say, "Socrates, was it not agreed between us that you should abide by the judgments which the city should pronounce?" And if we should wonder at their speaking thus, perhaps they would say, "Wonder not, Socrates, at what we say, but answer, since you are accustomed to make use of questions and answers. For, come, what charge have you against us and the city, that you attempt to destroy us? Did we not first give you being? and did not your father, through us, take your mother to wife and beget you? Say, then, do you find fault with those laws among us that relate to marriage as being bad?" I should say, "I do not find fault with them." "Do you with those that relate to your nurture when born, and the education with which you were instructed? Or did not the laws, ordained on this point, enjoin rightly, in requiring your father to instruct you in music and gymnastic exercises?" I should say, rightly. Well, then, since you were born, nurtured, and educated through our means, can you say, first of all, that you are not both our offspring and our slave, as well you as your ancestors? And if this be so, do you think that there are equal rights between us? and whatever we attempt to do to you, do you think you may justly do to us in turn?

Or had you not equal rights with your father, or master, if you happened to have one, so as to return what you suffered, neither to retort when found fault with, nor, when stricken, to strike again, nor many other things of the kind; but that with your country and the laws you may do so; so that if we attempt to destroy you, thinking it to be just, you also should endeavor, so far as you are able, in return, to destroy us, the laws, and your country; and in doing this will you say that you act justly — you who, in reality, make virtue your chief object? Or are you so wise as not to know that one's country is more honorable, venerable, and sacred, and more highly prized both by gods, and men possessed of understanding, than mother and father, and all other progenitors; and that one ought to reverence, submit to, and appease one's country, when angry, rather than one's father; and either persuade it or do what it orders, and to suffer quietly if it bids one suffer, whether to be beaten, or put in bonds; or if it sends one out to battle there to be wounded or slain, this must be done; for justice so requires, and one must not give way, or retreat, or leave one's post; but that both in war and in a court of justice, and everywhere one must do what one's city and country enjoin, or persuade it in such manner as justice allows; but that to offer violence either to one's mother or father is not holy, much less to one's country? What shall we say to these things, Crito? That the laws speak the truth, or not?

Cri. It seems so to me.

13. Socr. "Consider, then, Socrates," the laws perhaps might say, "whether we say truly that in what you are now attempting you are attempting to do what is not just toward us. For we, having given you birth, nurtured, instructed you, and having imparted to you and all other citizens all the good in our power, still proclaim, by giving the power to every Athenian who pleases, when he has arrived at years of discretion, and become acquainted with the business of the state, and us, the laws, that any one who is not satisfied with us may take his property, and go wherever he pleases. And if any one of you wishes to go to a colony, if he is not satisfied with us and the city, or to migrate and settle in another country, none of us, the laws, hinder

or forbid him going whithersoever he pleases, taking with him all his property. But whoever continues with us after he has seen the manner in which we administer justice, and in other respects govern the city, we now say that he has in fact entered into a compact with us to do what we order; and we affirm that he who does not obey is in three respects guilty of injustice — because he does not obey us who gave him being, and because he does not obey us who nurtured him, and because, having made a compact that he would obey us, he neither does so, nor does he persuade us if we do any thing wrongly; though we propose for his consideration, and do not rigidly command him to do what we order, but leave him the choice of one of two things, either to persuade us, or to do what we require, and yet he does neither of these.”

14. “And we say that you, O Socrates! will be subject to these charges if you accomplish your design, and that not least of the Athenians, but most so of all.” And if I should ask, “For what reason?” they would probably justly retort on me by saying that, among all the Athenians, I especially made this compact with them. For they would say, “Socrates, we have strong proof of this, that you were satisfied both with us and the city; for, of all the Athenians, you especially would never have dwelt in it if it had not been especially agreeable to you; for you never went out of the city to any of the public spectacles, except once to the Isthmian games, nor anywhere else, except on military service, nor have you ever gone abroad as other men do, nor had you ever had any desire to become acquainted with any other city or other laws, but we and our city were sufficient for you; so strongly were you attached to us, and so far did you consent to submit to our government, both in other respects and in begetting children in this city, in consequence of your being satisfied with it. Moreover, in your very trial, it was in your power to have imposed on yourself a sentence of exile, if you pleased, and might then have done, with the consent of the city, what you now attempt against its consent. Then, indeed, you boasted yourself as not being grieved if you must needs die; but you preferred, as you said, death to exile. Now, however, you are neither ashamed of those professions, nor do you revere us, the laws, since you endeavor to

destroy us, and you act as the vilest slave would act, by endeavoring to make your escape contrary to the conventions and the compacts by which you engaged to submit to our government. First, then, therefore, answer us this, whether we speak the truth or not in affirming that you agreed to be governed by us in deed, though not in word?" What shall we say to this, Crito? Can we do otherwise than assent?

Cri. We must needs do so, Socrates.

Socr. "What else, then," they will say, "are you doing but violating the conventions and compacts which you made with us, though you did not enter into them from compulsion or through deception, or from being compelled to determine in a short time but during the space of seventy years, in which you might have departed if you had been dissatisfied with us, and the compacts had not appeared to you to be just? You, however, preferred neither Lacedæmon nor Crete, which you several times said are governed by good laws, nor any other of the Grecian or barbarian cities; but you have been less out of Athens than the lame and the blind, and other maimed persons. So much, it is evident, were you satisfied with the city and us, the laws, beyond the rest of the Athenians; for who can be satisfied with a city without laws? But now will you not abide by your compacts? You will, if you are persuaded by us, Socrates, and will not make yourself ridiculous by leaving the city."

15. "For consider, by violating these compacts and offending against any of them, what good you will do to yourself or your friends. For that your friends will run the risk of being themselves banished, and deprived of the rights of citizenship, or of forfeiting their property, is pretty clear. And as for yourself, if you should go to one of the neighboring cities, either Thebes or Megara, for both are governed by good laws, you will go there, Socrates, as an enemy to their polity; and such as have any regard for their country will look upon you with suspicion, regarding you as a corrupter of the laws; and you will confirm the opinion of the judges, so that they will appear to have condemned you rightly, for whose is a corrupter of the laws will appear in all likelihood to be a corrupter of youths and weak-minded

men. Will you, then, avoid these well-governed cities, and the best-ordered men? And should you do so, will it be worth your while to live? Or will you approach them, and have the effrontery to converse with them, Socrates, on subjects the same as you did here — that virtue and justice, legal institutions and laws, should be most highly valued by men? And do you not think that this conduct of Socrates would be very indecorous? You must think so. But you will keep clear of these places, and go to Thessaly, to Crito's friends, for there are the greatest disorder and licentiousness; and perhaps they will gladly hear you relating how drolly you escaped from prison, clad in some dress or covered with a skin, or in some other disguise such as fugitives are wont to dress themselves in, having so changed your usual appearance. And will no one say that you, though an old man, with but a short time to live, in all probability, have dared to have such a base desire of life as to violate the most sacred laws? Perhaps not, should you not offend any one. But if you should, you will hear, Socrates, many things utterly unworthy of you. You will live, too, in a state of abject dependence on all men, and as their slave. But what will you do in Thessaly besides feasting, as if you had gone to Thessaly to a banquet? And what will become of those discourses about justice and all other virtues? But do you wish to live for the sake of your children, that you may rear and educate them? What then? Will you take them to Thessaly, and there rear and educate them, making them aliens to their country, that they may owe you this obligation too? Or, if not so, being reared here, will they be better reared and educated while you are living, though not with them, for your friends will take care of them? Whether, if you go to Thessaly, will they take care of them, but if you go to Hades will they not take care of them? If, however, any advantage is to be derived from those that say they are your friends, we must think they will."

16. "Then, O Socrates! be persuaded by us who have nurtured you, and do not set a higher value on your children, or on life, or on any thing else than justice, that, when you arrive in Hades, you may have all this to say in your defense before those who have dominion there. For neither here in this life, if you do what is proposed, does it

appear to be better, or more just, or more holy to yourself, or any of your friends; nor will it be better for you when you arrive there. But now you depart, if you do depart, unjustly treated, not by us, the laws, but by men; but should you escape, having thus disgracefully returned injury for injury, and evil for evil, having violated your own compacts and conventions which you made with us, and having done evil to those to whom you least of all should have done it — namely, yourself, your friends, your country, and us — both we shall be indignant with you as long as you live, and there our brothers, the laws in Hades, will not receive you favorably knowing that you attempted, so far as you were able, to destroy us. Let not Crito, then, persuade you to do what he advises, rather than we.”

17. These things, my dear friend Crito, be assured, I seem to hear as the votaries of Cybele seem to hear the flutes. And the sound of these words booms in my ear, and makes me incapable of hearing any thing else. Be sure, then, so long as I retain my present opinions, if you should say any thing contrary to these, you will speak in vain. If, however, you think that you can prevail at all, say on.

Cri. But, Socrates, I have nothing to say.

Socr. Desist, then, Crito, and let us pursue this course, since this way the deity leads us.

HIPPIAS MAJOR

Translated by Benjamin Jowett

This early dialogue was written circa 390 BC, though its authenticity has been doubted. It concerns Socrates and Hippias (the late 5th century BC Sophist), who endeavour to find a definition for beauty. The actual Greek term that is used in the dialogue is *καλόν*, which as an adjective can also mean ‘fine’ or ‘noble’, as well as beautiful.

The concept of something being good in and of itself makes its first appearance in this work. The dialogue can be read as much as a serious philosophical work as a light satirical comedy with two actors.

HIPPIAS MAJOR

PERSONS OF THE DIALOGUE:

SOCRATES

HIPPIAS.

Socrates: Hippias, beautiful and wise, what a long time it is since you have put in at the port of Athens!

Hippias: I am too busy, Socrates. For whenever Elis needs to have any business transacted with any of the states, she always comes to me first of her citizens and chooses me as envoy, thinking that I am the ablest judge and messenger of the words that are spoken by the several states. So I have often gone as envoy to other states, but most often and concerning the most numerous and important matters to Lacedaemon. For that reason, then, since you ask me, I do not often come to this neighborhood.

Socrates: That's what it is, Hippias, to be a truly wise and perfect man! For you are both in your private capacity able to earn much money from the young and to confer upon them still greater benefits than you receive, and in public affairs you are able to benefit your own state, as a man must who is to be not despised but held in high repute among the many. And yet, Hippias, what in the world is the reason why those men of old whose names are called great in respect to wisdom — Pittacus, and Bias, and the Milesian Thales with his followers and also the later ones, down to Anaxagoras, are all, or most of them, found to refrain from affairs of state?

Hippias: What else do you suppose, Socrates, than that they were not able to compass by their wisdom both public and private matters?

Socrates: Then for Heaven's sake, just as the other arts have progressed, and the ancients are of no account in comparison with the artisans of today, shall we say that your art also has progressed and those of the ancients who were concerned with wisdom are of no account in comparison with you?

Hippias: Yes, you are quite right.

Socrates: Then, Hippias, if Bias were to come to life again now, he would be a laughing-stock in comparison with you, just as the sculptors say that Daedalus, if he were to be born now and were to create such works as those from which he got his reputation, would be ridiculous.

Hippias: That, Socrates, is exactly as you say. I, however, am in the habit of praising the ancients and our predecessors rather than the men of the present day, and more greatly, as a precaution against the envy of the living and through fear of the wrath of those who are dead.

Socrates: Yours, Hippias, is a most excellent way, at any rate, of speaking about them and of thinking, it seems to me and I can bear you witness that you speak the truth, and that your art really has progressed in the direction of ability to carry on public together with private affairs. For this man Gorgias, the sophist from Leontini, came here from home in the public capacity of envoy, as being best able of all the citizens of Leontini to attend to the interests of the community, and it was the general opinion that he spoke excellently in the public assembly, and in his private capacity, by giving exhibitions and associating with the young, he earned and received a great deal of money from this city; or, if you like, our friend here, Prodicus, often went to other places in a public capacity, and the last time, just lately, when he came here in a public capacity from Ceos, he gained great reputation by his speaking before the Council, and in his private capacity, by giving exhibitions and associating with the young, he received a marvellous sum of money; but none of those ancients ever thought fit to exact the money as payment for his wisdom or to give exhibitions among people of various places; so simple-minded were they, and so unconscious of the fact that money is of the greatest value. But either of these two has earned more money from his wisdom than any artisan from his art. And even before these Protagoras did so.

Hippias: Why, Socrates, you know nothing of the beauties of this.

For if you were to know how much money I have made, you would be amazed. I won't mention the rest, but once, when I went to Sicily, although Protagoras was staying there and had a great reputation and was the older, I, who was much younger, made in a very short time more than one hundred and fifty minas, and in one very small place, Inycus, more than twenty minas; and when I came home, I took this and gave it to my father, so that he and the other citizens were overwhelmed with amazement. And I pretty well think I have made more money than any other two sophists together.

Socrates: That's a fine thing you say, Hippias, and strong testimony to your wisdom and that of the men of today and to their great superiority to the ancients. For the earlier sophists of the school of Anaxagoras must have been very ignorant to judge from what is said, according to your view; for they say that what happened to Anaxagoras was the opposite of what happens to you; for though much money was left him, he neglected it and lost it all so senseless was his wisdom. And they tell similar tales about others among the ancients. So this seems to me fine testimony that you adduce for the wisdom of the men of today as compared with the earlier men, and many people agree with me that the wise man must be wise for himself especially; and the test of this is, who makes the most money. Well, so much for that. But tell me this: at which of the cities that you go to did you make the most money? Or are we to take it that it was at Lacedaemon, where your visits have been most frequent?

Hippias: No, by Zeus, it was not, Socrates.

Socrates: What's that you say? But did you make least there?

Hippias: Why, I never made anything at all.

Socrates: That is a prodigious marvel that you tell, Hippias; and say now: is not your wisdom such as to make those who are in contact with it and learn it, better men in respect to virtue?

Hippias: Yes, much better, Socrates.

Socrates: But you were able to make the sons of the Inycenes better, and had no power to improve the sons of the Spartans?

Hippias: That is far from true.

Socrates: Well, then, the Siceliotos desire to become better, and the Lacedaemonians do not?

Hippias: No certainly, Socrates, the Lacedaemonians also desire it.

Socrates: Then it was for lack of money that they avoided intercourse with you?

Hippias: Not at all, since they have plenty of money.

Socrates: What, then, could be the reason, that when they desired it and had money, and you had power to confer upon them the greatest benefits, they did not send you away loaded with money? But I see; perhaps the Lacedaemonians might educate their own children better than you? Shall we state it so, and do you agree?

Hippias: Not in the least.

Socrates: Then were you not able to persuade the young men at Lacedaemon that they would make more progress towards virtue by associating with you than with their own people, or were you powerless to persuade their fathers that they ought rather to hand them over to you than to care for them themselves, if they are at all concerned for their sons? For surely they did not begrudge it to their children to become as good as possible.

Hippias: I do not think they begrudged it.

Socrates: But certainly Lacedaemon is well governed.

Hippias: Of course it is.

Socrates: And in well-governed states virtue is most highly honored.

Hippias: Certainly.

Socrates: And you know best of all men how to transmit that to

another.

Hippias: Much best, Socrates.

Socrates: Well, he who knows best how to transmit horsemanship would be most honored in Thessaly of all parts of Greece and would receive most money — and anywhere else where horsemanship is a serious interest, would he not?

Hippias: Very likely.

Socrates: Then will not he who is able to transmit the doctrines that are of most value for the acquisition of virtue be most highly honored in Lacedaemon and make most money, if he so wishes, and in any other of the Greek states that is well governed? But do you, my friend, think he will fare better in Sicily and at Inycus? Are we to believe that, Hippias? For if you tell us to do so, we must believe it.

Hippias: Yes, for it is not the inherited usage of the Lacedaemonians to change their laws or to educate their children differently from what is customary.

Socrates: What? For the Lacedaemonians is it the hereditary usage not to act rightly, but to commit errors?

Hippias: I wouldn't say so, Socrates.

Socrates: Would they, then, not act rightly in educating the young men better, but not in educating them worse?

Hippias: Yes, they would; but it is not lawful for them to give them a foreign education; for you may be sure that if anybody had ever received money there in payment for education, I should have received by far the most; they certainly enjoy hearing me and they applaud me; but, as I say, it is not the law.

Socrates: But, Hippias, do you say that law is an injury to the state, or a benefit?

Hippias: It is made, I think, with benefit in view, but sometimes, if the law is badly made, it is injurious.

Socrates: Well, then, is it not true that those who make the law make it as the greatest good to the state, and that without this it is impossible to enjoy good government?

Hippias: What you say is true.

Socrates: Then, when those who make the laws miss the good, they have missed the lawful and the law; or what do you say?

Hippias: Speaking accurately, Socrates, that is true; however, men are not accustomed to think so.

Socrates: The men who know, Hippias, or those who do not know?

Hippias: The many.

Socrates: Are these, the many, those who know the truth?

Hippias: Certainly not.

Socrates: But surely those who know, think that in truth for all men that which is more beneficial is more lawful than that which is less beneficial; or do you not agree?

Hippias: Yes, I agree that they think it is so in truth.

Socrates: Well, it actually is as those who know think it is, is it not?

Hippias: Certainly.

Socrates: But or the Lacedaemonians, as you say, it is more beneficial to be educated in your education, which is foreign, than in the local education.

Hippias: Yes, and what I say is true.

Socrates: And do you say this also, Hippias, that beneficial things are more lawful?

Hippias: Yes, I said so.

Socrates: Then, according to what you say, it is more lawful for the sons of the Lacedaemonians to be educated by Hippias and less

lawful for them to be educated by their fathers, if in reality they will be more benefited by you.

Hippias: But certainly they will be benefited, Socrates.

Socrates: Then the Lacedaemonians in not giving you money and entrusting their sons to you, act contrary to law.

Hippias: I agree to that; for you seem to be making your argument in my favour, and there is no need of my opposing it.

Socrates: Then my friends, we find that the Lacedaemonians are law-breakers, and that too in the most important affairs — they who are regarded as the most law-abiding of men. But then, for Heaven's sake, Hippias, what sort of discourses are those for which they applaud you and which they enjoy hearing? Or are they evidently those which you understand most admirably, those about the stars and the phenomena of the heavens?

Hippias: Not in the least; they won't even endure those.

Socrates: But they enjoy hearing about geometry?

Hippias: Not at all, since one might say that many of them do not even know how to count.

Socrates: Then they are far from enduring a lecture by you on the processes of thought.

Hippias: Far from it indeed, by Zeus.

Socrates: Well, then, those matters which you of all men know best how to discuss, concerning the value of letters and syllables and rhythms and harmonies?

Hippias: Harmonies indeed, my good fellow, and letters!

Socrates: But then what are the things about which they like to listen to you and which they applaud? Tell me yourself, for I cannot discover them.

Hippias: They are very fond of hearing about the genealogies of heroes and men, Socrates, and the foundations of cities in ancient times and, in short, about antiquity in general, so that for their sake I have been obliged to learn all that sort of thing by heart and practise it thoroughly.

Socrates: By Zeus, Hippias, it is lucky for you that the Lacedaemonians do not enjoy hearing one recite the list of our archons from Solon's time; if they did, you would have trouble in learning it by heart.

Hippias: How so, Socrates? After hearing them once, I can remember fifty names.

Socrates: True, but I did not understand that you possess the science of memory; and so I understand that the Lacedaemonians naturally enjoy you as one who knows many things, and they make use of you as children make use of old women, to tell stories agreeably.

Hippias: And by Zeus, Socrates, I have just lately gained reputation there by telling about noble or beautiful pursuits, recounting what those of a young man should be. For I have a very beautiful discourse composed about them, well arranged in its words and also in other respects. And the plan of the discourse, and its beginning, is something like this: After the fall of Troy, the story goes that Neoptolemus asked Nestor what the noble and beautiful pursuits were, by following which a young man would become most famous; so after that we have Nestor speaking and suggesting to him very many lawful and most beautiful pursuits. That discourse, then, I delivered there and intend to deliver here the day after tomorrow in Pheidestratus's schoolroom, with many other things worth hearing; for Eudicus, the son of Apemantus, asked me to do so. Now be sure to be there yourself and to bring others who are able to judge of discourses that they hear.

Socrates: Well, that shall be done, God willing, Hippias. Now, however, give me a brief answer to a question about your discourse, for you reminded me of the beautiful just at the right moment. For

recently, my most excellent friend, as I was finding fault with some things in certain speeches as ugly and praising other things as beautiful, a man threw me into confusion by questioning me very insolently somewhat after this fashion: "How, if you please, do you know, Socrates," said he, "what sort of things are beautiful and ugly? For, come now, could you tell me what the beautiful is?" And I, being of no account, was at a loss and could not answer him properly; and so, as I was going away from the company, I was angry with myself and reproached myself, and threatened that the first time I met one of you wise men, I would hear and learn and practise and then go back to the man who questioned me to renew the wordy strife. So now, as I say, you have come at the right moment; just teach me satisfactorily what the absolute beautiful is, and try in replying to speak as accurately as possible, that I may not be confuted a second time and be made ridiculous again. For you doubtless know clearly, and this would doubtless be but a small example of your wide learning.

Hippias: Yes, surely, by Zeus, a small one, Socrates, and, I may say, of no value.

Socrates: Then I shall learn it easily, and nobody will confute me any more.

Hippias: Nobody, surely; for in that case my profession would be worthless and ordinary.

Socrates: That is good, by Hera, Hippias, if we are to worst the fellow. But may I without hindering you imitate him, and when you answer, take exception to what you say, in order that you may give me as much practice as possible? For I am more or less experienced in taking exceptions. So, if it is all the same to you, I wish to take exceptions, that I may learn more vigorously.

Hippias: Oh yes, take exceptions. For, as I said just now, the question is no great matter, but I could teach you to answer much harder ones than this, so that nobody in the world could confute you.

Socrates: Oh how good that is! But come, since you tell me to do so,

now let me try to play that man's part, so far as possible, and ask you questions. For if you were to deliver for him this discourse that you mention, the one about beautiful pursuits, when he had heard it, after you had stopped speaking, the very first thing he would ask about would be the beautiful; for he has that sort of habit, and he would say, "Stranger from Elis, is it not by justice that the just are just?" So answer, Hippias, as though he were asking the question.

Hippias: I shall answer that it is by justice.

Socrates: "Then this — I mean justice — is something?"

Hippias: Certainly.

Socrates: "Then, too, by wisdom the wise are wise and by the good all things are good, are they not?"

Hippias: Of course.

Socrates: "And justice, wisdom, and so forth are something; for the just, wise, and so forth would not be such by them, if they were not something."

Hippias: To be sure, they are something.

Socrates: "Then are not all beautiful things beautiful by the beautiful?"

Hippias: Yes, by the beautiful.

Socrates: "By the beautiful, which is something?"

Hippias: Yes, for what alternative is there?

Socrates: "Tell me, then, stranger," he will say, "what is this, the beautiful?"

Hippias: Well, Socrates, does he who asks this question want to find out anything else than what is beautiful?

Socrates: I do not think that is what he wants to find out, but what the beautiful is.

Hippias: And what difference is there between the two?

Socrates: Do you think there is none?

Hippias: Yes, for there is no difference.

Socrates: Well, surely it is plain that you know best; but still, my good friend, consider; for he asked you, not what is beautiful, but what the beautiful is.

Hippias: I understand, my good friend, and I will answer and tell him what the beautiful is, and I shall never be confuted. For be assured, Socrates, if I must speak the truth, a beautiful maiden is beautiful.

Socrates: Beautifully answered, Hippias, by the dog, and notably! Then if I give this answer, I shall have answered the question that was asked, and shall have answered it correctly, and shall never be confuted?

Hippias: Yes, for how could you, Socrates, be confuted, when you say what everybody thinks, and when all who hear it will bear witness that what you say is correct?

Socrates: Very well; certainly. Come, then, Hippias, let me rehearse to myself what you say. The man will question me in some such fashion as this: "Come Socrates, answer me. All these things which you say are beautiful, if the absolute beautiful is anything, would be beautiful?" And I shall say that if a beautiful maiden is beautiful, there is something by reason of which these things would be beautiful.

Hippias: Do you think, then, that he will still attempt to refute you and to show that what you say is not beautiful, or, if he does attempt it, that he will not be ridiculous?

Socrates: That he will attempt it, my admirable friend, I am sure but whether the attempt will make him ridiculous, the event will show. However, I should like to tell you what he will ask.

Hippias: Do so.

Socrates: “How charming you are, Socrates!” he will say. “But is not a beautiful mare beautiful, which even the god praised in his oracle?” What shall we say, Hippias? Shall we not say that the mare is beautiful, I mean the beautiful mare? For how could we dare to deny that the beautiful thing is beautiful?

Hippias: Quite true, Socrates for what the god said is quite correct, too; for very beautiful mares are bred in our country.

Socrates: “Very well,” he will say, “and how about a beautiful lyre? Is it not beautiful?” Shall we agree, Hippias?

Hippias: Yes.

Socrates: After this, then, the man will ask, I am sure, judging by his character: “You most excellent man, how about a beautiful pot? Is it, then, not beautiful?”

Hippias: Socrates, who is the fellow? What an uncultivated person, who has the face to mention such worthless things in a dignified discussion!

Socrates: That’s the kind of person he is, Hippias, not elegant, but vulgar, thinking of nothing but the truth. But nevertheless the man must be answered, and I will declare my opinion beforehand: if the pot were made by a good potter, were smooth and round and well fired, as are some of the two-handled pots, those that hold six choes, very beautiful ones — if that were the kind of pot he asked about, we must agree that it is beautiful; for how could we say that being beautiful it is not beautiful?

Hippias: We could not at all, Socrates.

Socrates: “Then,” he will say, “a beautiful pot also is beautiful, is it not?” Answer.

Hippias: Well, Socrates, it is like this, I think. This utensil, when well wrought, is beautiful, but absolutely considered it does not deserve to be regarded as beautiful in comparison with a mare and a maiden and all the beautiful things.

Socrates: Very well I understand, Hippias, that the proper reply to him who asks these questions is this: "Sir, you are not aware that the saying of Heracleitus is good, that 'the most beautiful of monkeys is ugly compared with the race of man,' and the most beautiful of pots is ugly compared with the race of maidens, as Hippias the wise man says." Is it not so, Hippias?

Hippias: Certainly, Socrates; you replied rightly.

Socrates: Listen then. For I am sure that after this he will say: "Yes, but, Socrates, if we compare maidens with gods, will not the same thing happen to them that happened to pots when compared with maidens? Will not the most beautiful maiden appear ugly? Or does not Heracleitus, whom you cite, mean just this, that the wisest of men, if compared with a god, will appear a monkey, both in wisdom and in beauty and in everything else?" Shall we agree, Hippias, that the most beautiful maiden is ugly if compared with the gods?

Hippias: Yes, for who would deny that, Socrates?

Socrates: If, then, we agree to that, he will laugh and say: "Socrates, do you remember the question you were asked?" "I do," I shall say, "the question was what the absolute beautiful is." "Then," he will say, "when you were asked for the beautiful, do you give as your reply what is, as you yourself say, no more beautiful than ugly?" "So it seems," I shall say; or what do you, my friend, advise me to say?

Hippias: That is what I advise; for, of course, in saying that the human race is not beautiful in comparison with gods, you will be speaking the truth.

Socrates: "But if I had asked you," he will say, "in the beginning what is beautiful and ugly, if you had replied as you now do, would you not have replied correctly? But do you still think that the absolute beautiful, by the addition of which all other things are adorned and made to appear beautiful, when its form is added to any of them — do you think that is a maiden or a mare or a lyre?"

Hippias: Well, certainly, Socrates, if that is what he is looking for,

nothing is easier than to answer and tell him what the beautiful is, by which all other things are adorned and by the addition of which they are made to appear beautiful. So the fellow is very simple-minded and knows nothing about beautiful possessions. For if you reply to him: "This that you ask about, the beautiful, is nothing else but gold," he will be thrown into confusion and will not attempt to confute you. For we all know, I fancy, that wherever this is added, even what before appears ugly will appear beautiful when adorned with gold.

Socrates: You don't know the man, Hippias, what a wretch he is, and how certain not to accept anything easily.

Hippias: What of that, then, Socrates? For he must perforce accept what is correct, or if he does not accept it, be ridiculous.

Socrates: This reply, my most excellent friend, he not only will certainly not accept, but he will even jeer at me grossly and will say: "You lunatic, do you think Pheidias is a bad craftsman?" And I shall say, "Not in the least."

Hippias: And you will be right, Socrates.

Socrates: Yes, to be sure. Consequently when I agree that Pheidias is a good craftsman, "Well, then," he will say, "do you imagine that Pheidias did not know this beautiful that you speak of?" "Why do you ask that?" I shall say. "Because," he will say, "he did not make the eyes of his Athena of gold, nor the rest of her face, nor her hands and feet, if, that is, they were sure to appear most beautiful provided only they were made of gold, but he made them of ivory; evidently he made this mistake through ignorance, not knowing that it is gold which makes everything beautiful to which it is added." When he says that, what reply shall we make to him, Hippias?

Hippias: That is easy; for we shall say that Pheidias did right; for ivory, I think, is beautiful.

Socrates: "Why, then," he will say, "did he not make the middle parts of the eyes also of ivory, but of stone, procuring stone as similar as

possible to the ivory? Or is beautiful stone also beautiful?" Shall we say that it is, Hippias?

Hippias: Surely we shall say so, that is, where it is appropriate.

Socrates: "But ugly when not appropriate?" Shall I agree, or not?

Hippias: Agree, that is, when it is not appropriate.

Socrates: "What then? Do not gold and ivory," he will say, "when they are appropriate, make things beautiful, and when they are not appropriate, ugly?" Shall we deny that, or agree that what he says is correct?

Hippias: We shall agree to this, at any rate, that whatever is appropriate to any particular thing makes that thing beautiful.

Socrates: "Well, then," he will say, "when some one has boiled the pot of which we were speaking just now, the beautiful one, full of beautiful soup, is a golden ladle appropriate to it, or one made of fig wood?"

Hippias: Heracles! What a fellow this is that you speak of! Won't you tell me who he is?

Socrates: You would not know him if I should tell you his name.

Hippias: But even now I know that he is an ignoramus.

Socrates: He is a great nuisance, Hippias, but yet, what shall we say? Which of the two ladles shall we say is appropriate to the soup and the pot? Is it not evidently the one of fig wood? For it is likely to make the soup smell better, and besides, my friend, it would not break the pot, thereby spilling the soup, putting out the fire, and making those who are to be entertained go without their splendid soup; whereas the golden ladle would do all those things, so that it seems to me that we must say that the wooden ladle is more appropriate than the golden one, unless you disagree.

Hippias: No, for it is more appropriate, Socrates; however, I, for my part, would not talk with the fellow when he asks such questions.

Socrates: Quite right, my friend; for it would not be appropriate for you to be filled up with such words, you who are so beautifully clad, so beautifully shod, and so famous for your wisdom among all the Greeks; but for me it doesn't matter if I do associate with the fellow; so instruct me and for my sake answer him. "For if the wooden one is more appropriate than the golden one," the fellow will say, "would it not be more beautiful, since you agreed, Socrates, that the appropriate is more beautiful than that which is not appropriate?" Shall we not agree, Hippias, that the wooden one is more beautiful than the golden?

Hippias: Do you wish me to tell you, Socrates, what definition of the beautiful will enable you to free yourself from long discussion?

Socrates: Certainly; but not until after you have told me which of the two ladles I just spoke of I shall reply is appropriate and more beautiful.

Hippias: Well, if you like, reply to him that it is the one made of fig wood.

Socrates: Now, then, say what you were just now going to say. For by this reply, if I say that the beautiful is gold, it seems to me that gold will be shown to be no more beautiful than fig wood; but what do you now, once more, say that the beautiful is?

Hippias: I will tell you; for you seem to me to be seeking to reply that the beautiful is something of such sort that it will never appear ugly anywhere to anybody.

Socrates: Certainly, Hippias; now you understand beautifully.

Hippias: Listen, then; for, mind you, if anyone has anything to say against this, you may say I know nothing at all.

Socrates: Then for Heaven's sake, speak as quickly as you can.

Hippias: I say, then, that for every man and everywhere it is most beautiful to be rich and healthy, and honored by the Greeks, to reach old age, and, after providing a beautiful funeral for his deceased

parents, to be beautifully and splendidly buried by his own offspring.

Socrates: Bravo, bravo, Hippias! You have spoken in a way that is wonderful and great and worthy of you; and now, by Hera, I thank you, because you are kindly coming to my assistance to the best of your ability. But our shots are not hitting the man; no, he will laugh at us now more than ever, be sure of that.

Hippias: A wretched laugh, Socrates; for when he has nothing to say to this, but laughs, he will be laughing at himself and will himself be laughed at by those present.

Socrates: Perhaps that is so perhaps, however, after this reply, he will, I foresee, be likely to do more than laugh at me.

Hippias: Why do you say that, pray?

Socrates: Because, if he happens to have a stick, unless I get away in a hurry, he will try to fetch me a good one.

Hippias: What? Is the fellow some sort of master of yours, and if he does that, will he not be arrested and have to pay for it? Or does your city disregard justice and allow the citizens to beat one another unjustly?

Socrates: Oh no that is not allowed at all.

Hippias: Then he will have to pay a penalty for beating you unjustly.

Socrates: I do not think so, Hippias. No, if I were to make that reply, the beating would be just, I think.

Hippias: Then I think so, too, Socrates, since that is your own belief.

Socrates: Shall I, then, not tell you why it is my own belief that the beating would be just, if I made that reply? Or will you also beat me without trial? Or will you listen to what I have to say?

Hippias: It would be shocking if I would not listen; but what have you to say?

Socrates: I will tell you, imitating him in the same way as a while ago, that I may not use to you such harsh and uncouth words as he uses to me. For you may be sure, "Tell me, Socrates," he will say, "do you think it would be unjust if you got a beating for singing such a long dithyramb so unmusically and so far from the question?" "How so?" I shall say. "How so?" he will say; "are you not able to remember that I asked for the absolute beautiful, by which everything to which it is added has the property of being beautiful, both stone and stick and man and god and every act and every acquisition of knowledge? For what I am asking is this, man: what is absolute beauty? and I cannot make you hear what I say any more than if you were a stone sitting beside me, and a millstone at that, having neither ears nor brain." Would you, then, not be angry, Hippias, if I should be frightened and should reply in this way? "Well, but Hippias said that this was the beautiful; and yet I asked him, just as you asked me, what is beautiful to all and always." What do you say? Will you not be angry if I say that?

Hippias: I know very well, Socrates, that this which I said was beautiful is beautiful to all and will seem so.

Socrates: And will it be so, too he will say for the beautiful is always beautiful, is it not?

Hippias: Certainly.

Socrates: "Then was it so, too?" he will say.

Hippias: It was so, too.

Socrates: "And," he will say, "did the stranger from Elis say also that for Achilles it was beautiful to be buried later than his parents, and for his grandfather Aeacus, and all the others who were born of gods, and for the gods themselves?"

Hippias: What's that? Confound it! These questions of the fellow's are not even respectful to religion.

Socrates: Well, then, when another asks the question, perhaps it is not quite disrespectful to religion to say that these things are so?

Hippias: Perhaps.

Socrates: “Perhaps, then, you are the man,” he will say, “who says that it is beautiful for every one and always to be buried by one’s offspring, and to bury one’s parents; or was not Heracles included in ‘every one,’ he and all those whom we just now mentioned?”

Hippias: But I did not say it was so for the gods.

Socrates: “Nor for the heroes either, apparently.”

Hippias: Not those who were children of gods.

Socrates: “But those who were not?”

Hippias: Certainly.

Socrates: “Then again, according to your statement, among the heroes it is terrible and impious and disgraceful for Tantalus and Dardanus and Zethus, but beautiful for Pelops and the others who were born as he was?”

Hippias: I think so.

Socrates: “You think, then, what you did not say just now, that to bury one’s parents and be buried by one’s offspring is sometimes and for some persons disgraceful; and it is still more impossible, as it seems, for this to become and to be beautiful for all, so that the same thing has happened to this as to the things we mentioned before, the maiden and the pot, in a still more ridiculous way than to them; it is beautiful for some and not beautiful for others. And you are not able yet, even today, Socrates,” he will say, “to answer what is asked about the beautiful, namely what it is.” With these words and the like he will rebuke me, if I reply to him in this way. For the most part, Hippias, he talks with me in some such way as that but sometimes, as if in pity for my inexperience and lack of training, he himself volunteers a question, and asks whether I think the beautiful is so and so or whatever else it is which happens to be the subject of our questions and our discussion.

Hippias: What do you mean by that, Socrates?

Socrates: I will tell you. “Oh, my dear Socrates,” he says, “stop making replies of this sort and in this way — for they are too silly and easy to refute; but see if something like this does not seem to you to be beautiful, which we got hold of just now in our reply, when we said that gold was beautiful for those things for which it was appropriate, but not for those for which it was not, and that all the other things were beautiful to which this quality pertains; so examine this very thing, the appropriate, and see if it is perchance the beautiful.” Now I am accustomed to agree to such things every time for I don’t know what to say; but now does it seem to you that the appropriate is the beautiful?

Hippias: Yes, certainly, Socrates.

Socrates: Let us consider, lest we make a mistake somehow.

Hippias: Yes, we must consider.

Socrates: See, then; do we say that the appropriate is that which, when it is added, makes each of those things to which it is added appear beautiful, or which makes them be beautiful, or neither of these?

Hippias: I think so.

Socrates: Which?

Hippias: That which makes them appear beautiful; as when a man takes clothes or shoes that fit, even if he be ridiculous, he appears more beautiful.

Socrates: Then if the appropriate makes him appear more beautiful than he is, the appropriate would be a sort of deceit in respect to the beautiful, and would not be that which we are looking for, would it, Hippias? For we were rather looking for that by which all beautiful things are beautiful — like that by which all great things are great, that is, excess; for it is by this that all great things are great; for even if they do not appear great, but exceed, they are of necessity great;

so, then, we say, what would the beautiful be, by which all things are beautiful, whether they appear so or not? For it could not be the appropriate, since that, by your statement, makes things appear more beautiful than they are, but does not let them appear such as they are. But we must try to say what that is which makes things be beautiful, as I said just now, whether they appear so or not; for that is what we are looking for, since we are looking for the beautiful.

Hippias: But the appropriate, Socrates, makes things both be and appear beautiful by its presence.

Socrates: Is it impossible, then, for things which are really beautiful not to appear to be beautiful, at any rate when that is present which makes them appear so?

Hippias: It is impossible.

Socrates: Shall we, then, agree to this, Hippias, that all things which are really beautiful, both uses and pursuits, are always believed to be beautiful by all, and appear so to them, or, quite the contrary, that people are ignorant about them, and that there is more strife and contention about them than about anything else, both in private between individuals and in public between states?

Hippias: The latter rather, Socrates; that people are ignorant about them.

Socrates: They would not be so, if the appearance of beauty were added to them; and it would be added, if the appropriate were beautiful and made things not only to be beautiful, but also to appear so. So that the appropriate, if it is that which makes things be beautiful, would be the beautiful which we are looking for, but would not be that which makes things appear beautiful; but if, on the other hand, the appropriate is that which makes things appear beautiful, it would not be the beautiful for which we are looking. For that makes things be beautiful, but the same element could not make things both appear and be beautiful, nor could it make them both appear and be anything else whatsoever. Let us choose, then, whether we think that the appropriate is that which makes things appear or be beautiful.

Hippias: That which makes them appear so, in my opinion, Socrates.

Socrates: Whew! Our perception of what the beautiful is has fled away and gone, Hippias, since the appropriate has been found to be something other than the beautiful.

Hippias: Yes, by Zeus, Socrates, and to me that is very queer.

Socrates: However, my friend, let us not yet give it up, for I still have hopes that what the beautiful is will be made clear.

Hippias: Certainly, to be sure, Socrates, for it is not hard to find. Now I know that if I should go away into solitude and meditate alone by myself, I could tell it to you with the most perfect accuracy.

Socrates: Ah, don't boast, Hippias. You see how much trouble it has caused us already; I'm afraid it may get angry and run away more than ever. And yet that is nonsense; for you, I think, will easily find it when you go away by yourself. But for Heaven's sake, find it in my presence, or, if you please, join me, as you are now doing, in looking for it. And if we find it, that will be splendid, but if we do not, I shall, I suppose, accept my lot, and you will go away and find it easily. And if we find it now, I shall certainly not be a nuisance to you by asking what that was which you found by yourself; but now once more see if this is in your opinion the beautiful : I say, then, that it is — but consider, paying close attention to me, that I may not talk nonsense — for I say, then, whatever is useful shall be for us beautiful. But I said it with this reason for my thought; beautiful eyes, we say, are not such as seem to be so, which are unable to see, but those which are able and useful for seeing. Is that right?

Hippias: Yes.

Socrates: Then, too, in the same way we say that the whole body is beautiful, part of it for running, part for wrestling; and again all the animals, a beautiful horse or cock or quail and all utensils and land vehicles, and on the sea freight-ships and ships of war; and all instruments in music and in the other arts, and, if you like, customs and laws also — pretty well all these we call beautiful in the same

way looking at each of them — how it is formed by nature, how it is wrought, how it has been enacted — the useful we call beautiful, and beautiful in the way in which it is useful, and for the purpose for which it is useful, and at the time when it is useful; and that which is in all these aspects useless we say is ugly. Now is not this your opinion also, Hippias?

Hippias: It is.

Socrates: Then are we right in saying that the useful rather than everything else is beautiful?

Hippias: We are right, surely, Socrates.

Socrates: Now that which has power to accomplish anything is useful for that for which it has power, but that which is powerless is useless, is it not?

Hippias: Certainly.

Socrates: Power, then, is beautiful, and want of power is disgraceful or ugly.

Hippias: Decidedly. Now other things, Socrates, testify for us that this is so, but especially political affairs; for in political affairs and in one's own state to be powerful is the most beautiful of all things, but to be powerless is the most disgraceful of all.

Socrates: Good! Then, for Heaven's sake, Hippias, is wisdom also for this reason the most beautiful of all things and ignorance the most disgraceful of all things?

Hippias: Well, what do you suppose, Socrates?

Socrates: Just keep quiet, my dear friend; I am so afraid and wondering what in the world we are saying again.

Hippias: What are you afraid of again, Socrates, since now your discussion has gone ahead most beautifully?

Socrates: I wish that might be the case; but consider this point with

me: could a person do what he did not know how and was utterly powerless to do?

Hippias: By no means; for how could he do what he was powerless to do?

Socrates: Then those who commit errors and accomplish and do bad things involuntarily, if they were powerless to do those things, would not do them?

Hippias: Evidently not.

Socrates: But yet it is by power that those are powerful who are powerful for surely it is not by powerlessness.

Hippias: Certainly not.

Socrates: And all who do, have power to do what they do?

Hippias: Yes.

Socrates: Men do many more bad things than good, from childhood up, and commit many errors involuntarily.

Hippias: That is true.

Socrates: Well, then, this power and these useful things, which are useful for accomplishing something bad — shall we say that they are beautiful, or far from it?

Hippias: Far from it, in my opinion, Socrates.

Socrates: Then, Hippias, the powerful and the useful are not, as it seems, our beautiful.

Hippias: They are, Socrates, if they are powerful and useful for good.

Socrates: Then that assertion, that the powerful and useful are beautiful without qualification, is gone; but was this, Hippias, what our soul wished to say, that the useful and the powerful for doing something good is the beautiful?

Hippias: Yes, in my opinion.

Socrates: But surely this is beneficial; or is it not?

Hippias: Certainly.

Socrates: So by this argument the beautiful persons and beautiful customs and all that we mentioned just now are beautiful because they are beneficial.

Hippias: Evidently.

Socrates: Then the beneficial seems to us to be the beautiful, Hippias.

Hippias: Yes, certainly, Socrates.

Socrates: But the beneficial is that which creates good.

Hippias: Yes, it is.

Socrates: But that which creates is nothing else than the cause; am I right?

Hippias: It is so.

Socrates: Then the beautiful is the cause of the good.

Hippias: Yes, it is.

Socrates: But surely, Hippias, the cause and that of which the cause is the cause are different; for the cause could not well be the cause of the cause. But look at it in this way was not the cause seen to be creating?

Hippias: Yes, certainly.

Socrates: By that which creates, then, only that is created which comes into being, but not that which creates. Is not that true?

Hippias: That is true.

Socrates: The cause, then, is not the cause of the cause, but of that

which comes into being through it.

Hippias: Certainly.

Socrates: If, then, the beautiful is the cause of good, the good would come into being through the beautiful; and this is why we are eager for wisdom and all the other beautiful things, because their offspring, the good, is worthy of eagerness, and, from what we are finding, it looks as if the beautiful were a sort of father of the good.

Hippias: Certainly for what you say is well said, Socrates.

Socrates: Then is this well said, too, that the father is not the son, and the son not father?

Hippias: To be sure it is well said.

Socrates: And neither is the cause that which comes into being, nor is that which comes into being the cause.

Hippias: True.

Socrates: By Zeus, my good friend, then neither is the beautiful good, nor the good beautiful; or does it seem to you possible, after what has been said?

Hippias: No, by Zeus, it does not appear so to me.

Socrates: Does it please us, and should we be willing to say that the beautiful is not good, and the good not beautiful?

Hippias: No, by Zeus, it does not please me at all.

Socrates: Right, by Zeus, Hippias! And it pleases me least of all the things we have said.

Hippias: Yes, that is likely.

Socrates: Then there is a good chance that the statement that the beneficial and the useful and the powerful to create something good are beautiful, is not, as it appeared to be, the most beautiful of of statements, but, if that be possible, is even more ridiculous than those

first ones in which we thought the maiden was the beautiful, and each of the various other things we spoke of before.

Hippias: That is likely.

Socrates: And Hippias, I no longer know where to turn; I am at a loss; but have you anything to say?

Hippias: Not at the moment, but, as I said just now, I am sure I shall find it after meditation.

Socrates: But it seems to me that I am so eager to know that I cannot wait for you while you delay; for I believe I have just now found a way out. Just see; how would it help us towards our goal if we were to say that that is beautiful which makes us feel joy; I do not mean all pleasures, but that which makes us feel joy through hearing and sight? For surely beautiful human beings, Hippias, and all decorations and paintings and works of sculpture which are beautiful, delight us when we see them; and beautiful sounds and music in general and speeches and stories do the same thing, so that if we were to reply to that impudent fellow, "My excellent man, the beautiful is that which is pleasing through hearing and sight," don't you think that we should put a stop to his impudence?

Hippias: To me, at any rate, Socrates, it seems that the nature of the beautiful is now well stated.

Socrates: But what then? Shall we say, Hippias, that beautiful customs and laws are beautiful because they are pleasing through hearing and sight, or that they have some other form of beauty?

Hippias: Perhaps, Socrates, these things might slip past the man unnoticed.

Socrates: No, by dog, Hippias — not past the man before whom I should be most ashamed of talking nonsense and pretending that I was talking sense when I was not.

Hippias: What man is that?

Socrates: Socrates, the son of Sophroniscus, who would no more permit me to say these things carelessly without investigation than to say that I know what I do not know.

Hippias: But certainly I also, now that you have mentioned it, think that this about the laws is something different.

Socrates: Not too fast, Hippias; for very likely we have fallen into the same perplexity about the beautiful in which we were a while ago, although we think we have found another way out.

Hippias: What do you mean by that, Socrates?

Socrates: I will tell you what presents itself to me, if perhaps there may be some sense in it. For perhaps these matters of laws and customs might be shown to be not outside of the perception which we have through hearing and sight; but let us stick to the statement that that which is pleasing through the senses is beautiful, without interjecting the matter of the laws. But if this man of whom I speak, or anyone else whosoever, should ask us: "Hippias and Socrates, did you make the distinction that in the category of the pleasing that which is pleasing in the way you mention is beautiful, whereas you say that that which is pleasing according to the other senses — those concerned with food and drink and sexual love and all such things — is not beautiful? Or do you say that such things are not even pleasing and that there is no pleasure at all in them, nor in anything else except sight and hearing?" What shall we say, Hippias?

Hippias: Certainly, by all means, Socrates, we shall say that there are very great pleasures in the other things also.

Socrates: "Why, then," he will say, "if they are pleasures no less than the others, do you take from them this designation and deprive them of being beautiful?" "Because," we shall say, "everybody would laugh at us if we should say that eating is not pleasant but is beautiful, and that a pleasant odor is not pleasant but is beautiful; and as to the act of sexual love, we should all, no doubt, contend that it is most pleasant, but that one must, if he perform it, do it so that no one else shall see, because it is most repulsive to see." If we say this,

Hippias, “I too understand,” he will perhaps say, “that you have all along been ashamed to say that these pleasures are beautiful, because they do not seem so to people; but that is not what I asked, what seems to most people to be beautiful, but what is so.” We shall, then, I fancy, say, as we suggested, “We say that that part of the pleasant which comes by sight and hearing is beautiful.” Do you think the statement is of any use, Hippias, or shall we say something else?

Hippias: Inevitably, in view of what has been said, Socrates, we must say just that.

Socrates: “Excellent!” he will say. “Then if that which is pleasant through sight and hearing is beautiful, that among pleasant things which does not happen to be of that sort would evidently not be beautiful?” Shall we agree?

Hippias: Yes.

Socrates: “Is, then, that which is pleasant through sight,” he will say, “pleasant through sight and hearing, or is that which is pleasant through hearing pleasant through hearing and sight?” “No,” we shall say, “that which is pleasant through each of these would not in the least be pleasant through both — for that is what you appear to us to mean — but we said that either of these pleasant things would be beautiful alone by itself, and both together.” Is not that the reply we shall make?

Hippias: Certainly.

Socrates: “Does, then,” he will say, “any pleasant thing whatsoever differ from any pleasant thing whatsoever by this, by being pleasant? I ask not whether any pleasure is greater or smaller or more or less, but whether it differs by just this very thing, by the fact that one of the pleasures is a pleasure and the other is not a pleasure.” “We do not think so.” Do we?

Hippias: No, we do not.

Socrates: “Is it not,” then, he will say, “for some other reason than because they are pleasures that you chose these pleasures out from

the other pleasures — it was because you saw some quality in both, since they have something different from the others, in view of which you say that they are beautiful? For the reason why that which is pleasant through sight is beautiful, is not, I imagine, because it is through sight; for if that were the cause of its being beautiful, the other pleasure, that through hearing, would not be beautiful; it certainly is not pleasure through sight.” Shall we say “What you say is true”?

Hippias: Yes, we shall.

Socrates: “Nor, again, is the pleasure through hearing beautiful for the reason that it is through hearing; for in that case, again, the pleasure through sight would not be beautiful; it certainly is not pleasure through hearing.” Shall we say, Hippias, that the man who says that speaks the truth?

Hippias: Yes, he speaks the truth.

Socrates: “But yet both are beautiful, as you say.” We do say that, do we not?

Hippias: We do.

Socrates: “They have, then, something identical which makes them to be beautiful, this common quality which pertains to both of them in common and to each individually; for otherwise they would not both collectively and each individually be beautiful.” Answer me, as if you were answering him.

Hippias: I answer, and I think it is as you say.

Socrates: If, then, these pleasures are both affected in any way collectively, but each individually is not so affected, it is not by this affection that they would be beautiful.

Hippias: And how could that be, Socrates, when neither of them individually is affected by some affection or other, that then both are affected by that affection by which neither is affected?

Socrates: You think it cannot be?

Hippias: I should have to be very inexperienced both in the nature of these things and in the language of our present discussion.

Socrates: Very pretty, Hippias. But there is a chance that I think I see a case of that kind which you say is impossible, but do not really see it.

Hippias: There's no chance about it, Socrates, but you quite purposely see wrongly.

Socrates: And certainly many such cases appear before my mind, but I mistrust them because they do not appear to you, a man who has made more money by wisdom than anyone now living, but to me who never made any money at all; and the thought disturbs me that you are playing with me and purposely deceiving me, they appear to me in such numbers and with such force.

Hippias: Nobody, Socrates, will know better than you whether I am playing with you or not, if you proceed to tell these things that appear to you; for it will be apparent to you that you are talking nonsense. For you will never find that you and I are both affected by an affection by which neither of us is affected.

Socrates: What are you saying, Hippias? Perhaps you are talking sense, and I fail to understand; but let me tell more clearly what I wish to say. For it appears to me that it is possible for us both to be so affected as to be something which I am not so affected as to be, and which I am not and you are not either; and again for neither of us to be so affected as to be other things which we both are.

Hippias: Your reply, Socrates, seems to involve miracles again even greater than those of your previous reply. For consider: if we are both just, would not each of us be just also, and if each is unjust, would not both again also be unjust, or if both are healthy, each of us also? Or if each of us were to be tired or wounded or struck or affected in any other way whatsoever, should we not both of us be affected in the same way? Then, too, if we were to be golden or of silver or of

ivory, or, if you please, noble or wise or honored or old or young or whatever else you like of all that flesh is heir to, is it not quite inevitable that each of us be that also?

Socrates: Absolutely.

Hippias: But you see, Socrates, you do not consider the entirety of things, nor do they with whom you are in the habit of conversing, but you all test the beautiful and each individual entity by taking them separately and cutting them to pieces. For this reason you fail to observe that embodiments of reality are by nature so great and undivided. And now you have failed to observe to such a degree that you think there is some affection or reality which pertains to both of these together, but not to each individually, or again to each, but not to both; so unreasoning and undiscerning and foolish and unreflecting is your state of mind.

Socrates: Human affairs, Hippias, are not what a man wishes, but what he can, as the proverb goes which people are constantly citing; but you are always aiding us with admonitions. For now too, until we were admonished by you of our foolish state of mind — shall I continue to speak and make you a still further exhibition of our thoughts on the subject, or shall I not speak?

Hippias: You will speak to one who knows, Socrates, for I know the state of mind of all who are concerned with discussions; but nevertheless, if you prefer, speak.

Socrates: Well, I do prefer. For we, my friend, were so stupid, before you spoke, as to have an opinion concerning you and me, that each of us was one, but that we were not both that which each of us was — for we are not one, but two — so foolish were we. But now we have been taught by you that if we are both two, then each of us is inevitably two, and if each is one, then both are inevitably one; for it is impossible, by the continuous doctrine of reality according to Hippias, that it be otherwise, but what we both are, that each is, and what each is, both are. So now I have been convinced by you, and I hold this position. But first, Hippias, refresh my memory: Are you

and I one, or are you two and I two?

Hippias: What do you mean, Socrates?

Socrates: Just what I say; for I am afraid to speak plainly to you, because you are vexed with me, when you think you are talking sensibly; however, tell me further: is not each of us one and affected in such a way as to be one?

Hippias: Certainly.

Socrates: Then each of us, if one, would be an odd number; or do you not consider one an odd number?

Hippias: I do.

Socrates: Then are we both an odd number, being two?

Hippias: That could not be, Socrates.

Socrates: But we are both an even number, are we not?

Hippias: Certainly.

Socrates: Then because we are both even, is each of us on that account even?

Hippias: No, surely not.

Socrates: Then it is not absolutely inevitable, as you said just now, that what both are, each is, and what each is, both are.

Hippias: Not things of this sort, but such as I mentioned before.

Socrates: That suffices, Hippias; for even this is welcome, since it appears that some things are so and some are not so. For I said, if you remember the beginning of this discussion, that pleasure through sight and through hearing were beautiful, not by that by which each of them was so affected as to be beautiful, but not both, nor both but not each, but by that by which both and each were so affected, because you conceded that both and each were beautiful. For this reason I thought that if both are beautiful they must be beautiful by

that essence which belongs to both, but not by that which is lacking in each; and I still think so. But tell me, as in the beginning: If pleasure through sight and pleasure through hearing are both and each beautiful, does not that which makes them beautiful belong to both and to each?

Hippias: Certainly.

Socrates: Is it, then, for this reason, because each is a pleasure and both are pleasures, that they would be beautiful? Or would all other pleasures be for this reason no less beautiful than they? For we saw, if you remember, that they were no less pleasures.

Hippias: Yes, I remember.

Socrates: But for this reason, because these pleasures were through sight and hearing, it was said that they are beautiful.

Hippias: Yes, that is what was said.

Socrates: See if what I say is true. For it was said, if my memory serves me, that this “pleasant” was beautiful, not all “pleasant,” but that which is through sight and hearing.

Hippias: True.

Socrates: Now this quality belongs to both, but not to each, does it not? For surely each of them, as was said before, is not through both senses, but both are through both, and each is not. Is that true?

Hippias: It is.

Socrates: Then it is not by that which does not belong to each that each of them is beautiful; for “both” does not belong to each; so that it is possible, according to our hypothesis, to say that they both are beautiful, but not to say that each is so; or what shall we say? Is that not inevitable?

Hippias: It appears so.

Socrates: Shall we say, then, that both are beautiful, but that each is

not?

Hippias: What is to prevent?

Socrates: This seems to me, my friend, to prevent, that there were some attributes thus belonging to individual things, which belonged, we thought, to each, if they belonged to both, and to both, if they belonged to each — I mean all those attributes which you specified. Am I right?

Hippias: Yes.

Socrates: But those again which I specified did not; and among those were precisely “each” and “both”. Is that so?

Hippias: It is.

Socrates: To which group, then, Hippias, does the beautiful seem to you to belong? To the group of those that you mentioned? If I am strong and you also, are we both collectively strong, and if I am just and you also, are we both collectively just, and if both collectively, then each individually so, too, if I am beautiful and you also, are we both collectively beautiful, and if both collectively, then each individually? Or is there nothing to prevent this, as in the case that when given things are both collectively even, they may perhaps individually be odd, or perhaps even, and again, when things are individually irrational quantities they may perhaps both collectively be rational, or perhaps irrational, and countless other cases which, you know, I said appeared before my mind? To which group do you assign the beautiful? Or have you the same view about it as I? For to me it seems great foolishness that we collectively are beautiful, but each of us is not so, or that each of us is so, but both are not, or anything else of that sort. Do you choose in this way, as I do, or in some other way?

Hippias: In this way, Socrates.

Socrates: You choose well, Hippias, that we may be free from the need of further search; for if the beautiful is in this group, that which is pleasing through sight and hearing would no longer be the

beautiful. For the expression through sight and hearing makes both collectively beautiful, but not each individually; and this was impossible, as you and I agree.

Hippias: Yes, we agree.

Socrates: It is, then, impossible that the pleasant through sight and hearing be the beautiful, since in becoming beautiful it offers an impossibility.

Hippias: That is true.

Socrates: “Then tell us again,” he will say, “from the beginning, since you failed this time; what do you say that this ‘beautiful’, belonging to both the pleasures, is, on account of which you honored them before the rest and called them beautiful?” It seems to me, Hippias, inevitable that we say that these are the most harmless and the best of pleasures, both of them collectively and each of them individually; or have you anything else to suggest, by which they excel the rest?

Hippias: Not at all; for really they are the best.

Socrates: “This, then,” he will say, “you say is the beautiful, beneficial pleasure?” “It seems that we do,” I shall say; and you?

Hippias: I also.

Socrates: “Well, then,” he will say, “beneficial is that which creates the good, but that which creates and that which is created were just now seen to be different, and our argument has come round to the earlier argument, has it not? For neither could the good be beautiful nor the beautiful good, if each of them is different from the other.” “Absolutely true,” we shall say, if we are reasonable; for it is inadmissible to disagree with him who says what is right.

Hippias: But now, Socrates, what do you think all this amounts to? It is mere scrapings and shavings of discourse, as I said a while ago, divided into bits; but that other ability is beautiful and of great worth, the ability to produce a discourse well and beautifully in a court of

law or a council-house or before any other public body before which the discourse may be delivered, to convince the audience and to carry off, not the smallest, but the greatest of prizes, the salvation of oneself, one's property, and one's friends. For these things, therefore, one must strive, renouncing these petty arguments, that one may not, by busying oneself, as at present, with mere talk and nonsense, appear to be a fool.

Socrates: My dear Hippias, you are blessed because you know the things a man ought to practise, and have, as you say, practised them satisfactorily. But I, as it seems, am possessed by some accursed fortune, so that I am always wandering and perplexed, and, exhibiting my perplexity to you wise men, am in turn reviled by you in speech whenever I exhibit it. For you say of me, what you are now saying, that I busy myself with silly little matters of no account; but when in turn I am convinced by you and say what you say, that it is by far the best thing to be able to produce a discourse well and beautifully and gain one's end in a court of law or in any other assemblage, I am called everything that is bad by some other men here and especially by that man who is continually refuting me; for he is a very near relative of mine and lives in the same house. So whenever I go home to my own house, and he hears me saying these things, he asks me if I am not ashamed that I have the face to talk about beautiful practices, when it is so plainly shown, to my confusion, that I do not even know what the beautiful itself is. "And yet how are you to know," he will say, "either who produced a discourse, or anything else whatsoever, beautifully, or not, when you are ignorant of the beautiful? And when you are in such a condition, do you think it is better for you to be alive than dead?" So it has come about, as I say, that I am abused and reviled by you and by him. But perhaps it is necessary to endure all this, for it is quite reasonable that I might be benefited by it. So I think, Hippias, that I have been benefited by conversation with both of you; for I think I know the meaning of the proverb "beautiful things are difficult".

HIPPIAS MINOR

Translated by Benjamin Jowett

In this early dialogue, Socrates matches wits with the arrogant Sophist and critic Hippias, who believes that Homer's works can be taken as entirely truthful. Socrates argues with Hippias about which kind of liar is the best, the man who deliberately contrives a lie, or the man who lies unwittingly, from not paying attention to what he is saying, or changing his mind. Socrates argues that the voluntary lie is better than the involuntary lie.

The debate is rooted in a literary question about who Homer intended to portray as the better man, Achilles or Odysseus. Socrates says he has heard Eudicus' father, Apemantus, declare that there is a parallel analogy between the artistic quality of the Iliad and the moral quality of its main character, Achilles, and the quality of the Odyssey and the quality of its main character, Odysseus. The men do not pursue this thesis, that the moral status of the characters in a work of literature has some bearing on its artistry. Socrates does resurrect the idea in the Republic, however, when he argues that Homer's classics would be better books if Achilles and the other warriors were presented as always righteous. Socrates says that they ought to be rewritten to this effect.

An idealised portrayal of Homer, the legendary epic poet discussed in this dialogue

HIPPIAS MINOR

PERSONS OF THE DIALOGUE:

SOCRATES

HIPPIAS.

EUDICUS: Why are you silent, Socrates, after the magnificent display which Hippias has been making? Why do you not either refute his words, if he seems to you to have been wrong in any point, or join with us in commending him? There is the more reason why you should speak, because we are now alone, and the audience is confined to those who may fairly claim to take part in a philosophical discussion.

SOCRATES: I should greatly like, Eudicus, to ask Hippias the meaning of what he was saying just now about Homer. I have heard your father, Apemantus, declare that the Iliad of Homer is a finer poem than the Odyssey in the same degree that Achilles was a better man than Odysseus; Odysseus, he would say, is the central figure of the one poem and Achilles of the other. Now, I should like to know, if Hippias has no objection to tell me, what he thinks about these two heroes, and which of them he maintains to be the better; he has already told us in the course of his exhibition many things of various kinds about Homer and divers other poets.

EUDICUS: I am sure that Hippias will be delighted to answer anything which you would like to ask; tell me, Hippias, if Socrates asks you a question, will you answer him?

HIPPIAS: Indeed, Eudicus, I should be strangely inconsistent if I refused to answer Socrates, when at each Olympic festival, as I went up from my house at Elis to the temple of Olympia, where all the Hellenes were assembled, I continually professed my willingness to perform any of the exhibitions which I had prepared, and to answer any questions which any one had to ask.

SOCRATES: Truly, Hippias, you are to be congratulated, if at every Olympic festival you have such an encouraging opinion of your own wisdom when you go up to the temple. I doubt whether any muscular hero would be so fearless and confident in offering his body to the combat at Olympia, as you are in offering your mind.

HIPPIAS: And with good reason, Socrates; for since the day when I first entered the lists at Olympia I have never found any man who was my superior in anything. (Compare Gorgias.)

SOCRATES: What an ornament, Hippias, will the reputation of your wisdom be to the city of Elis and to your parents! But to return: what say you of Odysseus and Achilles? Which is the better of the two? and in what particular does either surpass the other? For when you were exhibiting and there was company in the room, though I could not follow you, I did not like to ask what you meant, because a crowd of people were present, and I was afraid that the question might interrupt your exhibition. But now that there are not so many of us, and my friend Eudicus bids me ask, I wish you would tell me what you were saying about these two heroes, so that I may clearly understand; how did you distinguish them?

HIPPIAS: I shall have much pleasure, Socrates, in explaining to you more clearly than I could in public my views about these and also about other heroes. I say that Homer intended Achilles to be the bravest of the men who went to Troy, Nestor the wisest, and Odysseus the wiliest.

SOCRATES: O rare Hippias, will you be so good as not to laugh, if I find a difficulty in following you, and repeat my questions several times over? Please to answer me kindly and gently.

HIPPIAS: I should be greatly ashamed of myself, Socrates, if I, who teach others and take money of them, could not, when I was asked by you, answer in a civil and agreeable manner.

SOCRATES: Thank you: the fact is, that I seemed to understand what you meant when you said that the poet intended Achilles to be the bravest of men, and also that he intended Nestor to be the wisest;

but when you said that he meant Odysseus to be the wiliest, I must confess that I could not understand what you were saying. Will you tell me, and then I shall perhaps understand you better; has not Homer made Achilles wily?

HIPPIAS: Certainly not, Socrates; he is the most straight-forward of mankind, and when Homer introduces them talking with one another in the passage called the Prayers, Achilles is supposed by the poet to say to Odysseus: —

‘Son of Laertes, sprung from heaven, crafty Odysseus, I will speak out plainly the word which I intend to carry out in act, and which will, I believe, be accomplished. For I hate him like the gates of death who thinks one thing and says another. But I will speak that which shall be accomplished.’

Now, in these verses he clearly indicates the character of the two men; he shows Achilles to be true and simple, and Odysseus to be wily and false; for he supposes Achilles to be addressing Odysseus in these lines.

SOCRATES: Now, Hippias, I think that I understand your meaning; when you say that Odysseus is wily, you clearly mean that he is false?

HIPPIAS: Exactly so, Socrates; it is the character of Odysseus, as he is represented by Homer in many passages both of the Iliad and Odyssey.

SOCRATES: And Homer must be presumed to have meant that the true man is not the same as the false?

HIPPIAS: Of course, Socrates.

SOCRATES: And is that your own opinion, Hippias?

HIPPIAS: Certainly; how can I have any other?

SOCRATES: Well, then, as there is no possibility of asking Homer what he meant in these verses of his, let us leave him; but as you

show a willingness to take up his cause, and your opinion agrees with what you declare to be his, will you answer on behalf of yourself and him?

HIPPIAS: I will; ask shortly anything which you like.

SOCRATES: Do you say that the false, like the sick, have no power to do things, or that they have the power to do things?

HIPPIAS: I should say that they have power to do many things, and in particular to deceive mankind.

SOCRATES: Then, according to you, they are both powerful and wily, are they not?

HIPPIAS: Yes.

SOCRATES: And are they wily, and do they deceive by reason of their simplicity and folly, or by reason of their cunning and a certain sort of prudence?

HIPPIAS: By reason of their cunning and prudence, most certainly.

SOCRATES: Then they are prudent, I suppose?

HIPPIAS: So they are — very.

SOCRATES: And if they are prudent, do they know or do they not know what they do?

HIPPIAS: Of course, they know very well; and that is why they do mischief to others.

SOCRATES: And having this knowledge, are they ignorant, or are they wise?

HIPPIAS: Wise, certainly; at least, in so far as they can deceive.

SOCRATES: Stop, and let us recall to mind what you are saying; are you not saying that the false are powerful and prudent and knowing and wise in those things about which they are false?

HIPPIAS: To be sure.

SOCRATES: And the true differ from the false — the true and the false are the very opposite of each other?

HIPPIAS: That is my view.

SOCRATES: Then, according to your view, it would seem that the false are to be ranked in the class of the powerful and wise?

HIPPIAS: Assuredly.

SOCRATES: And when you say that the false are powerful and wise in so far as they are false, do you mean that they have or have not the power of uttering their falsehoods if they like?

HIPPIAS: I mean to say that they have the power.

SOCRATES: In a word, then, the false are they who are wise and have the power to speak falsely?

HIPPIAS: Yes.

SOCRATES: Then a man who has not the power of speaking falsely and is ignorant cannot be false?

HIPPIAS: You are right.

SOCRATES: And every man has power who does that which he wishes at the time when he wishes. I am not speaking of any special case in which he is prevented by disease or something of that sort, but I am speaking generally, as I might say of you, that you are able to write my name when you like. Would you not call a man able who could do that?

HIPPIAS: Yes.

SOCRATES: And tell me, Hippias, are you not a skilful calculator and arithmetician?

HIPPIAS: Yes, Socrates, assuredly I am.

SOCRATES: And if some one were to ask you what is the sum of 3 multiplied by 700, you would tell him the true answer in a moment, if you pleased?

HIPPIAS: certainly I should.

SOCRATES: Is not that because you are the wisest and ablest of men in these matters?

HIPPIAS: Yes.

SOCRATES: And being as you are the wisest and ablest of men in these matters of calculation, are you not also the best?

HIPPIAS: To be sure, Socrates, I am the best.

SOCRATES: And therefore you would be the most able to tell the truth about these matters, would you not?

HIPPIAS: Yes, I should.

SOCRATES: And could you speak falsehoods about them equally well? I must beg, Hippias, that you will answer me with the same frankness and magnanimity which has hitherto characterized you. If a person were to ask you what is the sum of 3 multiplied by 700, would not you be the best and most consistent teller of a falsehood, having always the power of speaking falsely as you have of speaking truly, about these same matters, if you wanted to tell a falsehood, and not to answer truly? Would the ignorant man be better able to tell a falsehood in matters of calculation than you would be, if you chose? Might he not sometimes stumble upon the truth, when he wanted to tell a lie, because he did not know, whereas you who are the wise man, if you wanted to tell a lie would always and consistently lie?

HIPPIAS: Yes, there you are quite right.

SOCRATES: Does the false man tell lies about other things, but not about number, or when he is making a calculation?

HIPPIAS: To be sure; he would tell as many lies about number as about other things.

SOCRATES: Then may we further assume, Hippias, that there are men who are false about calculation and number?

HIPPIAS: Yes.

SOCRATES: Who can they be? For you have already admitted that he who is false must have the ability to be false: you said, as you will remember, that he who is unable to be false will not be false?

HIPPIAS: Yes, I remember; it was so said.

SOCRATES: And were you not yourself just now shown to be best able to speak falsely about calculation?

HIPPIAS: Yes; that was another thing which was said.

SOCRATES: And are you not likewise said to speak truly about calculation?

HIPPIAS: Certainly.

SOCRATES: Then the same person is able to speak both falsely and truly about calculation? And that person is he who is good at calculation — the arithmetician?

HIPPIAS: Yes.

SOCRATES: Who, then, Hippias, is discovered to be false at calculation? Is he not the good man? For the good man is the able man, and he is the true man.

HIPPIAS: That is evident.

SOCRATES: Do you not see, then, that the same man is false and also true about the same matters? And the true man is not a whit better than the false; for indeed he is the same with him and not the very opposite, as you were just now imagining.

HIPPIAS: Not in that instance, clearly.

SOCRATES: Shall we examine other instances?

HIPPIAS: Certainly, if you are disposed.

SOCRATES: Are you not also skilled in geometry?

HIPPIAS: I am.

SOCRATES: Well, and does not the same hold in that science also? Is not the same person best able to speak falsely or to speak truly about diagrams; and he is — the geometrician?

HIPPIAS: Yes.

SOCRATES: He and no one else is good at it?

HIPPIAS: Yes, he and no one else.

SOCRATES: Then the good and wise geometer has this double power in the highest degree; and if there be a man who is false about diagrams the good man will be he, for he is able to be false; whereas the bad is unable, and for this reason is not false, as has been admitted.

HIPPIAS: True.

SOCRATES: Once more — let us examine a third case; that of the astronomer, in whose art, again, you, Hippias, profess to be a still greater proficient than in the preceding — do you not?

HIPPIAS: Yes, I am.

SOCRATES: And does not the same hold of astronomy?

HIPPIAS: True, Socrates.

SOCRATES: And in astronomy, too, if any man be able to speak falsely he will be the good astronomer, but he who is not able will not speak falsely, for he has no knowledge.

HIPPIAS: Clearly not.

SOCRATES: Then in astronomy also, the same man will be true and false?

HIPPIAS: It would seem so.

SOCRATES: And now, Hippias, consider the question at large about all the sciences, and see whether the same principle does not always hold. I know that in most arts you are the wisest of men, as I have heard you boasting in the agora at the tables of the money-changers, when you were setting forth the great and enviable stores of your wisdom; and you said that upon one occasion, when you went to the Olympic games, all that you had on your person was made by yourself. You began with your ring, which was of your own workmanship, and you said that you could engrave rings; and you had another seal which was also of your own workmanship, and a strigil and an oil flask, which you had made yourself; you said also that you had made the shoes which you had on your feet, and the cloak and the short tunic; but what appeared to us all most extraordinary and a proof of singular art, was the girdle of your tunic, which, you said, was as fine as the most costly Persian fabric, and of your own weaving; moreover, you told us that you had brought with you poems, epic, tragic, and dithyrambic, as well as prose writings of the most various kinds; and you said that your skill was also pre-eminent in the arts which I was just now mentioning, and in the true principles of rhythm and harmony and of orthography; and if I remember rightly, there were a great many other accomplishments in which you excelled. I have forgotten to mention your art of memory, which you regard as your special glory, and I dare say that I have forgotten many other things; but, as I was saying, only look to your own arts — and there are plenty of them — and to those of others; and tell me, having regard to the admissions which you and I have made, whether you discover any department of art or any description of wisdom or cunning, whichever name you use, in which the true and false are different and not the same: tell me, if you can, of any. But you cannot.

HIPPIAS: Not without consideration, Socrates.

SOCRATES: Nor will consideration help you, Hippias, as I believe; but then if I am right, remember what the consequence will be.

HIPPIAS: I do not know what you mean, Socrates.

SOCRATES: I suppose that you are not using your art of memory, doubtless because you think that such an accomplishment is not needed on the present occasion. I will therefore remind you of what you were saying: were you not saying that Achilles was a true man, and Odysseus false and wily?

HIPPIAS: I was.

SOCRATES: And now do you perceive that the same person has turned out to be false as well as true? If Odysseus is false he is also true, and if Achilles is true he is also false, and so the two men are not opposed to one another, but they are alike.

HIPPIAS: O Socrates, you are always weaving the meshes of an argument, selecting the most difficult point, and fastening upon details instead of grappling with the matter in hand as a whole. Come now, and I will demonstrate to you, if you will allow me, by many satisfactory proofs, that Homer has made Achilles a better man than Odysseus, and a truthful man too; and that he has made the other crafty, and a teller of many untruths, and inferior to Achilles. And then, if you please, you shall make a speech on the other side, in order to prove that Odysseus is the better man; and this may be compared to mine, and then the company will know which of us is the better speaker.

SOCRATES: O Hippias, I do not doubt that you are wiser than I am. But I have a way, when anybody else says anything, of giving close attention to him, especially if the speaker appears to me to be a wise man. Having a desire to understand, I question him, and I examine and analyse and put together what he says, in order that I may understand; but if the speaker appears to me to be a poor hand, I do not interrogate him, or trouble myself about him, and you may know by this who they are whom I deem to be wise men, for you will see that when I am talking with a wise man, I am very attentive to what he says; and I ask questions of him, in order that I may learn, and be improved by him. And I could not help remarking while you were

speaking, that when you recited the verses in which Achilles, as you argued, attacks Odysseus as a deceiver, that you must be strangely mistaken, because Odysseus, the man of wiles, is never found to tell a lie; but Achilles is found to be wily on your own showing. At any rate he speaks falsely; for first he utters these words, which you just now repeated, —

‘He is hateful to me even as the gates of death who thinks one thing and says another:’ —

And then he says, a little while afterwards, he will not be persuaded by Odysseus and Agamemnon, neither will he remain at Troy; but, says he, —

‘To-morrow, when I have offered sacrifices to Zeus and all the Gods, having loaded my ships well, I will drag them down into the deep; and then you shall see, if you have a mind, and if such things are a care to you, early in the morning my ships sailing over the fishy Hellespont, and my men eagerly plying the oar; and, if the illustrious shaker of the earth gives me a good voyage, on the third day I shall reach the fertile Phthia.’

And before that, when he was reviling Agamemnon, he said, —

‘And now to Phthia I will go, since to return home in the beaked ships is far better, nor am I inclined to stay here in dishonour and amass wealth and riches for you.’

But although on that occasion, in the presence of the whole army, he spoke after this fashion, and on the other occasion to his companions, he appears never to have made any preparation or attempt to draw down the ships, as if he had the least intention of sailing home; so nobly regardless was he of the truth. Now I, Hippias, originally asked you the question, because I was in doubt as to which of the two heroes was intended by the poet to be the best, and because I thought that both of them were the best, and that it would be difficult to decide which was the better of them, not only in respect of truth and falsehood, but of virtue generally, for even in this matter of speaking the truth they are much upon a par.

HIPPIAS: There you are wrong, Socrates; for in so far as Achilles speaks falsely, the falsehood is obviously unintentional. He is compelled against his will to remain and rescue the army in their misfortune. But when Odysseus speaks falsely he is voluntarily and intentionally false.

SOCRATES: You, sweet Hippias, like Odysseus, are a deceiver yourself.

HIPPIAS: Certainly not, Socrates; what makes you say so?

SOCRATES: Because you say that Achilles does not speak falsely from design, when he is not only a deceiver, but besides being a braggart, in Homer's description of him is so cunning, and so far superior to Odysseus in lying and pretending, that he dares to contradict himself, and Odysseus does not find him out; at any rate he does not appear to say anything to him which would imply that he perceived his falsehood.

HIPPIAS: What do you mean, Socrates?

SOCRATES: Did you not observe that afterwards, when he is speaking to Odysseus, he says that he will sail away with the early dawn; but to Ajax he tells quite a different story?

HIPPIAS: Where is that?

SOCRATES: Where he says, —

‘I will not think about bloody war until the son of warlike Priam, illustrious Hector, comes to the tents and ships of the Myrmidons, slaughtering the Argives, and burning the ships with fire; and about my tent and dark ship, I suspect that Hector, although eager for the battle, will nevertheless stay his hand.’

Now, do you really think, Hippias, that the son of Thetis, who had been the pupil of the sage Cheiron, had such a bad memory, or would have carried the art of lying to such an extent (when he had been assailing liars in the most violent terms only the instant before) as to say to Odysseus that he would sail away, and to Ajax that he would

remain, and that he was not rather practising upon the simplicity of Odysseus, whom he regarded as an ancient, and thinking that he would get the better of him by his own cunning and falsehood?

HIPPIAS: No, I do not agree with you, Socrates; but I believe that Achilles is induced to say one thing to Ajax, and another to Odysseus in the innocence of his heart, whereas Odysseus, whether he speaks falsely or truly, speaks always with a purpose.

SOCRATES: Then Odysseus would appear after all to be better than Achilles?

HIPPIAS: Certainly not, Socrates.

SOCRATES: Why, were not the voluntary liars only just now shown to be better than the involuntary?

HIPPIAS: And how, Socrates, can those who intentionally err, and voluntarily and designedly commit iniquities, be better than those who err and do wrong involuntarily? Surely there is a great excuse to be made for a man telling a falsehood, or doing an injury or any sort of harm to another in ignorance. And the laws are obviously far more severe on those who lie or do evil, voluntarily, than on those who do evil involuntarily.

SOCRATES: You see, Hippias, as I have already told you, how pertinacious I am in asking questions of wise men. And I think that this is the only good point about me, for I am full of defects, and always getting wrong in some way or other. My deficiency is proved to me by the fact that when I meet one of you who are famous for wisdom, and to whose wisdom all the Hellenes are witnesses, I am found out to know nothing. For speaking generally, I hardly ever have the same opinion about anything which you have, and what proof of ignorance can be greater than to differ from wise men? But I have one singular good quality, which is my salvation; I am not ashamed to learn, and I ask and enquire, and am very grateful to those who answer me, and never fail to give them my grateful thanks; and when I learn a thing I never deny my teacher, or pretend that the lesson is a discovery of my own; but I praise his wisdom,

and proclaim what I have learned from him. And now I cannot agree in what you are saying, but I strongly disagree. Well, I know that this is my own fault, and is a defect in my character, but I will not pretend to be more than I am; and my opinion, Hippias, is the very contrary of what you are saying. For I maintain that those who hurt or injure mankind, and speak falsely and deceive, and err voluntarily, are better far than those who do wrong involuntarily. Sometimes, however, I am of the opposite opinion; for I am all abroad in my ideas about this matter, a condition obviously occasioned by ignorance. And just now I happen to be in a crisis of my disorder at which those who err voluntarily appear to me better than those who err involuntarily. My present state of mind is due to our previous argument, which inclines me to believe that in general those who do wrong involuntarily are worse than those who do wrong voluntarily, and therefore I hope that you will be good to me, and not refuse to heal me; for you will do me a much greater benefit if you cure my soul of ignorance, than you would if you were to cure my body of disease. I must, however, tell you beforehand, that if you make a long oration to me you will not cure me, for I shall not be able to follow you; but if you will answer me, as you did just now, you will do me a great deal of good, and I do not think that you will be any the worse yourself. And I have some claim upon you also, O son of Apemantus, for you incited me to converse with Hippias; and now, if Hippias will not answer me, you must entreat him on my behalf.

EUDICUS: But I do not think, Socrates, that Hippias will require any entreaty of mine; for he has already said that he will refuse to answer no man. — Did you not say so, Hippias?

HIPPIAS: Yes, I did; but then, Eudicus, Socrates is always troublesome in an argument, and appears to be dishonest. (Compare Gorgias; Republic.)

SOCRATES: Excellent Hippias, I do not do so intentionally (if I did, it would show me to be a wise man and a master of wiles, as you would argue), but unintentionally, and therefore you must pardon me; for, as you say, he who is unintentionally dishonest should be pardoned.

EUDICUS: Yes, Hippias, do as he says; and for our sake, and also that you may not belie your profession, answer whatever Socrates asks you.

HIPPIAS: I will answer, as you request me; and do you ask whatever you like.

SOCRATES: I am very desirous, Hippias, of examining this question, as to which are the better — those who err voluntarily or involuntarily? And if you will answer me, I think that I can put you in the way of approaching the subject: You would admit, would you not, that there are good runners?

HIPPIAS: Yes.

SOCRATES: And there are bad runners?

HIPPIAS: Yes.

SOCRATES: And he who runs well is a good runner, and he who runs ill is a bad runner?

HIPPIAS: Very true.

SOCRATES: And he who runs slowly runs ill, and he who runs quickly runs well?

HIPPIAS: Yes.

SOCRATES: Then in a race, and in running, swiftness is a good, and slowness is an evil quality?

HIPPIAS: To be sure.

SOCRATES: Which of the two then is a better runner? He who runs slowly voluntarily, or he who runs slowly involuntarily?

HIPPIAS: He who runs slowly voluntarily.

SOCRATES: And is not running a species of doing?

HIPPIAS: Certainly.

SOCRATES: And if a species of doing, a species of action?

HIPPIAS: Yes.

SOCRATES: Then he who runs badly does a bad and dishonourable action in a race?

HIPPIAS: Yes; a bad action, certainly.

SOCRATES: And he who runs slowly runs badly?

HIPPIAS: Yes.

SOCRATES: Then the good runner does this bad and disgraceful action voluntarily, and the bad involuntarily?

HIPPIAS: That is to be inferred.

SOCRATES: Then he who involuntarily does evil actions, is worse in a race than he who does them voluntarily?

HIPPIAS: Yes, in a race.

SOCRATES: Well, but at a wrestling match — which is the better wrestler, he who falls voluntarily or involuntarily?

HIPPIAS: He who falls voluntarily, doubtless.

SOCRATES: And is it worse or more dishonourable at a wrestling match, to fall, or to throw another?

HIPPIAS: To fall.

SOCRATES: Then, at a wrestling match, he who voluntarily does base and dishonourable actions is a better wrestler than he who does them involuntarily?

HIPPIAS: That appears to be the truth.

SOCRATES: And what would you say of any other bodily exercise — is not he who is better made able to do both that which is strong and that which is weak — that which is fair and that which is foul? — so that when he does bad actions with the body, he who is better

made does them voluntarily, and he who is worse made does them involuntarily.

HIPPIAS: Yes, that appears to be true about strength.

SOCRATES: And what do you say about grace, Hippias? Is not he who is better made able to assume evil and disgraceful figures and postures voluntarily, as he who is worse made assumes them involuntarily?

HIPPIAS: True.

SOCRATES: Then voluntary ungracefulness comes from excellence of the bodily frame, and involuntary from the defect of the bodily frame?

HIPPIAS: True.

SOCRATES: And what would you say of an unmusical voice; would you prefer the voice which is voluntarily or involuntarily out of tune?

HIPPIAS: That which is voluntarily out of tune.

SOCRATES: The involuntary is the worse of the two?

HIPPIAS: Yes.

SOCRATES: And would you choose to possess goods or evils?

HIPPIAS: Goods.

SOCRATES: And would you rather have feet which are voluntarily or involuntarily lame?

HIPPIAS: Feet which are voluntarily lame.

SOCRATES: But is not lameness a defect or deformity?

HIPPIAS: Yes.

SOCRATES: And is not blinking a defect in the eyes?

HIPPIAS: Yes.

SOCRATES: And would you rather always have eyes with which you might voluntarily blink and not see, or with which you might involuntarily blink?

HIPPIAS: I would rather have eyes which voluntarily blink.

SOCRATES: Then in your own case you deem that which voluntarily acts ill, better than that which involuntarily acts ill?

HIPPIAS: Yes, certainly, in cases such as you mention.

SOCRATES: And does not the same hold of ears, nostrils, mouth, and of all the senses — those which involuntarily act ill are not to be desired, as being defective; and those which voluntarily act ill are to be desired as being good?

HIPPIAS: I agree.

SOCRATES: And what would you say of instruments; — which are the better sort of instruments to have to do with? — those with which a man acts ill voluntarily or involuntarily? For example, had a man better have a rudder with which he will steer ill, voluntarily or involuntarily?

HIPPIAS: He had better have a rudder with which he will steer ill voluntarily.

SOCRATES: And does not the same hold of the bow and the lyre, the flute and all other things?

HIPPIAS: Very true.

SOCRATES: And would you rather have a horse of such a temper that you may ride him ill voluntarily or involuntarily?

HIPPIAS: I would rather have a horse which I could ride ill voluntarily.

SOCRATES: That would be the better horse?

HIPPIAS: Yes.

SOCRATES: Then with a horse of better temper, vicious actions would be produced voluntarily; and with a horse of bad temper involuntarily?

HIPPIAS: Certainly.

SOCRATES: And that would be true of a dog, or of any other animal?

HIPPIAS: Yes.

SOCRATES: And is it better to possess the mind of an archer who voluntarily or involuntarily misses the mark?

HIPPIAS: Of him who voluntarily misses.

SOCRATES: This would be the better mind for the purposes of archery?

HIPPIAS: Yes.

SOCRATES: Then the mind which involuntarily errs is worse than the mind which errs voluntarily?

HIPPIAS: Yes, certainly, in the use of the bow.

SOCRATES: And what would you say of the art of medicine; — has not the mind which voluntarily works harm to the body, more of the healing art?

HIPPIAS: Yes.

SOCRATES: Then in the art of medicine the voluntary is better than the involuntary?

HIPPIAS: Yes.

SOCRATES: Well, and in lute-playing and in flute-playing, and in all arts and sciences, is not that mind the better which voluntarily does what is evil and dishonourable, and goes wrong, and is not the worse that which does so involuntarily?

HIPPIAS: That is evident.

SOCRATES: And what would you say of the characters of slaves? Should we not prefer to have those who voluntarily do wrong and make mistakes, and are they not better in their mistakes than those who commit them involuntarily?

HIPPIAS: Yes.

SOCRATES: And should we not desire to have our own minds in the best state possible?

HIPPIAS: Yes.

SOCRATES: And will our minds be better if they do wrong and make mistakes voluntarily or involuntarily?

HIPPIAS: O, Socrates, it would be a monstrous thing to say that those who do wrong voluntarily are better than those who do wrong involuntarily!

SOCRATES: And yet that appears to be the only inference.

HIPPIAS: I do not think so.

SOCRATES: But I imagined, Hippias, that you did. Please to answer once more: Is not justice a power, or knowledge, or both? Must not justice, at all events, be one of these?

HIPPIAS: Yes.

SOCRATES: But if justice is a power of the soul, then the soul which has the greater power is also the more just; for that which has the greater power, my good friend, has been proved by us to be the better.

HIPPIAS: Yes, that has been proved.

SOCRATES: And if justice is knowledge, then the wiser will be the juster soul, and the more ignorant the more unjust?

HIPPIAS: Yes.

SOCRATES: But if justice be power as well as knowledge — then will not the soul which has both knowledge and power be the more just, and that which is the more ignorant be the more unjust? Must it not be so?

HIPPIAS: Clearly.

SOCRATES: And is not the soul which has the greater power and wisdom also better, and better able to do both good and evil in every action?

HIPPIAS: Certainly.

SOCRATES: The soul, then, which acts ill, acts voluntarily by power and art — and these either one or both of them are elements of justice?

HIPPIAS: That seems to be true.

SOCRATES: And to do injustice is to do ill, and not to do injustice is to do well?

HIPPIAS: Yes.

SOCRATES: And will not the better and abler soul when it does wrong, do wrong voluntarily, and the bad soul involuntarily?

HIPPIAS: Clearly.

SOCRATES: And the good man is he who has the good soul, and the bad man is he who has the bad?

HIPPIAS: Yes.

SOCRATES: Then the good man will voluntarily do wrong, and the bad man involuntarily, if the good man is he who has the good soul?

HIPPIAS: Which he certainly has.

SOCRATES: Then, Hippias, he who voluntarily does wrong and disgraceful things, if there be such a man, will be the good man?

HIPPIAS: There I cannot agree with you.

SOCRATES: Nor can I agree with myself, Hippias; and yet that seems to be the conclusion which, as far as we can see at present, must follow from our argument. As I was saying before, I am all abroad, and being in perplexity am always changing my opinion. Now, that I or any ordinary man should wander in perplexity is not surprising; but if you wise men also wander, and we cannot come to you and rest from our wandering, the matter begins to be serious both to us and to you.

FIRST ALCIBIADES

Translated by Benjamin Jowett

This early dialogue features the charismatic young politician Alcibiades in conversation with Socrates. The first topic they discuss is the essence of politics, war and peace. Prodded by Socrates' questioning Alcibiades admits that he has never learned the nature of justice from a master nor has discovered it by himself. Alcibiades suggests that politics is not about justice, but expediency and the two principles could be opposed. Socrates persuades him that he was mistaken, and there is no expediency without justice. The humiliated youth concedes that he knows nothing about politics. Later Alcibiades says that he is not concerned about his ignorance because all the other Athenian politicians are ignorant. Socrates reminds him that his true rivals are the kings of Sparta and Persia. He delivers a long lecture about the careful education, glorious might and unparalleled richness of these foreign rulers. Alcibiades has got cold feet which was exactly the purpose of Socrates' speech.

ALCIBIADES I

PERSONS OF THE DIALOGUE:

ALCIBIADES

SOCRATES

SOCRATES: I dare say that you may be surprised to find, O son of Cleinias, that I, who am your first lover, not having spoken to you for many years, when the rest of the world were wearying you with their attentions, am the last of your lovers who still speaks to you. The cause of my silence has been that I was hindered by a power more than human, of which I will some day explain to you the nature; this impediment has now been removed; I therefore here present myself before you, and I greatly hope that no similar hindrance will again occur. Meanwhile, I have observed that your pride has been too much for the pride of your admirers; they were numerous and high-spirited, but they have all run away, overpowered by your superior force of character; not one of them remains. And I want you to understand the reason why you have been too much for them. You think that you have no need of them or of any other man, for you have great possessions and lack nothing, beginning with the body, and ending with the soul. In the first place, you say to yourself that you are the fairest and tallest of the citizens, and this every one who has eyes may see to be true; in the second place, that you are among the noblest of them, highly connected both on the father's and the mother's side, and sprung from one of the most distinguished families in your own state, which is the greatest in Hellas, and having many friends and kinsmen of the best sort, who can assist you when in need; and there is one potent relative, who is more to you than all the rest, Pericles the son of Xanthippus, whom your father left guardian of you, and of your brother, and who can do as he pleases not only in this city, but in all Hellas, and among many and mighty barbarous nations. Moreover, you are rich; but I must say that you value yourself least of all upon your possessions. And all these things have lifted you up; you have overcome your lovers, and they have acknowledged that you were too much for them. Have you not

remarked their absence? And now I know that you wonder why I, unlike the rest of them, have not gone away, and what can be my motive in remaining.

ALCIBIADES: Perhaps, Socrates, you are not aware that I was just going to ask you the very same question — What do you want? And what is your motive in annoying me, and always, wherever I am, making a point of coming? (Compare Symp.) I do really wonder what you mean, and should greatly like to know.

SOCRATES: Then if, as you say, you desire to know, I suppose that you will be willing to hear, and I may consider myself to be speaking to an auditor who will remain, and will not run away?

ALCIBIADES: Certainly, let me hear.

SOCRATES: You had better be careful, for I may very likely be as unwilling to end as I have hitherto been to begin.

ALCIBIADES: Proceed, my good man, and I will listen.

SOCRATES: I will proceed; and, although no lover likes to speak with one who has no feeling of love in him (compare Symp.), I will make an effort, and tell you what I meant: My love, Alcibiades, which I hardly like to confess, would long ago have passed away, as I flatter myself, if I saw you loving your good things, or thinking that you ought to pass life in the enjoyment of them. But I shall reveal other thoughts of yours, which you keep to yourself; whereby you will know that I have always had my eye on you. Suppose that at this moment some God came to you and said: Alcibiades, will you live as you are, or die in an instant if you are forbidden to make any further acquisition? — I verily believe that you would choose death. And I will tell you the hope in which you are at present living: Before many days have elapsed, you think that you will come before the Athenian assembly, and will prove to them that you are more worthy of honour than Pericles, or any other man that ever lived, and having proved this, you will have the greatest power in the state. When you have gained the greatest power among us, you will go on to other Hellenic states, and not only to Hellenes, but to all the barbarians who inhabit

the same continent with us. And if the God were then to say to you again: Here in Europe is to be your seat of empire, and you must not cross over into Asia or meddle with Asiatic affairs, I do not believe that you would choose to live upon these terms; but the world, as I may say, must be filled with your power and name — no man less than Cyrus and Xerxes is of any account with you. Such I know to be your hopes — I am not guessing only — and very likely you, who know that I am speaking the truth, will reply, Well, Socrates, but what have my hopes to do with the explanation which you promised of your unwillingness to leave me? And that is what I am now going to tell you, sweet son of Cleinias and Dinomache. The explanation is, that all these designs of yours cannot be accomplished by you without my help; so great is the power which I believe myself to have over you and your concerns; and this I conceive to be the reason why the God has hitherto forbidden me to converse with you, and I have been long expecting his permission. For, as you hope to prove your own great value to the state, and having proved it, to attain at once to absolute power, so do I indulge a hope that I shall be the supreme power over you, if I am able to prove my own great value to you, and to show you that neither guardian, nor kinsman, nor any one is able to deliver into your hands the power which you desire, but I only, God being my helper. When you were young (compare *Symp.*) and your hopes were not yet matured, I should have wasted my time, and therefore, as I conceive, the God forbade me to converse with you; but now, having his permission, I will speak, for now you will listen to me.

ALCIBIADES: Your silence, Socrates, was always a surprise to me. I never could understand why you followed me about, and now that you have begun to speak again, I am still more amazed. Whether I think all this or not, is a matter about which you seem to have already made up your mind, and therefore my denial will have no effect upon you. But granting, if I must, that you have perfectly divined my purposes, why is your assistance necessary to the attainment of them? Can you tell me why?

SOCRATES: You want to know whether I can make a long speech,

such as you are in the habit of hearing; but that is not my way. I think, however, that I can prove to you the truth of what I am saying, if you will grant me one little favour.

ALCIBIADES: Yes, if the favour which you mean be not a troublesome one.

SOCRATES: Will you be troubled at having questions to answer?

ALCIBIADES: Not at all.

SOCRATES: Then please to answer.

ALCIBIADES: Ask me.

SOCRATES: Have you not the intention which I attribute to you?

ALCIBIADES: I will grant anything you like, in the hope of hearing what more you have to say.

SOCRATES: You do, then, mean, as I was saying, to come forward in a little while in the character of an adviser of the Athenians? And suppose that when you are ascending the bema, I pull you by the sleeve and say, Alcibiades, you are getting up to advise the Athenians — do you know the matter about which they are going to deliberate, better than they? — How would you answer?

ALCIBIADES: I should reply, that I was going to advise them about a matter which I do know better than they.

SOCRATES: Then you are a good adviser about the things which you know?

ALCIBIADES: Certainly.

SOCRATES: And do you know anything but what you have learned of others, or found out yourself?

ALCIBIADES: That is all.

SOCRATES: And would you have ever learned or discovered anything, if you had not been willing either to learn of others or to

examine yourself?

ALCIBIADES: I should not.

SOCRATES: And would you have been willing to learn or to examine what you supposed that you knew?

ALCIBIADES: Certainly not.

SOCRATES: Then there was a time when you thought that you did not know what you are now supposed to know?

ALCIBIADES: Certainly.

SOCRATES: I think that I know tolerably well the extent of your acquirements; and you must tell me if I forget any of them: according to my recollection, you learned the arts of writing, of playing on the lyre, and of wrestling; the flute you never would learn; this is the sum of your accomplishments, unless there were some which you acquired in secret; and I think that secrecy was hardly possible, as you could not have come out of your door, either by day or night, without my seeing you.

ALCIBIADES: Yes, that was the whole of my schooling.

SOCRATES: And are you going to get up in the Athenian assembly, and give them advice about writing?

ALCIBIADES: No, indeed.

SOCRATES: Or about the touch of the lyre?

ALCIBIADES: Certainly not.

SOCRATES: And they are not in the habit of deliberating about wrestling, in the assembly?

ALCIBIADES: Hardly.

SOCRATES: Then what are the deliberations in which you propose to advise them? Surely not about building?

ALCIBIADES: No.

SOCRATES: For the builder will advise better than you will about that?

ALCIBIADES: He will.

SOCRATES: Nor about divination?

ALCIBIADES: No.

SOCRATES: About that again the diviner will advise better than you will?

ALCIBIADES: True.

SOCRATES: Whether he be little or great, good or ill-looking, noble or ignoble — makes no difference.

ALCIBIADES: Certainly not.

SOCRATES: A man is a good adviser about anything, not because he has riches, but because he has knowledge?

ALCIBIADES: Assuredly.

SOCRATES: Whether their counsellor is rich or poor, is not a matter which will make any difference to the Athenians when they are deliberating about the health of the citizens; they only require that he should be a physician.

ALCIBIADES: Of course.

SOCRATES: Then what will be the subject of deliberation about which you will be justified in getting up and advising them?

ALCIBIADES: About their own concerns, Socrates.

SOCRATES: You mean about shipbuilding, for example, when the question is what sort of ships they ought to build?

ALCIBIADES: No, I should not advise them about that.

SOCRATES: I suppose, because you do not understand shipbuilding: — is that the reason?

ALCIBIADES: It is.

SOCRATES: Then about what concerns of theirs will you advise them?

ALCIBIADES: About war, Socrates, or about peace, or about any other concerns of the state.

SOCRATES: You mean, when they deliberate with whom they ought to make peace, and with whom they ought to go to war, and in what manner?

ALCIBIADES: Yes.

SOCRATES: And they ought to go to war with those against whom it is better to go to war?

ALCIBIADES: Yes.

SOCRATES: And when it is better?

ALCIBIADES: Certainly.

SOCRATES: And for as long a time as is better?

ALCIBIADES: Yes.

SOCRATES: But suppose the Athenians to deliberate with whom they ought to close in wrestling, and whom they should grasp by the hand, would you, or the master of gymnastics, be a better adviser of them?

ALCIBIADES: Clearly, the master of gymnastics.

SOCRATES: And can you tell me on what grounds the master of gymnastics would decide, with whom they ought or ought not to close, and when and how? To take an instance: Would he not say that they should wrestle with those against whom it is best to wrestle?

ALCIBIADES: Yes.

SOCRATES: And as much as is best?

ALCIBIADES: Certainly.

SOCRATES: And at such times as are best?

ALCIBIADES: Yes.

SOCRATES: Again; you sometimes accompany the lyre with the song and dance?

ALCIBIADES: Yes.

SOCRATES: When it is well to do so?

ALCIBIADES: Yes.

SOCRATES: And as much as is well?

ALCIBIADES: Just so.

SOCRATES: And as you speak of an excellence or art of the best in wrestling, and of an excellence in playing the lyre, I wish you would tell me what this latter is; — the excellence of wrestling I call gymnastic, and I want to know what you call the other.

ALCIBIADES: I do not understand you.

SOCRATES: Then try to do as I do; for the answer which I gave is universally right, and when I say right, I mean according to rule.

ALCIBIADES: Yes.

SOCRATES: And was not the art of which I spoke gymnastic?

ALCIBIADES: Certainly.

SOCRATES: And I called the excellence in wrestling gymnastic?

ALCIBIADES: You did.

SOCRATES: And I was right?

ALCIBIADES: I think that you were.

SOCRATES: Well, now, — for you should learn to argue prettily — let me ask you in return to tell me, first, what is that art of which playing and singing, and stepping properly in the dance, are parts, — what is the name of the whole? I think that by this time you must be able to tell.

ALCIBIADES: Indeed I cannot.

SOCRATES: Then let me put the matter in another way: what do you call the Goddesses who are the patronesses of art?

ALCIBIADES: The Muses do you mean, Socrates?

SOCRATES: Yes, I do; and what is the name of the art which is called after them?

ALCIBIADES: I suppose that you mean music.

SOCRATES: Yes, that is my meaning; and what is the excellence of the art of music, as I told you truly that the excellence of wrestling was gymnastic — what is the excellence of music — to be what?

ALCIBIADES: To be musical, I suppose.

SOCRATES: Very good; and now please to tell me what is the excellence of war and peace; as the more musical was the more excellent, or the more gymnastical was the more excellent, tell me, what name do you give to the more excellent in war and peace?

ALCIBIADES: But I really cannot tell you.

SOCRATES: But if you were offering advice to another and said to him — This food is better than that, at this time and in this quantity, and he said to you — What do you mean, Alcibiades, by the word 'better'? you would have no difficulty in replying that you meant 'more wholesome,' although you do not profess to be a physician: and when the subject is one of which you profess to have knowledge, and about which you are ready to get up and advise as if you knew, are you not ashamed, when you are asked, not to be able to answer

the question? Is it not disgraceful?

ALCIBIADES: Very.

SOCRATES: Well, then, consider and try to explain what is the meaning of 'better,' in the matter of making peace and going to war with those against whom you ought to go to war? To what does the word refer?

ALCIBIADES: I am thinking, and I cannot tell.

SOCRATES: But you surely know what are the charges which we bring against one another, when we arrive at the point of making war, and what name we give them?

ALCIBIADES: Yes, certainly; we say that deceit or violence has been employed, or that we have been defrauded.

SOCRATES: And how does this happen? Will you tell me how? For there may be a difference in the manner.

ALCIBIADES: Do you mean by 'how,' Socrates, whether we suffered these things justly or unjustly?

SOCRATES: Exactly.

ALCIBIADES: There can be no greater difference than between just and unjust.

SOCRATES: And would you advise the Athenians to go to war with the just or with the unjust?

ALCIBIADES: That is an awkward question; for certainly, even if a person did intend to go to war with the just, he would not admit that they were just.

SOCRATES: He would not go to war, because it would be unlawful?

ALCIBIADES: Neither lawful nor honourable.

SOCRATES: Then you, too, would address them on principles of justice?

ALCIBIADES: Certainly.

SOCRATES: What, then, is justice but that better, of which I spoke, in going to war or not going to war with those against whom we ought or ought not, and when we ought or ought not to go to war?

ALCIBIADES: Clearly.

SOCRATES: But how is this, friend Alcibiades? Have you forgotten that you do not know this, or have you been to the schoolmaster without my knowledge, and has he taught you to discern the just from the unjust? Who is he? I wish you would tell me, that I may go and learn of him — you shall introduce me.

ALCIBIADES: You are mocking, Socrates.

SOCRATES: No, indeed; I most solemnly declare to you by Zeus, who is the God of our common friendship, and whom I never will forswear, that I am not; tell me, then, who this instructor is, if he exists.

ALCIBIADES: But, perhaps, he does not exist; may I not have acquired the knowledge of just and unjust in some other way?

SOCRATES: Yes; if you have discovered them.

ALCIBIADES: But do you not think that I could discover them?

SOCRATES: I am sure that you might, if you enquired about them.

ALCIBIADES: And do you not think that I would enquire?

SOCRATES: Yes; if you thought that you did not know them.

ALCIBIADES: And was there not a time when I did so think?

SOCRATES: Very good; and can you tell me how long it is since you thought that you did not know the nature of the just and the unjust? What do you say to a year ago? Were you then in a state of conscious ignorance and enquiry? Or did you think that you knew? And please to answer truly, that our discussion may not be in vain.

ALCIBIADES: Well, I thought that I knew.

SOCRATES: And two years ago, and three years ago, and four years ago, you knew all the same?

ALCIBIADES: I did.

SOCRATES: And more than four years ago you were a child — were you not?

ALCIBIADES: Yes.

SOCRATES: And then I am quite sure that you thought you knew.

ALCIBIADES: Why are you so sure?

SOCRATES: Because I often heard you when a child, in your teacher's house, or elsewhere, playing at dice or some other game with the boys, not hesitating at all about the nature of the just and unjust; but very confident — crying and shouting that one of the boys was a rogue and a cheat, and had been cheating. Is it not true?

ALCIBIADES: But what was I to do, Socrates, when anybody cheated me?

SOCRATES: And how can you say, 'What was I to do'? if at the time you did not know whether you were wronged or not?

ALCIBIADES: To be sure I knew; I was quite aware that I was being cheated.

SOCRATES: Then you suppose yourself even when a child to have known the nature of just and unjust?

ALCIBIADES: Certainly; and I did know then.

SOCRATES: And when did you discover them — not, surely, at the time when you thought that you knew them?

ALCIBIADES: Certainly not.

SOCRATES: And when did you think that you were ignorant — if

you consider, you will find that there never was such a time?

ALCIBIADES: Really, Socrates, I cannot say.

SOCRATES: Then you did not learn them by discovering them?

ALCIBIADES: Clearly not.

SOCRATES: But just before you said that you did not know them by learning; now, if you have neither discovered nor learned them, how and whence do you come to know them?

ALCIBIADES: I suppose that I was mistaken in saying that I knew them through my own discovery of them; whereas, in truth, I learned them in the same way that other people learn.

SOCRATES: So you said before, and I must again ask, of whom? Do tell me.

ALCIBIADES: Of the many.

SOCRATES: Do you take refuge in them? I cannot say much for your teachers.

ALCIBIADES: Why, are they not able to teach?

SOCRATES: They could not teach you how to play at draughts, which you would acknowledge (would you not) to be a much smaller matter than justice?

ALCIBIADES: Yes.

SOCRATES: And can they teach the better who are unable to teach the worse?

ALCIBIADES: I think that they can; at any rate, they can teach many far better things than to play at draughts.

SOCRATES: What things?

ALCIBIADES: Why, for example, I learned to speak Greek of them, and I cannot say who was my teacher, or to whom I am to attribute

my knowledge of Greek, if not to those good-for-nothing teachers, as you call them.

SOCRATES: Why, yes, my friend; and the many are good enough teachers of Greek, and some of their instructions in that line may be justly praised.

ALCIBIADES: Why is that?

SOCRATES: Why, because they have the qualities which good teachers ought to have.

ALCIBIADES: What qualities?

SOCRATES: Why, you know that knowledge is the first qualification of any teacher?

ALCIBIADES: Certainly.

SOCRATES: And if they know, they must agree together and not differ?

ALCIBIADES: Yes.

SOCRATES: And would you say that they knew the things about which they differ?

ALCIBIADES: No.

SOCRATES: Then how can they teach them?

ALCIBIADES: They cannot.

SOCRATES: Well, but do you imagine that the many would differ about the nature of wood and stone? are they not agreed if you ask them what they are? and do they not run to fetch the same thing, when they want a piece of wood or a stone? And so in similar cases, which I suspect to be pretty nearly all that you mean by speaking Greek.

ALCIBIADES: True.

SOCRATES: These, as we were saying, are matters about which they are agreed with one another and with themselves; both individuals and states use the same words about them; they do not use some one word and some another.

ALCIBIADES: They do not.

SOCRATES: Then they may be expected to be good teachers of these things?

ALCIBIADES: Yes.

SOCRATES: And if we want to instruct any one in them, we shall be right in sending him to be taught by our friends the many?

ALCIBIADES: Very true.

SOCRATES: But if we wanted further to know not only which are men and which are horses, but which men or horses have powers of running, would the many still be able to inform us?

ALCIBIADES: Certainly not.

SOCRATES: And you have a sufficient proof that they do not know these things and are not the best teachers of them, inasmuch as they are never agreed about them?

ALCIBIADES: Yes.

SOCRATES: And suppose that we wanted to know not only what men are like, but what healthy or diseased men are like — would the many be able to teach us?

ALCIBIADES: They would not.

SOCRATES: And you would have a proof that they were bad teachers of these matters, if you saw them at variance?

ALCIBIADES: I should.

SOCRATES: Well, but are the many agreed with themselves, or with one another, about the justice or injustice of men and things?

ALCIBIADES: Assuredly not, Socrates.

SOCRATES: There is no subject about which they are more at variance?

ALCIBIADES: None.

SOCRATES: I do not suppose that you ever saw or heard of men quarrelling over the principles of health and disease to such an extent as to go to war and kill one another for the sake of them?

ALCIBIADES: No indeed.

SOCRATES: But of the quarrels about justice and injustice, even if you have never seen them, you have certainly heard from many people, including Homer; for you have heard of the Iliad and Odyssey?

ALCIBIADES: To be sure, Socrates.

SOCRATES: A difference of just and unjust is the argument of those poems?

ALCIBIADES: True.

SOCRATES: Which difference caused all the wars and deaths of Trojans and Achaeans, and the deaths of the suitors of Penelope in their quarrel with Odysseus.

ALCIBIADES: Very true.

SOCRATES: And when the Athenians and Lacedaemonians and Boeotians fell at Tanagra, and afterwards in the battle of Coronea, at which your father Cleinias met his end, the question was one of justice — this was the sole cause of the battles, and of their deaths.

ALCIBIADES: Very true.

SOCRATES: But can they be said to understand that about which they are quarrelling to the death?

ALCIBIADES: Clearly not.

SOCRATES: And yet those whom you thus allow to be ignorant are the teachers to whom you are appealing.

ALCIBIADES: Very true.

SOCRATES: But how are you ever likely to know the nature of justice and injustice, about which you are so perplexed, if you have neither learned them of others nor discovered them yourself?

ALCIBIADES: From what you say, I suppose not.

SOCRATES: See, again, how inaccurately you speak, Alcibiades!

ALCIBIADES: In what respect?

SOCRATES: In saying that I say so.

ALCIBIADES: Why, did you not say that I know nothing of the just and unjust?

SOCRATES: No; I did not.

ALCIBIADES: Did I, then?

SOCRATES: Yes.

ALCIBIADES: How was that?

SOCRATES: Let me explain. Suppose I were to ask you which is the greater number, two or one; you would reply 'two'?

ALCIBIADES: I should.

SOCRATES: And by how much greater?

ALCIBIADES: By one.

SOCRATES: Which of us now says that two is more than one?

ALCIBIADES: I do.

SOCRATES: Did not I ask, and you answer the question?

ALCIBIADES: Yes.

SOCRATES: Then who is speaking? I who put the question, or you who answer me?

ALCIBIADES: I am.

SOCRATES: Or suppose that I ask and you tell me the letters which make up the name Socrates, which of us is the speaker?

ALCIBIADES: I am.

SOCRATES: Now let us put the case generally: whenever there is a question and answer, who is the speaker, — the questioner or the answerer?

ALCIBIADES: I should say, Socrates, that the answerer was the speaker.

SOCRATES: And have I not been the questioner all through?

ALCIBIADES: Yes.

SOCRATES: And you the answerer?

ALCIBIADES: Just so.

SOCRATES: Which of us, then, was the speaker?

ALCIBIADES: The inference is, Socrates, that I was the speaker.

SOCRATES: Did not some one say that Alcibiades, the fair son of Cleinias, not understanding about just and unjust, but thinking that he did understand, was going to the assembly to advise the Athenians about what he did not know? Was not that said?

ALCIBIADES: Very true.

SOCRATES: Then, Alcibiades, the result may be expressed in the language of Euripides. I think that you have heard all this ‘from yourself, and not from me’; nor did I say this, which you erroneously attribute to me, but you yourself, and what you said was very true. For indeed, my dear fellow, the design which you meditate of teaching what you do not know, and have not taken any pains to

learn, is downright insanity.

ALCIBIADES: But, Socrates, I think that the Athenians and the rest of the Hellenes do not often advise as to the more just or unjust; for they see no difficulty in them, and therefore they leave them, and consider which course of action will be most expedient; for there is a difference between justice and expediency. Many persons have done great wrong and profited by their injustice; others have done rightly and come to no good.

SOCRATES: Well, but granting that the just and the expedient are ever so much opposed, you surely do not imagine that you know what is expedient for mankind, or why a thing is expedient?

ALCIBIADES: Why not, Socrates? — But I am not going to be asked again from whom I learned, or when I made the discovery.

SOCRATES: What a way you have! When you make a mistake which might be refuted by a previous argument, you insist on having a new and different refutation; the old argument is a worn-out garment which you will no longer put on, but some one must produce another which is clean and new. Now I shall disregard this move of yours, and shall ask over again, — Where did you learn and how do you know the nature of the expedient, and who is your teacher? All this I comprehend in a single question, and now you will manifestly be in the old difficulty, and will not be able to show that you know the expedient, either because you learned or because you discovered it yourself. But, as I perceive that you are dainty, and dislike the taste of a stale argument, I will enquire no further into your knowledge of what is expedient or what is not expedient for the Athenian people, and simply request you to say why you do not explain whether justice and expediency are the same or different? And if you like you may examine me as I have examined you, or, if you would rather, you may carry on the discussion by yourself.

ALCIBIADES: But I am not certain, Socrates, whether I shall be able to discuss the matter with you.

SOCRATES: Then imagine, my dear fellow, that I am the demus and

the ecclesia; for in the ecclesia, too, you will have to persuade men individually.

ALCIBIADES: Yes.

SOCRATES: And is not the same person able to persuade one individual singly and many individuals of the things which he knows? The grammarian, for example, can persuade one and he can persuade many about letters.

ALCIBIADES: True.

SOCRATES: And about number, will not the same person persuade one and persuade many?

ALCIBIADES: Yes.

SOCRATES: And this will be he who knows number, or the arithmetician?

ALCIBIADES: Quite true.

SOCRATES: And cannot you persuade one man about that of which you can persuade many?

ALCIBIADES: I suppose so.

SOCRATES: And that of which you can persuade either is clearly what you know?

ALCIBIADES: Yes.

SOCRATES: And the only difference between one who argues as we are doing, and the orator who is addressing an assembly, is that the one seeks to persuade a number, and the other an individual, of the same things.

ALCIBIADES: I suppose so.

SOCRATES: Well, then, since the same person who can persuade a multitude can persuade individuals, try conclusions upon me, and prove to me that the just is not always expedient.

ALCIBIADES: You take liberties, Socrates.

SOCRATES: I shall take the liberty of proving to you the opposite of that which you will not prove to me.

ALCIBIADES: Proceed.

SOCRATES: Answer my questions — that is all.

ALCIBIADES: Nay, I should like you to be the speaker.

SOCRATES: What, do you not wish to be persuaded?

ALCIBIADES: Certainly I do.

SOCRATES: And can you be persuaded better than out of your own mouth?

ALCIBIADES: I think not.

SOCRATES: Then you shall answer; and if you do not hear the words, that the just is the expedient, coming from your own lips, never believe another man again.

ALCIBIADES: I won't; but answer I will, for I do not see how I can come to any harm.

SOCRATES: A true prophecy! Let me begin then by enquiring of you whether you allow that the just is sometimes expedient and sometimes not?

ALCIBIADES: Yes.

SOCRATES: And sometimes honourable and sometimes not?

ALCIBIADES: What do you mean?

SOCRATES: I am asking if you ever knew any one who did what was dishonourable and yet just?

ALCIBIADES: Never.

SOCRATES: All just things are honourable?

ALCIBIADES: Yes.

SOCRATES: And are honourable things sometimes good and sometimes not good, or are they always good?

ALCIBIADES: I rather think, Socrates, that some honourable things are evil.

SOCRATES: And are some dishonourable things good?

ALCIBIADES: Yes.

SOCRATES: You mean in such a case as the following: — In time of war, men have been wounded or have died in rescuing a companion or kinsman, when others who have neglected the duty of rescuing them have escaped in safety?

ALCIBIADES: True.

SOCRATES: And to rescue another under such circumstances is honourable, in respect of the attempt to save those whom we ought to save; and this is courage?

ALCIBIADES: True.

SOCRATES: But evil in respect of death and wounds?

ALCIBIADES: Yes.

SOCRATES: And the courage which is shown in the rescue is one thing, and the death another?

ALCIBIADES: Certainly.

SOCRATES: Then the rescue of one's friends is honourable in one point of view, but evil in another?

ALCIBIADES: True.

SOCRATES: And if honourable, then also good: Will you consider now whether I may not be right, for you were acknowledging that the courage which is shown in the rescue is honourable? Now is this

courage good or evil? Look at the matter thus: which would you rather choose, good or evil?

ALCIBIADES: Good.

SOCRATES: And the greatest goods you would be most ready to choose, and would least like to be deprived of them?

ALCIBIADES: Certainly.

SOCRATES: What would you say of courage? At what price would you be willing to be deprived of courage?

ALCIBIADES: I would rather die than be a coward.

SOCRATES: Then you think that cowardice is the worst of evils?

ALCIBIADES: I do.

SOCRATES: As bad as death, I suppose?

ALCIBIADES: Yes.

SOCRATES: And life and courage are the extreme opposites of death and cowardice?

ALCIBIADES: Yes.

SOCRATES: And they are what you would most desire to have, and their opposites you would least desire?

ALCIBIADES: Yes.

SOCRATES: Is this because you think life and courage the best, and death and cowardice the worst?

ALCIBIADES: Yes.

SOCRATES: And you would term the rescue of a friend in battle honourable, in as much as courage does a good work?

ALCIBIADES: I should.

SOCRATES: But evil because of the death which ensues?

ALCIBIADES: Yes.

SOCRATES: Might we not describe their different effects as follows: — You may call either of them evil in respect of the evil which is the result, and good in respect of the good which is the result of either of them?

ALCIBIADES: Yes.

SOCRATES: And they are honourable in so far as they are good, and dishonourable in so far as they are evil?

ALCIBIADES: True.

SOCRATES: Then when you say that the rescue of a friend in battle is honourable and yet evil, that is equivalent to saying that the rescue is good and yet evil?

ALCIBIADES: I believe that you are right, Socrates.

SOCRATES: Nothing honourable, regarded as honourable, is evil; nor anything base, regarded as base, good.

ALCIBIADES: Clearly not.

SOCRATES: Look at the matter yet once more in a further light: he who acts honourably acts well?

ALCIBIADES: Yes.

SOCRATES: And he who acts well is happy?

ALCIBIADES: Of course.

SOCRATES: And the happy are those who obtain good?

ALCIBIADES: True.

SOCRATES: And they obtain good by acting well and honourably?

ALCIBIADES: Yes.

SOCRATES: Then acting well is a good?

ALCIBIADES: Certainly.

SOCRATES: And happiness is a good?

ALCIBIADES: Yes.

SOCRATES: Then the good and the honourable are again identified.

ALCIBIADES: Manifestly.

SOCRATES: Then, if the argument holds, what we find to be honourable we shall also find to be good?

ALCIBIADES: Certainly.

SOCRATES: And is the good expedient or not?

ALCIBIADES: Expedient.

SOCRATES: Do you remember our admissions about the just?

ALCIBIADES: Yes; if I am not mistaken, we said that those who acted justly must also act honourably.

SOCRATES: And the honourable is the good?

ALCIBIADES: Yes.

SOCRATES: And the good is expedient?

ALCIBIADES: Yes.

SOCRATES: Then, Alcibiades, the just is expedient?

ALCIBIADES: I should infer so.

SOCRATES: And all this I prove out of your own mouth, for I ask and you answer?

ALCIBIADES: I must acknowledge it to be true.

SOCRATES: And having acknowledged that the just is the same as

the expedient, are you not (let me ask) prepared to ridicule any one who, pretending to understand the principles of justice and injustice, gets up to advise the noble Athenians or the ignoble Peperethians, that the just may be the evil?

ALCIBIADES: I solemnly declare, Socrates, that I do not know what I am saying. Verily, I am in a strange state, for when you put questions to me I am of different minds in successive instants.

SOCRATES: And are you not aware of the nature of this perplexity, my friend?

ALCIBIADES: Indeed I am not.

SOCRATES: Do you suppose that if some one were to ask you whether you have two eyes or three, or two hands or four, or anything of that sort, you would then be of different minds in successive instants?

ALCIBIADES: I begin to distrust myself, but still I do not suppose that I should.

SOCRATES: You would feel no doubt; and for this reason — because you would know?

ALCIBIADES: I suppose so.

SOCRATES: And the reason why you involuntarily contradict yourself is clearly that you are ignorant?

ALCIBIADES: Very likely.

SOCRATES: And if you are perplexed in answering about just and unjust, honourable and dishonourable, good and evil, expedient and inexpedient, the reason is that you are ignorant of them, and therefore in perplexity. Is not that clear?

ALCIBIADES: I agree.

SOCRATES: But is this always the case, and is a man necessarily perplexed about that of which he has no knowledge?

ALCIBIADES: Certainly he is.

SOCRATES: And do you know how to ascend into heaven?

ALCIBIADES: Certainly not.

SOCRATES: And in this case, too, is your judgment perplexed?

ALCIBIADES: No.

SOCRATES: Do you see the reason why, or shall I tell you?

ALCIBIADES: Tell me.

SOCRATES: The reason is, that you not only do not know, my friend, but you do not think that you know.

ALCIBIADES: There again; what do you mean?

SOCRATES: Ask yourself; are you in any perplexity about things of which you are ignorant? You know, for example, that you know nothing about the preparation of food.

ALCIBIADES: Very true.

SOCRATES: And do you think and perplex yourself about the preparation of food: or do you leave that to some one who understands the art?

ALCIBIADES: The latter.

SOCRATES: Or if you were on a voyage, would you bewilder yourself by considering whether the rudder is to be drawn inwards or outwards, or do you leave that to the pilot, and do nothing?

ALCIBIADES: It would be the concern of the pilot.

SOCRATES: Then you are not perplexed about what you do not know, if you know that you do not know it?

ALCIBIADES: I imagine not.

SOCRATES: Do you not see, then, that mistakes in life and practice

are likewise to be attributed to the ignorance which has conceit of knowledge?

ALCIBIADES: Once more, what do you mean?

SOCRATES: I suppose that we begin to act when we think that we know what we are doing?

ALCIBIADES: Yes.

SOCRATES: But when people think that they do not know, they entrust their business to others?

ALCIBIADES: Yes.

SOCRATES: And so there is a class of ignorant persons who do not make mistakes in life, because they trust others about things of which they are ignorant?

ALCIBIADES: True.

SOCRATES: Who, then, are the persons who make mistakes? They cannot, of course, be those who know?

ALCIBIADES: Certainly not.

SOCRATES: But if neither those who know, nor those who know that they do not know, make mistakes, there remain those only who do not know and think that they know.

ALCIBIADES: Yes, only those.

SOCRATES: Then this is ignorance of the disgraceful sort which is mischievous?

ALCIBIADES: Yes.

SOCRATES: And most mischievous and most disgraceful when having to do with the greatest matters?

ALCIBIADES: By far.

SOCRATES: And can there be any matters greater than the just, the

honourable, the good, and the expedient?

ALCIBIADES: There cannot be.

SOCRATES: And these, as you were saying, are what perplex you?

ALCIBIADES: Yes.

SOCRATES: But if you are perplexed, then, as the previous argument has shown, you are not only ignorant of the greatest matters, but being ignorant you fancy that you know them?

ALCIBIADES: I fear that you are right.

SOCRATES: And now see what has happened to you, Alcibiades! I hardly like to speak of your evil case, but as we are alone I will: My good friend, you are wedded to ignorance of the most disgraceful kind, and of this you are convicted, not by me, but out of your own mouth and by your own argument; wherefore also you rush into politics before you are educated. Neither is your case to be deemed singular. For I might say the same of almost all our statesmen, with the exception, perhaps of your guardian, Pericles.

ALCIBIADES: Yes, Socrates; and Pericles is said not to have got his wisdom by the light of nature, but to have associated with several of the philosophers; with Pythocleides, for example, and with Anaxagoras, and now in advanced life with Damon, in the hope of gaining wisdom.

SOCRATES: Very good; but did you ever know a man wise in anything who was unable to impart his particular wisdom? For example, he who taught you letters was not only wise, but he made you and any others whom he liked wise.

ALCIBIADES: Yes.

SOCRATES: And you, whom he taught, can do the same?

ALCIBIADES: True.

SOCRATES: And in like manner the harper and gymnastic-master?

ALCIBIADES: Certainly.

SOCRATES: When a person is enabled to impart knowledge to another, he thereby gives an excellent proof of his own understanding of any matter.

ALCIBIADES: I agree.

SOCRATES: Well, and did Pericles make any one wise; did he begin by making his sons wise?

ALCIBIADES: But, Socrates, if the two sons of Pericles were simpletons, what has that to do with the matter?

SOCRATES: Well, but did he make your brother, Cleinias, wise?

ALCIBIADES: Cleinias is a madman; there is no use in talking of him.

SOCRATES: But if Cleinias is a madman and the two sons of Pericles were simpletons, what reason can be given why he neglects you, and lets you be as you are?

ALCIBIADES: I believe that I am to blame for not listening to him.

SOCRATES: But did you ever hear of any other Athenian or foreigner, bond or free, who was deemed to have grown wiser in the society of Pericles, — as I might cite Pythodorus, the son of Isolochus, and Callias, the son of Calliades, who have grown wiser in the society of Zeno, for which privilege they have each of them paid him the sum of a hundred minae (about 406 pounds sterling) to the increase of their wisdom and fame.

ALCIBIADES: I certainly never did hear of any one.

SOCRATES: Well, and in reference to your own case, do you mean to remain as you are, or will you take some pains about yourself?

ALCIBIADES: With your aid, Socrates, I will. And indeed, when I hear you speak, the truth of what you are saying strikes home to me, and I agree with you, for our statesmen, all but a few, do appear to be

quite uneducated.

SOCRATES: What is the inference?

ALCIBIADES: Why, that if they were educated they would be trained athletes, and he who means to rival them ought to have knowledge and experience when he attacks them; but now, as they have become politicians without any special training, why should I have the trouble of learning and practising? For I know well that by the light of nature I shall get the better of them.

SOCRATES: My dear friend, what a sentiment! And how unworthy of your noble form and your high estate!

ALCIBIADES: What do you mean, Socrates; why do you say so?

SOCRATES: I am grieved when I think of our mutual love.

ALCIBIADES: At what?

SOCRATES: At your fancying that the contest on which you are entering is with people here.

ALCIBIADES: Why, what others are there?

SOCRATES: Is that a question which a magnanimous soul should ask?

ALCIBIADES: Do you mean to say that the contest is not with these?

SOCRATES: And suppose that you were going to steer a ship into action, would you only aim at being the best pilot on board? Would you not, while acknowledging that you must possess this degree of excellence, rather look to your antagonists, and not, as you are now doing, to your fellow combatants? You ought to be so far above these latter, that they will not even dare to be your rivals; and, being regarded by you as inferiors, will do battle for you against the enemy; this is the kind of superiority which you must establish over them, if you mean to accomplish any noble action really worthy of yourself and of the state.

ALCIBIADES: That would certainly be my aim.

SOCRATES: Verily, then, you have good reason to be satisfied, if you are better than the soldiers; and you need not, when you are their superior and have your thoughts and actions fixed upon them, look away to the generals of the enemy.

ALCIBIADES: Of whom are you speaking, Socrates?

SOCRATES: Why, you surely know that our city goes to war now and then with the Lacedaemonians and with the great king?

ALCIBIADES: True enough.

SOCRATES: And if you meant to be the ruler of this city, would you not be right in considering that the Lacedaemonian and Persian king were your true rivals?

ALCIBIADES: I believe that you are right.

SOCRATES: Oh no, my friend, I am quite wrong, and I think that you ought rather to turn your attention to Midias the quail-breeder and others like him, who manage our politics; in whom, as the women would remark, you may still see the slaves' cut of hair, cropping out in their minds as well as on their pates; and they come with their barbarous lingo to flatter us and not to rule us. To these, I say, you should look, and then you need not trouble yourself about your own fitness to contend in such a noble arena: there is no reason why you should either learn what has to be learned, or practise what has to be practised, and only when thoroughly prepared enter on a political career.

ALCIBIADES: There, I think, Socrates, that you are right; I do not suppose, however, that the Spartan generals or the great king are really different from anybody else.

SOCRATES: But, my dear friend, do consider what you are saying.

ALCIBIADES: What am I to consider?

SOCRATES: In the first place, will you be more likely to take care of

yourself, if you are in a wholesome fear and dread of them, or if you are not?

ALCIBIADES: Clearly, if I have such a fear of them.

SOCRATES: And do you think that you will sustain any injury if you take care of yourself?

ALCIBIADES: No, I shall be greatly benefited.

SOCRATES: And this is one very important respect in which that notion of yours is bad.

ALCIBIADES: True.

SOCRATES: In the next place, consider that what you say is probably false.

ALCIBIADES: How so?

SOCRATES: Let me ask you whether better natures are likely to be found in noble races or not in noble races?

ALCIBIADES: Clearly in noble races.

SOCRATES: Are not those who are well born and well bred most likely to be perfect in virtue?

ALCIBIADES: Certainly.

SOCRATES: Then let us compare our antecedents with those of the Lacedaemonian and Persian kings; are they inferior to us in descent? Have we not heard that the former are sprung from Heracles, and the latter from Achaemenes, and that the race of Heracles and the race of Achaemenes go back to Perseus, son of Zeus?

ALCIBIADES: Why, so does mine go back to Eurysaces, and he to Zeus!

SOCRATES: And mine, noble Alcibiades, to Daedalus, and he to Hephaestus, son of Zeus. But, for all that, we are far inferior to them. For they are descended 'from Zeus,' through a line of kings — either

kings of Argos and Lacedaemon, or kings of Persia, a country which the descendants of Achaemenes have always possessed, besides being at various times sovereigns of Asia, as they now are; whereas, we and our fathers were but private persons. How ridiculous would you be thought if you were to make a display of your ancestors and of Salamis the island of Eurysaces, or of Aegina, the habitation of the still more ancient Aeacus, before Artaxerxes, son of Xerxes. You should consider how inferior we are to them both in the derivation of our birth and in other particulars. Did you never observe how great is the property of the Spartan kings? And their wives are under the guardianship of the Ephori, who are public officers and watch over them, in order to preserve as far as possible the purity of the Heracleid blood. Still greater is the difference among the Persians; for no one entertains a suspicion that the father of a prince of Persia can be any one but the king. Such is the awe which invests the person of the queen, that any other guard is needless. And when the heir of the kingdom is born, all the subjects of the king feast; and the day of his birth is for ever afterwards kept as a holiday and time of sacrifice by all Asia; whereas, when you and I were born, Alcibiades, as the comic poet says, the neighbours hardly knew of the important event. After the birth of the royal child, he is tended, not by a good-for-nothing woman-nurse, but by the best of the royal eunuchs, who are charged with the care of him, and especially with the fashioning and right formation of his limbs, in order that he may be as shapely as possible; which being their calling, they are held in great honour. And when the young prince is seven years old he is put upon a horse and taken to the riding-masters, and begins to go out hunting. And at fourteen years of age he is handed over to the royal schoolmasters, as they are termed: these are four chosen men, reputed to be the best among the Persians of a certain age; and one of them is the wisest, another the justest, a third the most temperate, and a fourth the most valiant. The first instructs him in the magianism of Zoroaster, the son of Oromasus, which is the worship of the Gods, and teaches him also the duties of his royal office; the second, who is the justest, teaches him always to speak the truth; the third, or most temperate, forbids him to allow any pleasure to be lord over him, that he may be accustomed to be a freeman and king indeed, — lord of himself first,

and not a slave; the most valiant trains him to be bold and fearless, telling him that if he fears he is to deem himself a slave; whereas Pericles gave you, Alcibiades, for a tutor Zopyrus the Thracian, a slave of his who was past all other work. I might enlarge on the nurture and education of your rivals, but that would be tedious; and what I have said is a sufficient sample of what remains to be said. I have only to remark, by way of contrast, that no one cares about your birth or nurture or education, or, I may say, about that of any other Athenian, unless he has a lover who looks after him. And if you cast an eye on the wealth, the luxury, the garments with their flowing trains, the anointings with myrrh, the multitudes of attendants, and all the other bravery of the Persians, you will be ashamed when you discern your own inferiority; or if you look at the temperance and orderliness and ease and grace and magnanimity and courage and endurance and love of toil and desire of glory and ambition of the Lacedaemonians — in all these respects you will see that you are but a child in comparison of them. Even in the matter of wealth, if you value yourself upon that, I must reveal to you how you stand; for if you form an estimate of the wealth of the Lacedaemonians, you will see that our possessions fall far short of theirs. For no one here can compete with them either in the extent and fertility of their own and the Messenian territory, or in the number of their slaves, and especially of the Helots, or of their horses, or of the animals which feed on the Messenian pastures. But I have said enough of this: and as to gold and silver, there is more of them in Lacedaemon than in all the rest of Hellas, for during many generations gold has been always flowing in to them from the whole Hellenic world, and often from the barbarian also, and never going out, as in the fable of Aesop the fox said to the lion, ‘The prints of the feet of those going in are distinct enough,’ but who ever saw the trace of money going out of Lacedaemon? And therefore you may safely infer that the inhabitants are the richest of the Hellenes in gold and silver, and that their kings are the richest of them, for they have a larger share of these things, and they have also a tribute paid to them which is very considerable. Yet the Spartan wealth, though great in comparison of the wealth of the other Hellenes, is as nothing in comparison of that of the Persians and their kings. Why, I have been informed by a credible person who

went up to the king (at Susa), that he passed through a large tract of excellent land, extending for nearly a day's journey, which the people of the country called the queen's girdle, and another, which they called her veil; and several other fair and fertile districts, which were reserved for the adornment of the queen, and are named after her several habiliments. Now, I cannot help thinking to myself, What if some one were to go to Amestris, the wife of Xerxes and mother of Artaxerxes, and say to her, There is a certain Dinomache, whose whole wardrobe is not worth fifty minae — and that will be more than the value — and she has a son who is possessed of a three-hundred acre patch at Erchia, and he has a mind to go to war with your son — would she not wonder to what this Alcibiades trusts for success in the conflict? 'He must rely,' she would say to herself, 'upon his training and wisdom — these are the things which Hellenes value.' And if she heard that this Alcibiades who is making the attempt is not as yet twenty years old, and is wholly uneducated, and when his lover tells him that he ought to get education and training first, and then go and fight the king, he refuses, and says that he is well enough as he is, would she not be amazed, and ask 'On what, then, does the youth rely?' And if we replied: He relies on his beauty, and stature, and birth, and mental endowments, she would think that we were mad, Alcibiades, when she compared the advantages which you possess with those of her own people. And I believe that even Lampido, the daughter of Leotychides, the wife of Archidamus and mother of Agis, all of whom were kings, would have the same feeling; if, in your present uneducated state, you were to turn your thoughts against her son, she too would be equally astonished. But how disgraceful, that we should not have as high a notion of what is required in us as our enemies' wives and mothers have of the qualities which are required in their assailants! O my friend, be persuaded by me, and hear the Delphian inscription, 'Know thyself' — not the men whom you think, but these kings are our rivals, and we can only overcome them by pains and skill. And if you fail in the required qualities, you will fail also in becoming renowned among Hellenes and Barbarians, which you seem to desire more than any other man ever desired anything.

ALCIBIADES: I entirely believe you; but what are the sort of pains which are required, Socrates, — can you tell me?

SOCRATES: Yes, I can; but we must take counsel together concerning the manner in which both of us may be most improved. For what I am telling you of the necessity of education applies to myself as well as to you; and there is only one point in which I have an advantage over you.

ALCIBIADES: What is that?

SOCRATES: I have a guardian who is better and wiser than your guardian, Pericles.

ALCIBIADES: Who is he, Socrates?

SOCRATES: God, Alcibiades, who up to this day has not allowed me to converse with you; and he inspires in me the faith that I am especially designed to bring you to honour.

ALCIBIADES: You are jesting, Socrates.

SOCRATES: Perhaps, at any rate, I am right in saying that all men greatly need pains and care, and you and I above all men.

ALCIBIADES: You are not far wrong about me.

SOCRATES: And certainly not about myself.

ALCIBIADES: But what can we do?

SOCRATES: There must be no hesitation or cowardice, my friend.

ALCIBIADES: That would not become us, Socrates.

SOCRATES: No, indeed, and we ought to take counsel together: for do we not wish to be as good as possible?

ALCIBIADES: We do.

SOCRATES: In what sort of virtue?

ALCIBIADES: Plainly, in the virtue of good men.

SOCRATES: Who are good in what?

ALCIBIADES: Those, clearly, who are good in the management of affairs.

SOCRATES: What sort of affairs? Equestrian affairs?

ALCIBIADES: Certainly not.

SOCRATES: You mean that about them we should have recourse to horsemen?

ALCIBIADES: Yes.

SOCRATES: Well, naval affairs?

ALCIBIADES: No.

SOCRATES: You mean that we should have recourse to sailors about them?

ALCIBIADES: Yes.

SOCRATES: Then what affairs? And who do them?

ALCIBIADES: The affairs which occupy Athenian gentlemen.

SOCRATES: And when you speak of gentlemen, do you mean the wise or the unwise?

ALCIBIADES: The wise.

SOCRATES: And a man is good in respect of that in which he is wise?

ALCIBIADES: Yes.

SOCRATES: And evil in respect of that in which he is unwise?

ALCIBIADES: Certainly.

SOCRATES: The shoemaker, for example, is wise in respect of the making of shoes?

ALCIBIADES: Yes.

SOCRATES: Then he is good in that?

ALCIBIADES: He is.

SOCRATES: But in respect of the making of garments he is unwise?

ALCIBIADES: Yes.

SOCRATES: Then in that he is bad?

ALCIBIADES: Yes.

SOCRATES: Then upon this view of the matter the same man is good and also bad?

ALCIBIADES: True.

SOCRATES: But would you say that the good are the same as the bad?

ALCIBIADES: Certainly not.

SOCRATES: Then whom do you call the good?

ALCIBIADES: I mean by the good those who are able to rule in the city.

SOCRATES: Not, surely, over horses?

ALCIBIADES: Certainly not.

SOCRATES: But over men?

ALCIBIADES: Yes.

SOCRATES: When they are sick?

ALCIBIADES: No.

SOCRATES: Or on a voyage?

ALCIBIADES: No.

SOCRATES: Or reaping the harvest?

ALCIBIADES: No.

SOCRATES: When they are doing something or nothing?

ALCIBIADES: When they are doing something, I should say.

SOCRATES: I wish that you would explain to me what this something is.

ALCIBIADES: When they are having dealings with one another, and using one another's services, as we citizens do in our daily life.

SOCRATES: Those of whom you speak are ruling over men who are using the services of other men?

ALCIBIADES: Yes.

SOCRATES: Are they ruling over the signal-men who give the time to the rowers?

ALCIBIADES: No; they are not.

SOCRATES: That would be the office of the pilot?

ALCIBIADES: Yes.

SOCRATES: But, perhaps you mean that they rule over flute-players, who lead the singers and use the services of the dancers?

ALCIBIADES: Certainly not.

SOCRATES: That would be the business of the teacher of the chorus?

ALCIBIADES: Yes.

SOCRATES: Then what is the meaning of being able to rule over men who use other men?

ALCIBIADES: I mean that they rule over men who have common rights of citizenship, and dealings with one another.

SOCRATES: And what sort of an art is this? Suppose that I ask you again, as I did just now, What art makes men know how to rule over their fellow-sailors, — how would you answer?

ALCIBIADES: The art of the pilot.

SOCRATES: And, if I may recur to another old instance, what art enables them to rule over their fellow-singers?

ALCIBIADES: The art of the teacher of the chorus, which you were just now mentioning.

SOCRATES: And what do you call the art of fellow-citizens?

ALCIBIADES: I should say, good counsel, Socrates.

SOCRATES: And is the art of the pilot evil counsel?

ALCIBIADES: No.

SOCRATES: But good counsel?

ALCIBIADES: Yes, that is what I should say, — good counsel, of which the aim is the preservation of the voyagers.

SOCRATES: True. And what is the aim of that other good counsel of which you speak?

ALCIBIADES: The aim is the better order and preservation of the city.

SOCRATES: And what is that of which the absence or presence improves and preserves the order of the city? Suppose you were to ask me, what is that of which the presence or absence improves or preserves the order of the body? I should reply, the presence of health and the absence of disease. You would say the same?

ALCIBIADES: Yes.

SOCRATES: And if you were to ask me the same question about the eyes, I should reply in the same way, 'the presence of sight and the absence of blindness;' or about the ears, I should reply, that they

were improved and were in better case, when deafness was absent, and hearing was present in them.

ALCIBIADES: True.

SOCRATES: And what would you say of a state? What is that by the presence or absence of which the state is improved and better managed and ordered?

ALCIBIADES: I should say, Socrates: — the presence of friendship and the absence of hatred and division.

SOCRATES: And do you mean by friendship agreement or disagreement?

ALCIBIADES: Agreement.

SOCRATES: What art makes cities agree about numbers?

ALCIBIADES: Arithmetic.

SOCRATES: And private individuals?

ALCIBIADES: The same.

SOCRATES: And what art makes each individual agree with himself?

ALCIBIADES: The same.

SOCRATES: And what art makes each of us agree with himself about the comparative length of the span and of the cubit? Does not the art of measure?

ALCIBIADES: Yes.

SOCRATES: Individuals are agreed with one another about this; and states, equally?

ALCIBIADES: Yes.

SOCRATES: And the same holds of the balance?

ALCIBIADES: True.

SOCRATES: But what is the other agreement of which you speak, and about what? what art can give that agreement? And does that which gives it to the state give it also to the individual, so as to make him consistent with himself and with another?

ALCIBIADES: I should suppose so.

SOCRATES: But what is the nature of the agreement? — answer, and faint not.

ALCIBIADES: I mean to say that there should be such friendship and agreement as exists between an affectionate father and mother and their son, or between brothers, or between husband and wife.

SOCRATES: But can a man, Alcibiades, agree with a woman about the spinning of wool, which she understands and he does not?

ALCIBIADES: No, truly.

SOCRATES: Nor has he any need, for spinning is a female accomplishment.

ALCIBIADES: Yes.

SOCRATES: And would a woman agree with a man about the science of arms, which she has never learned?

ALCIBIADES: Certainly not.

SOCRATES: I suppose that the use of arms would be regarded by you as a male accomplishment?

ALCIBIADES: It would.

SOCRATES: Then, upon your view, women and men have two sorts of knowledge?

ALCIBIADES: Certainly.

SOCRATES: Then in their knowledge there is no agreement of

women and men?

ALCIBIADES: There is not.

SOCRATES: Nor can there be friendship, if friendship is agreement?

ALCIBIADES: Plainly not.

SOCRATES: Then women are not loved by men when they do their own work?

ALCIBIADES: I suppose not.

SOCRATES: Nor men by women when they do their own work?

ALCIBIADES: No.

SOCRATES: Nor are states well administered, when individuals do their own work?

ALCIBIADES: I should rather think, Socrates, that the reverse is the truth. (Compare Republic.)

SOCRATES: What! do you mean to say that states are well administered when friendship is absent, the presence of which, as we were saying, alone secures their good order?

ALCIBIADES: But I should say that there is friendship among them, for this very reason, that the two parties respectively do their own work.

SOCRATES: That was not what you were saying before; and what do you mean now by affirming that friendship exists when there is no agreement? How can there be agreement about matters which the one party knows, and of which the other is in ignorance?

ALCIBIADES: Impossible.

SOCRATES: And when individuals are doing their own work, are they doing what is just or unjust?

ALCIBIADES: What is just, certainly.

SOCRATES: And when individuals do what is just in the state, is there no friendship among them?

ALCIBIADES: I suppose that there must be, Socrates.

SOCRATES: Then what do you mean by this friendship or agreement about which we must be wise and discreet in order that we may be good men? I cannot make out where it exists or among whom; according to you, the same persons may sometimes have it, and sometimes not.

ALCIBIADES: But, indeed, Socrates, I do not know what I am saying; and I have long been, unconsciously to myself, in a most disgraceful state.

SOCRATES: Nevertheless, cheer up; at fifty, if you had discovered your deficiency, you would have been too old, and the time for taking care of yourself would have passed away, but yours is just the age at which the discovery should be made.

ALCIBIADES: And what should he do, Socrates, who would make the discovery?

SOCRATES: Answer questions, Alcibiades; and that is a process which, by the grace of God, if I may put any faith in my oracle, will be very improving to both of us.

ALCIBIADES: If I can be improved by answering, I will answer.

SOCRATES: And first of all, that we may not peradventure be deceived by appearances, fancying, perhaps, that we are taking care of ourselves when we are not, what is the meaning of a man taking care of himself? and when does he take care? Does he take care of himself when he takes care of what belongs to him?

ALCIBIADES: I should think so.

SOCRATES: When does a man take care of his feet? Does he not take care of them when he takes care of that which belongs to his feet?

ALCIBIADES: I do not understand.

SOCRATES: Let me take the hand as an illustration; does not a ring belong to the finger, and to the finger only?

ALCIBIADES: Yes.

SOCRATES: And the shoe in like manner to the foot?

ALCIBIADES: Yes.

SOCRATES: And when we take care of our shoes, do we not take care of our feet?

ALCIBIADES: I do not comprehend, Socrates.

SOCRATES: But you would admit, Alcibiades, that to take proper care of a thing is a correct expression?

ALCIBIADES: Yes.

SOCRATES: And taking proper care means improving?

ALCIBIADES: Yes.

SOCRATES: And what is the art which improves our shoes?

ALCIBIADES: Shoemaking.

SOCRATES: Then by shoemaking we take care of our shoes?

ALCIBIADES: Yes.

SOCRATES: And do we by shoemaking take care of our feet, or by some other art which improves the feet?

ALCIBIADES: By some other art.

SOCRATES: And the same art improves the feet which improves the rest of the body?

ALCIBIADES: Very true.

SOCRATES: Which is gymnastic?

ALCIBIADES: Certainly.

SOCRATES: Then by gymnastic we take care of our feet, and by shoemaking of that which belongs to our feet?

ALCIBIADES: Very true.

SOCRATES: And by gymnastic we take care of our hands, and by the art of graving rings of that which belongs to our hands?

ALCIBIADES: Yes.

SOCRATES: And by gymnastic we take care of the body, and by the art of weaving and the other arts we take care of the things of the body?

ALCIBIADES: Clearly.

SOCRATES: Then the art which takes care of each thing is different from that which takes care of the belongings of each thing?

ALCIBIADES: True.

SOCRATES: Then in taking care of what belongs to you, you do not take care of yourself?

ALCIBIADES: Certainly not.

SOCRATES: For the art which takes care of our belongings appears not to be the same as that which takes care of ourselves?

ALCIBIADES: Clearly not.

SOCRATES: And now let me ask you what is the art with which we take care of ourselves?

ALCIBIADES: I cannot say.

SOCRATES: At any rate, thus much has been admitted, that the art is not one which makes any of our possessions, but which makes ourselves better?

ALCIBIADES: True.

SOCRATES: But should we ever have known what art makes a shoe better, if we did not know a shoe?

ALCIBIADES: Impossible.

SOCRATES: Nor should we know what art makes a ring better, if we did not know a ring?

ALCIBIADES: That is true.

SOCRATES: And can we ever know what art makes a man better, if we do not know what we are ourselves?

ALCIBIADES: Impossible.

SOCRATES: And is self-knowledge such an easy thing, and was he to be lightly esteemed who inscribed the text on the temple at Delphi? Or is self-knowledge a difficult thing, which few are able to attain?

ALCIBIADES: At times I fancy, Socrates, that anybody can know himself; at other times the task appears to be very difficult.

SOCRATES: But whether easy or difficult, Alcibiades, still there is no other way; knowing what we are, we shall know how to take care of ourselves, and if we are ignorant we shall not know.

ALCIBIADES: That is true.

SOCRATES: Well, then, let us see in what way the self-existent can be discovered by us; that will give us a chance of discovering our own existence, which otherwise we can never know.

ALCIBIADES: You say truly.

SOCRATES: Come, now, I beseech you, tell me with whom you are conversing? — with whom but with me?

ALCIBIADES: Yes.

SOCRATES: As I am, with you?

ALCIBIADES: Yes.

SOCRATES: That is to say, I, Socrates, am talking?

ALCIBIADES: Yes.

SOCRATES: And Alcibiades is my hearer?

ALCIBIADES: Yes.

SOCRATES: And I in talking use words?

ALCIBIADES: Certainly.

SOCRATES: And talking and using words have, I suppose, the same meaning?

ALCIBIADES: To be sure.

SOCRATES: And the user is not the same as the thing which he uses?

ALCIBIADES: What do you mean?

SOCRATES: I will explain; the shoemaker, for example, uses a square tool, and a circular tool, and other tools for cutting?

ALCIBIADES: Yes.

SOCRATES: But the tool is not the same as the cutter and user of the tool?

ALCIBIADES: Of course not.

SOCRATES: And in the same way the instrument of the harper is to be distinguished from the harper himself?

ALCIBIADES: It is.

SOCRATES: Now the question which I asked was whether you conceive the user to be always different from that which he uses?

ALCIBIADES: I do.

SOCRATES: Then what shall we say of the shoemaker? Does he cut with his tools only or with his hands?

ALCIBIADES: With his hands as well.

SOCRATES: He uses his hands too?

ALCIBIADES: Yes.

SOCRATES: And does he use his eyes in cutting leather?

ALCIBIADES: He does.

SOCRATES: And we admit that the user is not the same with the things which he uses?

ALCIBIADES: Yes.

SOCRATES: Then the shoemaker and the harper are to be distinguished from the hands and feet which they use?

ALCIBIADES: Clearly.

SOCRATES: And does not a man use the whole body?

ALCIBIADES: Certainly.

SOCRATES: And that which uses is different from that which is used?

ALCIBIADES: True.

SOCRATES: Then a man is not the same as his own body?

ALCIBIADES: That is the inference.

SOCRATES: What is he, then?

ALCIBIADES: I cannot say.

SOCRATES: Nay, you can say that he is the user of the body.

ALCIBIADES: Yes.

SOCRATES: And the user of the body is the soul?

ALCIBIADES: Yes, the soul.

SOCRATES: And the soul rules?

ALCIBIADES: Yes.

SOCRATES: Let me make an assertion which will, I think, be universally admitted.

ALCIBIADES: What is it?

SOCRATES: That man is one of three things.

ALCIBIADES: What are they?

SOCRATES: Soul, body, or both together forming a whole.

ALCIBIADES: Certainly.

SOCRATES: But did we not say that the actual ruling principle of the body is man?

ALCIBIADES: Yes, we did.

SOCRATES: And does the body rule over itself?

ALCIBIADES: Certainly not.

SOCRATES: It is subject, as we were saying?

ALCIBIADES: Yes.

SOCRATES: Then that is not the principle which we are seeking?

ALCIBIADES: It would seem not.

SOCRATES: But may we say that the union of the two rules over the body, and consequently that this is man?

ALCIBIADES: Very likely.

SOCRATES: The most unlikely of all things; for if one of the

members is subject, the two united cannot possibly rule.

ALCIBIADES: True.

SOCRATES: But since neither the body, nor the union of the two, is man, either man has no real existence, or the soul is man?

ALCIBIADES: Just so.

SOCRATES: Is anything more required to prove that the soul is man?

ALCIBIADES: Certainly not; the proof is, I think, quite sufficient.

SOCRATES: And if the proof, although not perfect, be sufficient, we shall be satisfied; — more precise proof will be supplied when we have discovered that which we were led to omit, from a fear that the enquiry would be too much protracted.

ALCIBIADES: What was that?

SOCRATES: What I meant, when I said that absolute existence must be first considered; but now, instead of absolute existence, we have been considering the nature of individual existence, and this may, perhaps, be sufficient; for surely there is nothing which may be called more properly ourselves than the soul?

ALCIBIADES: There is nothing.

SOCRATES: Then we may truly conceive that you and I are conversing with one another, soul to soul?

ALCIBIADES: Very true.

SOCRATES: And that is just what I was saying before — that I, Socrates, am not arguing or talking with the face of Alcibiades, but with the real Alcibiades; or in other words, with his soul.

ALCIBIADES: True.

SOCRATES: Then he who bids a man know himself, would have him know his soul?

ALCIBIADES: That appears to be true.

SOCRATES: He whose knowledge only extends to the body, knows the things of a man, and not the man himself?

ALCIBIADES: That is true.

SOCRATES: Then neither the physician regarded as a physician, nor the trainer regarded as a trainer, knows himself?

ALCIBIADES: He does not.

SOCRATES: The husbandmen and the other craftsmen are very far from knowing themselves, for they would seem not even to know their own belongings? When regarded in relation to the arts which they practise they are even further removed from self-knowledge, for they only know the belongings of the body, which minister to the body.

ALCIBIADES: That is true.

SOCRATES: Then if temperance is the knowledge of self, in respect of his art none of them is temperate?

ALCIBIADES: I agree.

SOCRATES: And this is the reason why their arts are accounted vulgar, and are not such as a good man would practise?

ALCIBIADES: Quite true.

SOCRATES: Again, he who cherishes his body cherishes not himself, but what belongs to him?

ALCIBIADES: That is true.

SOCRATES: But he who cherishes his money, cherishes neither himself nor his belongings, but is in a stage yet further removed from himself?

ALCIBIADES: I agree.

SOCRATES: Then the money-maker has really ceased to be occupied with his own concerns?

ALCIBIADES: True.

SOCRATES: And if any one has fallen in love with the person of Alcibiades, he loves not Alcibiades, but the belongings of Alcibiades?

ALCIBIADES: True.

SOCRATES: But he who loves your soul is the true lover?

ALCIBIADES: That is the necessary inference.

SOCRATES: The lover of the body goes away when the flower of youth fades?

ALCIBIADES: True.

SOCRATES: But he who loves the soul goes not away, as long as the soul follows after virtue?

ALCIBIADES: Yes.

SOCRATES: And I am the lover who goes not away, but remains with you, when you are no longer young and the rest are gone?

ALCIBIADES: Yes, Socrates; and therein you do well, and I hope that you will remain.

SOCRATES: Then you must try to look your best.

ALCIBIADES: I will.

SOCRATES: The fact is, that there is only one lover of Alcibiades the son of Cleinias; there neither is nor ever has been seemingly any other; and he is his darling, — Socrates, the son of Sophroniscus and Phaenarete.

ALCIBIADES: True.

SOCRATES: And did you not say, that if I had not spoken first, you

were on the point of coming to me, and enquiring why I only remained?

ALCIBIADES: That is true.

SOCRATES: The reason was that I loved you for your own sake, whereas other men love what belongs to you; and your beauty, which is not you, is fading away, just as your true self is beginning to bloom. And I will never desert you, if you are not spoiled and deformed by the Athenian people; for the danger which I most fear is that you will become a lover of the people and will be spoiled by them. Many a noble Athenian has been ruined in this way. For the demus of the great-hearted Erechteus is of a fair countenance, but you should see him naked; wherefore observe the caution which I give you.

ALCIBIADES: What caution?

SOCRATES: Practise yourself, sweet friend, in learning what you ought to know, before you enter on politics; and then you will have an antidote which will keep you out of harm's way.

ALCIBIADES: Good advice, Socrates, but I wish that you would explain to me in what way I am to take care of myself.

SOCRATES: Have we not made an advance? for we are at any rate tolerably well agreed as to what we are, and there is no longer any danger, as we once feared, that we might be taking care not of ourselves, but of something which is not ourselves.

ALCIBIADES: That is true.

SOCRATES: And the next step will be to take care of the soul, and look to that?

ALCIBIADES: Certainly.

SOCRATES: Leaving the care of our bodies and of our properties to others?

ALCIBIADES: Very good.

SOCRATES: But how can we have a perfect knowledge of the things of the soul? — For if we know them, then I suppose we shall know ourselves. Can we really be ignorant of the excellent meaning of the Delphian inscription, of which we were just now speaking?

ALCIBIADES: What have you in your thoughts, Socrates?

SOCRATES: I will tell you what I suspect to be the meaning and lesson of that inscription. Let me take an illustration from sight, which I imagine to be the only one suitable to my purpose.

ALCIBIADES: What do you mean?

SOCRATES: Consider; if some one were to say to the eye, ‘See thyself,’ as you might say to a man, ‘Know thyself,’ what is the nature and meaning of this precept? Would not his meaning be: — That the eye should look at that in which it would see itself?

ALCIBIADES: Clearly.

SOCRATES: And what are the objects in looking at which we see ourselves?

ALCIBIADES: Clearly, Socrates, in looking at mirrors and the like.

SOCRATES: Very true; and is there not something of the nature of a mirror in our own eyes?

ALCIBIADES: Certainly.

SOCRATES: Did you ever observe that the face of the person looking into the eye of another is reflected as in a mirror; and in the visual organ which is over against him, and which is called the pupil, there is a sort of image of the person looking?

ALCIBIADES: That is quite true.

SOCRATES: Then the eye, looking at another eye, and at that in the eye which is most perfect, and which is the instrument of vision, will there see itself?

ALCIBIADES: That is evident.

SOCRATES: But looking at anything else either in man or in the world, and not to what resembles this, it will not see itself?

ALCIBIADES: Very true.

SOCRATES: Then if the eye is to see itself, it must look at the eye, and at that part of the eye where sight which is the virtue of the eye resides?

ALCIBIADES: True.

SOCRATES: And if the soul, my dear Alcibiades, is ever to know herself, must she not look at the soul; and especially at that part of the soul in which her virtue resides, and to any other which is like this?

ALCIBIADES: I agree, Socrates.

SOCRATES: And do we know of any part of our souls more divine than that which has to do with wisdom and knowledge?

ALCIBIADES: There is none.

SOCRATES: Then this is that part of the soul which resembles the divine; and he who looks at this and at the whole class of things divine, will be most likely to know himself?

ALCIBIADES: Clearly.

SOCRATES: And self-knowledge we agree to be wisdom?

ALCIBIADES: True.

SOCRATES: But if we have no self-knowledge and no wisdom, can we ever know our own good and evil?

ALCIBIADES: How can we, Socrates?

SOCRATES: You mean, that if you did not know Alcibiades, there would be no possibility of your knowing that what belonged to

Alcibiades was really his?

ALCIBIADES: It would be quite impossible.

SOCRATES: Nor should we know that we were the persons to whom anything belonged, if we did not know ourselves?

ALCIBIADES: How could we?

SOCRATES: And if we did not know our own belongings, neither should we know the belongings of our belongings?

ALCIBIADES: Clearly not.

SOCRATES: Then we were not altogether right in acknowledging just now that a man may know what belongs to him and yet not know himself; nay, rather he cannot even know the belongings of his belongings; for the discernment of the things of self, and of the things which belong to the things of self, appear all to be the business of the same man, and of the same art.

ALCIBIADES: So much may be supposed.

SOCRATES: And he who knows not the things which belong to himself, will in like manner be ignorant of the things which belong to others?

ALCIBIADES: Very true.

SOCRATES: And if he knows not the affairs of others, he will not know the affairs of states?

ALCIBIADES: Certainly not.

SOCRATES: Then such a man can never be a statesman?

ALCIBIADES: He cannot.

SOCRATES: Nor an economist?

ALCIBIADES: He cannot.

SOCRATES: He will not know what he is doing?

ALCIBIADES: He will not.

SOCRATES: And will not he who is ignorant fall into error?

ALCIBIADES: Assuredly.

SOCRATES: And if he falls into error will he not fail both in his public and private capacity?

ALCIBIADES: Yes, indeed.

SOCRATES: And failing, will he not be miserable?

ALCIBIADES: Very.

SOCRATES: And what will become of those for whom he is acting?

ALCIBIADES: They will be miserable also.

SOCRATES: Then he who is not wise and good cannot be happy?

ALCIBIADES: He cannot.

SOCRATES: The bad, then, are miserable?

ALCIBIADES: Yes, very.

SOCRATES: And if so, not he who has riches, but he who has wisdom, is delivered from his misery?

ALCIBIADES: Clearly.

SOCRATES: Cities, then, if they are to be happy, do not want walls, or triremes, or docks, or numbers, or size, Alcibiades, without virtue? (Compare Arist. Pol.)

ALCIBIADES: Indeed they do not.

SOCRATES: And you must give the citizens virtue, if you mean to administer their affairs rightly or nobly?

ALCIBIADES: Certainly.

SOCRATES: But can a man give that which he has not?

ALCIBIADES: Impossible.

SOCRATES: Then you or any one who means to govern and superintend, not only himself and the things of himself, but the state and the things of the state, must in the first place acquire virtue.

ALCIBIADES: That is true.

SOCRATES: You have not therefore to obtain power or authority, in order to enable you to do what you wish for yourself and the state, but justice and wisdom.

ALCIBIADES: Clearly.

SOCRATES: You and the state, if you act wisely and justly, will act according to the will of God?

ALCIBIADES: Certainly.

SOCRATES: As I was saying before, you will look only at what is bright and divine, and act with a view to them?

ALCIBIADES: Yes.

SOCRATES: In that mirror you will see and know yourselves and your own good?

ALCIBIADES: Yes.

SOCRATES: And so you will act rightly and well?

ALCIBIADES: Yes.

SOCRATES: In which case, I will be security for your happiness.

ALCIBIADES: I accept the security.

SOCRATES: But if you act unrighteously, your eye will turn to the dark and godless, and being in darkness and ignorance of yourselves, you will probably do deeds of darkness.

ALCIBIADES: Very possibly.

SOCRATES: For if a man, my dear Alcibiades, has the power to do what he likes, but has no understanding, what is likely to be the result, either to him as an individual or to the state — for example, if he be sick and is able to do what he likes, not having the mind of a physician — having moreover tyrannical power, and no one daring to reprove him, what will happen to him? Will he not be likely to have his constitution ruined?

ALCIBIADES: That is true.

SOCRATES: Or again, in a ship, if a man having the power to do what he likes, has no intelligence or skill in navigation, do you see what will happen to him and to his fellow-sailors?

ALCIBIADES: Yes; I see that they will all perish.

SOCRATES: And in like manner, in a state, and where there is any power and authority which is wanting in virtue, will not misfortune, in like manner, ensue?

ALCIBIADES: Certainly.

SOCRATES: Not tyrannical power, then, my good Alcibiades, should be the aim either of individuals or states, if they would be happy, but virtue.

ALCIBIADES: That is true.

SOCRATES: And before they have virtue, to be commanded by a superior is better for men as well as for children? (Compare Arist. Pol.)

ALCIBIADES: That is evident.

SOCRATES: And that which is better is also nobler?

ALCIBIADES: True.

SOCRATES: And what is nobler is more becoming?

ALCIBIADES: Certainly.

SOCRATES: Then to the bad man slavery is more becoming, because better?

ALCIBIADES: True.

SOCRATES: Then vice is only suited to a slave?

ALCIBIADES: Yes.

SOCRATES: And virtue to a freeman?

ALCIBIADES: Yes.

SOCRATES: And, O my friend, is not the condition of a slave to be avoided?

ALCIBIADES: Certainly, Socrates.

SOCRATES: And are you now conscious of your own state? And do you know whether you are a freeman or not?

ALCIBIADES: I think that I am very conscious indeed of my own state.

SOCRATES: And do you know how to escape out of a state which I do not even like to name to my beauty?

ALCIBIADES: Yes, I do.

SOCRATES: How?

ALCIBIADES: By your help, Socrates.

SOCRATES: That is not well said, Alcibiades.

ALCIBIADES: What ought I to have said?

SOCRATES: By the help of God.

ALCIBIADES: I agree; and I further say, that our relations are likely to be reversed. From this day forward, I must and will follow you as you have followed me; I will be the disciple, and you shall be my master.

SOCRATES: O that is rare! My love breeds another love: and so like the stork I shall be cherished by the bird whom I have hatched.

ALCIBIADES: Strange, but true; and henceforward I shall begin to think about justice.

SOCRATES: And I hope that you will persist; although I have fears, not because I doubt you; but I see the power of the state, which may be too much for both of us.

CHARMIDES

Translated by Benjamin Jowett

This dialogue features Socrates in conversation with a handsome and popular boy about the meaning of ‘temperance’. Socrates narrates the dialogue, explaining that he has just returned from a battle at Potidaea, which was besieged and conquered by the Athenians at the beginning of the Peloponnesian War. Socrates has sought out his habitual conversations by heading to the town centre of Taureas, a wrestling school where boys gathered. With the help of Chaerephon, who pushes him for details about the battle, he finds his way to Critias and asks him about affairs at home, the present state of philosophy, and whether any of the boys had distinguished himself for wisdom or beauty, or both. Critias answers that Socrates will soon get to know the beauties firsthand, for Charmides and his entourage have just arrived.

The dialogue is notable for the introduction of Socrates’ argument that ignorance is to the philosopher what disease is to the physician, which recurs in later dialogues.

INTRODUCTION.

The subject of the Charmides is Temperance or (Greek), a peculiarly Greek notion, which may also be rendered Moderation (Compare Cic. Tusc. '(Greek), *quam soleo equidem tum temperantiam, tum moderationem appellare, nonnunquam etiam modestiam.*'), Modesty, Discretion, Wisdom, without completely exhausting by all these terms the various associations of the word. It may be described as '*mens sana in corpore sano,*' the harmony or due proportion of the higher and lower elements of human nature which 'makes a man his own master,' according to the definition of the Republic. In the accompanying translation the word has been rendered in different places either Temperance or Wisdom, as the connection seemed to require: for in the philosophy of Plato (Greek) still retains an intellectual element (as Socrates is also said to have identified (Greek) with (Greek): Xen. Mem.) and is not yet relegated to the sphere of moral virtue, as in the Nicomachean Ethics of Aristotle.

The beautiful youth, Charmides, who is also the most temperate of human beings, is asked by Socrates, 'What is Temperance?' He answers characteristically, (1) 'Quietness.' 'But Temperance is a fine and noble thing; and quietness in many or most cases is not so fine a thing as quickness.' He tries again and says (2) that temperance is modesty. But this again is set aside by a sophistical application of Homer: for temperance is good as well as noble, and Homer has declared that 'modesty is not good for a needy man.' (3) Once more Charmides makes the attempt. This time he gives a definition which he has heard, and of which Socrates conjectures that Critias must be the author: 'Temperance is doing one's own business.' But the artisan who makes another man's shoes may be temperate, and yet he is not doing his own business; and temperance defined thus would be opposed to the division of labour which exists in every temperate or well-ordered state. How is this riddle to be explained?

Critias, who takes the place of Charmides, distinguishes in his answer between 'making' and 'doing,' and with the help of a misapplied quotation from Hesiod assigns to the words 'doing' and 'work' an exclusively good sense: Temperance is doing one's own

business; — (4) is doing good.

Still an element of knowledge is wanting which Critias is readily induced to admit at the suggestion of Socrates; and, in the spirit of Socrates and of Greek life generally, proposes as a fifth definition, (5) Temperance is self-knowledge. But all sciences have a subject: number is the subject of arithmetic, health of medicine — what is the subject of temperance or wisdom? The answer is that (6) Temperance is the knowledge of what a man knows and of what he does not know. But this is contrary to analogy; there is no vision of vision, but only of visible things; no love of loves, but only of beautiful things; how then can there be a knowledge of knowledge? That which is older, heavier, lighter, is older, heavier, and lighter than something else, not than itself, and this seems to be true of all relative notions — the object of relation is outside of them; at any rate they can only have relation to themselves in the form of that object. Whether there are any such cases of reflex relation or not, and whether that sort of knowledge which we term Temperance is of this reflex nature, has yet to be determined by the great metaphysician. But even if knowledge can know itself, how does the knowledge of what we know imply the knowledge of what we do not know? Besides, knowledge is an abstraction only, and will not inform us of any particular subject, such as medicine, building, and the like. It may tell us that we or other men know something, but can never tell us what we know.

Admitting that there is a knowledge of what we know and of what we do not know, which would supply a rule and measure of all things, still there would be no good in this; and the knowledge which temperance gives must be of a kind which will do us good; for temperance is a good. But this universal knowledge does not tend to our happiness and good: the only kind of knowledge which brings happiness is the knowledge of good and evil. To this Critias replies that the science or knowledge of good and evil, and all the other sciences, are regulated by the higher science or knowledge of knowledge. Socrates replies by again dividing the abstract from the concrete, and asks how this knowledge conduces to happiness in the same definite way in which medicine conduces to health.

And now, after making all these concessions, which are really

inadmissible, we are still as far as ever from ascertaining the nature of temperance, which Charmides has already discovered, and had therefore better rest in the knowledge that the more temperate he is the happier he will be, and not trouble himself with the speculations of Socrates.

In this Dialogue may be noted (1) The Greek ideal of beauty and goodness, the vision of the fair soul in the fair body, realised in the beautiful Charmides; (2) The true conception of medicine as a science of the whole as well as the parts, and of the mind as well as the body, which is playfully intimated in the story of the Thracian; (3) The tendency of the age to verbal distinctions, which here, as in the Protagoras and Cratylus, are ascribed to the ingenuity of Prodicus; and to interpretations or rather parodies of Homer or Hesiod, which are eminently characteristic of Plato and his contemporaries; (4) The germ of an ethical principle contained in the notion that temperance is ‘doing one’s own business,’ which in the Republic (such is the shifting character of the Platonic philosophy) is given as the definition, not of temperance, but of justice; (5) The impatience which is exhibited by Socrates of any definition of temperance in which an element of science or knowledge is not included; (6) The beginning of metaphysics and logic implied in the two questions: whether there can be a science of science, and whether the knowledge of what you know is the same as the knowledge of what you do not know; and also in the distinction between ‘what you know’ and ‘that you know,’ (Greek;) here too is the first conception of an absolute self-determined science (the claims of which, however, are disputed by Socrates, who asks *cui bono?*) as well as the first suggestion of the difficulty of the abstract and concrete, and one of the earliest anticipations of the relation of subject and object, and of the subjective element in knowledge — a ‘rich banquet’ of metaphysical questions in which we ‘taste of many things.’ (7) And still the mind of Plato, having snatched for a moment at these shadows of the future, quickly rejects them: thus early has he reached the conclusion that there can be no science which is a ‘science of nothing’ (Parmen.). (8) The conception of a science of good and evil also first occurs here, an anticipation of the Philebus and Republic as well as of moral philosophy in later ages.

The dramatic interest of the Dialogue chiefly centres in the youth Charmides, with whom Socrates talks in the kindly spirit of an elder. His childlike simplicity and ingenuousness are contrasted with the dialectical and rhetorical arts of Critias, who is the grown-up man of the world, having a tincture of philosophy. No hint is given, either here or in the *Timaeus*, of the infamy which attaches to the name of the latter in Athenian history. He is simply a cultivated person who, like his kinsman Plato, is ennobled by the connection of his family with Solon (*Tim.*), and had been the follower, if not the disciple, both of Socrates and of the Sophists. In the argument he is not unfair, if allowance is made for a slight rhetorical tendency, and for a natural desire to save his reputation with the company; he is sometimes nearer the truth than Socrates. Nothing in his language or behaviour is unbecoming the guardian of the beautiful Charmides. His love of reputation is characteristically Greek, and contrasts with the humility of Socrates. Nor in Charmides himself do we find any resemblance to the Charmides of history, except, perhaps, the modest and retiring nature which, according to Xenophon, at one time of his life prevented him from speaking in the Assembly (*Mem.*); and we are surprised to hear that, like Critias, he afterwards became one of the thirty tyrants. In the Dialogue he is a pattern of virtue, and is therefore in no need of the charm which Socrates is unable to apply. With youthful naivete, keeping his secret and entering into the spirit of Socrates, he enjoys the detection of his elder and guardian Critias, who is easily seen to be the author of the definition which he has so great an interest in maintaining. The preceding definition, 'Temperance is doing one's own business,' is assumed to have been borrowed by Charmides from another; and when the enquiry becomes more abstract he is superseded by Critias (*Theaet.*; *Euthyd.*). Socrates preserves his accustomed irony to the end; he is in the neighbourhood of several great truths, which he views in various lights, but always either by bringing them to the test of common sense, or by demanding too great exactness in the use of words, turns aside from them and comes at last to no conclusion.

The definitions of temperance proceed in regular order from the popular to the philosophical. The first two are simple enough and partially true, like the first thoughts of an intelligent youth; the third,

which is a real contribution to ethical philosophy, is perverted by the ingenuity of Socrates, and hardly rescued by an equal perversion on the part of Critias. The remaining definitions have a higher aim, which is to introduce the element of knowledge, and at last to unite good and truth in a single science. But the time has not yet arrived for the realization of this vision of metaphysical philosophy; and such a science when brought nearer to us in the *Philebus* and the *Republic* will not be called by the name of (Greek). Hence we see with surprise that Plato, who in his other writings identifies good and knowledge, here opposes them, and asks, almost in the spirit of Aristotle, how can there be a knowledge of knowledge, and even if attainable, how can such a knowledge be of any use?

The difficulty of the *Charmides* arises chiefly from the two senses of the word (Greek), or temperance. From the ethical notion of temperance, which is variously defined to be quietness, modesty, doing our own business, the doing of good actions, the dialogue passes onto the intellectual conception of (Greek), which is declared also to be the science of self-knowledge, or of the knowledge of what we know and do not know, or of the knowledge of good and evil. The dialogue represents a stage in the history of philosophy in which knowledge and action were not yet distinguished. Hence the confusion between them, and the easy transition from one to the other. The definitions which are offered are all rejected, but it is to be observed that they all tend to throw a light on the nature of temperance, and that, unlike the distinction of Critias between (Greek), none of them are merely verbal quibbles, it is implied that this question, although it has not yet received a solution in theory, has been already answered by Charmides himself, who has learned to practise the virtue of self-knowledge which philosophers are vainly trying to define in words. In a similar spirit we might say to a young man who is disturbed by theological difficulties, 'Do not trouble yourself about such matters, but only lead a good life;' and yet in either case it is not to be denied that right ideas of truth may contribute greatly to the improvement of character.

The reasons why the *Charmides*, *Lysis*, *Laches* have been placed together and first in the series of Platonic dialogues, are: (i) Their shortness and simplicity. The *Charmides* and the *Lysis*, if not the

Laches, are of the same 'quality' as the *Phaedrus* and *Symposium*: and it is probable, though far from certain, that the slighter effort preceded the greater one. (ii) Their eristic, or rather Socratic character; they belong to the class called dialogues of search (Greek), which have no conclusion. (iii) The absence in them of certain favourite notions of Plato, such as the doctrine of recollection and of the Platonic ideas; the questions, whether virtue can be taught; whether the virtues are one or many. (iv) They have a want of depth, when compared with the dialogues of the middle and later period; and a youthful beauty and grace which is wanting in the later ones. (v) Their resemblance to one another; in all the three boyhood has a great part. These reasons have various degrees of weight in determining their place in the catalogue of the Platonic writings, though they are not conclusive. No arrangement of the Platonic dialogues can be strictly chronological. The order which has been adopted is intended mainly for the convenience of the reader; at the same time, indications of the date supplied either by Plato himself or allusions found in the dialogues have not been lost sight of. Much may be said about this subject, but the results can only be probable; there are no materials which would enable us to attain to anything like certainty.

The relations of knowledge and virtue are again brought forward in the companion dialogues of the *Lysis* and *Laches*; and also in the *Protagoras* and *Euthydemus*. The opposition of abstract and particular knowledge in this dialogue may be compared with a similar opposition of ideas and phenomena which occurs in the *Prologues* to the *Parmenides*, but seems rather to belong to a later stage of the philosophy of Plato.

CHARMIDES.

PERSONS OF THE DIALOGUE:

Socrates, who is the narrator, Charmides, Chaerephon, Critias.

SCENE: The Palaestra of Taureas, which is near the Porch of the King Archon.

Yesterday evening I returned from the army at Potidaea, and having been a good while away, I thought that I should like to go and look at my old haunts. So I went into the palaestra of Taureas, which is over against the temple adjoining the porch of the King Archon, and there I found a number of persons, most of whom I knew, but not all. My visit was unexpected, and no sooner did they see me entering than they saluted me from afar on all sides; and Chaerephon, who is a kind of madman, started up and ran to me, seizing my hand, and saying, How did you escape, Socrates? — (I should explain that an engagement had taken place at Potidaea not long before we came away, of which the news had only just reached Athens.)

You see, I replied, that here I am.

There was a report, he said, that the engagement was very severe, and that many of our acquaintance had fallen.

That, I replied, was not far from the truth.

I suppose, he said, that you were present.

I was.

Then sit down, and tell us the whole story, which as yet we have only heard imperfectly.

I took the place which he assigned to me, by the side of Critias the son of Callaeschrus, and when I had saluted him and the rest of the company, I told them the news from the army, and answered their several enquiries.

Then, when there had been enough of this, I, in my turn, began to make enquiries about matters at home — about the present state of philosophy, and about the youth. I asked whether any of them were remarkable for wisdom or beauty, or both. Critias, glancing at the door, invited my attention to some youths who were coming in, and

talking noisily to one another, followed by a crowd. Of the beauties, Socrates, he said, I fancy that you will soon be able to form a judgment. For those who are just entering are the advanced guard of the great beauty, as he is thought to be, of the day, and he is likely to be not far off himself.

Who is he, I said; and who is his father?

Charmides, he replied, is his name; he is my cousin, and the son of my uncle Glaucon: I rather think that you know him too, although he was not grown up at the time of your departure.

Certainly, I know him, I said, for he was remarkable even then when he was still a child, and I should imagine that by this time he must be almost a young man.

You will see, he said, in a moment what progress he has made and what he is like. He had scarcely said the word, when Charmides entered.

Now you know, my friend, that I cannot measure anything, and of the beautiful, I am simply such a measure as a white line is of chalk; for almost all young persons appear to be beautiful in my eyes. But at that moment, when I saw him coming in, I confess that I was quite astonished at his beauty and stature; all the world seemed to be enamoured of him; amazement and confusion reigned when he entered; and a troop of lovers followed him. That grown-up men like ourselves should have been affected in this way was not surprising, but I observed that there was the same feeling among the boys; all of them, down to the very least child, turned and looked at him, as if he had been a statue.

Chaerephon called me and said: What do you think of him, Socrates? Has he not a beautiful face?

Most beautiful, I said.

But you would think nothing of his face, he replied, if you could see his naked form: he is absolutely perfect.

And to this they all agreed.

By Heracles, I said, there never was such a paragon, if he has only one other slight addition.

What is that? said Critias.

If he has a noble soul; and being of your house, Critias, he may be expected to have this.

He is as fair and good within, as he is without, replied Critias.

Then, before we see his body, should we not ask him to show us his soul, naked and undisguised? he is just of an age at which he will like to talk.

That he will, said Critias, and I can tell you that he is a philosopher already, and also a considerable poet, not in his own opinion only, but in that of others.

That, my dear Critias, I replied, is a distinction which has long been in your family, and is inherited by you from Solon. But why do you not call him, and show him to us? for even if he were younger than he is, there could be no impropriety in his talking to us in the presence of you, who are his guardian and cousin.

Very well, he said; then I will call him; and turning to the attendant, he said, Call Charmides, and tell him that I want him to come and see a physician about the illness of which he spoke to me the day before yesterday. Then again addressing me, he added: He has been complaining lately of having a headache when he rises in the morning: now why should you not make him believe that you know a cure for the headache?

Why not, I said; but will he come?

He will be sure to come, he replied.

He came as he was bidden, and sat down between Critias and me. Great amusement was occasioned by every one pushing with might and main at his neighbour in order to make a place for him next to themselves, until at the two ends of the row one had to get up and the other was rolled over sideways. Now I, my friend, was beginning to feel awkward; my former bold belief in my powers of conversing with him had vanished. And when Critias told him that I was the person who had the cure, he looked at me in such an indescribable manner, and was just going to ask a question. And at that moment all the people in the palaestra crowded about us, and, O rare! I caught a sight of the inwards of his garment, and took the flame. Then I could no longer contain myself. I thought how well Cydias understood the nature of love, when, in speaking of a fair youth, he warns some one 'not to bring the fawn in the sight of the lion to be devoured by him,' for I felt that I had been overcome by a sort of wild-beast appetite. But I controlled myself, and when he asked me if I knew the cure of

the headache, I answered, but with an effort, that I did know.

And what is it? he said.

I replied that it was a kind of leaf, which required to be accompanied by a charm, and if a person would repeat the charm at the same time that he used the cure, he would be made whole; but that without the charm the leaf would be of no avail.

Then I will write out the charm from your dictation, he said.

With my consent? I said, or without my consent?

With your consent, Socrates, he said, laughing.

Very good, I said; and are you quite sure that you know my name?

I ought to know you, he replied, for there is a great deal said about you among my companions; and I remember when I was a child seeing you in company with my cousin Critias.

I am glad to find that you remember me, I said; for I shall now be more at home with you and shall be better able to explain the nature of the charm, about which I felt a difficulty before. For the charm will do more, Charmides, than only cure the headache. I dare say that you have heard eminent physicians say to a patient who comes to them with bad eyes, that they cannot cure his eyes by themselves, but that if his eyes are to be cured, his head must be treated; and then again they say that to think of curing the head alone, and not the rest of the body also, is the height of folly. And arguing in this way they apply their methods to the whole body, and try to treat and heal the whole and the part together. Did you ever observe that this is what they say?

Yes, he said.

And they are right, and you would agree with them?

Yes, he said, certainly I should.

His approving answers reassured me, and I began by degrees to regain confidence, and the vital heat returned. Such, Charmides, I said, is the nature of the charm, which I learned when serving with the army from one of the physicians of the Thracian king Zamolxis, who are said to be so skilful that they can even give immortality. This Thracian told me that in these notions of theirs, which I was just now mentioning, the Greek physicians are quite right as far as they go; but Zamolxis, he added, our king, who is also a god, says further, 'that as you ought not to attempt to cure the eyes without the head, or

the head without the body, so neither ought you to attempt to cure the body without the soul; and this,' he said, 'is the reason why the cure of many diseases is unknown to the physicians of Hellas, because they are ignorant of the whole, which ought to be studied also; for the part can never be well unless the whole is well.' For all good and evil, whether in the body or in human nature, originates, as he declared, in the soul, and overflows from thence, as if from the head into the eyes. And therefore if the head and body are to be well, you must begin by curing the soul; that is the first thing. And the cure, my dear youth, has to be effected by the use of certain charms, and these charms are fair words; and by them temperance is implanted in the soul, and where temperance is, there health is speedily imparted, not only to the head, but to the whole body. And he who taught me the cure and the charm at the same time added a special direction: 'Let no one,' he said, 'persuade you to cure the head, until he has first given you his soul to be cured by the charm. For this,' he said, 'is the great error of our day in the treatment of the human body, that physicians separate the soul from the body.' And he added with emphasis, at the same time making me swear to his words, 'Let no one, however rich, or noble, or fair, persuade you to give him the cure, without the charm.' Now I have sworn, and I must keep my oath, and therefore if you will allow me to apply the Thracian charm first to your soul, as the stranger directed, I will afterwards proceed to apply the cure to your head. But if not, I do not know what I am to do with you, my dear Charmides.

Critias, when he heard this, said: The headache will be an unexpected gain to my young relation, if the pain in his head compels him to improve his mind: and I can tell you, Socrates, that Charmides is not only pre-eminent in beauty among his equals, but also in that quality which is given by the charm; and this, as you say, is temperance?

Yes, I said.

Then let me tell you that he is the most temperate of human beings, and for his age inferior to none in any quality.

Yes, I said, Charmides; and indeed I think that you ought to excel others in all good qualities; for if I am not mistaken there is no one present who could easily point out two Athenian houses, whose

union would be likely to produce a better or nobler scion than the two from which you are sprung. There is your father's house, which is descended from Critias the son of Dropidas, whose family has been commemorated in the panegyrical verses of Anacreon, Solon, and many other poets, as famous for beauty and virtue and all other high fortune: and your mother's house is equally distinguished; for your maternal uncle, Pyrilampes, is reputed never to have found his equal, in Persia at the court of the great king, or on the continent of Asia, in all the places to which he went as ambassador, for stature and beauty; that whole family is not a whit inferior to the other. Having such ancestors you ought to be first in all things, and, sweet son of Glaucon, your outward form is no dishonour to any of them. If to beauty you add temperance, and if in other respects you are what Critias declares you to be, then, dear Charmides, blessed art thou, in being the son of thy mother. And here lies the point; for if, as he declares, you have this gift of temperance already, and are temperate enough, in that case you have no need of any charms, whether of Zamolxis or of Abaris the Hyperborean, and I may as well let you have the cure of the head at once; but if you have not yet acquired this quality, I must use the charm before I give you the medicine. Please, therefore, to inform me whether you admit the truth of what Critias has been saying; — have you or have you not this quality of temperance?

Charmides blushed, and the blush heightened his beauty, for modesty is becoming in youth; he then said very ingenuously, that he really could not at once answer, either yes, or no, to the question which I had asked: For, said he, if I affirm that I am not temperate, that would be a strange thing for me to say of myself, and also I should give the lie to Critias, and many others who think as he tells you, that I am temperate: but, on the other hand, if I say that I am, I shall have to praise myself, which would be ill manners; and therefore I do not know how to answer you.

I said to him: That is a natural reply, Charmides, and I think that you and I ought together to enquire whether you have this quality about which I am asking or not; and then you will not be compelled to say what you do not like; neither shall I be a rash practitioner of medicine: therefore, if you please, I will share the enquiry with you,

but I will not press you if you would rather not.

There is nothing which I should like better, he said; and as far as I am concerned you may proceed in the way which you think best.

I think, I said, that I had better begin by asking you a question; for if temperance abides in you, you must have an opinion about her; she must give some intimation of her nature and qualities, which may enable you to form a notion of her. Is not that true?

Yes, he said, that I think is true.

You know your native language, I said, and therefore you must be able to tell what you feel about this.

Certainly, he said.

In order, then, that I may form a conjecture whether you have temperance abiding in you or not, tell me, I said, what, in your opinion, is Temperance?

At first he hesitated, and was very unwilling to answer: then he said that he thought temperance was doing things orderly and quietly, such things for example as walking in the streets, and talking, or anything else of that nature. In a word, he said, I should answer that, in my opinion, temperance is quietness.

Are you right, Charmides? I said. No doubt some would affirm that the quiet are the temperate; but let us see whether these words have any meaning; and first tell me whether you would not acknowledge temperance to be of the class of the noble and good?

Yes.

But which is best when you are at the writing-master's, to write the same letters quickly or quietly?

Quickly.

And to read quickly or slowly?

Quickly again.

And in playing the lyre, or wrestling, quickness or sharpness are far better than quietness and slowness?

Yes.

And the same holds in boxing and in the pancratium?

Certainly.

And in leaping and running and in bodily exercises generally, quickness and agility are good; slowness, and inactivity, and quietness, are bad?

That is evident.

Then, I said, in all bodily actions, not quietness, but the greatest agility and quickness, is noblest and best?

Yes, certainly.

And is temperance a good?

Yes.

Then, in reference to the body, not quietness, but quickness will be the higher degree of temperance, if temperance is a good?

True, he said.

And which, I said, is better — facility in learning, or difficulty in learning?

Facility.

Yes, I said; and facility in learning is learning quickly, and difficulty in learning is learning quietly and slowly?

True.

And is it not better to teach another quickly and energetically, rather than quietly and slowly?

Yes.

And which is better, to call to mind, and to remember, quickly and readily, or quietly and slowly?

The former.

And is not shrewdness a quickness or cleverness of the soul, and not a quietness?

True.

And is it not best to understand what is said, whether at the writing-master's or the music-master's, or anywhere else, not as quietly as possible, but as quickly as possible?

Yes.

And in the searchings or deliberations of the soul, not the quietest, as I imagine, and he who with difficulty deliberates and discovers, is thought worthy of praise, but he who does so most easily and quickly?

Quite true, he said.

And in all that concerns either body or soul, swiftness and activity are clearly better than slowness and quietness?

Clearly they are.

Then temperance is not quietness, nor is the temperate life quiet,

— certainly not upon this view; for the life which is temperate is supposed to be the good. And of two things, one is true, — either never, or very seldom, do the quiet actions in life appear to be better than the quick and energetic ones; or supposing that of the nobler actions, there are as many quiet, as quick and vehement: still, even if we grant this, temperance will not be acting quietly any more than acting quickly and energetically, either in walking or talking or in anything else; nor will the quiet life be more temperate than the unquiet, seeing that temperance is admitted by us to be a good and noble thing, and the quick have been shown to be as good as the quiet.

I think, he said, Socrates, that you are right.

Then once more, Charmides, I said, fix your attention, and look within; consider the effect which temperance has upon yourself, and the nature of that which has the effect. Think over all this, and, like a brave youth, tell me — What is temperance?

After a moment's pause, in which he made a real manly effort to think, he said: My opinion is, Socrates, that temperance makes a man ashamed or modest, and that temperance is the same as modesty.

Very good, I said; and did you not admit, just now, that temperance is noble?

Yes, certainly, he said.

And the temperate are also good?

Yes.

And can that be good which does not make men good?

Certainly not.

And you would infer that temperance is not only noble, but also good?

That is my opinion.

Well, I said; but surely you would agree with Homer when he says,

‘Modesty is not good for a needy man’?

Yes, he said; I agree.

Then I suppose that modesty is and is not good?

Clearly.

But temperance, whose presence makes men only good, and not bad, is always good?

That appears to me to be as you say.

And the inference is that temperance cannot be modesty — if temperance is a good, and if modesty is as much an evil as a good?

All that, Socrates, appears to me to be true; but I should like to know what you think about another definition of temperance, which I just now remember to have heard from some one, who said, 'That temperance is doing our own business.' Was he right who affirmed that?

You monster! I said; this is what Critias, or some philosopher has told you.

Some one else, then, said Critias; for certainly I have not.

But what matter, said Charmides, from whom I heard this?

No matter at all, I replied; for the point is not who said the words, but whether they are true or not.

There you are in the right, Socrates, he replied.

To be sure, I said; yet I doubt whether we shall ever be able to discover their truth or falsehood; for they are a kind of riddle.

What makes you think so? he said.

Because, I said, he who uttered them seems to me to have meant one thing, and said another. Is the scribe, for example, to be regarded as doing nothing when he reads or writes?

I should rather think that he was doing something.

And does the scribe write or read, or teach you boys to write or read, your own names only, or did you write your enemies' names as well as your own and your friends'?

As much one as the other.

And was there anything meddling or intemperate in this?

Certainly not.

And yet if reading and writing are the same as doing, you were doing what was not your own business?

But they are the same as doing.

And the healing art, my friend, and building, and weaving, and doing anything whatever which is done by art, — these all clearly come under the head of doing?

Certainly.

And do you think that a state would be well ordered by a law which compelled every man to weave and wash his own coat, and

make his own shoes, and his own flask and strigil, and other implements, on this principle of every one doing and performing his own, and abstaining from what is not his own?

I think not, he said.

But, I said, a temperate state will be a well-ordered state.

Of course, he replied.

Then temperance, I said, will not be doing one's own business; not at least in this way, or doing things of this sort?

Clearly not.

Then, as I was just now saying, he who declared that temperance is a man doing his own business had another and a hidden meaning; for I do not think that he could have been such a fool as to mean this. Was he a fool who told you, Charmides?

Nay, he replied, I certainly thought him a very wise man.

Then I am quite certain that he put forth his definition as a riddle, thinking that no one would know the meaning of the words 'doing his own business.'

I dare say, he replied.

And what is the meaning of a man doing his own business? Can you tell me?

Indeed, I cannot; and I should not wonder if the man himself who used this phrase did not understand what he was saying. Whereupon he laughed slyly, and looked at Critias.

Critias had long been showing uneasiness, for he felt that he had a reputation to maintain with Charmides and the rest of the company. He had, however, hitherto managed to restrain himself; but now he could no longer forbear, and I am convinced of the truth of the suspicion which I entertained at the time, that Charmides had heard this answer about temperance from Critias. And Charmides, who did not want to answer himself, but to make Critias answer, tried to stir him up. He went on pointing out that he had been refuted, at which Critias grew angry, and appeared, as I thought, inclined to quarrel with him; just as a poet might quarrel with an actor who spoiled his poems in repeating them; so he looked hard at him and said —

Do you imagine, Charmides, that the author of this definition of temperance did not understand the meaning of his own words, because you do not understand them?

Why, at his age, I said, most excellent Critias, he can hardly be expected to understand; but you, who are older, and have studied, may well be assumed to know the meaning of them; and therefore, if you agree with him, and accept his definition of temperance, I would much rather argue with you than with him about the truth or falsehood of the definition.

I entirely agree, said Critias, and accept the definition.

Very good, I said; and now let me repeat my question — Do you admit, as I was just now saying, that all craftsmen make or do something?

I do.

And do they make or do their own business only, or that of others also?

They make or do that of others also.

And are they temperate, seeing that they make not for themselves or their own business only?

Why not? he said.

No objection on my part, I said, but there may be a difficulty on his who proposes as a definition of temperance, ‘doing one’s own business,’ and then says that there is no reason why those who do the business of others should not be temperate.

Nay (The English reader has to observe that the word ‘make’ (Greek), in Greek, has also the sense of ‘do’ (Greek).), said he; did I ever acknowledge that those who do the business of others are temperate? I said, those who make, not those who do.

What! I asked; do you mean to say that doing and making are not the same?

No more, he replied, than making or working are the same; thus much I have learned from Hesiod, who says that ‘work is no disgrace.’ Now do you imagine that if he had meant by working and doing such things as you were describing, he would have said that there was no disgrace in them — for example, in the manufacture of shoes, or in selling pickles, or sitting for hire in a house of ill-fame? That, Socrates, is not to be supposed: but I conceive him to have distinguished making from doing and work; and, while admitting that the making anything might sometimes become a disgrace, when the employment was not honourable, to have thought that work was

never any disgrace at all. For things nobly and usefully made he called works; and such makings he called workings, and doings; and he must be supposed to have called such things only man's proper business, and what is hurtful, not his business: and in that sense Hesiod, and any other wise man, may be reasonably supposed to call him wise who does his own work.

O Critias, I said, no sooner had you opened your mouth, than I pretty well knew that you would call that which is proper to a man, and that which is his own, good; and that the makings (Greek) of the good you would call doings (Greek), for I am no stranger to the endless distinctions which Prodicus draws about names. Now I have no objection to your giving names any signification which you please, if you will only tell me what you mean by them. Please then to begin again, and be a little plainer. Do you mean that this doing or making, or whatever is the word which you would use, of good actions, is temperance?

I do, he said.

Then not he who does evil, but he who does good, is temperate?

Yes, he said; and you, friend, would agree.

No matter whether I should or not; just now, not what I think, but what you are saying, is the point at issue.

Well, he answered; I mean to say, that he who does evil, and not good, is not temperate; and that he is temperate who does good, and not evil: for temperance I define in plain words to be the doing of good actions.

And you may be very likely right in what you are saying; but I am curious to know whether you imagine that temperate men are ignorant of their own temperance?

I do not think so, he said.

And yet were you not saying, just now, that craftsmen might be temperate in doing another's work, as well as in doing their own?

I was, he replied; but what is your drift?

I have no particular drift, but I wish that you would tell me whether a physician who cures a patient may do good to himself and good to another also?

I think that he may.

And he who does so does his duty?

Yes.

And does not he who does his duty act temperately or wisely?

Yes, he acts wisely.

But must the physician necessarily know when his treatment is likely to prove beneficial, and when not? or must the craftsman necessarily know when he is likely to be benefited, and when not to be benefited, by the work which he is doing?

I suppose not.

Then, I said, he may sometimes do good or harm, and not know what he is himself doing, and yet, in doing good, as you say, he has done temperately or wisely. Was not that your statement?

Yes.

Then, as would seem, in doing good, he may act wisely or temperately, and be wise or temperate, but not know his own wisdom or temperance?

But that, Socrates, he said, is impossible; and therefore if this is, as you imply, the necessary consequence of any of my previous admissions, I will withdraw them, rather than admit that a man can be temperate or wise who does not know himself; and I am not ashamed to confess that I was in error. For self-knowledge would certainly be maintained by me to be the very essence of knowledge, and in this I agree with him who dedicated the inscription, 'Know thyself!' at Delphi. That word, if I am not mistaken, is put there as a sort of salutation which the god addresses to those who enter the temple; as much as to say that the ordinary salutation of 'Hail!' is not right, and that the exhortation 'Be temperate!' would be a far better way of saluting one another. The notion of him who dedicated the inscription was, as I believe, that the god speaks to those who enter his temple, not as men speak; but, when a worshipper enters, the first word which he hears is 'Be temperate!' This, however, like a prophet he expresses in a sort of riddle, for 'Know thyself!' and 'Be temperate!' are the same, as I maintain, and as the letters imply (Greek), and yet they may be easily misunderstood; and succeeding sages who added 'Never too much,' or, 'Give a pledge, and evil is nigh at hand,' would appear to have so misunderstood them; for they imagined that 'Know thyself!' was a piece of advice which the god gave, and not his salutation of the worshippers at their first coming

in; and they dedicated their own inscription under the idea that they too would give equally useful pieces of advice. Shall I tell you, Socrates, why I say all this? My object is to leave the previous discussion (in which I know not whether you or I are more right, but, at any rate, no clear result was attained), and to raise a new one in which I will attempt to prove, if you deny, that temperance is self-knowledge.

Yes, I said, Critias; but you come to me as though I professed to know about the questions which I ask, and as though I could, if I only would, agree with you. Whereas the fact is that I enquire with you into the truth of that which is advanced from time to time, just because I do not know; and when I have enquired, I will say whether I agree with you or not. Please then to allow me time to reflect.

Reflect, he said.

I am reflecting, I replied, and discover that temperance, or wisdom, if implying a knowledge of anything, must be a science, and a science of something.

Yes, he said; the science of itself.

Is not medicine, I said, the science of health?

True.

And suppose, I said, that I were asked by you what is the use or effect of medicine, which is this science of health, I should answer that medicine is of very great use in producing health, which, as you will admit, is an excellent effect.

Granted.

And if you were to ask me, what is the result or effect of architecture, which is the science of building, I should say houses, and so of other arts, which all have their different results. Now I want you, Critias, to answer a similar question about temperance, or wisdom, which, according to you, is the science of itself. Admitting this view, I ask of you, what good work, worthy of the name wise, does temperance or wisdom, which is the science of itself, effect? Answer me.

That is not the true way of pursuing the enquiry, Socrates, he said; for wisdom is not like the other sciences, any more than they are like one another: but you proceed as if they were alike. For tell me, he said, what result is there of computation or geometry, in the same

sense as a house is the result of building, or a garment of weaving, or any other work of any other art? Can you show me any such result of them? You cannot.

That is true, I said; but still each of these sciences has a subject which is different from the science. I can show you that the art of computation has to do with odd and even numbers in their numerical relations to themselves and to each other. Is not that true?

Yes, he said.

And the odd and even numbers are not the same with the art of computation?

They are not.

The art of weighing, again, has to do with lighter and heavier; but the art of weighing is one thing, and the heavy and the light another. Do you admit that?

Yes.

Now, I want to know, what is that which is not wisdom, and of which wisdom is the science?

You are just falling into the old error, Socrates, he said. You come asking in what wisdom or temperance differs from the other sciences, and then you try to discover some respect in which they are alike; but they are not, for all the other sciences are of something else, and not of themselves; wisdom alone is a science of other sciences, and of itself. And of this, as I believe, you are very well aware: and that you are only doing what you denied that you were doing just now, trying to refute me, instead of pursuing the argument.

And what if I am? How can you think that I have any other motive in refuting you but what I should have in examining into myself? which motive would be just a fear of my unconsciously fancying that I knew something of which I was ignorant. And at this moment I pursue the argument chiefly for my own sake, and perhaps in some degree also for the sake of my other friends. For is not the discovery of things as they truly are, a good common to all mankind?

Yes, certainly, Socrates, he said.

Then, I said, be cheerful, sweet sir, and give your opinion in answer to the question which I asked, never minding whether Critias or Socrates is the person refuted; attend only to the argument, and see what will come of the refutation.

I think that you are right, he replied; and I will do as you say.

Tell me, then, I said, what you mean to affirm about wisdom.

I mean to say that wisdom is the only science which is the science of itself as well as of the other sciences.

But the science of science, I said, will also be the science of the absence of science.

Very true, he said.

Then the wise or temperate man, and he only, will know himself, and be able to examine what he knows or does not know, and to see what others know and think that they know and do really know; and what they do not know, and fancy that they know, when they do not. No other person will be able to do this. And this is wisdom and temperance and self-knowledge — for a man to know what he knows, and what he does not know. That is your meaning?

Yes, he said.

Now then, I said, making an offering of the third or last argument to Zeus the Saviour, let us begin again, and ask, in the first place, whether it is or is not possible for a person to know that he knows and does not know what he knows and does not know; and in the second place, whether, if perfectly possible, such knowledge is of any use.

That is what we have to consider, he said.

And here, Critias, I said, I hope that you will find a way out of a difficulty into which I have got myself. Shall I tell you the nature of the difficulty?

By all means, he replied.

Does not what you have been saying, if true, amount to this: that there must be a single science which is wholly a science of itself and of other sciences, and that the same is also the science of the absence of science?

Yes.

But consider how monstrous this proposition is, my friend: in any parallel case, the impossibility will be transparent to you.

How is that? and in what cases do you mean?

In such cases as this: Suppose that there is a kind of vision which is not like ordinary vision, but a vision of itself and of other sorts of vision, and of the defect of them, which in seeing sees no colour, but

only itself and other sorts of vision: Do you think that there is such a kind of vision?

Certainly not.

Or is there a kind of hearing which hears no sound at all, but only itself and other sorts of hearing, or the defects of them?

There is not.

Or take all the senses: can you imagine that there is any sense of itself and of other senses, but which is incapable of perceiving the objects of the senses?

I think not.

Could there be any desire which is not the desire of any pleasure, but of itself, and of all other desires?

Certainly not.

Or can you imagine a wish which wishes for no good, but only for itself and all other wishes?

I should answer, No.

Or would you say that there is a love which is not the love of beauty, but of itself and of other loves?

I should not.

Or did you ever know of a fear which fears itself or other fears, but has no object of fear?

I never did, he said.

Or of an opinion which is an opinion of itself and of other opinions, and which has no opinion on the subjects of opinion in general?

Certainly not.

But surely we are assuming a science of this kind, which, having no subject-matter, is a science of itself and of the other sciences?

Yes, that is what is affirmed.

But how strange is this, if it be indeed true: we must not however as yet absolutely deny the possibility of such a science; let us rather consider the matter.

You are quite right.

Well then, this science of which we are speaking is a science of something, and is of a nature to be a science of something?

Yes.

Just as that which is greater is of a nature to be greater than

something else? (Socrates is intending to show that science differs from the object of science, as any other relative differs from the object of relation. But where there is comparison — greater, less, heavier, lighter, and the like — a relation to self as well as to other things involves an absolute contradiction; and in other cases, as in the case of the senses, is hardly conceivable. The use of the genitive after the comparative in Greek, (Greek), creates an unavoidable obscurity in the translation.)

Yes.

Which is less, if the other is conceived to be greater?

To be sure.

And if we could find something which is at once greater than itself, and greater than other great things, but not greater than those things in comparison of which the others are greater, then that thing would have the property of being greater and also less than itself?

That, Socrates, he said, is the inevitable inference.

Or if there be a double which is double of itself and of other doubles, these will be halves; for the double is relative to the half?

That is true.

And that which is greater than itself will also be less, and that which is heavier will also be lighter, and that which is older will also be younger: and the same of other things; that which has a nature relative to self will retain also the nature of its object: I mean to say, for example, that hearing is, as we say, of sound or voice. Is that true?

Yes.

Then if hearing hears itself, it must hear a voice; for there is no other way of hearing.

Certainly.

And sight also, my excellent friend, if it sees itself must see a colour, for sight cannot see that which has no colour.

No.

Do you remark, Critias, that in several of the examples which have been recited the notion of a relation to self is altogether inadmissible, and in other cases hardly credible — inadmissible, for example, in the case of magnitudes, numbers, and the like?

Very true.

But in the case of hearing and sight, or in the power of self-motion, and the power of heat to burn, this relation to self will be regarded as incredible by some, but perhaps not by others. And some great man, my friend, is wanted, who will satisfactorily determine for us, whether there is nothing which has an inherent property of relation to self, or some things only and not others; and whether in this class of self-related things, if there be such a class, that science which is called wisdom or temperance is included. I altogether distrust my own power of determining these matters: I am not certain whether there is such a science of science at all; and even if there be, I should not acknowledge this to be wisdom or temperance, until I can also see whether such a science would or would not do us any good; for I have an impression that temperance is a benefit and a good. And therefore, O son of Callaeschrus, as you maintain that temperance or wisdom is a science of science, and also of the absence of science, I will request you to show in the first place, as I was saying before, the possibility, and in the second place, the advantage, of such a science; and then perhaps you may satisfy me that you are right in your view of temperance.

Critias heard me say this, and saw that I was in a difficulty; and as one person when another yawns in his presence catches the infection of yawning from him, so did he seem to be driven into a difficulty by my difficulty. But as he had a reputation to maintain, he was ashamed to admit before the company that he could not answer my challenge or determine the question at issue; and he made an unintelligible attempt to hide his perplexity. In order that the argument might proceed, I said to him, Well then Critias, if you like, let us assume that there is this science of science; whether the assumption is right or wrong may hereafter be investigated. Admitting the existence of it, will you tell me how such a science enables us to distinguish what we know or do not know, which, as we were saying, is self-knowledge or wisdom: so we were saying?

Yes, Socrates, he said; and that I think is certainly true: for he who has this science or knowledge which knows itself will become like the knowledge which he has, in the same way that he who has swiftness will be swift, and he who has beauty will be beautiful, and he who has knowledge will know. In the same way he who has that

knowledge which is self-knowing, will know himself.

I do not doubt, I said, that a man will know himself, when he possesses that which has self-knowledge: but what necessity is there that, having this, he should know what he knows and what he does not know?

Because, Socrates, they are the same.

Very likely, I said; but I remain as stupid as ever; for still I fail to comprehend how this knowing what you know and do not know is the same as the knowledge of self.

What do you mean? he said.

This is what I mean, I replied: I will admit that there is a science of science; — can this do more than determine that of two things one is and the other is not science or knowledge?

No, just that.

But is knowledge or want of knowledge of health the same as knowledge or want of knowledge of justice?

Certainly not.

The one is medicine, and the other is politics; whereas that of which we are speaking is knowledge pure and simple.

Very true.

And if a man knows only, and has only knowledge of knowledge, and has no further knowledge of health and justice, the probability is that he will only know that he knows something, and has a certain knowledge, whether concerning himself or other men.

True.

Then how will this knowledge or science teach him to know what he knows? Say that he knows health; — not wisdom or temperance, but the art of medicine has taught it to him; — and he has learned harmony from the art of music, and building from the art of building, — neither, from wisdom or temperance: and the same of other things.

That is evident.

How will wisdom, regarded only as a knowledge of knowledge or science of science, ever teach him that he knows health, or that he knows building?

It is impossible.

Then he who is ignorant of these things will only know that he

knows, but not what he knows?

True.

Then wisdom or being wise appears to be not the knowledge of the things which we do or do not know, but only the knowledge that we know or do not know?

That is the inference.

Then he who has this knowledge will not be able to examine whether a pretender knows or does not know that which he says that he knows: he will only know that he has a knowledge of some kind; but wisdom will not show him of what the knowledge is?

Plainly not.

Neither will he be able to distinguish the pretender in medicine from the true physician, nor between any other true and false professor of knowledge. Let us consider the matter in this way: If the wise man or any other man wants to distinguish the true physician from the false, how will he proceed? He will not talk to him about medicine; and that, as we were saying, is the only thing which the physician understands.

True.

And, on the other hand, the physician knows nothing of science, for this has been assumed to be the province of wisdom.

True.

And further, since medicine is science, we must infer that he does not know anything of medicine.

Exactly.

Then the wise man may indeed know that the physician has some kind of science or knowledge; but when he wants to discover the nature of this he will ask, What is the subject-matter? For the several sciences are distinguished not by the mere fact that they are sciences, but by the nature of their subjects. Is not that true?

Quite true.

And medicine is distinguished from other sciences as having the subject-matter of health and disease?

Yes.

And he who would enquire into the nature of medicine must pursue the enquiry into health and disease, and not into what is extraneous?

True.

And he who judges rightly will judge of the physician as a physician in what relates to these?

He will.

He will consider whether what he says is true, and whether what he does is right, in relation to health and disease?

He will.

But can any one attain the knowledge of either unless he have a knowledge of medicine?

He cannot.

No one at all, it would seem, except the physician can have this knowledge; and therefore not the wise man; he would have to be a physician as well as a wise man.

Very true.

Then, assuredly, wisdom or temperance, if only a science of science, and of the absence of science or knowledge, will not be able to distinguish the physician who knows from one who does not know but pretends or thinks that he knows, or any other professor of anything at all; like any other artist, he will only know his fellow in art or wisdom, and no one else.

That is evident, he said.

But then what profit, Critias, I said, is there any longer in wisdom or temperance which yet remains, if this is wisdom? If, indeed, as we were supposing at first, the wise man had been able to distinguish what he knew and did not know, and that he knew the one and did not know the other, and to recognize a similar faculty of discernment in others, there would certainly have been a great advantage in being wise; for then we should never have made a mistake, but have passed through life the unerring guides of ourselves and of those who are under us; and we should not have attempted to do what we did not know, but we should have found out those who knew, and have handed the business over to them and trusted in them; nor should we have allowed those who were under us to do anything which they were not likely to do well; and they would be likely to do well just that of which they had knowledge; and the house or state which was ordered or administered under the guidance of wisdom, and everything else of which wisdom was the lord, would have been well

ordered; for truth guiding, and error having been eliminated, in all their doings, men would have done well, and would have been happy. Was not this, Critias, what we spoke of as the great advantage of wisdom — to know what is known and what is unknown to us?

Very true, he said.

And now you perceive, I said, that no such science is to be found anywhere.

I perceive, he said.

May we assume then, I said, that wisdom, viewed in this new light merely as a knowledge of knowledge and ignorance, has this advantage: — that he who possesses such knowledge will more easily learn anything which he learns; and that everything will be clearer to him, because, in addition to the knowledge of individuals, he sees the science, and this also will better enable him to test the knowledge which others have of what he knows himself; whereas the enquirer who is without this knowledge may be supposed to have a feebler and weaker insight? Are not these, my friend, the real advantages which are to be gained from wisdom? And are not we looking and seeking after something more than is to be found in her?

That is very likely, he said.

That is very likely, I said; and very likely, too, we have been enquiring to no purpose; as I am led to infer, because I observe that if this is wisdom, some strange consequences would follow. Let us, if you please, assume the possibility of this science of sciences, and further admit and allow, as was originally suggested, that wisdom is the knowledge of what we know and do not know. Assuming all this, still, upon further consideration, I am doubtful, Critias, whether wisdom, such as this, would do us much good. For we were wrong, I think, in supposing, as we were saying just now, that such wisdom ordering the government of house or state would be a great benefit.

How so? he said.

Why, I said, we were far too ready to admit the great benefits which mankind would obtain from their severally doing the things which they knew, and committing the things of which they are ignorant to those who were better acquainted with them.

Were we not right in making that admission?

I think not.

How very strange, Socrates!

By the dog of Egypt, I said, there I agree with you; and I was thinking as much just now when I said that strange consequences would follow, and that I was afraid we were on the wrong track; for however ready we may be to admit that this is wisdom, I certainly cannot make out what good this sort of thing does to us.

What do you mean? he said; I wish that you could make me understand what you mean.

I dare say that what I am saying is nonsense, I replied; and yet if a man has any feeling of what is due to himself, he cannot let the thought which comes into his mind pass away unheeded and unexamined.

I like that, he said.

Hear, then, I said, my own dream; whether coming through the horn or the ivory gate, I cannot tell. The dream is this: Let us suppose that wisdom is such as we are now defining, and that she has absolute sway over us; then each action will be done according to the arts or sciences, and no one professing to be a pilot when he is not, or any physician or general, or any one else pretending to know matters of which he is ignorant, will deceive or elude us; our health will be improved; our safety at sea, and also in battle, will be assured; our coats and shoes, and all other instruments and implements will be skilfully made, because the workmen will be good and true. Aye, and if you please, you may suppose that prophecy, which is the knowledge of the future, will be under the control of wisdom, and that she will deter deceivers and set up the true prophets in their place as the revealers of the future. Now I quite agree that mankind, thus provided, would live and act according to knowledge, for wisdom would watch and prevent ignorance from intruding on us. But whether by acting according to knowledge we shall act well and be happy, my dear Critias, — this is a point which we have not yet been able to determine.

Yet I think, he replied, that if you discard knowledge, you will hardly find the crown of happiness in anything else.

But of what is this knowledge? I said. Just answer me that small question. Do you mean a knowledge of shoemaking?

God forbid.

Or of working in brass?

Certainly not.

Or in wool, or wood, or anything of that sort?

No, I do not.

Then, I said, we are giving up the doctrine that he who lives according to knowledge is happy, for these live according to knowledge, and yet they are not allowed by you to be happy; but I think that you mean to confine happiness to particular individuals who live according to knowledge, such for example as the prophet, who, as I was saying, knows the future. Is it of him you are speaking or of some one else?

Yes, I mean him, but there are others as well.

Yes, I said, some one who knows the past and present as well as the future, and is ignorant of nothing. Let us suppose that there is such a person, and if there is, you will allow that he is the most knowing of all living men.

Certainly he is.

Yet I should like to know one thing more: which of the different kinds of knowledge makes him happy? or do all equally make him happy?

Not all equally, he replied.

But which most tends to make him happy? the knowledge of what past, present, or future thing? May I infer this to be the knowledge of the game of draughts?

Nonsense about the game of draughts.

Or of computation?

No.

Or of health?

That is nearer the truth, he said.

And that knowledge which is nearest of all, I said, is the knowledge of what?

The knowledge with which he discerns good and evil.

Monster! I said; you have been carrying me round in a circle, and all this time hiding from me the fact that the life according to knowledge is not that which makes men act rightly and be happy, not even if knowledge include all the sciences, but one science only, that of good and evil. For, let me ask you, Critias, whether, if you take

away this, medicine will not equally give health, and shoemaking equally produce shoes, and the art of the weaver clothes? — whether the art of the pilot will not equally save our lives at sea, and the art of the general in war?

Quite so.

And yet, my dear Critias, none of these things will be well or beneficially done, if the science of the good be wanting.

True.

But that science is not wisdom or temperance, but a science of human advantage; not a science of other sciences, or of ignorance, but of good and evil: and if this be of use, then wisdom or temperance will not be of use.

And why, he replied, will not wisdom be of use? For, however much we assume that wisdom is a science of sciences, and has a sway over other sciences, surely she will have this particular science of the good under her control, and in this way will benefit us.

And will wisdom give health? I said; is not this rather the effect of medicine? Or does wisdom do the work of any of the other arts, — do they not each of them do their own work? Have we not long ago asseverated that wisdom is only the knowledge of knowledge and of ignorance, and of nothing else?

That is obvious.

Then wisdom will not be the producer of health.

Certainly not.

The art of health is different.

Yes, different.

Nor does wisdom give advantage, my good friend; for that again we have just now been attributing to another art.

Very true.

How then can wisdom be advantageous, when giving no advantage?

That, Socrates, is certainly inconceivable.

You see then, Critias, that I was not far wrong in fearing that I could have no sound notion about wisdom; I was quite right in depreciating myself; for that which is admitted to be the best of all things would never have seemed to us useless, if I had been good for anything at an enquiry. But now I have been utterly defeated, and

have failed to discover what that is to which the imposer of names gave this name of temperance or wisdom. And yet many more admissions were made by us than could be fairly granted; for we admitted that there was a science of science, although the argument said No, and protested against us; and we admitted further, that this science knew the works of the other sciences (although this too was denied by the argument), because we wanted to show that the wise man had knowledge of what he knew and did not know; also we nobly disregarded, and never even considered, the impossibility of a man knowing in a sort of way that which he does not know at all; for our assumption was, that he knows that which he does not know; than which nothing, as I think, can be more irrational. And yet, after finding us so easy and good-natured, the enquiry is still unable to discover the truth; but mocks us to a degree, and has gone out of its way to prove the inutility of that which we admitted only by a sort of supposition and fiction to be the true definition of temperance or wisdom: which result, as far as I am concerned, is not so much to be lamented, I said. But for your sake, Charmides, I am very sorry — that you, having such beauty and such wisdom and temperance of soul, should have no profit or good in life from your wisdom and temperance. And still more am I grieved about the charm which I learned with so much pain, and to so little profit, from the Thracian, for the sake of a thing which is nothing worth. I think indeed that there is a mistake, and that I must be a bad enquirer, for wisdom or temperance I believe to be really a great good; and happy are you, Charmides, if you certainly possess it. Wherefore examine yourself, and see whether you have this gift and can do without the charm; for if you can, I would rather advise you to regard me simply as a fool who is never able to reason out anything; and to rest assured that the more wise and temperate you are, the happier you will be.

Charmides said: I am sure that I do not know, Socrates, whether I have or have not this gift of wisdom and temperance; for how can I know whether I have a thing, of which even you and Critias are, as you say, unable to discover the nature? — (not that I believe you.) And further, I am sure, Socrates, that I do need the charm, and as far as I am concerned, I shall be willing to be charmed by you daily, until you say that I have had enough.

Very good, Charmides, said Critias; if you do this I shall have a proof of your temperance, that is, if you allow yourself to be charmed by Socrates, and never desert him at all.

You may depend on my following and not deserting him, said Charmides: if you who are my guardian command me, I should be very wrong not to obey you.

And I do command you, he said.

Then I will do as you say, and begin this very day.

You sirs, I said, what are you conspiring about?

We are not conspiring, said Charmides, we have conspired already.

And are you about to use violence, without even going through the forms of justice?

Yes, I shall use violence, he replied, since he orders me; and therefore you had better consider well.

But the time for consideration has passed, I said, when violence is employed; and you, when you are determined on anything, and in the mood of violence, are irresistible.

Do not you resist me then, he said.

I will not resist you, I replied.

LACHES

This early dialogue concerns various characters, including amongst others Socrates and Nicias, a famous general of the time. The group of men hold a discussion regarding the concept of courage and they compete to identify a suitable definition.

Socrates questions the initial purpose of schooling children. Once the group determine that the purpose is to instil virtue, and more specifically courage, Socrates discusses with Laches and Nicias what exactly courage is. The bulk of the dialogue is their discussion of definitions for courage.

Socrates uses a medical analogy to help define goodness: If eyes can be improved by adding sight to them, then a boy's character can be improved by adding goodness to it. As knowledge of what sight is necessary before it can be considered as an improvement, so too it is necessary to have knowledge of what good is before it is used to improve a character. Rather than try to define what the whole of goodness is, Socrates thinks it would be easier to define an aspect of goodness that is relevant to the question; namely bravery.

An Athenian general, possibly Nicias

INTRODUCTION.

Lysimachus, the son of Aristides the Just, and Melesias, the son of the elder Thucydides, two aged men who live together, are desirous of educating their sons in the best manner. Their own education, as often happens with the sons of great men, has been neglected; and they are resolved that their children shall have more care taken of them, than they received themselves at the hands of their fathers.

At their request, Nicias and Laches have accompanied them to see a man named Stesilaus fighting in heavy armour. The two fathers ask the two generals what they think of this exhibition, and whether they would advise that their sons should acquire the accomplishment. Nicias and Laches are quite willing to give their opinion; but they suggest that Socrates should be invited to take part in the consultation. He is a stranger to Lysimachus, but is afterwards recognised as the son of his old friend Sophroniscus, with whom he never had a difference to the hour of his death. Socrates is also known to Nicias, to whom he had introduced the excellent Damon, musician and sophist, as a tutor for his son, and to Laches, who had witnessed his heroic behaviour at the battle of Delium (compare *Symp.*).

Socrates, as he is younger than either Nicias or Laches, prefers to wait until they have delivered their opinions, which they give in a characteristic manner. Nicias, the tactician, is very much in favour of the new art, which he describes as the gymnastics of war — useful when the ranks are formed, and still more useful when they are broken; creating a general interest in military studies, and greatly adding to the appearance of the soldier in the field. Laches, the blunt warrior, is of opinion that such an art is not knowledge, and cannot be of any value, because the Lacedaemonians, those great masters of arms, neglect it. His own experience in actual service has taught him that these pretenders are useless and ridiculous. This man Stesilaus has been seen by him on board ship making a very sorry exhibition of himself. The possession of the art will make the coward rash, and subject the courageous, if he chance to make a slip, to invidious remarks. And now let Socrates be taken into counsel. As they differ he must decide.

Socrates would rather not decide the question by a plurality of votes: in such a serious matter as the education of a friend's children, he would consult the one skilled person who has had masters, and has works to show as evidences of his skill. This is not himself; for he has never been able to pay the sophists for instructing him, and has never had the wit to do or discover anything. But Nicias and Laches are older and richer than he is: they have had teachers, and perhaps have made discoveries; and he would have trusted them entirely, if they had not been diametrically opposed.

Lysimachus here proposes to resign the argument into the hands of the younger part of the company, as he is old, and has a bad memory. He earnestly requests Socrates to remain; — in this showing, as Nicias says, how little he knows the man, who will certainly not go away until he has cross-examined the company about their past lives. Nicias has often submitted to this process; and Laches is quite willing to learn from Socrates, because his actions, in the true Dorian mode, correspond to his words.

Socrates proceeds: We might ask who are our teachers? But a better and more thorough way of examining the question will be to ask, 'What is Virtue?' — or rather, to restrict the enquiry to that part of virtue which is concerned with the use of weapons— 'What is Courage?' Laches thinks that he knows this: (1) 'He is courageous who remains at his post.' But some nations fight flying, after the manner of Aeneas in Homer; or as the heavy-armed Spartans also did at the battle of Plataea. (2) Socrates wants a more general definition, not only of military courage, but of courage of all sorts, tried both amid pleasures and pains. Laches replies that this universal courage is endurance. But courage is a good thing, and mere endurance may be hurtful and injurious. Therefore (3) the element of intelligence must be added. But then again unintelligent endurance may often be more courageous than the intelligent, the bad than the good. How is this contradiction to be solved? Socrates and Laches are not set 'to the Dorian mode' of words and actions; for their words are all confusion, although their actions are courageous. Still they must 'endure' in an argument about endurance. Laches is very willing, and is quite sure that he knows what courage is, if he could only tell.

Nicias is now appealed to; and in reply he offers a definition

which he has heard from Socrates himself, to the effect that (1) 'Courage is intelligence.' Laches derides this; and Socrates enquires, 'What sort of intelligence?' to which Nicias replies, 'Intelligence of things terrible.' 'But every man knows the things to be dreaded in his own art.' 'No they do not. They may predict results, but cannot tell whether they are really terrible; only the courageous man can tell that.' Laches draws the inference that the courageous man is either a soothsayer or a god.

Again, (2) in Nicias' way of speaking, the term 'courageous' must be denied to animals or children, because they do not know the danger. Against this inversion of the ordinary use of language Laches reclaims, but is in some degree mollified by a compliment to his own courage. Still, he does not like to see an Athenian statesman and general descending to sophistries of this sort. Socrates resumes the argument. Courage has been defined to be intelligence or knowledge of the terrible; and courage is not all virtue, but only one of the virtues. The terrible is in the future, and therefore the knowledge of the terrible is a knowledge of the future. But there can be no knowledge of future good or evil separated from a knowledge of the good and evil of the past or present; that is to say, of all good and evil. Courage, therefore, is the knowledge of good and evil generally. But he who has the knowledge of good and evil generally, must not only have courage, but also temperance, justice, and every other virtue. Thus, a single virtue would be the same as all virtues (compare Protagoras). And after all the two generals, and Socrates, the hero of Delium, are still in ignorance of the nature of courage. They must go to school again, boys, old men and all.

Some points of resemblance, and some points of difference, appear in the Laches when compared with the Charmides and Lysis. There is less of poetical and simple beauty, and more of dramatic interest and power. They are richer in the externals of the scene; the Laches has more play and development of character. In the Lysis and Charmides the youths are the central figures, and frequent allusions are made to the place of meeting, which is a palaestra. Here the place of meeting, which is also a palaestra, is quite forgotten, and the boys play a subordinate part. The seance is of old and elder men, of whom Socrates is the youngest.

First is the aged Lysimachus, who may be compared with Cephalus in the Republic, and, like him, withdraws from the argument. Melesias, who is only his shadow, also subsides into silence. Both of them, by their own confession, have been ill-educated, as is further shown by the circumstance that Lysimachus, the friend of Sophroniscus, has never heard of the fame of Socrates, his son; they belong to different circles. In the Meno their want of education in all but the arts of riding and wrestling is adduced as a proof that virtue cannot be taught. The recognition of Socrates by Lysimachus is extremely graceful; and his military exploits naturally connect him with the two generals, of whom one has witnessed them. The characters of Nicias and Laches are indicated by their opinions on the exhibition of the man fighting in heavy armour. The more enlightened Nicias is quite ready to accept the new art, which Laches treats with ridicule, seeming to think that this, or any other military question, may be settled by asking, 'What do the Lacedaemonians say?' The one is the thoughtful general, willing to avail himself of any discovery in the art of war (Aristoph. Aves); the other is the practical man, who relies on his own experience, and is the enemy of innovation; he can act but cannot speak, and is apt to lose his temper. It is to be noted that one of them is supposed to be a hearer of Socrates; the other is only acquainted with his actions. Laches is the admirer of the Dorian mode; and into his mouth the remark is put that there are some persons who, having never been taught, are better than those who have. Like a novice in the art of disputation, he is delighted with the hits of Socrates; and is disposed to be angry with the refinements of Nicias.

In the discussion of the main thesis of the Dialogue— 'What is Courage?' the antagonism of the two characters is still more clearly brought out; and in this, as in the preliminary question, the truth is parted between them. Gradually, and not without difficulty, Laches is made to pass on from the more popular to the more philosophical; it has never occurred to him that there was any other courage than that of the soldier; and only by an effort of the mind can he frame a general notion at all. No sooner has this general notion been formed than it evanesces before the dialectic of Socrates; and Nicias appears from the other side with the Socratic doctrine, that courage is

knowledge. This is explained to mean knowledge of things terrible in the future. But Socrates denies that the knowledge of the future is separable from that of the past and present; in other words, true knowledge is not that of the soothsayer but of the philosopher. And all knowledge will thus be equivalent to all virtue — a position which elsewhere Socrates is not unwilling to admit, but which will not assist us in distinguishing the nature of courage. In this part of the Dialogue the contrast between the mode of cross-examination which is practised by Laches and by Socrates, and also the manner in which the definition of Laches is made to approximate to that of Nicias, are worthy of attention.

Thus, with some intimation of the connexion and unity of virtue and knowledge, we arrive at no distinct result. The two aspects of courage are never harmonized. The knowledge which in the Protagoras is explained as the faculty of estimating pleasures and pains is here lost in an unmeaning and transcendental conception. Yet several true intimations of the nature of courage are allowed to appear: (1) That courage is moral as well as physical: (2) That true courage is inseparable from knowledge, and yet (3) is based on a natural instinct. Laches exhibits one aspect of courage; Nicias the other. The perfect image and harmony of both is only realized in Socrates himself.

The Dialogue offers one among many examples of the freedom with which Plato treats facts. For the scene must be supposed to have occurred between B.C. 424, the year of the battle of Delium, and B.C. 418, the year of the battle of Mantinea, at which Laches fell. But if Socrates was more than seventy years of age at his trial in 399 (see Apology), he could not have been a young man at any time after the battle of Delium.

LACHES

PERSONS OF THE DIALOGUE:

Lysimachus, son of Aristides.

Melesias, son of Thucydides.

Their sons.

Nicias, Laches, Socrates.

LYSIMACHUS: You have seen the exhibition of the man fighting in armour, Nicias and Laches, but we did not tell you at the time the reason why my friend Melesias and I asked you to go with us and see him. I think that we may as well confess what this was, for we certainly ought not to have any reserve with you. The reason was, that we were intending to ask your advice. Some laugh at the very notion of advising others, and when they are asked will not say what they think. They guess at the wishes of the person who asks them, and answer according to his, and not according to their own, opinion. But as we know that you are good judges, and will say exactly what you think, we have taken you into our counsels. The matter about which I am making all this preface is as follows: Melesias and I have two sons; that is his son, and he is named Thucydides, after his grandfather; and this is mine, who is also called after his grandfather, Aristides. Now, we are resolved to take the greatest care of the youths, and not to let them run about as they like, which is too often the way with the young, when they are no longer children, but to begin at once and do the utmost that we can for them. And knowing you to have sons of your own, we thought that you were most likely to have attended to their training and improvement, and, if perchance you have not attended to them, we may remind you that you ought to have done so, and would invite you to assist us in the fulfilment of a common duty. I will tell you, Nicias and Laches, even at the risk of being tedious, how we came to think of this. Melesias and I live together, and our sons live with us; and now, as I was saying at first, we are going to confess to you. Both of us often talk to the lads about the many noble deeds which our own fathers did in war and peace — in the management of the allies, and in the administration of the city;

but neither of us has any deeds of his own which he can show. The truth is that we are ashamed of this contrast being seen by them, and we blame our fathers for letting us be spoiled in the days of our youth, while they were occupied with the concerns of others; and we urge all this upon the lads, pointing out to them that they will not grow up to honour if they are rebellious and take no pains about themselves; but that if they take pains they may, perhaps, become worthy of the names which they bear. They, on their part, promise to comply with our wishes; and our care is to discover what studies or pursuits are likely to be most improving to them. Some one commended to us the art of fighting in armour, which he thought an excellent accomplishment for a young man to learn; and he praised the man whose exhibition you have seen, and told us to go and see him. And we determined that we would go, and get you to accompany us; and we were intending at the same time, if you did not object, to take counsel with you about the education of our sons. That is the matter which we wanted to talk over with you; and we hope that you will give us your opinion about this art of fighting in armour, and about any other studies or pursuits which may or may not be desirable for a young man to learn. Please to say whether you agree to our proposal.

NICIAS: As far as I am concerned, Lysimachus and Melesias, I applaud your purpose, and will gladly assist you; and I believe that you, Laches, will be equally glad.

LACHES: Certainly, Nicias; and I quite approve of the remark which Lysimachus made about his own father and the father of Melesias, and which is applicable, not only to them, but to us, and to every one who is occupied with public affairs. As he says, such persons are too apt to be negligent and careless of their own children and their private concerns. There is much truth in that remark of yours, Lysimachus. But why, instead of consulting us, do you not consult our friend Socrates about the education of the youths? He is of the same deme with you, and is always passing his time in places where the youth have any noble study or pursuit, such as you are enquiring after.

LYSIMACHUS: Why, Laches, has Socrates ever attended to matters of this sort?

LACHES: Certainly, Lysimachus.

NICIAS: That I have the means of knowing as well as Laches; for quite lately he supplied me with a teacher of music for my sons, — Damon, the disciple of Agathocles, who is a most accomplished man in every way, as well as a musician, and a companion of inestimable value for young men at their age.

LYSIMACHUS: Those who have reached my time of life, Socrates and Nicias and Laches, fall out of acquaintance with the young, because they are generally detained at home by old age; but you, O son of Sophroniscus, should let your fellow demesman have the benefit of any advice which you are able to give. Moreover I have a claim upon you as an old friend of your father; for I and he were always companions and friends, and to the hour of his death there never was a difference between us; and now it comes back to me, at the mention of your name, that I have heard these lads talking to one another at home, and often speaking of Socrates in terms of the highest praise; but I have never thought to ask them whether the son of Sophroniscus was the person whom they meant. Tell me, my boys, whether this is the Socrates of whom you have often spoken?

SON: Certainly, father, this is he.

LYSIMACHUS: I am delighted to hear, Socrates, that you maintain the name of your father, who was a most excellent man; and I further rejoice at the prospect of our family ties being renewed.

LACHES: Indeed, Lysimachus, you ought not to give him up; for I can assure you that I have seen him maintaining, not only his father's, but also his country's name. He was my companion in the retreat from Delium, and I can tell you that if others had only been like him, the honour of our country would have been upheld, and the great defeat would never have occurred.

LYSIMACHUS: That is very high praise which is accorded to you,

Socrates, by faithful witnesses and for actions like those which they praise. Let me tell you the pleasure which I feel in hearing of your fame; and I hope that you will regard me as one of your warmest friends. You ought to have visited us long ago, and made yourself at home with us; but now, from this day forward, as we have at last found one another out, do as I say — come and make acquaintance with me, and with these young men, that I may continue your friend, as I was your father's. I shall expect you to do so, and shall venture at some future time to remind you of your duty. But what say you of the matter of which we were beginning to speak — the art of fighting in armour? Is that a practice in which the lads may be advantageously instructed?

SOCRATES: I will endeavour to advise you, Lysimachus, as far as I can in this matter, and also in every way will comply with your wishes; but as I am younger and not so experienced, I think that I ought certainly to hear first what my elders have to say, and to learn of them, and if I have anything to add, then I may venture to give my opinion to them as well as to you. Suppose, Nicias, that one or other of you begin.

NICIAS: I have no objection, Socrates; and my opinion is that the acquirement of this art is in many ways useful to young men. It is an advantage to them that among the favourite amusements of their leisure hours they should have one which tends to improve and not to injure their bodily health. No gymnastics could be better or harder exercise; and this, and the art of riding, are of all arts most befitting to a freeman; for they only who are thus trained in the use of arms are the athletes of our military profession, trained in that on which the conflict turns. Moreover in actual battle, when you have to fight in a line with a number of others, such an acquirement will be of some use, and will be of the greatest whenever the ranks are broken and you have to fight singly, either in pursuit, when you are attacking some one who is defending himself, or in flight, when you have to defend yourself against an assailant. Certainly he who possessed the art could not meet with any harm at the hands of a single person, or perhaps of several; and in any case he would have a great advantage.

Further, this sort of skill inclines a man to the love of other noble lessons; for every man who has learned how to fight in armour will desire to learn the proper arrangement of an army, which is the sequel of the lesson: and when he has learned this, and his ambition is once fired, he will go on to learn the complete art of the general. There is no difficulty in seeing that the knowledge and practice of other military arts will be honourable and valuable to a man; and this lesson may be the beginning of them. Let me add a further advantage, which is by no means a slight one, — that this science will make any man a great deal more valiant and self-possessed in the field. And I will not disdain to mention, what by some may be thought to be a small matter; — he will make a better appearance at the right time; that is to say, at the time when his appearance will strike terror into his enemies. My opinion then, Lysimachus, is, as I say, that the youths should be instructed in this art, and for the reasons which I have given. But Laches may take a different view; and I shall be very glad to hear what he has to say.

LACHES: I should not like to maintain, Nicias, that any kind of knowledge is not to be learned; for all knowledge appears to be a good: and if, as Nicias and as the teachers of the art affirm, this use of arms is really a species of knowledge, then it ought to be learned; but if not, and if those who profess to teach it are deceivers only; or if it be knowledge, but not of a valuable sort, then what is the use of learning it? I say this, because I think that if it had been really valuable, the Lacedaemonians, whose whole life is passed in finding out and practising the arts which give them an advantage over other nations in war, would have discovered this one. And even if they had not, still these professors of the art would certainly not have failed to discover that of all the Hellenes the Lacedaemonians have the greatest interest in such matters, and that a master of the art who was honoured among them would be sure to make his fortune among other nations, just as a tragic poet would who is honoured among ourselves; which is the reason why he who fancies that he can write a tragedy does not go about itinerating in the neighbouring states, but rushes hither straight, and exhibits at Athens; and this is natural. Whereas I perceive that these fighters in armour regard Lacedaemon

as a sacred inviolable territory, which they do not touch with the point of their foot; but they make a circuit of the neighbouring states, and would rather exhibit to any others than to the Spartans; and particularly to those who would themselves acknowledge that they are by no means first-rate in the arts of war. Further, Lysimachus, I have encountered a good many of these gentlemen in actual service, and have taken their measure, which I can give you at once; for none of these masters of fence have ever been distinguished in war, — there has been a sort of fatality about them; while in all other arts the men of note have been always those who have practised the art, they appear to be a most unfortunate exception. For example, this very Stesilaus, whom you and I have just witnessed exhibiting in all that crowd and making such great professions of his powers, I have seen at another time making, in sober truth, an involuntary exhibition of himself, which was a far better spectacle. He was a marine on board a ship which struck a transport vessel, and was armed with a weapon, half spear, half scythe; the singularity of this weapon was worthy of the singularity of the man. To make a long story short, I will only tell you what happened to this notable invention of the scythe spear. He was fighting, and the scythe was caught in the rigging of the other ship, and stuck fast; and he tugged, but was unable to get his weapon free. The two ships were passing one another. He first ran along his own ship holding on to the spear; but as the other ship passed by and drew him after as he was holding on, he let the spear slip through his hand until he retained only the end of the handle. The people in the transport clapped their hands, and laughed at his ridiculous figure; and when some one threw a stone, which fell on the deck at his feet, and he quitted his hold of the scythe-spear, the crew of his own trireme also burst out laughing; they could not refrain when they beheld the weapon waving in the air, suspended from the transport. Now I do not deny that there may be something in such an art, as Nicias asserts, but I tell you my experience; and, as I said at first, whether this be an art of which the advantage is so slight, or not an art at all, but only an imposition, in either case such an acquirement is not worth having. For my opinion is, that if the professor of this art be a coward, he will be likely to become rash, and his character will be only more notorious; or if he be brave, and fail ever so little, other

men will be on the watch, and he will be greatly traduced; for there is a jealousy of such pretenders; and unless a man be pre-eminent in valour, he cannot help being ridiculous, if he says that he has this sort of skill. Such is my judgment, Lysimachus, of the desirableness of this art; but, as I said at first, ask Socrates, and do not let him go until he has given you his opinion of the matter.

LYSIMACHUS: I am going to ask this favour of you, Socrates; as is the more necessary because the two councillors disagree, and some one is in a manner still needed who will decide between them. Had they agreed, no arbiter would have been required. But as Laches has voted one way and Nicias another, I should like to hear with which of our two friends you agree.

SOCRATES: What, Lysimachus, are you going to accept the opinion of the majority?

LYSIMACHUS: Why, yes, Socrates; what else am I to do?

SOCRATES: And would you do so too, Melesias? If you were deliberating about the gymnastic training of your son, would you follow the advice of the majority of us, or the opinion of the one who had been trained and exercised under a skilful master?

MELESIAS: The latter, Socrates; as would surely be reasonable.

SOCRATES: His one vote would be worth more than the vote of all us four?

MELESIAS: Certainly.

SOCRATES: And for this reason, as I imagine, — because a good decision is based on knowledge and not on numbers?

MELESIAS: To be sure.

SOCRATES: Must we not then first of all ask, whether there is any one of us who has knowledge of that about which we are deliberating? If there is, let us take his advice, though he be one only, and not mind the rest; if there is not, let us seek further counsel. Is

this a slight matter about which you and Lysimachus are deliberating? Are you not risking the greatest of your possessions? For children are your riches; and upon their turning out well or ill depends the whole order of their father's house.

MELESIAS: That is true.

SOCRATES: Great care, then, is required in this matter?

MELESIAS: Certainly.

SOCRATES: Suppose, as I was just now saying, that we were considering, or wanting to consider, who was the best trainer. Should we not select him who knew and had practised the art, and had the best teachers?

MELESIAS: I think that we should.

SOCRATES: But would there not arise a prior question about the nature of the art of which we want to find the masters?

MELESIAS: I do not understand.

SOCRATES: Let me try to make my meaning plainer then. I do not think that we have as yet decided what that is about which we are consulting, when we ask which of us is or is not skilled in the art, and has or has not had a teacher of the art.

NICIAS: Why, Socrates, is not the question whether young men ought or ought not to learn the art of fighting in armour?

SOCRATES: Yes, Nicias; but there is also a prior question, which I may illustrate in this way: When a person considers about applying a medicine to the eyes, would you say that he is consulting about the medicine or about the eyes?

NICIAS: About the eyes.

SOCRATES: And when he considers whether he shall set a bridle on a horse and at what time, he is thinking of the horse and not of the bridle?

NICIAS: True.

SOCRATES: And in a word, when he considers anything for the sake of another thing, he thinks of the end and not of the means?

NICIAS: Certainly.

SOCRATES: And when you call in an adviser, you should see whether he too is skilful in the accomplishment of the end which you have in view?

NICIAS: Most true.

SOCRATES: And at present we have in view some knowledge, of which the end is the soul of youth?

NICIAS: Yes.

SOCRATES: And we are enquiring, Which of us is skilful or successful in the treatment of the soul, and which of us has had good teachers?

LACHES: Well but, Socrates; did you never observe that some persons, who have had no teachers, are more skilful than those who have, in some things?

SOCRATES: Yes, Laches, I have observed that; but you would not be very willing to trust them if they only professed to be masters of their art, unless they could show some proof of their skill or excellence in one or more works.

LACHES: That is true.

SOCRATES: And therefore, Laches and Nicias, as Lysimachus and Melesias, in their anxiety to improve the minds of their sons, have asked our advice about them, we too should tell them who our teachers were, if we say that we have had any, and prove them to be in the first place men of merit and experienced trainers of the minds of youth and also to have been really our teachers. Or if any of us says that he has no teacher, but that he has works of his own to show; then he should point out to them what Athenians or strangers, bond

or free, he is generally acknowledged to have improved. But if he can show neither teachers nor works, then he should tell them to look out for others; and not run the risk of spoiling the children of friends, and thereby incurring the most formidable accusation which can be brought against any one by those nearest to him. As for myself, Lysimachus and Melesias, I am the first to confess that I have never had a teacher of the art of virtue; although I have always from my earliest youth desired to have one. But I am too poor to give money to the Sophists, who are the only professors of moral improvement; and to this day I have never been able to discover the art myself, though I should not be surprised if Nicias or Laches may have discovered or learned it; for they are far wealthier than I am, and may therefore have learnt of others. And they are older too; so that they have had more time to make the discovery. And I really believe that they are able to educate a man; for unless they had been confident in their own knowledge, they would never have spoken thus decidedly of the pursuits which are advantageous or hurtful to a young man. I repose confidence in both of them; but I am surprised to find that they differ from one another. And therefore, Lysimachus, as Laches suggested that you should detain me, and not let me go until I answered, I in turn earnestly beseech and advise you to detain Laches and Nicias, and question them. I would have you say to them: Socrates avers that he has no knowledge of the matter — he is unable to decide which of you speaks truly; neither discoverer nor student is he of anything of the kind. But you, Laches and Nicias, should each of you tell us who is the most skilful educator whom you have ever known; and whether you invented the art yourselves, or learned of another; and if you learned, who were your respective teachers, and who were their brothers in the art; and then, if you are too much occupied in politics to teach us yourselves, let us go to them, and present them with gifts, or make interest with them, or both, in the hope that they may be induced to take charge of our children and of yours; and then they will not grow up inferior, and disgrace their ancestors. But if you are yourselves original discoverers in that field, give us some proof of your skill. Who are they who, having been inferior persons, have become under your care good and noble? For if this is your first attempt at education, there is a danger that you

may be trying the experiment, not on the 'vile corpus' of a Carian slave, but on your own sons, or the sons of your friend, and, as the proverb says, 'break the large vessel in learning to make pots.' Tell us then, what qualities you claim or do not claim. Make them tell you that, Lysimachus, and do not let them off.

LYSIMACHUS: I very much approve of the words of Socrates, my friends; but you, Nicias and Laches, must determine whether you will be questioned, and give an explanation about matters of this sort. Assuredly, I and Melesias would be greatly pleased to hear you answer the questions which Socrates asks, if you will: for I began by saying that we took you into our counsels because we thought that you would have attended to the subject, especially as you have children who, like our own, are nearly of an age to be educated. Well, then, if you have no objection, suppose that you take Socrates into partnership; and do you and he ask and answer one another's questions: for, as he has well said, we are deliberating about the most important of our concerns. I hope that you will see fit to comply with our request.

NICIAS: I see very clearly, Lysimachus, that you have only known Socrates' father, and have no acquaintance with Socrates himself: at least, you can only have known him when he was a child, and may have met him among his fellow-wardsmen, in company with his father, at a sacrifice, or at some other gathering. You clearly show that you have never known him since he arrived at manhood.

LYSIMACHUS: Why do you say that, Nicias?

NICIAS: Because you seem not to be aware that any one who has an intellectual affinity to Socrates and enters into conversation with him is liable to be drawn into an argument; and whatever subject he may start, he will be continually carried round and round by him, until at last he finds that he has to give an account both of his present and past life; and when he is once entangled, Socrates will not let him go until he has completely and thoroughly sifted him. Now I am used to his ways; and I know that he will certainly do as I say, and also that I myself shall be the sufferer; for I am fond of his conversation,

Lysimachus. And I think that there is no harm in being reminded of any wrong thing which we are, or have been, doing: he who does not fly from reproof will be sure to take more heed of his after-life; as Solon says, he will wish and desire to be learning so long as he lives, and will not think that old age of itself brings wisdom. To me, to be cross-examined by Socrates is neither unusual nor unpleasant; indeed, I knew all along that where Socrates was, the argument would soon pass from our sons to ourselves; and therefore, I say that for my part, I am quite willing to discourse with Socrates in his own manner; but you had better ask our friend Laches what his feeling may be.

LACHES: I have but one feeling, Nicias, or (shall I say?) two feelings, about discussions. Some would think that I am a lover, and to others I may seem to be a hater of discourse; for when I hear a man discoursing of virtue, or of any sort of wisdom, who is a true man and worthy of his theme, I am delighted beyond measure: and I compare the man and his words, and note the harmony and correspondence of them. And such an one I deem to be the true musician, attuned to a fairer harmony than that of the lyre, or any pleasant instrument of music; for truly he has in his own life a harmony of words and deeds arranged, not in the Ionian, or in the Phrygian mode, nor yet in the Lydian, but in the true Hellenic mode, which is the Dorian, and no other. Such an one makes me merry with the sound of his voice; and when I hear him I am thought to be a lover of discourse; so eager am I in drinking in his words. But a man whose actions do not agree with his words is an annoyance to me; and the better he speaks the more I hate him, and then I seem to be a hater of discourse. As to Socrates, I have no knowledge of his words, but of old, as would seem, I have had experience of his deeds; and his deeds show that free and noble sentiments are natural to him. And if his words accord, then I am of one mind with him, and shall be delighted to be interrogated by a man such as he is, and shall not be annoyed at having to learn of him: for I too agree with Solon, 'that I would fain grow old, learning many things.' But I must be allowed to add 'of the good only.' Socrates must be willing to allow that he is a good teacher, or I shall be a dull and uncongenial pupil: but that the

teacher is younger, or not as yet in repute — anything of that sort is of no account with me. And therefore, Socrates, I give you notice that you may teach and confute me as much as ever you like, and also learn of me anything which I know. So high is the opinion which I have entertained of you ever since the day on which you were my companion in danger, and gave a proof of your valour such as only the man of merit can give. Therefore, say whatever you like, and do not mind about the difference of our ages.

SOCRATES: I cannot say that either of you show any reluctance to take counsel and advise with me.

LYSIMACHUS: But this is our proper business; and yours as well as ours, for I reckon you as one of us. Please then to take my place, and find out from Nicias and Laches what we want to know, for the sake of the youths, and talk and consult with them: for I am old, and my memory is bad; and I do not remember the questions which I am going to ask, or the answers to them; and if there is any interruption I am quite lost. I will therefore beg of you to carry on the proposed discussion by your selves; and I will listen, and Melesias and I will act upon your conclusions.

SOCRATES: Let us, Nicias and Laches, comply with the request of Lysimachus and Melesias. There will be no harm in asking ourselves the question which was first proposed to us: 'Who have been our own instructors in this sort of training, and whom have we made better?' But the other mode of carrying on the enquiry will bring us equally to the same point, and will be more like proceeding from first principles. For if we knew that the addition of something would improve some other thing, and were able to make the addition, then, clearly, we must know how that about which we are advising may be best and most easily attained. Perhaps you do not understand what I mean. Then let me make my meaning plainer in this way. Suppose we knew that the addition of sight makes better the eyes which possess this gift, and also were able to impart sight to the eyes, then, clearly, we should know the nature of sight, and should be able to advise how this gift of sight may be best and most easily attained; but if we knew neither what sight is, nor what hearing is, we should not

be very good medical advisers about the eyes or the ears, or about the best mode of giving sight and hearing to them.

LACHES: That is true, Socrates.

SOCRATES: And are not our two friends, Laches, at this very moment inviting us to consider in what way the gift of virtue may be imparted to their sons for the improvement of their minds?

LACHES: Very true.

SOCRATES: Then must we not first know the nature of virtue? For how can we advise any one about the best mode of attaining something of which we are wholly ignorant?

LACHES: I do not think that we can, Socrates.

SOCRATES: Then, Laches, we may presume that we know the nature of virtue?

LACHES: Yes.

SOCRATES: And that which we know we must surely be able to tell?

LACHES: Certainly.

SOCRATES: I would not have us begin, my friend, with enquiring about the whole of virtue; for that may be more than we can accomplish; let us first consider whether we have a sufficient knowledge of a part; the enquiry will thus probably be made easier to us.

LACHES: Let us do as you say, Socrates.

SOCRATES: Then which of the parts of virtue shall we select? Must we not select that to which the art of fighting in armour is supposed to conduce? And is not that generally thought to be courage?

LACHES: Yes, certainly.

SOCRATES: Then, Laches, suppose that we first set about

determining the nature of courage, and in the second place proceed to enquire how the young men may attain this quality by the help of studies and pursuits. Tell me, if you can, what is courage.

LACHES: Indeed, Socrates, I see no difficulty in answering; he is a man of courage who does not run away, but remains at his post and fights against the enemy; there can be no mistake about that.

SOCRATES: Very good, Laches; and yet I fear that I did not express myself clearly; and therefore you have answered not the question which I intended to ask, but another.

LACHES: What do you mean, Socrates?

SOCRATES: I will endeavour to explain; you would call a man courageous who remains at his post, and fights with the enemy?

LACHES: Certainly I should.

SOCRATES: And so should I; but what would you say of another man, who fights flying, instead of remaining?

LACHES: How flying?

SOCRATES: Why, as the Scythians are said to fight, flying as well as pursuing; and as Homer says in praise of the horses of Aeneas, that they knew 'how to pursue, and fly quickly hither and thither'; and he passes an encomium on Aeneas himself, as having a knowledge of fear or flight, and calls him 'an author of fear or flight.'

LACHES: Yes, Socrates, and there Homer is right: for he was speaking of chariots, as you were speaking of the Scythian cavalry, who have that way of fighting; but the heavy-armed Greek fights, as I say, remaining in his rank.

SOCRATES: And yet, Laches, you must except the Lacedaemonians at Plataea, who, when they came upon the light shields of the Persians, are said not to have been willing to stand and fight, and to have fled; but when the ranks of the Persians were broken, they

turned upon them like cavalry, and won the battle of Plataea.

LACHES: That is true.

SOCRATES: That was my meaning when I said that I was to blame in having put my question badly, and that this was the reason of your answering badly. For I meant to ask you not only about the courage of heavy-armed soldiers, but about the courage of cavalry and every other style of soldier; and not only who are courageous in war, but who are courageous in perils by sea, and who in disease, or in poverty, or again in politics, are courageous; and not only who are courageous against pain or fear, but mighty to contend against desires and pleasures, either fixed in their rank or turning upon their enemy. There is this sort of courage — is there not, Laches?

LACHES: Certainly, Socrates.

SOCRATES: And all these are courageous, but some have courage in pleasures, and some in pains: some in desires, and some in fears, and some are cowards under the same conditions, as I should imagine.

LACHES: Very true.

SOCRATES: Now I was asking about courage and cowardice in general. And I will begin with courage, and once more ask, What is that common quality, which is the same in all these cases, and which is called courage? Do you now understand what I mean?

LACHES: Not over well.

SOCRATES: I mean this: As I might ask what is that quality which is called quickness, and which is found in running, in playing the lyre, in speaking, in learning, and in many other similar actions, or rather which we possess in nearly every action that is worth mentioning of arms, legs, mouth, voice, mind; — would you not apply the term quickness to all of them?

LACHES: Quite true.

SOCRATES: And suppose I were to be asked by some one: What is

that common quality, Socrates, which, in all these uses of the word, you call quickness? I should say the quality which accomplishes much in a little time — whether in running, speaking, or in any other sort of action.

LACHES: You would be quite correct.

SOCRATES: And now, Laches, do you try and tell me in like manner, What is that common quality which is called courage, and which includes all the various uses of the term when applied both to pleasure and pain, and in all the cases to which I was just now referring?

LACHES: I should say that courage is a sort of endurance of the soul, if I am to speak of the universal nature which pervades them all.

SOCRATES: But that is what we must do if we are to answer the question. And yet I cannot say that every kind of endurance is, in my opinion, to be deemed courage. Hear my reason: I am sure, Laches, that you would consider courage to be a very noble quality.

LACHES: Most noble, certainly.

SOCRATES: And you would say that a wise endurance is also good and noble?

LACHES: Very noble.

SOCRATES: But what would you say of a foolish endurance? Is not that, on the other hand, to be regarded as evil and hurtful?

LACHES: True.

SOCRATES: And is anything noble which is evil and hurtful?

LACHES: I ought not to say that, Socrates.

SOCRATES: Then you would not admit that sort of endurance to be courage — for it is not noble, but courage is noble?

LACHES: You are right.

SOCRATES: Then, according to you, only the wise endurance is courage?

LACHES: True.

SOCRATES: But as to the epithet 'wise,' — wise in what? In all things small as well as great? For example, if a man shows the quality of endurance in spending his money wisely, knowing that by spending he will acquire more in the end, do you call him courageous?

LACHES: Assuredly not.

SOCRATES: Or, for example, if a man is a physician, and his son, or some patient of his, has inflammation of the lungs, and begs that he may be allowed to eat or drink something, and the other is firm and refuses; is that courage?

LACHES: No; that is not courage at all, any more than the last.

SOCRATES: Again, take the case of one who endures in war, and is willing to fight, and wisely calculates and knows that others will help him, and that there will be fewer and inferior men against him than there are with him; and suppose that he has also advantages of position; would you say of such a one who endures with all this wisdom and preparation, that he, or some man in the opposing army who is in the opposite circumstances to these and yet endures and remains at his post, is the braver?

LACHES: I should say that the latter, Socrates, was the braver.

SOCRATES: But, surely, this is a foolish endurance in comparison with the other?

LACHES: That is true.

SOCRATES: Then you would say that he who in an engagement of cavalry endures, having the knowledge of horsemanship, is not so courageous as he who endures, having no such knowledge?

LACHES: So I should say.

SOCRATES: And he who endures, having a knowledge of the use of the sling, or the bow, or of any other art, is not so courageous as he who endures, not having such a knowledge?

LACHES: True.

SOCRATES: And he who descends into a well, and dives, and holds out in this or any similar action, having no knowledge of diving, or the like, is, as you would say, more courageous than those who have this knowledge?

LACHES: Why, Socrates, what else can a man say?

SOCRATES: Nothing, if that be what he thinks.

LACHES: But that is what I do think.

SOCRATES: And yet men who thus run risks and endure are foolish, Laches, in comparison of those who do the same things, having the skill to do them.

LACHES: That is true.

SOCRATES: But foolish boldness and endurance appeared before to be base and hurtful to us.

LACHES: Quite true.

SOCRATES: Whereas courage was acknowledged to be a noble quality.

LACHES: True.

SOCRATES: And now on the contrary we are saying that the foolish endurance, which was before held in dishonour, is courage.

LACHES: Very true.

SOCRATES: And are we right in saying so?

LACHES: Indeed, Socrates, I am sure that we are not right.

SOCRATES: Then according to your statement, you and I, Laches,

are not attuned to the Dorian mode, which is a harmony of words and deeds; for our deeds are not in accordance with our words. Any one would say that we had courage who saw us in action, but not, I imagine, he who heard us talking about courage just now.

LACHES: That is most true.

SOCRATES: And is this condition of ours satisfactory?

LACHES: Quite the reverse.

SOCRATES: Suppose, however, that we admit the principle of which we are speaking to a certain extent.

LACHES: To what extent and what principle do you mean?

SOCRATES: The principle of endurance. We too must endure and persevere in the enquiry, and then courage will not laugh at our faint-heartedness in searching for courage; which after all may, very likely, be endurance.

LACHES: I am ready to go on, Socrates; and yet I am unused to investigations of this sort. But the spirit of controversy has been aroused in me by what has been said; and I am really grieved at being thus unable to express my meaning. For I fancy that I do know the nature of courage; but, somehow or other, she has slipped away from me, and I cannot get hold of her and tell her nature.

SOCRATES: But, my dear friend, should not the good sportsman follow the track, and not be lazy?

LACHES: Certainly, he should.

SOCRATES: And shall we invite Nicias to join us? he may be better at the sport than we are. What do you say?

LACHES: I should like that.

SOCRATES: Come then, Nicias, and do what you can to help your friends, who are tossing on the waves of argument, and at the last gasp: you see our extremity, and may save us and also settle your

own opinion, if you will tell us what you think about courage.

NICIAS: I have been thinking, Socrates, that you and Laches are not defining courage in the right way; for you have forgotten an excellent saying which I have heard from your own lips.

SOCRATES: What is it, Nicias?

NICIAS: I have often heard you say that 'Every man is good in that in which he is wise, and bad in that in which he is unwise.'

SOCRATES: That is certainly true, Nicias.

NICIAS: And therefore if the brave man is good, he is also wise.

SOCRATES: Do you hear him, Laches?

LACHES: Yes, I hear him, but I do not very well understand him.

SOCRATES: I think that I understand him; and he appears to me to mean that courage is a sort of wisdom.

LACHES: What can he possibly mean, Socrates?

SOCRATES: That is a question which you must ask of himself.

LACHES: Yes.

SOCRATES: Tell him then, Nicias, what you mean by this wisdom; for you surely do not mean the wisdom which plays the flute?

NICIAS: Certainly not.

SOCRATES: Nor the wisdom which plays the lyre?

NICIAS: No.

SOCRATES: But what is this knowledge then, and of what?

LACHES: I think that you put the question to him very well, Socrates; and I would like him to say what is the nature of this knowledge or wisdom.

NICIAS: I mean to say, Laches, that courage is the knowledge of that which inspires fear or confidence in war, or in anything.

LACHES: How strangely he is talking, Socrates.

SOCRATES: Why do you say so, Laches?

LACHES: Why, surely courage is one thing, and wisdom another.

SOCRATES: That is just what Nicias denies.

LACHES: Yes, that is what he denies; but he is so silly.

SOCRATES: Suppose that we instruct instead of abusing him?

NICIAS: Laches does not want to instruct me, Socrates; but having been proved to be talking nonsense himself, he wants to prove that I have been doing the same.

LACHES: Very true, Nicias; and you are talking nonsense, as I shall endeavour to show. Let me ask you a question: Do not physicians know the dangers of disease? or do the courageous know them? or are the physicians the same as the courageous?

NICIAS: Not at all.

LACHES: No more than the husbandmen who know the dangers of husbandry, or than other craftsmen, who have a knowledge of that which inspires them with fear or confidence in their own arts, and yet they are not courageous a whit the more for that.

SOCRATES: What is Laches saying, Nicias? He appears to be saying something of importance.

NICIAS: Yes, he is saying something, but it is not true.

SOCRATES: How so?

NICIAS: Why, because he does not see that the physician's knowledge only extends to the nature of health and disease: he can tell the sick man no more than this. Do you imagine, Laches, that the physician knows whether health or disease is the more terrible to a

man? Had not many a man better never get up from a sick bed? I should like to know whether you think that life is always better than death. May not death often be the better of the two?

LACHES: Yes certainly so in my opinion.

NICIAS: And do you think that the same things are terrible to those who had better die, and to those who had better live?

LACHES: Certainly not.

NICIAS: And do you suppose that the physician or any other artist knows this, or any one indeed, except he who is skilled in the grounds of fear and hope? And him I call the courageous.

SOCRATES: Do you understand his meaning, Laches?

LACHES: Yes; I suppose that, in his way of speaking, the soothsayers are courageous. For who but one of them can know to whom to die or to live is better? And yet Nicias, would you allow that you are yourself a soothsayer, or are you neither a soothsayer nor courageous?

NICIAS: What! do you mean to say that the soothsayer ought to know the grounds of hope or fear?

LACHES: Indeed I do: who but he?

NICIAS: Much rather I should say he of whom I speak; for the soothsayer ought to know only the signs of things that are about to come to pass, whether death or disease, or loss of property, or victory, or defeat in war, or in any sort of contest; but to whom the suffering or not suffering of these things will be for the best, can no more be decided by the soothsayer than by one who is no soothsayer.

LACHES: I cannot understand what Nicias would be at, Socrates; for he represents the courageous man as neither a soothsayer, nor a physician, nor in any other character, unless he means to say that he is a god. My opinion is that he does not like honestly to confess that he is talking nonsense, but that he shuffles up and down in order to

conceal the difficulty into which he has got himself. You and I, Socrates, might have practised a similar shuffle just now, if we had only wanted to avoid the appearance of inconsistency. And if we had been arguing in a court of law there might have been reason in so doing; but why should a man deck himself out with vain words at a meeting of friends such as this?

SOCRATES: I quite agree with you, Laches, that he should not. But perhaps Nicias is serious, and not merely talking for the sake of talking. Let us ask him just to explain what he means, and if he has reason on his side we will agree with him; if not, we will instruct him.

LACHES: Do you, Socrates, if you like, ask him: I think that I have asked enough.

SOCRATES: I do not see why I should not; and my question will do for both of us.

LACHES: Very good.

SOCRATES: Then tell me, Nicias, or rather tell us, for Laches and I are partners in the argument: Do you mean to affirm that courage is the knowledge of the grounds of hope and fear?

NICIAS: I do.

SOCRATES: And not every man has this knowledge; the physician and the soothsayer have it not; and they will not be courageous unless they acquire it — that is what you were saying?

NICIAS: I was.

SOCRATES: Then this is certainly not a thing which every pig would know, as the proverb says, and therefore he could not be courageous.

NICIAS: I think not.

SOCRATES: Clearly not, Nicias; not even such a big pig as the Crommyonian sow would be called by you courageous. And this I

say not as a joke, but because I think that he who assents to your doctrine, that courage is the knowledge of the grounds of fear and hope, cannot allow that any wild beast is courageous, unless he admits that a lion, or a leopard, or perhaps a boar, or any other animal, has such a degree of wisdom that he knows things which but a few human beings ever know by reason of their difficulty. He who takes your view of courage must affirm that a lion, and a stag, and a bull, and a monkey, have equally little pretensions to courage.

LACHES: Capital, Socrates; by the gods, that is truly good. And I hope, Nicias, that you will tell us whether these animals, which we all admit to be courageous, are really wiser than mankind; or whether you will have the boldness, in the face of universal opinion, to deny their courage.

NICIAS: Why, Laches, I do not call animals or any other things which have no fear of dangers, because they are ignorant of them, courageous, but only fearless and senseless. Do you imagine that I should call little children courageous, which fear no dangers because they know none? There is a difference, to my way of thinking, between fearlessness and courage. I am of opinion that thoughtful courage is a quality possessed by very few, but that rashness and boldness, and fearlessness, which has no forethought, are very common qualities possessed by many men, many women, many children, many animals. And you, and men in general, call by the term 'courageous' actions which I call rash; — my courageous actions are wise actions.

LACHES: Behold, Socrates, how admirably, as he thinks, he dresses himself out in words, while seeking to deprive of the honour of courage those whom all the world acknowledges to be courageous.

NICIAS: Not so, Laches, but do not be alarmed; for I am quite willing to say of you and also of Lamachus, and of many other Athenians, that you are courageous and therefore wise.

LACHES: I could answer that; but I would not have you cast in my teeth that I am a haughty Aexonian.

SOCRATES: Do not answer him, Laches; I rather fancy that you are not aware of the source from which his wisdom is derived. He has got all this from my friend Damon, and Damon is always with Prodicus, who, of all the Sophists, is considered to be the best puller to pieces of words of this sort.

LACHES: Yes, Socrates; and the examination of such niceties is a much more suitable employment for a Sophist than for a great statesman whom the city chooses to preside over her.

SOCRATES: Yes, my sweet friend, but a great statesman is likely to have a great intelligence. And I think that the view which is implied in Nicias' definition of courage is worthy of examination.

LACHES: Then examine for yourself, Socrates.

SOCRATES: That is what I am going to do, my dear friend. Do not, however, suppose I shall let you out of the partnership; for I shall expect you to apply your mind, and join with me in the consideration of the question.

LACHES: I will if you think that I ought.

SOCRATES: Yes, I do; but I must beg of you, Nicias, to begin again. You remember that we originally considered courage to be a part of virtue.

NICIAS: Very true.

SOCRATES: And you yourself said that it was a part; and there were many other parts, all of which taken together are called virtue.

NICIAS: Certainly.

SOCRATES: Do you agree with me about the parts? For I say that justice, temperance, and the like, are all of them parts of virtue as well as courage. Would you not say the same?

NICIAS: Certainly.

SOCRATES: Well then, so far we are agreed. And now let us

proceed a step, and try to arrive at a similar agreement about the fearful and the hopeful: I do not want you to be thinking one thing and myself another. Let me then tell you my own opinion, and if I am wrong you shall set me right: in my opinion the terrible and the hopeful are the things which do or do not create fear, and fear is not of the present, nor of the past, but is of future and expected evil. Do you not agree to that, Laches?

LACHES: Yes, Socrates, entirely.

SOCRATES: That is my view, Nicias; the terrible things, as I should say, are the evils which are future; and the hopeful are the good or not evil things which are future. Do you or do you not agree with me?

NICIAS: I agree.

SOCRATES: And the knowledge of these things you call courage?

NICIAS: Precisely.

SOCRATES: And now let me see whether you agree with Laches and myself as to a third point.

NICIAS: What is that?

SOCRATES: I will tell you. He and I have a notion that there is not one knowledge or science of the past, another of the present, a third of what is likely to be best and what will be best in the future; but that of all three there is one science only: for example, there is one science of medicine which is concerned with the inspection of health equally in all times, present, past, and future; and one science of husbandry in like manner, which is concerned with the productions of the earth in all times. As to the art of the general, you yourselves will be my witnesses that he has an excellent foreknowledge of the future, and that he claims to be the master and not the servant of the soothsayer, because he knows better what is happening or is likely to happen in war: and accordingly the law places the soothsayer under the general, and not the general under the soothsayer. Am I not correct in saying so, Laches?

LACHES: Quite correct.

SOCRATES: And do you, Nicias, also acknowledge that the same science has understanding of the same things, whether future, present, or past?

NICIAS: Yes, indeed Socrates; that is my opinion.

SOCRATES: And courage, my friend, is, as you say, a knowledge of the fearful and of the hopeful?

NICIAS: Yes.

SOCRATES: And the fearful, and the hopeful, are admitted to be future goods and future evils?

NICIAS: True.

SOCRATES: And the same science has to do with the same things in the future or at any time?

NICIAS: That is true.

SOCRATES: Then courage is not the science which is concerned with the fearful and hopeful, for they are future only; courage, like the other sciences, is concerned not only with good and evil of the future, but of the present and past, and of any time?

NICIAS: That, as I suppose, is true.

SOCRATES: Then the answer which you have given, Nicias, includes only a third part of courage; but our question extended to the whole nature of courage: and according to your view, that is, according to your present view, courage is not only the knowledge of the hopeful and the fearful, but seems to include nearly every good and evil without reference to time. What do you say to that alteration in your statement?

NICIAS: I agree, Socrates.

SOCRATES: But then, my dear friend, if a man knew all good and

evil, and how they are, and have been, and will be produced, would he not be perfect, and wanting in no virtue, whether justice, or temperance, or holiness? He would possess them all, and he would know which were dangers and which were not, and guard against them whether they were supernatural or natural; and he would provide the good, as he would know how to deal both with gods or men.

NICIAS: I think, Socrates, that there is a great deal of truth in what you say.

SOCRATES: But then, Nicias, courage, according to this new definition of yours, instead of being a part of virtue only, will be all virtue?

NICIAS: It would seem so.

SOCRATES: But we were saying that courage is one of the parts of virtue?

NICIAS: Yes, that was what we were saying.

SOCRATES: And that is in contradiction with our present view?

NICIAS: That appears to be the case.

SOCRATES: Then, Nicias, we have not discovered what courage is.

NICIAS: We have not.

LACHES: And yet, friend Nicias, I imagined that you would have made the discovery, when you were so contemptuous of the answers which I made to Socrates. I had very great hopes that you would have been enlightened by the wisdom of Damon.

NICIAS: I perceive, Laches, that you think nothing of having displayed your ignorance of the nature of courage, but you look only to see whether I have not made a similar display; and if we are both equally ignorant of the things which a man who is good for anything should know, that, I suppose, will be of no consequence. You certainly appear to me very like the rest of the world, looking at your

neighbour and not at yourself. I am of opinion that enough has been said on the subject which we have been discussing; and if anything has been imperfectly said, that may be hereafter corrected by the help of Damon, whom you think to laugh down, although you have never seen him, and with the help of others. And when I am satisfied myself, I will freely impart my satisfaction to you, for I think that you are very much in want of knowledge.

LACHES: You are a philosopher, Nicias; of that I am aware: nevertheless I would recommend Lysimachus and Melesias not to take you and me as advisers about the education of their children; but, as I said at first, they should ask Socrates and not let him off; if my own sons were old enough, I would have asked him myself.

NICIAS: To that I quite agree, if Socrates is willing to take them under his charge. I should not wish for any one else to be the tutor of Niceratus. But I observe that when I mention the matter to him he recommends to me some other tutor and refuses himself. Perhaps he may be more ready to listen to you, Lysimachus.

LYSIMACHUS: He ought, Nicias: for certainly I would do things for him which I would not do for many others. What do you say, Socrates — will you comply? And are you ready to give assistance in the improvement of the youths?

SOCRATES: Indeed, Lysimachus, I should be very wrong in refusing to aid in the improvement of anybody. And if I had shown in this conversation that I had a knowledge which Nicias and Laches have not, then I admit that you would be right in inviting me to perform this duty; but as we are all in the same perplexity, why should one of us be preferred to another? I certainly think that no one should; and under these circumstances, let me offer you a piece of advice (and this need not go further than ourselves). I maintain, my friends, that every one of us should seek out the best teacher whom he can find, first for ourselves, who are greatly in need of one, and then for the youth, regardless of expense or anything. But I cannot advise that we remain as we are. And if any one laughs at us for going to school at our age, I would quote to them the authority of

Homer, who says, that

‘Modesty is not good for a needy man.’

Let us then, regardless of what may be said of us, make the education of the youths our own education.

LYSIMACHUS: I like your proposal, Socrates; and as I am the oldest, I am also the most eager to go to school with the boys. Let me beg a favour of you: Come to my house to-morrow at dawn, and we will advise about these matters. For the present, let us make an end of the conversation.

SOCRATES: I will come to you to-morrow, Lysimachus, as you propose, God willing.

LYSIS

Translated by Benjamin Jowett

This early dialogue concerns the nature of friendship, featuring Socrates, the boys Lysis and Menexenus who are friends, and Hippothales, who is in unrequited love with Lysis. Throughout the dialogue, Socrates explores the various type of friendship that are ideal.

Bust of Socrates, now housed in the Vatican Museum

INTRODUCTION.

No answer is given in the *Lysis* to the question, 'What is Friendship?' any more than in the *Charmides* to the question, 'What is Temperance?' There are several resemblances in the two Dialogues: the same youthfulness and sense of beauty pervades both of them; they are alike rich in the description of Greek life. The question is again raised of the relation of knowledge to virtue and good, which also recurs in the *Laches*; and Socrates appears again as the elder friend of the two boys, *Lysis* and *Menexenus*. In the *Charmides*, as also in the *Laches*, he is described as middle-aged; in the *Lysis* he is advanced in years.

The Dialogue consists of two scenes or conversations which seem to have no relation to each other. The first is a conversation between Socrates and *Lysis*, who, like *Charmides*, is an Athenian youth of noble descent and of great beauty, goodness, and intelligence: this is carried on in the absence of *Menexenus*, who is called away to take part in a sacrifice. Socrates asks *Lysis* whether his father and mother do not love him very much? 'To be sure they do.' 'Then of course they allow him to do exactly as he likes.' 'Of course not: the very slaves have more liberty than he has.' 'But how is this?' 'The reason is that he is not old enough.' 'No; the real reason is that he is not wise enough: for are there not some things which he is allowed to do, although he is not allowed to do others?' 'Yes, because he knows them, and does not know the others.' This leads to the conclusion that all men everywhere will trust him in what he knows, but not in what he does not know; for in such matters he will be unprofitable to them, and do them no good. And no one will love him, if he does them no good; and he can only do them good by knowledge; and as he is still without knowledge, he can have as yet no conceit of knowledge. In this manner Socrates reads a lesson to *Hippothales*, the foolish lover of *Lysis*, respecting the style of conversation which he should address to his beloved.

After the return of *Menexenus*, Socrates, at the request of *Lysis*, asks him a new question: 'What is friendship? You, *Menexenus*, who have a friend already, can tell me, who am always longing to find

one, what is the secret of this great blessing.'

When one man loves another, which is the friend — he who loves, or he who is loved? Or are both friends? From the first of these suppositions they are driven to the second; and from the second to the third; and neither the two boys nor Socrates are satisfied with any of the three or with all of them. Socrates turns to the poets, who affirm that God brings like to like (Homer), and to philosophers (Empedocles), who also assert that like is the friend of like. But the bad are not friends, for they are not even like themselves, and still less are they like one another. And the good have no need of one another, and therefore do not care about one another. Moreover there are others who say that likeness is a cause of aversion, and unlikeness of love and friendship; and they too adduce the authority of poets and philosophers in support of their doctrines; for Hesiod says that 'potter is jealous of potter, bard of bard;' and subtle doctors tell us that 'moist is the friend of dry, hot of cold,' and the like. But neither can their doctrine be maintained; for then the just would be the friend of the unjust, good of evil.

Thus we arrive at the conclusion that like is not the friend of like, nor unlike of unlike; and therefore good is not the friend of good, nor evil of evil, nor good of evil, nor evil of good. What remains but that the indifferent, which is neither good nor evil, should be the friend (not of the indifferent, for that would be 'like the friend of like,' but) of the good, or rather of the beautiful?

But why should the indifferent have this attachment to the beautiful or good? There are circumstances under which such an attachment would be natural. Suppose the indifferent, say the human body, to be desirous of getting rid of some evil, such as disease, which is not essential but only accidental to it (for if the evil were essential the body would cease to be indifferent, and would become evil) — in such a case the indifferent becomes a friend of the good for the sake of getting rid of the evil. In this intermediate 'indifferent' position the philosopher or lover of wisdom stands: he is not wise, and yet not unwise, but he has ignorance accidentally clinging to him, and he yearns for wisdom as the cure of the evil. (Symp.)

After this explanation has been received with triumphant accord, a fresh dissatisfaction begins to steal over the mind of Socrates: Must

not friendship be for the sake of some ulterior end? and what can that final cause or end of friendship be, other than the good? But the good is desired by us only as the cure of evil; and therefore if there were no evil there would be no friendship. Some other explanation then has to be devised. May not desire be the source of friendship? And desire is of what a man wants and of what is congenial to him. But then the congenial cannot be the same as the like; for like, as has been already shown, cannot be the friend of like. Nor can the congenial be the good; for good is not the friend of good, as has been also shown. The problem is unsolved, and the three friends, Socrates, Lysis, and Menexenus, are still unable to find out what a friend is.

Thus, as in the Charmides and Laches, and several of the other Dialogues of Plato (compare especially the Protagoras and Theaetetus), no conclusion is arrived at. Socrates maintains his character of a 'know nothing;' but the boys have already learned the lesson which he is unable to teach them, and they are free from the conceit of knowledge. (Compare Chrm.) The dialogue is what would be called in the language of Thrasyllus tentative or inquisitive. The subject is continued in the Phaedrus and Symposium, and treated, with a manifest reference to the Lysis, in the eighth and ninth books of the Nicomachean Ethics of Aristotle. As in other writings of Plato (for example, the Republic), there is a progress from unconscious morality, illustrated by the friendship of the two youths, and also by the sayings of the poets ('who are our fathers in wisdom,' and yet only tell us half the truth, and in this particular instance are not much improved upon by the philosophers), to a more comprehensive notion of friendship. This, however, is far from being cleared of its perplexity. Two notions appear to be struggling or balancing in the mind of Socrates: — First, the sense that friendship arises out of human needs and wants; Secondly, that the higher form or ideal of friendship exists only for the sake of the good. That friends are not necessarily either like or unlike, is also a truth confirmed by experience. But the use of the terms 'like' or 'good' is too strictly limited; Socrates has allowed himself to be carried away by a sort of eristic or illogical logic against which no definition of friendship would be able to stand. In the course of the argument he makes a distinction between property and accident which is a real

contribution to the science of logic. Some higher truths appear through the mist. The manner in which the field of argument is widened, as in the Charmides and Laches by the introduction of the idea of knowledge, so here by the introduction of the good, is deserving of attention. The sense of the inter-dependence of good and evil, and the allusion to the possibility of the non-existence of evil, are also very remarkable.

The dialectical interest is fully sustained by the dramatic accompaniments. Observe, first, the scene, which is a Greek Palaestra, at a time when a sacrifice is going on, and the Hermaea are in course of celebration; secondly, the ‘accustomed irony’ of Socrates, who declares, as in the Symposium, that he is ignorant of all other things, but claims to have a knowledge of the mysteries of love. There are likewise several contrasts of character; first of the dry, caustic Ctesippus, of whom Socrates professes a humorous sort of fear, and Hippothales the flighty lover, who murders sleep by bawling out the name of his beloved; there is also a contrast between the false, exaggerated, sentimental love of Hippothales towards Lysis, and the childlike and innocent friendship of the boys with one another. Some difference appears to be intended between the characters of the more talkative Menexenus and the reserved and simple Lysis. Socrates draws out the latter by a new sort of irony, which is sometimes adopted in talking to children, and consists in asking a leading question which can only be answered in a sense contrary to the intention of the question: ‘Your father and mother of course allow you to drive the chariot?’ ‘No they do not.’ When Menexenus returns, the serious dialectic begins. He is described as ‘very pugnacious,’ and we are thus prepared for the part which a mere youth takes in a difficult argument. But Plato has not forgotten dramatic propriety, and Socrates proposes at last to refer the question to some older person.

SOME QUESTIONS RELATING TO FRIENDSHIP.

The subject of friendship has a lower place in the modern than in the ancient world, partly because a higher place is assigned by us to love and marriage. The very meaning of the word has become slighter and more superficial; it seems almost to be borrowed from the ancients, and has nearly disappeared in modern treatises on Moral

Philosophy. The received examples of friendship are to be found chiefly among the Greeks and Romans. Hence the casuistical or other questions which arise out of the relations of friends have not often been considered seriously in modern times. Many of them will be found to be the same which are discussed in the *Lysis*. We may ask with Socrates, 1) whether friendship is 'of similars or dissimilars,' or of both; 2) whether such a tie exists between the good only and for the sake of the good; or 3) whether there may not be some peculiar attraction, which draws together 'the neither good nor evil' for the sake of the good and because of the evil; 4) whether friendship is always mutual, — may there not be a one-sided and unrequited friendship? This question, which, like many others, is only one of a laxer or stricter use of words, seems to have greatly exercised the minds both of Aristotle and Plato.

5) Can we expect friendship to be permanent, or must we acknowledge with Cicero, '*Nihil difficilius quam amicitiam usque ad extremum vitae permanere*'? Is not friendship, even more than love, liable to be swayed by the caprices of fancy? The person who pleased us most at first sight or upon a slight acquaintance, when we have seen him again, and under different circumstances, may make a much less favourable impression on our minds. Young people swear 'eternal friendships,' but at these innocent perjuries their elders laugh. No one forms a friendship with the intention of renouncing it; yet in the course of a varied life it is practically certain that many changes will occur of feeling, opinion, locality, occupation, fortune, which will divide us from some persons and unite us to others. 6) There is an ancient saying, *Qui amicos amicum non habet*. But is not some less exclusive form of friendship better suited to the condition and nature of man? And in those especially who have no family ties, may not the feeling pass beyond one or a few, and embrace all with whom we come into contact, and, perhaps in a few passionate and exalted natures, all men everywhere? 7) The ancients had their three kinds of friendship, 'for the sake of the pleasant, the useful, and the good:' is the last to be resolved into the two first; or are the two first to be included in the last? The subject was puzzling to them: they could not say that friendship was only a quality, or a relation, or a virtue, or a kind of virtue; and they had not in the age of Plato

reached the point of regarding it, like justice, as a form or attribute of virtue. They had another perplexity: 8) How could one of the noblest feelings of human nature be so near to one of the most detestable corruptions of it? (Compare Symposium; Laws).

Leaving the Greek or ancient point of view, we may regard the question in a more general way. Friendship is the union of two persons in mutual affection and remembrance of one another. The friend can do for his friend what he cannot do for himself. He can give him counsel in time of difficulty; he can teach him 'to see himself as others see him'; he can stand by him, when all the world are against him; he can gladden and enlighten him by his presence; he 'can divide his sorrows,' he can 'double his joys;' he can anticipate his wants. He will discover ways of helping him without creating a sense of his own superiority; he will find out his mental trials, but only that he may minister to them. Among true friends jealousy has no place: they do not complain of one another for making new friends, or for not revealing some secret of their lives; (in friendship too there must be reserves;) they do not intrude upon one another, and they mutually rejoice in any good which happens to either of them, though it may be to the loss of the other. They may live apart and have little intercourse, but when they meet, the old tie is as strong as ever — according to the common saying, they find one another always the same. The greatest good of friendship is not daily intercourse, for circumstances rarely admit of this; but on the great occasions of life, when the advice of a friend is needed, then the word spoken in season about conduct, about health, about marriage, about business, — the letter written from a distance by a disinterested person who sees with clearer eyes may be of inestimable value. When the heart is failing and despair is setting in, then to hear the voice or grasp the hand of a friend, in a shipwreck, in a defeat, in some other failure or misfortune, may restore the necessary courage and composure to the paralysed and disordered mind, and convert the feeble person into a hero; (compare Symposium).

It is true that friendships are apt to be disappointing: either we expect too much from them; or we are indolent and do not 'keep them in repair;' or being admitted to intimacy with another, we see

his faults too clearly and lose our respect for him; and he loses his affection for us. Friendships may be too violent; and they may be too sensitive. The egotism of one of the parties may be too much for the other. The word of counsel or sympathy has been uttered too obtrusively, at the wrong time, or in the wrong manner; or the need of it has not been perceived until too late. 'Oh if he had only told me' has been the silent thought of many a troubled soul. And some things have to be indicated rather than spoken, because the very mention of them tends to disturb the equability of friendship. The alienation of friends, like many other human evils, is commonly due to a want of tact and insight. There is not enough of the *Scimus et hanc veniam petimusque damusque vicissim*. The sweet draught of sympathy is not inexhaustible; and it tends to weaken the person who too freely partakes of it. Thus we see that there are many causes which impair the happiness of friends.

We may expect a friendship almost divine, such as philosophers have sometimes dreamed of: we find what is human. The good of it is necessarily limited; it does not take the place of marriage; it affords rather a solace than an arm of support. It had better not be based on pecuniary obligations; these more often mar than make a friendship. It is most likely to be permanent when the two friends are equal and independent, or when they are engaged together in some common work or have some public interest in common. It exists among the bad or inferior sort of men almost as much as among the good; the bad and good, and 'the neither bad nor good,' are drawn together in a strange manner by personal attachment. The essence of it is loyalty, without which it would cease to be friendship.

Another question 9) may be raised, whether friendship can safely exist between young persons of different sexes, not connected by ties of relationship, and without the thought of love or marriage; whether, again, a wife or a husband should have any intimate friend, besides his or her partner in marriage. The answer to this latter question is rather perplexing, and would probably be different in different countries (compare *Sympos.*). While we do not deny that great good may result from such attachments, for the mind may be drawn out and the character enlarged by them; yet we feel also that they are attended with many dangers, and that this Romance of Heavenly

Love requires a strength, a freedom from passion, a self-control, which, in youth especially, are rarely to be found. The propriety of such friendships must be estimated a good deal by the manner in which public opinion regards them; they must be reconciled with the ordinary duties of life; and they must be justified by the result.

Yet another question, 10). Admitting that friendships cannot be always permanent, we may ask when and upon what conditions should they be dissolved. It would be futile to retain the name when the reality has ceased to be. That two friends should part company whenever the relation between them begins to drag may be better for both of them. But then arises the consideration, how should these friends in youth or friends of the past regard or be regarded by one another? They are parted, but there still remain duties mutually owing by them. They will not admit the world to share in their difference any more than in their friendship; the memory of an old attachment, like the memory of the dead, has a kind of sacredness for them on which they will not allow others to intrude. Neither, if they were ever worthy to bear the name of friends, will either of them entertain any enmity or dislike of the other who was once so much to him. Neither will he by 'shadowed hint reveal' the secrets great or small which an unfortunate mistake has placed within his reach. He who is of a noble mind will dwell upon his own faults rather than those of another, and will be ready to take upon himself the blame of their separation. He will feel pain at the loss of a friend; and he will remember with gratitude his ancient kindness. But he will not lightly renew a tie which has not been lightly broken...These are a few of the Problems of Friendship, some of them suggested by the *Lysis*, others by modern life, which he who wishes to make or keep a friend may profitably study. (Compare Bacon, *Essay on Friendship*; Cic. *de Amicitia*.)

LYSIS.

PERSONS OF THE DIALOGUE:

Socrates, who is the narrator, Menexenus, Hippothales, Lysis, Ctesippus.

SCENE: A newly-erected Palaestra outside the walls of Athens.

I was going from the Academy straight to the Lyceum, intending to take the outer road, which is close under the wall. When I came to the postern gate of the city, which is by the fountain of Panops, I fell in with Hippothales, the son of Hieronymus, and Ctesippus the Paeanian, and a company of young men who were standing with them. Hippothales, seeing me approach, asked whence I came and whither I was going.

I am going, I replied, from the Academy straight to the Lyceum.

Then come straight to us, he said, and put in here; you may as well.

Who are you, I said; and where am I to come?

He showed me an enclosed space and an open door over against the wall. And there, he said, is the building at which we all meet: and a goodly company we are.

And what is this building, I asked; and what sort of entertainment have you?

The building, he replied, is a newly erected Palaestra; and the entertainment is generally conversation, to which you are welcome.

Thank you, I said; and is there any teacher there?

Yes, he said, your old friend and admirer, Miccus.

Indeed, I replied; he is a very eminent professor.

Are you disposed, he said, to go with me and see them?

Yes, I said; but I should like to know first, what is expected of me, and who is the favourite among you?

Some persons have one favourite, Socrates, and some another, he said.

And who is yours? I asked: tell me that, Hippothales.

At this he blushed; and I said to him, O Hippothales, thou son of

Hieronymus! do not say that you are, or that you are not, in love; the confession is too late; for I see that you are not only in love, but are already far gone in your love. Simple and foolish as I am, the Gods have given me the power of understanding affections of this kind.

Whereupon he blushed more and more.

Ctesippus said: I like to see you blushing, Hippothales, and hesitating to tell Socrates the name; when, if he were with you but for a very short time, you would have plagued him to death by talking about nothing else. Indeed, Socrates, he has literally deafened us, and stopped our ears with the praises of Lysis; and if he is a little intoxicated, there is every likelihood that we may have our sleep murdered with a cry of Lysis. His performances in prose are bad enough, but nothing at all in comparison with his verse; and when he drenches us with his poems and other compositions, it is really too bad; and worse still is his manner of singing them to his love; he has a voice which is truly appalling, and we cannot help hearing him: and now having a question put to him by you, behold he is blushing.

Who is Lysis? I said: I suppose that he must be young; for the name does not recall any one to me.

Why, he said, his father being a very well-known man, he retains his patronymic, and is not as yet commonly called by his own name; but, although you do not know his name, I am sure that you must know his face, for that is quite enough to distinguish him.

But tell me whose son he is, I said.

He is the eldest son of Democrates, of the deme of Aexone.

Ah, Hippothales, I said; what a noble and really perfect love you have found! I wish that you would favour me with the exhibition which you have been making to the rest of the company, and then I shall be able to judge whether you know what a lover ought to say about his love, either to the youth himself, or to others.

Nay, Socrates, he said; you surely do not attach any importance to what he is saying.

Do you mean, I said, that you disown the love of the person whom he says that you love?

No; but I deny that I make verses or address compositions to him.

He is not in his right mind, said Ctesippus; he is talking nonsense, and is stark mad.

O Hippothales, I said, if you have ever made any verses or songs in honour of your favourite, I do not want to hear them; but I want to know the purport of them, that I may be able to judge of your mode of approaching your fair one.

Ctesippus will be able to tell you, he said; for if, as he avers, the sound of my words is always dinning in his ears, he must have a very accurate knowledge and recollection of them.

Yes, indeed, said Ctesippus; I know only too well; and very ridiculous the tale is: for although he is a lover, and very devotedly in love, he has nothing particular to talk about to his beloved which a child might not say. Now is not that ridiculous? He can only speak of the wealth of Democrates, which the whole city celebrates, and grandfather Lysis, and the other ancestors of the youth, and their stud of horses, and their victory at the Pythian games, and at the Isthmus, and at Nemea with four horses and single horses — these are the tales which he composes and repeats. And there is greater twaddle still. Only the day before yesterday he made a poem in which he described the entertainment of Heracles, who was a connexion of the family, setting forth how in virtue of this relationship he was hospitably received by an ancestor of Lysis; this ancestor was himself begotten of Zeus by the daughter of the founder of the deme. And these are the sort of old wives' tales which he sings and recites to us, and we are obliged to listen to him.

When I heard this, I said: O ridiculous Hippothales! how can you be making and singing hymns in honour of yourself before you have won?

But my songs and verses, he said, are not in honour of myself, Socrates.

You think not? I said.

Nay, but what do you think? he replied.

Most assuredly, I said, those songs are all in your own honour; for if you win your beautiful love, your discourses and songs will be a glory to you, and may be truly regarded as hymns of praise composed in honour of you who have conquered and won such a love; but if he slips away from you, the more you have praised him, the more ridiculous you will look at having lost this fairest and best of blessings; and therefore the wise lover does not praise his beloved

until he has won him, because he is afraid of accidents. There is also another danger; the fair, when any one praises or magnifies them, are filled with the spirit of pride and vain-glory. Do you not agree with me?

Yes, he said.

And the more vain-glorious they are, the more difficult is the capture of them?

I believe you.

What should you say of a hunter who frightened away his prey, and made the capture of the animals which he is hunting more difficult?

He would be a bad hunter, undoubtedly.

Yes; and if, instead of soothing them, he were to infuriate them with words and songs, that would show a great want of wit: do you not agree.

Yes.

And now reflect, Hippothales, and see whether you are not guilty of all these errors in writing poetry. For I can hardly suppose that you will affirm a man to be a good poet who injures himself by his poetry.

Assuredly not, he said; such a poet would be a fool. And this is the reason why I take you into my counsels, Socrates, and I shall be glad of any further advice which you may have to offer. Will you tell me by what words or actions I may become endeared to my love?

That is not easy to determine, I said; but if you will bring your love to me, and will let me talk with him, I may perhaps be able to show you how to converse with him, instead of singing and reciting in the fashion of which you are accused.

There will be no difficulty in bringing him, he replied; if you will only go with Ctesippus into the Palaestra, and sit down and talk, I believe that he will come of his own accord; for he is fond of listening, Socrates. And as this is the festival of the Hermaea, the young men and boys are all together, and there is no separation between them. He will be sure to come: but if he does not, Ctesippus with whom he is familiar, and whose relation Menexenus is his great friend, shall call him.

That will be the way, I said. Thereupon I led Ctesippus into the

Palaestra, and the rest followed.

Upon entering we found that the boys had just been sacrificing; and this part of the festival was nearly at an end. They were all in their white array, and games at dice were going on among them. Most of them were in the outer court amusing themselves; but some were in a corner of the Apodyterium playing at odd and even with a number of dice, which they took out of little wicker baskets. There was also a circle of lookers-on; among them was Lysis. He was standing with the other boys and youths, having a crown upon his head, like a fair vision, and not less worthy of praise for his goodness than for his beauty. We left them, and went over to the opposite side of the room, where, finding a quiet place, we sat down; and then we began to talk. This attracted Lysis, who was constantly turning round to look at us — he was evidently wanting to come to us. For a time he hesitated and had not the courage to come alone; but first of all, his friend Menexenus, leaving his play, entered the Palaestra from the court, and when he saw Ctesippus and myself, was going to take a seat by us; and then Lysis, seeing him, followed, and sat down by his side; and the other boys joined. I should observe that Hippothales, when he saw the crowd, got behind them, where he thought that he would be out of sight of Lysis, lest he should anger him; and there he stood and listened.

I turned to Menexenus, and said: Son of Demophon, which of you two youths is the elder?

That is a matter of dispute between us, he said.

And which is the nobler? Is that also a matter of dispute?

Yes, certainly.

And another disputed point is, which is the fairer?

The two boys laughed.

I shall not ask which is the richer of the two, I said; for you are friends, are you not?

Certainly, they replied.

And friends have all things in common, so that one of you can be no richer than the other, if you say truly that you are friends.

They assented. I was about to ask which was the juster of the two, and which was the wiser of the two; but at this moment Menexenus was called away by some one who came and said that the gymnastic-

master wanted him. I supposed that he had to offer sacrifice. So he went away, and I asked Lysis some more questions. I dare say, Lysis, I said, that your father and mother love you very much.

Certainly, he said.

And they would wish you to be perfectly happy.

Yes.

But do you think that any one is happy who is in the condition of a slave, and who cannot do what he likes?

I should think not indeed, he said.

And if your father and mother love you, and desire that you should be happy, no one can doubt that they are very ready to promote your happiness.

Certainly, he replied.

And do they then permit you to do what you like, and never rebuke you or hinder you from doing what you desire?

Yes, indeed, Socrates; there are a great many things which they hinder me from doing.

What do you mean? I said. Do they want you to be happy, and yet hinder you from doing what you like? for example, if you want to mount one of your father's chariots, and take the reins at a race, they will not allow you to do so — they will prevent you?

Certainly, he said, they will not allow me to do so.

Whom then will they allow?

There is a charioteer, whom my father pays for driving.

And do they trust a hireling more than you? and may he do what he likes with the horses? and do they pay him for this?

They do.

But I dare say that you may take the whip and guide the mule-cart if you like; — they will permit that?

Permit me! indeed they will not.

Then, I said, may no one use the whip to the mules?

Yes, he said, the muleteer.

And is he a slave or a free man?

A slave, he said.

And do they esteem a slave of more value than you who are their son? And do they entrust their property to him rather than to you? and allow him to do what he likes, when they prohibit you? Answer

me now: Are you your own master, or do they not even allow that?

Nay, he said; of course they do not allow it.

Then you have a master?

Yes, my tutor; there he is.

And is he a slave?

To be sure; he is our slave, he replied.

Surely, I said, this is a strange thing, that a free man should be governed by a slave. And what does he do with you?

He takes me to my teachers.

You do not mean to say that your teachers also rule over you?

Of course they do.

Then I must say that your father is pleased to inflict many lords and masters on you. But at any rate when you go home to your mother, she will let you have your own way, and will not interfere with your happiness; her wool, or the piece of cloth which she is weaving, are at your disposal: I am sure that there is nothing to hinder you from touching her wooden spathe, or her comb, or any other of her spinning implements.

Nay, Socrates, he replied, laughing; not only does she hinder me, but I should be beaten if I were to touch one of them.

Well, I said, this is amazing. And did you ever behave ill to your father or your mother?

No, indeed, he replied.

But why then are they so terribly anxious to prevent you from being happy, and doing as you like? — keeping you all day long in subjection to another, and, in a word, doing nothing which you desire; so that you have no good, as would appear, out of their great possessions, which are under the control of anybody rather than of you, and have no use of your own fair person, which is tended and taken care of by another; while you, Lysis, are master of nobody, and can do nothing?

Why, he said, Socrates, the reason is that I am not of age.

I doubt whether that is the real reason, I said; for I should imagine that your father Democrates, and your mother, do permit you to do many things already, and do not wait until you are of age: for example, if they want anything read or written, you, I presume, would be the first person in the house who is summoned by them.

Very true.

And you would be allowed to write or read the letters in any order which you please, or to take up the lyre and tune the notes, and play with the fingers, or strike with the plectrum, exactly as you please, and neither father nor mother would interfere with you.

That is true, he said.

Then what can be the reason, Lysis, I said, why they allow you to do the one and not the other?

I suppose, he said, because I understand the one, and not the other.

Yes, my dear youth, I said, the reason is not any deficiency of years, but a deficiency of knowledge; and whenever your father thinks that you are wiser than he is, he will instantly commit himself and his possessions to you.

I think so.

Aye, I said; and about your neighbour, too, does not the same rule hold as about your father? If he is satisfied that you know more of housekeeping than he does, will he continue to administer his affairs himself, or will he commit them to you?

I think that he will commit them to me.

Will not the Athenian people, too, entrust their affairs to you when they see that you have wisdom enough to manage them?

Yes.

And oh! let me put another case, I said: There is the great king, and he has an eldest son, who is the Prince of Asia; — suppose that you and I go to him and establish to his satisfaction that we are better cooks than his son, will he not entrust to us the prerogative of making soup, and putting in anything that we like while the pot is boiling, rather than to the Prince of Asia, who is his son?

To us, clearly.

And we shall be allowed to throw in salt by handfuls, whereas the son will not be allowed to put in as much as he can take up between his fingers?

Of course.

Or suppose again that the son has bad eyes, will he allow him, or will he not allow him, to touch his own eyes if he thinks that he has no knowledge of medicine?

He will not allow him.

Whereas, if he supposes us to have a knowledge of medicine, he will allow us to do what we like with him — even to open the eyes wide and sprinkle ashes upon them, because he supposes that we know what is best?

That is true.

And everything in which we appear to him to be wiser than himself or his son he will commit to us?

That is very true, Socrates, he replied.

Then now, my dear Lysis, I said, you perceive that in things which we know every one will trust us, — Hellenes and barbarians, men and women, — and we may do as we please about them, and no one will like to interfere with us; we shall be free, and masters of others; and these things will be really ours, for we shall be benefited by them. But in things of which we have no understanding, no one will trust us to do as seems good to us — they will hinder us as far as they can; and not only strangers, but father and mother, and the friend, if there be one, who is dearer still, will also hinder us; and we shall be subject to others; and these things will not be ours, for we shall not be benefited by them. Do you agree?

He assented.

And shall we be friends to others, and will any others love us, in as far as we are useless to them?

Certainly not.

Neither can your father or mother love you, nor can anybody love anybody else, in so far as they are useless to them?

No.

And therefore, my boy, if you are wise, all men will be your friends and kindred, for you will be useful and good; but if you are not wise, neither father, nor mother, nor kindred, nor any one else, will be your friends. And in matters of which you have as yet no knowledge, can you have any conceit of knowledge?

That is impossible, he replied.

And you, Lysis, if you require a teacher, have not yet attained to wisdom.

True.

And therefore you are not conceited, having nothing of which to be conceited.

Indeed, Socrates, I think not.

When I heard him say this, I turned to Hippothales, and was very nearly making a blunder, for I was going to say to him: That is the way, Hippothales, in which you should talk to your beloved, humbling and lowering him, and not as you do, puffing him up and spoiling him. But I saw that he was in great excitement and confusion at what had been said, and I remembered that, although he was in the neighbourhood, he did not want to be seen by Lysis; so upon second thoughts I refrained.

In the meantime Menexenus came back and sat down in his place by Lysis; and Lysis, in a childish and affectionate manner, whispered privately in my ear, so that Menexenus should not hear: Do, Socrates, tell Menexenus what you have been telling me.

Suppose that you tell him yourself, Lysis, I replied; for I am sure that you were attending.

Certainly, he replied.

Try, then, to remember the words, and be as exact as you can in repeating them to him, and if you have forgotten anything, ask me again the next time that you see me.

I will be sure to do so, Socrates; but go on telling him something new, and let me hear, as long as I am allowed to stay.

I certainly cannot refuse, I said, since you ask me; but then, as you know, Menexenus is very pugnacious, and therefore you must come to the rescue if he attempts to upset me.

Yes, indeed, he said; he is very pugnacious, and that is the reason why I want you to argue with him.

That I may make a fool of myself?

No, indeed, he said; but I want you to put him down.

That is no easy matter, I replied; for he is a terrible fellow — a pupil of Ctesippus. And there is Ctesippus himself: do you see him?

Never mind, Socrates, you shall argue with him.

Well, I suppose that I must, I replied.

Hereupon Ctesippus complained that we were talking in secret, and keeping the feast to ourselves.

I shall be happy, I said, to let you have a share. Here is Lysis, who does not understand something that I was saying, and wants me to ask Menexenus, who, as he thinks, is likely to know.

And why do you not ask him? he said.

Very well, I said, I will; and do you, Menexenus, answer. But first I must tell you that I am one who from my childhood upward have set my heart upon a certain thing. All people have their fancies; some desire horses, and others dogs; and some are fond of gold, and others of honour. Now, I have no violent desire of any of these things; but I have a passion for friends; and I would rather have a good friend than the best cock or quail in the world: I would even go further, and say the best horse or dog. Yea, by the dog of Egypt, I should greatly prefer a real friend to all the gold of Darius, or even to Darius himself: I am such a lover of friends as that. And when I see you and Lysis, at your early age, so easily possessed of this treasure, and so soon, he of you, and you of him, I am amazed and delighted, seeing that I myself, although I am now advanced in years, am so far from having made a similar acquisition, that I do not even know in what way a friend is acquired. But I want to ask you a question about this, for you have experience: tell me then, when one loves another, is the lover or the beloved the friend; or may either be the friend?

Either may, I should think, be the friend of either.

Do you mean, I said, that if only one of them loves the other, they are mutual friends?

Yes, he said; that is my meaning.

But what if the lover is not loved in return? which is a very possible case.

Yes.

Or is, perhaps, even hated? which is a fancy which sometimes is entertained by lovers respecting their beloved. Nothing can exceed their love; and yet they imagine either that they are not loved in return, or that they are hated. Is not that true?

Yes, he said, quite true.

In that case, the one loves, and the other is loved?

Yes.

Then which is the friend of which? Is the lover the friend of the beloved, whether he be loved in return, or hated; or is the beloved the friend; or is there no friendship at all on either side, unless they both love one another?

There would seem to be none at all.

Then this notion is not in accordance with our previous one. We were saying that both were friends, if one only loved; but now, unless they both love, neither is a friend.

That appears to be true.

Then nothing which does not love in return is beloved by a lover?

I think not.

Then they are not lovers of horses, whom the horses do not love in return; nor lovers of quails, nor of dogs, nor of wine, nor of gymnastic exercises, who have no return of love; no, nor of wisdom, unless wisdom loves them in return. Or shall we say that they do love them, although they are not beloved by them; and that the poet was wrong who sings —

‘Happy the man to whom his children are dear, and steeds having single hoofs, and dogs of chase, and the stranger of another land’?

I do not think that he was wrong.

You think that he is right?

Yes.

Then, Menexenus, the conclusion is, that what is beloved, whether loving or hating, may be dear to the lover of it: for example, very young children, too young to love, or even hating their father or mother when they are punished by them, are never dearer to them than at the time when they are being hated by them.

I think that what you say is true.

And, if so, not the lover, but the beloved, is the friend or dear one?

Yes.

And the hated one, and not the hater, is the enemy?

Clearly.

Then many men are loved by their enemies, and hated by their friends, and are the friends of their enemies, and the enemies of their friends. Yet how absurd, my dear friend, or indeed impossible is this paradox of a man being an enemy to his friend or a friend to his enemy.

I quite agree, Socrates, in what you say.

But if this cannot be, the lover will be the friend of that which is loved?

True.

And the hater will be the enemy of that which is hated?

Certainly.

Yet we must acknowledge in this, as in the preceding instance, that a man may be the friend of one who is not his friend, or who may be his enemy, when he loves that which does not love him or which even hates him. And he may be the enemy of one who is not his enemy, and is even his friend: for example, when he hates that which does not hate him, or which even loves him.

That appears to be true.

But if the lover is not a friend, nor the beloved a friend, nor both together, what are we to say? Whom are we to call friends to one another? Do any remain?

Indeed, Socrates, I cannot find any.

But, O Menexenus! I said, may we not have been altogether wrong in our conclusions?

I am sure that we have been wrong, Socrates, said Lysis. And he blushed as he spoke, the words seeming to come from his lips involuntarily, because his whole mind was taken up with the argument; there was no mistaking his attentive look while he was listening.

I was pleased at the interest which was shown by Lysis, and I wanted to give Menexenus a rest, so I turned to him and said, I think, Lysis, that what you say is true, and that, if we had been right, we should never have gone so far wrong; let us proceed no further in this direction (for the road seems to be getting troublesome), but take the other path into which we turned, and see what the poets have to say; for they are to us in a manner the fathers and authors of wisdom, and they speak of friends in no light or trivial manner, but God himself, as they say, makes them and draws them to one another; and this they express, if I am not mistaken, in the following words: —

‘God is ever drawing like towards like, and making them acquainted.’

I dare say that you have heard those words.

Yes, he said; I have.

And have you not also met with the treatises of philosophers who say that like must love like? they are the people who argue and write about nature and the universe.

Very true, he replied.

And are they right in saying this?

They may be.

Perhaps, I said, about half, or possibly, altogether, right, if their meaning were rightly apprehended by us. For the more a bad man has to do with a bad man, and the more nearly he is brought into contact with him, the more he will be likely to hate him, for he injures him; and injurer and injured cannot be friends. Is not that true?

Yes, he said.

Then one half of the saying is untrue, if the wicked are like one another?

That is true.

But the real meaning of the saying, as I imagine, is, that the good are like one another, and friends to one another; and that the bad, as is often said of them, are never at unity with one another or with themselves; for they are passionate and restless, and anything which is at variance and enmity with itself is not likely to be in union or harmony with any other thing. Do you not agree?

Yes, I do.

Then, my friend, those who say that the like is friendly to the like mean to intimate, if I rightly apprehend them, that the good only is the friend of the good, and of him only; but that the evil never attains to any real friendship, either with good or evil. Do you agree?

He nodded assent.

Then now we know how to answer the question ‘Who are friends?’ for the argument declares ‘That the good are friends.’

Yes, he said, that is true.

Yes, I replied; and yet I am not quite satisfied with this answer. By heaven, and shall I tell you what I suspect? I will. Assuming that like, inasmuch as he is like, is the friend of like, and useful to him — or rather let me try another way of putting the matter: Can like do any good or harm to like which he could not do to himself, or suffer anything from his like which he would not suffer from himself? And if neither can be of any use to the other, how can they be loved by one another? Can they now?

They cannot.

And can he who is not loved be a friend?

Certainly not.

But say that the like is not the friend of the like in so far as he is like; still the good may be the friend of the good in so far as he is good?

True.

But then again, will not the good, in so far as he is good, be sufficient for himself? Certainly he will. And he who is sufficient wants nothing — that is implied in the word sufficient.

Of course not.

And he who wants nothing will desire nothing?

He will not.

Neither can he love that which he does not desire?

He cannot.

And he who loves not is not a lover or friend?

Clearly not.

What place then is there for friendship, if, when absent, good men have no need of one another (for even when alone they are sufficient for themselves), and when present have no use of one another? How can such persons ever be induced to value one another?

They cannot.

And friends they cannot be, unless they value one another?

Very true.

But see now, Lysis, whether we are not being deceived in all this — are we not indeed entirely wrong?

How so? he replied.

Have I not heard some one say, as I just now recollect, that the like is the greatest enemy of the like, the good of the good? — Yes, and he quoted the authority of Hesiod, who says:

‘Potter quarrels with potter, bard with bard, Beggar with beggar;’

and of all other things he affirmed, in like manner, ‘That of necessity the most like are most full of envy, strife, and hatred of one another, and the most unlike, of friendship. For the poor man is compelled to be the friend of the rich, and the weak requires the aid of the strong, and the sick man of the physician; and every one who is ignorant, has to love and court him who knows.’ And indeed he went on to say in grandiloquent language, that the idea of friendship existing between similars is not the truth, but the very reverse of the

truth, and that the most opposed are the most friendly; for that everything desires not like but that which is most unlike: for example, the dry desires the moist, the cold the hot, the bitter the sweet, the sharp the blunt, the void the full, the full the void, and so of all other things; for the opposite is the food of the opposite, whereas like receives nothing from like. And I thought that he who said this was a charming man, and that he spoke well. What do the rest of you say?

I should say, at first hearing, that he is right, said Menexenus.

Then we are to say that the greatest friendship is of opposites?

Exactly.

Yes, Menexenus; but will not that be a monstrous answer? and will not the all-wise eristics be down upon us in triumph, and ask, fairly enough, whether love is not the very opposite of hate; and what answer shall we make to them — must we not admit that they speak the truth?

We must.

They will then proceed to ask whether the enemy is the friend of the friend, or the friend the friend of the enemy?

Neither, he replied.

Well, but is a just man the friend of the unjust, or the temperate of the intemperate, or the good of the bad?

I do not see how that is possible.

And yet, I said, if friendship goes by contraries, the contraries must be friends.

They must.

Then neither like and like nor unlike and unlike are friends.

I suppose not.

And yet there is a further consideration: may not all these notions of friendship be erroneous? but may not that which is neither good nor evil still in some cases be the friend of the good?

How do you mean? he said.

Why really, I said, the truth is that I do not know; but my head is dizzy with thinking of the argument, and therefore I hazard the conjecture, that ‘the beautiful is the friend,’ as the old proverb says. Beauty is certainly a soft, smooth, slippery thing, and therefore of a nature which easily slips in and permeates our souls. For I affirm that

the good is the beautiful. You will agree to that?

Yes.

This I say from a sort of notion that what is neither good nor evil is the friend of the beautiful and the good, and I will tell you why I am inclined to think so: I assume that there are three principles — the good, the bad, and that which is neither good nor bad. You would agree — would you not?

I agree.

And neither is the good the friend of the good, nor the evil of the evil, nor the good of the evil; — these alternatives are excluded by the previous argument; and therefore, if there be such a thing as friendship or love at all, we must infer that what is neither good nor evil must be the friend, either of the good, or of that which is neither good nor evil, for nothing can be the friend of the bad.

True.

But neither can like be the friend of like, as we were just now saying.

True.

And if so, that which is neither good nor evil can have no friend which is neither good nor evil.

Clearly not.

Then the good alone is the friend of that only which is neither good nor evil.

That may be assumed to be certain.

And does not this seem to put us in the right way? Just remark, that the body which is in health requires neither medical nor any other aid, but is well enough; and the healthy man has no love of the physician, because he is in health.

He has none.

But the sick loves him, because he is sick?

Certainly.

And sickness is an evil, and the art of medicine a good and useful thing?

Yes.

But the human body, regarded as a body, is neither good nor evil?

True.

And the body is compelled by reason of disease to court and make

friends of the art of medicine?

Yes.

Then that which is neither good nor evil becomes the friend of good, by reason of the presence of evil?

So we may infer.

And clearly this must have happened before that which was neither good nor evil had become altogether corrupted with the element of evil — if itself had become evil it would not still desire and love the good; for, as we were saying, the evil cannot be the friend of the good.

Impossible.

Further, I must observe that some substances are assimilated when others are present with them; and there are some which are not assimilated: take, for example, the case of an ointment or colour which is put on another substance.

Very good.

In such a case, is the substance which is anointed the same as the colour or ointment?

What do you mean? he said.

This is what I mean: Suppose that I were to cover your auburn locks with white lead, would they be really white, or would they only appear to be white?

They would only appear to be white, he replied.

And yet whiteness would be present in them?

True.

But that would not make them at all the more white, notwithstanding the presence of white in them — they would not be white any more than black?

No.

But when old age infuses whiteness into them, then they become assimilated, and are white by the presence of white.

Certainly.

Now I want to know whether in all cases a substance is assimilated by the presence of another substance; or must the presence be after a peculiar sort?

The latter, he said.

Then that which is neither good nor evil may be in the presence of

evil, but not as yet evil, and that has happened before now?

Yes.

And when anything is in the presence of evil, not being as yet evil, the presence of good arouses the desire of good in that thing; but the presence of evil, which makes a thing evil, takes away the desire and friendship of the good; for that which was once both good and evil has now become evil only, and the good was supposed to have no friendship with the evil?

None.

And therefore we say that those who are already wise, whether Gods or men, are no longer lovers of wisdom; nor can they be lovers of wisdom who are ignorant to the extent of being evil, for no evil or ignorant person is a lover of wisdom. There remain those who have the misfortune to be ignorant, but are not yet hardened in their ignorance, or void of understanding, and do not as yet fancy that they know what they do not know: and therefore those who are the lovers of wisdom are as yet neither good nor bad. But the bad do not love wisdom any more than the good; for, as we have already seen, neither is unlike the friend of unlike, nor like of like. You remember that?

Yes, they both said.

And so, Lysis and Menexenus, we have discovered the nature of friendship — there can be no doubt of it: Friendship is the love which by reason of the presence of evil the neither good nor evil has of the good, either in the soul, or in the body, or anywhere.

They both agreed and entirely assented, and for a moment I rejoiced and was satisfied like a huntsman just holding fast his prey. But then a most unaccountable suspicion came across me, and I felt that the conclusion was untrue. I was pained, and said, Alas! Lysis and Menexenus, I am afraid that we have been grasping at a shadow only.

Why do you say so? said Menexenus.

I am afraid, I said, that the argument about friendship is false: arguments, like men, are often pretenders.

How do you mean? he asked.

Well, I said; look at the matter in this way: a friend is the friend of some one; is he not?

Certainly he is.

And has he a motive and object in being a friend, or has he no motive and object?

He has a motive and object.

And is the object which makes him a friend, dear to him, or neither dear nor hateful to him?

I do not quite follow you, he said.

I do not wonder at that, I said. But perhaps, if I put the matter in another way, you will be able to follow me, and my own meaning will be clearer to myself. The sick man, as I was just now saying, is the friend of the physician — is he not?

Yes.

And he is the friend of the physician because of disease, and for the sake of health?

Yes.

And disease is an evil?

Certainly.

And what of health? I said. Is that good or evil, or neither?

Good, he replied.

And we were saying, I believe, that the body being neither good nor evil, because of disease, that is to say because of evil, is the friend of medicine, and medicine is a good: and medicine has entered into this friendship for the sake of health, and health is a good.

True.

And is health a friend, or not a friend?

A friend.

And disease is an enemy?

Yes.

Then that which is neither good nor evil is the friend of the good because of the evil and hateful, and for the sake of the good and the friend?

Clearly.

Then the friend is a friend for the sake of the friend, and because of the enemy?

That is to be inferred.

Then at this point, my boys, let us take heed, and be on our guard against deceptions. I will not again repeat that the friend is the friend

of the friend, and the like of the like, which has been declared by us to be an impossibility; but, in order that this new statement may not delude us, let us attentively examine another point, which I will proceed to explain: Medicine, as we were saying, is a friend, or dear to us for the sake of health?

Yes.

And health is also dear?

Certainly.

And if dear, then dear for the sake of something?

Yes.

And surely this object must also be dear, as is implied in our previous admissions?

Yes.

And that something dear involves something else dear?

Yes.

But then, proceeding in this way, shall we not arrive at some first principle of friendship or dearness which is not capable of being referred to any other, for the sake of which, as we maintain, all other things are dear, and, having there arrived, we shall stop?

True.

My fear is that all those other things, which, as we say, are dear for the sake of another, are illusions and deceptions only, but where that first principle is, there is the true ideal of friendship. Let me put the matter thus: Suppose the case of a great treasure (this may be a son, who is more precious to his father than all his other treasures); would not the father, who values his son above all things, value other things also for the sake of his son? I mean, for instance, if he knew that his son had drunk hemlock, and the father thought that wine would save him, he would value the wine?

He would.

And also the vessel which contains the wine?

Certainly.

But does he therefore value the three measures of wine, or the earthen vessel which contains them, equally with his son? Is not this rather the true state of the case? All his anxiety has regard not to the means which are provided for the sake of an object, but to the object for the sake of which they are provided. And although we may often

say that gold and silver are highly valued by us, that is not the truth; for there is a further object, whatever it may be, which we value most of all, and for the sake of which gold and all our other possessions are acquired by us. Am I not right?

Yes, certainly.

And may not the same be said of the friend? That which is only dear to us for the sake of something else is improperly said to be dear, but the truly dear is that in which all these so-called dear friendships terminate.

That, he said, appears to be true.

And the truly dear or ultimate principle of friendship is not for the sake of any other or further dear.

True.

Then we have done with the notion that friendship has any further object. May we then infer that the good is the friend?

I think so.

And the good is loved for the sake of the evil? Let me put the case in this way: Suppose that of the three principles, good, evil, and that which is neither good nor evil, there remained only the good and the neutral, and that evil went far away, and in no way affected soul or body, nor ever at all that class of things which, as we say, are neither good nor evil in themselves; — would the good be of any use, or other than useless to us? For if there were nothing to hurt us any longer, we should have no need of anything that would do us good. Then would be clearly seen that we did but love and desire the good because of the evil, and as the remedy of the evil, which was the disease; but if there had been no disease, there would have been no need of a remedy. Is not this the nature of the good — to be loved by us who are placed between the two, because of the evil? but there is no use in the good for its own sake.

I suppose not.

Then the final principle of friendship, in which all other friendships terminated, those, I mean, which are relatively dear and for the sake of something else, is of another and a different nature from them. For they are called dear because of another dear or friend. But with the true friend or dear, the case is quite the reverse; for that is proved to be dear because of the hated, and if the hated were away

it would be no longer dear.

Very true, he replied: at any rate not if our present view holds good.

But, oh! will you tell me, I said, whether if evil were to perish, we should hunger any more, or thirst any more, or have any similar desire? Or may we suppose that hunger will remain while men and animals remain, but not so as to be hurtful? And the same of thirst and the other desires, — that they will remain, but will not be evil because evil has perished? Or rather shall I say, that to ask what either will be then or will not be is ridiculous, for who knows? This we do know, that in our present condition hunger may injure us, and may also benefit us: — Is not that true?

Yes.

And in like manner thirst or any similar desire may sometimes be a good and sometimes an evil to us, and sometimes neither one nor the other?

To be sure.

But is there any reason why, because evil perishes, that which is not evil should perish with it?

None.

Then, even if evil perishes, the desires which are neither good nor evil will remain?

Clearly they will.

And must not a man love that which he desires and affects?

He must.

Then, even if evil perishes, there may still remain some elements of love or friendship?

Yes.

But not if evil is the cause of friendship: for in that case nothing will be the friend of any other thing after the destruction of evil; for the effect cannot remain when the cause is destroyed.

True.

And have we not admitted already that the friend loves something for a reason? and at the time of making the admission we were of opinion that the neither good nor evil loves the good because of the evil?

Very true.

But now our view is changed, and we conceive that there must be some other cause of friendship?

I suppose so.

May not the truth be rather, as we were saying just now, that desire is the cause of friendship; for that which desires is dear to that which is desired at the time of desiring it? and may not the other theory have been only a long story about nothing?

Likely enough.

But surely, I said, he who desires, desires that of which he is in want?

Yes.

And that of which he is in want is dear to him?

True.

And he is in want of that of which he is deprived?

Certainly.

Then love, and desire, and friendship would appear to be of the natural or congenial. Such, Lysis and Menexenus, is the inference.

They assented.

Then if you are friends, you must have natures which are congenial to one another?

Certainly, they both said.

And I say, my boys, that no one who loves or desires another would ever have loved or desired or affected him, if he had not been in some way congenial to him, either in his soul, or in his character, or in his manners, or in his form.

Yes, yes, said Menexenus. But Lysis was silent.

Then, I said, the conclusion is, that what is of a congenial nature must be loved.

It follows, he said.

Then the lover, who is true and no counterfeit, must of necessity be loved by his love.

Lysis and Menexenus gave a faint assent to this; and Hippothales changed into all manner of colours with delight.

Here, intending to revise the argument, I said: Can we point out any difference between the congenial and the like? For if that is possible, then I think, Lysis and Menexenus, there may be some sense in our argument about friendship. But if the congenial is only

the like, how will you get rid of the other argument, of the uselessness of like to like in as far as they are like; for to say that what is useless is dear, would be absurd? Suppose, then, that we agree to distinguish between the congenial and the like — in the intoxication of argument, that may perhaps be allowed.

Very true.

And shall we further say that the good is congenial, and the evil uncongenial to every one? Or again that the evil is congenial to the evil, and the good to the good; and that which is neither good nor evil to that which is neither good nor evil?

They agreed to the latter alternative.

Then, my boys, we have again fallen into the old discarded error; for the unjust will be the friend of the unjust, and the bad of the bad, as well as the good of the good.

That appears to be the result.

But again, if we say that the congenial is the same as the good, in that case the good and he only will be the friend of the good.

True.

But that too was a position of ours which, as you will remember, has been already refuted by ourselves.

We remember.

Then what is to be done? Or rather is there anything to be done? I can only, like the wise men who argue in courts, sum up the arguments: — If neither the beloved, nor the lover, nor the like, nor the unlike, nor the good, nor the congenial, nor any other of whom we spoke — for there were such a number of them that I cannot remember all — if none of these are friends, I know not what remains to be said.

Here I was going to invite the opinion of some older person, when suddenly we were interrupted by the tutors of Lysis and Menexenus, who came upon us like an evil apparition with their brothers, and bade them go home, as it was getting late. At first, we and the bystanders drove them off; but afterwards, as they would not mind, and only went on shouting in their barbarous dialect, and got angry, and kept calling the boys — they appeared to us to have been drinking rather too much at the Hermaea, which made them difficult to manage — we fairly gave way and broke up the company.

I said, however, a few words to the boys at parting: O Menexenus and Lysis, how ridiculous that you two boys, and I, an old boy, who would fain be one of you, should imagine ourselves to be friends — this is what the by-standers will go away and say — and as yet we have not been able to discover what is a friend!

ION

Translated by Benjamin Jowett

This short dialogue concerns Socrates and Ion, a professional poet and lecturer on Homer. They debate the question of whether a poet gives his performance on account of his skill and knowledge or by virtue of divine possession.

Ion has just come from a festival of Asclepius at the city of Epidaurus, after having won first prize in the competition. Socrates engages Ion in a philosophical discussion. Ion admits when Socrates asks, that his skill in performance recitation is limited to Homer, and that all other poets bore him. Socrates finds this puzzling, and sets out to solve the ‘riddle’ of Ion’s limited expertise. He points out to Ion that art critics and judges of sculpture normally do not limit themselves to judging the work of only a single artist, but can criticize the art no matter who the particular artist.

INTRODUCTION.

The *Ion* is the shortest, or nearly the shortest, of all the writings which bear the name of Plato, and is not authenticated by any early external testimony. The grace and beauty of this little work supply the only, and perhaps a sufficient, proof of its genuineness. The plan is simple; the dramatic interest consists entirely in the contrast between the irony of Socrates and the transparent vanity and childlike enthusiasm of the rhapsode Ion. The theme of the Dialogue may possibly have been suggested by the passage of Xenophon's *Memorabilia* in which the rhapsodists are described by Euthydemus as 'very precise about the exact words of Homer, but very idiotic themselves.' (Compare Aristotle, *Met.*)

Ion the rhapsode has just come to Athens; he has been exhibiting in Epidaurus at the festival of Asclepius, and is intending to exhibit at the festival of the Panathenaea. Socrates admires and envies the rhapsode's art; for he is always well dressed and in good company — in the company of good poets and of Homer, who is the prince of them. In the course of conversation the admission is elicited from Ion that his skill is restricted to Homer, and that he knows nothing of inferior poets, such as Hesiod and Archilochus; — he brightens up and is wide awake when Homer is being recited, but is apt to go to sleep at the recitations of any other poet. 'And yet, surely, he who knows the superior ought to know the inferior also; — he who can judge of the good speaker is able to judge of the bad. And poetry is a whole; and he who judges of poetry by rules of art ought to be able to judge of all poetry.' This is confirmed by the analogy of sculpture, painting, flute-playing, and the other arts. The argument is at last brought home to the mind of Ion, who asks how this contradiction is to be solved. The solution given by Socrates is as follows: —

The rhapsode is not guided by rules of art, but is an inspired person who derives a mysterious power from the poet; and the poet, in like manner, is inspired by the God. The poets and their interpreters may be compared to a chain of magnetic rings suspended from one another, and from a magnet. The magnet is the Muse, and the ring which immediately follows is the poet himself; from him are

suspended other poets; there is also a chain of rhapsodes and actors, who also hang from the Muses, but are let down at the side; and the last ring of all is the spectator. The poet is the inspired interpreter of the God, and this is the reason why some poets, like Homer, are restricted to a single theme, or, like Tynnichus, are famous for a single poem; and the rhapsode is the inspired interpreter of the poet, and for a similar reason some rhapsodes, like Ion, are the interpreters of single poets.

Ion is delighted at the notion of being inspired, and acknowledges that he is beside himself when he is performing; — his eyes rain tears and his hair stands on end. Socrates is of opinion that a man must be mad who behaves in this way at a festival when he is surrounded by his friends and there is nothing to trouble him. Ion is confident that Socrates would never think him mad if he could only hear his embellishments of Homer. Socrates asks whether he can speak well about everything in Homer. ‘Yes, indeed he can.’ ‘What about things of which he has no knowledge?’ Ion answers that he can interpret anything in Homer. But, rejoins Socrates, when Homer speaks of the arts, as for example, of chariot-driving, or of medicine, or of prophecy, or of navigation — will he, or will the charioteer or physician or prophet or pilot be the better judge? Ion is compelled to admit that every man will judge of his own particular art better than the rhapsode. He still maintains, however, that he understands the art of the general as well as any one. ‘Then why in this city of Athens, in which men of merit are always being sought after, is he not at once appointed a general?’ Ion replies that he is a foreigner, and the Athenians and Spartans will not appoint a foreigner to be their general. ‘No, that is not the real reason; there are many examples to the contrary. But Ion has long been playing tricks with the argument; like Proteus, he transforms himself into a variety of shapes, and is at last about to run away in the disguise of a general. Would he rather be regarded as inspired or dishonest?’ Ion, who has no suspicion of the irony of Socrates, eagerly embraces the alternative of inspiration.

The Ion, like the other earlier Platonic Dialogues, is a mixture of jest and earnest, in which no definite result is obtained, but some Socratic or Platonic truths are allowed dimly to appear.

The elements of a true theory of poetry are contained in the notion

that the poet is inspired. Genius is often said to be unconscious, or spontaneous, or a gift of nature: that 'genius is akin to madness' is a popular aphorism of modern times. The greatest strength is observed to have an element of limitation. Sense or passion are too much for the 'dry light' of intelligence which mingles with them and becomes discoloured by them. Imagination is often at war with reason and fact. The concentration of the mind on a single object, or on a single aspect of human nature, overpowers the orderly perception of the whole. Yet the feelings too bring truths home to the minds of many who in the way of reason would be incapable of understanding them. Reflections of this kind may have been passing before Plato's mind when he describes the poet as inspired, or when, as in the *Apology*, he speaks of poets as the worst critics of their own writings — anybody taken at random from the crowd is a better interpreter of them than they are of themselves. They are sacred persons, 'winged and holy things' who have a touch of madness in their composition (*Phaedr.*), and should be treated with every sort of respect (*Republic*), but not allowed to live in a well-ordered state. Like the Statesmen in the *Meno*, they have a divine instinct, but they are narrow and confused; they do not attain to the clearness of ideas, or to the knowledge of poetry or of any other art as a whole.

In the *Protagoras* the ancient poets are recognized by Protagoras himself as the original sophists; and this family resemblance may be traced in the *Ion*. The rhapsode belongs to the realm of imitation and of opinion: he professes to have all knowledge, which is derived by him from Homer, just as the sophist professes to have all wisdom, which is contained in his art of rhetoric. Even more than the sophist he is incapable of appreciating the commonest logical distinctions; he cannot explain the nature of his own art; his great memory contrasts with his inability to follow the steps of the argument. And in his highest moments of inspiration he has an eye to his own gains.

The old quarrel between philosophy and poetry, which in the *Republic* leads to their final separation, is already working in the mind of Plato, and is embodied by him in the contrast between Socrates and *Ion*. Yet here, as in the *Republic*, Socrates shows a sympathy with the poetic nature. Also, the manner in which *Ion* is affected by his own recitations affords a lively illustration of the

power which, in the Republic, Socrates attributes to dramatic performances over the mind of the performer. His allusion to his embellishments of Homer, in which he declares himself to have surpassed Metrodorus of Lampsacus and Stesimbrotus of Thasos, seems to show that, like them, he belonged to the allegorical school of interpreters. The circumstance that nothing more is known of him may be adduced in confirmation of the argument that this truly Platonic little work is not a forgery of later times.

ION

PERSONS OF THE DIALOGUE:

Socrates, Ion.

SOCRATES: Welcome, Ion. Are you from your native city of Ephesus?

ION: No, Socrates; but from Epidaurus, where I attended the festival of Asclepius.

SOCRATES: And do the Epidaurians have contests of rhapsodes at the festival?

ION: O yes; and of all sorts of musical performers.

SOCRATES: And were you one of the competitors — and did you succeed?

ION: I obtained the first prize of all, Socrates.

SOCRATES: Well done; and I hope that you will do the same for us at the Panathenaea.

ION: And I will, please heaven.

SOCRATES: I often envy the profession of a rhapsode, Ion; for you have always to wear fine clothes, and to look as beautiful as you can is a part of your art. Then, again, you are obliged to be continually in the company of many good poets; and especially of Homer, who is the best and most divine of them; and to understand him, and not merely learn his words by rote, is a thing greatly to be envied. And no man can be a rhapsode who does not understand the meaning of the poet. For the rhapsode ought to interpret the mind of the poet to his hearers, but how can he interpret him well unless he knows what he means? All this is greatly to be envied.

ION: Very true, Socrates; interpretation has certainly been the most laborious part of my art; and I believe myself able to speak about

Homer better than any man; and that neither Metrodorus of Lampsacus, nor Stesimbrotus of Thasos, nor Glaucon, nor any one else who ever was, had as good ideas about Homer as I have, or as many.

SOCRATES: I am glad to hear you say so, Ion; I see that you will not refuse to acquaint me with them.

ION: Certainly, Socrates; and you really ought to hear how exquisitely I render Homer. I think that the Homeridae should give me a golden crown.

SOCRATES: I shall take an opportunity of hearing your embellishments of him at some other time. But just now I should like to ask you a question: Does your art extend to Hesiod and Archilochus, or to Homer only?

ION: To Homer only; he is in himself quite enough.

SOCRATES: Are there any things about which Homer and Hesiod agree?

ION: Yes; in my opinion there are a good many.

SOCRATES: And can you interpret better what Homer says, or what Hesiod says, about these matters in which they agree?

ION: I can interpret them equally well, Socrates, where they agree.

SOCRATES: But what about matters in which they do not agree? — for example, about divination, of which both Homer and Hesiod have something to say, —

ION: Very true:

SOCRATES: Would you or a good prophet be a better interpreter of what these two poets say about divination, not only when they agree, but when they disagree?

ION: A prophet.

SOCRATES: And if you were a prophet, would you not be able to interpret them when they disagree as well as when they agree?

ION: Clearly.

SOCRATES: But how did you come to have this skill about Homer only, and not about Hesiod or the other poets? Does not Homer speak of the same themes which all other poets handle? Is not war his great argument? and does he not speak of human society and of intercourse of men, good and bad, skilled and unskilled, and of the gods conversing with one another and with mankind, and about what happens in heaven and in the world below, and the generations of gods and heroes? Are not these the themes of which Homer sings?

ION: Very true, Socrates.

SOCRATES: And do not the other poets sing of the same?

ION: Yes, Socrates; but not in the same way as Homer.

SOCRATES: What, in a worse way?

ION: Yes, in a far worse.

SOCRATES: And Homer in a better way?

ION: He is incomparably better.

SOCRATES: And yet surely, my dear friend Ion, in a discussion about arithmetic, where many people are speaking, and one speaks better than the rest, there is somebody who can judge which of them is the good speaker?

ION: Yes.

SOCRATES: And he who judges of the good will be the same as he who judges of the bad speakers?

ION: The same.

SOCRATES: And he will be the arithmetician?

ION: Yes.

SOCRATES: Well, and in discussions about the wholesomeness of food, when many persons are speaking, and one speaks better than the rest, will he who recognizes the better speaker be a different person from him who recognizes the worse, or the same?

ION: Clearly the same.

SOCRATES: And who is he, and what is his name?

ION: The physician.

SOCRATES: And speaking generally, in all discussions in which the subject is the same and many men are speaking, will not he who knows the good know the bad speaker also? For if he does not know the bad, neither will he know the good when the same topic is being discussed.

ION: True.

SOCRATES: Is not the same person skilful in both?

ION: Yes.

SOCRATES: And you say that Homer and the other poets, such as Hesiod and Archilochus, speak of the same things, although not in the same way; but the one speaks well and the other not so well?

ION: Yes; and I am right in saying so.

SOCRATES: And if you knew the good speaker, you would also know the inferior speakers to be inferior?

ION: That is true.

SOCRATES: Then, my dear friend, can I be mistaken in saying that Ion is equally skilled in Homer and in other poets, since he himself acknowledges that the same person will be a good judge of all those who speak of the same things; and that almost all poets do speak of the same things?

ION: Why then, Socrates, do I lose attention and go to sleep and have absolutely no ideas of the least value, when any one speaks of any other poet; but when Homer is mentioned, I wake up at once and am all attention and have plenty to say?

SOCRATES: The reason, my friend, is obvious. No one can fail to see that you speak of Homer without any art or knowledge. If you were able to speak of him by rules of art, you would have been able to speak of all other poets; for poetry is a whole.

ION: Yes.

SOCRATES: And when any one acquires any other art as a whole, the same may be said of them. Would you like me to explain my meaning, Ion?

ION: Yes, indeed, Socrates; I very much wish that you would: for I love to hear you wise men talk.

SOCRATES: O that we were wise, Ion, and that you could truly call us so; but you rhapsodes and actors, and the poets whose verses you sing, are wise; whereas I am a common man, who only speak the truth. For consider what a very commonplace and trivial thing is this which I have said — a thing which any man might say: that when a man has acquired a knowledge of a whole art, the enquiry into good and bad is one and the same. Let us consider this matter; is not the art of painting a whole?

ION: Yes.

SOCRATES: And there are and have been many painters good and bad?

ION: Yes.

SOCRATES: And did you ever know any one who was skilful in pointing out the excellences and defects of Polygnotus the son of Aglaophon, but incapable of criticizing other painters; and when the work of any other painter was produced, went to sleep and was at a loss, and had no ideas; but when he had to give his opinion about

Polygnotus, or whoever the painter might be, and about him only, woke up and was attentive and had plenty to say?

ION: No indeed, I have never known such a person.

SOCRATES: Or did you ever know of any one in sculpture, who was skilful in expounding the merits of Daedalus the son of Metion, or of Epeius the son of Panopeus, or of Theodorus the Samian, or of any individual sculptor; but when the works of sculptors in general were produced, was at a loss and went to sleep and had nothing to say?

ION: No indeed; no more than the other.

SOCRATES: And if I am not mistaken, you never met with any one among flute-players or harp-players or singers to the harp or rhapsodes who was able to discourse of Olympus or Thamyras or Orpheus, or Phemius the rhapsode of Ithaca, but was at a loss when he came to speak of Ion of Ephesus, and had no notion of his merits or defects?

ION: I cannot deny what you say, Socrates. Nevertheless I am conscious in my own self, and the world agrees with me in thinking that I do speak better and have more to say about Homer than any other man. But I do not speak equally well about others — tell me the reason of this.

SOCRATES: I perceive, Ion; and I will proceed to explain to you what I imagine to be the reason of this. The gift which you possess of speaking excellently about Homer is not an art, but, as I was just saying, an inspiration; there is a divinity moving you, like that contained in the stone which Euripides calls a magnet, but which is commonly known as the stone of Heraclea. This stone not only attracts iron rings, but also imparts to them a similar power of attracting other rings; and sometimes you may see a number of pieces of iron and rings suspended from one another so as to form quite a long chain: and all of them derive their power of suspension from the original stone. In like manner the Muse first of all inspires men herself; and from these inspired persons a chain of other persons is suspended, who take the inspiration. For all good poets, epic as

well as lyric, compose their beautiful poems not by art, but because they are inspired and possessed. And as the Corybantian revellers when they dance are not in their right mind, so the lyric poets are not in their right mind when they are composing their beautiful strains: but when falling under the power of music and metre they are inspired and possessed; like Bacchic maidens who draw milk and honey from the rivers when they are under the influence of Dionysus but not when they are in their right mind. And the soul of the lyric poet does the same, as they themselves say; for they tell us that they bring songs from honeyed fountains, culling them out of the gardens and dells of the Muses; they, like the bees, winging their way from flower to flower. And this is true. For the poet is a light and winged and holy thing, and there is no invention in him until he has been inspired and is out of his senses, and the mind is no longer in him: when he has not attained to this state, he is powerless and is unable to utter his oracles. Many are the noble words in which poets speak concerning the actions of men; but like yourself when speaking about Homer, they do not speak of them by any rules of art: they are simply inspired to utter that to which the Muse impels them, and that only; and when inspired, one of them will make dithyrambs, another hymns of praise, another choral strains, another epic or iambic verses — and he who is good at one is not good at any other kind of verse: for not by art does the poet sing, but by power divine. Had he learned by rules of art, he would have known how to speak not of one theme only, but of all; and therefore God takes away the minds of poets, and uses them as his ministers, as he also uses diviners and holy prophets, in order that we who hear them may know them to be speaking not of themselves who utter these priceless words in a state of unconsciousness, but that God himself is the speaker, and that through them he is conversing with us. And Tynnichus the Chalcidian affords a striking instance of what I am saying: he wrote nothing that any one would care to remember but the famous paean which is in every one's mouth, one of the finest poems ever written, simply an invention of the Muses, as he himself says. For in this way the God would seem to indicate to us and not allow us to doubt that these beautiful poems are not human, or the work of man, but divine and the work of God; and that the poets are only the interpreters of

the Gods by whom they are severally possessed. Was not this the lesson which the God intended to teach when by the mouth of the worst of poets he sang the best of songs? Am I not right, Ion?

ION: Yes, indeed, Socrates, I feel that you are; for your words touch my soul, and I am persuaded that good poets by a divine inspiration interpret the things of the Gods to us.

SOCRATES: And you rhapsodists are the interpreters of the poets?

ION: There again you are right.

SOCRATES: Then you are the interpreters of interpreters?

ION: Precisely.

SOCRATES: I wish you would frankly tell me, Ion, what I am going to ask of you: When you produce the greatest effect upon the audience in the recitation of some striking passage, such as the apparition of Odysseus leaping forth on the floor, recognized by the suitors and casting his arrows at his feet, or the description of Achilles rushing at Hector, or the sorrows of Andromache, Hecuba, or Priam, — are you in your right mind? Are you not carried out of yourself, and does not your soul in an ecstasy seem to be among the persons or places of which you are speaking, whether they are in Ithaca or in Troy or whatever may be the scene of the poem?

ION: That proof strikes home to me, Socrates. For I must frankly confess that at the tale of pity my eyes are filled with tears, and when I speak of horrors, my hair stands on end and my heart throbs.

SOCRATES: Well, Ion, and what are we to say of a man who at a sacrifice or festival, when he is dressed in holiday attire, and has golden crowns upon his head, of which nobody has robbed him, appears weeping or panic-stricken in the presence of more than twenty thousand friendly faces, when there is no one despoiling or wronging him; — is he in his right mind or is he not?

ION: No indeed, Socrates, I must say that, strictly speaking, he is not in his right mind.

SOCRATES: And are you aware that you produce similar effects on most of the spectators?

ION: Only too well; for I look down upon them from the stage, and behold the various emotions of pity, wonder, sternness, stamped upon their countenances when I am speaking: and I am obliged to give my very best attention to them; for if I make them cry I myself shall laugh, and if I make them laugh I myself shall cry when the time of payment arrives.

SOCRATES: Do you know that the spectator is the last of the rings which, as I am saying, receive the power of the original magnet from one another? The rhapsode like yourself and the actor are intermediate links, and the poet himself is the first of them. Through all these the God sways the souls of men in any direction which he pleases, and makes one man hang down from another. Thus there is a vast chain of dancers and masters and under-masters of choruses, who are suspended, as if from the stone, at the side of the rings which hang down from the Muse. And every poet has some Muse from whom he is suspended, and by whom he is said to be possessed, which is nearly the same thing; for he is taken hold of. And from these first rings, which are the poets, depend others, some deriving their inspiration from Orpheus, others from Musaeus; but the greater number are possessed and held by Homer. Of whom, Ion, you are one, and are possessed by Homer; and when any one repeats the words of another poet you go to sleep, and know not what to say; but when any one recites a strain of Homer you wake up in a moment, and your soul leaps within you, and you have plenty to say; for not by art or knowledge about Homer do you say what you say, but by divine inspiration and by possession; just as the Corybantian revellers too have a quick perception of that strain only which is appropriated to the God by whom they are possessed, and have plenty of dances and words for that, but take no heed of any other. And you, Ion, when the name of Homer is mentioned have plenty to say, and have nothing to say of others. You ask, 'Why is this?' The answer is that you praise Homer not by art but by divine inspiration.

ION: That is good, Socrates; and yet I doubt whether you will ever

have eloquence enough to persuade me that I praise Homer only when I am mad and possessed; and if you could hear me speak of him I am sure you would never think this to be the case.

SOCRATES: I should like very much to hear you, but not until you have answered a question which I have to ask. On what part of Homer do you speak well? — not surely about every part.

ION: There is no part, Socrates, about which I do not speak well: of that I can assure you.

SOCRATES: Surely not about things in Homer of which you have no knowledge?

ION: And what is there in Homer of which I have no knowledge?

SOCRATES: Why, does not Homer speak in many passages about arts? For example, about driving; if I can only remember the lines I will repeat them.

ION: I remember, and will repeat them.

SOCRATES: Tell me then, what Nestor says to Antilochus, his son, where he bids him be careful of the turn at the horserace in honour of Patroclus.

ION: ‘Bend gently,’ he says, ‘in the polished chariot to the left of them, and urge the horse on the right hand with whip and voice; and slacken the rein. And when you are at the goal, let the left horse draw near, yet so that the nave of the well-wrought wheel may not even seem to touch the extremity; and avoid catching the stone (II).’

SOCRATES: Enough. Now, Ion, will the charioteer or the physician be the better judge of the propriety of these lines?

ION: The charioteer, clearly.

SOCRATES: And will the reason be that this is his art, or will there be any other reason?

ION: No, that will be the reason.

SOCRATES: And every art is appointed by God to have knowledge of a certain work; for that which we know by the art of the pilot we do not know by the art of medicine?

ION: Certainly not.

SOCRATES: Nor do we know by the art of the carpenter that which we know by the art of medicine?

ION: Certainly not.

SOCRATES: And this is true of all the arts; — that which we know with one art we do not know with the other? But let me ask a prior question: You admit that there are differences of arts?

ION: Yes.

SOCRATES: You would argue, as I should, that when one art is of one kind of knowledge and another of another, they are different?

ION: Yes.

SOCRATES: Yes, surely; for if the subject of knowledge were the same, there would be no meaning in saying that the arts were different, — if they both gave the same knowledge. For example, I know that here are five fingers, and you know the same. And if I were to ask whether I and you became acquainted with this fact by the help of the same art of arithmetic, you would acknowledge that we did?

ION: Yes.

SOCRATES: Tell me, then, what I was intending to ask you, — whether this holds universally? Must the same art have the same subject of knowledge, and different arts other subjects of knowledge?

ION: That is my opinion, Socrates.

SOCRATES: Then he who has no knowledge of a particular art will have no right judgment of the sayings and doings of that art?

ION: Very true.

SOCRATES: Then which will be a better judge of the lines which you were reciting from Homer, you or the charioteer?

ION: The charioteer.

SOCRATES: Why, yes, because you are a rhapsode and not a charioteer.

ION: Yes.

SOCRATES: And the art of the rhapsode is different from that of the charioteer?

ION: Yes.

SOCRATES: And if a different knowledge, then a knowledge of different matters?

ION: True.

SOCRATES: You know the passage in which Hecamede, the concubine of Nestor, is described as giving to the wounded Machaon a posset, as he says,

‘Made with Pramnian wine; and she grated cheese of goat’s milk with a grater of bronze, and at his side placed an onion which gives a relish to drink (Il.).’

Now would you say that the art of the rhapsode or the art of medicine was better able to judge of the propriety of these lines?

ION: The art of medicine.

SOCRATES: And when Homer says,

‘And she descended into the deep like a leaden plummet, which, set in the horn of ox that ranges in the fields, rushes along carrying death among the ravenous fishes (Il.),’ —

will the art of the fisherman or of the rhapsode be better able to judge

whether these lines are rightly expressed or not?

ION: Clearly, Socrates, the art of the fisherman.

SOCRATES: Come now, suppose that you were to say to me: 'Since you, Socrates, are able to assign different passages in Homer to their corresponding arts, I wish that you would tell me what are the passages of which the excellence ought to be judged by the prophet and prophetic art'; and you will see how readily and truly I shall answer you. For there are many such passages, particularly in the *Odyssey*; as, for example, the passage in which Theoclymenus the prophet of the house of Melampus says to the suitors: —

'Wretched men! what is happening to you? Your heads and your faces and your limbs underneath are shrouded in night; and the voice of lamentation bursts forth, and your cheeks are wet with tears. And the vestibule is full, and the court is full, of ghosts descending into the darkness of Erebus, and the sun has perished out of heaven, and an evil mist is spread abroad (*Od.*).'

And there are many such passages in the *Iliad* also; as for example in the description of the battle near the rampart, where he says: —

'As they were eager to pass the ditch, there came to them an omen: a soaring eagle, holding back the people on the left, bore a huge bloody dragon in his talons, still living and panting; nor had he yet resigned the strife, for he bent back and smote the bird which carried him on the breast by the neck, and he in pain let him fall from him to the ground into the midst of the multitude. And the eagle, with a cry, was borne afar on the wings of the wind (*Il.*).'

These are the sort of things which I should say that the prophet ought to consider and determine.

ION: And you are quite right, Socrates, in saying so.

SOCRATES: Yes, Ion, and you are right also. And as I have selected from the *Iliad* and *Odyssey* for you passages which describe the office of the prophet and the physician and the fisherman, do you, who know Homer so much better than I do, Ion, select for me

passages which relate to the rhapsode and the rhapsode's art, and which the rhapsode ought to examine and judge of better than other men.

ION: All passages, I should say, Socrates.

SOCRATES: Not all, Ion, surely. Have you already forgotten what you were saying? A rhapsode ought to have a better memory.

ION: Why, what am I forgetting?

SOCRATES: Do you not remember that you declared the art of the rhapsode to be different from the art of the charioteer?

ION: Yes, I remember.

SOCRATES: And you admitted that being different they would have different subjects of knowledge?

ION: Yes.

SOCRATES: Then upon your own showing the rhapsode, and the art of the rhapsode, will not know everything?

ION: I should exclude certain things, Socrates.

SOCRATES: You mean to say that you would exclude pretty much the subjects of the other arts. As he does not know all of them, which of them will he know?

ION: He will know what a man and what a woman ought to say, and what a freeman and what a slave ought to say, and what a ruler and what a subject.

SOCRATES: Do you mean that a rhapsode will know better than the pilot what the ruler of a sea-tossed vessel ought to say?

ION: No; the pilot will know best.

SOCRATES: Or will the rhapsode know better than the physician what the ruler of a sick man ought to say?

ION: He will not.

SOCRATES: But he will know what a slave ought to say?

ION: Yes.

SOCRATES: Suppose the slave to be a cowherd; the rhapsode will know better than the cowherd what he ought to say in order to soothe the infuriated cows?

ION: No, he will not.

SOCRATES: But he will know what a spinning-woman ought to say about the working of wool?

ION: No.

SOCRATES: At any rate he will know what a general ought to say when exhorting his soldiers?

ION: Yes, that is the sort of thing which the rhapsode will be sure to know.

SOCRATES: Well, but is the art of the rhapsode the art of the general?

ION: I am sure that I should know what a general ought to say.

SOCRATES: Why, yes, Ion, because you may possibly have a knowledge of the art of the general as well as of the rhapsode; and you may also have a knowledge of horsemanship as well as of the lyre: and then you would know when horses were well or ill managed. But suppose I were to ask you: By the help of which art, Ion, do you know whether horses are well managed, by your skill as a horseman or as a performer on the lyre — what would you answer?

ION: I should reply, by my skill as a horseman.

SOCRATES: And if you judged of performers on the lyre, you would admit that you judged of them as a performer on the lyre, and not as a horseman?

ION: Yes.

SOCRATES: And in judging of the general's art, do you judge of it as a general or a rhapsode?

ION: To me there appears to be no difference between them.

SOCRATES: What do you mean? Do you mean to say that the art of the rhapsode and of the general is the same?

ION: Yes, one and the same.

SOCRATES: Then he who is a good rhapsode is also a good general?

ION: Certainly, Socrates.

SOCRATES: And he who is a good general is also a good rhapsode?

ION: No; I do not say that.

SOCRATES: But you do say that he who is a good rhapsode is also a good general.

ION: Certainly.

SOCRATES: And you are the best of Hellenic rhapsodes?

ION: Far the best, Socrates.

SOCRATES: And are you the best general, Ion?

ION: To be sure, Socrates; and Homer was my master.

SOCRATES: But then, Ion, what in the name of goodness can be the reason why you, who are the best of generals as well as the best of rhapsodes in all Hellas, go about as a rhapsode when you might be a general? Do you think that the Hellenes want a rhapsode with his golden crown, and do not want a general?

ION: Why, Socrates, the reason is, that my countrymen, the Ephesians, are the servants and soldiers of Athens, and do not need a general; and you and Sparta are not likely to have me, for you think that you have enough generals of your own.

SOCRATES: My good Ion, did you never hear of Apollodorus of Cyzicus?

ION: Who may he be?

SOCRATES: One who, though a foreigner, has often been chosen their general by the Athenians: and there is Phanosthenes of Andros, and Heraclides of Clazomenae, whom they have also appointed to the command of their armies and to other offices, although aliens, after they had shown their merit. And will they not choose Ion the Ephesian to be their general, and honour him, if he prove himself worthy? Were not the Ephesians originally Athenians, and Ephesus is no mean city? But, indeed, Ion, if you are correct in saying that by art and knowledge you are able to praise Homer, you do not deal fairly with me, and after all your professions of knowing many glorious things about Homer, and promises that you would exhibit them, you are only a deceiver, and so far from exhibiting the art of which you are a master, will not, even after my repeated entreaties, explain to me the nature of it. You have literally as many forms as Proteus; and now you go all manner of ways, twisting and turning, and, like Proteus, become all manner of people at once, and at last slip away from me in the disguise of a general, in order that you may escape exhibiting your Homeric lore. And if you have art, then, as I was saying, in falsifying your promise that you would exhibit Homer, you are not dealing fairly with me. But if, as I believe, you have no art, but speak all these beautiful words about Homer unconsciously under his inspiring influence, then I acquit you of dishonesty, and shall only say that you are inspired. Which do you prefer to be thought, dishonest or inspired?

ION: There is a great difference, Socrates, between the two alternatives; and inspiration is by far the nobler.

SOCRATES: Then, Ion, I shall assume the nobler alternative; and attribute to you in your praises of Homer inspiration, and not art.

PHAEDO

Translated by Henry Cary

This famous dialogue depicts the death of Socrates and is the last dialogue to concern the philosopher's final days. In the dialogue, Socrates discusses the nature of the afterlife before being executed by drinking hemlock. Socrates has been imprisoned and sentenced to death by an Athenian jury for not believing in the gods of the state and for corrupting the youth of the city. The dialogue is told from the perspective of one of Socrates' students, Phaedo of Elis. Having been present at Socrates' death bed, Phaedo relates the dialogue from that day to Echecrates, a fellow philosopher. By engaging in dialectic with a group of Socrates' friends, including the Thebans Cebes and Simmias, Socrates explores various arguments for the soul's immortality in order to show that there is an afterlife in which the soul will dwell following death. Phaedo tells the story that following the discussion, he and the others were there to witness the death of Socrates.

One of the main themes in the *Phaedo* is the idea that the soul is immortal. Socrates offers four arguments for the soul's immortality:

1) The Cyclical Argument, explains that Forms are eternal and unchanging, and as the soul always brings life, then it must not die, and is necessarily "imperishable". As the body is mortal and is subject to physical death, the soul must be its indestructible opposite. Plato then suggests the analogy of fire and cold. If the form of cold is imperishable, and fire, its opposite, was within close proximity, it would have to withdraw intact as does the soul during death. This could be likened to the idea of the opposite charges of magnets.

2) The Theory of Recollection explains that we possess some non-empirical knowledge (e.g. The Form of Equality) at birth, implying

the soul existed before birth to carry that knowledge. Another account of the theory is found in Plato's Meno, although in that case Socrates implies Anamnesis (previous knowledge of everything) whereas he is not so bold in Phaedo.

3) The Affinity Argument, explains that invisible, immortal, and incorporeal things are different from visible, mortal, and corporeal things. Our soul is of the former, while our body is of the latter, so when our bodies die and decay, our soul will continue to live.

4) The Argument from Form of Life, or The Final Argument explains that the Forms, incorporeal and static entities, are the cause of all things in the world, and all things participate in Forms. For example, beautiful things participate in the Form of Beauty; the number four participates in the Form of the Even, etc. The soul, by its very nature, participates in the Form of Life, which means the soul can never die.

The scene begins at Compoton where Echecrates meets Phaedo and asks for news about the last days of Socrates. Phaedo explains why a delay occurred between his trial and his death, and describes the scene in a prison at Athens on the final day, naming those present. He tells how he had visited Socrates early in the morning with the others. Socrates' wife, Xanthippe was there, but was very distressed and Socrates asked that she be taken away. Socrates' relates how, bidden by a recurring dream to "make and cultivate music", he wrote a hymn and then began writing poetry based on *Aesop's Fables*.

'The Death of Socrates' by Jacques-Louis David (1787)

INTRODUCTION TO THE PHÆDO.

This dialogue presents us with an account of the manner in which Socrates spent the last day of his life, and how he met his death. The main subject is that of the soul's immortality, which Socrates takes upon himself to prove with as much certainty as it is possible for the human mind to arrive at. The question itself, though none could be better suited to the occasion, arises simply and naturally from the general conversation that precedes it.

When his friends visit him in the morning for the purpose of spending this his last day with him, they find him sitting up in bed, and rubbing his leg, which had just been freed from bonds. He remarks on the unaccountable alternation and connection between pleasure and pain, and adds that *Æsop*, had he observed it, would have made a fable from it. This remark reminds *Cebes* of Socrates's having put some of *Æsop*'s fables into metre since his imprisonment, and he asks, for the satisfaction of the poet *Evenus*, what has induced him to do so. Socrates explains his reason, and concludes by bidding him tell *Evenus* to follow him as soon as he can. *Simmias* expresses his surprise at this message, on which Socrates asks, "Is not *Evenus* a philosopher?" and on the question being answered in the affirmative, he says that he or any philosopher would be willing to die, though perhaps he would not commit violence on himself. This, again, seems a contradiction to *Simmias*; but Socrates explains it by showing that our souls are placed in the body by God, and may not leave it without his permission. Whereupon *Cebes* objects that in that case foolish men only would wish to die, and quit the service of the best of masters, to which *Simmias* agrees. Socrates, therefore, proposes to plead his cause before them, and to show that there is a great probability that after this life he shall go into the presence of God and good men, and be happy in proportion to the purity of his own mind.

He begins by stating that philosophy itself is nothing else than a preparation for and meditation on death. Death and philosophy have this in common: death separates the soul from the body; philosophy draws off the mind from bodily things to the contemplation of truth

and virtue: for he is not a true philosopher who is led away by bodily pleasures, since the senses are the source of ignorance and all evil. The mind, therefore, is entirely occupied in meditating on death, and freeing itself as much as possible from the body. How, then, can such a man be afraid of death? He who grieves at the approach of death can not be a true lover of wisdom, but is a lover of his body. And, indeed, most men are temperate through intemperance; that is to say, they abstain from some pleasures that they may the more easily and permanently enjoy others. They embrace only a shadow of virtue, not virtue itself, since they estimate the value of all things by the pleasures they afford. Whereas the philosopher purifies his mind from all such things, and pursues virtue and wisdom for their own sakes. This course Socrates himself has pursued to the utmost of his ability, with what success he should shortly know; and on these grounds he did not repine at leaving his friends in this world, being persuaded that in another he should meet with good masters and good friends.

Upon this Cebes says that he agrees with all else that had been said, but can not help entertaining doubts of what will become of the soul when separated from the body, for the common opinion is that it is dispersed and vanishes like breath or smoke, and no longer exists anywhere. Socrates, therefore, proposes to inquire into the probability of the case, a fit employment for him under his present circumstances.

His first argument is drawn from the ancient belief prevalent among men, that souls departing hence exist in Hades, and are produced again from the dead. If this be true, it must follow that our souls are there, for they could not be produced again if they did not exist; and its truth is confirmed by this, that it is a general law of nature that contraries are produced from contraries — the greater from the less, strong from weak, slow from swift, heat from cold, and in like manner life from death, and vice versa. To explain this more clearly, he proceeds to show that what is changed passes from one state to another, and so undergoes three different states — first, the actual state; then the transition; and, thirdly, the new state; as from a state of sleep, by awaking to being awake. In like manner birth is a transition from a state of death to life, and dying from life to death;

so that the soul, by the act of dying, only passes to another state. If it were not so, all nature would in time become dead, just as if people did not awake out of sleep all would at last be buried in eternal sleep. Whence the conclusion is that the souls of men are not annihilated by death.

Cebes agrees to this reasoning, and adds that he is further convinced, of its truth by calling to mind an argument used by Socrates on former occasions, that knowledge is nothing but reminiscence; and if this is so, the soul must have existed, and had knowledge, before it became united to the body.

But in case Simmias should not yet be satisfied, Socrates proceeds to enlarge on this, his second argument, drawn from reminiscence. We daily find that we are carried from the knowledge of one thing to another. Things perceived by the eyes, ears, and other senses bring up the thought of other things; thus the sight of a lyre or a garment reminds us of a friend, and not only are we thus reminded of sensible objects, but of things which are comprehended by the mind alone, and have no sensitive existence. For we have formed in our minds an idea of abstract equality, of the beautiful, the just, the good; in short, of every thing which we say exists without the aid of the senses, for we use them only in the perception of individual things; whence it follows that the mind did not acquire this knowledge in this life, but must have had it before, and therefore the soul must have existed before.

Simmias and Cebes both agree in admitting that Socrates has proved the pre-existence of the soul, but insist that he has not shown it to be immortal, for that nothing hinders but that, according to the popular opinion, it may be dispersed at the dissolution of the body. To which Socrates replies, that if their former admissions are joined to his last argument, the immortality, as well as the pre-existence, of the soul has been sufficiently proved. For if it is true that any thing living is produced from that which is dead, then the soul must exist after death, otherwise it could not be produced again.

However, to remove the apprehension that the soul may be dispersed by a wind, as it were, Socrates proceeds, in his third argument, to examine that doubt more thoroughly. What, then, is meant by being dispersed but being dissolved into its parts? In order,

therefore, to a thing being capable of dispersion it must be compounded of parts. Now, there are two kinds of things — one compounded, the other simple. The former kind is subject to change, the latter not, and can be comprehended by the mind alone. The one is visible, the other invisible; and the soul, which is invisible, when it employs the bodily senses, wanders and is confused, but when it abstracts itself from the body it attains to the knowledge of that which is eternal, immortal, and unchangeable. The soul, therefore, being uncompounded and invisible, must be indissoluble; that is to say, immortal.

Still Simmias and Cebes are unconvinced. The former objects that the soul, according to Socrates's own showing, is nothing but a harmony resulting from a combination of the parts of the body, and so may perish with the body, as the harmony of a lyre does when the lyre itself is broken. And Cebes, though he admits that the soul is more durable than the body, yet objects that it is not, therefore, of necessity immortal, but may in time wear out; and it is by no means clear that this is not its last period.

These objections produce a powerful effect on the rest of the company; but Socrates, undismayed, exhorts them not to suffer themselves to be deterred from seeking the truth by any difficulties they may meet with; and then proceeds to show, in a moment, the fallacy of Simmias's objection. It was before admitted, he says, that the soul existed before the body; but harmony is produced after the lyre is formed, so that the two cases are totally different. And, further, there are various degrees of harmony, but every soul is as much a soul as any other. But, then, what will a person who holds this doctrine, that the soul is harmony, say of virtue and vice in the soul? Will he call them another kind of harmony and discord? If so, he will contradict himself; for it is admitted that one soul is not more or less a soul than another, and therefore one can not be more or less harmonized than another, and one could not admit of a greater degree of virtue or vice than another; and indeed a soul, being harmony, could not partake of vice at all, which is discord.

Socrates, having thus satisfactorily answered the argument adduced by Simmias, goes on to rebut that of Cebes, who objected that the soul might in time wear out. In order to do this, he relates

that, when a young man, he attempted to investigate the causes of all things, why they exist and why they perish; and in the course of his researches, finding the futility of attributing the existence of things to what are called natural causes, he resolved on endeavoring to find out the reasons of things. He therefore assumed that there are a certain abstract beauty and goodness and magnitude, and so of all other things; the truth of which being granted, he thinks he shall be able to prove that the soul is immortal.

This, then, being conceded by Cebes, Socrates argues that every thing that is beautiful is so from partaking of abstract beauty, and great from partaking of magnitude, and little from partaking of littleness. Now, it is impossible, he argues, that contraries can exist in the same thing at the same time; for instance, the same thing can not possess both magnitude and littleness, but one will withdraw at the approach of the other; and not only so, but things which, though not contrary to each other, yet always contain contraries within themselves, can not co-exist; for instance, the number three has no contrary, yet it contains within itself the idea of odd, which is the contrary of even, and so three never can become even; in like manner, heat while it is heat can never admit the idea of its contrary, cold. Now, if this method of reasoning is applied to the soul, it will be found to be immortal; for life and death are contraries, and never can co-exist; but wherever the soul is, there is life: so that it contains within itself that which is contrary to death, and consequently can never admit of death; therefore it is immortal.

With this he closes his arguments in support of the soul's immortality. Cebes owns himself convinced, but Simmias, though he is unable to make any objection to the soundness of Socrates's reasoning, can not help still entertaining doubts on the subject. If, however, the soul is immortal, Socrates proceeds, great need is there in this life to endeavor to become as wise and good as possible. For if death were a deliverance from every thing, it would be a great gain for the wicked; but since the soul appears to be immortal, it must go to the place suited to its nature. For it is said that each person's demon conducts him to a place where he receives sentence according to his deserts.

He then draws a fanciful picture of the various regions of the

earth, to which the good and the bad will respectively go after death, and exhorts his friends to use every endeavor to acquire virtue and wisdom in this life, “for,” he adds, “the reward is noble, and the hope great.”

Having thus brought his subject to a conclusion, Socrates proposes to bathe himself, in order not to trouble others to wash his dead body. Crito thereupon asks if he has any commands to give, and especially how he would be buried, to which he, with his usual cheerfulness, makes answer, “Just as you please, if only you can catch me;” and then, smiling, he reminds them that after death he shall be no longer with them, and begs the others of the party to be sureties to Crito for his absence from the body, as they had been before bound for his presence before his judges.

After he had bathed, and taken leave of his children and the women of his family the officer of the Eleven comes in to intimate to him that it is now time to drink the poison. Crito urges a little delay, as the sun had not yet set; but Socrates refuses to make himself ridiculous by showing such a fondness for life. The man who is to administer the poison is therefore sent for; and on his holding out the cup, Socrates, neither trembling nor changing color or countenance at all, but, as he was wont, looking steadfastly at the man, asked if he might make a libation to any one; and being told that no more poison than enough had been mixed, he simply prayed that his departure from this to another world might be happy, and then drank off the poison, readily and calmly. His friends, who had hitherto with difficulty restrained themselves, could no longer control the outward expressions of grief, to which Socrates said, “What are you doing, my friends? I, for this reason, chiefly, sent away the women, that they might not commit any folly of this kind; for I have heard that it is right to die with good omens. Be quiet, therefore, and bear up.”

When he had walked about for a while his legs began to grow heavy, so he lay down on his back; and his body, from the feet upward, gradually grew cold and stiff. His last words were, “Crito, we owe a cock to Æsculapius; pay it, therefore, and do not neglect it.”

“This,” concludes Phædo, “was the end of our friend — a man, as we may say, the best of all his time, that we have known, and,

moreover, the most wise and just.”

PHAEDO

FIRST ECHECRATES, PHÆDO. THEN SOCRATES, APOLLODORUS, CEBES, SIMMIAS, AND CRITO.

Ech. Were you personally present, Phædo, with Socrates on that day when he drank the poison in prison, or did you hear an account of it from some one else?

Phæd. I was there myself, Echecrates.

Ech. What, then, did he say before his death, and how did he die? for I should be glad to hear: for scarcely any citizen of Phlius ever visits Athens now, nor has any stranger for a long time come from thence who was able to give us a clear account of the particulars, except that he had died from drinking poison; but he was unable to tell us any thing more.

2. Phæd. And did you not hear about the trial — how it went off?

Ech. Yes; some one told me this; and I wondered that, as it took place so long ago, he appears to have died long afterward. What was the reason of this, Phædo?

Phæd. An accidental circumstance happened in his favor, Echecrates; for the poop of the ship which the Athenians send to Delos chanced to be crowned on the day before the trial.

Ech. But what is this ship?

Phæd. It is the ship, as the Athenians say, in which Theseus formerly conveyed the fourteen boys and girls to Crete, and saved both them and himself. They, therefore, made a vow to Apollo on that occasion, as it is said, that if they were saved they would every year dispatch a solemn embassy to Delos; which, from that time to the present, they send yearly to the god. 3. When they begin the preparations for this solemn embassy, they have a law that the city shall be purified during this period, and that no public execution shall take place until the ship has reached Delos, and returned to Athens; and this occasionally

takes a long time, when the winds happen to impede their passage. The commencement of the embassy is when the priest of Apollo has crowned the poop of the ship. And this was done, as I said, on the day before the trial: on this account Socrates had a long interval in prison between the trial and his death.

4. Ech. And what, Phædo, were the circumstances of his death? What was said and done? and who of his friends were with him? or would not the magistrates allow them to be present, but did he die destitute of friends?

Phæd. By no means; but some, indeed several, were present.

Ech. Take the trouble, then, to relate to me all the particulars as clearly as you can, unless you have any pressing business.

Phæd. I am at leisure, and will endeavor to give you a full account; for to call Socrates to mind, whether speaking myself or listening to some one else, is always most delightful to me.

5. Ech. And indeed, Phædo, you have others to listen to you who are of the same mind. However, endeavor to relate every thing as accurately as you can.

Phæd. I was, indeed, wonderfully affected by being present, for I was not impressed with a feeling of pity, like one present at the death of a friend; for the man appeared to me to be happy, Echecrates, both from his manner and discourse, so fearlessly and nobly did he meet his death: so much so, that it occurred to me that in going to Hades he was not going without a divine destiny, but that when he arrived there he would be happy, if any one ever was. For this reason I was entirely uninfluenced by any feeling of pity, as would seem likely to be the case with one present on so mournful an occasion; nor was I affected by pleasure from being engaged in philosophical discussions, as was our custom; for our conversation was of that kind. But an altogether unaccountable feeling possessed me, a kind of unusual mixture compounded of pleasure and pain together, when I considered that he was immediately about to die. And all of us who were present were affected in much the same manner, at one time

laughing, at another weeping — one of us especially, Apollodorus, for you know the man and his manner.

Ech. How should I not?

6. Phæd. He, then, was entirely overcome by these emotions; and I, too, was troubled, as well as the others.

Ech. But who were present, Phædo?

Phæd. Of his fellow-countrymen, this Apollodorus was present, and Critobulus, and his father, Crito; moreover, Hermogenes, Epigenes, Æschines and Antisthenes; Ctesippus the Pæanian, Menexenus, and some others of his countrymen, were also there: Plato, I think, was sick.

Ech. Were any strangers present?

Phæd. Yes; Simmias, the Theban, Cebes and Phædonides; and from Megara, Euclides and Terpsion.

7. Ech. But what! were not Aristippus and Cleombrotus present?

Phæd. No, for they were said to be at Ægina.

Ech. Was any one else there?

Phæd. I think that these were nearly all who were present.

Ech. Well, now, what do you say was the subject of conversation?

Phæd. I will endeavor to relate the whole to you from the beginning. On the preceding days I and the others were constantly in the habit of visiting Socrates, meeting early in the morning at the court house where the trial took place, for it was near the prison. 8. Here, then, we waited every day till the prison was opened, conversing with each other, for it was not opened very early; but as soon as it was opened we went in to Socrates, and usually spent the day with him. On that occasion, however, we met earlier than usual; for on the preceding day, when we left the prison in the evening, we heard that the ship had arrived from Delos. We therefore urged each

other to come as early as possible to the accustomed place. Accordingly we came; and the porter, who used to admit us, coming out, told us to wait, and not to enter until he had called us. "For," he said, "the Eleven are now freeing Socrates from his bonds, and announcing to him that he must die to-day." But in no long time he returned, and bade us enter.

9. When we entered, we found Socrates just freed from his bonds, and Xantippe, you know her, holding his little boy, and sitting by him. As soon as Xantippe saw us she wept aloud, and said such things as women usually do on such occasions — as, "Socrates, your friends will now converse with you for the last time, and you with them." But Socrates, looking towards Crito, said: "Crito, let some one take her home." Upon which some of Crito's attendants led her away, wailing and beating herself.

But Socrates, sitting up in bed, drew up his leg, and rubbed it with his hand, and as he rubbed it, said: "What an unaccountable thing, my friends, that seems to be, which men call pleasure! and how wonderfully is it related toward that which appears to be its contrary, pain, in that they will not both be present to a man at the same time! Yet if any one pursues and attains the one, he is almost always compelled to receive the other, as if they were both united together from one head."

10. "And it seems tome," he said, "that if Æsop had observed this he would have made a fable from it, how the deity, wishing to reconcile these warring principles, when he could not do so, united their heads together, and from hence whomsoever the one visits the other attends immediately after; as appears to be the case with me, since I suffered pain in my leg before from the chain, but now pleasure seems to have succeeded."

Hereupon Cebes, interrupting him, said: "By Jupiter! Socrates, you have done well in reminding me; with respect to the poems which you made, by putting into metre those Fables of Æsop and the hymn to Apollo, several other persons asked me, and especially Evenus recently, with what design you made them after you came here, whereas before you had never made any. 11. If therefore, you care at all that I should be able to answer Evenus, when he asks me again — for I am sure he will do so — tell me what I must say to

him.”

“Tell him the truth, then, Cebes,” he replied, “that I did not make them from a wish to compete with him, or his poems, for I knew that this would be no easy matter; but that I might discover the meaning of certain dreams, and discharge my conscience, if this should happen to be the music which they have often ordered me to apply myself to. For they were to the following purport: often in my past life the same dream visited me, appearing at different times in different forms, yet always saying the same thing— ‘Socrates,’ it said, ‘apply yourself to and practice music.’ 12. And I formerly supposed that it exhorted and encouraged me to continue the pursuit I was engaged in, as those who cheer on racers, so that the dream encouraged me to continue the pursuit I was engaged in — namely, to apply myself to music, since philosophy is the highest music, and I was devoted to it. But now since my trial took place, and the festival of the god retarded my death, it appeared to me that if by chance the dream so frequently enjoined me to apply myself to popular music, I ought not to disobey it, but do so, for that it would be safer for me not to depart hence before I had discharged my conscience by making some poems in obedience to the dream. Thus, then, I first of all composed a hymn to the god whose festival was present; and after the god, considering that a poet, if he means to be a poet, ought to make fables, and not discourses, and knowing that I was not skilled in making fables, I therefore put into verse those Fables of Æsop, which were at hand, and were known to me, and which first occurred to me.”

13. “Tell this, then, to Evenus, Cebes, and bid him farewell, and if he is wise, to follow me as soon as he can. But I depart, as it seems, to-day; for so the Athenians order.”

To this Simmias said, “What is this, Socrates, which you exhort Evenus to do? for I often meet with him; and, from what I know of him, I am pretty certain that he will not at all be willing to comply with your advice.”

“What, then,” said he, “is not Evenus a philosopher?”

“To me he seems to be so,” said Simmias.

“Then he will be willing,” rejoined Socrates, “and so will every one who worthily engages in this study. Perhaps, indeed, he will not

commit violence on himself; for that, they say, is not allowable.” And as he said this he let down his leg from the bed on the ground, and in this posture continued during the remainder of the discussion.

Cebes then asked him, “What do you mean, Socrates, by saying that it is not lawful to commit violence on one’s self, but that a philosopher should be willing to follow one who is dying?”

14. “What, Cebes! have not you and Simmias, who have conversed familiarly with Philolaus on this subject, heard?”

“Nothing very clearly, Socrates.”

“I, however, speak only from hearsay; what, then, I have heard I have no scruple in telling. And perhaps it is most becoming for one who is about to travel there to inquire and speculate about the journey thither, what kind we think it is. What else can one do in the interval before sunset?”

“Why, then, Socrates, do they say that it is not allowable to kill one’s self? for I, as you asked just now, have heard both Philolaus, when he lived with us, and several others, say that it was not right to do this; but I never heard any thing clear upon the subject from any one.”

15. “Then, you should consider it attentively,” said Socrates, “for perhaps you may hear. Probably, however, it will appear wonderful to you, if this alone, of all other things, is a universal truth, and it never happens to a man, as is the case in all other things, that at some times and to some persons only it is better to die than to live; yet that these men for whom it is better to die — this probably will appear wonderful to you — may not without impiety do this good to themselves, but must await another benefactor.”

16. Then Cebes, gently smiling, said, speaking in his own dialect, “Jove be witness!”

“And, indeed,” said Socrates, “it would appear to be unreasonable; yet still, perhaps, it has some reason on its side. The maxim, indeed, given on this subject in the mystical doctrines, that we men are in a kind of prison, and that we ought not to free ourselves from it and escape, appears to me difficult to be understood, and not easy to penetrate. This, however, appears to me, Cebes, to be well said: that the gods take care of us, and that we men are one of their possessions. Does it not seem so to you?”

“It does,” replied Cebes.

“Therefore,” said he, “if one of your slaves were to kill himself, without your having intimated that you wished him to die, should you not be angry with him, and should you not punish him if you could?”

“Certainly,” he replied.

“Perhaps, then, in this point of view, it is not unreasonable to assert that a man ought not to kill himself before the deity lays him under a necessity of doing so, such as that now laid on me.”

17. “This, indeed,” said Cebes, “appears to be probable. But what you said just now, Socrates, that philosophers should be very willing to die, appears to be an absurdity, if what we said just now is agreeable to reason — that it is God who takes care of us, and that we are his property. For that the wisest men should not be grieved at leaving that service in which they govern them who are the best of all masters — namely, the gods — is not consistent with reason; for surely he can not think that he will take better care of himself when he has become free. But a foolish man might perhaps think thus, that he should fly from his master, and would not reflect that he ought not to fly from a good one, but should cling to him as much as possible; therefore he would fly against all reason; but a man of sense would desire to be constantly with one better than himself. Thus, Socrates, the contrary of what you just now said is likely to be the case; for it becomes the wise to be grieved at dying, but the foolish to rejoice.”

18. Socrates, on hearing this, appeared to me to be pleased with the pertinacity of Cebes, and, looking toward us, said, “Cebes, you see, always searches out arguments, and is not at all willing to admit at once any thing one has said.”

Whereupon Simmias replied, “But, indeed, Socrates, Cebes appears to me now to say something to the purpose; for with what design should men really wise fly from masters who are better than themselves, and so readily leave them? And Cebes appears to me to direct his argument against you, because you so easily endure to abandon both us and those good rulers, as you yourself confess, the gods.”

“You speak justly,” said Socrates, “for I think you mean that I ought to make my defense to this charge, as if I were in a court of

justice.”

“Certainly,” replied Simmias.

19. “Come, then,” said he, “I will endeavor to defend myself more successfully before you than before the judges. For,” he proceeded, “Simmias and Cebes, if I did not think that I should go, first of all, among other deities who are both wise and good, and, next, among men who have departed this life, better than any here, I should be wrong in not grieving at death; but now, be assured, I hope to go among good men, though I would not positively assert it. That, however, I shall go among gods who are perfectly good masters, be assured I can positively assert this, if I can any thing of the kind. So that, on this account, I am not so much troubled, but I entertain a good hope that something awaits those who die, and that, as was said long since, it will be far better for the good than the evil.”

20. “What, then, Socrates,” said Simmias, “would you go away keeping this persuasion to yourself, or would you impart it to us? For this good appears to me to be also common to us; and at the same time it will be an apology for you, if you can persuade us to believe what you say.”

“I will endeavor to do so,” he said. “But first let us attend to Crito here, and see what it is he seems to have for some time wished to say.”

“What else, Socrates,” said Crito, “but what he who is to give you the poison told me some time ago, that I should tell you to speak as little as possible? For he says that men become too much heated by speaking, and that nothing of this kind ought to interfere with the poison; and that, otherwise, those who did so were sometimes compelled to drink two or three times.”

To which Socrates replied, “Let him alone, and let him attend to his own business, and prepare to give it me twice, or, if occasion require, even thrice.”

21. “I was almost certain what you would say,” answered Crito, “but he has been some time pestering me.”

“Never mind him,” he rejoined.

“But now I wish to render an account to you, my judges, of the reason why a man who has really devoted his life to philosophy, when he is about to die, appears to me, on good grounds, to have

confidence, and to entertain a firm hope that the greatest good will befall him in the other world when he has departed this life. How, then, this comes to pass, Simmias and Cebes, I will endeavor to explain.”

“For as many as rightly apply themselves to philosophy seem to have left all others in ignorance, that they aim at nothing else than to die and be dead. If this, then, is true, it would surely be absurd to be anxious about nothing else than this during their whole life, but, when it arrives, to be grieved at what they have been long anxious about and aimed at.”

22. Upon this, Simmias, smiling, said, “By Jupiter! Socrates, though I am not now at all inclined to smile, you have made me do so; for I think that the multitude, if they heard this, would think it was very well said in reference to philosophers, and that our countrymen particularly would agree with you, that true philosophers do desire death, and that they are by no means ignorant that they deserve to suffer it.”

“And, indeed, Simmias, they would speak the truth, except in asserting that they are not ignorant; for they are ignorant of the sense in which true philosophers desire to die, and in what sense they deserve death, and what kind of death. But,” he said, “let us take leave of them, and speak to one another. Do we think that death is any thing?”

“Certainly,” replied Simmias.

23. “Is it any thing else than the separation of the soul from the body? And is not this to die, for the body to be apart by itself separated from the soul, and for the soul to subsist apart by itself separated from the body? Is death any thing else than this?”

“No, but this,” he replied.

“Consider, then, my good friend, whether you are of the same opinion as I; for thus, I think, we shall understand better the subject we are considering. Does it appear to you to be becoming in a philosopher to be anxious about pleasures, as they are called, such as meats and drinks?”

“By no means, Socrates,” said Simmias.

“But what? about the pleasures of love?”

“Not at all.”

24. "What, then? Does such a man appear to you to think other bodily indulgences of value? For instance, does he seem to you to value or despise the possession of magnificent garments and sandals, and other ornaments of the body except so far as necessity compels him to use them?"

"The true philosopher," he answered, "appears to me to despise them."

"Does not, then," he continued, "the whole employment of such a man appear to you to be, not about the body, but to separate himself from it as much as possible, and be occupied about his soul?"

"It does."

"First of all, then, in such matters, does not the philosopher, above all other men, evidently free his soul as much as he can from communion with the body?"

"It appears so."

25. "And it appears, Simmias, to the generality of men, that he who takes no pleasure in such things, and who does not use them, does not deserve to live; but that he nearly approaches to death who cares nothing for the pleasures that subsist through the body."

"You speak very truly."

"But what with respect to the acquisition of wisdom? Is the body an impediment, or not, if any one takes it with him as a partner in the search? What I mean is this: Do sight and hearing convey any truth to men, or are they such as the poets constantly sing, who say that we neither hear nor see any thing with accuracy? If, however, these bodily senses are neither accurate nor clear, much less can the others be so; for they are all far inferior to these. Do they not seem so to you?"

"Certainly," he replied.

26. "When, then," said he, "does the soul light on the truth? for when it attempts to consider any thing in conjunction with the body, it is plain that it is then led astray by it."

"You say truly."

"Must it not, then, be by reasoning, if at all, that any of the things that really are become known to it?"

"Yes."

"And surely the soul then reasons best when none of these things

disturb it — neither hearing, nor sight, nor pain, nor pleasure of any kind; but it retires as much as possible within itself, taking leave of the body; and, so far as it can, not communicating or being in contact with it, it aims at the discovery of that which is.”

“Such is the case.”

“Does not, then, the soul of the philosopher, in these cases, despise the body, and flee from it, and seek to retire within itself?”

“It appears so.”

27. “But what as to such things as these, Simmias? Do we say that justice itself is something or nothing?”

“We say it is something, by Jupiter!”

“And that beauty and goodness are something?”

“How not?”

“Now, then, have you ever seen any thing of this kind with your eyes?”

“By no means,” he replied.

“Did you ever lay hold of them by any other bodily sense? But I speak generally, as of magnitude, health, strength and, in a word, of the essence of every thing; that is to say, what each is. Is, then, the exact truth of these perceived by means of the body, or is it thus, whoever among us habituates himself to reflect most deeply and accurately on each several thing about which he is considering, he will make the nearest approach to the knowledge of it?”

“Certainly.”

28. “Would not he, then, do this with the utmost purity, who should in the highest degree approach each subject by means of the mere mental faculties, neither employing the sight in conjunction with the reflective faculty, nor introducing any other sense together with reasoning; but who, using pure reflection by itself, should attempt to search out each essence purely by itself, freed as much as possible from the eyes and ears, and, in a word, from the whole body, as disturbing the soul, and not suffering it to acquire truth and wisdom, when it is in communion with it. Is not he the person, Simmias, if any one can, who will arrive at the knowledge of that which is?”

29. “You speak with wonderful truth, Socrates,” replied Simmias.

“Wherefore,” he said, “it necessarily follows from all this that

some such opinion as this should be entertained by genuine philosophers, so that they should speak among themselves as follows: 'A by-path, as it were, seems to lead us on in our researches undertaken by reason,' because so long as we are encumbered with the body, and our soul is contaminated with such an evil, we can never fully attain to what we desire; and this, we say, is truth. For the body subjects us to innumerable hinderances on account of its necessary support; and, moreover, if any diseases befall us, they impede us in our search after that which is; and it fills us with longings, desires, fears, all kinds of fancies, and a multitude of absurdities, so that, as it is said in real truth, by reason of the body it is never possible for us to make any advances in wisdom. 30. For nothing else than the body and its desires occasion wars, seditions, and contests; for all wars among us arise on account of our desire to acquire wealth: and we are compelled to acquire wealth on account of the body, being enslaved to its service; and consequently on all these accounts we are hindered in the pursuit of philosophy. But the worst of all is, that if it leaves us any leisure, and we apply ourselves to the consideration of any subject, it constantly obtrudes itself in the midst of our researches, and occasions trouble and disturbance, and confounds us so that we are not able, by reason of it, to discern the truth. It has, then, in reality been demonstrated to us that if we are ever to know any thing purely, we must be separated from the body, and contemplate the things themselves by the mere soul; and then, as it seems, we shall obtain that which we desire, and which we profess ourselves to be lovers of — wisdom — when we are dead, as reason shows, but not while we are alive. 31. For if it is not possible to know any thing purely in conjunction with the body, one of these two things must follow, either that we can never acquire knowledge, or only after we are dead; for then the soul will subsist apart by itself, separate from the body, but not before. And while we live we shall thus, as it seems, approach nearest to knowledge, if we hold no intercourse or communion at all with the body, except what absolute necessity requires, nor suffer ourselves to be polluted by its nature, but purify ourselves from it, until God himself shall release us. And thus being pure, and freed from the folly of body, we shall in all likelihood be with others like ourselves, and shall of ourselves know

the whole real essence, and that probably is truth; for it is not allowable for the impure to attain to the pure. Such things, I think, Simmias, all true lovers of wisdom must both think and say to one another. Does it not seem so to you?"

"Most assuredly, Socrates."

32. "If this, then," said Socrates, "is true, my friend, there is great hope for one who arrives where I am going, there, if anywhere, to acquire that in perfection for the sake of which we have taken so much pains during our past life; so that the journey now appointed me is set out upon with good hope, and will be so by any other man who thinks that his mind has been, as it were, purified."

"Certainly," said Simmias.

"But does not purification consist in this, as was said in a former part of our discourse, in separating as much as possible the soul from the body, and in accustoming it to gather and collect itself by itself on all sides apart from the body, and to dwell, so far as it can, both now and hereafter, alone by itself, delivered, as it were, from the shackles of the body?"

"Certainly," he replied.

33. "Is this, then, called death, this deliverance and separation of the soul from the body?"

"Assuredly," he answered.

"But, as we affirmed, those who pursue philosophy rightly are especially and alone desirous to deliver it; and this is the very study of philosophers, the deliverance and separation of the soul from the body, is it not?"

"It appears so."

"Then, as I said at first, would it not be ridiculous for a man who has endeavored throughout his life to live as near as possible to death, then, when death arrives, to grieve? would not this be ridiculous?"

"How should it not?"

"In reality, then, Simmias," he continued, "those who pursue philosophy rightly, study to die; and to them, of all men, death is least formidable. Judge from this. Since they altogether hate the body and desire to keep the soul by itself, would it not be irrational if, when this comes to pass, they should be afraid and grieve, and not be

glad to go to that place where, on their arrival, they may hope to obtain that which they longed for throughout life? But they longed for wisdom, and to be freed from association with that which they hated. 34. Have many of their own accord wished to descend into Hades, on account of human objects of affection, their wives and sons, induced by this very hope of their seeing and being with those whom they have loved? and shall one who really loves wisdom, and firmly cherishes this very hope, that he shall nowhere else attain it in a manner worthy of the name, except in Hades, be grieved at dying, and not gladly go there? We must think that he would gladly go, my friend, if he be in truth a philosopher; for he will be firmly persuaded of this, that he will nowhere else than there attain wisdom in its purity; and if this be so, would it not be very irrational, as I just now said, if such a man were to be afraid of death?"

"Very much so, by Jupiter!" he replied.

35. "Would not this, then," he resumed, "be a sufficient proof to you with respect to a man whom you should see grieved when about to die, that he was not a lover of wisdom, but a lover of his body? And this same person is probably a lover of riches and a lover of honor, one or both of these."

"It certainly is as you say," he replied.

"Does not, then," he said, "that which is called fortitude, Simmias, eminently belong to philosophers?"

"By all means," he answered.

"And temperance, also, which even the multitude call temperance, and which consists in not being carried away by the passions, but in holding them in contempt, and keeping them in subjection, does not this belong to those only who most despise the body, and live in the study of philosophy?"

"Necessarily so," he replied.

36. "For," he continued, "if you will consider the fortitude and temperance of others, they will appear to you to be absurd."

"How so, Socrates?"

"Do you know," he said, "that all others consider death among the great evils?"

"They do indeed," he answered.

"Then, do the brave among them endure death when they do

endure it, through dread of greater evils?"

"It is so."

"All men, therefore, except philosophers, are brave through being afraid and fear; though it is absurd that any one should be brave through fear and cowardice."

"Certainly."

"But what, are not those among them who keep their passions in subjection affected in the same way? and are they not temperate through a kind of intemperance? And although we may say, perhaps, that this is impossible, nevertheless the manner in which they are affected with respect to this silly temperance resembles this, for, fearing to be deprived of other pleasures, and desiring them, they abstain from some, being mastered by others. And though they call intemperance the being governed by pleasures, yet it happens to them that, by being mastered by some pleasures, they master others, and this is similar to what was just now said, that in a certain manner they become temperate through intemperance."

"So it seems,"

37. "My dear Simmias, consider that this is not a right exchange for virtue, to barter pleasures for pleasures, pains for pains, fear for fear, and the greater for the lesser, like pieces of money, but that that alone is the right coin, for which we ought to barter all these things, wisdom, and for this and with this everything is in reality bought and sold Fortitude, temperance and justice, and, in a word true virtue, subsist with wisdom, whether pleasures and fears, and everything else of the kind, are present or absent, but when separated from wisdom and changed one for another, consider whether such virtue is not a mere outline and in reality servile, possessing neither soundness nor truth. But the really true virtue is a purification from all such things, and temperance, justice, fortitude and wisdom itself, are a kind of initiatory purification 38. And those who instituted the mysteries for us appear to have been by no means contemptible, but in reality to have intimated long since that whoever shall arrive in Hades unexpiated and uninitiated shall lie in mud, but he that arrives there purified and initiated shall dwell with the gods 'For there are,' say those who preside at the mysteries, 'many wand-bearers, but few inspired'. These last, in my opinion, are no other than those who

have pursued philosophy rightly that I might be of their number. I have to the utmost of my ability left no means untried, but have endeavored to the utmost of my power. But whether I have endeavored rightly, and have in any respect succeeded, on arriving there I shall know clearly, if it please God — very shortly, as it appears to me.”

39. “Such, then, Simmias and Cebes,” he added, “is the defense I make, for that I, on good grounds, do not repine or grieve at leaving you and my masters here, being persuaded that there, no less than here, I shall meet with good masters and friends. But to the multitude this is incredible. If, however, I have succeeded better with you in my defense than I did with the Athenian judges, it is well.”

When Socrates had thus spoken, Cebes, taking up the discussion, said “Socrates, all the rest appears to me to be said rightly, but what you have said respecting the soul will occasion much incredulity in many from the apprehension that when it is separated from the body it no longer exists anywhere, but is destroyed and perishes on the very day in which a man dies, and that immediately it is separated and goes out from the body it is dispersed, and vanishes like breath or smoke, and is no longer anywhere, since if it remained anywhere united in itself, and freed from those evils which you have just now enumerated, there would be an abundant and good hope, Socrates, that what you say is true 40. But this probably needs no little persuasion and proof, that the soul of a man who dies exists, and possesses activity and intelligence.”

“You say truly, Cebes,” said Socrates, “but what shall we do? Are you willing that we should converse on these points, whether such is probably the case or not?”

“Indeed,” replied Cebes, “I should gladly hear your opinion on these matters.”

“I do not think,” said Socrates, “that any one who should now hear us, even though he were a comic poet, would say that I am talking idly, or discoursing on subjects that do not concern me. If you please, then, we will examine into it. Let us consider it in this point of view, whether the souls of men who are dead exist in Hades, or not. This is an ancient saying, which we now call to mind, that souls departing hence exist there, and return hither again, and are produced

from the dead. 41. And if this is so, that the living are produced again from the dead, can there be any other consequence than that our souls are there? for surely they could not be produced again if they did not exist; and this would be sufficient proof that these things are so, if it should in reality be evident that the living are produced from no other source than the dead. But if this is not the case, there will be need of other arguments.”

“Certainly,” said Cebes.

“You must not, then,” he continued, “consider this only with respect to men, if you wish to ascertain it with greater certainty, but also with respect to all animals and plants, and, in a word, with respect to every thing that is subject to generation. Let us see whether they are not all so produced, no otherwise than contraries from contraries, wherever they have any such quality; as, for instance, the honorable is contrary to the base, and the just to the unjust, and so with ten thousand other things. 42. Let us consider this, then, whether it is necessary that all things which have a contrary should be produced from nothing else than their contrary. As, for instance, when any thing becomes greater, is it not necessary that, from being previously smaller, it afterward became greater?”

“Yes.”

“And if it becomes smaller, will it not, from being previously greater, afterward become smaller?”

“It is so,” he replied.

“And from stronger, weaker? and from slower, swifter?”

“Certainly.”

“What, then? If any thing becomes worse, must it not become so from better? and if more just, from more unjust?”

“How should it not?”

“We have then,” he said, “sufficiently determined this, that all things are thus produced, contraries from contraries?”

“Certainly.”

“What next? Is there also something of this kind in them; for instance, between all two contraries a mutual twofold production, from one to the other, and from that other back again? for between a greater thing and a smaller there are increase and decrease, and do we not accordingly call the one to increase, the other to decrease?”

“Yes,” he replied.

43. “And must not to be separated and commingled, to grow cold and to grow warm, and every thing in the same manner, even though sometimes we have not names to designate them, yet in fact be everywhere thus circumstanced, of necessity, as to be produced from each other, and be subject to a reciprocal generation?”

“Certainly,” he replied.

“What, then?” said Socrates, “has life any contrary, as waking has its contrary, sleeping?”

“Certainly,” he answered.

“What?”

“Death,” he replied.

“Are not these, then, produced from each other, since they are contraries; and are not the modes by which they are produced two-fold intervening between these two?”

“How should it be otherwise?”

“I then,” continued Socrates, “will describe to you one pair of the contraries which I have just now mentioned, both what it is and its mode of production: and do you describe to me the other. I say that one is to sleep, the other to awake; and from sleeping awaking is produced, and from awaking sleeping, and that the modes of their production are, the one to fall asleep, the other to be roused. 44. Have I sufficiently explained this to you or not?”

“Certainly.”

“Do you, then,” he said, “describe to me in the same manner with respect to life and death? Do you not say that life is contrary to death?”

“I do.”

“And that they are produced from each other?”

“Yes.”

“What, then, is produced from life?”

“Death,” he replied.

“What, then,” said he “is produced from death?”

“I must needs confess,” he replied, “that life is.”

“From the dead, then, O Cebes! living things and living men are produced.”

“It appears so,” he said.

“Our souls, therefore,” said Socrates, “exist in Hades.”

“So it seems.”

“With respect, then, to their mode of production, is not one of them very clear? for to die surely is clear, is it not?”

“Certainly,” he replied.

“What, then, shall we do?” he continued; “shall we not find a corresponding contrary mode of production, or will nature be defective in this? Or must we discover a contrary mode of production to dying?”

“By all means,” he said.

“What is this?”

“To revive.”

“Therefore,” he proceeded, “if there is such a thing as to revive, will not this reviving be a mode of production from the dead to the living?”

“Certainly.”

“Thus, then, we have agreed that the living are produced from the dead, no less than the dead from the living; but, this being the case, there appears to me sufficient proof that the souls of the dead must necessarily exist somewhere, from whence they are again produced.”

45. “It appears to me, Socrates,” he said “that this must necessarily follow from what has been admitted.”

“See now, O Cebes!” he said, “that we have not agreed on these things improperly, as it appears to me; for if one class of things were not constantly given back in the place of another, revolving, as it were, in a circle, but generation were direct from one thing alone into its opposite, and did not turn round again to the other, or retrace its course, do you know that all things would at length have the same form, be in the same state, and cease to be produced?”

“How say you?” he asked.

“It is by no means difficult,” he replied, “to understand what I mean; if, for instance, there should be such a thing as falling asleep, but no reciprocal waking again produced from a state of sleep, you know that at length all things would show the fable of Endymion to be a jest, and it would be thought nothing at all of, because everything else would be in the same state as he — namely, asleep. And if all things were mingled together, but never separated, that

doctrine of Anaxagoras would soon be verified, 'all things would be together.' 46. Likewise, my dear Cebes, if all things that partake of life should die, and after they are dead should remain in this state of death, and not revive again, would it not necessarily follow that at length all things should be dead, and nothing alive? For if living beings are produced from other things, and living beings die, what could prevent their being all absorbed in death?"

"Nothing whatever, I think, Socrates," replied Cebes; "but you appear to me to speak the exact truth."

"For, Cebes," he continued, "as it seems to me, such undoubtedly is the case, and we have not admitted these things under a delusion, for it is in reality true that there is a reviving again, that the living are produced from the dead, that the souls of the dead exist, and that the condition of the good is better, and of the evil worse."

47. "And, indeed," said Cebes, interrupting him, "according to that doctrine, Socrates, which you are frequently in the habit of advancing, if it is true, that our learning is nothing else than reminiscence, according to this it is surely necessary that we must at some former time have learned what we now remember. But this is impossible, unless our soul existed somewhere before it came into this human form; so that from hence, also, the soul appears to be something immortal."

"But, Cebes," said Simmias, interrupting him, "what proofs are there of these things? Remind me of them, for I do not very well remember them at present."

48. "It is proved," said Cebes, "by one argument, and that a most beautiful one, that men, when questioned (if one questions them properly) of themselves, describe all things as they are, however, if they had not innate knowledge and right reason, they would never be able to do this. Moreover, if one leads them to diagrams, or any thing else of the kind, it is then most clearly apparent that this is the case."

"But if you are not persuaded in this way, Simmias," said Socrates, "see if you will agree with us in considering the matter thus. For do you doubt how that which is called learning is reminiscence?"

"I do not doubt," said Simmias; "but I require this very thing of which we are speaking, to be reminded; and, indeed, from what

Cebes has begun to say, I almost now remember, and am persuaded; nevertheless, however, I should like to hear now how you would attempt to prove it.”

“I do it thus” he replied: “we admit, surely, that if any one be reminded of any thing, he must needs have known that thing at some time or other before.”

“Certainly,” he said.

49. “Do we, then, admit this also, that when knowledge comes in a certain manner it is reminiscence? But the manner I mean is this: if any one, upon seeing or hearing, or perceiving through the medium of any other sense, some particular thing, should not only know that, but also form an idea of something else, of which the knowledge is not the same, but different, should we not justly say that he remembered that of which he received the idea?”

“How mean you?”

“For instance, the knowledge of a man is different from that of a lyre.”

“How not?”

“Do you not know, then, that lovers when they see a lyre, or a garment, or any thing else which their favorite is accustomed to use, are thus affected; they both recognize the lyre, and receive in their minds the form of the person to whom the lyre belonged? This is reminiscence: just as any one, seeing Simmias, is often reminded of Cebes, and so in an infinite number of similar instances.”

“An infinite number, indeed, by Jupiter!” said Simmias.

“Is not, then,” he said, “something of this sort a kind of reminiscence, especially when one is thus affected with respect to things which, from lapse of time, and not thinking of them, one has now forgotten?”

“Certainly,” he replied.

50. “But what?” he continued. “Does it happen that when one sees a painted horse or a painted lyre one is reminded of a man, and that when one sees a picture of Simmias one is reminded of Cebes?”

“Certainly.”

“And does it not also happen that on seeing a picture of Simmias one is reminded of Simmias himself?”

“It does, indeed,” he replied.

“Does it not happen, then, according to all this, that reminiscence arises partly from things like, and partly from things unlike?”

“It does.”

“But when one is reminded by things like, is it not necessary that one should be thus further affected, so as to perceive whether, as regards likeness, this falls short or not of the thing of which one has been reminded?”

“It is necessary,” he replied.

“Consider, then,” said Socrates, “if the case is thus. Do we allow that there is such a thing as equality? I do not mean of one log with another, nor one stone with another, nor any thing else of this kind, but something altogether different from all these — abstract equality; do we allow that there is any such thing, or not?”

“By Jupiter! we most assuredly do allow it,” replied Simmias.

51. “And do we know what it is itself?”

“Certainly,” he replied.

“Whence have we derived the knowledge of it? Is it not from the things we have just now mentioned, and that from seeing logs, or stones, or other things of the kind, equal, we have from these formed an idea of that which is different from these — for does it not appear to you to be different? Consider the matter thus. Do not stones that are equal, and logs sometimes that are the same, appear at one time equal, and at another not?”

“Certainly.”

“But what? Does abstract equality ever appear to you unequal? or equality inequality?”

“Never, Socrates, at any time.”

“These equal things, then,” he said, “and abstract equality, are not the same?”

“By no means, Socrates, as it appears.”

“However, from these equal things,” he said, “which are different from that abstract equality, have you not formed your idea and derived your knowledge of it?”

“You speak most truly,” he replied.

“Is it not, therefore, from its being like or unlike them?”

“Certainly.”

“But it makes no difference,” he said. “When, therefore, on seeing

one thing, you form, from the sight of it, the notion of another, whether like or unlike, this," he said, "must necessarily be reminiscence."

"Certainly."

52. "What, then, as to this?" he continued. "Are we affected in any such way with regard to logs and the equal things we have just now spoken of? And do they appear to us to be equal in the same manner as abstract equality itself is, or do they fall short in some degree, or not at all, of being such as equality itself is?"

"They fall far short," he replied.

"Do we admit, then, that when one, on beholding some particular thing, perceives that it aims, as that which I now see, at being like something else that exists, but falls short of it, and can not become such as that is, but is inferior to it — do we admit that he who perceives this must necessarily have had a previous knowledge of that which he says it resembles, though imperfectly?"

"It is necessary."

"What, then? Are we affected in some such way, or not, with respect to things equal and abstract equality itself?"

"Assuredly."

"It is necessary, therefore, that we must have known abstract equality before the time when, on first seeing equal things, we perceived that they all aimed at resembling equality, but failed in doing so."

"Such is the case."

53. "Moreover, we admit this too, that we perceived this, and could not possibly perceive it by any other means than the sight, or touch, or some other of the senses, for I say the same of them all."

"For they are the same, Socrates, so far as, our argument is concerned."

"However, we must perceive, by means of the senses, that all things which come under the senses aim at that abstract equality, and yet fall short of it; or how shall we say it is?"

"Even so."

"Before, then, we began to see, and hear, and use our other senses, we must have had a knowledge of equality itself — what it is, if we were to refer to it those equal things that come under the senses, and

observe that all such things aim at resembling that, but fall far short of it.”

“This necessarily follows, Socrates, from what has been already said.”

“But did we not, as soon as we were born, see and hear, and possess our other senses?”

“Certainly.”

“But, we have said, before we possessed these, we must have had a knowledge of abstract equality?”

“Yes.”

“We must have had it, then, as it seems, before we were born.”

“It seems so.”

54. “If, therefore, having this before we were born, we were born possessing it, we knew, both before we were born and as soon as we were born, not only the equal and the greater and smaller, but all things of the kind; for our present discussion is not more respecting equality than the beautiful itself, the good, the just, and the holy, and, in one word, respecting every thing which we mark with the seal of existence, both in the questions we ask and the answers we give. So that we must necessarily have had a knowledge of all these before we were born.”

“Such is the case.”

“And if, having once had it, we did not constantly forget it, we should always be born with this knowledge, and should always retain it through life. For to know is this, when one has got a knowledge of any thing, to retain and not lose it; for do we not call this oblivion, Simmias, the loss of knowledge?”

“Assuredly, Socrates,” he replied.

55. “But if, having had it before we were born, we lose it at our birth, and afterward, through exercising the senses about these things, we recover the knowledge which we once before possessed, would not that which we call learning be a recovery of our own knowledge? And in saying that this is to remember, should we not say rightly?”

“Certainly.”

“For this appeared to be possible, for one having perceived any thing, either by seeing or hearing, or employing any other sense, to

form an idea of something different from this, which he had forgotten, and with which this was connected by being unlike or like. So that, as I said, one of these two things must follow: either we are all born with this knowledge, and we retain it through life, or those whom we say learn afterward do nothing else than remember, and this learning will be reminiscence.”

“Such, certainly, is the case, Socrates.”

56. “Which, then, do you choose, Simmias: that we are born with knowledge, or that we afterward remember what we had formerly known?”

“At present, Socrates, I am unable to choose.”

“But what? Are you able to choose in this case, and what do you think about it? Can a man who possesses knowledge give a reason for the things that he knows, or not?”

“He needs must be able to do so, Socrates,” he replied.

“And do all men appear to you to be able to give a reason for the things of which we have just now been speaking?”

“I wish they could,” said Simmias; “but I am much more afraid that at this time to-morrow there will no longer be any one able to do this properly.”

“Do not all men, then, Simmias,” he said, “seem to you to know these things?”

“By no means.”

“Do they remember, then, what they once learned?”

“Necessarily so.”

“When did our souls receive this knowledge? Not surely, since we were born into the world.”

“Assuredly not.”

“Before, then?”

“Yes.”

“Our souls, therefore, Simmias, existed before they were in a human form, separate from bodies, and possessed intelligence.”

57. “Unless, Socrates, we receive this knowledge at our birth, for this period yet remains.”

“Be it so, my friend. But at what other time do we lose it? for we are not born with it, as we have just now admitted. Do we lose it, then, at the very time in which we receive it? Or can you mention

any other time?"

"By no means, Socrates; I was not aware that I was saying nothing to the purpose."

"Does the case then stand thus with us, Simmias?" he proceeded: "If those things which we are continually talking about really exist, the beautiful, the good, and every such essence, and to this we refer all things that come under the senses, as finding it to have a prior existence, and to be our own, and if we compare these things to it, it necessarily follows, that as these exist, so likewise our soul exists even before we are born; but if these do not exist, this discussion will have been undertaken in vain, is it not so? And is there not an equal necessity both that these things should exist, and our souls also, before we are born; and if not the former, neither the latter?"

58. "Most assuredly, Socrates," said Simmias, "there appears to me to be the same necessity; and the argument admirably tends to prove that our souls exist before we are born, just as that essence does which you have now mentioned. For I hold nothing so clear to me as this, that all such things most certainly exist, as the beautiful, the good, and all the rest that you just now spoke of; and, so far as I am concerned, the case is sufficiently demonstrated."

"But how does it appear to Cebes?" said Socrates; "for it is necessary to persuade Cebes too."

"He is sufficiently persuaded, I think," said Simmias, "although he is the most pertinacious of men in distrusting arguments. Yet I think he is sufficiently persuaded of this, that our soul existed before we were born. But whether, when we are dead, it will still exist does not appear to me to have been demonstrated, Socrates," he continued; "but that popular doubt, which Cebes just now mentioned, still stands in our way, whether, when a man dies, the soul is not dispersed, and this is the end of its existence. 59. For what hinders it being born, and formed from some other source, and existing before it came into a human body, and yet, when it has come, and is separated from this body, its then also dying itself, and being destroyed?"

"You say well, Simmias," said Cebes; "for it appears that only one half of what is necessary has been demonstrated — namely, that our soul existed before we were born; but it is necessary to demonstrate

further, that when we are dead it will exist no less than before we were born, if the demonstration is to be made complete.”

“This has been even now demonstrated, Simmias and Cebes,” said Socrates, “if you will only connect this last argument with that which we before assented to, that every thing living is produced from that which is dead. For if the soul exists before, and it is necessary for it when it enters into life, and is born, to be produced from nothing else than death, and from being dead, how is it not necessary for it also to exist after death, since it must needs be produced again? 60. What you require, then, has been already demonstrated. However, both you and Simmias appear to me as if you wished to sift this argument more thoroughly, and to be afraid, like children, lest, on the soul’s departure from the body, the winds should blow it away and disperse it, especially if one should happen to die, not in a calm, but in a violent storm.”

Upon this Cebes, smiling, said, “Endeavor to teach us better, Socrates, as if we were afraid, or rather not as if we were afraid, though perhaps there is some boy within us who has such a dread. Let us, then, endeavor to persuade him not to be afraid of death, as of hobgoblins.”

“But you must charm him every day,” said Socrates, “until you have quieted his fears.”

“But whence, Socrates,” he said, “can we procure a skillful charmer for such a case, now that you are about to leave us?”

61. “Greece is wide, Cebes,” he replied, “and in it surely there are skillful men. There are also many barbarous nations, all of which you should search through, seeking such a charmer, sparing neither money nor toil, as there is nothing on which you can more seasonably spend your money. You should also seek for him among yourselves; for perhaps you could not easily find any more competent than yourselves to do this.”

“This shall be done,” said Cebes; “but, if it is agreeable to you, let us return to the point from whence we digressed.”

“It will be agreeable to me, for how should it not?”

“You say well,” rejoined Cebes.

“We ought, then,” said Socrates, “to ask ourselves some such question as this: to what kind of thing it appertains to be thus affected

— namely, to be dispersed — and for what we ought to fear, lest it should be so affected, and for what not. And after this we should consider which of the two the soul is, and in the result should either be confident or fearful for our soul.”

“You speak truly,” said he.

62. “Does it not, then, appertain to that which is formed by composition, and is naturally compounded, to be thus affected, to be dissolved in the same manner as that in which it was compounded; and if there is any thing not compounded, does it not appertain to this alone, if to any thing, not to be thus affected?”

“It appears to me to be so,” said Cebes.

“Is it not most probable, then, that things which are always the same, and in the same state, are uncompounded, but that things which are constantly changing, and are never in the same state, are compounded?”

“To me it appears so.”

“Let us return, then,” he said, “to the subjects on which we before discoursed. Whether is essence itself, of which we gave this account that it exists, both in our questions and answers, always the same, or does it sometimes change? Does equality itself, the beautiful itself, and each several thing which is, ever undergo any change, however small? Or does each of them which exists, being an unmixed essence by itself, continue always the same, and in the same state, and never undergo any variation at all under any circumstances?”

“They must of necessity continue the same and in the same state, Socrates,” said Cebes.

63. “But what shall we say of the many beautiful things, such as men, horses, garments, or other things of the kind, whether equal or beautiful, or of all things synonymous with them? Do they continue the same, or, quite contrary to the former, are they never at any time, so to say, the same, either with respect to themselves or one another?”

“These, on the other hand,” replied Cebes, “never continue the same.”

“These, then, you can touch, or see, or perceive by the other senses; but those that continue the same, you can not apprehend in any other way than by the exercise of thought; for such things are

invisible, and are not seen?"

"You say what is strictly true," replied Cebes.

64. "We may assume, then, if you please," he continued, "that there are two species of things; the one visible, the other invisible?"

"We may," he said.

"And the invisible always continuing the same, but the visible never the same?"

"This, too," he said, "we may assume."

"Come, then," he asked, "is there anything else belonging to us than, on the one hand, body, and, on the other, soul?"

"Nothing else," he replied.

"To which species, then, shall we say the body is more like, and more nearly allied?"

"It is clear to everyone," he said, "that it is to the visible."

"But what of the soul? Is it visible or invisible?"

"It is not visible to men, Socrates," he replied.

"But we speak of things which are visible, or not so, to the nature of men; or to some other nature, think you?"

"To that of men."

"What, then, shall we say of the soul — that it is visible, or not visible?"

"Not visible."

"Is it, then, invisible?"

"Yes."

"The soul, then, is more like the invisible than the body; and the body, the visible?"

"It must needs be so, Socrates."

65. "And did we not, some time since, say this too, that the soul, when it employs the body to examine any thing, either by means of the sight or hearing, or any other sense (for to examine any thing by means of the body is to do so by the senses), is then drawn by the body to things that never continue the same, and wanders and is confused, and reels as if intoxicated, through coming into contact with things of this kind?"

"Certainly."

"But when it examines anything by itself, does it approach that which is pure, eternal, immortal, and unchangeable, and, as being

allied to it, continue constantly with it, so long as it subsists by itself, and has the power, and does it cease from its wandering, and constantly continue the same with respect to those things, through coming into contact with things of this kind? And is this affection of the soul called wisdom?"

"You speak," he said, "in every respect, well and truly, Socrates."

"To which species of the two, then, both from what was before and now said, does the soul appear to you to be more like and more nearly allied?"

66. "Every one, I think, would allow, Socrates," he replied, "even the dullest person, from this method of reasoning, that the soul is in every respect more like that which continues constantly the same than that which does not so."

"But what as to the body?"

"It is more like the other."

"Consider it also thus, that, when soul and body are together, nature enjoins the latter to be subservient and obey, the former to rule and exercise dominion. And, in this way, which of the two appears to you to be like the divine, and which the mortal? Does it not appear to you to be natural that the divine should rule and command, but the mortal obey and be subservient?"

"To me it does so."

"Which, then, does the soul resemble?"

"It is clear, Socrates, that the soul resembles the divine; but the body, the mortal."

"Consider, then, Cebes," said he, "whether, from all that has been said, these conclusions follow, that the soul is most like that which is divine, immortal, intelligent, uniform, indissoluble, and which always continues in the same state; but that the body, on the other hand, is most like that which is human, mortal, unintelligent, multiform, dissoluble, and which never continues in the same state. Can we say any thing against this, my dear Cebes, to show that it is not so?"

"We can not."

67. "What, then? Since these things are so, does it not appertain to the body to be quickly dissolved, but to the soul, on the contrary, to be altogether indissoluble or nearly so?"

“How not?”

“You perceive, however,” he said, “that when a man dies, the visible part of him, the body, which is exposed to sight, and which we call a corpse, to which it appertains to be dissolved, to fall asunder and be dispersed, does not immediately undergo any of these affections, but remains for a considerable time, and especially so if any one should die with his body in full vigor, and at a corresponding age; for when the body has collapsed and been embalmed, as those that are embalmed in Egypt, it remains almost entire for an incredible length of time; and some parts of the body, even though it does decay, such as the bones and nerves, and every thing of that kind, are, nevertheless, as one may say, immortal. Is it not so?”

“Yes.”

68. “Can the soul, then, which is invisible, and which goes to another place like itself, excellent, pure and invisible, and therefore truly called the invisible world, to the presence of a good and wise God (whither, if God will, my soul also must shortly go) — can this soul of ours, I ask, being such and of such a nature, when separated from the body, be immediately dispersed and destroyed, as most men assert? Far from it, my dear Cebes and Simmias. But the case is much rather thus: if it is separated in a pure state, taking nothing of the body with it, as not having willingly communicated with it in the present life, but having shunned it, and gathered itself within itself, as constantly studying this (but this is nothing else than to pursue philosophy aright, and in reality to study how to die easily), would not this be to study how to die?”

“Most assuredly.”

“Does not the soul, then, when in this state, depart to that which resembles itself, the invisible, the divine, immortal and wise? And on its arrival there, is it not its lot to be happy, free from error, ignorance, fears, wild passions, and all the other evils to which human nature is subject; and, as is said of the initiated, does it not in truth pass the rest of its time with the gods? Must we affirm that it is so, Cebes, or otherwise?”

“So, by Jupiter!” said Cebes.

69. “But, I think, if it departs from the body polluted and impure, as having constantly held communion with the body, and having

served and loved it, and been bewitched by it, through desires and pleasures, so as to think that there is nothing real except what is corporeal, which one can touch and see, and drink and eat, and employ for sensual purposes; but what is dark and invisible to the eyes, which is intellectual and apprehended by philosophy, having been accustomed to hate, fear, and shun this, do you think that a soul thus affected can depart from the body by itself, and uncontaminated?"

"By no means whatever," he replied.

"But I think it will be impressed with that which is corporeal, which the intercourse and communion of the body, through constant association and great attention, have made natural to it."

"Certainly."

"We must think, my dear Cebes, that this is ponderous and heavy, earthly and visible, by possessing which such a soul is weighed down, and drawn again into the visible world through dread of the invisible and of Hades, wandering, as it is said, among monuments and tombs, about which, indeed, certain shadowy phantoms of souls have been seen, being such images as those souls produced which have not departed pure from the body, but which partake of the visible; on which account, also, they are visible."

"That is probable, Socrates."

70. "Probable indeed, Cebes; and not that these are the souls of the good, but of the wicked, which are compelled to wander about such places, paying the penalty of their former conduct, which was evil; and they wander about so long until, through the desire of the corporeal nature that accompanies them, they are again united to a body; and they are united, as is probable, to animals having the same habits as those they have given themselves up to during life."

"But what do you say these are, Socrates?"

"For instance, those who have given themselves up to gluttony, wantonness and drinking, and have put no restraint on themselves, will probably be clothed in the form of asses and brutes of that kind. Do you not think so?"

"You say what is very probable."

"And that such as have set great value on injustice, tyranny and rapine, will be clothed in the species of wolves, hawks and kites!

Where else can we say such souls go?"

"Without doubt," said Cebes, "into such as these."

"Is it not, then, evident," he continued, "as to the rest, whither each will go, according to the resemblances of their several pursuits?"

71. "It is evident," he replied. "How not?"

"Of these, then," he said, "are not they the most happy, and do they not go to the best place, who have practiced that social and civilized virtue which they call temperance and justice, and which is produced from habit and exercise, without philosophy and reflection?"

"In what respect are these the most happy?"

"Because it is probable that these should again migrate into a corresponding civilized and peaceable kind of animals, such as bees perhaps, or wasps, or ants, or even into the same human species again, and from these become moderate men."

"It is probable."

"But it is not lawful for any one who has not studied philosophy, and departed this life perfectly pure, to pass into the rank of gods, but only for the true lover of wisdom. And on this account, my friends Simmias and Cebes, those who philosophize rightly, abstain from all bodily desires, and persevere in doing so, and do not give themselves up to them, not fearing the loss of property and poverty, as the generality of men and the lovers of wealth; nor, again, dreading disgrace and ignominy, like those who are lovers of power and honor, do they then abstain from them."

"For it would not become them to do so, Socrates," says Cebes.

72. "It would not, by Jupiter!" he rejoined. "Wherefore, Cebes, they who care at all for their soul, and do not spend their lives in the culture of their bodies, despising all these, proceed not in the same way with them, as being ignorant whither they are going, but, being convinced that they ought not to act contrary to philosophy, but in accordance with the freedom and purification she affords, they give themselves up to her direction, following her wherever she leads."

"How, Socrates?"

"I will tell you," he replied. "The lovers of wisdom know that philosophy, receiving their soul plainly bound and glued to the body,

and compelled to view things through this, as through a prison, and not directly by herself, and sunk in utter ignorance, and perceiving, too, the strength of the prison, that it arises from desire, so that he who is bound as much as possible assists in binding himself. 73. I say, then, the lovers of wisdom know that philosophy, receiving their soul in this state, gently exhorts it, and endeavors to free it, by showing that the view of things by means of the eyes is full of deception, as also is that through the ears and the other senses; persuading an abandonment of these so far as it is not absolutely necessary to use them, and advising the soul to be collected and concentrated within itself, and to believe nothing else than herself, with respect to what she herself understands of things that have a real subsistence; and to consider nothing true which she views through the medium of others, and which differ under different aspects; for that a thing of this kind is sensible and visible, but that what she herself perceives is intelligible and invisible. The soul of the true philosopher, therefore, thinking that she ought not to oppose this deliverance, accordingly abstains as much as possible from pleasures and desires, griefs and fears, considering that when any one is exceedingly delighted or alarmed, grieved or influenced by desire, he does not merely suffer such evil from these things as one might suppose, such as either being sick or wasting his property through indulging his desires; but that which is the greatest evil, and the worst of all, this he suffers, and is not conscious of it."

"But what is this evil, Socrates?" said Cebes.

74. "That the soul of every man is compelled to be either vehemently delighted or grieved about some particular thing, and, at the same time, to consider that the thing about which it is thus strongly affected is most real and most true, though it is not so. But these are chiefly visible objects, are they not?"

"Certainly."

"In this state of affection, then, is not the soul especially shackled by the body?"

"How so?"

"Because each pleasure and pain, having a nail, as it were, nails the soul to the body, and fastens it to it, and causes it to become corporeal, deeming those things to be true whatever the body asserts

to be so. For, in consequence of its forming the same opinions with the body, and delighting in the same things, it is compelled, I think, to possess similar manners, and to be similarly nourished; so that it can never pass into Hades in a pure state, but must ever depart polluted by the body, and so quickly falls again into another body, and grows up as if it were sown, and consequently is deprived of all association with that which is divine, and pure, and uniform."

"You speak most truly, Socrates," said Cebes.

75. "For these reasons, therefore, Cebes, those who are truly lovers of wisdom are moderate and resolute, and not for the reasons that most people say. Do you think as they do?"

"Assuredly not."

"No, truly. But the soul of a philosopher would reason thus, and would not think that philosophy ought to set it free, and that when it is freed it should give itself up again to pleasures and pains, to bind it down again, and make her work void, weaving a kind of Penelope's web the reverse way. On the contrary, effecting a calm of the passions, and following the guidance of reason, and being always intent on this, contemplating that which is true and divine, and not subject to opinion; and being nourished by it, it thinks that it ought to live in this manner as long as it does live, and that when it dies it shall go to a kindred essence, and one like itself, and shall be free from human evils. From such a regimen as this the soul has no occasion to fear, Simmias and Cebes, while it strictly attends to these things, lest, being torn to pieces at its departure from the body, it should be blown about and dissipated by the winds, and no longer have an existence anywhere."

76. When Socrates had thus spoken, a long silence ensued; and Socrates himself was pondering upon what had been said, as he appeared, and so did most of us; but Cebes and Simmias were conversing a little while with each other. At length Socrates, perceiving them, said, "What think you of what has been said? Does it appear to you to have been proved sufficiently? for many doubts and objections still remain if any one will examine them thoroughly. If, then, you are considering some other subject, I have nothing to say; but if you are doubting about this, do not hesitate both yourselves to speak and express your opinion, if it appears to you in

any respect that it might have been argued better, and to call me in again to your assistance, if you think you can be at all benefited by my help.”

Upon this Simmias said, “Indeed, Socrates, I will tell you the truth: for some time each of us, being in doubt, has been urging and exhorting the other to question you, from a desire to hear our doubts solved; but we were afraid of giving you trouble, lest it should be disagreeable to you in your present circumstances.”

77. But he, upon hearing this, gently smiled, and said, “Bless me, Simmias; with difficulty, indeed, could I persuade other men that I do not consider my present condition a calamity, since I am not able to persuade even you; but you are afraid lest I should be more morose now than during the former part of my life. And, as it seems, I appear to you to be inferior to swans with respect to divination, who, when they perceive that they must needs die, though they have been used to sing before, sing then more than ever, rejoicing that they are about to depart to that deity whose servants they are. But men, through their own fear of death, belie the swans too, and say that they, lamenting their death, sing their last song through grief; and they do not consider that no bird sings when it is hungry or cold, or is afflicted with any other pain, not even the nightingale, or swallow, or the hoopoes, which, they say, sing lamenting through grief. But neither do these birds appear to me to sing through sorrow, nor yet do swans; but, in my opinion, belonging to Apollo, they are prophetic, and, foreseeing the blessings of Hades, they sing and rejoice on that day more excellently than at any preceding time. 78. But I, too, consider myself to be a fellow-servant of the swans, and sacred to the same god; and that I have received the power of divination from our common master no less than they, and that I do not depart from this life with less spirits than they. On this account, therefore, it is right that you should both speak and ask whatever you please, so long as the Athenian Eleven permit.”

“You say well,” said Simmias, “and both I will tell you what are my doubts, and he, in turn, how far he does not assent to what has been said. For it appears to me, Socrates, probably as it does to you with respect to these matters, that to know them clearly in the present life is either impossible or very difficult: on the other hand, however,

not to test what has been said of them in every possible way, so as not to desist until, on examining them in every point of view, one has exhausted every effort, is the part of a very weak man. For we ought, with respect to these things, either to learn from others how they stand or to discover them for one's self; or, if both these are impossible, then, taking the best of human reasonings and that which is the most difficult to be confuted, and embarking on this, as one who risks himself on a raft, so to sail through life, unless one could be carried more safely, and with less risk, on a surer conveyance, or some divine reason. 79. I, therefore, shall not now be ashamed to question you, since you bid me do so, nor shall I blame myself hereafter for not having now told you what I think; for to me, Socrates, when I consider the matter, both with myself and with Cebes, what has been said does not appear to have been sufficiently proved."

Then said Socrates, "Perhaps, my friend, you have the truth on your side; but tell me in what respect it was not sufficiently proved."

"In this," he answered, "because any one might use the same argument with respect to harmony, and a lyre, and its chords, that harmony is something invisible and incorporeal, very beautiful and divine, in a well-modulated lyre; but the lyre and its chords are bodies, and of corporeal form, compounded and earthly, and akin to that which is mortal. When any one, then, has either broken the lyre, or cut or burst the chords, he might maintain from the same reasoning as yours that it is necessary the harmony should still exist and not be destroyed; for there could be no possibility that the lyre should subsist any longer when the chords are burst; and that the chords, which are of a mortal nature, should subsist, but that the harmony, which is of the same nature and akin to that which is divine and immortal, should become extinct, and perish before that which is mortal; but he might say that the harmony must needs subsist somewhere, and that the wood and chords must decay before it can undergo any change. 80. For I think, Socrates, that you yourself have arrived at this conclusion, that we consider the soul to be pretty much of this kind — namely, that our body being compacted and held together by heat and cold, dryness and moisture, and other such qualities, our soul is the fusion and harmony of these, when they are

well and duly combined with each other. If, then, the soul is a kind of harmony, it is evident that when our bodies are unduly relaxed or strained, through diseases and other maladies, the soul must, of necessity, immediately perish, although it is most divine, just as other harmonies which subsist in sounds or in the various works of artisans; but that the remains of the body of each person last for a long time, till they are either burned or decayed. Consider, then, what we shall say to this reasoning, if any one should maintain that the soul, being a fusion of the several qualities in the body, perishes first in that which is called death.”

81. Socrates, therefore, looking steadfastly at us, as he was generally accustomed to do, and smiling, said, “Simmias indeed speaks justly. If, then, any one of you is more prompt than I am, why does he not answer, for he seems to have handled my argument not badly? It appears to me, however, that before we make our reply we should first hear from Cebes, what he, too, objects to our argument, in order that, some time intervening, we may consider what we shall say, and then when we have heard them, we may give up to them, if they appear to speak agreeably to truth; or, if not, we may then uphold our own argument. Come, then, Cebes,” he continued, “say what it is that disturbs you, so as to cause your unbelief.”

“I will tell you,” said Cebes; “the argument seems to me to rest where it was, and to be liable to the same objection that we mentioned before. For, that our soul existed even before It came into this present form, I do not deny has been very elegantly, and, if it is not too much to say so, very fully, demonstrated; but that it still exists anywhere when we are dead does not appear to me to have been clearly proved; nor do I give in to the objection of Simmias, that the soul is not stronger and more durable than the body, for it appears to me to excel very far all things of this kind. 82. ‘Why, then,’ reason might say, ‘do you still disbelieve? for, since you see that when a man dies his weaker part still exists, does it not appear to you to be necessary that the more durable part should still be preserved during this period?’ Consider, then, whether I say any thing to the purpose in reply to this. For I, too, as well as Simmias, as it seems, stand in need of an illustration; for the argument appears to me to have been put thus, as if any one should advance this argument

about an aged weaver who had died, that the man has not yet perished, but perhaps still exists somewhere; and, as a proof, should exhibit the garment which he wore and had woven himself, that it is entire and has not perished; and if any one should disbelieve him, he would ask, which of the two is the more durable, the species of a man or of a garment, that is constantly in use and being worn; then, should any one answer that the species of man is much more durable, he would think it demonstrated that, beyond all question, the man is preserved, since that which is less durable has not perished. 83. But I do not think, Simmias, that this is the case, and do you consider what I say, for every one must think that he who argues thus argues, foolishly. For this weaver, having worn and woven many such garments, perished after almost all of them, but before the last, I suppose; and yet it does not on this account follow any the more that a man is inferior to or weaker than a garment. And I think, the soul might admit this same illustration with respect to the body, and he who should say the same things concerning them would appear to me to speak correctly, that the soul is more durable, but the body weaker and less durable; for he would say that each soul wears out many bodies, especially if it lives many years; for if the body wastes and is dissolved while the man still lives, but the soul continually weaves anew what is worn out, it must necessarily follow that when the soul is dissolved it must then have on its last garment, and perish before this alone; but when the soul has perished the body would show the weakness of its nature, and quickly rot and vanish. 84. So that it is not by any means right to place implicit reliance on this argument, and to believe that when we die our soul still exists somewhere. For, if any one should concede to him who admits even more than you do, and should grant to him that not only did our soul exist before we were born, but that even when we die nothing hinders the souls of some of us from still existing, and continuing to exist hereafter, and from being often born, and dying again — for so strong is it by nature, that it can hold out against repeated births — if he granted this, he would not yet concede that it does not exhaust itself in its many births, and at length perish altogether in some one of the deaths. But he would say that no one knows this death and dissolution of the body, which brings destruction to the soul; for it is

impossible for any one of us to perceive it. If, however, this be the case, it follows that every one who is confident at the approach of death is foolishly confident, unless he is able to prove that the soul is absolutely immortal and imperishable; otherwise it necessarily follows that he who is about to die must be alarmed for his soul, lest in its present disunion from the body it should entirely perish."

85. Upon this, all of us who had heard them speaking were disagreeably affected, as we afterward mentioned to each other; because, after we had been fully persuaded by the former arguments, they seemed to disturb us anew, and to cast us into a distrust, not only of the arguments already adduced, but of such as might afterward be urged, for fear lest we should not be fit judges of anything, or lest the things themselves should be incredible.

Echec. By the gods! Phædo, I can readily excuse you; for, while I am now hearing you, it occurs to me to ask myself some such question as this: What arguments can we any longer believe? since the argument which Socrates advanced, and which was exceedingly credible, has now fallen into discredit. For this argument, that our soul is a kind of harmony, produces a wonderful impression on me, both now and always, and in being mentioned, it has reminded me, as it were, that I, too, was formerly of the same opinion; so that I stand in need again, as if from the very beginning, of some other argument which may persuade me that the soul of one who dies does not die with the body. Tell me, therefore, by Jupiter! how Socrates followed up the argument; and whether he, too, as you confess was the case with yourselves, seemed disconcerted at all, or not, but calmly maintained his position; and maintained it sufficiently or defectively. Relate everything to me as accurately as you can.

86. Phæd. Indeed, Echecrates, though I have often admired Socrates, I was never more delighted than at being with him on that occasion. That he should be able to say something is perhaps not at all surprising; but I especially admired this in him — first of all, that he listened to the argument of the young men so sweetly, affably, and approvingly; in the next place, that he so quickly perceived how we were affected by their arguments; and, lastly, that he cured us so well and recalled us, when we were put to flight, as it were, and vanquished, and encouraged us to accompany him, and consider the

argument with him.

Echec. How was that?

Phæd. I will tell you: I happened to be sitting at his right hand, near the bed, upon a low seat, but he himself sat much higher than I. Stroking my head, then, and laying hold of the hair that hung on my neck — for he used, often, to play with my hairs— “To-morrow,” he said, “perhaps, Phædo, you will cut off these beautiful locks?”

“It seems likely, Socrates,” said I.

87. “Not if you are persuaded by me.”

“Why so?” I asked.

“To-day,” he replied, “both I ought to cut off mine and you yours, if our argument must die, and we are unable to revive it. And I, if I were you, and the arguments were to escape me, would take an oath, as the Argives do, not to suffer my hair to grow until I had renewed the contest, and vanquished the arguments of Simmias and Cebes.”

“But,” I said, “even Hercules himself is said not to have been a match for two.”

“Call upon me, then,” he said, “as your Iolaus, while it is yet day.”

“I do call on you, then,” I said, “not as Hercules upon Iolaus, but as Iolaus upon Hercules.”

“It will make no difference,” he replied. “But, first of all, we must beware lest we meet with some mischance.”

“What?” I asked.

“That we do not become,” he answered, “haters of reasoning, as some become haters of men; for no greater evil can happen to any one than to hate reasoning. 88. But hatred of reasoning and hatred of mankind both spring from the same source. For hatred of mankind is produced in us from having placed too great reliance on some one without sufficient knowledge of him, and from having considered him to be a man altogether true, sincere, and faithful, and then, after a little while, finding him depraved and unfaithful, and after him another. And when a man has often experienced this, and especially from those whom he considered his most intimate and best friends, at length, having frequently stumbled, he hates all men, and thinks that there is no soundness at all in any of them. Have you not perceived that this happens so?”

“Certainly,” I replied.

“Is it not a shame?” he said “And is it not evident that such a one attempts to deal with men without sufficient knowledge of human affairs? For if he had dealt with them with competent knowledge, as the case really is, so he would have considered that the good and the bad are each very few in number, and that those between both are most numerous.”

89. “How say you?” I asked.

“In the same manner,” he replied, “as with things very little and very large Do you think that any thing is more rare than to find a very large on a very little man, or dog, or any thing else? and, again, swift or slow, beautiful or ugly, white or black? Do you not perceive that of all such things the extremes are rare and few, but that the intermediate are abundant and numerous?”

“Certainly,” I replied.

“Do you not think, then,” he continued, “that if a contest in wickedness were proposed, even here very few would be found pre-eminent?”

“It is probable,” I said.

“It is so,” he said, “but in this respect reasonings do not resemble men, for I was just now following you as my leader, but in this they do resemble them, when any one believes in any argument as true without being skilled in the art of reasoning, and then shortly afterward it appears to him to be false, at one time being so and at another time not, and so on with one after another, and especially they who devote themselves to controversial arguments, you are aware, at length think they have become very wise and have alone discovered that there is nothing sound and stable either in things or reasonings but that all things that exist, as is the case with the Euripus, are in a constant state of flux and reflux, and never continue in any one condition for any length of time.”

“You speak perfectly true,” I said.

90. “Would it not, then, Phædo” he said “be a sad thing if, when there is a true and sound reasoning, and such as one can understand, one should then, through lighting upon such arguments as appear to be at one time true and at another false, not blame one’s self and one’s own want of skill, but at length, through grief, should anxiously transfer the blame from one’s self to the arguments, and

thereupon pass the rest of one's life in hating and reviling arguments and so be deprived of the truth and knowledge of things that exist?"

"By Jupiter!" I said, "it would be sad, indeed."

"In the first place, then," he said, "let us beware of this, and let us not admit into our souls the notion that there appears to be nothing sound in reasoning, but much rather that we are not yet in a sound condition, and that we ought vigorously and strenuously to endeavor to become sound, you and the others, on account of your whole future life, but I, on account of my death, since I am in danger, at the present time, of not behaving as becomes a philosopher with respect to this very subject, but as a wrangler, like those who are utterly uninformed 91. For they, when they dispute about any thing, care nothing at all for the subject about which the discussion is, but are anxious about this, that what they have themselves advanced shall appear true to the persons present. And I seem to myself on the present occasion to differ from them only in this respect, for I shall not be anxious to make what I say appear true to those who are present, except that may happen by the way, but that it may appear certainly to be so to myself. For I thus reason, my dear friend, and observe how interestedly. If what I say be true, it is well to be persuaded of it, but if nothing remains to one that is dead, I shall, at least, during the interval before death be less disagreeable to those present by my lamentations. But this ignorance of mine will not continue long, for that would be bad, but will shortly be put an end to. Thus prepared, then, Simmias and Cebes," he continued, "I now proceed to my argument. Do you, however, if you will be persuaded by me, pay little attention to Socrates, but much more to the truth, and if I appear to you to say any thing true, assent to it, but if not, oppose me with all your might, taking good care that in my zeal I do not deceive both myself and you, and, like a bee, depart leaving my sting behind."

92. "But let us proceed," he said "First of all, remind me of what you said, if I should appear to have forgotten it For Simmias, as I think, is in doubt, and fears lest the soul, though more divine and beautiful than the body, should perish before it, as being a species of harmony. But Cebes appeared to me to grant me this, that the soul is more durable than the body, but he argued that it is uncertain to every

one, whether when the soul has worn out many bodies and that repeatedly, it does not, on leaving the last body, itself also perish, so that this very thing is death, the destruction of the soul, since the body never ceases decaying Are not these the things, Simmias and Cebes, which we have to inquire into?"

They both agreed that they were.

"Whether, then," he continued "do you reject all our former arguments, or some of them only, and not others?"

"Some we do," they replied, "and others not."

"What, then," he proceeded, "do you say about that argument in which we asserted that knowledge is reminiscence, and that, this being the case, our soul must necessarily have existed somewhere before it was inclosed in the body?"

93. "I, indeed," replied Cebes "was both then wonderfully persuaded by it, and now persist in it, as in no other argument."

"And I, too," said Simmias, "am of the same mind, and should very much wonder if I should ever think otherwise on that point."

"Then," Socrates said, "you must needs think otherwise, my Theban friend, if this opinion holds good, that harmony is something compounded, and that the soul is a kind of harmony that results from the parts compacted together in the body. For surely you will not allow yourself to say that harmony was composed prior to the things from which it required to be composed Would you allow this?"

"By no means, Socrates" he replied.

"Do you perceive, then," he said, "that this result from what you say, when you assert that the soul existed before it came into a human form and body, but that it was composed from things that did not yet exist? For harmony is not such as that to which you compare it, but first the lyre, and the chords, and the sounds yet unharmonized, exist, and, last of all, harmony is produced, and first perishes. How, then, will this argument accord with that?"

"Not at all," said Simmias.

94. "And yet," he said, "if in any argument, there ought to be an accordance in one respecting harmony."

"There ought," said Simmias.

"This of yours, however," he said, "is not in accordance. Consider, then, which of these two statements do you prefer — that

knowledge is reminiscence, or the soul harmony?”

“The former by far, Socrates,” he replied; “for the latter occurred to me without demonstration, through a certain probability and speciousness whence most men derive their opinions. But I am well aware that arguments which draw their demonstrations from probabilities are idle; and, unless one is on one’s guard against them, they are very deceptive, both in geometry and all other subjects. But the argument respecting reminiscence and knowledge may be said to have been demonstrated by a satisfactory hypothesis. For in this way it was said that our soul existed before it came into the body, because the essence that bears the appellation of ‘that which is’ belongs to it. But of this, as I persuade myself, I am fully and rightly convinced. It is therefore necessary, as it seems, that I should neither allow myself nor any one else to maintain that the soul is harmony.”

95. “But what, Simmias,” said he, “if you consider it thus? Does it appear to you to appertain to harmony, or to any other composition, to subsist in any other way than the very things do of which it is composed?”

“By no means.”

“And indeed, as I think, neither to do any thing, nor suffer any thing else, besides what they do or suffer.”

He agreed.

“It does not, therefore, appertain to harmony to take the lead of the things of which it is composed, but to follow them.”

He assented.

“It is, then, far from being the case that harmony is moved or sends forth sounds contrariwise, or is in any other respect opposed to its parts?”

“Far, indeed,” he said.

“What, then? Is not every harmony naturally harmony, so far as it has been made to accord?”

“I do not understand you,” he replied.

“Whether,” he said, “if it should be in a greater degree and more fully made to accord, supposing that were possible, would the harmony be greater and more full; but if in a less degree and less fully, then would it be inferior and less full?”

“Certainly.”

“Is this, then, the case with the soul that, even in the smallest extent, one soul is more fully and in a greater degree, or less fully and in a less degree, this very thing, a soul, than another?”

“In no respect whatever,” he replied.

96. “Well, then,” he said, “by Jupiter! is one soul said to possess intelligence and virtue, and to be good, and another folly and vice, and to be bad? and is this said with truth?”

“With truth, certainly.”

“Of those, then, who maintain that the soul is harmony, what will any one say that these things are in the soul, virtue and vice? Will he call them another kind of harmony and discord, and say that the one, the good soul, is harmonized, and, being harmony, contains within itself another harmony, but that the other is discordant, and does not contain within itself another harmony?”

“I am unable to say,” replied Simmias; “but it is clear that he who maintains that opinion would say something of the kind.”

“But it has been already granted,” said he, “that one soul is not more or less a soul than another; and this is an admission that one harmony is not to a greater degree or more fully, or to a less degree or less fully, a harmony, than another; is it not so?”

“Certainly.”

“And that that which is neither more or less harmony is neither more nor less harmonized: is it so?”

“It is.”

“But does that which is neither more or less harmonized partake of more or less harmony, or an equal amount?”

“An equal amount.”

97. “A soul, therefore, since it is not more or less this very thing, a soul, than another, is not more or less harmonized?”

“Even so.”

“Such, then, being its condition, it can not partake of a greater degree of discord or harmony?”

“Certainly not.”

“And, again, such being its condition, can one soul partake of a greater degree of vice or virtue than another, if vice be discord, and virtue harmony?”

“It can not.”

“Or rather, surely, Simmias, according to right reason, no soul will partake of vice, if it is harmony; for doubtless harmony, which is perfectly such, can never partake of discord?”

“Certainly not.”

“Neither, therefore, can a soul which is perfectly a soul partake of vice.”

“How can it, from what has been already said?”

“From this reasoning, then, all souls of all animals will be equally good, if, at least, they are by nature equally this very thing, souls?”

“It appears so to me, Socrates,” he said.

“And does it appear to you,” he said, “to have been thus rightly argued, and that the argument would lead to this result, if the hypothesis were correct, that the soul is harmony?”

98. “On no account whatever,” he replied.

“But what,” said he, “of all the things that are in man? Is there any thing else that you say bears rule except the soul, especially if it be wise?”

“I should say not.”

“Whether by yielding to the passions in the body, or by opposing them? My meaning is this: for instance, when heat and thirst are present, by drawing it the contrary way, so as to hinder it from drinking; and when hunger is present, by hindering it from eating; and in ten thousand other instances we see the soul opposing the desires of the body. Do we not?”

“Certainly.”

“But have we not before allowed that if the soul were harmony, it would never utter a sound contrary to the tension, relaxation, vibration, or any other affection to which its component parts are subject, but would follow, and never govern them?”

“We did allow it,” he replied, “for how could we do otherwise?”

“What, then? Does not the soul now appear to act quite the contrary, ruling over all the parts from which any one might say it subsists, and resisting almost all of them through the whole of life, and exercising dominion over them in all manner of ways; punishing some more severely even with pain, both by gymnastics and medicine, and others more mildly; partly threatening, and partly admonishing the desires, angers and fears, as if, being itself of a

different nature, it were conversing with something quite different? 99. Just as Homer has done in the *Odyssey*, where he speaks of Ulysses— ‘Having struck his breast, he chid his heart in the following words: Bear up, my heart; ere this thou hast borne far worse.’ Do you think that he composed this in the belief that the soul was harmony, and capable of being led by the passions of the body, and not rather that it was able to lead and govern them, as being something much more divine than to be compared with harmony?”

“By Jupiter! Socrates, it appears so to me.”

“Therefore, my excellent friend, it is on no account correct for us to say that the soul is a kind of harmony; for, as it appears, we should neither agree with Homer, that divine poet, nor with ourselves.”

“Such is the case,” he replied.

“Be it so, then,” said Socrates, “we have already, as it seems, sufficiently appeased this Theban harmony. But how, Cebes, and by what arguments, shall we appease this Cadmus?”

100. “You appear to me,” replied Cebes, “to be likely to find out; for you have made out this argument against harmony wonderfully beyond my expectation. For when Simmias was saying what his doubts were, I wondered very much whether any one would be able to answer his reasoning. It, therefore, appeared to me unaccountable that he did not withstand the very first onset of your argument. I should not, therefore, be surprised if the arguments of Cadmus met with the same fate.”

“My good friend,” said Socrates, “do not speak so boastfully, lest some envious power should overthrow the argument that is about to be urged. These things, however, will be cared for by the deity; but let us, meeting hand to hand, in the manner of Homer, try whether you say any thing to the purpose. This, then, is the sum of what you inquire you require it to be proved that our soul is imperishable and immortal; if a philosopher that is about to die, full of confidence and hope that after death he shall be far happier than if he had died after leading a different kind of life, shall not entertain this confidence foolishly and vainly. 101. But to show that the soul is something strong and divine, and that it existed before we men were born, you say not at all hinders, but that all these things may evince, not its immortality, but that the soul is durable, and existed an immense

space of time before, and knew and did many things. But that, for all this, it was not at all the more immortal, but that its very entrance into the body of a man was the beginning of its destruction, as if it were a disease; so that it passes through this life in wretchedness, and at last perishes in that which is called death. But you say that it is of no consequence whether it comes into a body once or often, with respect to our occasion of fear; for it is right he should be afraid, unless he is foolish, who does not know, and can not give a reason to prove, that the soul is immortal. Such, I think, Cebes, is the sum of what you say; and I purposely repeat it often, that nothing may escape us, and, if you please, you may add to or take from it.”

Cebes replied, “I do not wish at present either to take from or add to it; that is what I mean.”

102. Socrates, then having paused for some time, and considered something within himself, said, “You inquire into no easy matter, Cebes; for it is absolutely necessary to discuss the whole question of generation and corruption. If you please, then, I will relate to you what happened to me with reference to them; and afterward, if any thing that I shall say shall appear to you useful toward producing conviction on the subject you are now treating of, make use of it.”

“I do indeed wish it,” replied Cebes.

“Hear my relation, then. When I was a young man, Cebes, I was wonderfully desirous of that wisdom which they call a history of nature; for it appeared to me to be a very sublime thing to know the causes of every thing — why each thing is generated, why it perishes, and why it exists. And I often tossed myself upward and downward, considering first such things as these, whether when heat and cold have undergone a certain corruption, as some say, then animals are formed; and whether the blood is that by means of which we think, or air, or fire, or none of these, but that it is the brain that produces the perceptions of hearing, seeing, and smelling; and that from these come memory and opinion; and from memory and opinion, when in a state of rest, in the same way knowledge is produced. 103. And, again, considering the corruptions of these, and the affections incidental to the heavens and the earth, I at length appeared to myself so unskillful in these speculations that nothing could be more so. But I will give you a sufficient proof of this; for I

then became, by these very speculations, so very blind with respect to things which I knew clearly before, as it appeared to myself and others, that I unlearned even the things which I thought I knew before, both on many other subjects and also this, why a man grows. For, before, I thought this was evident to every one — that it proceeds from eating and drinking; for that, when, from the food, flesh is added to flesh, bone to bone, and so on in the same proportion, what is proper to them is added to the several other parts, then the bulk which was small becomes afterward large, and thus that a little man becomes a big one. Such was my opinion at that time. Does it appear to you correct?”

“To me it does,” said Cebes.

104. “Consider this further. I thought that I had formed a right opinion, when, on seeing a tall man standing by a short one, I judged that he was taller by the head, and in like manner, one horse than another; and, still more clearly than this, ten appeared to me to be more than eight by two being added to them, and that two cubits are greater than one cubit by exceeding it a half.”

“But now,” said Cebes, “what think you of these matters?”

“By Jupiter!” said he, “I am far from thinking that I know the cause of these, for that I can not even persuade myself of this: when a person has added one to one, whether the one to which the addition has been made has become two, or whether that which has been added, and that to which the addition has been made, have become two by the addition of the one to the other. For I wonder if, when each of these was separate from the other, each was one, and they were not yet two; but when they have approached nearer each other this should be the cause of their becoming two — namely, the union by which they have been placed nearer one another. 105. Nor yet, if any person should divide one, am I able to persuade myself that this, their division, is the cause of its becoming two. For this cause is the contrary to the former one of their becoming two; for then it was because they were brought nearer to each other, and the one was added to the other; but now it is because one is removed and separated from the other. Nor do I yet persuade myself that I know why one is one, nor, in a word, why any thing else is produced, or perishes, or exists, according to this method of proceeding; but I mix

up another method of my own at random, for this I can on no account give in to.”

“But, having once heard a person reading from a book, written, as he said, by Anaxagoras, and which said that it is intelligence that sets in order and is the cause of all things, I was delighted with this cause, and it appeared to me in a manner to be well that intelligence should be the cause of all things, and I considered with myself, if this is so, that the regulating intelligence orders all things, and disposes each in such way as will be best for it. 106. If any one, then, should desire to discover the cause of every thing, in what way it is produced, or perishes, or exists, he must discover this respecting it — in what way it is best for it either to exist, or to suffer, or do any thing else. From this mode of reasoning, then, it is proper that a man should consider nothing else, both with respect to himself and others, than what is most excellent and best; and it necessarily follows that this same person must also know that which is worst, for that the knowledge of both of them is the same. Thus reasoning with myself, I was delighted to think I had found in Anaxagoras a preceptor who would instruct me in the causes of things, agreeably to my own mind, and that he would inform me, first, whether the earth is flat or round, and, when he had informed me, would, moreover, explain the cause and necessity of its being so, arguing on the principle of the better, and showing that it is better for it to be such as it is; and if he should say that it is in the middle, that he would, moreover, explain how it is better for it to be in the middle; and if he should make all this clear to me, I was prepared no longer to require any other species of cause. 107. I was in like manner prepared to inquire respecting the sun and moon and the other stars, with respect to their velocities in reference to each other, and their revolutions and other conditions, in what way it is better for both to act and be affected as it does and is. For I never thought that after he had said that these things were set in order by intelligence, he would introduce any other cause for them than that it is best for them to be as they are. Hence, I thought, that in assigning the cause to each of them, and to all in common, he would explain that which is best for each, and the common good of all. And I would not have given up my hopes for a good deal; but, having taken up his books with great eagerness, I read through them as quickly as I

could, that I might as soon as possible know the best and the worst.”

108. “From this wonderful hope, however, my friend, I was speedily thrown down, when, as I advance and read over his works, I meet with a man who makes no use of intelligence, nor assigns any causes for the ordering of all things, but makes the causes to consist of air, ether, and water, and many other things equally absurd. And he appeared to me to be very like one who should say that whatever Socrates does he does by intelligence, and then, attempting to describe the causes of each particular action, should say, first of all, that for this reason I am now sitting here, because my body is composed of bones and sinews and that the bones are hard, and have joints separate from each other, but that the sinews, being capable of tension and contraction, cover the bones, together with the flesh and skin which contain them. The bones, therefore, being suspended in their sockets, the nerves, relaxing and tightening, enable me to bend my limbs as I now do, and from this cause I sit here bent up. 109. And if, again, he should assign other similar causes for my conversing with you, assigning as causes voice, and air, and hearing, and ten thousand other things of the kind, omitting to mention the real causes, that since it appeared better to the Athenians to condemn me, I therefore thought it better to sit here, and more just to remain and submit to the punishment which they have ordered; for, by the dog! I think these sinews and bones would have been long ago either in Megara or Boeotia, borne thither by an opinion of that which is best, if I had not thought it more just and honorable to submit to whatever sentence the city might order than to flee and run stealthily away. But to call such things causes is too absurd. But if any one should say that without possessing such things as bones and sinews, and whatever else I have, I could not do what I pleased, he would speak the truth; but to say that I do as I do through them, and that I act thus by intelligence, and not from the choice of what is best, would be a great and extreme disregard of reason. 110. For this would be not to be able to distinguish that the real cause is one thing, and that another, without which a cause could not be a cause; which, indeed, the generality of men appear to me to do, fumbling, as it were, in the dark, and making use of strange names, so as to denominate them as the very cause. Wherefore one encompassing the

earth with a vortex from heaven makes the earth remain fixed; but another, as if it were a broad trough, rests it upon the air as its base; but the power by which these things are now so disposed that they may be placed in the best manner possible, this they neither inquire into, nor do they think that it requires any superhuman strength; but they think they will some time or other find out an Atlas stronger and more immortal than this, and more capable of containing all things; and in reality, the good, and that which ought to hold them together and contain them, they take no account of at all. I, then, should most gladly have become the disciple of any one who would teach me of such a cause, in what way it is. But when I was disappointed of this, and was neither able to discover it myself, nor to learn it from another, do you wish, Cebes, that I should show you in what way I set out upon a second voyage in search of the cause?"

111. "I wish it exceedingly," he replied.

"It appeared to me, then," said he, "after this, when I was wearied with considering things that exist, that I ought to beware lest I should suffer in the same way as they do who look at and examine an eclipse of the sun, for some lose the sight of their eyes, unless they behold its image in water, or some similar medium. And I was affected with a similar feeling, and was afraid lest I should be utterly blinded in my soul through beholding things with the eyes, and endeavoring to grasp them by means of the several senses. It seemed to me, therefore, that I ought to have recourse to reasons, and to consider in them the truth of things. Perhaps, however, this similitude of mine may in some respect be incorrect; for I do not altogether admit that he who considers things in their reasons considers them in their images, more than he does who views them in their effects. However, I proceeded thus, and on each occasion laying down the reason, which I deem to be the strongest, whatever things appear to me to accord with this I regard as true, both with respect to the cause and every thing else; but such as do not accord I regard as not true. 112. But I wish to explain my meaning to you in a clearer manner; for I think that you do not yet understand me."

"No, by Jupiter!" said Cebes, "not well."

"However," continued he, "I am now saying nothing new, but what I have always at other times, and in a former part of this

discussion, never ceased to say. I proceed, then, to attempt to explain to you that species of cause which I have busied myself about, and return again to those well-known subjects, and set out from them, laying down as an hypothesis, that there is a certain abstract beauty, and goodness, and magnitude, and so of all other things; which if you grant me, and allow that they do exist, I hope that I shall be able from these to explain the cause to you, and to discover that the soul is immortal."

"But," said Cebes, "since I grant you this, you may draw your conclusion at once."

"But consider," he said, "what follows from thence, and see if you can agree with me. For it appears to me that if there is any thing else beautiful besides beauty itself, it is not beautiful for any other reason than because it partakes of that abstract beauty; and I say the same of every thing. Do you admit such a cause?"

"I do admit it," he replied.

113. "I do not yet understand," he continued, "nor am I able to conceive, those other wise causes; but if any one should tell me why any thing is beautiful, either because it has a blooming florid color, or figure, or any thing else of the kind, I dismiss all other reasons, for I am confounded by them all; but I simply, wholly, and perhaps foolishly, confine myself to this, that nothing else causes it to be beautiful except either the presence or communication of that abstract beauty, by whatever means and in whatever way communicated; for I can not yet affirm this with certainty, but only that by means of beauty all beautiful things become beautiful. For this appears to me the safest answer to give both to myself and others; and adhering to this, I think that I shall never fall, but that it is a safe answer both for me and any one else to give — that by means of beauty beautiful things become beautiful. Does it not also seem so to you?"

"It does."

"And that by magnitude great things become great, and greater things, greater; and by littleness less things become less?"

"Yes."

114. "You would not, then, approve of it, if any one said that one person is greater than another by the head, and that the less is less by

the very same thing; but you would maintain that you mean nothing else than that every thing that is greater than another is greater by nothing else than magnitude, and that it is greater on this account — that is, on account of magnitude; and that the less is less by nothing else than littleness, and on this account less — that is, on account of littleness; being afraid, I think, lest some opposite argument should meet you if you should say that any one is greater and less by the head; as, first, that the greater is greater, and the less less, by the very same thing; and, next, that the greater is greater by the head, which is small; and that it is monstrous to suppose that any one is great through something small. Should you not be afraid of this?”

To which said Cebes, smilingly, “Indeed, I should.”

“Should you not, then,” he continued, “be afraid to say that ten is more than eight by two, and for this cause exceeds it, and not by number, and on account of number? and that two cubits are greater than one cubit by half, and not by magnitude (for the fear is surely the same)?”

“Certainly,” he replied.

115. “What, then? When one has been added to one, would you not beware of saying that the addition is the cause of its being two, or division when it has been divided; and would you not loudly assert that you know no other way in which each thing subsists, than by partaking of the peculiar essence of each of which it partakes, and that in these cases you can assign no other cause of its becoming two than its partaking of duality; and that such things as are to become two must needs partake of this, and what is to become one, of unity; but these divisions and additions, and other such subtleties, you would dismiss, leaving them to be given as answers by persons wiser than yourself; whereas you, fearing, as it is said, your own shadow and inexperience, would adhere to this safe hypothesis, and answer accordingly? But if any one should assail this hypothesis of yours, would you not dismiss him, and refrain from answering him till you had considered the consequences resulting from it, whether in your opinion they agree with or differ from each other? But when it should be necessary for you to give a reason for it, would you give one in a similar way, by again laying down another hypothesis, which should appear the best of higher principles, until you arrived at

something satisfactory; but, at the same time, you would avoid making confusion, as disputants do, in treating of the first principle and the results arising from it, if you really desire to arrive at the truth of things? 116. For they, perhaps, make no account at all of this, nor pay any attention to it; for they are able, through their wisdom, to mingle all things together, and at the same time please themselves. But you, if you are a philosopher, would act, I think, as I now describe.”

“You speak most truly,” said Simmias and Cebes together.

Echec. By Jupiter! Phædo, they said so with good reason; for he appears to me to have explained these things with wonderful clearness, even to one endued with a small degree of intelligence.

Phæd. Certainly, Echecrates, and so it appeared to all who were present.

Echec. And so it appears to me, who was absent, and now hear it related. But what was said after this?

As well as I remember, when these things had been granted him, and it was allowed that each several idea exists of itself, and that other things partaking of them receive their denomination from them, he next asked: “If, then,” he said, “you admit that things are so, whether, when you say that Simmias is greater than Socrates, but less than Phædo, do you not then say that magnitude and littleness are both in Simmias?”

“I do.”

117. “And yet,” he said, “you must confess that Simmias’s exceeding Socrates is not actually true in the manner in which the words express it; for Simmias does not naturally exceed Socrates in that he is Simmias, but in consequence of the magnitude which he happens to have; nor, again, does he exceed Socrates because Socrates is Socrates, but because Socrates possesses littleness in comparison with his magnitude?”

“True.”

“Nor, again, is Simmias exceeded by Phædo, because Phædo is Phædo, but because Phædo possesses magnitude in comparison with Simmias’s littleness?”

“It is so.”

“Thus, then, Simmias has the appellation of being both little and

great, being between both, by exceeding the littleness of one through his own magnitude, and to the other yielding a magnitude that exceeds his own littleness.” And at the same time, smiling, he said, “I seem to speak with the precision of a short-hand writer; however, it is as I say.”

He allowed it.

118. “But I say it for this reason, wishing you to be of the same opinion as myself. For it appears to me, not only that magnitude itself is never disposed to be at the same time great and little, but that magnitude in us never admits the little nor is disposed to be exceeded, but one of two things, either to flee and withdraw when its contrary, the little, approaches it, or, when it has actually come, to perish; but that it is not disposed, by sustaining and receiving littleness, to be different from what it was. Just as I, having received and sustained littleness, and still continuing the person that I am, am this same little person; but that, while it is great, never endures to be little. And, in like manner, the little that is in us is not disposed at any time to become or to be great, nor is any thing else among contraries, while it continues what it was, at the same time disposed to become and to be its contrary; but in this contingency it either departs or perishes.”

119. “It appears so to me,” said Cebes, “in every respect.”

But some one of those present, on hearing this, I do not clearly remember who he was, said, “By the gods! was not the very contrary of what is now asserted admitted in the former part of our discussion, that the greater is produced from the less, and the less from the greater, and, in a word, that the very production of contraries is from contraries? But now it appears to me to be asserted that this can never be the case.”

Upon this Socrates, having leaned his head forward and listened, said, “You have reminded me in a manly way; you do not, however, perceive the difference between what is now and what was then asserted. For then it was said that a contrary thing is produced from a contrary; but now, that a contrary can never become contrary to itself — neither that which is in us, nor that which is in nature. For then, my friend, we spoke of things that have contraries, calling them by the appellation of those things; but now we are speaking of those

very things from the presence of which things so called receive their appellation, and of these very things we say that they are never disposed to admit of production from each other.” 120. And, at the same time looking at Cebes, “Has anything that has been said, Cebes, disturbed you?”

“Indeed,” said Cebes, “I am not at all so disposed; however, I by no means say that there are not many things that disturb me.”

“Then,” he continued, “we have quite agreed to this, that a contrary can never be contrary to itself.”

“Most certainly,” he replied.

“But, further,” he said, “consider whether you will agree with me in this also. Do you call heat and cold any thing?”

“I do.”

“The same as snow and fire?”

“By Jupiter! I do not.”

“But heat is something different from fire, and cold something different from snow?”

“Yes.”

“But this, I think, is apparent to you — that snow, while it is snow, can never, when it has admitted heat, as we said before, continue to be what it was, snow and hot; but, on the approach of heat, it must either withdraw or perish?”

“Certainly.”

“And, again, that fire, when cold approaches it, must either depart or perish; but that it will never endure, when it has admitted coldness, to continue what it was, fire and cold?”

121. “You speak truly,” he said.

“It happens, then,” he continued, “with respect to some of such things, that not only is the idea itself always thought worthy of the same appellation, but likewise something else which is not, indeed, that idea itself, but constantly retains its form so long as it exists. What I mean will perhaps be clearer in the following examples: the odd in number must always possess the name by which we now call it, must it not?”

“Certainly.”

“Must it alone, of all things — for this I ask — or is there any thing else which is not the same as the odd, but yet which we must

always call odd, together with its own name, because it is so constituted by nature that it can never be without the odd? But this, I say, is the case with the number three, and many others. For consider with respect to the number three: does it not appear to you that it must always be called by its own name, as well as by that of the odd, which is not the same as the number three? Yet such is the nature of the number three, five, and the entire half of number, that though they are not the same as the odd, yet each of them is always odd. And, again, two and four, and the whole other series of number, though not the same as the even, are nevertheless each of them always even: do you admit this, or not?"

122. "How should I not?" he replied.

"Observe then," said he, "what I wish to prove. It is this — that it appears not only that these contraries do not admit each other, but that even such things as are not contrary to each other, and yet always possess contraries, do not appear to admit that idea which is contrary to the idea that exists in themselves, but, when it approaches, perish or depart. Shall we not allow that the number three would first perish, and suffer any thing whatever, rather than endure, while it is still three, to become even?"

"Most certainly," said Cebes.

"And yet," said he, "the number two is not contrary to three."

"Surely not."

"Not only, then, do ideas that are contrary never allow the approach of each other, but some other things also do not allow the approach of contraries."

"You say very truly," he replied.

"Do you wish, then," he said, "that, if we are able, we should define what these things are?"

"Certainly."

"Would they not then, Cebes," he said, "be such things as, whatever they occupy, compel that thing not only to retain its own idea, but also that of something which is always a contrary?"

"How do you mean?"

123. "As we just now said. For you know, surely, that whatever things the idea of three occupies must of necessity not only be three, but also odd?"

“Certainly.”

“To such a thing, then, we assert, that the idea contrary to that form which constitutes this can never come.”

“It can not.”

“But did the odd make it so?”

“Yes.”

“And is the contrary to this the idea of the even?”

“Yes.”

“The idea of the even, then, will never come to the three?”

“No, surely.”

“Three, then, has no part in the even?”

“None whatever.”

“The number three is uneven?”

“Yes.”

“What, therefore, I said should be defined — namely, what things they are which, though not contrary to some particular thing, yet do not admit of the contrary itself; as, in the present instance, the number three, though not contrary to the even, does not any the more admit it, for it always brings the contrary with it, just as the number two does to the odd, fire to cold, and many other particulars. Consider, then, whether you would thus define, not only that a contrary does not admit a contrary, but also that that which brings with it a contrary to that to which it approaches will never admit the contrary of that which it brings with it. 124. But call it to mind again, for it will not be useless to hear it often repeated. Five will not admit the idea of the even, nor ten, its double, that of the odd. This double, then, though it is itself contrary to something else, yet will not admit the idea of the odd, nor will half as much again, nor other things of the kind, such as the half and the third part, admit the idea of the whole, if you follow me, and agree with me that it is so.”

“I entirely agree with you,” he said, “and follow you.”

“Tell me again, then,” he said, “from the beginning; and do not answer me in the terms in which I put the question, but in different ones, imitating my example. For I say this because, besides that safe mode of answering which I mentioned at first, from what has now been said, I see another no less safe one. For if you should ask me what that is which, if it be in the body, will cause it to be hot, I

should not give you that safe but unlearned answer, that it is heat, but one more elegant, from what we have just now said, that it is fire; nor, if you should ask me what that is which, if it be in the body, will cause it to be diseased, should I say that it is disease, but fever; nor if you should ask what that is which, if it be in number, will cause it to be odd, should I say that it is unevenness, but unity; and so with other things. But consider whether you sufficiently understand what I mean.”

125. “Perfectly so,” he replied.

“Answer me, then,” he said, “what that is which, when it is in the body, the body will be alive?”

“Soul,” he replied.

“Is not this, then, always the case?”

“How should it not be?” said he.

“Does the soul, then, always bring life to whatever it occupies?”

“It does indeed,” he replied.

“Whether, then, is there any thing contrary to life or not?”

“There is,” he replied.

“What?”

“Death.”

“The soul, then, will never admit the contrary of that which it brings with it, as has been already allowed?”

“Most assuredly,” replied Cebes.

“What, then? How do we denominate that which does not admit the idea of the even?”

“Uneven,” he replied.

“And that which does not admit the just, nor the musical?”

“Unmusical,” he said, “and unjust.”

“Be it so. But what do we call that which does not admit death?”

“Immortal,” he replied.

“Therefore, does not the soul admit death?”

“No.”

“Is the soul, then, immortal?”

“Immortal.”

126. “Be it so,” he said. “Shall we say, then, that this has been now demonstrated? or how think you?”

“Most completely, Socrates.”

“What, then,” said he, “Cebes, if it were necessary for the uneven to be imperishable, would the number three be otherwise than imperishable?”

“How should it not?”

“If, therefore, it were also necessary that what is without heat should be imperishable, when any one should introduce heat to snow, would not the snow withdraw itself, safe and unmelted? For it would not perish; nor yet would it stay and admit the heat.”

“You say truly,” he replied.

“In like manner, I think, if that which is insusceptible of cold were imperishable, that when any thing cold approached the fire, it would neither be extinguished nor perish, but would depart quite safe.”

“Of necessity,” he said.

“Must we not, then, of necessity,” he continued, “speak thus of that which is immortal? if that which is immortal is imperishable, it is impossible for the soul to perish, when death approaches it. For, from what has been said already, it will not admit death, nor will ever be dead; just as we said that three will never be even, nor, again, will the odd; nor will fire be cold, nor yet the heat that is in fire. 127. But some one may say, what hinders, though the odd can never become even by the approach of the even, as we have allowed, yet, when the odd is destroyed, that the even should succeed in its place? We could not contend with him who should make this objection that it is not destroyed, for the uneven is not imperishable; since, if this were granted us, we might easily have contended that, on the approach of the even, the odd and the three depart; and we might have contended in the same way with respect to fire, heat, and the rest, might we not?”

“Certainly.”

“Wherefore, with respect to the immortal, if we have allowed that it is imperishable, the soul, in addition to its being immortal, must also be imperishable; if not, there will be need of other arguments.”

“But there is no need,” he said, “so far as that is concerned; for scarcely could any thing not admit of corruption, if that which is immortal and eternal is liable to it.”

128. “The deity, indeed, I think,” said Socrates, “and the idea itself of life, and if anything else is immortal, must be allowed by all

beings to be incapable of dissolution.”

“By Jupiter!” he replied, “by all men, indeed, and still more, as I think, by the gods.”

“Since, then, that which is immortal is also incorruptible, can the soul, since it is immortal, be any thing else than imperishable?”

“It must, of necessity, be so.”

“When, therefore, death approaches a man, the mortal part of him, as it appears, dies, but the immortal part departs safe and uncorrupted, having withdrawn itself from death?”

“It appears so.”

“The soul, therefore,” he said, “Cebes, is most certainly immortal and imperishable, and our souls will really exist in Hades.”

“Therefore, Socrates,” he said, “I have nothing further to say against this, nor any reason for doubting your arguments. But if Simmias here, or any one else, has any thing to say, it were well for him not to be silent; for I know not to what other opportunity beyond the present any one can defer it, who wishes either to speak or hear about these things.”

129. “But, indeed,” said Simmias, “neither have I any reason to doubt what has been urged; yet, from the magnitude of the subject discussed, and from my low opinion of human weakness, I am compelled still to retain a doubt within myself with respect to what has been said.”

“Not only so, Simmias,” said Socrates, “but you say this well; and, moreover, the first hypotheses, even though they are credible to you, should nevertheless be examined more carefully; and if you should investigate them sufficiently, I think you will follow my reasoning as far as it is possible for man to do so; and if this very point becomes clear, you will inquire no further.”

“You speak truly,” he said.

“But it is right, my friends,” he said, “that we should consider this — - that if the soul is immortal, it requires our care not only for the present time, which we call life, but for all time; and the danger would now appear to be dreadful if one should neglect it. 130. For if death were a deliverance from every thing, it would be a great gain for the wicked, when they die, to be delivered at the same time from the body, and from their vices together with the soul; but now, since

it appears to be immortal, it can have no other refuge from evils, nor safety, except by becoming as good and wise as possible. For the soul goes to Hades possessing nothing else than its discipline and education, which are said to be of the greatest advantage or detriment to the dead, on the very beginning of his journey thither. For, thus, it is said that each person's demon who was assigned to him while living, when he dies conducts him to some place, where they that are assembled together must receive sentence, and then proceed to Hades with that guide who has been ordered to conduct them from hence thither. But there having received their deserts, and having remained the appointed time, another guide brings them back hither again, after many and long revolutions of time. The journey, then, is not such as the Telephus of Æschylus describes it; for he says that a simple path leads to Hades; but it appears to me to be neither simple nor one, for there would be no need of guides, nor could any one ever miss the way, if there were but one. But now it appears to have many divisions and windings; and this I conjecture from our religious and funeral rites. 131. The well-ordered and wise soul, then, both follows, and is not ignorant of its present condition; but that which through passion clings to the body, as I said before, having longingly fluttered about it for a long time, and about its visible place, after vehement resistance and great suffering, is forcibly and with great difficulty led away by its appointed demon. And when it arrives at the place where the others are, impure and having done any such thing as the committal of unrighteous murders or other similar actions, which are kindred to these, and are the deeds of kindred souls, every one shuns it and turns away from it, and will be neither its fellow-traveler nor guide; but it wanders about, oppressed with every kind of helplessness, until certain periods have elapsed; and when these are completed, it is carried, of necessity, to an abode suitable to it. But the soul which has passed through life with purity and moderation, having obtained the gods for its fellow-travelers and guides, settles each in the place suited to it. 132. There are, indeed, many and wonderful places in the earth, and it is itself neither of such a kind nor of such a magnitude as is supposed by those who are accustomed to speak of the earth, as I have been persuaded by a certain person."

Whereupon Simmias said, "How mean you, Socrates? For I, too, have heard many things about the earth — not, however, those things which have obtained your belief. I would, therefore, gladly hear them."

"Indeed, Simmias, the art of Glaucus does not seem to me to be required to relate what these things are. That they are true, however, appears to me more than the art of Glaucus can prove, and, besides, I should probably not be able to do it; and even if I did know how, what remains to me of life, Simmias, seems insufficient for the length of the subject. However, the form of the earth, such as I am persuaded it is, and the different places in it, nothing hinders me from telling."

"But that will be enough," said Simmias.

"I am persuaded, then," said he, "in the first place, that, if the earth is in the middle of the heavens, and is of a spherical form, it has no need of air, nor of any other similar force, to prevent it from falling; but that the similarity of the heavens to themselves on every side, and the equilibrium of the earth itself, are sufficient to support it; for a thing in a state of equilibrium when placed in the middle of something that presses it equally on all sides can not incline more or less on any side, but, being equally affected all around, remains unmoved. 133. In the first place, then," he said, "I am persuaded of this."

"And very properly so," said Simmias.

"Yet, further," said he, "that it is very large, and that we who inhabit some small portion of it, from the river Phasis to the pillars of Hercules, dwell about the sea, like ants or frogs about a marsh; and that many others elsewhere dwell in many similar places, for that there are everywhere about the earth many hollows of various forms and sizes into which there is a confluence of water, mist and air; but that the earth itself, being pure, is situated in the pure heavens, in which are the stars, and which most persons who are accustomed to speak about such things call ether; of which these things are the sediment, and are continually flowing into the hollow parts of the earth. 134. That we are ignorant, then, that we are dwelling in its hollows, and imagine that we inhabit the upper parts of the earth, just as if any one dwelling in the bottom of the sea should think that he

dwelt on the sea, and, beholding the sun and the other stars through the water, should imagine that the sea was the heavens; but, through sloth and weakness, should never have reached the surface of the sea; nor, having emerged and risen up from the sea to this region, have seen how much more pure and more beautiful it is than the place where he is, nor has heard of it from any one else who has seen it. This, then, is the very condition in which we are; for, dwelling in some hollow of the earth, we think that we dwell on the surface of it, and call the air heaven, as if the stars moved through this, being heaven itself. But this is because, by reason of our weakness and sloth, we are unable to reach to the summit of the air. Since, if any one could arrive at its summit, or, becoming winged, could fly up thither, or, emerging from hence, he would see — just as with us, fishes, emerging from the sea, behold what is here, so any one would behold the things there; and if his nature were able to endure the contemplation, he would know that that is the true heaven, and the true light, and the true earth. 135. For this earth and these stones, and the whole region here, are decayed and corroded, as things in the sea by the saltness; for nothing of any value grows in the sea, nor, in a word, does it contain any thing perfect; but there are caverns and sand, and mud in abundance, and filth, in whatever parts of the sea there is earth, nor are they at all worthy to be compared with the beautiful things with us. But, on the other hand, those things in the upper regions of the earth would appear far more to excel the things with us. For, if we may tell a beautiful fable, it is well worth hearing, Simmias, what kind the things are on the earth beneath the heavens.”

“Indeed, Socrates,” said Simmias, “we should be very glad to hear that fable.”

136. “First of all, then, my friend,” he continued, “this earth, if any one should survey it from above, is said to have the appearance of balls covered with twelve different pieces of leather, variegated and distinguished with colors, of which the colors found here, and which painters use, are, as it were, copies. But there the whole earth is composed of such, and far more brilliant and pure than these; for one part of it is purple, and of wonderful beauty, part of a golden color, and part of white, more white than chalk or snow, and, in like manner, composed of other colors, and those more in number and

more beautiful than any we have ever beheld. And those very hollow parts of the earth, though filled with water and air, exhibit a certain species of color, shining among the variety of other colors, so that one continually variegated aspect presents itself to the view. In this earth, being such, all things that grow, grow in a manner proportioned to its nature — trees, flowers and fruits; and, again, in like manner, its mountains and stones possess, in the same proportion, smoothness and transparency, and more beautiful colors; of which the well-known stones here that are so highly prized are but fragments, such as sardine-stones, jaspers, and emeralds, and all of that kind. But there, there is nothing subsists that is not of this character, and even more beautiful than these. 137. But the reason of this is, because the stones there are pure, and not eaten up and decayed, like those here, by rottenness and saltiness, which flow down hither together, and which produce deformity and disease in the stones and the earth, and in other things, even animals and plants. But that earth is adorned with all these, and, moreover, with gold and silver, and other things of the kind: for they are naturally conspicuous, being numerous and large, and in all parts of the earth; so that to behold it is a sight for the blessed. There are also many other animals and men upon it, some dwelling in mid-earth, others about the air, as we do about the sea, and others in islands which the air flows round, and which are near the continent; and, in one word, what water and the sea are to us, for our necessities, the air is to them; and what air is to us, that ether is to them. 138. But their seasons are of such a temperament that they are free from disease, and live for a much longer time than those here, and surpass us in sight, hearing, and smelling, and every thing of this kind, as much as air excels water, and ether air, in purity. Moreover, they have abodes and temples of the gods, in which gods really dwell, and voices and oracles, and sensible visions of the gods, and such-like intercourse with them; the sun, too, and moon, and stars, are seen by them such as they really are, and their felicity in other respects is correspondent with these things.”

“And, such, indeed, is the nature of the whole earth, and the parts about the earth; but there are many places all round it throughout its cavities, some deeper and more open than that in which we dwell;

but others that are deeper have a less chasm than our region, and others are shallower in depth than it is here, and broader. 139. But all these are in many places perforated one into another under the earth, some with narrower and some with wider channels, and have passages through, by which a great quantity of water flows from one into another, as into basins, and there are immense bulks of ever-flowing rivers under the earth, both of hot and cold water, and a great quantity of fire, and mighty rivers of fire, and many of liquid mire, some purer, and some more miry, as in Sicily there are rivers of mud that flow before the lava, and the lava itself, and from these the several places are filled, according as the overflow from time to time happens to come to each of them. But all these move up and down, as it were, by a certain oscillation existing in the earth. And this oscillation proceeds from such natural cause as this; one of the chasms of the earth is exceedingly large, and perforated through the entire earth, and is that which Homer speaks of, 'very far off, where is the most profound abyss beneath the earth,' which elsewhere both he and many other poets have called Tartarus. For into this chasm all rivers flow together, and from it flow out again; but they severally derive their character from the earth through which they flow. 140. And the reason why all streams flow out from thence, and flow into it, is because this liquid has neither bottom nor base. Therefore, it oscillates and fluctuates up and down, and the air and the wind around it do the same; for they accompany it both when it rushes to those parts of the earth, and when to these. And as in respiration the flowing breath is continually breathed out and drawn in, so there the wind oscillating with the liquid causes certain vehement and irresistible winds both as it enters and goes out. When, therefore, the water rushing in descends to the place which we call the lower region, it flows through the earth into the streams there, and fills them, just as men pump up water. But when again it leaves those regions and rushes hither, it again fills the rivers here; and these, when filled, flow through channels and through the earth, and, having severally reached the several places to which they are journeying, they make seas, lakes, rivers, and fountains. 141. Then, sinking again from thence beneath the earth, some of them having gone round longer and more numerous places, and others round

fewer and shorter, they again discharge themselves into Tartarus — some much lower than they were drawn up, others only a little so; but all of them flow in again beneath the point at which they flowed out. And some issue out directly opposite the place by which they flow in, others on the same side. There are also some which, having gone round altogether in a circle, folding themselves once or several times round the earth, like serpents, when they have descended as low as possible, discharge themselves again; and it is possible for them to descend on either side as far as the middle, but not beyond; for in each direction there is an acclivity to the streams both ways.”

“Now, there are many other large and various streams; but among this great number there are four certain streams, of which the largest, and that which flows most outwardly round the earth, is called Ocean; but directly opposite this, and flowing in a contrary direction, is Acheron, which flows through other desert places, and, moreover, passing under the earth, reaches the Acherusian lake, where the souls of most who die arrive; and, having remained there for certain destined periods, some longer and some shorter, are again sent forth into the generations of animals. 142. A third river issues midway between these, and, near its source, falls into a vast region, burning with abundance of fire, and forms a lake larger than our sea, boiling with water and mud. From hence it proceeds in a circle, turbulent and muddy, and, folding itself round it, reaches both other places and the extremity of the Acherusian lake, but does not mingle with its water; but, folding itself oftentimes beneath the earth, it discharges itself into the lower parts of Tartarus. And this is the river which they call Pyriphlegethon, whose burning streams emit dissevered fragments in whatever part of the earth they happen to be. Opposite to this, again, the fourth river first falls into a place dreadful and savage, as it is said, having its whole color like cyanus: this they call Stygian, and the lake which the river forms by its discharge, Styx. This river, having fallen in here, and received awful power in the water, sinking beneath the earth, proceeds, folding itself round, in an opposite course to Pyriphlegethon, and meets it in the Acherusian lake from, a contrary direction. Neither does the water of this river mingle with any other; but it, too, having gone round in a circle, discharges itself into Tartarus, opposite to Pyriphlegethon. Its name, as the poets say,

is Cocytus.”

143. “These things being thus constituted, when the dead arrive at the place to which their demon leads them severally, first of all they are judged, as well those who have lived well and piously, as those who have not. And those who appear to have passed a middle kind of life, proceeding to Acheron, and embarking in the vessels they have, on these arrive at the lake, and there dwell; and when they are purified, and have suffered punishment for the iniquities they may have committed, they are set free, and each receives the reward of his good deeds, according to his deserts. But those who appear to be incurable, through the magnitude of their offenses, either from having committed many and great sacrileges, or many unjust and lawless murders, or other similar crimes, these a suitable destiny hurls into Tartarus, whence they never come forth. 144. But those who appear to have been guilty of curable yet great offenses — such as those who, through anger, have committed any violence against father or mother, and have lived the remainder of their life in a state of penitence, or they who have become homicides in a similar manner — these must, of necessity, fall into Tartarus. But after they have fallen, and have been there for a year, the wave casts them forth, the homicides into Cocytus, but the parricides and matricides into Pyriphlegethon. But when, being borne along, they arrive at the Acherusian lake, there they cry out to and invoke, some those whom they slew, others those whom they injured, and, invoking them, they entreat and implore them to suffer them to go out into the lake, and to receive them, and if they persuade them, they go out, and are freed from their sufferings, but if not, they are borne back to Tartarus, and thence again to the rivers. And they do not cease from suffering this until they have persuaded those whom they have injured, for this sentence was imposed on them by the judges. 145. But those who are found to have lived an eminently holy life, these are they who, being freed and set at large from these regions in the earth as from a prison, arrive at the pure abode above, and dwell on the upper parts of the earth. And among these, they who have sufficiently purified themselves by philosophy shall live without bodies, throughout all future time, and shall arrive at habitations yet more beautiful than these which it is neither easy to describe, nor at present is there

sufficient time for the purpose.”

“But, for the sake of these things which we have described, we should use every endeavor, Simmias, so as to acquire virtue and wisdom in this life, for the reward is noble, and the hope great.”

“To affirm positively, indeed, that these things are exactly as I have described them does not become a man of sense. That, however, either this, or something of the kind, takes place with respect to our souls and their habitations — since our soul is certainly immortal — this appears to me most fitting to be believed, and worthy the hazard for one who trusts in its reality; for the hazard is noble, and it is right to allure ourselves with such things, as with enchantments, for which reason I have prolonged my story to such a length. 146. On account of these things, then, a man ought to be confident about his soul who, during this life, has disregarded all the pleasures and ornaments of the body as foreign from his nature, and who, having thought that they do more harm than good, has zealously applied himself to the acquirement of knowledge, and who, having adorned his soul, not with a foreign, but its own proper ornament — temperance, justice, fortitude, freedom, and truth — thus waits for his passage to Hades, as one who is ready to depart whenever destiny shall summon him. You, then,” he continued, “Simmias and Cebes, and the rest, will each of you depart at some future time, but now destiny summons me, as a tragic writer would say, and it is nearly time for me to betake myself to the bath, for it appears to me to be better to drink the poison after I have bathed myself, and not to trouble the women with washing my dead body.”

147. When he had thus spoken, Crito said, “So be it, Socrates, but what commands have you to give to these or to me, either respecting your children, or any other matter, in attending to which we can most oblige you?”

“What I always say, Crito,” he replied, “nothing new that by taking care of yourselves you will oblige both me and mine, and yourselves, whatever you do, though you should not now promise it, and if you neglect yourselves, and will not live, as it were, in the footsteps of what has been now and formerly said, even though you should promise much at present, and that earnestly, you will do no good at all.”

“We will endeavor, then, so to do,” he said. “But how shall we bury you?”

“Just as you please,” he said, “if only you can catch me, and I do not escape from you.” 148. And, at the same time smiling gently, and looking round on us, he said, “I cannot persuade Crito, my friends, that I am that Socrates who is now conversing with you, and who methodizes each part of the discourse; but he thinks that I am he whom he will shortly behold dead, and asks how he should bury me. But that which I some time since argued at length, that when I have drunk the poison I shall no longer remain with you, but shall depart to some happy state of the blessed, this I seem to have urged to him in vain, though I meant at the same time to console both you and myself. Be ye, then, my sureties to Crito,” he said, “in an obligation contrary to that which he made to the judges (for he undertook that I should remain); but do you be sureties that, when I die, I shall not remain, but shall depart, that Crito may more easily bear it; and, when he sees my body either burned or buried, may not be afflicted for me, as if I suffered from some dreadful thing; nor say at my interment that Socrates is laid out, or is carried out, or is buried. 149. For be well assured,” he said, “most excellent Crito, that to speak improperly is not only culpable as to the thing itself, but likewise occasions some injury to our souls. You must have a good courage, then, and say that you bury my body, and bury it in such a manner as is pleasing to you, and as you think is most agreeable to our laws.”

When he had said thus, he rose, and went into a chamber to bathe, and Crito followed him, but he directed us to wait for him. We waited, therefore, conversing among ourselves about what had been said, and considering it again, and sometimes speaking about our calamity, how severe it would be to us, sincerely thinking that, like those who are deprived of a father, we should pass the rest of our life as orphans. When he had bathed, and his children were brought to him (for he had two little sons and one grown up), and the women belonging to his family were come, having conversed with them in the presence of Crito, and given them such injunctions as he wished, he directed the women and children to go away, and then returned to us. And it was now near sunset; for he spent a considerable time within. 150. But when he came from bathing he sat down, and did

not speak much afterward; then the officer of the Eleven came in, and, standing near him, said, "Socrates, I shall not have to find that fault with you that I do with others, that they are angry with me, and curse me, when, by order of the archons, I bid them drink the poison. But you, on all other occasions during the time you have been here, I have found to be the most noble, meek, and excellent man of all that ever came into this place; and, therefore, I am now well convinced that you will not be angry with me (for you know who are to blame), but with them. Now, then (for you know what I came to announce to you), farewell, and endeavor to bear what is inevitable as easily as possible." And at the same time, bursting into tears, he turned away and withdrew.

151. And Socrates, looking after him, said, "And thou, too, farewell. We will do as you direct." At the same time turning to us, he said, "How courteous the man is! During the whole time I have been here he has visited me, and conversed with me sometimes, and proved the worthiest of men; and now how generously he weeps for me! But come, Crito, let us obey him, and let some one bring the poison, if it is ready pounded; but if not, let the man pound it."

Then Crito said, "But I think, Socrates, that the sun is still on the mountains, and has not yet set. Besides, I know that others have drunk the poison very late, after it had been announced to them, and have supped and drunk freely, and some even have enjoyed the objects of their love. Do not hasten, then, for there is yet time."

Upon this Socrates replied, "These men whom you mention, Crito, do these things with good reason, for they think they shall gain by so doing; and I, too, with good reason, shall not do so; for I think I shall gain nothing by drinking a little later, except to become ridiculous to myself, in being so fond of life, and sparing of it, when none any longer remains. Go then," he said, "obey, and do not resist."

152. Crito, having heard this, nodded to the boy that stood near. And the boy, having gone out and staid for some time, came, bringing with him the man that was to administer the poison, who brought it ready pounded in a cup. And Socrates, on seeing the man, said, "Well, my good friend, as you are skilled in these matters, what must I do?"

“Nothing else,” he replied, “than, when you have drunk it, walk about until there is a heaviness in your legs; then lie down: thus it will do its purpose.” And at the same time he held out the cup to Socrates. And he having received it very cheerfully, Echecrates neither trembling, nor changing at all in color or countenance, but, as he was wont, looking steadfastly at the man, said, “What say you of this potion, with respect to making a libation to any one, is it lawful or not?”

“We only pound so much, Socrates,” he said, “as we think sufficient to drink.”

153. “I understand you,” he said; “but it is certainly both lawful and right to pray to the gods, that my departure hence thither may be happy; which, therefore, I pray, and so may it be.” And as he said this, he drank it off readily and calmly. Thus far, most of us were with difficulty able to restrain ourselves from weeping; but when we saw him drinking, and having finished the draught, we could do so no longer; but, in spite of myself, the tears came in full torrent, so that, covering my face, I wept for myself; for I did not weep for him, but for my own fortune, in being deprived of such a friend. But Crito, even before me, when he could not restrain his tears, had risen up. 154. But Apollodorus, even before this, had not ceased weeping; and then, bursting into an agony of grief, weeping and lamenting, he pierced the heart of every one present, except Socrates himself. But he said, “What are you doing, my admirable friends? I, indeed, for this reason chiefly, sent away the women, that they might not commit any folly of this kind. For I have heard that it is right to die with good omens. Be quiet, therefore, and bear up.”

When we heard this, we were ashamed, and restrained our tears. But he, having walked about, when he said that his legs were growing heavy, lay down on his back; for the man had so directed him. And, at the same time, he who gave the poison taking hold of him, after a short interval, examined his feet and legs; and then, having pressed his foot hard, he asked if he felt it: he said that he did not. And after this he pressed his thighs; and, thus going higher, he showed us that he was growing cold and stiff. Then Socrates touched himself, and said that when the poison reached his heart he should then depart. 155. But now the parts around the lower belly were

almost cold; when, uncovering himself, for he had been covered over, he said (and they were his last words), “Crito, we owe a cock to Æsculapius; pay it, therefore; and do not neglect it.”

“It shall be done,” said Crito; “but consider whether you have any thing else to say.”

To this question he gave no reply; but, shortly after, he gave a convulsive movement, and the man covered him, and his eyes were fixed; and Crito, perceiving it, closed his mouth and eyes.

This, Echecrates, was the end of our friend, — a man, as we may say, the best of all of his time that we have known, and, moreover, the most wise and just.

CRATYLUS

Translated by Benjamin Jowett

This dialogue concerns etymology and the intrinsic meanings of words. In the dialogue, Socrates is asked by Cratylus and Hermogenes to explain whether names are “conventional” or “natural”, that is, whether language is a system of arbitrary signs or whether words have an intrinsic relation to the things they signify.

When discussing how a word would relate to its subject, Socrates compares the original creation of a word to the work of an artist. An artist uses colour to express the essence of his subject in a painting. In much the same way, the creator of words uses letters containing certain sounds to express the essence of a word’s subject. There is a letter that is best for soft things, one for liquid things, and so on. He comments, “the best possible way to speak consists in using names all which are like the things they name, while the worst is to use the opposite kind of names.”

'Plato in his Academy' by Carl Johan Wahlbom

INTRODUCTION.

The *Cratylus* has always been a source of perplexity to the student of Plato. While in fancy and humour, and perfection of style and metaphysical originality, this dialogue may be ranked with the best of the Platonic writings, there has been an uncertainty about the motive of the piece, which interpreters have hitherto not succeeded in dispelling. We need not suppose that Plato used words in order to conceal his thoughts, or that he would have been unintelligible to an educated contemporary. In the *Phaedrus* and *Euthydemus* we also find a difficulty in determining the precise aim of the author. Plato wrote satires in the form of dialogues, and his meaning, like that of other satirical writers, has often slept in the ear of posterity. Two causes may be assigned for this obscurity: 1st, the subtlety and allusiveness of this species of composition; 2nd, the difficulty of reproducing a state of life and literature which has passed away. A satire is unmeaning unless we can place ourselves back among the persons and thoughts of the age in which it was written. Had the treatise of Antisthenes upon words, or the speculations of *Cratylus*, or some other Heracleitean of the fourth century B.C., on the nature of language been preserved to us; or if we had lived at the time, and been 'rich enough to attend the fifty-drachma course of Prodicus,' we should have understood Plato better, and many points which are now attributed to the extravagance of Socrates' humour would have been found, like the allusions of Aristophanes in the *Clouds*, to have gone home to the sophists and grammarians of the day.

For the age was very busy with philological speculation; and many questions were beginning to be asked about language which were parallel to other questions about justice, virtue, knowledge, and were illustrated in a similar manner by the analogy of the arts. Was there a correctness in words, and were they given by nature or convention? In the presocratic philosophy mankind had been striving to attain an expression of their ideas, and now they were beginning to ask themselves whether the expression might not be distinguished from the idea? They were also seeking to distinguish the parts of speech and to enquire into the relation of subject and predicate.

Grammar and logic were moving about somewhere in the depths of the human soul, but they were not yet awakened into consciousness and had not found names for themselves, or terms by which they might be expressed. Of these beginnings of the study of language we know little, and there necessarily arises an obscurity when the surroundings of such a work as the *Cratylus* are taken away. Moreover, in this, as in most of the dialogues of Plato, allowance has to be made for the character of Socrates. For the theory of language can only be propounded by him in a manner which is consistent with his own profession of ignorance. Hence his ridicule of the new school of etymology is interspersed with many declarations 'that he knows nothing,' 'that he has learned from Euthyphro,' and the like. Even the truest things which he says are depreciated by himself. He professes to be guessing, but the guesses of Plato are better than all the other theories of the ancients respecting language put together.

The dialogue hardly derives any light from Plato's other writings, and still less from Scholiasts and Neoplatonist writers. Socrates must be interpreted from himself, and on first reading we certainly have a difficulty in understanding his drift, or his relation to the two other interlocutors in the dialogue. Does he agree with *Cratylus* or with *Hermogenes*, and is he serious in those fanciful etymologies, extending over more than half the dialogue, which he seems so greatly to relish? Or is he serious in part only; and can we separate his jest from his earnest? — *Sunt bona, sunt quaedum mediocria, sunt mala plura*. Most of them are ridiculously bad, and yet among them are found, as if by accident, principles of philology which are unsurpassed in any ancient writer, and even in advance of any philologer of the last century. May we suppose that Plato, like *Lucian*, has been amusing his fancy by writing a comedy in the form of a prose dialogue? And what is the final result of the enquiry? Is Plato an upholder of the conventional theory of language, which he acknowledges to be imperfect? or does he mean to imply that a perfect language can only be based on his own theory of ideas? Or if this latter explanation is refuted by his silence, then in what relation does his account of language stand to the rest of his philosophy? Or may we be so bold as to deny the connexion between them? (For the allusion to the ideas at the end of the dialogue is merely intended to

show that we must not put words in the place of things or realities, which is a thesis strongly insisted on by Plato in many other passages)...These are some of the first thoughts which arise in the mind of the reader of the *Cratylus*. And the consideration of them may form a convenient introduction to the general subject of the dialogue.

We must not expect all the parts of a dialogue of Plato to tend equally to some clearly-defined end. His idea of literary art is not the absolute proportion of the whole, such as we appear to find in a Greek temple or statue; nor should his works be tried by any such standard. They have often the beauty of poetry, but they have also the freedom of conversation. 'Words are more plastic than wax' (*Rep.*), and may be moulded into any form. He wanders on from one topic to another, careless of the unity of his work, not fearing any 'judge, or spectator, who may recall him to the point' (*Theat.*), 'whither the argument blows we follow' (*Rep.*). To have determined beforehand, as in a modern didactic treatise, the nature and limits of the subject, would have been fatal to the spirit of enquiry or discovery, which is the soul of the dialogue...These remarks are applicable to nearly all the works of Plato, but to the *Cratylus* and *Phaedrus* more than any others. See *Phaedrus*, Introduction.

There is another aspect under which some of the dialogues of Plato may be more truly viewed: — they are dramatic sketches of an argument. We have found that in the *Lysis*, *Charmides*, *Laches*, *Protagoras*, *Meno*, we arrived at no conclusion — the different sides of the argument were personified in the different speakers; but the victory was not distinctly attributed to any of them, nor the truth wholly the property of any. And in the *Cratylus* we have no reason to assume that Socrates is either wholly right or wholly wrong, or that Plato, though he evidently inclines to him, had any other aim than that of personifying, in the characters of Hermogenes, Socrates, and *Cratylus*, the three theories of language which are respectively maintained by them.

The two subordinate persons of the dialogue, Hermogenes and *Cratylus*, are at the opposite poles of the argument. But after a while the disciple of the Sophist and the follower of Heracleitus are found to be not so far removed from one another as at first sight appeared;

and both show an inclination to accept the third view which Socrates interposes between them. First, Hermogenes, the poor brother of the rich Callias, expounds the doctrine that names are conventional; like the names of slaves, they may be given and altered at pleasure. This is one of those principles which, whether applied to society or language, explains everything and nothing. For in all things there is an element of convention; but the admission of this does not help us to understand the rational ground or basis in human nature on which the convention proceeds. Socrates first of all intimates to Hermogenes that his view of language is only a part of a sophistical whole, and ultimately tends to abolish the distinction between truth and falsehood. Hermogenes is very ready to throw aside the sophistical tenet, and listens with a sort of half admiration, half belief, to the speculations of Socrates.

Cratylus is of opinion that a name is either a true name or not a name at all. He is unable to conceive of degrees of imitation; a word is either the perfect expression of a thing, or a mere inarticulate sound (a fallacy which is still prevalent among theorizers about the origin of language). He is at once a philosopher and a sophist; for while wanting to rest language on an immutable basis, he would deny the possibility of falsehood. He is inclined to derive all truth from language, and in language he sees reflected the philosophy of Heracleitus. His views are not like those of Hermogenes, hastily taken up, but are said to be the result of mature consideration, although he is described as still a young man. With a tenacity characteristic of the Heracleitean philosophers, he clings to the doctrine of the flux. (Compare Theaet.) Of the real Cratylus we know nothing, except that he is recorded by Aristotle to have been the friend or teacher of Plato; nor have we any proof that he resembled the likeness of him in Plato any more than the Critias of Plato is like the real Critias, or the Euthyphro in this dialogue like the other Euthyphro, the diviner, in the dialogue which is called after him.

Between these two extremes, which have both of them a sophistical character, the view of Socrates is introduced, which is in a manner the union of the two. Language is conventional and also natural, and the true conventional-natural is the rational. It is a work not of chance, but of art; the dialectician is the artificer of words, and

the legislator gives authority to them. They are the expressions or imitations in sound of things. In a sense, Cratylus is right in saying that things have by nature names; for nature is not opposed either to art or to law. But vocal imitation, like any other copy, may be imperfectly executed; and in this way an element of chance or convention enters in. There is much which is accidental or exceptional in language. Some words have had their original meaning so obscured, that they require to be helped out by convention. But still the true name is that which has a natural meaning. Thus nature, art, chance, all combine in the formation of language. And the three views respectively propounded by Hermogenes, Socrates, Cratylus, may be described as the conventional, the artificial or rational, and the natural. The view of Socrates is the meeting-point of the other two, just as conceptualism is the meeting-point of nominalism and realism.

We can hardly say that Plato was aware of the truth, that 'languages are not made, but grow.' But still, when he says that 'the legislator made language with the dialectician standing on his right hand,' we need not infer from this that he conceived words, like coins, to be issued from the mint of the State. The creator of laws and of social life is naturally regarded as the creator of language, according to Hellenic notions, and the philosopher is his natural advisor. We are not to suppose that the legislator is performing any extraordinary function; he is merely the Eponymus of the State, who prescribes rules for the dialectician and for all other artists. According to a truly Platonic mode of approaching the subject, language, like virtue in the Republic, is examined by the analogy of the arts. Words are works of art which may be equally made in different materials, and are well made when they have a meaning. Of the process which he thus describes, Plato had probably no very definite notion. But he means to express generally that language is the product of intelligence, and that languages belong to States and not to individuals.

A better conception of language could not have been formed in Plato's age, than that which he attributes to Socrates. Yet many persons have thought that the mind of Plato is more truly seen in the vague realism of Cratylus. This misconception has probably arisen

from two causes: first, the desire to bring Plato's theory of language into accordance with the received doctrine of the Platonic ideas; secondly, the impression created by Socrates himself, that he is not in earnest, and is only indulging the fancy of the hour.

1. We shall have occasion to show more at length, in the Introduction to future dialogues, that the so-called Platonic ideas are only a semi-mythical form, in which he attempts to realize abstractions, and that they are replaced in his later writings by a rational theory of psychology. (See introductions to the *Meno* and the *Sophist*.) And in the *Cratylus* he gives a general account of the nature and origin of language, in which Adam Smith, Rousseau, and other writers of the last century, would have substantially agreed. At the end of the dialogue, he speaks as in the *Symposium* and *Republic* of absolute beauty and good; but he never supposed that they were capable of being embodied in words. Of the names of the ideas, he would have said, as he says of the names of the Gods, that we know nothing. Even the realism of *Cratylus* is not based upon the ideas of Plato, but upon the flux of Heracleitus. Here, as in the *Sophist* and *Politicus*, Plato expressly draws attention to the want of agreement in words and things. Hence we are led to infer, that the view of Socrates is not the less Plato's own, because not based upon the ideas; 2nd, that Plato's theory of language is not inconsistent with the rest of his philosophy.

2. We do not deny that Socrates is partly in jest and partly in earnest. He is discoursing in a high-flown vein, which may be compared to the 'dithyrambics of the *Phaedrus*.' They are mysteries of which he is speaking, and he professes a kind of ludicrous fear of his imaginary wisdom. When he is arguing out of Homer, about the names of Hector's son, or when he describes himself as inspired or maddened by Euthyphro, with whom he has been sitting from the early dawn (compare *Phaedrus* and *Lysias*; *Phaedr.*) and expresses his intention of yielding to the illusion to-day, and to-morrow he will go to a priest and be purified, we easily see that his words are not to be taken seriously. In this part of the dialogue his dread of committing impiety, the pretended derivation of his wisdom from another, the extravagance of some of his etymologies, and, in general, the manner in which the fun, fast and furious, vires acquirit

eundo, remind us strongly of the *Phaedrus*. The jest is a long one, extending over more than half the dialogue. But then, we remember that the *Euthydemus* is a still longer jest, in which the irony is preserved to the very end. There he is parodying the ingenious follies of early logic; in the *Cratylus* he is ridiculing the fancies of a new school of sophists and grammarians. The fallacies of the *Euthydemus* are still retained at the end of our logic books; and the etymologies of the *Cratylus* have also found their way into later writers. Some of these are not much worse than the conjectures of Hemsterhuis, and other critics of the last century; but this does not prove that they are serious. For Plato is in advance of his age in his conception of language, as much as he is in his conception of mythology. (Compare *Phaedrus*.)

When the fervour of his etymological enthusiasm has abated, Socrates ends, as he has begun, with a rational explanation of language. Still he preserves his 'know nothing' disguise, and himself declares his first notions about names to be reckless and ridiculous. Having explained compound words by resolving them into their original elements, he now proceeds to analyse simple words into the letters of which they are composed. The Socrates who 'knows nothing,' here passes into the teacher, the dialectician, the arranger of species. There is nothing in this part of the dialogue which is either weak or extravagant. Plato is a supporter of the Onomatopoetic theory of language; that is to say, he supposes words to be formed by the imitation of ideas in sounds; he also recognises the effect of time, the influence of foreign languages, the desire of euphony, to be formative principles; and he admits a certain element of chance. But he gives no imitation in all this that he is preparing the way for the construction of an ideal language. Or that he has any Eleatic speculation to oppose to the Heracleiteanism of *Cratylus*.

The theory of language which is propounded in the *Cratylus* is in accordance with the later phase of the philosophy of Plato, and would have been regarded by him as in the main true. The dialogue is also a satire on the philological fancies of the day. Socrates in pursuit of his vocation as a detector of false knowledge, lights by accident on the truth. He is guessing, he is dreaming; he has heard, as he says in the *Phaedrus*, from another: no one is more surprised than

himself at his own discoveries. And yet some of his best remarks, as for example his view of the derivation of Greek words from other languages, or of the permutations of letters, or again, his observation that in speaking of the Gods we are only speaking of our names of them, occur among these flights of humour.

We can imagine a character having a profound insight into the nature of men and things, and yet hardly dwelling upon them seriously; blending inextricably sense and nonsense; sometimes enveloping in a blaze of jests the most serious matters, and then again allowing the truth to peer through; enjoying the flow of his own humour, and puzzling mankind by an ironical exaggeration of their absurdities. Such were Aristophanes and Rabelais; such, in a different style, were Sterne, Jean Paul, Hamann, — writers who sometimes become unintelligible through the extravagance of their fancies. Such is the character which Plato intends to depict in some of his dialogues as the Silenus Socrates; and through this medium we have to receive our theory of language.

There remains a difficulty which seems to demand a more exact answer: In what relation does the satirical or etymological portion of the dialogue stand to the serious? Granting all that can be said about the provoking irony of Socrates, about the parody of Euthyphro, or Prodicus, or Antisthenes, how does the long catalogue of etymologies furnish any answer to the question of Hermogenes, which is evidently the main thesis of the dialogue: What is the truth, or correctness, or principle of names?

After illustrating the nature of correctness by the analogy of the arts, and then, as in the Republic, ironically appealing to the authority of the Homeric poems, Socrates shows that the truth or correctness of names can only be ascertained by an appeal to etymology. The truth of names is to be found in the analysis of their elements. But why does he admit etymologies which are absurd, based on Heracleitean fancies, fourfold interpretations of words, impossible unions and separations of syllables and letters?

1. The answer to this difficulty has been already anticipated in part: Socrates is not a dogmatic teacher, and therefore he puts on this wild and fanciful disguise, in order that the truth may be permitted to appear: 2. as Benfey remarks, an erroneous example may illustrate a

principle of language as well as a true one: 3. many of these etymologies, as, for example, that of *dikaion*, are indicated, by the manner in which Socrates speaks of them, to have been current in his own age: 4. the philosophy of language had not made such progress as would have justified Plato in propounding real derivations. Like his master Socrates, he saw through the hollowness of the incipient sciences of the day, and tries to move in a circle apart from them, laying down the conditions under which they are to be pursued, but, as in the *Timaeus*, cautious and tentative, when he is speaking of actual phenomena. To have made etymologies seriously, would have seemed to him like the interpretation of the myths in the *Phaedrus*, the task 'of a not very fortunate individual, who had a great deal of time on his hands.' The irony of Socrates places him above and beyond the errors of his contemporaries.

The *Cratylus* is full of humour and satirical touches: the inspiration which comes from Euthyphro, and his prancing steeds, the light admixture of quotations from Homer, and the spurious dialectic which is applied to them; the jest about the fifty-drachma course of Prodicus, which is declared on the best authority, viz. his own, to be a complete education in grammar and rhetoric; the double explanation of the name Hermogenes, either as 'not being in luck,' or 'being no speaker;' the dearly-bought wisdom of Callias, the Lacedaemonian whose name was 'Rush,' and, above all, the pleasure which Socrates expresses in his own dangerous discoveries, which 'to-morrow he will purge away,' are truly humorous. While delivering a lecture on the philosophy of language, Socrates is also satirizing the endless fertility of the human mind in spinning arguments out of nothing, and employing the most trifling and fanciful analogies in support of a theory. Etymology in ancient as in modern times was a favourite recreation; and Socrates makes merry at the expense of the etymologists. The simplicity of Hermogenes, who is ready to believe anything that he is told, heightens the effect. Socrates in his genial and ironical mood hits right and left at his adversaries: Ouranos is so called *apo tou oran ta ano*, which, as some philosophers say, is the way to have a pure mind; the sophists are by a fanciful explanation converted into heroes; 'the givers of names were like some philosophers who fancy that the earth goes round

because their heads are always going round.' There is a great deal of 'mischief' lurking in the following: 'I found myself in greater perplexity about justice than I was before I began to learn;' 'The rho in katoptron must be the addition of some one who cares nothing about truth, but thinks only of putting the mouth into shape;' 'Tales and falsehoods have generally to do with the Tragic and goatish life, and tragedy is the place of them.' Several philosophers and sophists are mentioned by name: first, Protagoras and Euthydemus are assailed; then the interpreters of Homer, *oi palaioi Omerikoi* (compare *Arist. Met.*) and the Orphic poets are alluded to by the way; then he discovers a hive of wisdom in the philosophy of Heracleitus; — the doctrine of the flux is contained in the word *ousia* (= *osia* the pushing principle), an anticipation of Anaxagoras is found in *psuche* and *selene*. Again, he ridicules the arbitrary methods of pulling out and putting in letters which were in vogue among the philologers of his time; or slightly scoffs at contemporary religious beliefs. Lastly, he is impatient of hearing from the half-converted Cratylus the doctrine that falsehood can neither be spoken, nor uttered, nor addressed; a piece of sophistry attributed to Gorgias, which reappears in the *Sophist*. And he proceeds to demolish, with no less delight than he had set up, the Heracleitean theory of language.

In the latter part of the dialogue Socrates becomes more serious, though he does not lay aside but rather aggravates his banter of the Heracleiteans, whom here, as in the *Theaetetus*, he delights to ridicule. What was the origin of this enmity we can hardly determine: — was it due to the natural dislike which may be supposed to exist between the 'patrons of the flux' and the 'friends of the ideas' (*Soph.*)? or is it to be attributed to the indignation which Plato felt at having wasted his time upon 'Cratylus and the doctrines of Heracleitus' in the days of his youth? Socrates, touching on some of the characteristic difficulties of early Greek philosophy, endeavours to show Cratylus that imitation may be partial or imperfect, that a knowledge of things is higher than a knowledge of names, and that there can be no knowledge if all things are in a state of transition. But Cratylus, who does not easily apprehend the argument from common sense, remains unconvinced, and on the whole inclines to his former

opinion. Some profound philosophical remarks are scattered up and down, admitting of an application not only to language but to knowledge generally; such as the assertion that 'consistency is no test of truth:' or again, 'If we are over-precise about words, truth will say "too late" to us as to the belated traveller in Aegina.'

The place of the dialogue in the series cannot be determined with certainty. The style and subject, and the treatment of the character of Socrates, have a close resemblance to the earlier dialogues, especially to the *Phaedrus* and *Euthydemus*. The manner in which the ideas are spoken of at the end of the dialogue, also indicates a comparatively early date. The imaginative element is still in full vigour; the Socrates of the *Cratylus* is the Socrates of the *Apology* and *Symposium*, not yet Platonized; and he describes, as in the *Theaetetus*, the philosophy of Heracleitus by 'unsavoury' similes — he cannot believe that the world is like 'a leaky vessel,' or 'a man who has a running at the nose'; he attributes the flux of the world to the swimming in some folks' heads. On the other hand, the relation of thought to language is omitted here, but is treated of in the *Sophist*. These grounds are not sufficient to enable us to arrive at a precise conclusion. But we shall not be far wrong in placing the *Cratylus* about the middle, or at any rate in the first half, of the series.

Cratylus, the Heracleitean philosopher, and *Hermogenes*, the brother of *Callias*, have been arguing about names; the former maintaining that they are natural, the latter that they are conventional. *Cratylus* affirms that his own is a true name, but will not allow that the name of *Hermogenes* is equally true. *Hermogenes* asks Socrates to explain to him what *Cratylus* means; or, far rather, he would like to know, What Socrates himself thinks about the truth or correctness of names? Socrates replies, that hard is knowledge, and the nature of names is a considerable part of knowledge: he has never been to hear the fifty-drachma course of *Prodicus*; and having only attended the single-drachma course, he is not competent to give an opinion on such matters. When *Cratylus* denies that *Hermogenes* is a true name, he supposes him to mean that he is not a true son of *Hermes*, because he is never in luck. But he would like to have an open council and to hear both sides.

Hermogenes is of opinion that there is no principle in names; they

may be changed, as we change the names of slaves, whenever we please, and the altered name is as good as the original one.

You mean to say, for instance, rejoins Socrates, that if I agree to call a man a horse, then a man will be rightly called a horse by me, and a man by the rest of the world? But, surely, there is in words a true and a false, as there are true and false propositions. If a whole proposition be true or false, then the parts of a proposition may be true or false, and the least parts as well as the greatest; and the least parts are names, and therefore names may be true or false. Would Hermogenes maintain that anybody may give a name to anything, and as many names as he pleases; and would all these names be always true at the time of giving them? Hermogenes replies that this is the only way in which he can conceive that names are correct; and he appeals to the practice of different nations, and of the different Hellenic tribes, in confirmation of his view. Socrates asks, whether the things differ as the words which represent them differ: — Are we to maintain with Protagoras, that what appears is? Hermogenes has always been puzzled about this, but acknowledges, when he is pressed by Socrates, that there are a few very good men in the world, and a great many very bad; and the very good are the wise, and the very bad are the foolish; and this is not mere appearance but reality. Nor is he disposed to say with Euthydemus, that all things equally and always belong to all men; in that case, again, there would be no distinction between bad and good men. But then, the only remaining possibility is, that all things have their several distinct natures, and are independent of our notions about them. And not only things, but actions, have distinct natures, and are done by different processes. There is a natural way of cutting or burning, and a natural instrument with which men cut or burn, and any other way will fail; — this is true of all actions. And speaking is a kind of action, and naming is a kind of speaking, and we must name according to a natural process, and with a proper instrument. We cut with a knife, we pierce with an awl, we weave with a shuttle, we name with a name. And as a shuttle separates the warp from the woof, so a name distinguishes the natures of things. The weaver will use the shuttle well, — that is, like a weaver; and the teacher will use the name well, — that is, like a teacher. The shuttle will be made by the carpenter; the awl by the

smith or skilled person. But who makes a name? Does not the law give names, and does not the teacher receive them from the legislator? He is the skilled person who makes them, and of all skilled workmen he is the rarest. But how does the carpenter make or repair the shuttle, and to what will he look? Will he not look at the ideal which he has in his mind? And as the different kinds of work differ, so ought the instruments which make them to differ. The several kinds of shuttles ought to answer in material and form to the several kinds of webs. And the legislator ought to know the different materials and forms of which names are made in Hellas and other countries. But who is to be the judge of the proper form? The judge of shuttles is the weaver who uses them; the judge of lyres is the player of the lyre; the judge of ships is the pilot. And will not the judge who is able to direct the legislator in his work of naming, be he who knows how to use the names — he who can ask and answer questions — in short, the dialectician? The pilot directs the carpenter how to make the rudder, and the dialectician directs the legislator how he is to impose names; for to express the ideal forms of things in syllables and letters is not the easy task, Hermogenes, which you imagine.

‘I should be more readily persuaded, if you would show me this natural correctness of names.’

Indeed I cannot; but I see that you have advanced; for you now admit that there is a correctness of names, and that not every one can give a name. But what is the nature of this correctness or truth, you must learn from the Sophists, of whom your brother Callias has bought his reputation for wisdom rather dearly; and since they require to be paid, you, having no money, had better learn from him at second-hand. ‘Well, but I have just given up Protagoras, and I should be inconsistent in going to learn of him.’ Then if you reject him you may learn of the poets, and in particular of Homer, who distinguishes the names given by Gods and men to the same things, as in the verse about the river God who fought with Hephaestus, ‘whom the Gods call Xanthus, and men call Scamander;’ or in the lines in which he mentions the bird which the Gods call ‘Chalcis,’ and men ‘Cymindis;’ or the hill which men call ‘Batieia,’ and the Gods ‘Myrinna’s Tomb.’ Here is an important lesson; for the Gods

must of course be right in their use of names. And this is not the only truth about philology which may be learnt from Homer. Does he not say that Hector's son had two names —

‘Hector called him Scamandrius, but the others Astyanax’?

Now, if the men called him Astyanax, is it not probable that the other name was conferred by the women? And which are more likely to be right — the wiser or the less wise, the men or the women? Homer evidently agreed with the men: and of the name given by them he offers an explanation; — the boy was called Astyanax (‘king of the city’), because his father saved the city. The names Astyanax and Hector, moreover, are really the same, — the one means a king, and the other is ‘a holder or possessor.’ For as the lion's whelp may be called a lion, or the horse's foal a foal, so the son of a king may be called a king. But if the horse had produced a calf, then that would be called a calf. Whether the syllables of a name are the same or not makes no difference, provided the meaning is retained. For example; the names of letters, whether vowels or consonants, do not correspond to their sounds, with the exception of epsilon, upsilon, omicron, omega. The name Beta has three letters added to the sound — and yet this does not alter the sense of the word, or prevent the whole name having the value which the legislator intended. And the same may be said of a king and the son of a king, who like other animals resemble each other in the course of nature; the words by which they are signified may be disguised, and yet amid differences of sound the etymologist may recognise the same notion, just as the physician recognises the power of the same drugs under different disguises of colour and smell. Hector and Astyanax have only one letter alike, but they have the same meaning; and Agis (leader) is altogether different in sound from Polemarchus (chief in war), or Eupolemus (good warrior); but the two words present the same idea of leader or general, like the words Iatrocles and Acesimbrotus, which equally denote a physician. The son succeeds the father as the foal succeeds the horse, but when, out of the course of nature, a prodigy occurs, and the offspring no longer resembles the parent, then the names no longer agree. This may be illustrated by the case of Agamemnon and his son Orestes, of whom the former has a name significant of his patience at the siege of Troy; while the name of the

latter indicates his savage, man-of-the-mountain nature. Atreus again, for his murder of Chrysippus, and his cruelty to Thyestes, is rightly named Atreus, which, to the eye of the etymologist, is *ateros* (destructive), *ateires* (stubborn), *atreotos* (fearless); and Pelops is *o ta pelas oron* (he who sees what is near only), because in his eagerness to win Hippodamia, he was unconscious of the remoter consequences which the murder of Myrtilus would entail upon his race. The name Tantalus, if slightly changed, offers two etymologies; either *apo tes tou lithou talanteias*, or *apo tou talantaton einai*, signifying at once the hanging of the stone over his head in the world below, and the misery which he brought upon his country. And the name of his father, Zeus, Dios, Zenos, has an excellent meaning, though hard to be understood, because really a sentence which is divided into two parts (Zeus, Dios). For he, being the lord and king of all, is the author of our being, and in him all live: this is implied in the double form, Dios, Zenos, which being put together and interpreted is *di on ze panta*. There may, at first sight, appear to be some irreverence in calling him the son of Cronos, who is a proverb for stupidity; but the meaning is that Zeus himself is the son of a mighty intellect; Kronos, quasi *koros*, not in the sense of a youth, but quasi *to katharon kai akeraton tou nou* — the pure and garnished mind, which in turn is begotten of Uranus, who is so called *apo tou oran ta ano*, from looking upwards; which, as philosophers say, is the way to have a pure mind. The earlier portion of Hesiod's genealogy has escaped my memory, or I would try more conclusions of the same sort. 'You talk like an oracle.' I caught the infection from Euthyphro, who gave me a long lecture which began at dawn, and has not only entered into my ears, but filled my soul, and my intention is to yield to the inspiration to-day; and to-morrow I will be exorcised by some priest or sophist. 'Go on; I am anxious to hear the rest.' Now that we have a general notion, how shall we proceed? What names will afford the most crucial test of natural fitness? Those of heroes and ordinary men are often deceptive, because they are patronymics or expressions of a wish; let us try gods and demi-gods. Gods are so called, *apo tou thein*, from the verb 'to run;' because the sun, moon, and stars run about the heaven; and they being the original gods of the Hellenes, as they still are of the Barbarians, their name is given to all Gods. The

demons are the golden race of Hesiod, and by golden he means not literally golden, but good; and they are called demons, quasi daemones, which in old Attic was used for daimones — good men are well said to become daimones when they die, because they are knowing. Eros (with an epsilon) is the same word as eros (with an eta): ‘the sons of God saw the daughters of men that they were fair;’ or perhaps they were a species of sophists or rhetoricians, and so called apo tou erotan, or eirein, from their habit of spinning questions; for eirein is equivalent to legein. I get all this from Euthyphro; and now a new and ingenious idea comes into my mind, and, if I am not careful, I shall be wiser than I ought to be by to-morrow’s dawn. My idea is, that we may put in and pull out letters at pleasure and alter the accents (as, for example, Dii philos may be turned into Diphilos), and we may make words into sentences and sentences into words. The name anthrotos is a case in point, for a letter has been omitted and the accent changed; the original meaning being o anathron a opopen — he who looks up at what he sees. Psuche may be thought to be the reviving, or refreshing, or animating principle — e anapsuchousa to soma; but I am afraid that Euthyphro and his disciples will scorn this derivation, and I must find another: shall we identify the soul with the ‘ordering mind’ of Anaxagoras, and say that psuche, quasi phuseche = e phusin echei or ochei? — this might easily be refined into psyche. ‘That is a more artistic etymology.’

After psuche follows soma; this, by a slight permutation, may be either = (1) the ‘grave’ of the soul, or (2) may mean ‘that by which the soul signifies (semainei) her wishes.’ But more probably, the word is Orphic, and simply denotes that the body is the place of ward in which the soul suffers the penalty of sin, — en o sozetai. ‘I should like to hear some more explanations of the names of the Gods, like that excellent one of Zeus.’ The truest names of the Gods are those which they give themselves; but these are unknown to us. Less true are those by which we propitiate them, as men say in prayers, ‘May he graciously receive any name by which I call him.’ And to avoid offence, I should like to let them know beforehand that we are not presuming to enquire about them, but only about the names which they usually bear. Let us begin with Hestia. What did he mean who

gave the name Hestia? ‘That is a very difficult question.’ O, my dear Hermogenes, I believe that there was a power of philosophy and talk among the first inventors of names, both in our own and in other languages; for even in foreign words a principle is discernible. Hestia is the same with esia, which is an old form of ousia, and means the first principle of things: this agrees with the fact that to Hestia the first sacrifices are offered. There is also another reading — osia, which implies that ‘pushing’ (othoun) is the first principle of all things. And here I seem to discover a delicate allusion to the flux of Heracleitus — that antediluvian philosopher who cannot walk twice in the same stream; and this flux of his may accomplish yet greater marvels. For the names Cronos and Rhea cannot have been accidental; the giver of them must have known something about the doctrine of Heracleitus. Moreover, there is a remarkable coincidence in the words of Hesiod, when he speaks of Oceanus, ‘the origin of Gods;’ and in the verse of Orpheus, in which he describes Oceanus espousing his sister Tethys. Tethys is nothing more than the name of a spring — to diattomenon kai ethoumenon. Poseidon is posidesmos, the chain of the feet, because you cannot walk on the sea — the epsilon is inserted by way of ornament; or perhaps the name may have been originally polleidon, meaning, that the God knew many things (polla eidos): he may also be the shaker, apo tou seiein, — in this case, pi and delta have been added. Pluto is connected with ploutos, because wealth comes out of the earth; or the word may be a euphemism for Hades, which is usually derived apo tou aeidous, because the God is concerned with the invisible. But the name Hades was really given him from his knowing (eidenai) all good things. Men in general are foolishly afraid of him, and talk with horror of the world below from which no one may return. The reason why his subjects never wish to come back, even if they could, is that the God enchains them by the strongest of spells, namely by the desire of virtue, which they hope to obtain by constant association with him. He is the perfect and accomplished Sophist and the great benefactor of the other world; for he has much more than he wants there, and hence he is called Pluto or the rich. He will have nothing to do with the souls of men while in the body, because he cannot work his will with them so long as they are confused and entangled by fleshly

lusts. Demeter is the mother and giver of food — e didousa meter tes edodes. Here is erate tis, or perhaps the legislator may have been thinking of the weather, and has merely transposed the letters of the word aer. Pherephatta, that word of awe, is pheretapha, which is only an euphonious contraction of e tou pheromenou ephaptomene, — all things are in motion, and she in her wisdom moves with them, and the wise God Hades consorts with her — there is nothing very terrible in this, any more than in the her other appellation Persephone, which is also significant of her wisdom (sophe). Apollo is another name, which is supposed to have some dreadful meaning, but is susceptible of at least four perfectly innocent explanations. First, he is the purifier or purger or absolver (apolouon); secondly, he is the true diviner, Aplos, as he is called in the Thessalian dialect (aplos = aplous, sincere); thirdly, he is the archer (aei ballon), always shooting; or again, supposing alpha to mean ama or omou, Apollo becomes equivalent to ama polon, which points to both his musical and his heavenly attributes; for there is a ‘moving together’ alike in music and in the harmony of the spheres. The second lambda is inserted in order to avoid the ill-omened sound of destruction. The Muses are so called — apo tou mosthai. The gentle Leto or Letho is named from her willingness (ethelemon), or because she is ready to forgive and forget (lethe). Artemis is so called from her healthy well-balanced nature, dia to artemes, or as aretes istor; or as a lover of virginity, aroton misesasa. One of these explanations is probably true, — perhaps all of them. Dionysus is o didous ton oionon, and oinos is quasi oionous because wine makes those think (oiesthai) that they have a mind (nous) who have none. The established derivation of Aphrodite dia ten tou athrou genesin may be accepted on the authority of Hesiod. Again, there is the name of Pallas, or Athene, which we, who are Athenians, must not forget. Pallas is derived from armed dances — apo tou pallein ta opla. For Athene we must turn to the allegorical interpreters of Homer, who make the name equivalent to theonoe, or possibly the word was originally ethonoe and signified moral intelligence (en ethei noesis). Hephaestus, again, is the lord of light — o tou phaeos istor. This is a good notion; and, to prevent any other getting into our heads, let us go on to Ares. He is the manly one (arren), or the unchangeable one (arratos). Enough of the Gods; for,

by the Gods, I am afraid of them; but if you suggest other words, you will see how the horses of Euthyphro prance. ‘Only one more God; tell me about my godfather Hermes.’ He is ermeneus, the messenger or cheater or thief or bargainer; or o eirein momenos, that is, eiremes or ermes — the speaker or contriver of speeches. ‘Well said Cratylus, then, that I am no son of Hermes.’ Pan, as the son of Hermes, is speech or the brother of speech, and is called Pan because speech indicates everything — o pan menuon. He has two forms, a true and a false; and is in the upper part smooth, and in the lower part shaggy. He is the goat of Tragedy, in which there are plenty of falsehoods.

‘Will you go on to the elements — sun, moon, stars, earth, aether, air, fire, water, seasons, years?’ Very good: and which shall I take first? Let us begin with elios, or the sun. The Doric form elios helps us to see that he is so called because at his rising he gathers (alizei) men together, or because he rolls about (eilei) the earth, or because he variegates (aiolei = poikillei) the earth. Selene is an anticipation of Anaxagoras, being a contraction of selaenoneoaeia, the light (selas) which is ever old and new, and which, as Anaxagoras says, is borrowed from the sun; the name was harmonized into selanaia, a form which is still in use. ‘That is a true dithyrambic name.’ Meis is so called apo tou meiousthai, from suffering diminution, and astron is from astrape (lightning), which is an improvement of anastrophe, that which turns the eyes inside out. ‘How do you explain pur n udor?’ I suspect that pur, which, like udor n kuon, is found in Phrygian, is a foreign word; for the Hellenes have borrowed much from the barbarians, and I always resort to this theory of a foreign origin when I am at a loss. Aer may be explained, oti airei ta apo tes ges; or, oti aei rei; or, oti pneuma ex autou ginetai (compare the poetic word aetai). So aither quasi aeitheer oti aei thei peri ton aera: ge, gaia quasi genneteira (compare the Homeric form gegaasi); ora (with an omega), or, according to the old Attic form ora (with an omicron), is derived apo tou orizein, because it divides the year; eniautos and etos are the same thought — o en eauto etazon, cut into two parts, en eauto and etazon, like di on ze into Dios and Zenos.

‘You make surprising progress.’ True; I am run away with, and am not even yet at my utmost speed. ‘I should like very much to hear your account of the virtues. What principle of correctness is there in

those charming words, wisdom, understanding, justice, and the rest?' To explain all that will be a serious business; still, as I have put on the lion's skin, appearances must be maintained. My opinion is, that primitive men were like some modern philosophers, who, by always going round in their search after the nature of things, become dizzy; and this phenomenon, which was really in themselves, they imagined to take place in the external world. You have no doubt remarked, that the doctrine of the universal flux, or generation of things, is indicated in names. 'No, I never did.' Phronesis is only phoras kai rou noesis, or perhaps phoras onesis, and in any case is connected with pheresthai; gnome is gones skepsis kai nomesis; noesis is neou or gignomenon esis; the word neos implies that creation is always going on — the original form was neoesis; sophrosune is soteria phroneseos; episteme is e epomene tois pragmasin — the faculty which keeps close, neither anticipating nor lagging behind; sunesis is equivalent to sunienai, sumporeuesthai ten psuche, and is a kind of conclusion — sullogismos tis, akin therefore in idea to episteme; sophia is very difficult, and has a foreign look — the meaning is, touching the motion or stream of things, and may be illustrated by the poetical esuthe and the Lacedaemonian proper name Sous, or Rush; agathon is ro agaston en te tachuteti, — for all things are in motion, and some are swifter than others: dikaiousune is clearly e tou dikaiou sunesis. The word dikaion is more troublesome, and appears to mean the subtle penetrating power which, as the lovers of motion say, preserves all things, and is the cause of all things, quasi diaion going through — the letter kappa being inserted for the sake of euphony. This is a great mystery which has been confided to me; but when I ask for an explanation I am thought obtrusive, and another derivation is proposed to me. Justice is said to be o kaion, or the sun; and when I joyfully repeat this beautiful notion, I am answered, 'What, is there no justice when the sun is down?' And when I entreat my questioner to tell me his own opinion, he replies, that justice is fire in the abstract, or heat in the abstract; which is not very intelligible. Others laugh at such notions, and say with Anaxagoras, that justice is the ordering mind. 'I think that some one must have told you this.' And not the rest? Let me proceed then, in the hope of proving to you my originality. Andreia is quasi anpeia quasi e ano

roe, the stream which flows upwards, and is opposed to injustice, which clearly hinders the principle of penetration; arren and aner have a similar derivation; gune is the same as gone; thelu is derived apo tes theles, because the teat makes things flourish (tethelenai), and the word thallein itself implies increase of youth, which is swift and sudden ever (thein and allesthai). I am getting over the ground fast: but much has still to be explained. There is techne, for instance. This, by an aphaeresis of tau and an epenthesis of omicron in two places, may be identified with echonoe, and signifies 'that which has mind.'

'A very poor etymology.' Yes; but you must remember that all language is in process of change; letters are taken in and put out for the sake of euphony, and time is also a great alterer of words. For example, what business has the letter rho in the word katoptron, or the letter sigma in the word sphigx? The additions are often such that it is impossible to make out the original word; and yet, if you may put in and pull out, as you like, any name is equally good for any object. The fact is, that great dictators of literature like yourself should observe the rules of moderation. 'I will do my best.' But do not be too much of a precisian, or you will paralyze me. If you will let me add mechane, apo tou mekous, which means polu, and anein, I shall be at the summit of my powers, from which elevation I will examine the two words kakia and arete. The first is easily explained in accordance with what has preceded; for all things being in a flux, kakia is to kakos ion. This derivation is illustrated by the word deilia, which ought to have come after andreia, and may be regarded as o lian desmos tes psuches, just as aporia signifies an impediment to motion (from alpha not, and poreuesthai to go), and arete is euporia, which is the opposite of this — the everflowing (aei reousa or aeireite), or the eligible, quasi airete. You will think that I am inventing, but I say that if kakia is right, then arete is also right. But what is kakon? That is a very obscure word, to which I can only apply my old notion and declare that kakon is a foreign word. Next, let us proceed to kalon, aischron. The latter is doubtless contracted from aeischoroun, quasi aei ischon roun. The inventor of words being a patron of the flux, was a great enemy to stagnation. Kalon is to kaloun ta pragmata — this is mind (nous or dianoia); which is also the principle of beauty; and which doing the works of beauty, is

therefore rightly called the beautiful. The meaning of sumpheron is explained by previous examples; — like episteme, signifying that the soul moves in harmony with the world (sumphora, sumpheronta). Kerdos is to pasi kerannumenon — that which mingles with all things: lusiteloun is equivalent to to tes phoras luon to telos, and is not to be taken in the vulgar sense of gainful, but rather in that of swift, being the principle which makes motion immortal and unceasing; ophelimon is apo tou ophellein — that which gives increase: this word, which is Homeric, is of foreign origin. Blaberon is to blanton or boulomenon aptein tou rou — that which injures or seeks to bind the stream. The proper word would be boulapteroun, but this is too much of a mouthful — like a prelude on the flute in honour of Athene. The word zemiodes is difficult; great changes, as I was saying, have been made in words, and even a small change will alter their meaning very much. The word deon is one of these disguised words. You know that according to the old pronunciation, which is especially affected by the women, who are great conservatives, iota and delta were used where we should now use eta and zeta: for example, what we now call emera was formerly called imera; and this shows the meaning of the word to have been ‘the desired one coming after night,’ and not, as is often supposed, ‘that which makes things gentle’ (emera). So again, zugon is duogon, quasi desis duein eis agogen — (the binding of two together for the purpose of drawing.) Deon, as ordinarily written, has an evil sense, signifying the chain (desmos) or hindrance of motion; but in its ancient form dion is expressive of good, quasi diion, that which penetrates or goes through all. Zemiodes is really demiodes, and means that which binds motion (dounti to ion): edone is e pros ten onrsin teinousa praxis — the delta is an insertion: lupe is derived apo tes dialuseos tou somatos: ania is from alpha and ienai, to go: algedon is a foreign word, and is so called apo tou algeinou: odune is apo tes enduseos tes lupes: achthedon is in its very sound a burden: chapa expresses the flow of soul: terpsis is apo tou terpnou, and terpnon is properly erpnnon, because the sensation of pleasure is likened to a breath (pnoe) which creeps (erpei) through the soul: euphrosune is named from pheresthai, because the soul moves in harmony with nature: epithumia is e epi ton thumon iousa dunamis:

thumos is apo tes thuseos tes psuches: imeros — oti eimenos pei e psuche: pothos, the desire which is in another place, allothi pou: eros was anciently esros, and so called because it flows into (esrei) the soul from without: doxa is e dioxis tou eidenai, or expresses the shooting from a bow (toxon). The latter etymology is confirmed by the words boulesthai, boule, aboulia, which all have to do with shooting (bole): and similarly oiesis is nothing but the movement (oisis) of the soul towards essence. Ekousion is to eikon — the yielding — anagke is e an agke iousa, the passage through ravines which impede motion: aletheia is theia ale, divine motion. Pseudos is the opposite of this, implying the principle of constraint and forced repose, which is expressed under the figure of sleep, to eudon; the psi is an addition. Onoma, a name, affirms the real existence of that which is sought after — on ou masma estin. On and ousia are only ion with an iota broken off; and ouk on is ouk ion. ‘And what are ion, reon, down?’ One way of explaining them has been already suggested — they may be of foreign origin; and possibly this is the true answer. But mere antiquity may often prevent our recognizing words, after all the complications which they have undergone; and we must remember that however far we carry back our analysis some ultimate elements or roots will remain which can be no further analyzed. For example; the word agathos was supposed by us to be a compound of agastos and thoos, and probably thoos may be further resolvable. But if we take a word of which no further resolution seems attainable, we may fairly conclude that we have reached one of these original elements, and the truth of such a word must be tested by some new method. Will you help me in the search?

All names, whether primary or secondary, are intended to show the nature of things; and the secondary, as I conceive, derive their significance from the primary. But then, how do the primary names indicate anything? And let me ask another question, — If we had no faculty of speech, how should we communicate with one another? Should we not use signs, like the deaf and dumb? The elevation of our hands would mean lightness — heaviness would be expressed by letting them drop. The running of any animal would be described by a similar movement of our own frames. The body can only express anything by imitation; and the tongue or mouth can imitate as well as

the rest of the body. But this imitation of the tongue or voice is not yet a name, because people may imitate sheep or goats without naming them. What, then, is a name? In the first place, a name is not a musical, or, secondly, a pictorial imitation, but an imitation of that kind which expresses the nature of a thing; and is the invention not of a musician, or of a painter, but of a namer.

And now, I think that we may consider the names about which you were asking. The way to analyze them will be by going back to the letters, or primary elements of which they are composed. First, we separate the alphabet into classes of letters, distinguishing the consonants, mutes, vowels, and semivowels; and when we have learnt them singly, we shall learn to know them in their various combinations of two or more letters; just as the painter knows how to use either a single colour, or a combination of colours. And like the painter, we may apply letters to the expression of objects, and form them into syllables; and these again into words, until the picture or figure — that is, language — is completed. Not that I am literally speaking of ourselves, but I mean to say that this was the way in which the ancients framed language. And this leads me to consider whether the primary as well as the secondary elements are rightly given. I may remark, as I was saying about the Gods, that we can only attain to conjecture of them. But still we insist that ours is the true and only method of discovery; otherwise we must have recourse, like the tragic poets, to a *Deus ex machina*, and say that God gave the first names, and therefore they are right; or that the barbarians are older than we are, and that we learnt of them; or that antiquity has cast a veil over the truth. Yet all these are not reasons; they are only ingenious excuses for having no reasons.

I will freely impart to you my own notions, though they are somewhat crude: — the letter rho appears to me to be the general instrument which the legislator has employed to express all motion or kinesis. (I ought to explain that kinesis is just *iesis* (going), for the letter eta was unknown to the ancients; and the root, *kiein*, is a foreign form of *ienai*: of kinesis or *eisis*, the opposite is *stasis*). This use of rho is evident in the words tremble, break, crush, crumble, and the like; the imposer of names perceived that the tongue is most agitated in the pronunciation of this letter, just as he used iota to

express the subtle power which penetrates through all things. The letters phi, psi, sigma, zeta, which require a great deal of wind, are employed in the imitation of such notions as shivering, seething, shaking, and in general of what is windy. The letters delta and tau convey the idea of binding and rest in a place: the lambda denotes smoothness, as in the words slip, sleek, sleep, and the like. But when the slipping tongue is detained by the heavier sound of gamma, then arises the notion of a glutinous clammy nature: nu is sounded from within, and has a notion of inwardness: alpha is the expression of size; eta of length; omicron of roundness, and therefore there is plenty of omicron in the word goggulon. That is my view, Hermogenes, of the correctness of names; and I should like to hear what Cratylus would say. 'But, Socrates, as I was telling you, Cratylus mystifies me; I should like to ask him, in your presence, what he means by the fitness of names?' To this appeal, Cratylus replies 'that he cannot explain so important a subject all in a moment.' 'No, but you may "add little to little," as Hesiod says.' Socrates here interposes his own request, that Cratylus will give some account of his theory. Hermogenes and himself are mere sciolists, but Cratylus has reflected on these matters, and has had teachers. Cratylus replies in the words of Achilles: "Illustrious Ajax, you have spoken in all things much to my mind," whether Euthyphro, or some Muse inhabiting your own breast, was the inspirer.' Socrates replies, that he is afraid of being self-deceived, and therefore he must 'look fore and aft,' as Homer remarks. Does not Cratylus agree with him that names teach us the nature of things? 'Yes.' And naming is an art, and the artists are legislators, and like artists in general, some of them are better and some of them are worse than others, and give better or worse laws, and make better or worse names. Cratylus cannot admit that one name is better than another; they are either true names, or they are not names at all; and when he is asked about the name of Hermogenes, who is acknowledged to have no luck in him, he affirms this to be the name of somebody else. Socrates supposes him to mean that falsehood is impossible, to which his own answer would be, that there has never been a lack of liars. Cratylus presses him with the old sophistical argument, that falsehood is saying that which is not, and therefore

saying nothing; — you cannot utter the word which is not. Socrates complains that this argument is too subtle for an old man to understand: Suppose a person addressing Cratylus were to say, Hail, Athenian Stranger, Hermogenes! would these words be true or false? ‘I should say that they would be mere unmeaning sounds, like the hammering of a brass pot.’ But you would acknowledge that names, as well as pictures, are imitations, and also that pictures may give a right or wrong representation of a man or woman: — why may not names then equally give a representation true and right or false and wrong? Cratylus admits that pictures may give a true or false representation, but denies that names can. Socrates argues, that he may go up to a man and say ‘this is your picture,’ and again, he may go and say to him ‘this is your name’ — in the one case appealing to his sense of sight, and in the other to his sense of hearing; — may he not? ‘Yes.’ Then you will admit that there is a right or a wrong assignment of names, and if of names, then of verbs and nouns; and if of verbs and nouns, then of the sentences which are made up of them; and comparing nouns to pictures, you may give them all the appropriate sounds, or only some of them. And as he who gives all the colours makes a good picture, and he who gives only some of them, a bad or imperfect one, but still a picture; so he who gives all the sounds makes a good name, and he who gives only some of them, a bad or imperfect one, but a name still. The artist of names, that is, the legislator, may be a good or he may be a bad artist. ‘Yes, Socrates, but the cases are not parallel; for if you subtract or misplace a letter, the name ceases to be a name.’ Socrates admits that the number 10, if an unit is subtracted, would cease to be 10, but denies that names are of this purely quantitative nature. Suppose that there are two objects — Cratylus and the image of Cratylus; and let us imagine that some God makes them perfectly alike, both in their outward form and in their inner nature and qualities: then there will be two Cratyluses, and not merely Cratylus and the image of Cratylus. But an image in fact always falls short in some degree of the original, and if images are not exact counterparts, why should names be? if they were, they would be the doubles of their originals, and indistinguishable from them; and how ridiculous would this be! Cratylus admits the truth of Socrates’ remark. But then Socrates

rejoins, he should have the courage to acknowledge that letters may be wrongly inserted in a noun, or a noun in a sentence; and yet the noun or the sentence may retain a meaning. Better to admit this, that we may not be punished like the traveller in Egina who goes about at night, and that Truth herself may not say to us, 'Too late.' And, errors excepted, we may still affirm that a name to be correct must have proper letters, which bear a resemblance to the thing signified. I must remind you of what Hermogenes and I were saying about the letter rho accent, which was held to be expressive of motion and hardness, as lambda is of smoothness; — and this you will admit to be their natural meaning. But then, why do the Eritreans call that skleroter which we call sklerotes? We can understand one another, although the letter rho accent is not equivalent to the letter s: why is this? You reply, because the two letters are sufficiently alike for the purpose of expressing motion. Well, then, there is the letter lambda; what business has this in a word meaning hardness? 'Why, Socrates, I retort upon you, that we put in and pull out letters at pleasure.' And the explanation of this is custom or agreement: we have made a convention that the rho shall mean s and a convention may indicate by the unlike as well as by the like. How could there be names for all the numbers unless you allow that convention is used? Imitation is a poor thing, and has to be supplemented by convention, which is another poor thing; although I agree with you in thinking that the most perfect form of language is found only where there is a perfect correspondence of sound and meaning. But let me ask you what is the use and force of names? 'The use of names, Socrates, is to inform, and he who knows names knows things.' Do you mean that the discovery of names is the same as the discovery of things? 'Yes.' But do you not see that there is a degree of deception about names? He who first gave names, gave them according to his conception, and that may have been erroneous. 'But then, why, Socrates, is language so consistent? all words have the same laws.' Mere consistency is no test of truth. In geometrical problems, for example, there may be a flaw at the beginning, and yet the conclusion may follow consistently. And, therefore, a wise man will take especial care of first principles. But are words really consistent; are there not as many terms of praise which signify rest as which signify motion? There is

episteme, which is connected with stasis, as mneme is with meno. Bebaion, again, is the expression of station and position; istoria is clearly descriptive of the stopping istanai of the stream; piston indicates the cessation of motion; and there are many words having a bad sense, which are connected with ideas of motion, such as sumphora, amartia, etc.: amathia, again, might be explained, as e ama theo iontos poreia, and akolasia as e akolouthia tois pragmasin. Thus the bad names are framed on the same principle as the good, and other examples might be given, which would favour a theory of rest rather than of motion. 'Yes; but the greater number of words express motion.' Are we to count them, Cratylus; and is correctness of names to be determined by the voice of a majority?

Here is another point: we were saying that the legislator gives names; and therefore we must suppose that he knows the things which he names: but how can he have learnt things from names before there were any names? 'I believe, Socrates, that some power more than human first gave things their names, and that these were necessarily true names.' Then how came the giver of names to contradict himself, and to make some names expressive of rest, and others of motion? 'I do not suppose that he did make them both.' Then which did he make — those which are expressive of rest, or those which are expressive of motion?...But if some names are true and others false, we can only decide between them, not by counting words, but by appealing to things. And, if so, we must allow that things may be known without names; for names, as we have several times admitted, are the images of things; and the higher knowledge is of things, and is not to be derived from names; and though I do not doubt that the inventors of language gave names, under the idea that all things are in a state of motion and flux, I believe that they were mistaken; and that having fallen into a whirlpool themselves, they are trying to drag us after them. For is there not a true beauty and a true good, which is always beautiful and always good? Can the thing beauty be vanishing away from us while the words are yet in our mouths? And they could not be known by any one if they are always passing away — for if they are always passing away, the observer has no opportunity of observing their state. Whether the doctrine of the flux or of the eternal nature be the truer, is hard to determine. But

no man of sense will put himself, or the education of his mind, in the power of names: he will not condemn himself to be an unreal thing, nor will he believe that everything is in a flux like the water in a leaky vessel, or that the world is a man who has a running at the nose. This doctrine may be true, Cratylus, but is also very likely to be untrue; and therefore I would have you reflect while you are young, and find out the truth, and when you know come and tell me. 'I have thought, Socrates, and after a good deal of thinking I incline to Heracleitus.' Then another day, my friend, you shall give me a lesson. 'Very good, Socrates, and I hope that you will continue to study these things yourself.'

We may now consider (I) how far Plato in the *Cratylus* has discovered the true principles of language, and then (II) proceed to compare modern speculations respecting the origin and nature of language with the anticipations of his genius.

I. (1) Plato is aware that language is not the work of chance; nor does he deny that there is a natural fitness in names. He only insists that this natural fitness shall be intelligibly explained. But he has no idea that language is a natural organism. He would have heard with surprise that languages are the common work of whole nations in a primitive or semi-barbarous age. How, he would probably have argued, could men devoid of art have contrived a structure of such complexity? No answer could have been given to this question, either in ancient or in modern times, until the nature of primitive antiquity had been thoroughly studied, and the instincts of man had been shown to exist in greater force, when his state approaches more nearly to that of children or animals. The philosophers of the last century, after their manner, would have vainly endeavoured to trace the process by which proper names were converted into common, and would have shown how the last effort of abstraction invented prepositions and auxiliaries. The theologian would have proved that language must have had a divine origin, because in childhood, while the organs are pliable, the intelligence is wanting, and when the

intelligence is able to frame conceptions, the organs are no longer able to express them. Or, as others have said: Man is man because he has the gift of speech; and he could not have invented that which he is. But this would have been an 'argument too subtle' for Socrates, who rejects the theological account of the origin of language 'as an excuse for not giving a reason,' which he compares to the introduction of the 'Deus ex machina' by the tragic poets when they have to solve a difficulty; thus anticipating many modern controversies in which the primary agency of the divine Being is confused with the secondary cause; and God is assumed to have worked a miracle in order to fill up a lacuna in human knowledge. (Compare Timaeus.)

Neither is Plato wrong in supposing that an element of design and art enters into language. The creative power abating is supplemented by a mechanical process. 'Languages are not made but grow,' but they are made as well as grow; bursting into life like a plant or a flower, they are also capable of being trained and improved and engrafted upon one another. The change in them is effected in earlier ages by musical and euphonic improvements, at a later stage by the influence of grammar and logic, and by the poetical and literary use of words. They develop rapidly in childhood, and when they are full grown and set they may still put forth intellectual powers, like the mind in the body, or rather we may say that the nobler use of language only begins when the frame-work is complete. The savage or primitive man, in whom the natural instinct is strongest, is also the greatest improver of the forms of language. He is the poet or maker of words, as in civilised ages the dialectician is the definer or distinguisher of them. The latter calls the second world of abstract terms into existence, as the former has created the picture sounds which represent natural objects or processes. Poetry and philosophy — these two, are the two great formative principles of language, when they have passed their first stage, of which, as of the first invention of the arts in general, we only entertain conjecture. And mythology is a link between them, connecting the visible and invisible, until at length the sensuous exterior falls away, and the severance of the inner and outer world, of the idea and the object of sense, becomes complete. At a later period, logic and grammar, sister

arts, preserve and enlarge the decaying instinct of language, by rule and method, which they gather from analysis and observation.

(2) There is no trace in any of Plato's writings that he was acquainted with any language but Greek. Yet he has conceived very truly the relation of Greek to foreign languages, which he is led to consider, because he finds that many Greek words are incapable of explanation. Allowing a good deal for accident, and also for the fancies of the *conditores linguae Graecae*, there is an element of which he is unable to give an account. These unintelligible words he supposes to be of foreign origin, and to have been derived from a time when the Greeks were either barbarians, or in close relations to the barbarians. Socrates is aware that this principle is liable to great abuse; and, like the 'Deus ex machina,' explains nothing. Hence he excuses himself for the employment of such a device, and remarks that in foreign words there is still a principle of correctness, which applies equally both to Greeks and barbarians.

(3) But the greater number of primary words do not admit of derivation from foreign languages; they must be resolved into the letters out of which they are composed, and therefore the letters must have a meaning. The framers of language were aware of this; they observed that alpha was adapted to express size; eta length; omicron roundness; nu inwardness; rho accent rush or roar; lambda liquidity; gamma lambda the detention of the liquid or slippery element; delta and tau binding; phi, psi, sigma, xi, wind and cold, and so on. Plato's analysis of the letters of the alphabet shows a wonderful insight into the nature of language. He does not expressively distinguish between mere imitation and the symbolical use of sound to express thought, but he recognises in the examples which he gives both modes of imitation. Gesture is the mode which a deaf and dumb person would take of indicating his meaning. And language is the gesture of the tongue; in the use of the letter rho accent, to express a rushing or roaring, or of omicron to express roundness, there is a direct imitation; while in the use of the letter alpha to express size, or of eta to express length, the imitation is symbolical. The use of analogous or similar sounds, in order to express similar analogous ideas, seems to have escaped him.

In passing from the gesture of the body to the movement of the

tongue, Plato makes a great step in the physiology of language. He was probably the first who said that 'language is imitative sound,' which is the greatest and deepest truth of philology; although he is not aware of the laws of euphony and association by which imitation must be regulated. He was probably also the first who made a distinction between simple and compound words, a truth second only in importance to that which has just been mentioned. His great insight in one direction curiously contrasts with his blindness in another; for he appears to be wholly unaware (compare his derivation of *agathos* from *agastos* and *thoos*) of the difference between the root and termination. But we must recollect that he was necessarily more ignorant than any schoolboy of Greek grammar, and had no table of the inflexions of verbs and nouns before his eyes, which might have suggested to him the distinction.

(4) Plato distinctly affirms that language is not truth, or '*philosophie une langue bien faite*.' At first, Socrates has delighted himself with discovering the flux of Heracleitus in language. But he is covertly satirising the pretence of that or any other age to find philosophy in words; and he afterwards corrects any erroneous inference which might be gathered from his experiment. For he finds as many, or almost as many, words expressive of rest, as he had previously found expressive of motion. And even if this had been otherwise, who would learn of words when he might learn of things? There is a great controversy and high argument between Heracleiteans and Eleatics, but no man of sense would commit his soul in such enquiries to the imposers of names...In this and other passages Plato shows that he is as completely emancipated from the influence of 'Idols of the tribe' as Bacon himself.

The lesson which may be gathered from words is not metaphysical or moral, but historical. They teach us the affinity of races, they tell us something about the association of ideas, they occasionally preserve the memory of a disused custom; but we cannot safely argue from them about right and wrong, matter and mind, freedom and necessity, or the other problems of moral and metaphysical philosophy. For the use of words on such subjects may often be metaphorical, accidental, derived from other languages, and may have no relation to the contemporary state of thought and

feeling. Nor in any case is the invention of them the result of philosophical reflection; they have been commonly transferred from matter to mind, and their meaning is the very reverse of their etymology. Because there is or is not a name for a thing, we cannot argue that the thing has or has not an actual existence; or that the antitheses, parallels, conjugates, correlatives of language have anything corresponding to them in nature. There are too many words as well as too few; and they generalize the objects or ideas which they represent. The greatest lesson which the philosophical analysis of language teaches us is, that we should be above language, making words our servants, and not allowing them to be our masters.

Plato does not add the further observation, that the etymological meaning of words is in process of being lost. If at first framed on a principle of intelligibility, they would gradually cease to be intelligible, like those of a foreign language, he is willing to admit that they are subject to many changes, and put on many disguises. He acknowledges that the 'poor creature' imitation is supplemented by another 'poor creature,' — convention. But he does not see that 'habit and repute,' and their relation to other words, are always exercising an influence over them. Words appear to be isolated, but they are really the parts of an organism which is always being reproduced. They are refined by civilization, harmonized by poetry, emphasized by literature, technically applied in philosophy and art; they are used as symbols on the border-ground of human knowledge; they receive a fresh impress from individual genius, and come with a new force and association to every lively-minded person. They are fixed by the simultaneous utterance of millions, and yet are always imperceptibly changing; — not the inventors of language, but writing and speaking, and particularly great writers, or works which pass into the hearts of nations, Homer, Shakespear, Dante, the German or English Bible, Kant and Hegel, are the makers of them in later ages. They carry with them the faded recollection of their own past history; the use of a word in a striking and familiar passage gives a complexion to its use everywhere else, and the new use of an old and familiar phrase has also a peculiar power over us. But these and other subtleties of language escaped the observation of Plato. He is not aware that the languages of the world are organic structures, and that

every word in them is related to every other; nor does he conceive of language as the joint work of the speaker and the hearer, requiring in man a faculty not only of expressing his thoughts but of understanding those of others.

On the other hand, he cannot be justly charged with a desire to frame language on artificial principles. Philosophers have sometimes dreamed of a technical or scientific language, in words which should have fixed meanings, and stand in the same relation to one another as the substances which they denote. But there is no more trace of this in Plato than there is of a language corresponding to the ideas; nor, indeed, could the want of such a language be felt until the sciences were far more developed. Those who would extend the use of technical phraseology beyond the limits of science or of custom, seem to forget that freedom and suggestiveness and the play of association are essential characteristics of language. The great master has shown how he regarded pedantic distinctions of words or attempts to confine their meaning in the satire on Prodicus in the *Protagoras*.

(5) In addition to these anticipations of the general principles of philology, we may note also a few curious observations on words and sounds. 'The Eretrians say *sklerotes* for *skleroter*;' 'the Thessalians call *Apollo Amlos*;' 'The Phrygians have the words *pur*, *udor*, *kunes* slightly changed;' 'there is an old Homeric word *emesato*, meaning "he contrived";' 'our forefathers, and especially the women, who are most conservative of the ancient language, loved the letters *iota* and *delta*; but now *iota* is changed into *eta* and *epsilon*, and *delta* into *zeta*; this is supposed to increase the grandeur of the sound.' Plato was very willing to use inductive arguments, so far as they were within his reach; but he would also have assigned a large influence to chance. Nor indeed is induction applicable to philology in the same degree as to most of the physical sciences. For after we have pushed our researches to the furthest point, in language as in all the other creations of the human mind, there will always remain an element of exception or accident or free-will, which cannot be eliminated.

The question, 'whether falsehood is impossible,' which Socrates characteristically sets aside as too subtle for an old man (compare *Euthyd.*), could only have arisen in an age of imperfect

consciousness, which had not yet learned to distinguish words from things. Socrates replies in effect that words have an independent existence; thus anticipating the solution of the mediaeval controversy of Nominalism and Realism. He is aware too that languages exist in various degrees of perfection, and that the analysis of them can only be carried to a certain point. 'If we could always, or almost always, use likenesses, which are the appropriate expressions, that would be the most perfect state of language.' These words suggest a question of deeper interest than the origin of language; viz. what is the ideal of language, how far by any correction of their usages existing languages might become clearer and more expressive than they are, more poetical, and also more logical; or whether they are now finally fixed and have received their last impress from time and authority.

On the whole, the *Cratylus* seems to contain deeper truths about language than any other ancient writing. But feeling the uncertain ground upon which he is walking, and partly in order to preserve the character of Socrates, Plato envelopes the whole subject in a robe of fancy, and allows his principles to drop out as if by accident.

II. What is the result of recent speculations about the origin and nature of language? Like other modern metaphysical enquiries, they end at last in a statement of facts. But, in order to state or understand the facts, a metaphysical insight seems to be required. There are more things in language than the human mind easily conceives. And many fallacies have to be dispelled, as well as observations made. The true spirit of philosophy or metaphysics can alone charm away metaphysical illusions, which are always reappearing, formerly in the fancies of neoplatonist writers, now in the disguise of experience and common sense. An analogy, a figure of speech, an intelligible theory, a superficial observation of the individual, have often been mistaken for a true account of the origin of language.

Speaking is one of the simplest natural operations, and also the most complex. Nothing would seem to be easier or more trivial than a few words uttered by a child in any language. Yet into the formation of those words have entered causes which the human mind is not capable of calculating. They are a drop or two of the great stream or ocean of speech which has been flowing in all ages. They have been transmitted from one language to another; like the child

himself, they go back to the beginnings of the human race. How they originated, who can tell? Nevertheless we can imagine a stage of human society in which the circle of men's minds was narrower and their sympathies and instincts stronger; in which their organs of speech were more flexible, and the sense of hearing finer and more discerning; in which they lived more in company, and after the manner of children were more given to express their feelings; in which 'they moved all together,' like a herd of wild animals, 'when they moved at all.' Among them, as in every society, a particular person would be more sensitive and intelligent than the rest. Suddenly, on some occasion of interest (at the approach of a wild beast, shall we say?), he first, they following him, utter a cry which resounds through the forest. The cry is almost or quite involuntary, and may be an imitation of the roar of the animal. Thus far we have not speech, but only the inarticulate expression of feeling or emotion in no respect differing from the cries of animals; for they too call to one another and are answered. But now suppose that some one at a distance not only hears the sound, but apprehends the meaning: or we may imagine that the cry is repeated to a member of the society who had been absent; the others act the scene over again when he returns home in the evening. And so the cry becomes a word. The hearer in turn gives back the word to the speaker, who is now aware that he has acquired a new power. Many thousand times he exercises this power; like a child learning to talk, he repeats the same cry again, and again he is answered; he tries experiments with a like result, and the speaker and the hearer rejoice together in their newly-discovered faculty. At first there would be few such cries, and little danger of mistaking or confusing them. For the mind of primitive man had a narrow range of perceptions and feelings; his senses were microscopic; twenty or thirty sounds or gestures would be enough for him, nor would he have any difficulty in finding them. Naturally he broke out into speech — like the young infant he laughed and babbled; but not until there were hearers as well as speakers did language begin. Not the interjection or the vocal imitation of the object, but the interjection or the vocal imitation of the object understood, is the first rudiment of human speech.

After a while the word gathers associations, and has an

independent existence. The imitation of the lion's roar calls up the fears and hopes of the chase, which are excited by his appearance. In the moment of hearing the sound, without any appreciable interval, these and other latent experiences wake up in the mind of the hearer. Not only does he receive an impression, but he brings previous knowledge to bear upon that impression. Necessarily the pictorial image becomes less vivid, while the association of the nature and habits of the animal is more distinctly perceived. The picture passes into a symbol, for there would be too many of them and they would crowd the mind; the vocal imitation, too, is always in process of being lost and being renewed, just as the picture is brought back again in the description of the poet. Words now can be used more freely because there are more of them. What was once an involuntary expression becomes voluntary. Not only can men utter a cry or call, but they can communicate and converse; they can not only use words, but they can even play with them. The word is separated both from the object and from the mind; and slowly nations and individuals attain to a fuller consciousness of themselves.

Parallel with this mental process the articulation of sounds is gradually becoming perfected. The finer sense detects the differences of them, and begins, first to agglomerate, then to distinguish them. Times, persons, places, relations of all kinds, are expressed by modifications of them. The earliest parts of speech, as we may call them by anticipation, like the first utterances of children, probably partook of the nature of interjections and nouns; then came verbs; at length the whole sentence appeared, and rhythm and metre followed. Each stage in the progress of language was accompanied by some corresponding stage in the mind and civilisation of man. In time, when the family became a nation, the wild growth of dialects passed into a language. Then arose poetry and literature. We can hardly realize to ourselves how much with each improvement of language the powers of the human mind were enlarged; how the inner world took the place of outer; how the pictorial or symbolical or analogical word was refined into a notion; how language, fair and large and free, was at last complete.

So we may imagine the speech of man to have begun as with the cries of animals, or the stammering lips of children, and to have

attained by degrees the perfection of Homer and Plato. Yet we are far from saying that this or any other theory of language is proved by facts. It is not difficult to form an hypothesis which by a series of imaginary transitions will bridge over the chasm which separates man from the animals. Differences of kind may often be thus resolved into differences of degree. But we must not assume that we have in this way discovered the true account of them. Through what struggles the harmonious use of the organs of speech was acquired; to what extent the conditions of human life were different; how far the genius of individuals may have contributed to the discovery of this as of the other arts, we cannot say: Only we seem to see that language is as much the creation of the ear as of the tongue, and the expression of a movement stirring the hearts not of one man only but of many, 'as the trees of the wood are stirred by the wind.' The theory is consistent or not inconsistent with our own mental experience, and throws some degree of light upon a dark corner of the human mind.

In the later analysis of language, we trace the opposite and contrasted elements of the individual and nation, of the past and present, of the inward and outward, of the subject and object, of the notional and relational, of the root or unchanging part of the word and of the changing inflexion, if such a distinction be admitted, of the vowel and the consonant, of quantity and accent, of speech and writing, of poetry and prose. We observe also the reciprocal influence of sounds and conceptions on each other, like the connexion of body and mind; and further remark that although the names of objects were originally proper names, as the grammarian or logician might call them, yet at a later stage they become universal notions, which combine into particulars and individuals, and are taken out of the first rude agglomeration of sounds that they may be replaced in a higher and more logical order. We see that in the simplest sentences are contained grammar and logic — the parts of speech, the Eleatic philosophy and the Kantian categories. So complex is language, and so expressive not only of the meanest wants of man, but of his highest thoughts; so various are the aspects in which it is regarded by us. Then again, when we follow the history of languages, we observe that they are always slowly moving, half dead, half alive, half solid, half fluid; the breath of a moment, yet like the air, continuous in all ages and countries, — like the glacier, too, containing within them a trickling stream which deposits debris of the rocks over which it passes. There were happy moments, as we may conjecture, in the lives of nations, at which they came to the birth — as in the golden age of literature, the man and the time seem to conspire; the eloquence of the bard or chief, as in later times the creations of the great writer who is the expression of his age, became impressed on the minds of their countrymen, perhaps in the hour of some crisis of national development — a migration, a conquest, or the like. The picture of the word which was beginning to be lost, is now revived; the sound again echoes to the sense; men find themselves capable not only of expressing more feelings, and describing more objects, but of expressing and describing them better. The world before the flood, that is to say, the world of ten, twenty, a hundred thousand years ago, has passed away and left no sign. But the best conception that we can

form of it, though imperfect and uncertain, is gained from the analogy of causes still in action, some powerful and sudden, others working slowly in the course of infinite ages. Something too may be allowed to 'the persistency of the strongest,' to 'the survival of the fittest,' in this as in the other realms of nature.

These are some of the reflections which the modern philosophy of language suggests to us about the powers of the human mind and the forces and influences by which the efforts of men to utter articulate sounds were inspired. Yet in making these and similar generalizations we may note also dangers to which we are exposed. (1) There is the confusion of ideas with facts — of mere possibilities, and generalities, and modes of conception with actual and definite knowledge. The words 'evolution,' 'birth,' 'law,' 'development,' 'instinct,' 'implicit,' 'explicit,' and the like, have a false clearness or comprehensiveness, which adds nothing to our knowledge. The metaphor of a flower or a tree, or some other work of nature or art, is often in like manner only a pleasing picture. (2) There is the fallacy of resolving the languages which we know into their parts, and then imagining that we can discover the nature of language by reconstructing them. (3) There is the danger of identifying language, not with thoughts but with ideas. (4) There is the error of supposing that the analysis of grammar and logic has always existed, or that their distinctions were familiar to Socrates and Plato. (5) There is the fallacy of exaggerating, and also of diminishing the interval which separates articulate from inarticulate language — the cries of animals from the speech of man — the instincts of animals from the reason of man. (6) There is the danger which besets all enquiries into the early history of man — of interpreting the past by the present, and of substituting the definite and intelligible for the true but dim outline which is the horizon of human knowledge.

The greatest light is thrown upon the nature of language by analogy. We have the analogy of the cries of animals, of the songs of birds ('man, like the nightingale, is a singing bird, but is ever binding up thoughts with musical notes'), of music, of children learning to speak, of barbarous nations in which the linguistic instinct is still undecayed, of ourselves learning to think and speak a new language, of the deaf and dumb who have words without sounds, of the various

disorders of speech; and we have the after-growth of mythology, which, like language, is an unconscious creation of the human mind. We can observe the social and collective instincts of animals, and may remark how, when domesticated, they have the power of understanding but not of speaking, while on the other hand, some birds which are comparatively devoid of intelligence, make a nearer approach to articulate speech. We may note how in the animals there is a want of that sympathy with one another which appears to be the soul of language. We can compare the use of speech with other mental and bodily operations; for speech too is a kind of gesture, and in the child or savage accompanied with gesture. We may observe that the child learns to speak, as he learns to walk or to eat, by a natural impulse; yet in either case not without a power of imitation which is also natural to him — he is taught to read, but he breaks forth spontaneously in speech. We can trace the impulse to bind together the world in ideas beginning in the first efforts to speak and culminating in philosophy. But there remains an element which cannot be explained, or even adequately described. We can understand how man creates or constructs consciously and by design; and see, if we do not understand, how nature, by a law, calls into being an organised structure. But the intermediate organism which stands between man and nature, which is the work of mind yet unconscious, and in which mind and matter seem to meet, and mind unperceived to herself is really limited by all other minds, is neither understood nor seen by us, and is with reluctance admitted to be a fact.

Language is an aspect of man, of nature, and of nations, the transfiguration of the world in thought, the meeting-point of the physical and mental sciences, and also the mirror in which they are reflected, present at every moment to the individual, and yet having a sort of eternal or universal nature. When we analyze our own mental processes, we find words everywhere in every degree of clearness and consistency, fading away in dreams and more like pictures, rapidly succeeding one another in our waking thoughts, attaining a greater distinctness and consecutiveness in speech, and a greater still in writing, taking the place of one another when we try to become emancipated from their influence. For in all processes of the mind

which are conscious we are talking to ourselves; the attempt to think without words is a mere illusion, — they are always reappearing when we fix our thoughts. And speech is not a separate faculty, but the expression of all our faculties, to which all our other powers of expression, signs, looks, gestures, lend their aid, of which the instrument is not the tongue only, but more than half the human frame.

The minds of men are sometimes carried on to think of their lives and of their actions as links in a chain of causes and effects going back to the beginning of time. A few have seemed to lose the sense of their own individuality in the universal cause or nature. In like manner we might think of the words which we daily use, as derived from the first speech of man, and of all the languages in the world, as the expressions or varieties of a single force or life of language of which the thoughts of men are the accident. Such a conception enables us to grasp the power and wonder of languages, and is very natural to the scientific philologist. For he, like the metaphysician, believes in the reality of that which absorbs his own mind. Nor do we deny the enormous influence which language has exercised over thought. Fixed words, like fixed ideas, have often governed the world. But in such representations we attribute to language too much the nature of a cause, and too little of an effect, — too much of an absolute, too little of a relative character, — too much of an ideal, too little of a matter-of-fact existence.

Or again, we may frame a single abstract notion of language of which all existent languages may be supposed to be the perversion. But we must not conceive that this logical figment had ever a real existence, or is anything more than an effort of the mind to give unity to infinitely various phenomena. There is no abstract language ‘*in rerum natura*,’ any more than there is an abstract tree, but only languages in various stages of growth, maturity, and decay. Nor do other logical distinctions or even grammatical exactly correspond to the facts of language; for they too are attempts to give unity and regularity to a subject which is partly irregular.

We find, however, that there are distinctions of another kind by which this vast field of language admits of being mapped out. There is the distinction between biliteral and triliteral roots, and the various

inflexions which accompany them; between the mere mechanical cohesion of sounds or words, and the 'chemical' combination of them into a new word; there is the distinction between languages which have had a free and full development of their organisms, and languages which have been stunted in their growth, — lamed in their hands or feet, and never able to acquire afterwards the powers in which they are deficient; there is the distinction between synthetical languages like Greek and Latin, which have retained their inflexions, and analytical languages like English or French, which have lost them. Innumerable as are the languages and dialects of mankind, there are comparatively few classes to which they can be referred.

Another road through this chaos is provided by the physiology of speech. The organs of language are the same in all mankind, and are only capable of uttering a certain number of sounds. Every man has tongue, teeth, lips, palate, throat, mouth, which he may close or open, and adapt in various ways; making, first, vowels and consonants; and secondly, other classes of letters. The elements of all speech, like the elements of the musical scale, are few and simple, though admitting of infinite gradations and combinations. Whatever slight differences exist in the use or formation of these organs, owing to climate or the sense of euphony or other causes, they are as nothing compared with their agreement. Here then is a real basis of unity in the study of philology, unlike that imaginary abstract unity of which we were just now speaking.

Whether we regard language from the psychological, or historical, or physiological point of view, the materials of our knowledge are inexhaustible. The comparisons of children learning to speak, of barbarous nations, of musical notes, of the cries of animals, of the song of birds, increase our insight into the nature of human speech. Many observations which would otherwise have escaped us are suggested by them. But they do not explain why, in man and in man only, the speaker met with a response from the hearer, and the half articulate sound gradually developed into Sanscrit and Greek. They hardly enable us to approach any nearer the secret of the origin of language, which, like some of the other great secrets of nature, — the origin of birth and death, or of animal life, — remains inviolable. That problem is indissolubly bound up with the origin of man; and if

we ever know more of the one, we may expect to know more of the other. (Compare W. Humboldt, 'Ueber die Verschiedenheit des menschlichen Sprachbaues;' M. Muller, 'Lectures on the Science of Language;' Steintal, 'Einleitung in die Psychologie und Sprachwissenschaft.')

It is more than sixteen years since the preceding remarks were written, which with a few alterations have now been reprinted. During the interval the progress of philology has been very great. More languages have been compared; the inner structure of language has been laid bare; the relations of sounds have been more accurately discriminated; the manner in which dialects affect or are affected by the literary or principal form of a language is better understood. Many merely verbal questions have been eliminated; the remains of the old traditional methods have died away. The study has passed from the metaphysical into an historical stage. Grammar is no longer confused with language, nor the anatomy of words and sentences with their life and use. Figures of speech, by which the vagueness of theories is often concealed, have been stripped off; and we see language more as it truly was. The immensity of the subject is gradually revealed to us, and the reign of law becomes apparent. Yet the law is but partially seen; the traces of it are often lost in the distance. For languages have a natural but not a perfect growth; like other creations of nature into which the will of man enters, they are full of what we term accident and irregularity. And the difficulties of the subject become not less, but greater, as we proceed — it is one of those studies in which we seem to know less as we know more; partly because we are no longer satisfied with the vague and superficial ideas of it which prevailed fifty years ago; partly also because the remains of the languages with which we are acquainted always were, and if they are still living, are, in a state of transition; and thirdly, because there are lacunae in our knowledge of them which can never be filled up. Not a tenth, not a hundredth part of them has been preserved. Yet the materials at our disposal are far

greater than any individual can use. Such are a few of the general reflections which the present state of philology calls up.

(1) Language seems to be composite, but into its first elements the philologist has never been able to penetrate. However far he goes back, he never arrives at the beginning; or rather, as in Geology or in Astronomy, there is no beginning. He is too apt to suppose that by breaking up the existing forms of language into their parts he will arrive at a previous stage of it, but he is merely analyzing what never existed, or is never known to have existed, except in a composite form. He may divide nouns and verbs into roots and inflexions, but he has no evidence which will show that the omega of *tupto* or the mu of *tithemi*, though analogous to *ego*, *me*, either became pronouns or were generated out of pronouns. To say that ‘pronouns, like ripe fruit, dropped out of verbs,’ is a misleading figure of speech. Although all languages have some common principles, there is no primitive form or forms of language known to us, or to be reasonably imagined, from which they are all descended. No inference can be drawn from language, either for or against the unity of the human race. Nor is there any proof that words were ever used without any relation to each other. Whatever may be the meaning of a sentence or a word when applied to primitive language, it is probable that the sentence is more akin to the original form than the word, and that the later stage of language is the result rather of analysis than of synthesis, or possibly is a combination of the two. Nor, again, are we sure that the original process of learning to speak was the same in different places or among different races of men. It may have been slower with some, quicker with others. Some tribes may have used shorter, others longer words or cries: they may have been more or less inclined to agglutinate or to decompose them: they may have modified them by the use of prefixes, suffixes, infixes; by the lengthening and strengthening of vowels or by the shortening and weakening of them, by the condensation or rarefaction of consonants. But who gave to language these primeval laws; or why one race has triliteral, another biliteral roots; or why in some members of a group of languages *b* becomes *p*, or *d*, *t*, or *ch*, *k*; or why two languages resemble one another in certain parts of their structure and differ in others; or why in one language there is a greater development of

vowels, in another of consonants, and the like — are questions of which we only ‘entertain conjecture.’ We must remember the length of time that has elapsed since man first walked upon the earth, and that in this vast but unknown period every variety of language may have been in process of formation and decay, many times over.

(Compare Plato, *Laws*): —

‘ATHENIAN STRANGER: And what then is to be regarded as the origin of government? Will not a man be able to judge best from a point of view in which he may behold the progress of states and their transitions to good and evil?

CLEINIAS: What do you mean?

ATHENIAN STRANGER: I mean that he might watch them from the point of view of time, and observe the changes which take place in them during infinite ages.

CLEINIAS: How so?

ATHENIAN STRANGER: Why, do you think that you can reckon the time which has elapsed since cities first existed and men were citizens of them?

CLEINIAS: Hardly.

ATHENIAN STRANGER: But you are quite sure that it must be vast and incalculable?

CLEINIAS: No doubt.

ATHENIAN STRANGER: And have there not been thousands and thousands of cities which have come into being and perished during this period? And has not every place had endless forms of government, and been sometimes rising, and at other times falling, and again improving or waning?’

Aristot. *Metaph.*: —

‘And if a person should conceive the tales of mythology to mean only that men thought the gods to be the first essences of things, he would deem the reflection to have been inspired and would consider that, whereas probably every art and part of wisdom had been **DISCOVERED AND LOST MANY TIMES OVER**, such notions were but a remnant of the past which has survived to our day.’)

It can hardly be supposed that any traces of an original language still survive, any more than of the first huts or buildings which were constructed by man. Nor are we at all certain of the relation, if any, in

which the greater families of languages stand to each other. The influence of individuals must always have been a disturbing element. Like great writers in later times, there may have been many a barbaric genius who taught the men of his tribe to sing or speak, showing them by example how to continue or divide their words, charming their souls with rhythm and accent and intonation, finding in familiar objects the expression of their confused fancies — to whom the whole of language might in truth be said to be a figure of speech. One person may have introduced a new custom into the formation or pronunciation of a word; he may have been imitated by others, and the custom, or form, or accent, or quantity, or rhyme which he introduced in a single word may have become the type on which many other words or inflexions of words were framed, and may have quickly ran through a whole language. For like the other gifts which nature has bestowed upon man, that of speech has been conveyed to him through the medium, not of the many, but of the few, who were his ‘law-givers’ — ‘the legislator with the dialectician standing on his right hand,’ in Plato’s striking image, who formed the manners of men and gave them customs, whose voice and look and behaviour, whose gesticulations and other peculiarities were instinctively imitated by them, — the ‘king of men’ who was their priest, almost their God...But these are conjectures only: so little do we know of the origin of language that the real scholar is indisposed to touch the subject at all.

(2) There are other errors besides the figment of a primitive or original language which it is time to leave behind us. We no longer divide languages into synthetical and analytical, or suppose similarity of structure to be the safe or only guide to the affinities of them. We do not confuse the parts of speech with the categories of Logic. Nor do we conceive languages any more than civilisations to be in a state of dissolution; they do not easily pass away, but are far more tenacious of life than the tribes by whom they are spoken. ‘Where two or three are gathered together,’ they survive. As in the human frame, as in the state, there is a principle of renovation as well as of decay which is at work in all of them. Neither do we suppose them to be invented by the wit of man. With few exceptions, e.g. technical words or words newly imported from a foreign language, and the

like, in which art has imitated nature, 'words are not made but grow.' Nor do we attribute to them a supernatural origin. The law which regulates them is like the law which governs the circulation of the blood, or the rising of the sap in trees; the action of it is uniform, but the result, which appears in the superficial forms of men and animals or in the leaves of trees, is an endless profusion and variety. The laws of vegetation are invariable, but no two plants, no two leaves of the forest are precisely the same. The laws of language are invariable, but no two languages are alike, no two words have exactly the same meaning. No two sounds are exactly of the same quality, or give precisely the same impression.

It would be well if there were a similar consensus about some other points which appear to be still in dispute. Is language conscious or unconscious? In speaking or writing have we present to our minds the meaning or the sound or the construction of the words which we are using? — No more than the separate drops of water with which we quench our thirst are present: the whole draught may be conscious, but not the minute particles of which it is made up: So the whole sentence may be conscious, but the several words, syllables, letters are not thought of separately when we are uttering them. Like other natural operations, the process of speech, when most perfect, is least observed by us. We do not pause at each mouthful to dwell upon the taste of it: nor has the speaker time to ask himself the comparative merits of different modes of expression while he is uttering them. There are many things in the use of language which may be observed from without, but which cannot be explained from within. Consciousness carries us but a little way in the investigation of the mind; it is not the faculty of internal observation, but only the dim light which makes such observation possible. What is supposed to be our consciousness of language is really only the analysis of it, and this analysis admits of innumerable degrees. But would it not be better if this term, which is so misleading, and yet has played so great a part in mental science, were either banished or used only with the distinct meaning of 'attention to our own minds,' such as is called forth, not by familiar mental processes, but by the interruption of them? Now in this sense we may truly say that we are not conscious of ordinary speech, though we are commonly roused to attention by

the misuse or mispronunciation of a word. Still less, even in schools and academies, do we ever attempt to invent new words or to alter the meaning of old ones, except in the case, mentioned above, of technical or borrowed words which are artificially made or imported because a need of them is felt. Neither in our own nor in any other age has the conscious effort of reflection in man contributed in an appreciable degree to the formation of language. 'Which of us by taking thought' can make new words or constructions? Reflection is the least of the causes by which language is affected, and is likely to have the least power, when the linguistic instinct is greatest, as in young children and in the infancy of nations.

A kindred error is the separation of the phonetic from the mental element of language; they are really inseparable — no definite line can be drawn between them, any more than in any other common act of mind and body. It is true that within certain limits we possess the power of varying sounds by opening and closing the mouth, by touching the palate or the teeth with the tongue, by lengthening or shortening the vocal instrument, by greater or less stress, by a higher or lower pitch of the voice, and we can substitute one note or accent for another. But behind the organs of speech and their action there remains the informing mind, which sets them in motion and works together with them. And behind the great structure of human speech and the lesser varieties of language which arise out of the many degrees and kinds of human intercourse, there is also the unknown or over-ruling law of God or nature which gives order to it in its infinite greatness, and variety in its infinitesimal minuteness — both equally inscrutable to us. We need no longer discuss whether philology is to be classed with the Natural or the Mental sciences, if we frankly recognize that, like all the sciences which are concerned with man, it has a double aspect, — inward and outward; and that the inward can only be known through the outward. Neither need we raise the question whether the laws of language, like the other laws of human action, admit of exceptions. The answer in all cases is the same — that the laws of nature are uniform, though the consistency or continuity of them is not always perceptible to us. The superficial appearances of language, as of nature, are irregular, but we do not therefore deny their deeper uniformity. The comparison of the

growth of language in the individual and in the nation cannot be wholly discarded, for nations are made up of individuals. But in this, as in the other political sciences, we must distinguish between collective and individual actions or processes, and not attribute to the one what belongs to the other. Again, when we speak of the hereditary or paternity of a language, we must remember that the parents are alive as well as the children, and that all the preceding generations survive (after a manner) in the latest form of it. And when, for the purposes of comparison, we form into groups the roots or terminations of words, we should not forget how casual is the manner in which their resemblances have arisen — they were not first written down by a grammarian in the paradigms of a grammar and learned out of a book, but were due to many chance attractions of sound or of meaning, or of both combined. So many cautions have to be borne in mind, and so many first thoughts to be dismissed, before we can proceed safely in the path of philological enquiry. It might be well sometimes to lay aside figures of speech, such as the ‘root’ and the ‘branches,’ the ‘stem,’ the ‘strata’ of Geology, the ‘compounds’ of Chemistry, ‘the ripe fruit of pronouns dropping from verbs’ (see above), and the like, which are always interesting, but are apt to be delusive. Yet such figures of speech are far nearer the truth than the theories which attribute the invention and improvement of language to the conscious action of the human mind...Lastly, it is doubted by recent philologists whether climate can be supposed to have exercised any influence worth speaking of on a language: such a view is said to be unproven: it had better therefore not be silently assumed.

‘Natural selection’ and the ‘survival of the fittest’ have been applied in the field of philology, as well as in the other sciences which are concerned with animal and vegetable life. And a Darwinian school of philologists has sprung up, who are sometimes accused of putting words in the place of things. It seems to be true, that whether applied to language or to other branches of knowledge, the Darwinian theory, unless very precisely defined, hardly escapes from being a truism. If by ‘the natural selection’ of words or meanings of words or by the ‘persistence and survival of the fittest’ the maintainer of the theory intends to affirm nothing more than this

— that the word ‘fittest to survive’ survives, he adds not much to the knowledge of language. But if he means that the word or the meaning of the word or some portion of the word which comes into use or drops out of use is selected or rejected on the ground of economy or parsimony or ease to the speaker or clearness or euphony or expressiveness, or greater or less demand for it, or anything of this sort, he is affirming a proposition which has several senses, and in none of these senses can be assisted to be uniformly true. For the laws of language are precarious, and can only act uniformly when there is such frequency of intercourse among neighbours as is sufficient to enforce them. And there are many reasons why a man should prefer his own way of speaking to that of others, unless by so doing he becomes unintelligible. The struggle for existence among words is not of that fierce and irresistible kind in which birds, beasts and fishes devour one another, but of a milder sort, allowing one usage to be substituted for another, not by force, but by the persuasion, or rather by the prevailing habit, of a majority. The favourite figure, in this, as in some other uses of it, has tended rather to obscure than explain the subject to which it has been applied. Nor in any case can the struggle for existence be deemed to be the sole or principal cause of changes in language, but only one among many, and one of which we cannot easily measure the importance. There is a further objection which may be urged equally against all applications of the Darwinian theory. As in animal life and likewise in vegetable, so in languages, the process of change is said to be insensible: sounds, like animals, are supposed to pass into one another by imperceptible gradation. But in both cases the newly-created forms soon become fixed; there are few if any vestiges of the intermediate links, and so the better half of the evidence of the change is wanting.

(3) Among the incumbrances or illusions of language may be reckoned many of the rules and traditions of grammar, whether ancient grammar or the corrections of it which modern philology has introduced. Grammar, like law, delights in definition: human speech, like human action, though very far from being a mere chaos, is indefinite, admits of degrees, and is always in a state of change or transition. Grammar gives an erroneous conception of language: for

it reduces to a system that which is not a system. Its figures of speech, pleonasms, ellipses, anacolutha, pros to semainomenon, and the like have no reality; they do not either make conscious expressions more intelligible or show the way in which they have arisen; they are chiefly designed to bring an earlier use of language into conformity with the later. Often they seem intended only to remind us that great poets like Aeschylus or Sophocles or Pindar or a great prose writer like Thucydides are guilty of taking unwarrantable liberties with grammatical rules; it appears never to have occurred to the inventors of them that these real 'conditores linguae Graecae' lived in an age before grammar, when 'Greece also was living Greece.' It is the anatomy, not the physiology of language, which grammar seeks to describe: into the idiom and higher life of words it does not enter. The ordinary Greek grammar gives a complete paradigm of the verb, without suggesting that the double or treble forms of Perfects, Aorists, etc. are hardly ever contemporaneous. It distinguishes Moods and Tenses, without observing how much of the nature of one passes into the other. It makes three Voices, Active, Passive, and Middle, but takes no notice of the precarious existence and uncertain character of the last of the three. Language is a thing of degrees and relations and associations and exceptions: grammar ties it up in fixed rules. Language has many varieties of usage: grammar tries to reduce them to a single one. Grammar divides verbs into regular and irregular: it does not recognize that the irregular, equally with the regular, are subject to law, and that a language which had no exceptions would not be a natural growth: for it could not have been subjected to the influences by which language is ordinarily affected. It is always wanting to describe ancient languages in the terms of a modern one. It has a favourite fiction that one word is put in the place of another; the truth is that no word is ever put for another. It has another fiction, that a word has been omitted: words are omitted because they are no longer needed; and the omission has ceased to be observed. The common explanation of kata or some other preposition 'being understood' in a Greek sentence is another fiction of the same kind, which tends to disguise the fact that under cases were comprehended originally many more relations, and that prepositions are used only to define the meaning of them with greater precision.

These instances are sufficient to show the sort of errors which grammar introduces into language. We are not considering the question of its utility to the beginner in the study. Even to him the best grammar is the shortest and that in which he will have least to unlearn. It may be said that the explanations here referred to are already out of date, and that the study of Greek grammar has received a new character from comparative philology. This is true; but it is also true that the traditional grammar has still a great hold on the mind of the student.

Metaphysics are even more troublesome than the figments of grammar, because they wear the appearance of philosophy and there is no test to which they can be subjected. They are useful in so far as they give us an insight into the history of the human mind and the modes of thought which have existed in former ages; or in so far as they furnish wider conceptions of the different branches of knowledge and of their relation to one another. But they are worse than useless when they outrun experience and abstract the mind from the observation of facts, only to envelope it in a mist of words. Some philologists, like Schleicher, have been greatly influenced by the philosophy of Hegel; nearly all of them to a certain extent have fallen under the dominion of physical science. Even Kant himself thought that the first principles of philosophy could be elicited from the analysis of the proposition, in this respect falling short of Plato. Westphal holds that there are three stages of language: (1) in which things were characterized independently, (2) in which they were regarded in relation to human thought, and (3) in relation to one another. But are not such distinctions an anachronism? for they imply a growth of abstract ideas which never existed in early times. Language cannot be explained by Metaphysics; for it is prior to them and much more nearly allied to sense. It is not likely that the meaning of the cases is ultimately resolvable into relations of space and time. Nor can we suppose the conception of cause and effect or of the finite and infinite or of the same and other to be latent in language at a time when in their abstract form they had never entered into the mind of man...If the science of Comparative Philology had possessed 'enough of Metaphysics to get rid of Metaphysics,' it would have made far greater progress.

(4) Our knowledge of language is almost confined to languages which are fully developed. They are of several patterns; and these become altered by admixture in various degrees, — they may only borrow a few words from one another and retain their life comparatively unaltered, or they may meet in a struggle for existence until one of the two is overpowered and retires from the field. They attain the full rights and dignity of language when they acquire the use of writing and have a literature of their own; they pass into dialects and grow out of them, in proportion as men are isolated or united by locality or occupation. The common language sometimes reacts upon the dialects and imparts to them also a literary character. The laws of language can be best discerned in the great crises of language, especially in the transitions from ancient to modern forms of them, whether in Europe or Asia. Such changes are the silent notes of the world's history; they mark periods of unknown length in which war and conquest were running riot over whole continents, times of suffering too great to be endured by the human race, in which the masters became subjects and the subject races masters, in which driven by necessity or impelled by some instinct, tribes or nations left their original homes and but slowly found a resting-place. Language would be the greatest of all historical monuments, if it could only tell us the history of itself.

(5) There are many ways in which we may approach this study. The simplest of all is to observe our own use of language in conversation or in writing, how we put words together, how we construct and connect sentences, what are the rules of accent and rhythm in verse or prose, the formation and composition of words, the laws of euphony and sound, the affinities of letters, the mistakes to which we are ourselves most liable of spelling or pronunciation. We may compare with our own language some other, even when we have only a slight knowledge of it, such as French or German. Even a little Latin will enable us to appreciate the grand difference between ancient and modern European languages. In the child learning to speak we may note the inherent strength of language, which like 'a mountain river' is always forcing its way out. We may witness the delight in imitation and repetition, and some of the laws by which sounds pass into one another. We may learn something also from the

falterings of old age, the searching for words, and the confusion of them with one another, the forgetfulness of proper names (more commonly than of other words because they are more isolated), aphasia, and the like. There are philological lessons also to be gathered from nicknames, from provincialisms, from the slang of great cities, from the argot of Paris (that language of suffering and crime, so pathetically described by Victor Hugo), from the imperfect articulation of the deaf and dumb, from the jabbering of animals, from the analysis of sounds in relation to the organs of speech. The phonograph affords a visible evidence of the nature and divisions of sound; we may be truly said to know what we can manufacture. Artificial languages, such as that of Bishop Wilkins, are chiefly useful in showing what language is not. The study of any foreign language may be made also a study of Comparative Philology. There are several points, such as the nature of irregular verbs, of indeclinable parts of speech, the influence of euphony, the decay or loss of inflections, the elements of syntax, which may be examined as well in the history of our own language as of any other. A few well-selected questions may lead the student at once into the heart of the mystery: such as, Why are the pronouns and the verb of existence generally more irregular than any other parts of speech? Why is the number of words so small in which the sound is an echo of the sense? Why does the meaning of words depart so widely from their etymology? Why do substantives often differ in meaning from the verbs to which they are related, adverbs from adjectives? Why do words differing in origin coalesce in the same sound though retaining their differences of meaning? Why are some verbs impersonal? Why are there only so many parts of speech, and on what principle are they divided? These are a few crucial questions which give us an insight from different points of view into the true nature of language.

(6) Thus far we have been endeavouring to strip off from language the false appearances in which grammar and philology, or the love of system generally, have clothed it. We have also sought to indicate the sources of our knowledge of it and the spirit in which we should approach it, we may now proceed to consider some of the principles or natural laws which have created or modified it.

i. The first and simplest of all the principles of language, common

also to the animals, is imitation. The lion roars, the wolf howls in the solitude of the forest: they are answered by similar cries heard from a distance. The bird, too, mimics the voice of man and makes answer to him. Man tells to man the secret place in which he is hiding himself; he remembers and repeats the sound which he has heard. The love of imitation becomes a passion and an instinct to him. Primitive men learnt to speak from one another, like a child from its mother or nurse. They learnt of course a rudimentary, half-articulate language, the cry or song or speech which was the expression of what we now call human thoughts and feelings. We may still remark how much greater and more natural the exercise of the power is in the use of language than in any other process or action of the human mind.

ii. Imitation provided the first material of language: but it was 'without form and void.' During how many years or hundreds or thousands of years the imitative or half-articulate stage continued there is no possibility of determining. But we may reasonably conjecture that there was a time when the vocal utterance of man was intermediate between what we now call language and the cry of a bird or animal. Speech before language was a rudis indigestaque materies, not yet distributed into words and sentences, in which the cry of fear or joy mingled with more definite sounds recognized by custom as the expressions of things or events. It was the principle of analogy which introduced into this 'indigesta moles' order and measure. It was Anaxagoras' *omou panta chremata, eita nous elthon diekosmese*: the light of reason lighted up all things and at once began to arrange them. In every sentence, in every word and every termination of a word, this power of forming relations to one another was contained. There was a proportion of sound to sound, of meaning to meaning, of meaning to sound. The cases and numbers of nouns, the persons, tenses, numbers of verbs, were generally on the same or nearly the same pattern and had the same meaning. The sounds by which they were expressed were rough-hewn at first; after a while they grew more refined — the natural laws of euphony began to affect them. The rules of syntax are likewise based upon analogy. Time has an analogy with space, arithmetic with geometry. Not only in musical notes, but in the quantity, quality, accent, rhythm of

human speech, trivial or serious, there is a law of proportion. As in things of beauty, as in all nature, in the composition as well as in the motion of all things, there is a similarity of relations by which they are held together.

It would be a mistake to suppose that the analogies of language are always uniform: there may be often a choice between several, and sometimes one and sometimes another will prevail. In Greek there are three declensions of nouns; the forms of cases in one of them may intrude upon another. Similarly verbs in -omega and -mu iota interchange forms of tenses, and the completed paradigm of the verb is often made up of both. The same nouns may be partly declinable and partly indeclinable, and in some of their cases may have fallen out of use. Here are rules with exceptions; they are not however really exceptions, but contain in themselves indications of other rules. Many of these interruptions or variations of analogy occur in pronouns or in the verb of existence of which the forms were too common and therefore too deeply imbedded in language entirely to drop out. The same verbs in the same meaning may sometimes take one case, sometimes another. The participle may also have the character of an adjective, the adverb either of an adjective or of a preposition. These exceptions are as regular as the rules, but the causes of them are seldom known to us.

Language, like the animal and vegetable worlds, is everywhere intersected by the lines of analogy. Like number from which it seems to be derived, the principle of analogy opens the eyes of men to discern the similarities and differences of things, and their relations to one another. At first these are such as lie on the surface only; after a time they are seen by men to reach farther down into the nature of things. Gradually in language they arrange themselves into a sort of imperfect system; groups of personal and case endings are placed side by side. The fertility of language produces many more than are wanted; and the superfluous ones are utilized by the assignment to them of new meanings. The vacuity and the superfluity are thus partially compensated by each other. It must be remembered that in all the languages which have a literature, certainly in Sanskrit, Greek, Latin, we are not at the beginning but almost at the end of the linguistic process; we have reached a time when the verb and the

noun are nearly perfected, though in no language did they completely perfect themselves, because for some unknown reason the motive powers of languages seem to have ceased when they were on the eve of completion: they became fixed or crystallized in an imperfect form either from the influence of writing and literature, or because no further differentiation of them was required for the intelligibility of language. So not without admixture and confusion and displacement and contamination of sounds and the meanings of words, a lower stage of language passes into a higher. Thus far we can see and no further. When we ask the reason why this principle of analogy prevails in all the vast domain of language, there is no answer to the question; or no other answer but this, that there are innumerable ways in which, like number, analogy permeates, not only language, but the whole world, both visible and intellectual. We know from experience that it does not (a) arise from any conscious act of reflection that the accusative of a Latin noun in 'us' should end in 'um;' nor (b) from any necessity of being understood, — much less articulation would suffice for this; nor (c) from greater convenience or expressiveness of particular sounds. Such notions were certainly far enough away from the mind of primitive man. We may speak of a latent instinct, of a survival of the fittest, easiest, most euphonic, most economical of breath, in the case of one of two competing sounds; but these expressions do not add anything to our knowledge. We may try to grasp the infinity of language either under the figure of a limitless plain divided into countries and districts by natural boundaries, or of a vast river eternally flowing whose origin is concealed from us; we may apprehend partially the laws by which speech is regulated: but we do not know, and we seem as if we should never know, any more than in the parallel case of the origin of species, how vocal sounds received life and grew, and in the form of languages came to be distributed over the earth.

iii. Next in order to analogy in the formation of language or even prior to it comes the principle of onomatopoeia, which is itself a kind of analogy or similarity of sound and meaning. In by far the greater number of words it has become disguised and has disappeared; but in no stage of language is it entirely lost. It belongs chiefly to early language, in which words were few; and its influence grew less and

less as time went on. To the ear which had a sense of harmony it became a barbarism which disturbed the flow and equilibrium of discourse; it was an excrescence which had to be cut out, a survival which needed to be got rid of, because it was out of keeping with the rest. It remained for the most part only as a formative principle, which used words and letters not as crude imitations of other natural sounds, but as symbols of ideas which were naturally associated with them. It received in another way a new character; it affected not so much single words, as larger portions of human speech. It regulated the juxtaposition of sounds and the cadence of sentences. It was the music, not of song, but of speech, in prose as well as verse. The old onomatopoeia of primitive language was refined into an onomatopoeia of a higher kind, in which it is no longer true to say that a particular sound corresponds to a motion or action of man or beast or movement of nature, but that in all the higher uses of language the sound is the echo of the sense, especially in poetry, in which beauty and expressiveness are given to human thoughts by the harmonious composition of the words, syllables, letters, accents, quantities, rhythms, rhymes, varieties and contrasts of all sorts. The poet with his 'Break, break, break' or his *e pasin nekuessi kataphthimenoisin anassein* or his '*longius ex altoque sinum trahit,*' can produce a far finer music than any crude imitations of things or actions in sound, although a letter or two having this imitative power may be a lesser element of beauty in such passages. The same subtle sensibility, which adapts the word to the thing, adapts the sentence or cadence to the general meaning or spirit of the passage. This is the higher onomatopoeia which has banished the cruder sort as unworthy to have a place in great languages and literatures.

We can see clearly enough that letters or collocations of letters do by various degrees of strength or weakness, length or shortness, emphasis or pitch, become the natural expressions of the finer parts of human feeling or thought. And not only so, but letters themselves have a significance; as Plato observes that the letter rho accent is expressive of motion, the letters delta and tau of binding and rest, the letter lambda of smoothness, nu of inwardness, the letter eta of length, the letter omicron of roundness. These were often combined so as to form composite notions, as for example in *tromos*

(trembling), trachus (rugged), thrauein (crush), krouein (strike), thruptein (break), pumbein (whirl), — in all which words we notice a parallel composition of sounds in their English equivalents. Plato also remarks, as we remark, that the onomatopoetic principle is far from prevailing uniformly, and further that no explanation of language consistently corresponds with any system of philosophy, however great may be the light which language throws upon the nature of the mind. Both in Greek and English we find groups of words such as string, swing, sling, spring, sting, which are parallel to one another and may be said to derive their vocal effect partly from contrast of letters, but in which it is impossible to assign a precise amount of meaning to each of the expressive and onomatopoetic letters. A few of them are directly imitative, as for example the omega in oon, which represents the round form of the egg by the figure of the mouth: or bronte (thunder), in which the fulness of the sound of the word corresponds to the thing signified by it; or bombos (buzzing), of which the first syllable, as in its English equivalent, has the meaning of a deep sound. We may observe also (as we see in the case of the poor stammerer) that speech has the co-operation of the whole body and may be often assisted or half expressed by gesticulation. A sound or word is not the work of the vocal organs only; nearly the whole of the upper part of the human frame, including head, chest, lungs, have a share in creating it; and it may be accompanied by a movement of the eyes, nose, fingers, hands, feet which contributes to the effect of it.

The principle of onomatopea has fallen into discredit, partly because it has been supposed to imply an actual manufacture of words out of syllables and letters, like a piece of joiner's work, — a theory of language which is more and more refuted by facts, and more and more going out of fashion with philologists; and partly also because the traces of onomatopea in separate words become almost obliterated in the course of ages. The poet of language cannot put in and pull out letters, as a painter might insert or blot out a shade of colour to give effect to his picture. It would be ridiculous for him to alter any received form of a word in order to render it more expressive of the sense. He can only select, perhaps out of some dialect, the form which is already best adapted to his purpose. The

true onomatopoeia is not a creative, but a formative principle, which in the later stage of the history of language ceases to act upon individual words; but still works through the collocation of them in the sentence or paragraph, and the adaptation of every word, syllable, letter to one another and to the rhythm of the whole passage.

iv. Next, under a distinct head, although not separable from the preceding, may be considered the differentiation of languages, i.e. the manner in which differences of meaning and form have arisen in them. Into their first creation we have ceased to enquire: it is their aftergrowth with which we are now concerned. How did the roots or substantial portions of words become modified or inflected? and how did they receive separate meanings? First we remark that words are attracted by the sounds and senses of other words, so that they form groups of nouns and verbs analogous in sound and sense to one another, each noun or verb putting forth inflexions, generally of two or three patterns, and with exceptions. We do not say that we know how sense became first allied to sound; but we have no difficulty in ascertaining how the sounds and meanings of words were in time parted off or differentiated. (1) The chief causes which regulate the variations of sound are (a) double or differing analogies, which lead sometimes to one form, sometimes to another (b) euphony, by which is meant chiefly the greater pleasure to the ear and the greater facility to the organs of speech which is given by a new formation or pronunciation of a word (c) the necessity of finding new expressions for new classes or processes of things. We are told that changes of sound take place by innumerable gradations until a whole tribe or community or society find themselves acquiescing in a new pronunciation or use of language. Yet no one observes the change, or is at all aware that in the course of a lifetime he and his contemporaries have appreciably varied their intonation or use of words. On the other hand, the necessities of language seem to require that the intermediate sounds or meanings of words should quickly become fixed or set and not continue in a state of transition. The process of settling down is aided by the organs of speech and by the use of writing and printing. (2) The meaning of words varies because ideas vary or the number of things which is included under them or with which they are associated is increased. A single word is thus

made to do duty for many more things than were formerly expressed by it; and it parts into different senses when the classes of things or ideas which are represented by it are themselves different and distinct. A figurative use of a word may easily pass into a new sense: a new meaning caught up by association may become more important than all the rest. The good or neutral sense of a word, such as Jesuit, Puritan, Methodist, Heretic, has been often converted into a bad one by the malevolence of party spirit. Double forms suggest different meanings and are often used to express them; and the form or accent of a word has been not unfrequently altered when there is a difference of meaning. The difference of gender in nouns is utilized for the same reason. New meanings of words push themselves into the vacant spaces of language and retire when they are no longer needed. Language equally abhors vacancy and superfluity. But the remedial measures by which both are eliminated are not due to any conscious action of the human mind; nor is the force exerted by them constraining or necessary.

(7) We have shown that language, although subject to laws, is far from being of an exact and uniform nature. We may now speak briefly of the faults of language. They may be compared to the faults of Geology, in which different strata cross one another or meet at an angle, or mix with one another either by slow transitions or by violent convulsions, leaving many lacunae which can be no longer filled up, and often becoming so complex that no true explanation of them can be given. So in language there are the cross influences of meaning and sound, of logic and grammar, of differing analogies, of words and the inflexions of words, which often come into conflict with each other. The grammarian, if he were to form new words, would make them all of the same pattern according to what he conceives to be the rule, that is, the more common usage of language. The subtlety of nature goes far beyond art, and it is complicated by irregularity, so that often we can hardly say that there is a right or wrong in the formation of words. For almost any formation which is not at variance with the first principles of language is possible and may be defended.

The imperfection of language is really due to the formation and correlation of words by accident, that is to say, by principles which

are unknown to us. Hence we see why Plato, like ourselves unable to comprehend the whole of language, was constrained to 'supplement the poor creature imitation by another poor creature convention.' But the poor creature convention in the end proves too much for all the rest: for we do not ask what is the origin of words or whether they are formed according to a correct analogy, but what is the usage of them; and we are compelled to admit with Hermogenes in Plato and with Horace that usage is the ruling principle, '*quem penes arbitrium est, et jus et norma loquendi.*'

(8) There are two ways in which a language may attain permanence or fixity. First, it may have been embodied in poems or hymns or laws, which may be repeated for hundreds, perhaps for thousands of years with a religious accuracy, so that to the priests or rhapsodists of a nation the whole or the greater part of a language is literally preserved; secondly, it may be written down and in a written form distributed more or less widely among the whole nation. In either case the language which is familiarly spoken may have grown up wholly or in a great measure independently of them. (1) The first of these processes has been sometimes attended by the result that the sound of the words has been carefully preserved and that the meaning of them has either perished wholly, or is only doubtfully recovered by the efforts of modern philology. The verses have been repeated as a chant or part of a ritual, but they have had no relation to ordinary life or speech. (2) The invention of writing again is commonly attributed to a particular epoch, and we are apt to think that such an inestimable gift would have immediately been diffused over a whole country. But it may have taken a long time to perfect the art of writing, and another long period may have elapsed before it came into common use. Its influence on language has been increased ten, twenty or one hundred fold by the invention of printing.

Before the growth of poetry or the invention of writing, languages were only dialects. So they continued to be in parts of the country in which writing was not used or in which there was no diffusion of literature. In most of the counties of England there is still a provincial style, which has been sometimes made by a great poet the vehicle of his fancies. When a book sinks into the mind of a nation, such as Luther's Bible or the Authorized English Translation of the Bible, or

again great classical works like Shakspeare or Milton, not only have new powers of expression been diffused through a whole nation, but a great step towards uniformity has been made. The instinct of language demands regular grammar and correct spelling: these are imprinted deeply on the tablets of a nation's memory by a common use of classical and popular writers. In our own day we have attained to a point at which nearly every printed book is spelt correctly and written grammatically.

(9) Proceeding further to trace the influence of literature on language we note some other causes which have affected the higher use of it: such as (1) the necessity of clearness and connexion; (2) the fear of tautology; (3) the influence of metre, rhythm, rhyme, and of the language of prose and verse upon one another; (4) the power of idiom and quotation; (5) the relativeness of words to one another.

It has been usual to depreciate modern languages when compared with ancient. The latter are regarded as furnishing a type of excellence to which the former cannot attain. But the truth seems to be that modern languages, if through the loss of inflections and genders they lack some power or beauty or expressiveness or precision which is possessed by the ancient, are in many other respects superior to them: the thought is generally clearer, the connexion closer, the sentence and paragraph are better distributed. The best modern languages, for example English or French, possess as great a power of self-improvement as the Latin, if not as the Greek. Nor does there seem to be any reason why they should ever decline or decay. It is a popular remark that our great writers are beginning to disappear: it may also be remarked that whenever a great writer appears in the future he will find the English language as perfect and as ready for use as in the days of Shakspeare or Milton. There is no reason to suppose that English or French will ever be reduced to the low level of Modern Greek or of Mediaeval Latin. The wide diffusion of great authors would make such a decline impossible. Nor will modern languages be easily broken up by amalgamation with each other. The distance between them is too wide to be spanned, the differences are too great to be overcome, and the use of printing makes it impossible that one of them should ever be lost in another.

The structure of the English language differs greatly from that of either Latin or Greek. In the two latter, especially in Greek, sentences are joined together by connecting particles. They are distributed on the right hand and on the left by *men, de, alla, kaitoi, kai de* and the like, or deduced from one another by *ara, de, oun, toinun* and the like. In English the majority of sentences are independent and in apposition to one another; they are laid side by side or slightly connected by the copula. But within the sentence the expression of the logical relations of the clauses is closer and more exact: there is less of apposition and participial structure. The sentences thus laid side by side are also constructed into paragraphs; these again are less distinctly marked in Greek and Latin than in English. Generally French, German, and English have an advantage over the classical languages in point of accuracy. The three concords are more accurately observed in English than in either Greek or Latin. On the other hand, the extension of the familiar use of the masculine and feminine gender to objects of sense and abstract ideas as well as to men and animals no doubt lends a nameless grace to style which we have a difficulty in appreciating, and the possible variety in the order of words gives more flexibility and also a kind of dignity to the period. Of the comparative effect of accent and quantity and of the relation between them in ancient and modern languages we are not able to judge.

Another quality in which modern are superior to ancient languages is freedom from tautology. No English style is thought tolerable in which, except for the sake of emphasis, the same words are repeated at short intervals. Of course the length of the interval must depend on the character of the word. Striking words and expressions cannot be allowed to reappear, if at all, except at the distance of a page or more. Pronouns, prepositions, conjunctions may or rather must recur in successive lines. It seems to be a kind of impertinence to the reader and strikes unpleasantly both on the mind and on the ear that the same sounds should be used twice over, when another word or turn of expression would have given a new shade of meaning to the thought and would have added a pleasing variety to the sound. And the mind equally rejects the repetition of the word and the use of a mere synonym for it, — e.g. *felicity* and *happiness*.

The cultivated mind desires something more, which a skilful writer is easily able to supply out of his treasure-house.

The fear of tautology has doubtless led to the multiplications of words and the meanings of words, and generally to an enlargement of the vocabulary. It is a very early instinct of language; for ancient poetry is almost as free from tautology as the best modern writings. The speech of young children, except in so far as they are compelled to repeat themselves by the fewness of their words, also escapes from it. When they grow up and have ideas which are beyond their powers of expression, especially in writing, tautology begins to appear. In like manner when language is 'contaminated' by philosophy it is apt to become awkward, to stammer and repeat itself, to lose its flow and freedom. No philosophical writer with the exception of Plato, who is himself not free from tautology, and perhaps Bacon, has attained to any high degree of literary excellence.

To poetry the form and polish of language is chiefly to be attributed; and the most critical period in the history of language is the transition from verse to prose. At first mankind were contented to express their thoughts in a set form of words having a kind of rhythm; to which regularity was given by accent and quantity. But after a time they demanded a greater degree of freedom, and to those who had all their life been hearing poetry the first introduction of prose had the charm of novelty. The prose romances into which the Homeric Poems were converted, for a while probably gave more delight to the hearers or readers of them than the Poems themselves, and in time the relation of the two was reversed: the poems which had once been a necessity of the human mind became a luxury: they were now superseded by prose, which in all succeeding ages became the natural vehicle of expression to all mankind. Henceforward prose and poetry formed each other. A comparatively slender link between them was also furnished by proverbs. We may trace in poetry how the simple succession of lines, not without monotony, has passed into a complicated period, and how in prose, rhythm and accent and the order of words and the balance of clauses, sometimes not without a slight admixture of rhyme, make up a new kind of harmony, swelling into strains not less majestic than those of Homer, Virgil, or Dante.

One of the most curious and characteristic features of language,

affecting both syntax and style, is idiom. The meaning of the word 'idiom' is that which is peculiar, that which is familiar, the word or expression which strikes us or comes home to us, which is more readily understood or more easily remembered. It is a quality which really exists in infinite degrees, which we turn into differences of kind by applying the term only to conspicuous and striking examples of words or phrases which have this quality. It often supersedes the laws of language or the rules of grammar, or rather is to be regarded as another law of language which is natural and necessary. The word or phrase which has been repeated many times over is more intelligible and familiar to us than one which is rare, and our familiarity with it more than compensates for incorrectness or inaccuracy in the use of it. Striking expressions also which have moved the hearts of nations or are the precious stones and jewels of great authors partake of the nature of idioms: they are taken out of the sphere of grammar and are exempt from the proprieties of language. Every one knows that we often put words together in a manner which would be intolerable if it were not idiomatic. We cannot argue either about the meaning of words or the use of constructions that because they are used in one connexion they will be legitimate in another, unless we allow for this principle. We can bear to have words and sentences used in new senses or in a new order or even a little perverted in meaning when we are quite familiar with them. Quotations are as often applied in a sense which the author did not intend as in that which he did. The parody of the words of Shakspeare or of the Bible, which has in it something of the nature of a lie, is far from unpleasing to us. The better known words, even if their meaning be perverted, are more agreeable to us and have a greater power over us. Most of us have experienced a sort of delight and feeling of curiosity when we first came across or when we first used for ourselves a new word or phrase or figure of speech.

There are associations of sound and of sense by which every word is linked to every other. One letter harmonizes with another; every verb or noun derives its meaning, not only from itself, but from the words with which it is associated. Some reflection of them near or distant is embodied in it. In any new use of a word all the existing uses of it have to be considered. Upon these depends the question

whether it will bear the proposed extension of meaning or not. According to the famous expression of Luther, 'Words are living creatures, having hands and feet.' When they cease to retain this living power of adaptation, when they are only put together like the parts of a piece of furniture, language becomes unpoetical, in expressive, dead.

Grammars would lead us to suppose that words have a fixed form and sound. Lexicons assign to each word a definite meaning or meanings. They both tend to obscure the fact that the sentence precedes the word and that all language is relative. (1) It is relative to its own context. Its meaning is modified by what has been said before and after in the same or in some other passage: without comparing the context we are not sure whether it is used in the same sense even in two successive sentences. (2) It is relative to facts, to time, place, and occasion: when they are already known to the hearer or reader, they may be presupposed; there is no need to allude to them further. (3) It is relative to the knowledge of the writer and reader or of the speaker and hearer. Except for the sake of order and consecutiveness nothing ought to be expressed which is already commonly or universally known. A word or two may be sufficient to give an intimation to a friend; a long or elaborate speech or composition is required to explain some new idea to a popular audience or to the ordinary reader or to a young pupil. Grammars and dictionaries are not to be despised; for in teaching we need clearness rather than subtlety. But we must not therefore forget that there is also a higher ideal of language in which all is relative — sounds to sounds, words to words, the parts to the whole — in which besides the lesser context of the book or speech, there is also the larger context of history and circumstances.

The study of Comparative Philology has introduced into the world a new science which more than any other binds up man with nature, and distant ages and countries with one another. It may be said to have thrown a light upon all other sciences and upon the nature of the human mind itself. The true conception of it dispels many errors, not only of metaphysics and theology, but also of natural knowledge. Yet it is far from certain that this newly-found science will continue to progress in the same surprising manner as heretofore; or that even if

our materials are largely increased, we shall arrive at much more definite conclusions than at present. Like some other branches of knowledge, it may be approaching a point at which it can no longer be profitably studied. But at any rate it has brought back the philosophy of language from theory to fact; it has passed out of the region of guesses and hypotheses, and has attained the dignity of an Inductive Science. And it is not without practical and political importance. It gives a new interest to distant and subject countries; it brings back the dawning light from one end of the earth to the other. Nations, like individuals, are better understood by us when we know something of their early life; and when they are better understood by us, we feel more kindly towards them. Lastly, we may remember that all knowledge is valuable for its own sake; and we may also hope that a deeper insight into the nature of human speech will give us a greater command of it and enable us to make a nobler use of it. (Compare again W. Humboldt, 'Ueber die Verschiedenheit des menschlichen Sprachbaues;' M. Muller, 'Lectures on the Science of Language;' Steinthal, 'Einleitung in die Psychologie und Sprachwissenschaft:' and for the latter part of the Essay, Delbruck, 'Study of Language;' Paul's 'Principles of the History of Language:' to the latter work the author of this Essay is largely indebted.)

CRATYLUS.

PERSONS OF THE DIALOGUE: Socrates, Hermogenes, Cratylus.

HERMOGENES: Suppose that we make Socrates a party to the argument?

CRATYLUS: If you please.

HERMOGENES: I should explain to you, Socrates, that our friend Cratylus has been arguing about names; he says that they are natural and not conventional; not a portion of the human voice which men agree to use; but that there is a truth or correctness in them, which is the same for Hellenes as for barbarians. Whereupon I ask him, whether his own name of Cratylus is a true name or not, and he answers 'Yes.' And Socrates? 'Yes.' Then every man's name, as I tell him, is that which he is called. To this he replies— 'If all the world were to call you Hermogenes, that would not be your name.' And when I am anxious to have a further explanation he is ironical and mysterious, and seems to imply that he has a notion of his own about the matter, if he would only tell, and could entirely convince me, if he chose to be intelligible. Tell me, Socrates, what this oracle means; or rather tell me, if you will be so good, what is your own view of the truth or correctness of names, which I would far sooner hear.

SOCRATES: Son of Hipponicus, there is an ancient saying, that 'hard is the knowledge of the good.' And the knowledge of names is a great part of knowledge. If I had not been poor, I might have heard the fifty-drachma course of the great Prodicus, which is a complete education in grammar and language — these are his own words — and then I should have been at once able to answer your question about the correctness of names. But, indeed, I have only heard the single-drachma course, and therefore, I do not know the truth about such matters; I will, however, gladly assist you and Cratylus in the investigation of them. When he declares that your name is not really Hermogenes, I suspect that he is only making fun of you; — he means to say that you are no true son of Hermes, because you are

always looking after a fortune and never in luck. But, as I was saying, there is a good deal of difficulty in this sort of knowledge, and therefore we had better leave the question open until we have heard both sides.

HERMOGENES: I have often talked over this matter, both with Cratylus and others, and cannot convince myself that there is any principle of correctness in names other than convention and agreement; any name which you give, in my opinion, is the right one, and if you change that and give another, the new name is as correct as the old — we frequently change the names of our slaves, and the newly-imposed name is as good as the old: for there is no name given to anything by nature; all is convention and habit of the users; — such is my view. But if I am mistaken I shall be happy to hear and learn of Cratylus, or of any one else.

SOCRATES: I dare say that you may be right, Hermogenes: let us see; — Your meaning is, that the name of each thing is only that which anybody agrees to call it?

HERMOGENES: That is my notion.

SOCRATES: Whether the giver of the name be an individual or a city?

HERMOGENES: Yes.

SOCRATES: Well, now, let me take an instance; — suppose that I call a man a horse or a horse a man, you mean to say that a man will be rightly called a horse by me individually, and rightly called a man by the rest of the world; and a horse again would be rightly called a man by me and a horse by the world: — that is your meaning?

HERMOGENES: He would, according to my view.

SOCRATES: But how about truth, then? you would acknowledge that there is in words a true and a false?

HERMOGENES: Certainly.

SOCRATES: And there are true and false propositions?

HERMOGENES: To be sure.

SOCRATES: And a true proposition says that which is, and a false proposition says that which is not?

HERMOGENES: Yes; what other answer is possible?

SOCRATES: Then in a proposition there is a true and false?

HERMOGENES: Certainly.

SOCRATES: But is a proposition true as a whole only, and are the parts untrue?

HERMOGENES: No; the parts are true as well as the whole.

SOCRATES: Would you say the large parts and not the smaller ones, or every part?

HERMOGENES: I should say that every part is true.

SOCRATES: Is a proposition resolvable into any part smaller than a name?

HERMOGENES: No; that is the smallest.

SOCRATES: Then the name is a part of the true proposition?

HERMOGENES: Yes.

SOCRATES: Yes, and a true part, as you say.

HERMOGENES: Yes.

SOCRATES: And is not the part of a falsehood also a falsehood?

HERMOGENES: Yes.

SOCRATES: Then, if propositions may be true and false, names may be true and false?

HERMOGENES: So we must infer.

SOCRATES: And the name of anything is that which any one affirms to be the name?

HERMOGENES: Yes.

SOCRATES: And will there be so many names of each thing as everybody says that there are? and will they be true names at the time of uttering them?

HERMOGENES: Yes, Socrates, I can conceive no correctness of names other than this; you give one name, and I another; and in different cities and countries there are different names for the same things; Hellenes differ from barbarians in their use of names, and the several Hellenic tribes from one another.

SOCRATES: But would you say, Hermogenes, that the things differ as the names differ? and are they relative to individuals, as Protagoras tells us? For he says that man is the measure of all things, and that things are to me as they appear to me, and that they are to you as they appear to you. Do you agree with him, or would you say that things have a permanent essence of their own?

HERMOGENES: There have been times, Socrates, when I have been driven in my perplexity to take refuge with Protagoras; not that I agree with him at all.

SOCRATES: What! have you ever been driven to admit that there was no such thing as a bad man?

HERMOGENES: No, indeed; but I have often had reason to think that there are very bad men, and a good many of them.

SOCRATES: Well, and have you ever found any very good ones?

HERMOGENES: Not many.

SOCRATES: Still you have found them?

HERMOGENES: Yes.

SOCRATES: And would you hold that the very good were the very

wise, and the very evil very foolish? Would that be your view?

HERMOGENES: It would.

SOCRATES: But if Protagoras is right, and the truth is that things are as they appear to any one, how can some of us be wise and some of us foolish?

HERMOGENES: Impossible.

SOCRATES: And if, on the other hand, wisdom and folly are really distinguishable, you will allow, I think, that the assertion of Protagoras can hardly be correct. For if what appears to each man is true to him, one man cannot in reality be wiser than another.

HERMOGENES: He cannot.

SOCRATES: Nor will you be disposed to say with Euthydemus, that all things equally belong to all men at the same moment and always; for neither on his view can there be some good and others bad, if virtue and vice are always equally to be attributed to all.

HERMOGENES: There cannot.

SOCRATES: But if neither is right, and things are not relative to individuals, and all things do not equally belong to all at the same moment and always, they must be supposed to have their own proper and permanent essence: they are not in relation to us, or influenced by us, fluctuating according to our fancy, but they are independent, and maintain to their own essence the relation prescribed by nature.

HERMOGENES: I think, Socrates, that you have said the truth.

SOCRATES: Does what I am saying apply only to the things themselves, or equally to the actions which proceed from them? Are not actions also a class of being?

HERMOGENES: Yes, the actions are real as well as the things.

SOCRATES: Then the actions also are done according to their proper nature, and not according to our opinion of them? In cutting, for

example, we do not cut as we please, and with any chance instrument; but we cut with the proper instrument only, and according to the natural process of cutting; and the natural process is right and will succeed, but any other will fail and be of no use at all.

HERMOGENES: I should say that the natural way is the right way.

SOCRATES: Again, in burning, not every way is the right way; but the right way is the natural way, and the right instrument the natural instrument.

HERMOGENES: True.

SOCRATES: And this holds good of all actions?

HERMOGENES: Yes.

SOCRATES: And speech is a kind of action?

HERMOGENES: True.

SOCRATES: And will a man speak correctly who speaks as he pleases? Will not the successful speaker rather be he who speaks in the natural way of speaking, and as things ought to be spoken, and with the natural instrument? Any other mode of speaking will result in error and failure.

HERMOGENES: I quite agree with you.

SOCRATES: And is not naming a part of speaking? for in giving names men speak.

HERMOGENES: That is true.

SOCRATES: And if speaking is a sort of action and has a relation to acts, is not naming also a sort of action?

HERMOGENES: True.

SOCRATES: And we saw that actions were not relative to ourselves, but had a special nature of their own?

HERMOGENES: Precisely.

SOCRATES: Then the argument would lead us to infer that names ought to be given according to a natural process, and with a proper instrument, and not at our pleasure: in this and no other way shall we name with success.

HERMOGENES: I agree.

SOCRATES: But again, that which has to be cut has to be cut with something?

HERMOGENES: Yes.

SOCRATES: And that which has to be woven or pierced has to be woven or pierced with something?

HERMOGENES: Certainly.

SOCRATES: And that which has to be named has to be named with something?

HERMOGENES: True.

SOCRATES: What is that with which we pierce?

HERMOGENES: An awl.

SOCRATES: And with which we weave?

HERMOGENES: A shuttle.

SOCRATES: And with which we name?

HERMOGENES: A name.

SOCRATES: Very good: then a name is an instrument?

HERMOGENES: Certainly.

SOCRATES: Suppose that I ask, 'What sort of instrument is a shuttle?' And you answer, 'A weaving instrument.'

HERMOGENES: Well.

SOCRATES: And I ask again, ‘What do we do when we weave?’ — The answer is, that we separate or disengage the warp from the woof.

HERMOGENES: Very true.

SOCRATES: And may not a similar description be given of an awl, and of instruments in general?

HERMOGENES: To be sure.

SOCRATES: And now suppose that I ask a similar question about names: will you answer me? Regarding the name as an instrument, what do we do when we name?

HERMOGENES: I cannot say.

SOCRATES: Do we not give information to one another, and distinguish things according to their natures?

HERMOGENES: Certainly we do.

SOCRATES: Then a name is an instrument of teaching and of distinguishing natures, as the shuttle is of distinguishing the threads of the web.

HERMOGENES: Yes.

SOCRATES: And the shuttle is the instrument of the weaver?

HERMOGENES: Assuredly.

SOCRATES: Then the weaver will use the shuttle well — and well means like a weaver? and the teacher will use the name well — and well means like a teacher?

HERMOGENES: Yes.

SOCRATES: And when the weaver uses the shuttle, whose work will he be using well?

HERMOGENES: That of the carpenter.

SOCRATES: And is every man a carpenter, or the skilled only?

HERMOGENES: Only the skilled.

SOCRATES: And when the piercer uses the awl, whose work will he be using well?

HERMOGENES: That of the smith.

SOCRATES: And is every man a smith, or only the skilled?

HERMOGENES: The skilled only.

SOCRATES: And when the teacher uses the name, whose work will he be using?

HERMOGENES: There again I am puzzled.

SOCRATES: Cannot you at least say who gives us the names which we use?

HERMOGENES: Indeed I cannot.

SOCRATES: Does not the law seem to you to give us them?

HERMOGENES: Yes, I suppose so.

SOCRATES: Then the teacher, when he gives us a name, uses the work of the legislator?

HERMOGENES: I agree.

SOCRATES: And is every man a legislator, or the skilled only?

HERMOGENES: The skilled only.

SOCRATES: Then, Hermogenes, not every man is able to give a name, but only a maker of names; and this is the legislator, who of all skilled artisans in the world is the rarest.

HERMOGENES: True.

SOCRATES: And how does the legislator make names? and to what

does he look? Consider this in the light of the previous instances: to what does the carpenter look in making the shuttle? Does he not look to that which is naturally fitted to act as a shuttle?

HERMOGENES: Certainly.

SOCRATES: And suppose the shuttle to be broken in making, will he make another, looking to the broken one? or will he look to the form according to which he made the other?

HERMOGENES: To the latter, I should imagine.

SOCRATES: Might not that be justly called the true or ideal shuttle?

HERMOGENES: I think so.

SOCRATES: And whatever shuttles are wanted, for the manufacture of garments, thin or thick, of flaxen, woollen, or other material, ought all of them to have the true form of the shuttle; and whatever is the shuttle best adapted to each kind of work, that ought to be the form which the maker produces in each case.

HERMOGENES: Yes.

SOCRATES: And the same holds of other instruments: when a man has discovered the instrument which is naturally adapted to each work, he must express this natural form, and not others which he fancies, in the material, whatever it may be, which he employs; for example, he ought to know how to put into iron the forms of awls adapted by nature to their several uses?

HERMOGENES: Certainly.

SOCRATES: And how to put into wood forms of shuttles adapted by nature to their uses?

HERMOGENES: True.

SOCRATES: For the several forms of shuttles naturally answer to the several kinds of webs; and this is true of instruments in general.

HERMOGENES: Yes.

SOCRATES: Then, as to names: ought not our legislator also to know how to put the true natural name of each thing into sounds and syllables, and to make and give all names with a view to the ideal name, if he is to be a namer in any true sense? And we must remember that different legislators will not use the same syllables. For neither does every smith, although he may be making the same instrument for the same purpose, make them all of the same iron. The form must be the same, but the material may vary, and still the instrument may be equally good of whatever iron made, whether in Hellas or in a foreign country; — there is no difference.

HERMOGENES: Very true.

SOCRATES: And the legislator, whether he be Hellene or barbarian, is not therefore to be deemed by you a worse legislator, provided he gives the true and proper form of the name in whatever syllables; this or that country makes no matter.

HERMOGENES: Quite true.

SOCRATES: But who then is to determine whether the proper form is given to the shuttle, whatever sort of wood may be used? the carpenter who makes, or the weaver who is to use them?

HERMOGENES: I should say, he who is to use them, Socrates.

SOCRATES: And who uses the work of the lyre-maker? Will not he be the man who knows how to direct what is being done, and who will know also whether the work is being well done or not?

HERMOGENES: Certainly.

SOCRATES: And who is he?

HERMOGENES: The player of the lyre.

SOCRATES: And who will direct the shipwright?

HERMOGENES: The pilot.

SOCRATES: And who will be best able to direct the legislator in his work, and will know whether the work is well done, in this or any other country? Will not the user be the man?

HERMOGENES: Yes.

SOCRATES: And this is he who knows how to ask questions?

HERMOGENES: Yes.

SOCRATES: And how to answer them?

HERMOGENES: Yes.

SOCRATES: And him who knows how to ask and answer you would call a dialectician?

HERMOGENES: Yes; that would be his name.

SOCRATES: Then the work of the carpenter is to make a rudder, and the pilot has to direct him, if the rudder is to be well made.

HERMOGENES: True.

SOCRATES: And the work of the legislator is to give names, and the dialectician must be his director if the names are to be rightly given?

HERMOGENES: That is true.

SOCRATES: Then, Hermogenes, I should say that this giving of names can be no such light matter as you fancy, or the work of light or chance persons; and Cratylus is right in saying that things have names by nature, and that not every man is an artificer of names, but he only who looks to the name which each thing by nature has, and is able to express the true forms of things in letters and syllables.

HERMOGENES: I cannot answer you, Socrates; but I find a difficulty in changing my opinion all in a moment, and I think that I should be more readily persuaded, if you would show me what this is which you term the natural fitness of names.

SOCRATES: My good Hermogenes, I have none to show. Was I not

telling you just now (but you have forgotten), that I knew nothing, and proposing to share the enquiry with you? But now that you and I have talked over the matter, a step has been gained; for we have discovered that names have by nature a truth, and that not every man knows how to give a thing a name.

HERMOGENES: Very good.

SOCRATES: And what is the nature of this truth or correctness of names? That, if you care to know, is the next question.

HERMOGENES: Certainly, I care to know.

SOCRATES: Then reflect.

HERMOGENES: How shall I reflect?

SOCRATES: The true way is to have the assistance of those who know, and you must pay them well both in money and in thanks; these are the Sophists, of whom your brother, Callias, has — rather dearly — bought the reputation of wisdom. But you have not yet come into your inheritance, and therefore you had better go to him, and beg and entreat him to tell you what he has learnt from Protagoras about the fitness of names.

HERMOGENES: But how inconsistent should I be, if, whilst repudiating Protagoras and his truth ('Truth' was the title of the book of Protagoras; compare Theaet.), I were to attach any value to what he and his book affirm!

SOCRATES: Then if you despise him, you must learn of Homer and the poets.

HERMOGENES: And where does Homer say anything about names, and what does he say?

SOCRATES: He often speaks of them; notably and nobly in the places where he distinguishes the different names which Gods and men give to the same things. Does he not in these passages make a remarkable statement about the correctness of names? For the Gods

must clearly be supposed to call things by their right and natural names; do you not think so?

HERMOGENES: Why, of course they call them rightly, if they call them at all. But to what are you referring?

SOCRATES: Do you not know what he says about the river in Troy who had a single combat with Hephaestus?

‘Whom,’ as he says, ‘the Gods call Xanthus, and men call Scamander.’

HERMOGENES: I remember.

SOCRATES: Well, and about this river — to know that he ought to be called Xanthus and not Scamander — is not that a solemn lesson? Or about the bird which, as he says,

‘The Gods call Chalcis, and men Cymindis:’

to be taught how much more correct the name Chalcis is than the name Cymindis — do you deem that a light matter? Or about Batieia and Myrina? (Compare Il. ‘The hill which men call Batieia and the immortals the tomb of the sportive Myrina.’) And there are many other observations of the same kind in Homer and other poets. Now, I think that this is beyond the understanding of you and me; but the names of Scamandrius and Astyanax, which he affirms to have been the names of Hector’s son, are more within the range of human faculties, as I am disposed to think; and what the poet means by correctness may be more readily apprehended in that instance: you will remember I dare say the lines to which I refer? (Il.)

HERMOGENES: I do.

SOCRATES: Let me ask you, then, which did Homer think the more correct of the names given to Hector’s son — Astyanax or Scamandrius?

HERMOGENES: I do not know.

SOCRATES: How would you answer, if you were asked whether the

wise or the unwise are more likely to give correct names?

HERMOGENES: I should say the wise, of course.

SOCRATES: And are the men or the women of a city, taken as a class, the wiser?

HERMOGENES: I should say, the men.

SOCRATES: And Homer, as you know, says that the Trojan men called him Astyanax (king of the city); but if the men called him Astyanax, the other name of Scamandrius could only have been given to him by the women.

HERMOGENES: That may be inferred.

SOCRATES: And must not Homer have imagined the Trojans to be wiser than their wives?

HERMOGENES: To be sure.

SOCRATES: Then he must have thought Astyanax to be a more correct name for the boy than Scamandrius?

HERMOGENES: Clearly.

SOCRATES: And what is the reason of this? Let us consider: — does he not himself suggest a very good reason, when he says,

‘For he alone defended their city and long walls’?

This appears to be a good reason for calling the son of the saviour king of the city which his father was saving, as Homer observes.

HERMOGENES: I see.

SOCRATES: Why, Hermogenes, I do not as yet see myself; and do you?

HERMOGENES: No, indeed; not I.

SOCRATES: But tell me, friend, did not Homer himself also give Hector his name?

HERMOGENES: What of that?

SOCRATES: The name appears to me to be very nearly the same as the name of Astyanax — both are Hellenic; and a king (anax) and a holder (ektor) have nearly the same meaning, and are both descriptive of a king; for a man is clearly the holder of that of which he is king; he rules, and owns, and holds it. But, perhaps, you may think that I am talking nonsense; and indeed I believe that I myself did not know what I meant when I imagined that I had found some indication of the opinion of Homer about the correctness of names.

HERMOGENES: I assure you that I think otherwise, and I believe you to be on the right track.

SOCRATES: There is reason, I think, in calling the lion's whelp a lion, and the foal of a horse a horse; I am speaking only of the ordinary course of nature, when an animal produces after his kind, and not of extraordinary births; — if contrary to nature a horse have a calf, then I should not call that a foal but a calf; nor do I call any inhuman birth a man, but only a natural birth. And the same may be said of trees and other things. Do you agree with me?

HERMOGENES: Yes, I agree.

SOCRATES: Very good. But you had better watch me and see that I do not play tricks with you. For on the same principle the son of a king is to be called a king. And whether the syllables of the name are the same or not the same, makes no difference, provided the meaning is retained; nor does the addition or subtraction of a letter make any difference so long as the essence of the thing remains in possession of the name and appears in it.

HERMOGENES: What do you mean?

SOCRATES: A very simple matter. I may illustrate my meaning by the names of letters, which you know are not the same as the letters themselves with the exception of the four epsilon, upsilon, omicron, omega; the names of the rest, whether vowels or consonants, are made up of other letters which we add to them; but so long as we

introduce the meaning, and there can be no mistake, the name of the letter is quite correct. Take, for example, the letter beta — the addition of eta, tau, alpha, gives no offence, and does not prevent the whole name from having the value which the legislator intended — so well did he know how to give the letters names.

HERMOGENES: I believe you are right.

SOCRATES: And may not the same be said of a king? a king will often be the son of a king, the good son or the noble son of a good or noble sire; and similarly the offspring of every kind, in the regular course of nature, is like the parent, and therefore has the same name. Yet the syllables may be disguised until they appear different to the ignorant person, and he may not recognize them, although they are the same, just as any one of us would not recognize the same drugs under different disguises of colour and smell, although to the physician, who regards the power of them, they are the same, and he is not put out by the addition; and in like manner the etymologist is not put out by the addition or transposition or subtraction of a letter or two, or indeed by the change of all the letters, for this need not interfere with the meaning. As was just now said, the names of Hector and Astyanax have only one letter alike, which is tau, and yet they have the same meaning. And how little in common with the letters of their names has Archepolis (ruler of the city) — and yet the meaning is the same. And there are many other names which just mean 'king.' Again, there are several names for a general, as, for example, Agis (leader) and Polemarchus (chief in war) and Eupolemus (good warrior); and others which denote a physician, as Iatrocles (famous healer) and Acesimbrotus (curer of mortals); and there are many others which might be cited, differing in their syllables and letters, but having the same meaning. Would you not say so?

HERMOGENES: Yes.

SOCRATES: The same names, then, ought to be assigned to those who follow in the course of nature?

HERMOGENES: Yes.

SOCRATES: And what of those who follow out of the course of nature, and are prodigies? for example, when a good and religious man has an irreligious son, he ought to bear the name not of his father, but of the class to which he belongs, just as in the case which was before supposed of a horse foaling a calf.

HERMOGENES: Quite true.

SOCRATES: Then the irreligious son of a religious father should be called irreligious?

HERMOGENES: Certainly.

SOCRATES: He should not be called Theophilus (beloved of God) or Mnesitheus (mindful of God), or any of these names: if names are correctly given, his should have an opposite meaning.

HERMOGENES: Certainly, Socrates.

SOCRATES: Again, Hermogenes, there is Orestes (the man of the mountains) who appears to be rightly called; whether chance gave the name, or perhaps some poet who meant to express the brutality and fierceness and mountain wildness of his hero's nature.

HERMOGENES: That is very likely, Socrates.

SOCRATES: And his father's name is also according to nature.

HERMOGENES: Clearly.

SOCRATES: Yes, for as his name, so also is his nature; Agamemnon (admirable for remaining) is one who is patient and persevering in the accomplishment of his resolves, and by his virtue crowns them; and his continuance at Troy with all the vast army is a proof of that admirable endurance in him which is signified by the name Agamemnon. I also think that Atreus is rightly called; for his murder of Chrysippus and his exceeding cruelty to Thyestes are damaging and destructive to his reputation — the name is a little altered and disguised so as not to be intelligible to every one, but to the

etymologist there is no difficulty in seeing the meaning, for whether you think of him as ateiros the stubborn, or as atrestos the fearless, or as ateros the destructive one, the name is perfectly correct in every point of view. And I think that Pelops is also named appropriately; for, as the name implies, he is rightly called Pelops who sees what is near only (o ta pelas oron).

HERMOGENES: How so?

SOCRATES: Because, according to the tradition, he had no forethought or foresight of all the evil which the murder of Myrtilus would entail upon his whole race in remote ages; he saw only what was at hand and immediate, — or in other words, pelas (near), in his eagerness to win Hippodamia by all means for his bride. Every one would agree that the name of Tantalus is rightly given and in accordance with nature, if the traditions about him are true.

HERMOGENES: And what are the traditions?

SOCRATES: Many terrible misfortunes are said to have happened to him in his life — last of all, came the utter ruin of his country; and after his death he had the stone suspended (talanteia) over his head in the world below — all this agrees wonderfully well with his name. You might imagine that some person who wanted to call him Talantatos (the most weighted down by misfortune), disguised the name by altering it into Tantalus; and into this form, by some accident of tradition, it has actually been transmuted. The name of Zeus, who is his alleged father, has also an excellent meaning, although hard to be understood, because really like a sentence, which is divided into two parts, for some call him Zena, and use the one half, and others who use the other half call him Dia; the two together signify the nature of the God, and the business of a name, as we were saying, is to express the nature. For there is none who is more the author of life to us and to all, than the lord and king of all. Wherefore we are right in calling him Zena and Dia, which are one name, although divided, meaning the God through whom all creatures always have life (di on zen aei pasi tois zosin uparchei). There is an irreverence, at first sight, in calling him son of Cronos (who is a

proverb for stupidity), and we might rather expect Zeus to be the child of a mighty intellect. Which is the fact; for this is the meaning of his father's name: Kronos quasi Koros (Choreo, to sweep), not in the sense of a youth, but signifying to chatharon chai acheraton tou nou, the pure and garnished mind (sc. apo tou chorein). He, as we are informed by tradition, was begotten of Uranus, rightly so called (apo tou oran ta ano) from looking upwards; which, as philosophers tell us, is the way to have a pure mind, and the name Uranus is therefore correct. If I could remember the genealogy of Hesiod, I would have gone on and tried more conclusions of the same sort on the remoter ancestors of the Gods, — then I might have seen whether this wisdom, which has come to me all in an instant, I know not whence, will or will not hold good to the end.

HERMOGENES: You seem to me, Socrates, to be quite like a prophet newly inspired, and to be uttering oracles.

SOCRATES: Yes, Hermogenes, and I believe that I caught the inspiration from the great Euthyphro of the Prospaltian deme, who gave me a long lecture which commenced at dawn: he talked and I listened, and his wisdom and enchanting ravishment has not only filled my ears but taken possession of my soul, and to-day I shall let his superhuman power work and finish the investigation of names — that will be the way; but to-morrow, if you are so disposed, we will conjure him away, and make a purgation of him, if we can only find some priest or sophist who is skilled in purifications of this sort.

HERMOGENES: With all my heart; for am very curious to hear the rest of the enquiry about names.

SOCRATES: Then let us proceed; and where would you have us begin, now that we have got a sort of outline of the enquiry? Are there any names which witness of themselves that they are not given arbitrarily, but have a natural fitness? The names of heroes and of men in general are apt to be deceptive because they are often called after ancestors with whose names, as we were saying, they may have no business; or they are the expression of a wish like Eutychides (the son of good fortune), or Sosias (the Saviour), or Theophilus (the

beloved of God), and others. But I think that we had better leave these, for there will be more chance of finding correctness in the names of immutable essences; — there ought to have been more care taken about them when they were named, and perhaps there may have been some more than human power at work occasionally in giving them names.

HERMOGENES: I think so, Socrates.

SOCRATES: Ought we not to begin with the consideration of the Gods, and show that they are rightly named Gods?

HERMOGENES: Yes, that will be well.

SOCRATES: My notion would be something of this sort: — I suspect that the sun, moon, earth, stars, and heaven, which are still the Gods of many barbarians, were the only Gods known to the aboriginal Hellenes. Seeing that they were always moving and running, from their running nature they were called Gods or runners (Theous, Theontas); and when men became acquainted with the other Gods, they proceeded to apply the same name to them all. Do you think that likely?

HERMOGENES: I think it very likely indeed.

SOCRATES: What shall follow the Gods?

HERMOGENES: Must not demons and heroes and men come next?

SOCRATES: Demons! And what do you consider to be the meaning of this word? Tell me if my view is right.

HERMOGENES: Let me hear.

SOCRATES: You know how Hesiod uses the word?

HERMOGENES: I do not.

SOCRATES: Do you not remember that he speaks of a golden race of men who came first?

HERMOGENES: Yes, I do.

SOCRATES: He says of them —

‘But now that fate has closed over this race They are holy demons upon the earth, Beneficent, averters of ills, guardians of mortal men.’ (Hesiod, Works and Days.)

HERMOGENES: What is the inference?

SOCRATES: What is the inference! Why, I suppose that he means by the golden men, not men literally made of gold, but good and noble; and I am convinced of this, because he further says that we are the iron race.

HERMOGENES: That is true.

SOCRATES: And do you not suppose that good men of our own day would by him be said to be of golden race?

HERMOGENES: Very likely.

SOCRATES: And are not the good wise?

HERMOGENES: Yes, they are wise.

SOCRATES: And therefore I have the most entire conviction that he called them demons, because they were daemones (knowing or wise), and in our older Attic dialect the word itself occurs. Now he and other poets say truly, that when a good man dies he has honour and a mighty portion among the dead, and becomes a demon; which is a name given to him signifying wisdom. And I say too, that every wise man who happens to be a good man is more than human (daimonion) both in life and death, and is rightly called a demon.

HERMOGENES: Then I rather think that I am of one mind with you; but what is the meaning of the word ‘hero’? (Eros with an eta, in the old writing eros with an epsilon.)

SOCRATES: I think that there is no difficulty in explaining, for the name is not much altered, and signifies that they were born of love.

HERMOGENES: What do you mean?

SOCRATES: Do you not know that the heroes are demigods?

HERMOGENES: What then?

SOCRATES: All of them sprang either from the love of a God for a mortal woman, or of a mortal man for a Goddess; think of the word in the old Attic, and you will see better that the name heros is only a slight alteration of Eros, from whom the heroes sprang: either this is the meaning, or, if not this, then they must have been skilful as rhetoricians and dialecticians, and able to put the question (erotan), for eirein is equivalent to legein. And therefore, as I was saying, in the Attic dialect the heroes turn out to be rhetoricians and questioners. All this is easy enough; the noble breed of heroes are a tribe of sophists and rhetors. But can you tell me why men are called anthropoi? — that is more difficult.

HERMOGENES: No, I cannot; and I would not try even if I could, because I think that you are the more likely to succeed.

SOCRATES: That is to say, you trust to the inspiration of Euthyphro.

HERMOGENES: Of course.

SOCRATES: Your faith is not vain; for at this very moment a new and ingenious thought strikes me, and, if I am not careful, before to-morrow's dawn I shall be wiser than I ought to be. Now, attend to me; and first, remember that we often put in and pull out letters in words, and give names as we please and change the accents. Take, for example, the word Dii Philos; in order to convert this from a sentence into a noun, we omit one of the iotas and sound the middle syllable grave instead of acute; as, on the other hand, letters are sometimes inserted in words instead of being omitted, and the acute takes the place of the grave.

HERMOGENES: That is true.

SOCRATES: The name anthropos, which was once a sentence, and is now a noun, appears to be a case just of this sort, for one letter,

which is the alpha, has been omitted, and the acute on the last syllable has been changed to a grave.

HERMOGENES: What do you mean?

SOCRATES: I mean to say that the word 'man' implies that other animals never examine, or consider, or look up at what they see, but that man not only sees (opope) but considers and looks up at that which he sees, and hence he alone of all animals is rightly anthropos, meaning anathron a opopen.

HERMOGENES: May I ask you to examine another word about which I am curious?

SOCRATES: Certainly.

HERMOGENES: I will take that which appears to me to follow next in order. You know the distinction of soul and body?

SOCRATES: Of course.

HERMOGENES: Let us endeavour to analyze them like the previous words.

SOCRATES: You want me first of all to examine the natural fitness of the word psuche (soul), and then of the word soma (body)?

HERMOGENES: Yes.

SOCRATES: If I am to say what occurs to me at the moment, I should imagine that those who first used the name psuche meant to express that the soul when in the body is the source of life, and gives the power of breath and revival (anapsuchon), and when this reviving power fails then the body perishes and dies, and this, if I am not mistaken, they called psyche. But please stay a moment; I fancy that I can discover something which will be more acceptable to the disciples of Euthyphro, for I am afraid that they will scorn this explanation. What do you say to another?

HERMOGENES: Let me hear.

SOCRATES: What is that which holds and carries and gives life and motion to the entire nature of the body? What else but the soul?

HERMOGENES: Just that.

SOCRATES: And do you not believe with Anaxagoras, that mind or soul is the ordering and containing principle of all things?

HERMOGENES: Yes; I do.

SOCRATES: Then you may well call that power *phuseche* which carries and holds nature (*e phusin okei, kai ekei*), and this may be refined away into *psuche*.

HERMOGENES: Certainly; and this derivation is, I think, more scientific than the other.

SOCRATES: It is so; but I cannot help laughing, if I am to suppose that this was the true meaning of the name.

HERMOGENES: But what shall we say of the next word?

SOCRATES: You mean *soma* (the body).

HERMOGENES: Yes.

SOCRATES: That may be variously interpreted; and yet more variously if a little permutation is allowed. For some say that the body is the grave (*sema*) of the soul which may be thought to be buried in our present life; or again the index of the soul, because the soul gives indications to (*semainei*) the body; probably the Orphic poets were the inventors of the name, and they were under the impression that the soul is suffering the punishment of sin, and that the body is an enclosure or prison in which the soul is incarcerated, kept safe (*soma, sozetai*), as the name *soma* implies, until the penalty is paid; according to this view, not even a letter of the word need be changed.

HERMOGENES: I think, Socrates, that we have said enough of this class of words. But have we any more explanations of the names of the Gods, like that which you were giving of Zeus? I should like to

know whether any similar principle of correctness is to be applied to them.

SOCRATES: Yes, indeed, Hermogenes; and there is one excellent principle which, as men of sense, we must acknowledge, — that of the Gods we know nothing, either of their natures or of the names which they give themselves; but we are sure that the names by which they call themselves, whatever they may be, are true. And this is the best of all principles; and the next best is to say, as in prayers, that we will call them by any sort or kind of names or patronymics which they like, because we do not know of any other. That also, I think, is a very good custom, and one which I should much wish to observe. Let us, then, if you please, in the first place announce to them that we are not enquiring about them; we do not presume that we are able to do so; but we are enquiring about the meaning of men in giving them these names, — in this there can be small blame.

HERMOGENES: I think, Socrates, that you are quite right, and I would like to do as you say.

SOCRATES: Shall we begin, then, with Hestia, according to custom?

HERMOGENES: Yes, that will be very proper.

SOCRATES: What may we suppose him to have meant who gave the name Hestia?

HERMOGENES: That is another and certainly a most difficult question.

SOCRATES: My dear Hermogenes, the first imposers of names must surely have been considerable persons; they were philosophers, and had a good deal to say.

HERMOGENES: Well, and what of them?

SOCRATES: They are the men to whom I should attribute the imposition of names. Even in foreign names, if you analyze them, a meaning is still discernible. For example, that which we term ousia is by some called esia, and by others again osia. Now that the essence

of things should be called estia, which is akin to the first of these (esia = estia), is rational enough. And there is reason in the Athenians calling that estia which participates in ousia. For in ancient times we too seem to have said esia for ousia, and this you may note to have been the idea of those who appointed that sacrifices should be first offered to estia, which was natural enough if they meant that estia was the essence of things. Those again who read osia seem to have inclined to the opinion of Heracleitus, that all things flow and nothing stands; with them the pushing principle (othoun) is the cause and ruling power of all things, and is therefore rightly called osia. Enough of this, which is all that we who know nothing can affirm. Next in order after Hestia we ought to consider Rhea and Cronos, although the name of Cronos has been already discussed. But I dare say that I am talking great nonsense.

HERMOGENES: Why, Socrates?

SOCRATES: My good friend, I have discovered a hive of wisdom.

HERMOGENES: Of what nature?

SOCRATES: Well, rather ridiculous, and yet plausible.

HERMOGENES: How plausible?

SOCRATES: I fancy to myself Heracleitus repeating wise traditions of antiquity as old as the days of Cronos and Rhea, and of which Homer also spoke.

HERMOGENES: How do you mean?

SOCRATES: Heracleitus is supposed to say that all things are in motion and nothing at rest; he compares them to the stream of a river, and says that you cannot go into the same water twice.

HERMOGENES: That is true.

SOCRATES: Well, then, how can we avoid inferring that he who gave the names of Cronos and Rhea to the ancestors of the Gods, agreed pretty much in the doctrine of Heracleitus? Is the giving of

the names of streams to both of them purely accidental? Compare the line in which Homer, and, as I believe, Hesiod also, tells of

‘Ocean, the origin of Gods, and mother Tethys (Il. — the line is not found in the extant works of Hesiod.).’

And again, Orpheus says, that

‘The fair river of Ocean was the first to marry, and he espoused his sister Tethys, who was his mother’s daughter.’

You see that this is a remarkable coincidence, and all in the direction of Heracleitus.

HERMOGENES: I think that there is something in what you say, Socrates; but I do not understand the meaning of the name Tethys.

SOCRATES: Well, that is almost self-explained, being only the name of a spring, a little disguised; for that which is strained and filtered (diattomenon, ethoumenon) may be likened to a spring, and the name Tethys is made up of these two words.

HERMOGENES: The idea is ingenious, Socrates.

SOCRATES: To be sure. But what comes next? — of Zeus we have spoken.

HERMOGENES: Yes.

SOCRATES: Then let us next take his two brothers, Poseidon and Pluto, whether the latter is called by that or by his other name.

HERMOGENES: By all means.

SOCRATES: Poseidon is Posidesmos, the chain of the feet; the original inventor of the name had been stopped by the watery element in his walks, and not allowed to go on, and therefore he called the ruler of this element Poseidon; the epsilon was probably inserted as an ornament. Yet, perhaps, not so; but the name may have been originally written with a double lamda and not with a sigma, meaning that the God knew many things (Polla eidos). And perhaps

also he being the shaker of the earth, has been named from shaking (seiein), and then pi and delta have been added. Pluto gives wealth (Ploutos), and his name means the giver of wealth, which comes out of the earth beneath. People in general appear to imagine that the term Hades is connected with the invisible (aeides) and so they are led by their fears to call the God Pluto instead.

HERMOGENES: And what is the true derivation?

SOCRATES: In spite of the mistakes which are made about the power of this deity, and the foolish fears which people have of him, such as the fear of always being with him after death, and of the soul denuded of the body going to him (compare Rep.), my belief is that all is quite consistent, and that the office and name of the God really correspond.

HERMOGENES: Why, how is that?

SOCRATES: I will tell you my own opinion; but first, I should like to ask you which chain does any animal feel to be the stronger? and which confines him more to the same spot, — desire or necessity?

HERMOGENES: Desire, Socrates, is stronger far.

SOCRATES: And do you not think that many a one would escape from Hades, if he did not bind those who depart to him by the strongest of chains?

HERMOGENES: Assuredly they would.

SOCRATES: And if by the greatest of chains, then by some desire, as I should certainly infer, and not by necessity?

HERMOGENES: That is clear.

SOCRATES: And there are many desires?

HERMOGENES: Yes.

SOCRATES: And therefore by the greatest desire, if the chain is to be the greatest?

HERMOGENES: Yes.

SOCRATES: And is any desire stronger than the thought that you will be made better by associating with another?

HERMOGENES: Certainly not.

SOCRATES: And is not that the reason, Hermogenes, why no one, who has been to him, is willing to come back to us? Even the Sirens, like all the rest of the world, have been laid under his spells. Such a charm, as I imagine, is the God able to infuse into his words. And, according to this view, he is the perfect and accomplished Sophist, and the great benefactor of the inhabitants of the other world; and even to us who are upon earth he sends from below exceeding blessings. For he has much more than he wants down there; wherefore he is called Pluto (or the rich). Note also, that he will have nothing to do with men while they are in the body, but only when the soul is liberated from the desires and evils of the body. Now there is a great deal of philosophy and reflection in that; for in their liberated state he can bind them with the desire of virtue, but while they are flustered and maddened by the body, not even father Cronos himself would suffice to keep them with him in his own far-famed chains.

HERMOGENES: There is a deal of truth in what you say.

SOCRATES: Yes, Hermogenes, and the legislator called him Hades, not from the unseen (aeides) — far otherwise, but from his knowledge (eidenai) of all noble things.

HERMOGENES: Very good; and what do we say of Demeter, and Here, and Apollo, and Athene, and Hephaestus, and Ares, and the other deities?

SOCRATES: Demeter is e didousa meter, who gives food like a mother; Here is the lovely one (erate) — for Zeus, according to tradition, loved and married her; possibly also the name may have been given when the legislator was thinking of the heavens, and may be only a disguise of the air (aer), putting the end in the place of the beginning. You will recognize the truth of this if you repeat the

letters of Here several times over. People dread the name of Pherephatta as they dread the name of Apollo, — and with as little reason; the fear, if I am not mistaken, only arises from their ignorance of the nature of names. But they go changing the name into Phersephone, and they are terrified at this; whereas the new name means only that the Goddess is wise (sophe); for seeing that all things in the world are in motion (pheromenon), that principle which embraces and touches and is able to follow them, is wisdom. And therefore the Goddess may be truly called Pherepaphe (Pherepapha), or some name like it, because she touches that which is in motion (tou pheromenon ephaptomene), herein showing her wisdom. And Hades, who is wise, consorts with her, because she is wise. They alter her name into Pherephatta now-a-days, because the present generation care for euphony more than truth. There is the other name, Apollo, which, as I was saying, is generally supposed to have some terrible signification. Have you remarked this fact?

HERMOGENES: To be sure I have, and what you say is true.

SOCRATES: But the name, in my opinion, is really most expressive of the power of the God.

HERMOGENES: How so?

SOCRATES: I will endeavour to explain, for I do not believe that any single name could have been better adapted to express the attributes of the God, embracing and in a manner signifying all four of them, — music, and prophecy, and medicine, and archery.

HERMOGENES: That must be a strange name, and I should like to hear the explanation.

SOCRATES: Say rather an harmonious name, as beseems the God of Harmony. In the first place, the purgations and purifications which doctors and diviners use, and their fumigations with drugs magical or medicinal, as well as their washings and lustral sprinklings, have all one and the same object, which is to make a man pure both in body and soul.

HERMOGENES: Very true.

SOCRATES: And is not Apollo the purifier, and the washer, and the absolver from all impurities?

HERMOGENES: Very true.

SOCRATES: Then in reference to his ablutions and absolutions, as being the physician who orders them, he may be rightly called Apolouon (purifier); or in respect of his powers of divination, and his truth and sincerity, which is the same as truth, he may be most fitly called Aplos, from aplous (sincere), as in the Thessalian dialect, for all the Thessalians call him Aplos; also he is aei Ballon (always shooting), because he is a master archer who never misses; or again, the name may refer to his musical attributes, and then, as in akolouthos, and akoitis, and in many other words the alpha is supposed to mean 'together,' so the meaning of the name Apollo will be 'moving together,' whether in the poles of heaven as they are called, or in the harmony of song, which is termed concord, because he moves all together by an harmonious power, as astronomers and musicians ingeniously declare. And he is the God who presides over harmony, and makes all things move together, both among Gods and among men. And as in the words akolouthos and akoitis the alpha is substituted for an omicron, so the name Apollon is equivalent to omopolon; only the second lambda is added in order to avoid the ill-omened sound of destruction (apolon). Now the suspicion of this destructive power still haunts the minds of some who do not consider the true value of the name, which, as I was saying just now, has reference to all the powers of the God, who is the single one, the everdarting, the purifier, the mover together (aplous, aei Ballon, apolouon, omopolon). The name of the Muses and of music would seem to be derived from their making philosophical enquiries (mosthai); and Leto is called by this name, because she is such a gentle Goddess, and so willing (ethelemon) to grant our requests; or her name may be Letho, as she is often called by strangers — they seem to imply by it her amiability, and her smooth and easy-going way of behaving. Artemis is named from her healthy (artemes), well-ordered nature, and because of her love of virginity, perhaps because

she is a proficient in virtue (arete), and perhaps also as hating intercourse of the sexes (ton aroton misesasa). He who gave the Goddess her name may have had any or all of these reasons.

HERMOGENES: What is the meaning of Dionysus and Aphrodite?

SOCRATES: Son of Hipponicus, you ask a solemn question; there is a serious and also a facetious explanation of both these names; the serious explanation is not to be had from me, but there is no objection to your hearing the facetious one; for the Gods too love a joke. Dionusos is simply didous oionon (giver of wine), Didoinusos, as he might be called in fun, — and oinos is properly oionous, because wine makes those who drink, think (oiesthai) that they have a mind (noun) when they have none. The derivation of Aphrodite, born of the foam (aphros), may be fairly accepted on the authority of Hesiod.

HERMOGENES: Still there remains Athene, whom you, Socrates, as an Athenian, will surely not forget; there are also Hephaestus and Ares.

SOCRATES: I am not likely to forget them.

HERMOGENES: No, indeed.

SOCRATES: There is no difficulty in explaining the other appellation of Athene.

HERMOGENES: What other appellation?

SOCRATES: We call her Pallas.

HERMOGENES: To be sure.

SOCRATES: And we cannot be wrong in supposing that this is derived from armed dances. For the elevation of oneself or anything else above the earth, or by the use of the hands, we call shaking (pallein), or dancing.

HERMOGENES: That is quite true.

SOCRATES: Then that is the explanation of the name Pallas?

HERMOGENES: Yes; but what do you say of the other name?

SOCRATES: Athene?

HERMOGENES: Yes.

SOCRATES: That is a graver matter, and there, my friend, the modern interpreters of Homer may, I think, assist in explaining the view of the ancients. For most of these in their explanations of the poet, assert that he meant by Athene ‘mind’ (nous) and ‘intelligence’ (dianoia), and the maker of names appears to have had a singular notion about her; and indeed calls her by a still higher title, ‘divine intelligence’ (Thou noesis), as though he would say: This is she who has the mind of God (Theonoea); — using alpha as a dialectical variety for eta, and taking away iota and sigma (There seems to be some error in the MSS. The meaning is that the word theonoea = theounoea is a curtailed form of theou noesis, but the omitted letters do not agree.). Perhaps, however, the name Theonoe may mean ‘she who knows divine things’ (Theia noousa) better than others. Nor shall we be far wrong in supposing that the author of it wished to identify this Goddess with moral intelligence (en ethei noesin), and therefore gave her the name ethonoe; which, however, either he or his successors have altered into what they thought a nicer form, and called her Athene.

HERMOGENES: But what do you say of Hephaestus?

SOCRATES: Speak you of the princely lord of light (Phaeos istora)?

HERMOGENES: Surely.

SOCRATES: Ephaistos is Phaistos, and has added the eta by attraction; that is obvious to anybody.

HERMOGENES: That is very probable, until some more probable notion gets into your head.

SOCRATES: To prevent that, you had better ask what is the

derivation of Ares.

HERMOGENES: What is Ares?

SOCRATES: Ares may be called, if you will, from his manhood (arren) and manliness, or if you please, from his hard and unchangeable nature, which is the meaning of arratos: the latter is a derivation in every way appropriate to the God of war.

HERMOGENES: Very true.

SOCRATES: And now, by the Gods, let us have no more of the Gods, for I am afraid of them; ask about anything but them, and thou shalt see how the steeds of Euthyphro can prance.

HERMOGENES: Only one more God! I should like to know about Hermes, of whom I am said not to be a true son. Let us make him out, and then I shall know whether there is any meaning in what Cratylus says.

SOCRATES: I should imagine that the name Hermes has to do with speech, and signifies that he is the interpreter (ermeneus), or messenger, or thief, or liar, or bargainer; all that sort of thing has a great deal to do with language; as I was telling you, the word eirein is expressive of the use of speech, and there is an often-recurring Homeric word emesato, which means 'he contrived' — out of these two words, eirein and mesasthai, the legislator formed the name of the God who invented language and speech; and we may imagine him dictating to us the use of this name: 'O my friends,' says he to us, 'seeing that he is the contriver of tales or speeches, you may rightly call him Eirhemes.' And this has been improved by us, as we think, into Hermes. Iris also appears to have been called from the verb 'to tell' (eirein), because she was a messenger.

HERMOGENES: Then I am very sure that Cratylus was quite right in saying that I was no true son of Hermes (Ermogenes), for I am not a good hand at speeches.

SOCRATES: There is also reason, my friend, in Pan being the double-formed son of Hermes.

HERMOGENES: How do you make that out?

SOCRATES: You are aware that speech signifies all things (pan), and is always turning them round and round, and has two forms, true and false?

HERMOGENES: Certainly.

SOCRATES: Is not the truth that is in him the smooth or sacred form which dwells above among the Gods, whereas falsehood dwells among men below, and is rough like the goat of tragedy; for tales and falsehoods have generally to do with the tragic or goatish life, and tragedy is the place of them?

HERMOGENES: Very true.

SOCRATES: Then surely Pan, who is the declarer of all things (pan) and the perpetual mover (aei polon) of all things, is rightly called aipolos (goat-herd), he being the two-formed son of Hermes, smooth in his upper part, and rough and goatlike in his lower regions. And, as the son of Hermes, he is speech or the brother of speech, and that brother should be like brother is no marvel. But, as I was saying, my dear Hermogenes, let us get away from the Gods.

HERMOGENES: From these sort of Gods, by all means, Socrates. But why should we not discuss another kind of Gods — the sun, moon, stars, earth, aether, air, fire, water, the seasons, and the year?

SOCRATES: You impose a great many tasks upon me. Still, if you wish, I will not refuse.

HERMOGENES: You will oblige me.

SOCRATES: How would you have me begin? Shall I take first of all him whom you mentioned first — the sun?

HERMOGENES: Very good.

SOCRATES: The origin of the sun will probably be clearer in the Doric form, for the Dorians call him alios, and this name is given to him because when he rises he gathers (alizoi) men together or

because he is always rolling in his course (aei eilein ion) about the earth; or from aiolein, of which the meaning is the same as poikillein (to variegate), because he variegates the productions of the earth.

HERMOGENES: But what is selene (the moon)?

SOCRATES: That name is rather unfortunate for Anaxagoras.

HERMOGENES: How so?

SOCRATES: The word seems to forestall his recent discovery, that the moon receives her light from the sun.

HERMOGENES: Why do you say so?

SOCRATES: The two words selas (brightness) and phos (light) have much the same meaning?

HERMOGENES: Yes.

SOCRATES: This light about the moon is always new (neon) and always old (enon), if the disciples of Anaxagoras say truly. For the sun in his revolution always adds new light, and there is the old light of the previous month.

HERMOGENES: Very true.

SOCRATES: The moon is not unfrequently called selanaia.

HERMOGENES: True.

SOCRATES: And as she has a light which is always old and always new (enon neon aei) she may very properly have the name selaenoneoaeia; and this when hammered into shape becomes selanaia.

HERMOGENES: A real dithyrambic sort of name that, Socrates. But what do you say of the month and the stars?

SOCRATES: Meis (month) is called from meiousthai (to lessen), because suffering diminution; the name of astra (stars) seems to be derived from astrape, which is an improvement on anastrophe,

signifying the upsetting of the eyes (anastrephein opa).

HERMOGENES: What do you say of pur (fire) and udor (water)?

SOCRATES: I am at a loss how to explain pur; either the muse of Euthyphro has deserted me, or there is some very great difficulty in the word. Please, however, to note the contrivance which I adopt whenever I am in a difficulty of this sort.

HERMOGENES: What is it?

SOCRATES: I will tell you; but I should like to know first whether you can tell me what is the meaning of the pur?

HERMOGENES: Indeed I cannot.

SOCRATES: Shall I tell you what I suspect to be the true explanation of this and several other words? — My belief is that they are of foreign origin. For the Hellenes, especially those who were under the dominion of the barbarians, often borrowed from them.

HERMOGENES: What is the inference?

SOCRATES: Why, you know that any one who seeks to demonstrate the fitness of these names according to the Hellenic language, and not according to the language from which the words are derived, is rather likely to be at fault.

HERMOGENES: Yes, certainly.

SOCRATES: Well then, consider whether this pur is not foreign; for the word is not easily brought into relation with the Hellenic tongue, and the Phrygians may be observed to have the same word slightly changed, just as they have udor (water) and kunes (dogs), and many other words.

HERMOGENES: That is true.

SOCRATES: Any violent interpretations of the words should be avoided; for something to say about them may easily be found. And thus I get rid of pur and udor. Aer (air), Hermogenes, may be

explained as the element which raises (airei) things from the earth, or as ever flowing (aei rei), or because the flux of the air is wind, and the poets call the winds ‘air-blasts,’ (aetai); he who uses the term may mean, so to speak, air-flux (aetorroun), in the sense of wind-flux (pneumatourroun); and because this moving wind may be expressed by either term he employs the word air (aer = aetes rheo). Aither (aether) I should interpret as aeitheer; this may be correctly said, because this element is always running in a flux about the air (aei thei peri tou aera reon). The meaning of the word ge (earth) comes out better when in the form of gaia, for the earth may be truly called ‘mother’ (gaia, genneteira), as in the language of Homer (Od.) gegaasi means gegennesthai.

HERMOGENES: Good.

SOCRATES: What shall we take next?

HERMOGENES: There are orai (the seasons), and the two names of the year, eniautos and etos.

SOCRATES: The orai should be spelt in the old Attic way, if you desire to know the probable truth about them; they are rightly called the orai because they divide (orizousin) the summers and winters and winds and the fruits of the earth. The words eniautos and etos appear to be the same,— ‘that which brings to light the plants and growths of the earth in their turn, and passes them in review within itself (en eauto exetazei)’; this is broken up into two words, eniautos from en eauto, and etos from etazei, just as the original name of Zeus was divided into Zena and Dia; and the whole proposition means that his power of reviewing from within is one, but has two names, two words etos and eniautos being thus formed out of a single proposition.

HERMOGENES: Indeed, Socrates, you make surprising progress.

SOCRATES: I am run away with.

HERMOGENES: Very true.

SOCRATES: But am not yet at my utmost speed.

HERMOGENES: I should like very much to know, in the next place, how you would explain the virtues. What principle of correctness is there in those charming words — wisdom, understanding, justice, and the rest of them?

SOCRATES: That is a tremendous class of names which you are disinterring; still, as I have put on the lion's skin, I must not be faint of heart; and I suppose that I must consider the meaning of wisdom (phronesis) and understanding (sunesis), and judgment (gnome), and knowledge (episteme), and all those other charming words, as you call them?

HERMOGENES: Surely, we must not leave off until we find out their meaning.

SOCRATES: By the dog of Egypt I have a not bad notion which came into my head only this moment: I believe that the primeval givers of names were undoubtedly like too many of our modern philosophers, who, in their search after the nature of things, are always getting dizzy from constantly going round and round, and then they imagine that the world is going round and round and moving in all directions; and this appearance, which arises out of their own internal condition, they suppose to be a reality of nature; they think that there is nothing stable or permanent, but only flux and motion, and that the world is always full of every sort of motion and change. The consideration of the names which I mentioned has led me into making this reflection.

HERMOGENES: How is that, Socrates?

SOCRATES: Perhaps you did not observe that in the names which have been just cited, the motion or flux or generation of things is most surely indicated.

HERMOGENES: No, indeed, I never thought of it.

SOCRATES: Take the first of those which you mentioned; clearly that is a name indicative of motion.

HERMOGENES: What was the name?

SOCRATES: Phronesis (wisdom), which may signify phoras kai rhou noesis (perception of motion and flux), or perhaps phoras onesis (the blessing of motion), but is at any rate connected with pheresthai (motion); gnome (judgment), again, certainly implies the ponderation or consideration (nomesis) of generation, for to ponder is the same as to consider; or, if you would rather, here is noesis, the very word just now mentioned, which is neou esis (the desire of the new); the word neos implies that the world is always in process of creation. The giver of the name wanted to express this longing of the soul, for the original name was neoesis, and not noesis; but eta took the place of a double epsilon. The word sophrosune is the salvation (soteria) of that wisdom (phronesis) which we were just now considering. Epiteme (knowledge) is akin to this, and indicates that the soul which is good for anything follows (epetai) the motion of things, neither anticipating them nor falling behind them; wherefore the word should rather be read as epistemene, inserting epsilon nu. Sunesis (understanding) may be regarded in like manner as a kind of conclusion; the word is derived from sunienai (to go along with), and, like epistasthai (to know), implies the progression of the soul in company with the nature of things. Sophia (wisdom) is very dark, and appears not to be of native growth; the meaning is, touching the motion or stream of things. You must remember that the poets, when they speak of the commencement of any rapid motion, often use the word esuthe (he rushed); and there was a famous Lacedaemonian who was named Sous (Rush), for by this word the Lacedaemonians signify rapid motion, and the touching (epaphe) of motion is expressed by sophia, for all things are supposed to be in motion. Good (agathon) is the name which is given to the admirable (agasto) in nature; for, although all things move, still there are degrees of motion; some are swifter, some slower; but there are some things which are admirable for their swiftness, and this admirable part of nature is called agathon. Dikaiosune (justice) is clearly dikaiou sunesis (understanding of the just); but the actual word dikaion is more difficult: men are only agreed to a certain extent about justice, and then they begin to disagree. For those who suppose all things to be in motion conceive the greater part of nature to be a mere receptacle; and they say that there is a penetrating power which

passes through all this, and is the instrument of creation in all, and is the subtlest and swiftest element; for if it were not the subtlest, and a power which none can keep out, and also the swiftest, passing by other things as if they were standing still, it could not penetrate through the moving universe. And this element, which superintends all things and pierces (diaion) all, is rightly called dikaion; the letter k is only added for the sake of euphony. Thus far, as I was saying, there is a general agreement about the nature of justice; but I, Hermogenes, being an enthusiastic disciple, have been told in a mystery that the justice of which I am speaking is also the cause of the world: now a cause is that because of which anything is created; and some one comes and whispers in my ear that justice is rightly so called because partaking of the nature of the cause, and I begin, after hearing what he has said, to interrogate him gently: 'Well, my excellent friend,' say I, 'but if all this be true, I still want to know what is justice.' Thereupon they think that I ask tiresome questions, and am leaping over the barriers, and have been already sufficiently answered, and they try to satisfy me with one derivation after another, and at length they quarrel. For one of them says that justice is the sun, and that he only is the piercing (diaionta) and burning (kaonta) element which is the guardian of nature. And when I joyfully repeat this beautiful notion, I am answered by the satirical remark, 'What, is there no justice in the world when the sun is down?' And when I earnestly beg my questioner to tell me his own honest opinion, he says, 'Fire in the abstract'; but this is not very intelligible. Another says, 'No, not fire in the abstract, but the abstraction of heat in the fire.' Another man professes to laugh at all this, and says, as Anaxagoras says, that justice is mind, for mind, as they say, has absolute power, and mixes with nothing, and orders all things, and passes through all things. At last, my friend, I find myself in far greater perplexity about the nature of justice than I was before I began to learn. But still I am of opinion that the name, which has led me into this digression, was given to justice for the reasons which I have mentioned.

HERMOGENES: I think, Socrates, that you are not improvising now; you must have heard this from some one else.

SOCRATES: And not the rest?

HERMOGENES: Hardly.

SOCRATES: Well, then, let me go on in the hope of making you believe in the originality of the rest. What remains after justice? I do not think that we have as yet discussed courage (*andreia*), — injustice (*adikia*), which is obviously nothing more than a hindrance to the penetrating principle (*diaiontos*), need not be considered. Well, then, the name of *andreia* seems to imply a battle; — this battle is in the world of existence, and according to the doctrine of flux is only the counterflux (*enantia rhon*): if you extract the *delta* from *andreia*, the name at once signifies the thing, and you may clearly understand that *andreia* is not the stream opposed to every stream, but only to that which is contrary to justice, for otherwise courage would not have been praised. The words *arren* (male) and *aner* (man) also contain a similar allusion to the same principle of the upward flux (*te ano rhon*). *Gune* (woman) I suspect to be the same word as *goun* (birth): *thelu* (female) appears to be partly derived from *thele* (the teat), because the teat is like rain, and makes things flourish (*tethelenai*).

HERMOGENES: That is surely probable.

SOCRATES: Yes; and the very word *thallein* (to flourish) seems to figure the growth of youth, which is swift and sudden ever. And this is expressed by the legislator in the name, which is a compound of *thein* (running), and *allesthai* (leaping). Pray observe how I gallop away when I get on smooth ground. There are a good many names generally thought to be of importance, which have still to be explained.

HERMOGENES: True.

SOCRATES: There is the meaning of the word *techne* (art), for example.

HERMOGENES: Very true.

SOCRATES: That may be identified with *echonoe*, and expresses the

possession of mind: you have only to take away the tau and insert two omichrons, one between the chi and nu, and another between the nu and eta.

HERMOGENES: That is a very shabby etymology.

SOCRATES: Yes, my dear friend; but then you know that the original names have been long ago buried and disguised by people sticking on and stripping off letters for the sake of euphony, and twisting and bedizening them in all sorts of ways: and time too may have had a share in the change. Take, for example, the word katoptron; why is the letter rho inserted? This must surely be the addition of some one who cares nothing about the truth, but thinks only of putting the mouth into shape. And the additions are often such that at last no human being can possibly make out the original meaning of the word. Another example is the word sphigx, sphiggos, which ought properly to be phigx, phiggos, and there are other examples.

HERMOGENES: That is quite true, Socrates.

SOCRATES: And yet, if you are permitted to put in and pull out any letters which you please, names will be too easily made, and any name may be adapted to any object.

HERMOGENES: True.

SOCRATES: Yes, that is true. And therefore a wise dictator, like yourself, should observe the laws of moderation and probability.

HERMOGENES: Such is my desire.

SOCRATES: And mine, too, Hermogenes. But do not be too much of a precisian, or 'you will unnerve me of my strength (Iliad.).' When you have allowed me to add mechane (contrivance) to techne (art) I shall be at the top of my bent, for I conceive mechane to be a sign of great accomplishment — anein; for mekos has the meaning of greatness, and these two, mekos and anein, make up the word mechane. But, as I was saying, being now at the top of my bent, I should like to consider the meaning of the two words arete (virtue)

and kakia (vice); arete I do not as yet understand, but kakia is transparent, and agrees with the principles which preceded, for all things being in a flux (ionton), kakia is kakos ion (going badly); and this evil motion when existing in the soul has the general name of kakia, or vice, specially appropriated to it. The meaning of kakos ienai may be further illustrated by the use of deilia (cowardice), which ought to have come after andreia, but was forgotten, and, as I fear, is not the only word which has been passed over. Deilia signifies that the soul is bound with a strong chain (desmos), for lian means strength, and therefore deilia expresses the greatest and strongest bond of the soul; and aporia (difficulty) is an evil of the same nature (from a (alpha) not, and poreuesthai to go), like anything else which is an impediment to motion and movement. Then the word kakia appears to mean kakos ienai, or going badly, or limping and halting; of which the consequence is, that the soul becomes filled with vice. And if kakia is the name of this sort of thing, arete will be the opposite of it, signifying in the first place ease of motion, then that the stream of the good soul is unimpeded, and has therefore the attribute of ever flowing without let or hindrance, and is therefore called arete, or, more correctly, aeireite (ever-flowing), and may perhaps have had another form, airete (eligible), indicating that nothing is more eligible than virtue, and this has been hammered into arete. I daresay that you will deem this to be another invention of mine, but I think that if the previous word kakia was right, then arete is also right.

HERMOGENES: But what is the meaning of kakon, which has played so great a part in your previous discourse?

SOCRATES: That is a very singular word about which I can hardly form an opinion, and therefore I must have recourse to my ingenious device.

HERMOGENES: What device?

SOCRATES: The device of a foreign origin, which I shall give to this word also.

HERMOGENES: Very likely you are right; but suppose that we leave these words and endeavour to see the rationale of kalon and aischron.

SOCRATES: The meaning of aischron is evident, being only aei ischon roes (always preventing from flowing), and this is in accordance with our former derivations. For the name-giver was a great enemy to stagnation of all sorts, and hence he gave the name aischoroun to that which hindered the flux (aei ischon roun), and that is now beaten together into aischron.

HERMOGENES: But what do you say of kalon?

SOCRATES: That is more obscure; yet the form is only due to the quantity, and has been changed by altering omicron upsilon into omicron.

HERMOGENES: What do you mean?

SOCRATES: This name appears to denote mind.

HERMOGENES: How so?

SOCRATES: Let me ask you what is the cause why anything has a name; is not the principle which imposes the name the cause?

HERMOGENES: Certainly.

SOCRATES: And must not this be the mind of Gods, or of men, or of both?

HERMOGENES: Yes.

SOCRATES: Is not mind that which called (kalesan) things by their names, and is not mind the beautiful (kalon)?

HERMOGENES: That is evident.

SOCRATES: And are not the works of intelligence and mind worthy of praise, and are not other works worthy of blame?

HERMOGENES: Certainly.

SOCRATES: Physic does the work of a physician, and carpentering does the works of a carpenter?

HERMOGENES: Exactly.

SOCRATES: And the principle of beauty does the works of beauty?

HERMOGENES: Of course.

SOCRATES: And that principle we affirm to be mind?

HERMOGENES: Very true.

SOCRATES: Then mind is rightly called beauty because she does the works which we recognize and speak of as the beautiful?

HERMOGENES: That is evident.

SOCRATES: What more names remain to us?

HERMOGENES: There are the words which are connected with agathon and kalon, such as sumpheron and lusiteloun, ophelimon, kerdaleon, and their opposites.

SOCRATES: The meaning of sumpheron (expedient) I think that you may discover for yourself by the light of the previous examples, — for it is a sister word to episteme, meaning just the motion (pora) of the soul accompanying the world, and things which are done upon this principle are called sumphora or sumpheronta, because they are carried round with the world.

HERMOGENES: That is probable.

SOCRATES: Again, cherdaleon (gainful) is called from cherdos (gain), but you must alter the delta into nu if you want to get at the meaning; for this word also signifies good, but in another way; he who gave the name intended to express the power of admixture (kerannumenon) and universal penetration in the good; in forming the word, however, he inserted a delta instead of a nu, and so made kerdos.

HERMOGENES: Well, but what is lusiteloun (profitable)?

SOCRATES: I suppose, Hermogenes, that people do not mean by the profitable the gainful or that which pays (luei) the retailer, but they use the word in the sense of swift. You regard the profitable (lusiteloun), as that which being the swiftest thing in existence, allows of no stay in things and no pause or end of motion, but always, if there begins to be any end, lets things go again (luei), and makes motion immortal and unceasing: and in this point of view, as appears to me, the good is happily denominated lusiteloun — being that which looses (luon) the end (telos) of motion. Ophelimon (the advantageous) is derived from ophellein, meaning that which creates and increases; this latter is a common Homeric word, and has a foreign character.

HERMOGENES: And what do you say of their opposites?

SOCRATES: Of such as are mere negatives I hardly think that I need speak.

HERMOGENES: Which are they?

SOCRATES: The words axumphoron (inexpedient), anopheles (unprofitable), alusiteles (unadvantageous), akерdes (ungainful).

HERMOGENES: True.

SOCRATES: I would rather take the words blaberon (harmful), zemiodes (hurtful).

HERMOGENES: Good.

SOCRATES: The word blaberon is that which is said to hinder or harm (blaptein) the stream (roun); blapton is boulomenon aptein (seeking to hold or bind); for aptein is the same as dein, and dein is always a term of censure; boulomenon aptein roun (wanting to bind the stream) would properly be boulapteroun, and this, as I imagine, is improved into blaberon.

HERMOGENES: You bring out curious results, Socrates, in the use

of names; and when I hear the word *boulapteroun* I cannot help imagining that you are making your mouth into a flute, and puffing away at some prelude to *Athene*.

SOCRATES: That is the fault of the makers of the name, *Hermogenes*; not mine.

HERMOGENES: Very true; but what is the derivation of *zemiodes*?

SOCRATES: What is the meaning of *zemiodes*? — let me remark, *Hermogenes*, how right I was in saying that great changes are made in the meaning of words by putting in and pulling out letters; even a very slight permutation will sometimes give an entirely opposite sense; I may instance the word *deon*, which occurs to me at the moment, and reminds me of what I was going to say to you, that the fine fashionable language of modern times has twisted and disguised and entirely altered the original meaning both of *deon*, and also of *zemiodes*, which in the old language is clearly indicated.

HERMOGENES: What do you mean?

SOCRATES: I will try to explain. You are aware that our forefathers loved the sounds *iota* and *delta*, especially the women, who are most conservative of the ancient language, but now they change *iota* into *eta* or *epsilon*, and *delta* into *zeta*; this is supposed to increase the grandeur of the sound.

HERMOGENES: How do you mean?

SOCRATES: For example, in very ancient times they called the day either *imera* or *emera* (short *e*), which is called by us *emera* (long *e*).

HERMOGENES: That is true.

SOCRATES: Do you observe that only the ancient form shows the intention of the giver of the name? of which the reason is, that men long for (*imeirousi*) and love the light which comes after the darkness, and is therefore called *imera*, from *imeros*, desire.

HERMOGENES: Clearly.

SOCRATES: But now the name is so travestied that you cannot tell the meaning, although there are some who imagine the day to be called emera because it makes things gentle (emera different accents).

HERMOGENES: Such is my view.

SOCRATES: And do you know that the ancients said duogon and not zugon?

HERMOGENES: They did so.

SOCRATES: And zugon (yoke) has no meaning, — it ought to be duogon, which word expresses the binding of two together (duein agoge) for the purpose of drawing; — this has been changed into zugon, and there are many other examples of similar changes.

HERMOGENES: There are.

SOCRATES: Proceeding in the same train of thought I may remark that the word deon (obligation) has a meaning which is the opposite of all the other appellations of good; for deon is here a species of good, and is, nevertheless, the chain (desmos) or hinderer of motion, and therefore own brother of blaberon.

HERMOGENES: Yes, Socrates; that is quite plain.

SOCRATES: Not if you restore the ancient form, which is more likely to be the correct one, and read dion instead of deon; if you convert the epsilon into an iota after the old fashion, this word will then agree with other words meaning good; for dion, not deon, signifies the good, and is a term of praise; and the author of names has not contradicted himself, but in all these various appellations, deon (obligatory), ophelimon (advantageous), lusiteloun (profitable), kerdaleon (gainful), agathon (good), sumpheron (expedient), euporon (plenteous), the same conception is implied of the ordering or all-pervading principle which is praised, and the restraining and binding principle which is censured. And this is further illustrated by the word zemiodes (hurtful), which if the zeta is only changed into delta as in the ancient language, becomes demiodes; and this name, as you

will perceive, is given to that which binds motion (dounti ion).

HERMOGENES: What do you say of edone (pleasure), lupe (pain), epithumia (desire), and the like, Socrates?

SOCRATES: I do not think, Hermogenes, that there is any great difficulty about them — edone is e (eta) onesis, the action which tends to advantage; and the original form may be supposed to have been eone, but this has been altered by the insertion of the delta. Lupe appears to be derived from the relaxation (luein) which the body feels when in sorrow; ania (trouble) is the hindrance of motion (alpha and ienai); algedon (distress), if I am not mistaken, is a foreign word, which is derived from aleinos (grievous); odune (grief) is called from the putting on (endusis) sorrow; in achthodon (vexation) ‘the word too labours,’ as any one may see; chara (joy) is the very expression of the fluency and diffusion of the soul (cheo); terpsis (delight) is so called from the pleasure creeping (erpon) through the soul, which may be likened to a breath (pnoe) and is properly erpnoun, but has been altered by time into terpnon; euphrosune (cheerfulness) and epithumia explain themselves; the former, which ought to be euphrosune and has been changed euphrosune, is named, as every one may see, from the soul moving (pheresthai) in harmony with nature; epithumia is really e epi ton thumon iousa dunamis, the power which enters into the soul; thumos (passion) is called from the rushing (thuseos) and boiling of the soul; imeros (desire) denotes the stream (rous) which most draws the soul dia ten esin tes roes — because flowing with desire (iemenos), and expresses a longing after things and violent attraction of the soul to them, and is termed imeros from possessing this power; pothos (longing) is expressive of the desire of that which is not present but absent, and in another place (pou); this is the reason why the name pothos is applied to things absent, as imeros is to things present; eros (love) is so called because flowing in (esron) from without; the stream is not inherent, but is an influence introduced through the eyes, and from flowing in was called esros (influx) in the old time when they used omicron for omega, and is called eros, now that omega is substituted for omicron. But why do you not give me

another word?

HERMOGENES: What do you think of doxa (opinion), and that class of words?

SOCRATES: Doxa is either derived from dioxis (pursuit), and expresses the march of the soul in the pursuit of knowledge, or from the shooting of a bow (toxon); the latter is more likely, and is confirmed by oiesis (thinking), which is only oisis (moving), and implies the movement of the soul to the essential nature of each thing — just as boule (counsel) has to do with shooting (bole); and boulesthai (to wish) combines the notion of aiming and deliberating — all these words seem to follow doxa, and all involve the idea of shooting, just as aboulia, absence of counsel, on the other hand, is a mishap, or missing, or mistaking of the mark, or aim, or proposal, or object.

HERMOGENES: You are quickening your pace now, Socrates.

SOCRATES: Why yes, the end I now dedicate to God, not, however, until I have explained anagke (necessity), which ought to come next, and ekousion (the voluntary). Ekousion is certainly the yielding (eikon) and unresisting — the notion implied is yielding and not opposing, yielding, as I was just now saying, to that motion which is in accordance with our will; but the necessary and resistant being contrary to our will, implies error and ignorance; the idea is taken from walking through a ravine which is impassable, and rugged, and overgrown, and impedes motion — and this is the derivation of the word anagkaion (necessary) an agke ion, going through a ravine. But while my strength lasts let us persevere, and I hope that you will persevere with your questions.

HERMOGENES: Well, then, let me ask about the greatest and noblest, such as aletheia (truth) and pseudos (falsehood) and on (being), not forgetting to enquire why the word onoma (name), which is the theme of our discussion, has this name of onoma.

SOCRATES: You know the word maiesthai (to seek)?

HERMOGENES: Yes; — meaning the same as zetein (to enquire).

SOCRATES: The word onoma seems to be a compressed sentence, signifying on ou zetema (being for which there is a search); as is still more obvious in onomaston (notable), which states in so many words that real existence is that for which there is a seeking (on ou masma); aletheia is also an agglomeration of theia ale (divine wandering), implying the divine motion of existence; pseudos (falsehood) is the opposite of motion; here is another ill name given by the legislator to stagnation and forced inaction, which he compares to sleep (eudein); but the original meaning of the word is disguised by the addition of psi; on and ousia are ion with an iota broken off; this agrees with the true principle, for being (on) is also moving (ion), and the same may be said of not being, which is likewise called not going (oukion or ouki on = ouk ion).

HERMOGENES: You have hammered away at them manfully; but suppose that some one were to say to you, what is the word ion, and what are reon and down? — show me their fitness.

SOCRATES: You mean to say, how should I answer him?

HERMOGENES: Yes.

SOCRATES: One way of giving the appearance of an answer has been already suggested.

HERMOGENES: What way?

SOCRATES: To say that names which we do not understand are of foreign origin; and this is very likely the right answer, and something of this kind may be true of them; but also the original forms of words may have been lost in the lapse of ages; names have been so twisted in all manner of ways, that I should not be surprised if the old language when compared with that now in use would appear to us to be a barbarous tongue.

HERMOGENES: Very likely.

SOCRATES: Yes, very likely. But still the enquiry demands our

earnest attention and we must not flinch. For we should remember, that if a person go on analysing names into words, and enquiring also into the elements out of which the words are formed, and keeps on always repeating this process, he who has to answer him must at last give up the enquiry in despair.

HERMOGENES: Very true.

SOCRATES: And at what point ought he to lose heart and give up the enquiry? Must he not stop when he comes to the names which are the elements of all other names and sentences; for these cannot be supposed to be made up of other names? The word *agathon* (good), for example, is, as we were saying, a compound of *agastos* (admirable) and *thoos* (swift). And probably *thoos* is made up of other elements, and these again of others. But if we take a word which is incapable of further resolution, then we shall be right in saying that we have at last reached a primary element, which need not be resolved any further.

HERMOGENES: I believe you to be in the right.

SOCRATES: And suppose the names about which you are now asking should turn out to be primary elements, must not their truth or law be examined according to some new method?

HERMOGENES: Very likely.

SOCRATES: Quite so, Hermogenes; all that has preceded would lead to this conclusion. And if, as I think, the conclusion is true, then I shall again say to you, come and help me, that I may not fall into some absurdity in stating the principle of primary names.

HERMOGENES: Let me hear, and I will do my best to assist you.

SOCRATES: I think that you will acknowledge with me, that one principle is applicable to all names, primary as well as secondary — when they are regarded simply as names, there is no difference in them.

HERMOGENES: Certainly not.

SOCRATES: All the names that we have been explaining were intended to indicate the nature of things.

HERMOGENES: Of course.

SOCRATES: And that this is true of the primary quite as much as of the secondary names, is implied in their being names.

HERMOGENES: Surely.

SOCRATES: But the secondary, as I conceive, derive their significance from the primary.

HERMOGENES: That is evident.

SOCRATES: Very good; but then how do the primary names which precede analysis show the natures of things, as far as they can be shown; which they must do, if they are to be real names? And here I will ask you a question: Suppose that we had no voice or tongue, and wanted to communicate with one another, should we not, like the deaf and dumb, make signs with the hands and head and the rest of the body?

HERMOGENES: There would be no choice, Socrates.

SOCRATES: We should imitate the nature of the thing; the elevation of our hands to heaven would mean lightness and upwardness; heaviness and downwardness would be expressed by letting them drop to the ground; if we were describing the running of a horse, or any other animal, we should make our bodies and their gestures as like as we could to them.

HERMOGENES: I do not see that we could do anything else.

SOCRATES: We could not; for by bodily imitation only can the body ever express anything.

HERMOGENES: Very true.

SOCRATES: And when we want to express ourselves, either with the voice, or tongue, or mouth, the expression is simply their

imitation of that which we want to express.

HERMOGENES: It must be so, I think.

SOCRATES: Then a name is a vocal imitation of that which the vocal imitator names or imitates?

HERMOGENES: I think so.

SOCRATES: Nay, my friend, I am disposed to think that we have not reached the truth as yet.

HERMOGENES: Why not?

SOCRATES: Because if we have we shall be obliged to admit that the people who imitate sheep, or cocks, or other animals, name that which they imitate.

HERMOGENES: Quite true.

SOCRATES: Then could I have been right in what I was saying?

HERMOGENES: In my opinion, no. But I wish that you would tell me, Socrates, what sort of an imitation is a name?

SOCRATES: In the first place, I should reply, not a musical imitation, although that is also vocal; nor, again, an imitation of what music imitates; these, in my judgment, would not be naming. Let me put the matter as follows: All objects have sound and figure, and many have colour?

HERMOGENES: Certainly.

SOCRATES: But the art of naming appears not to be concerned with imitations of this kind; the arts which have to do with them are music and drawing?

HERMOGENES: True.

SOCRATES: Again, is there not an essence of each thing, just as there is a colour, or sound? And is there not an essence of colour and sound as well as of anything else which may be said to have an essence?

HERMOGENES: I should think so.

SOCRATES: Well, and if any one could express the essence of each thing in letters and syllables, would he not express the nature of each thing?

HERMOGENES: Quite so.

SOCRATES: The musician and the painter were the two names which you gave to the two other imitators. What will this imitator be called?

HERMOGENES: I imagine, Socrates, that he must be the namer, or name-giver, of whom we are in search.

SOCRATES: If this is true, then I think that we are in a condition to consider the names *ron* (stream), *ienai* (to go), *schesis* (retention), about which you were asking; and we may see whether the namer has grasped the nature of them in letters and syllables in such a manner as to imitate the essence or not.

HERMOGENES: Very good.

SOCRATES: But are these the only primary names, or are there others?

HERMOGENES: There must be others.

SOCRATES: So I should expect. But how shall we further analyse them, and where does the imitator begin? Imitation of the essence is made by syllables and letters; ought we not, therefore, first to separate the letters, just as those who are beginning rhythm first distinguish the powers of elementary, and then of compound sounds, and when they have done so, but not before, they proceed to the consideration of rhythms?

HERMOGENES: Yes.

SOCRATES: Must we not begin in the same way with letters; first separating the vowels, and then the consonants and mutes (letters which are neither vowels nor semivowels), into classes, according to the received distinctions of the learned; also the semivowels, which are neither vowels, nor yet mutes; and distinguishing into classes the vowels themselves? And when we have perfected the classification of things, we shall give them names, and see whether, as in the case of letters, there are any classes to which they may be all referred (cf. *Phaedrus*); and hence we shall see their natures, and see, too, whether they have in them classes as there are in the letters; and when we have well considered all this, we shall know how to apply them to what they resemble — whether one letter is used to denote one thing, or whether there is to be an admixture of several of them; just, as in painting, the painter who wants to depict anything sometimes uses purple only, or any other colour, and sometimes mixes up several colours, as his method is when he has to paint flesh colour or anything of that kind — he uses his colours as his figures appear to require them; and so, too, we shall apply letters to the expression of objects, either single letters when required, or several letters; and so we shall form syllables, as they are called, and from syllables make nouns and verbs; and thus, at last, from the combinations of nouns and verbs arrive at language, large and fair and whole; and as the painter made a figure, even so shall we make speech by the art of the namer or the rhetorician, or by some other art. Not that I am literally speaking of ourselves, but I was carried away — meaning to say that this was the way in which (not we but) the ancients formed language, and what they put together we must take to pieces in like manner, if we are to attain a scientific view of the whole subject, and we must see whether the primary, and also whether the secondary elements are rightly given or not, for if they are not, the composition of them, my dear Hermogenes, will be a sorry piece of work, and in the wrong direction.

HERMOGENES: That, Socrates, I can quite believe.

SOCRATES: Well, but do you suppose that you will be able to

analyse them in this way? for I am certain that I should not.

HERMOGENES: Much less am I likely to be able.

SOCRATES: Shall we leave them, then? or shall we seek to discover, if we can, something about them, according to the measure of our ability, saying by way of preface, as I said before of the Gods, that of the truth about them we know nothing, and do but entertain human notions of them. And in this present enquiry, let us say to ourselves, before we proceed, that the higher method is the one which we or others who would analyse language to any good purpose must follow; but under the circumstances, as men say, we must do as well as we can. What do you think?

HERMOGENES: I very much approve.

SOCRATES: That objects should be imitated in letters and syllables, and so find expression, may appear ridiculous, Hermogenes, but it cannot be avoided — there is no better principle to which we can look for the truth of first names. Deprived of this, we must have recourse to divine help, like the tragic poets, who in any perplexity have their gods waiting in the air; and must get out of our difficulty in like fashion, by saying that ‘the Gods gave the first names, and therefore they are right.’ This will be the best contrivance, or perhaps that other notion may be even better still, of deriving them from some barbarous people, for the barbarians are older than we are; or we may say that antiquity has cast a veil over them, which is the same sort of excuse as the last; for all these are not reasons but only ingenious excuses for having no reasons concerning the truth of words. And yet any sort of ignorance of first or primitive names involves an ignorance of secondary words; for they can only be explained by the primary. Clearly then the professor of languages should be able to give a very lucid explanation of first names, or let him be assured he will only talk nonsense about the rest. Do you not suppose this to be true?

HERMOGENES: Certainly, Socrates.

SOCRATES: My first notions of original names are truly wild and

ridiculous, though I have no objection to impart them to you if you desire, and I hope that you will communicate to me in return anything better which you may have.

HERMOGENES: Fear not; I will do my best.

SOCRATES: In the first place, the letter rho appears to me to be the general instrument expressing all motion (kinesis). But I have not yet explained the meaning of this latter word, which is just *iesis* (going); for the letter eta was not in use among the ancients, who only employed epsilon; and the root is *kiein*, which is a foreign form, the same as *ienai*. And the old word *kinesis* will be correctly given as *iesis* in corresponding modern letters. Assuming this foreign root *kiein*, and allowing for the change of the eta and the insertion of the nu, we have *kinesis*, which should have been *kieinsis* or *eisis*; and *stasis* is the negative of *ienai* (or *eisis*), and has been improved into *stasis*. Now the letter rho, as I was saying, appeared to the imposer of names an excellent instrument for the expression of motion; and he frequently uses the letter for this purpose: for example, in the actual words *rein* and *roe* he represents motion by rho; also in the words *tromos* (trembling), *trachus* (rugged); and again, in words such as *krouein* (strike), *thrauein* (crush), *ereikein* (bruise), *thruptein* (break), *kermatixein* (crumble), *rumbein* (whirl): of all these sorts of movements he generally finds an expression in the letter R, because, as I imagine, he had observed that the tongue was most agitated and least at rest in the pronunciation of this letter, which he therefore used in order to express motion, just as by the letter iota he expresses the subtle elements which pass through all things. This is why he uses the letter iota as imitative of motion, *ienai*, *iesthai*. And there is another class of letters, phi, psi, sigma, and xi, of which the pronunciation is accompanied by great expenditure of breath; these are used in the imitation of such notions as *psuchron* (shivering), *xeon* (seething), *seiesthai*, (to be shaken), *seismos* (shock), and are always introduced by the giver of names when he wants to imitate what is phusodes (windy). He seems to have thought that the closing and pressure of the tongue in the utterance of delta and tau was expressive of binding and rest in a place: he further observed the

liquid movement of lambda, in the pronunciation of which the tongue slips, and in this he found the expression of smoothness, as in leios (level), and in the word oliothanein (to slip) itself, liparon (sleek), in the word kollodes (gluey), and the like: the heavier sound of gamma detained the slipping tongue, and the union of the two gave the notion of a glutinous clammy nature, as in glischros, glukus, gloiodes. The nu he observed to be sounded from within, and therefore to have a notion of inwardness; hence he introduced the sound in endos and entos: alpha he assigned to the expression of size, and nu of length, because they are great letters: omicron was the sign of roundness, and therefore there is plenty of omicron mixed up in the word goggulon (round). Thus did the legislator, reducing all things into letters and syllables, and impressing on them names and signs, and out of them by imitation compounding other signs. That is my view, Hermogenes, of the truth of names; but I should like to hear what Cratylus has more to say.

HERMOGENES: But, Socrates, as I was telling you before, Cratylus mystifies me; he says that there is a fitness of names, but he never explains what is this fitness, so that I cannot tell whether his obscurity is intended or not. Tell me now, Cratylus, here in the presence of Socrates, do you agree in what Socrates has been saying about names, or have you something better of your own? and if you have, tell me what your view is, and then you will either learn of Socrates, or Socrates and I will learn of you.

CRATYLUS: Well, but surely, Hermogenes, you do not suppose that you can learn, or I explain, any subject of importance all in a moment; at any rate, not such a subject as language, which is, perhaps, the very greatest of all.

HERMOGENES: No, indeed; but, as Hesiod says, and I agree with him, 'to add little to little' is worth while. And, therefore, if you think that you can add anything at all, however small, to our knowledge, take a little trouble and oblige Socrates, and me too, who certainly have a claim upon you.

SOCRATES: I am by no means positive, Cratylus, in the view which

Hermogenes and myself have worked out; and therefore do not hesitate to say what you think, which if it be better than my own view I shall gladly accept. And I should not be at all surprized to find that you have found some better notion. For you have evidently reflected on these matters and have had teachers, and if you have really a better theory of the truth of names, you may count me in the number of your disciples.

CRATYLUS: You are right, Socrates, in saying that I have made a study of these matters, and I might possibly convert you into a disciple. But I fear that the opposite is more probable, and I already find myself moved to say to you what Achilles in the 'Prayers' says to Ajax, —

'Illustrious Ajax, son of Telamon, lord of the people, You appear to have spoken in all things much to my mind.'

And you, Socrates, appear to me to be an oracle, and to give answers much to my mind, whether you are inspired by Euthyphro, or whether some Muse may have long been an inhabitant of your breast, unconsciously to yourself.

SOCRATES: Excellent Cratylus, I have long been wondering at my own wisdom; I cannot trust myself. And I think that I ought to stop and ask myself What am I saying? for there is nothing worse than self-deception — when the deceiver is always at home and always with you — it is quite terrible, and therefore I ought often to retrace my steps and endeavour to 'look fore and aft,' in the words of the aforesaid Homer. And now let me see; where are we? Have we not been saying that the correct name indicates the nature of the thing: — has this proposition been sufficiently proven?

CRATYLUS: Yes, Socrates, what you say, as I am disposed to think, is quite true.

SOCRATES: Names, then, are given in order to instruct?

CRATYLUS: Certainly.

SOCRATES: And naming is an art, and has artificers?

CRATYLUS: Yes.

SOCRATES: And who are they?

CRATYLUS: The legislators, of whom you spoke at first.

SOCRATES: And does this art grow up among men like other arts? Let me explain what I mean: of painters, some are better and some worse?

CRATYLUS: Yes.

SOCRATES: The better painters execute their works, I mean their figures, better, and the worse execute them worse; and of builders also, the better sort build fairer houses, and the worse build them worse.

CRATYLUS: True.

SOCRATES: And among legislators, there are some who do their work better and some worse?

CRATYLUS: No; there I do not agree with you.

SOCRATES: Then you do not think that some laws are better and others worse?

CRATYLUS: No, indeed.

SOCRATES: Or that one name is better than another?

CRATYLUS: Certainly not.

SOCRATES: Then all names are rightly imposed?

CRATYLUS: Yes, if they are names at all.

SOCRATES: Well, what do you say to the name of our friend Hermogenes, which was mentioned before: — assuming that he has nothing of the nature of Hermes in him, shall we say that this is a wrong name, or not his name at all?

CRATYLUS: I should reply that Hermogenes is not his name at all,

but only appears to be his, and is really the name of somebody else, who has the nature which corresponds to it.

SOCRATES: And if a man were to call him Hermogenes, would he not be even speaking falsely? For there may be a doubt whether you can call him Hermogenes, if he is not.

CRATYLUS: What do you mean?

SOCRATES: Are you maintaining that falsehood is impossible? For if this is your meaning I should answer, that there have been plenty of liars in all ages.

CRATYLUS: Why, Socrates, how can a man say that which is not? — say something and yet say nothing? For is not falsehood saying the thing which is not?

SOCRATES: Your argument, friend, is too subtle for a man of my age. But I should like to know whether you are one of those philosophers who think that falsehood may be spoken but not said?

CRATYLUS: Neither spoken nor said.

SOCRATES: Nor uttered nor addressed? For example: If a person, saluting you in a foreign country, were to take your hand and say: 'Hail, Athenian stranger, Hermogenes, son of Smicrion' — these words, whether spoken, said, uttered, or addressed, would have no application to you but only to our friend Hermogenes, or perhaps to nobody at all?

CRATYLUS: In my opinion, Socrates, the speaker would only be talking nonsense.

SOCRATES: Well, but that will be quite enough for me, if you will tell me whether the nonsense would be true or false, or partly true and partly false: — which is all that I want to know.

CRATYLUS: I should say that he would be putting himself in motion to no purpose; and that his words would be an unmeaning sound like the noise of hammering at a brazen pot.

SOCRATES: But let us see, Cratylus, whether we cannot find a meeting-point, for you would admit that the name is not the same with the thing named?

CRATYLUS: I should.

SOCRATES: And would you further acknowledge that the name is an imitation of the thing?

CRATYLUS: Certainly.

SOCRATES: And you would say that pictures are also imitations of things, but in another way?

CRATYLUS: Yes.

SOCRATES: I believe you may be right, but I do not rightly understand you. Please to say, then, whether both sorts of imitation (I mean both pictures or words) are not equally attributable and applicable to the things of which they are the imitation.

CRATYLUS: They are.

SOCRATES: First look at the matter thus: you may attribute the likeness of the man to the man, and of the woman to the woman; and so on?

CRATYLUS: Certainly.

SOCRATES: And conversely you may attribute the likeness of the man to the woman, and of the woman to the man?

CRATYLUS: Very true.

SOCRATES: And are both modes of assigning them right, or only the first?

CRATYLUS: Only the first.

SOCRATES: That is to say, the mode of assignment which attributes to each that which belongs to them and is like them?

CRATYLUS: That is my view.

SOCRATES: Now then, as I am desirous that we being friends should have a good understanding about the argument, let me state my view to you: the first mode of assignment, whether applied to figures or to names, I call right, and when applied to names only, true as well as right; and the other mode of giving and assigning the name which is unlike, I call wrong, and in the case of names, false as well as wrong.

CRATYLUS: That may be true, Socrates, in the case of pictures; they may be wrongly assigned; but not in the case of names — they must be always right.

SOCRATES: Why, what is the difference? May I not go to a man and say to him, ‘This is your picture,’ showing him his own likeness, or perhaps the likeness of a woman; and when I say ‘show,’ I mean bring before the sense of sight.

CRATYLUS: Certainly.

SOCRATES: And may I not go to him again, and say, ‘This is your name’? — for the name, like the picture, is an imitation. May I not say to him— ‘This is your name’? and may I not then bring to his sense of hearing the imitation of himself, when I say, ‘This is a man’; or of a female of the human species, when I say, ‘This is a woman,’ as the case may be? Is not all that quite possible?

CRATYLUS: I would fain agree with you, Socrates; and therefore I say, Granted.

SOCRATES: That is very good of you, if I am right, which need hardly be disputed at present. But if I can assign names as well as pictures to objects, the right assignment of them we may call truth, and the wrong assignment of them falsehood. Now if there be such a wrong assignment of names, there may also be a wrong or inappropriate assignment of verbs; and if of names and verbs then of the sentences, which are made up of them. What do you say, Cratylus?

CRATYLUS: I agree; and think that what you say is very true.

SOCRATES: And further, primitive nouns may be compared to pictures, and in pictures you may either give all the appropriate colours and figures, or you may not give them all — some may be wanting; or there may be too many or too much of them — may there not?

CRATYLUS: Very true.

SOCRATES: And he who gives all gives a perfect picture or figure; and he who takes away or adds also gives a picture or figure, but not a good one.

CRATYLUS: Yes.

SOCRATES: In like manner, he who by syllables and letters imitates the nature of things, if he gives all that is appropriate will produce a good image, or in other words a name; but if he subtracts or perhaps adds a little, he will make an image but not a good one; whence I infer that some names are well and others ill made.

CRATYLUS: That is true.

SOCRATES: Then the artist of names may be sometimes good, or he may be bad?

CRATYLUS: Yes.

SOCRATES: And this artist of names is called the legislator?

CRATYLUS: Yes.

SOCRATES: Then like other artists the legislator may be good or he may be bad; it must surely be so if our former admissions hold good?

CRATYLUS: Very true, Socrates; but the case of language, you see, is different; for when by the help of grammar we assign the letters alpha or beta, or any other letters to a certain name, then, if we add, or subtract, or misplace a letter, the name which is written is not only written wrongly, but not written at all; and in any of these cases

becomes other than a name.

SOCRATES: But I doubt whether your view is altogether correct, Cratylus.

CRATYLUS: How so?

SOCRATES: I believe that what you say may be true about numbers, which must be just what they are, or not be at all; for example, the number ten at once becomes other than ten if a unit be added or subtracted, and so of any other number: but this does not apply to that which is qualitative or to anything which is represented under an image. I should say rather that the image, if expressing in every point the entire reality, would no longer be an image. Let us suppose the existence of two objects: one of them shall be Cratylus, and the other the image of Cratylus; and we will suppose, further, that some God makes not only a representation such as a painter would make of your outward form and colour, but also creates an inward organization like yours, having the same warmth and softness; and into this infuses motion, and soul, and mind, such as you have, and in a word copies all your qualities, and places them by you in another form; would you say that this was Cratylus and the image of Cratylus, or that there were two Cratyluses?

CRATYLUS: I should say that there were two Cratyluses.

SOCRATES: Then you see, my friend, that we must find some other principle of truth in images, and also in names; and not insist that an image is no longer an image when something is added or subtracted. Do you not perceive that images are very far from having qualities which are the exact counterpart of the realities which they represent?

CRATYLUS: Yes, I see.

SOCRATES: But then how ridiculous would be the effect of names on things, if they were exactly the same with them! For they would be the doubles of them, and no one would be able to determine which were the names and which were the realities.

CRATYLUS: Quite true.

SOCRATES: Then fear not, but have the courage to admit that one name may be correctly and another incorrectly given; and do not insist that the name shall be exactly the same with the thing; but allow the occasional substitution of a wrong letter, and if of a letter also of a noun in a sentence, and if of a noun in a sentence also of a sentence which is not appropriate to the matter, and acknowledge that the thing may be named, and described, so long as the general character of the thing which you are describing is retained; and this, as you will remember, was remarked by Hermogenes and myself in the particular instance of the names of the letters.

CRATYLUS: Yes, I remember.

SOCRATES: Good; and when the general character is preserved, even if some of the proper letters are wanting, still the thing is signified; — well, if all the letters are given; not well, when only a few of them are given. I think that we had better admit this, lest we be punished like travellers in Aegina who wander about the street late at night: and be likewise told by truth herself that we have arrived too late; or if not, you must find out some new notion of correctness of names, and no longer maintain that a name is the expression of a thing in letters or syllables; for if you say both, you will be inconsistent with yourself.

CRATYLUS: I quite acknowledge, Socrates, what you say to be very reasonable.

SOCRATES: Then as we are agreed thus far, let us ask ourselves whether a name rightly imposed ought not to have the proper letters.

CRATYLUS: Yes.

SOCRATES: And the proper letters are those which are like the things?

CRATYLUS: Yes.

SOCRATES: Enough then of names which are rightly given. And in names which are incorrectly given, the greater part may be supposed to be made up of proper and similar letters, or there would be no

likeness; but there will be likewise a part which is improper and spoils the beauty and formation of the word: you would admit that?

CRATYLUS: There would be no use, Socrates, in my quarrelling with you, since I cannot be satisfied that a name which is incorrectly given is a name at all.

SOCRATES: Do you admit a name to be the representation of a thing?

CRATYLUS: Yes, I do.

SOCRATES: But do you not allow that some nouns are primitive, and some derived?

CRATYLUS: Yes, I do.

SOCRATES: Then if you admit that primitive or first nouns are representations of things, is there any better way of framing representations than by assimilating them to the objects as much as you can; or do you prefer the notion of Hermogenes and of many others, who say that names are conventional, and have a meaning to those who have agreed about them, and who have previous knowledge of the things intended by them, and that convention is the only principle; and whether you abide by our present convention, or make a new and opposite one, according to which you call small great and great small — that, they would say, makes no difference, if you are only agreed. Which of these two notions do you prefer?

CRATYLUS: Representation by likeness, Socrates, is infinitely better than representation by any chance sign.

SOCRATES: Very good: but if the name is to be like the thing, the letters out of which the first names are composed must also be like things. Returning to the image of the picture, I would ask, How could any one ever compose a picture which would be like anything at all, if there were not pigments in nature which resembled the things imitated, and out of which the picture is composed?

CRATYLUS: Impossible.

SOCRATES: No more could names ever resemble any actually existing thing, unless the original elements of which they are compounded bore some degree of resemblance to the objects of which the names are the imitation: And the original elements are letters?

CRATYLUS: Yes.

SOCRATES: Let me now invite you to consider what Hermogenes and I were saying about sounds. Do you agree with me that the letter rho is expressive of rapidity, motion, and hardness? Were we right or wrong in saying so?

CRATYLUS: I should say that you were right.

SOCRATES: And that lamda was expressive of smoothness, and softness, and the like?

CRATYLUS: There again you were right.

SOCRATES: And yet, as you are aware, that which is called by us sklerotes, is by the Eretrians called skleroter.

CRATYLUS: Very true.

SOCRATES: But are the letters rho and sigma equivalents; and is there the same significance to them in the termination rho, which there is to us in sigma, or is there no significance to one of us?

CRATYLUS: Nay, surely there is a significance to both of us.

SOCRATES: In as far as they are like, or in as far as they are unlike?

CRATYLUS: In as far as they are like.

SOCRATES: Are they altogether alike?

CRATYLUS: Yes; for the purpose of expressing motion.

SOCRATES: And what do you say of the insertion of the lamda? for that is expressive not of hardness but of softness.

CRATYLUS: Why, perhaps the letter lamda is wrongly inserted, Socrates, and should be altered into rho, as you were saying to Hermogenes and in my opinion rightly, when you spoke of adding and subtracting letters upon occasion.

SOCRATES: Good. But still the word is intelligible to both of us; when I say skleros (hard), you know what I mean.

CRATYLUS: Yes, my dear friend, and the explanation of that is custom.

SOCRATES: And what is custom but convention? I utter a sound which I understand, and you know that I understand the meaning of the sound: this is what you are saying?

CRATYLUS: Yes.

SOCRATES: And if when I speak you know my meaning, there is an indication given by me to you?

CRATYLUS: Yes.

SOCRATES: This indication of my meaning may proceed from unlike as well as from like, for example in the lamda of sklerotes. But if this is true, then you have made a convention with yourself, and the correctness of a name turns out to be convention, since letters which are unlike are indicative equally with those which are like, if they are sanctioned by custom and convention. And even supposing that you distinguish custom from convention ever so much, still you must say that the signification of words is given by custom and not by likeness, for custom may indicate by the unlike as well as by the like. But as we are agreed thus far, Cratylus (for I shall assume that your silence gives consent), then custom and convention must be supposed to contribute to the indication of our thoughts; for suppose we take the instance of number, how can you ever imagine, my good friend, that you will find names resembling every individual number, unless you allow that which you term convention and agreement to have authority in determining the correctness of names? I quite agree with you that words should as far as possible resemble things; but I

fear that this dragging in of resemblance, as Hermogenes says, is a shabby thing, which has to be supplemented by the mechanical aid of convention with a view to correctness; for I believe that if we could always, or almost always, use likenesses, which are perfectly appropriate, this would be the most perfect state of language; as the opposite is the most imperfect. But let me ask you, what is the force of names, and what is the use of them?

CRATYLUS: The use of names, Socrates, as I should imagine, is to inform: the simple truth is, that he who knows names knows also the things which are expressed by them.

SOCRATES: I suppose you mean to say, Cratylus, that as the name is, so also is the thing; and that he who knows the one will also know the other, because they are similars, and all similars fall under the same art or science; and therefore you would say that he who knows names will also know things.

CRATYLUS: That is precisely what I mean.

SOCRATES: But let us consider what is the nature of this information about things which, according to you, is given us by names. Is it the best sort of information? or is there any other? What do you say?

CRATYLUS: I believe that to be both the only and the best sort of information about them; there can be no other.

SOCRATES: But do you believe that in the discovery of them, he who discovers the names discovers also the things; or is this only the method of instruction, and is there some other method of enquiry and discovery.

CRATYLUS: I certainly believe that the methods of enquiry and discovery are of the same nature as instruction.

SOCRATES: Well, but do you not see, Cratylus, that he who follows names in the search after things, and analyses their meaning, is in great danger of being deceived?

CRATYLUS: How so?

SOCRATES: Why clearly he who first gave names gave them according to his conception of the things which they signified — did he not?

CRATYLUS: True.

SOCRATES: And if his conception was erroneous, and he gave names according to his conception, in what position shall we who are his followers find ourselves? Shall we not be deceived by him?

CRATYLUS: But, Socrates, am I not right in thinking that he must surely have known; or else, as I was saying, his names would not be names at all? And you have a clear proof that he has not missed the truth, and the proof is — that he is perfectly consistent. Did you ever observe in speaking that all the words which you utter have a common character and purpose?

SOCRATES: But that, friend Cratylus, is no answer. For if he did begin in error, he may have forced the remainder into agreement with the original error and with himself; there would be nothing strange in this, any more than in geometrical diagrams, which have often a slight and invisible flaw in the first part of the process, and are consistently mistaken in the long deductions which follow. And this is the reason why every man should expend his chief thought and attention on the consideration of his first principles: — are they or are they not rightly laid down? and when he has duly sifted them, all the rest will follow. Now I should be astonished to find that names are really consistent. And here let us revert to our former discussion: Were we not saying that all things are in motion and progress and flux, and that this idea of motion is expressed by names? Do you not conceive that to be the meaning of them?

CRATYLUS: Yes; that is assuredly their meaning, and the true meaning.

SOCRATES: Let us revert to episteme (knowledge) and observe how ambiguous this word is, seeming rather to signify stopping the soul at

things than going round with them; and therefore we should leave the beginning as at present, and not reject the epsilon, but make an insertion of an iota instead of an epsilon (not *pioteme*, but *epiisteme*). Take another example: *bebaion* (sure) is clearly the expression of station and position, and not of motion. Again, the word *istoria* (enquiry) bears upon the face of it the stopping (*istanai*) of the stream; and the word *piston* (faithful) certainly indicates cessation of motion; then, again, *mneme* (memory), as any one may see, expresses rest in the soul, and not motion. Moreover, words such as *amartia* and *sumphora*, which have a bad sense, viewed in the light of their etymologies will be the same as *sunesis* and *episteme* and other words which have a good sense (compare *omartein*, *sunienai*, *epesthai*, *sumpheresthai*); and much the same may be said of *amathia* and *akolasia*, for *amathia* may be explained as *e ama theo iontos poreia*, and *akolasia* as *e akolouthia tois pragmasin*. Thus the names which in these instances we find to have the worst sense, will turn out to be framed on the same principle as those which have the best. And any one I believe who would take the trouble might find many other examples in which the giver of names indicates, not that things are in motion or progress, but that they are at rest; which is the opposite of motion.

CRATYLUS: Yes, Socrates, but observe; the greater number express motion.

SOCRATES: What of that, Cratylus? Are we to count them like votes? and is correctness of names the voice of the majority? Are we to say of whichever sort there are most, those are the true ones?

CRATYLUS: No; that is not reasonable.

SOCRATES: Certainly not. But let us have done with this question and proceed to another, about which I should like to know whether you think with me. Were we not lately acknowledging that the first givers of names in states, both Hellenic and barbarous, were the legislators, and that the art which gave names was the art of the legislator?

CRATYLUS: Quite true.

SOCRATES: Tell me, then, did the first legislators, who were the givers of the first names, know or not know the things which they named?

CRATYLUS: They must have known, Socrates.

SOCRATES: Why, yes, friend Cratylus, they could hardly have been ignorant.

CRATYLUS: I should say not.

SOCRATES: Let us return to the point from which we digressed. You were saying, if you remember, that he who gave names must have known the things which he named; are you still of that opinion?

CRATYLUS: I am.

SOCRATES: And would you say that the giver of the first names had also a knowledge of the things which he named?

CRATYLUS: I should.

SOCRATES: But how could he have learned or discovered things from names if the primitive names were not yet given? For, if we are correct in our view, the only way of learning and discovering things, is either to discover names for ourselves or to learn them from others.

CRATYLUS: I think that there is a good deal in what you say, Socrates.

SOCRATES: But if things are only to be known through names, how can we suppose that the givers of names had knowledge, or were legislators before there were names at all, and therefore before they could have known them?

CRATYLUS: I believe, Socrates, the true account of the matter to be, that a power more than human gave things their first names, and that the names which are thus given are necessarily their true names.

SOCRATES: Then how came the giver of the names, if he was an inspired being or God, to contradict himself? For were we not saying just now that he made some names expressive of rest and others of motion? Were we mistaken?

CRATYLUS: But I suppose one of the two not to be names at all.

SOCRATES: And which, then, did he make, my good friend; those which are expressive of rest, or those which are expressive of motion? This is a point which, as I said before, cannot be determined by counting them.

CRATYLUS: No; not in that way, Socrates.

SOCRATES: But if this is a battle of names, some of them asserting that they are like the truth, others contending that THEY are, how or by what criterion are we to decide between them? For there are no other names to which appeal can be made, but obviously recourse must be had to another standard which, without employing names, will make clear which of the two are right; and this must be a standard which shows the truth of things.

CRATYLUS: I agree.

SOCRATES: But if that is true, Cratylus, then I suppose that things may be known without names?

CRATYLUS: Clearly.

SOCRATES: But how would you expect to know them? What other way can there be of knowing them, except the true and natural way, through their affinities, when they are akin to each other, and through themselves? For that which is other and different from them must signify something other and different from them.

CRATYLUS: What you are saying is, I think, true.

SOCRATES: Well, but reflect; have we not several times acknowledged that names rightly given are the likenesses and images of the things which they name?

CRATYLUS: Yes.

SOCRATES: Let us suppose that to any extent you please you can learn things through the medium of names, and suppose also that you can learn them from the things themselves — which is likely to be the nobler and clearer way; to learn of the image, whether the image and the truth of which the image is the expression have been rightly conceived, or to learn of the truth whether the truth and the image of it have been duly executed?

CRATYLUS: I should say that we must learn of the truth.

SOCRATES: How real existence is to be studied or discovered is, I suspect, beyond you and me. But we may admit so much, that the knowledge of things is not to be derived from names. No; they must be studied and investigated in themselves.

CRATYLUS: Clearly, Socrates.

SOCRATES: There is another point. I should not like us to be imposed upon by the appearance of such a multitude of names, all tending in the same direction. I myself do not deny that the givers of names did really give them under the idea that all things were in motion and flux; which was their sincere but, I think, mistaken opinion. And having fallen into a kind of whirlpool themselves, they are carried round, and want to drag us in after them. There is a matter, master Cratylus, about which I often dream, and should like to ask your opinion: Tell me, whether there is or is not any absolute beauty or good, or any other absolute existence?

CRATYLUS: Certainly, Socrates, I think so.

SOCRATES: Then let us seek the true beauty: not asking whether a face is fair, or anything of that sort, for all such things appear to be in a flux; but let us ask whether the true beauty is not always beautiful.

CRATYLUS: Certainly.

SOCRATES: And can we rightly speak of a beauty which is always passing away, and is first this and then that; must not the same thing

be born and retire and vanish while the word is in our mouths?

CRATYLUS: Undoubtedly.

SOCRATES: Then how can that be a real thing which is never in the same state? for obviously things which are the same cannot change while they remain the same; and if they are always the same and in the same state, and never depart from their original form, they can never change or be moved.

CRATYLUS: Certainly they cannot.

SOCRATES: Nor yet can they be known by any one; for at the moment that the observer approaches, then they become other and of another nature, so that you cannot get any further in knowing their nature or state, for you cannot know that which has no state.

CRATYLUS: True.

SOCRATES: Nor can we reasonably say, Cratylus, that there is knowledge at all, if everything is in a state of transition and there is nothing abiding; for knowledge too cannot continue to be knowledge unless continuing always to abide and exist. But if the very nature of knowledge changes, at the time when the change occurs there will be no knowledge; and if the transition is always going on, there will always be no knowledge, and, according to this view, there will be no one to know and nothing to be known: but if that which knows and that which is known exists ever, and the beautiful and the good and every other thing also exist, then I do not think that they can resemble a process or flux, as we were just now supposing. Whether there is this eternal nature in things, or whether the truth is what Heracleitus and his followers and many others say, is a question hard to determine; and no man of sense will like to put himself or the education of his mind in the power of names: neither will he so far trust names or the givers of names as to be confident in any knowledge which condemns himself and other existences to an unhealthy state of unreality; he will not believe that all things leak like a pot, or imagine that the world is a man who has a running at the nose. This may be true, Cratylus, but is also very likely to be

untrue; and therefore I would not have you be too easily persuaded of it. Reflect well and like a man, and do not easily accept such a doctrine; for you are young and of an age to learn. And when you have found the truth, come and tell me.

CRATYLUS: I will do as you say, though I can assure you, Socrates, that I have been considering the matter already, and the result of a great deal of trouble and consideration is that I incline to Heracleitus.

SOCRATES: Then, another day, my friend, when you come back, you shall give me a lesson; but at present, go into the country, as you are intending, and Hermogenes shall set you on your way.

CRATYLUS: Very good, Socrates; I hope, however, that you will continue to think about these things yourself.

EUTHYDEMUS

Translated by Benjamin Jowett

Written circa 380 BC, this dialogue satirises the Sophists, a type of teacher in Ancient Greece specialising in using philosophy and rhetoric for the purpose of teaching young statesmen. The main purpose of the dialogue is to contrast Socratic argumentation and education with those of Sophism, to the detriment of the latter.

The Parthenon, Athens

INTRODUCTION.

The *Euthydemus*, though apt to be regarded by us only as an elaborate jest, has also a very serious purpose. It may fairly claim to be the oldest treatise on logic; for that science originates in the misunderstandings which necessarily accompany the first efforts of speculation. Several of the fallacies which are satirized in it reappear in the *Sophistici Elenchi* of Aristotle and are retained at the end of our manuals of logic. But if the order of history were followed, they should be placed not at the end but at the beginning of them; for they belong to the age in which the human mind was first making the attempt to distinguish thought from sense, and to separate the universal from the particular or individual. How to put together words or ideas, how to escape ambiguities in the meaning of terms or in the structure of propositions, how to resist the fixed impression of an 'eternal being' or 'perpetual flux,' how to distinguish between words and things — these were problems not easy of solution in the infancy of philosophy. They presented the same kind of difficulty to the half-educated man which spelling or arithmetic do to the mind of a child. It was long before the new world of ideas which had been sought after with such passionate yearning was set in order and made ready for use. To us the fallacies which arise in the pre-Socratic philosophy are trivial and obsolete because we are no longer liable to fall into the errors which are expressed by them. The intellectual world has become better assured to us, and we are less likely to be imposed upon by illusions of words.

The logic of Aristotle is for the most part latent in the dialogues of Plato. The nature of definition is explained not by rules but by examples in the *Charmides*, *Lysis*, *Laches*, *Protagoras*, *Meno*, *Euthyphro*, *Theaetetus*, *Gorgias*, *Republic*; the nature of division is likewise illustrated by examples in the *Sophist* and *Statesman*; a scheme of categories is found in the *Philebus*; the true doctrine of contradiction is taught, and the fallacy of arguing in a circle is exposed in the *Republic*; the nature of synthesis and analysis is graphically described in the *Phaedrus*; the nature of words is analysed in the *Cratylus*; the form of the syllogism is indicated in the

genealogical trees of the Sophist and Statesman; a true doctrine of predication and an analysis of the sentence are given in the Sophist; the different meanings of one and being are worked out in the Parmenides. Here we have most of the important elements of logic, not yet systematized or reduced to an art or science, but scattered up and down as they would naturally occur in ordinary discourse. They are of little or no use or significance to us; but because we have grown out of the need of them we should not therefore despise them. They are still interesting and instructive for the light which they shed on the history of the human mind.

There are indeed many old fallacies which linger among us, and new ones are constantly springing up. But they are not of the kind to which ancient logic can be usefully applied. The weapons of common sense, not the analytics of Aristotle, are needed for their overthrow. Nor is the use of the Aristotelian logic any longer natural to us. We no longer put arguments into the form of syllogisms like the schoolmen; the simple use of language has been, happily, restored to us. Neither do we discuss the nature of the proposition, nor extract hidden truths from the copula, nor dispute any longer about nominalism and realism. We do not confuse the form with the matter of knowledge, or invent laws of thought, or imagine that any single science furnishes a principle of reasoning to all the rest. Neither do we require categories or heads of argument to be invented for our use. Those who have no knowledge of logic, like some of our great physical philosophers, seem to be quite as good reasoners as those who have. Most of the ancient puzzles have been settled on the basis of usage and common sense; there is no need to reopen them. No science should raise problems or invent forms of thought which add nothing to knowledge and are of no use in assisting the acquisition of it. This seems to be the natural limit of logic and metaphysics; if they give us a more comprehensive or a more definite view of the different spheres of knowledge they are to be studied; if not, not. The better part of ancient logic appears hardly in our own day to have a separate existence; it is absorbed in two other sciences: (1) rhetoric, if indeed this ancient art be not also fading away into literary criticism; (2) the science of language, under which all questions relating to words and propositions and the combinations of

them may properly be included.

To continue dead or imaginary sciences, which make no signs of progress and have no definite sphere, tends to interfere with the prosecution of living ones. The study of them is apt to blind the judgment and to render men incapable of seeing the value of evidence, and even of appreciating the nature of truth. Nor should we allow the living science to become confused with the dead by an ambiguity of language. The term logic has two different meanings, an ancient and a modern one, and we vainly try to bridge the gulf between them. Many perplexities are avoided by keeping them apart. There might certainly be a new science of logic; it would not however be built up out of the fragments of the old, but would be distinct from them — relative to the state of knowledge which exists at the present time, and based chiefly on the methods of Modern Inductive philosophy. Such a science might have two legitimate fields: first, the refutation and explanation of false philosophies still hovering in the air as they appear from the point of view of later experience or are comprehended in the history of the human mind, as in a larger horizon: secondly, it might furnish new forms of thought more adequate to the expression of all the diversities and oppositions of knowledge which have grown up in these latter days; it might also suggest new methods of enquiry derived from the comparison of the sciences. Few will deny that the introduction of the words ‘subject’ and ‘object’ and the Hegelian reconciliation of opposites have been ‘most gracious aids’ to psychology, or that the methods of Bacon and Mill have shed a light far and wide on the realms of knowledge. These two great studies, the one destructive and corrective of error, the other conservative and constructive of truth, might be a first and second part of logic. Ancient logic would be the propaedeutic or gate of approach to logical science, — nothing more. But to pursue such speculations further, though not irrelevant, might lead us too far away from the argument of the dialogue.

The Euthydemus is, of all the Dialogues of Plato, that in which he approaches most nearly to the comic poet. The mirth is broader, the irony more sustained, the contrast between Socrates and the two Sophists, although veiled, penetrates deeper than in any other of his writings. Even Thrasyarchus, in the Republic, is at last pacified, and

becomes a friendly and interested auditor of the great discourse. But in the Euthydemus the mask is never dropped; the accustomed irony of Socrates continues to the end...

Socrates narrates to Crito a remarkable scene in which he has himself taken part, and in which the two brothers, Dionysodorus and Euthydemus, are the chief performers. They are natives of Chios, who had settled at Thurii, but were driven out, and in former days had been known at Athens as professors of rhetoric and of the art of fighting in armour. To this they have now added a new accomplishment — the art of Eristic, or fighting with words, which they are likewise willing to teach ‘for a consideration.’ But they can also teach virtue in a very short time and in the very best manner. Socrates, who is always on the look-out for teachers of virtue, is interested in the youth Cleinias, the grandson of the great Alcibiades, and is desirous that he should have the benefit of their instructions. He is ready to fall down and worship them; although the greatness of their professions does arouse in his mind a temporary incredulity.

A circle gathers round them, in the midst of which are Socrates, the two brothers, the youth Cleinias, who is watched by the eager eyes of his lover Ctesippus, and others. The performance begins; and such a performance as might well seem to require an invocation of Memory and the Muses. It is agreed that the brothers shall question Cleinias. ‘Cleinias,’ says Euthydemus, ‘who learn, the wise or the unwise?’ ‘The wise,’ is the reply; given with blushing and hesitation. ‘And yet when you learned you did not know and were not wise.’ Then Dionysodorus takes up the ball: ‘Who are they who learn dictation of the grammar-master; the wise or the foolish boys?’ ‘The wise.’ ‘Then, after all, the wise learn.’ ‘And do they learn,’ said Euthydemus, ‘what they know or what they do not know?’ ‘The latter.’ ‘And dictation is a dictation of letters?’ ‘Yes.’ ‘And you know letters?’ ‘Yes.’ ‘Then you learn what you know.’ ‘But,’ retorts Dionysodorus, ‘is not learning acquiring knowledge?’ ‘Yes.’ ‘And you acquire that which you have not got already?’ ‘Yes.’ ‘Then you learn that which you do not know.’

Socrates is afraid that the youth Cleinias may be discouraged at these repeated overthrows. He therefore explains to him the nature of the process to which he is being subjected. The two strangers are not

serious; there are jests at the mysteries which precede the enthronement, and he is being initiated into the mysteries of the sophistical ritual. This is all a sort of horse-play, which is now ended. The exhortation to virtue will follow, and Socrates himself (if the wise men will not laugh at him) is desirous of showing the way in which such an exhortation should be carried on, according to his own poor notion. He proceeds to question Cleinias. The result of the investigation may be summed up as follows: —

All men desire good; and good means the possession of goods, such as wealth, health, beauty, birth, power, honour; not forgetting the virtues and wisdom. And yet in this enumeration the greatest good of all is omitted. What is that? Good fortune. But what need is there of good fortune when we have wisdom already: — in every art and business are not the wise also the fortunate? This is admitted. And again, the possession of goods is not enough; there must also be a right use of them which can only be given by knowledge: in themselves they are neither good nor evil — knowledge and wisdom are the only good, and ignorance and folly the only evil. The conclusion is that we must get ‘wisdom.’ But can wisdom be taught? ‘Yes,’ says Cleinias. The ingenuousness of the youth delights Socrates, who is at once relieved from the necessity of discussing one of his great puzzles. ‘Since wisdom is the only good, he must become a philosopher, or lover of wisdom.’ ‘That I will,’ says Cleinias.

After Socrates has given this specimen of his own mode of instruction, the two brothers recommence their exhortation to virtue, which is of quite another sort.

‘You want Cleinias to be wise?’ ‘Yes.’ ‘And he is not wise yet?’ ‘No.’ ‘Then you want him to be what he is not, and not to be what he is? — not to be — that is, to perish. Pretty lovers and friends you must all be!’

Here Ctesippus, the lover of Cleinias, interposes in great excitement, thinking that he will teach the two Sophists a lesson of good manners. But he is quickly entangled in the meshes of their sophistry; and as a storm seems to be gathering Socrates pacifies him with a joke, and Ctesippus then says that he is not reviling the two Sophists, he is only contradicting them. ‘But,’ says Dionysodorus,

‘there is no such thing as contradiction. When you and I describe the same thing, or you describe one thing and I describe another, how can there be a contradiction?’ Ctesippus is unable to reply.

Socrates has already heard of the denial of contradiction, and would like to be informed by the great master of the art, ‘What is the meaning of this paradox? Is there no such thing as error, ignorance, falsehood? Then what are they professing to teach?’ The two Sophists complain that Socrates is ready to answer what they said a year ago, but is ‘non-plussed’ at what they are saying now. ‘What does the word “non-plussed” mean?’ Socrates is informed, in reply, that words are lifeless things, and lifeless things have no sense or meaning. Ctesippus again breaks out, and again has to be pacified by Socrates, who renews the conversation with Cleinias. The two Sophists are like Proteus in the variety of their transformations, and he, like Menelaus in the *Odyssey*, hopes to restore them to their natural form.

He had arrived at the conclusion that Cleinias must become a philosopher. And philosophy is the possession of knowledge; and knowledge must be of a kind which is profitable and may be used. What knowledge is there which has such a nature? Not the knowledge which is required in any particular art; nor again the art of the composer of speeches, who knows how to write them, but cannot speak them, although he too must be admitted to be a kind of enchanter of wild animals. Neither is the knowledge which we are seeking the knowledge of the general. For the general makes over his prey to the statesman, as the huntsman does to the cook, or the taker of quails to the keeper of quails; he has not the use of that which he acquires. The two enquirers, Cleinias and Socrates, are described as wandering about in a wilderness, vainly searching after the art of life and happiness. At last they fix upon the kingly art, as having the desired sort of knowledge. But the kingly art only gives men those goods which are neither good nor evil: and if we say further that it makes us wise, in what does it make us wise? Not in special arts, such as cobbling or carpentering, but only in itself: or say again that it makes us good, there is no answer to the question, ‘good in what?’ At length in despair Cleinias and Socrates turn to the ‘Dioscuri’ and request their aid.

Euthydemus argues that Socrates knows something; and as he cannot know and not know, he cannot know some things and not know others, and therefore he knows all things: he and Dionysodorus and all other men know all things. 'Do they know shoemaking, etc?' 'Yes.' The sceptical Ctesippus would like to have some evidence of this extraordinary statement: he will believe if Euthydemus will tell him how many teeth Dionysodorus has, and if Dionysodorus will give him a like piece of information about Euthydemus. Even Socrates is incredulous, and indulges in a little raillery at the expense of the brothers. But he restrains himself, remembering that if the men who are to be his teachers think him stupid they will take no pains with him. Another fallacy is produced which turns on the absoluteness of the verb 'to know.' And here Dionysodorus is caught 'napping,' and is induced by Socrates to confess that 'he does not know the good to be unjust.' Socrates appeals to his brother Euthydemus; at the same time he acknowledges that he cannot, like Heracles, fight against a Hydra, and even Heracles, on the approach of a second monster, called upon his nephew Iolaus to help. Dionysodorus rejoins that Iolaus was no more the nephew of Heracles than of Socrates. For a nephew is a nephew, and a brother is a brother, and a father is a father, not of one man only, but of all; nor of men only, but of dogs and sea-monsters. Ctesippus makes merry with the consequences which follow: 'Much good has your father got out of the wisdom of his puppies.'

'But,' says Euthydemus, unabashed, 'nobody wants much good.' Medicine is a good, arms are a good, money is a good, and yet there may be too much of them in wrong places. 'No,' says Ctesippus, 'there cannot be too much gold.' And would you be happy if you had three talents of gold in your belly, a talent in your pate, and a stater in either eye?' Ctesippus, imitating the new wisdom, replies, 'And do not the Scythians reckon those to be the happiest of men who have their skulls gilded and see the inside of them?' 'Do you see,' retorts Euthydemus, 'what has the quality of vision or what has not the quality of vision?' 'What has the quality of vision.' 'And you see our garments?' 'Yes.' 'Then our garments have the quality of vision.' A similar play of words follows, which is successfully retorted by Ctesippus, to the great delight of Cleinias, who is rebuked by

Socrates for laughing at such solemn and beautiful things.

‘But are there any beautiful things? And if there are such, are they the same or not the same as absolute beauty?’ Socrates replies that they are not the same, but each of them has some beauty present with it. ‘And are you an ox because you have an ox present with you?’ After a few more amphiboliae, in which Socrates, like Ctesippus, in self-defence borrows the weapons of the brothers, they both confess that the two heroes are invincible; and the scene concludes with a grand chorus of shouting and laughing, and a panegyrical oration from Socrates: —

First, he praises the indifference of Dionysodorus and Euthydemus to public opinion; for most persons would rather be refuted by such arguments than use them in the refutation of others. Secondly, he remarks upon their impartiality; for they stop their own mouths, as well as those of other people. Thirdly, he notes their liberality, which makes them give away their secret to all the world: they should be more reserved, and let no one be present at this exhibition who does not pay them a handsome fee; or better still they might practise on one another only. He concludes with a respectful request that they will receive him and Cleinias among their disciples.

Crito tells Socrates that he has heard one of the audience criticise severely this wisdom, — not sparing Socrates himself for countenancing such an exhibition. Socrates asks what manner of man was this censorious critic. ‘Not an orator, but a great composer of speeches.’ Socrates understands that he is an amphibious animal, half philosopher, half politician; one of a class who have the highest opinion of themselves and a spite against philosophers, whom they imagine to be their rivals. They are a class who are very likely to get mauled by Euthydemus and his friends, and have a great notion of their own wisdom; for they imagine themselves to have all the advantages and none of the drawbacks both of politics and of philosophy. They do not understand the principles of combination, and hence are ignorant that the union of two good things which have different ends produces a compound inferior to either of them taken separately.

Crito is anxious about the education of his children, one of whom is growing up. The description of Dionysodorus and Euthydemus

suggests to him the reflection that the professors of education are strange beings. Socrates consoles him with the remark that the good in all professions are few, and recommends that 'he and his house' should continue to serve philosophy, and not mind about its professors.

...

There is a stage in the history of philosophy in which the old is dying out, and the new has not yet come into full life. Great philosophies like the Eleatic or Heraclitean, which have enlarged the boundaries of the human mind, begin to pass away in words. They subsist only as forms which have rooted themselves in language — as troublesome elements of thought which cannot be either used or explained away. The same absoluteness which was once attributed to abstractions is now attached to the words which are the signs of them. The philosophy which in the first and second generation was a great and inspiring effort of reflection, in the third becomes sophistical, verbal, eristic.

It is this stage of philosophy which Plato satirises in the *Euthydemus*. The fallacies which are noted by him appear trifling to us now, but they were not trifling in the age before logic, in the decline of the earlier Greek philosophies, at a time when language was first beginning to perplex human thought. Besides he is caricaturing them; they probably received more subtle forms at the hands of those who seriously maintained them. They are patent to us in Plato, and we are inclined to wonder how any one could ever have been deceived by them; but we must remember also that there was a time when the human mind was only with great difficulty disentangled from such fallacies.

To appreciate fully the drift of the *Euthydemus*, we should imagine a mental state in which not individuals only, but whole schools during more than one generation, were animated by the desire to exclude the conception of rest, and therefore the very word 'this' (*Theaet.*) from language; in which the ideas of space, time, matter, motion, were proved to be contradictory and imaginary; in which the nature of qualitative change was a puzzle, and even differences of degree, when applied to abstract notions, were not understood; in which there was no analysis of grammar, and mere

puns or plays of words received serious attention; in which contradiction itself was denied, and, on the one hand, every predicate was affirmed to be true of every subject, and on the other, it was held that no predicate was true of any subject, and that nothing was, or was known, or could be spoken. Let us imagine disputes carried on with religious earnestness and more than scholastic subtlety, in which the catchwords of philosophy are completely detached from their context. (Compare Theaet.) To such disputes the humour, whether of Plato in the ancient, or of Pope and Swift in the modern world, is the natural enemy. Nor must we forget that in modern times also there is no fallacy so gross, no trick of language so transparent, no abstraction so barren and unmeaning, no form of thought so contradictory to experience, which has not been found to satisfy the minds of philosophical enquirers at a certain stage, or when regarded from a certain point of view only. The peculiarity of the fallacies of our own age is that we live within them, and are therefore generally unconscious of them.

Aristotle has analysed several of the same fallacies in his book 'De Sophisticis Elenchis,' which Plato, with equal command of their true nature, has preferred to bring to the test of ridicule. At first we are only struck with the broad humour of this 'reductio ad absurdum:' gradually we perceive that some important questions begin to emerge. Here, as everywhere else, Plato is making war against the philosophers who put words in the place of things, who tear arguments to tatters, who deny predication, and thus make knowledge impossible, to whom ideas and objects of sense have no fixedness, but are in a state of perpetual oscillation and transition. Two great truths seem to be indirectly taught through these fallacies: (1) The uncertainty of language, which allows the same words to be used in different meanings, or with different degrees of meaning: (2) The necessary limitation or relative nature of all phenomena. Plato is aware that his own doctrine of ideas, as well as the Eleatic Being and Not-being, alike admit of being regarded as verbal fallacies. The sophism advanced in the Meno, 'that you cannot enquire either into what you know or do not know,' is lightly touched upon at the commencement of the Dialogue; the thesis of Protagoras, that everything is true to him to whom it seems to be true, is satirized. In

contrast with these fallacies is maintained the Socratic doctrine that happiness is gained by knowledge. The grammatical puzzles with which the Dialogue concludes probably contain allusions to tricks of language which may have been practised by the disciples of Prodicus or Antisthenes. They would have had more point, if we were acquainted with the writings against which Plato's humour is directed. Most of the jests appear to have a serious meaning; but we have lost the clue to some of them, and cannot determine whether, as in the *Cratylus*, Plato has or has not mixed up purely unmeaning fun with his satire.

The two discourses of Socrates may be contrasted in several respects with the exhibition of the Sophists: (1) In their perfect relevancy to the subject of discussion, whereas the Sophistical discourses are wholly irrelevant: (2) In their enquiring sympathetic tone, which encourages the youth, instead of 'knocking him down,' after the manner of the two Sophists: (3) In the absence of any definite conclusion — for while Socrates and the youth are agreed that philosophy is to be studied, they are not able to arrive at any certain result about the art which is to teach it. This is a question which will hereafter be answered in the *Republic*; as the conception of the kingly art is more fully developed in the *Politicus*, and the caricature of rhetoric in the *Gorgias*.

The characters of the Dialogue are easily intelligible. There is Socrates once more in the character of an old man; and his equal in years, Crito, the father of Critobulus, like Lysimachus in the *Laches*, his fellow demesman (*Apol.*), to whom the scene is narrated, and who once or twice interrupts with a remark after the manner of the interlocutor in the *Phaedo*, and adds his commentary at the end; Socrates makes a playful allusion to his money-getting habits. There is the youth Cleinias, the grandson of Alcibiades, who may be compared with Lysis, Charmides, Menexenus, and other ingenuous youths out of whose mouths Socrates draws his own lessons, and to whom he always seems to stand in a kindly and sympathetic relation. Crito will not believe that Socrates has not improved or perhaps invented the answers of Cleinias (compare *Phaedrus*). The name of the grandson of Alcibiades, who is described as long dead, (Greek), and who died at the age of forty-four, in the year 404 B.C., suggests

not only that the intended scene of the Euthydemus could not have been earlier than 404, but that as a fact this Dialogue could not have been composed before 390 at the soonest. Ctesippus, who is the lover of Cleinias, has been already introduced to us in the Lysis, and seems there too to deserve the character which is here given him, of a somewhat uproarious young man. But the chief study of all is the picture of the two brothers, who are unapproachable in their effrontery, equally careless of what they say to others and of what is said to them, and never at a loss. They are ‘*Arcades ambo et cantare pares et respondere parati.*’ Some superior degree of wit or subtlety is attributed to Euthydemus, who sees the trap in which Socrates catches Dionysodorus.

The epilogue or conclusion of the Dialogue has been criticised as inconsistent with the general scheme. Such a criticism is like similar criticisms on Shakespeare, and proceeds upon a narrow notion of the variety which the Dialogue, like the drama, seems to admit. Plato in the abundance of his dramatic power has chosen to write a play upon a play, just as he often gives us an argument within an argument. At the same time he takes the opportunity of assailing another class of persons who are as alien from the spirit of philosophy as Euthydemus and Dionysodorus. The Eclectic, the Syncretist, the Doctrinaire, have been apt to have a bad name both in ancient and modern times. The persons whom Plato ridicules in the epilogue to the Euthydemus are of this class. They occupy a border-ground between philosophy and politics; they keep out of the dangers of politics, and at the same time use philosophy as a means of serving their own interests. Plato quaintly describes them as making two good things, philosophy and politics, a little worse by perverting the objects of both. Men like Antiphon or Lysias would be types of the class. Out of a regard to the respectabilities of life, they are disposed to censure the interest which Socrates takes in the exhibition of the two brothers. They do not understand, any more than Crito, that he is pursuing his vocation of detecting the follies of mankind, which he finds ‘not unpleasant.’ (Compare Apol.)

Education is the common subject of all Plato’s earlier Dialogues. The concluding remark of Crito, that he has a difficulty in educating his two sons, and the advice of Socrates to him that he should not

give up philosophy because he has no faith in philosophers, seems to be a preparation for the more peremptory declaration of the *Meno* that 'Virtue cannot be taught because there are no teachers.'

The reasons for placing the *Euthydemus* early in the series are: (1) the similarity in plan and style to the *Protagoras*, *Charmides*, and *Lysis*; — the relation of Socrates to the Sophists is still that of humorous antagonism, not, as in the later Dialogues of Plato, of embittered hatred; and the places and persons have a considerable family likeness; (2) the *Euthydemus* belongs to the Socratic period in which Socrates is represented as willing to learn, but unable to teach; and in the spirit of Xenophon's *Memorabilia*, philosophy is defined as 'the knowledge which will make us happy;' (3) we seem to have passed the stage arrived at in the *Protagoras*, for Socrates is no longer discussing whether virtue can be taught — from this question he is relieved by the ingenuous declaration of the youth Cleinias; and (4) not yet to have reached the point at which he asserts 'that there are no teachers.' Such grounds are precarious, as arguments from style and plan are apt to be (Greek). But no arguments equally strong can be urged in favour of assigning to the *Euthydemus* any other position in the series.

EUTHYDEMUS.

PERSONS OF THE DIALOGUE:

Socrates, who is the narrator of the Dialogue. Crito, Cleinias, Euthydemus, Dionysodorus, Ctesippus.

SCENE: The Lyceum.

CRITO: Who was the person, Socrates, with whom you were talking yesterday at the Lyceum? There was such a crowd around you that I could not get within hearing, but I caught a sight of him over their heads, and I made out, as I thought, that he was a stranger with whom you were talking: who was he?

SOCRATES: There were two, Crito; which of them do you mean?

CRITO: The one whom I mean was seated second from you on the right-hand side. In the middle was Cleinias the young son of Axiochus, who has wonderfully grown; he is only about the age of my own Critobulus, but he is much forwarder and very good-looking: the other is thin and looks younger than he is.

SOCRATES: He whom you mean, Crito, is Euthydemus; and on my left hand there was his brother Dionysodorus, who also took part in the conversation.

CRITO: Neither of them are known to me, Socrates; they are a new importation of Sophists, as I should imagine. Of what country are they, and what is their line of wisdom?

SOCRATES: As to their origin, I believe that they are natives of this part of the world, and have migrated from Chios to Thurii; they were driven out of Thurii, and have been living for many years past in these regions. As to their wisdom, about which you ask, Crito, they are wonderful — consummate! I never knew what the true pancratiast was before; they are simply made up of fighting, not like the two Acarnanian brothers who fight with their bodies only, but this pair of heroes, besides being perfect in the use of their bodies,

are invincible in every sort of warfare; for they are capital at fighting in armour, and will teach the art to any one who pays them; and also they are most skilful in legal warfare; they will plead themselves and teach others to speak and to compose speeches which will have an effect upon the courts. And this was only the beginning of their wisdom, but they have at last carried out the pancratiastic art to the very end, and have mastered the only mode of fighting which had been hitherto neglected by them; and now no one dares even to stand up against them: such is their skill in the war of words, that they can refute any proposition whether true or false. Now I am thinking, Crito, of placing myself in their hands; for they say that in a short time they can impart their skill to any one.

CRITO: But, Socrates, are you not too old? there may be reason to fear that.

SOCRATES: Certainly not, Crito; as I will prove to you, for I have the consolation of knowing that they began this art of disputation which I covet, quite, as I may say, in old age; last year, or the year before, they had none of their new wisdom. I am only apprehensive that I may bring the two strangers into disrepute, as I have done Connus the son of Metrobius, the harp-player, who is still my music-master; for when the boys who go to him see me going with them, they laugh at me and call him grandpapa's master. Now I should not like the strangers to experience similar treatment; the fear of ridicule may make them unwilling to receive me; and therefore, Crito, I shall try and persuade some old men to accompany me to them, as I persuaded them to go with me to Connus, and I hope that you will make one: and perhaps we had better take your sons as a bait; they will want to have them as pupils, and for the sake of them willing to receive us.

CRITO: I see no objection, Socrates, if you like; but first I wish that you would give me a description of their wisdom, that I may know beforehand what we are going to learn.

SOCRATES: In less than no time you shall hear; for I cannot say that I did not attend — I paid great attention to them, and I remember and

will endeavour to repeat the whole story. Providentially I was sitting alone in the dressing-room of the Lyceum where you saw me, and was about to depart; when I was getting up I recognized the familiar divine sign: so I sat down again, and in a little while the two brothers Euthydemus and Dionysodorus came in, and several others with them, whom I believe to be their disciples, and they walked about in the covered court; they had not taken more than two or three turns when Cleinias entered, who, as you truly say, is very much improved: he was followed by a host of lovers, one of whom was Ctesippus the Paeanian, a well-bred youth, but also having the wildness of youth. Cleinias saw me from the entrance as I was sitting alone, and at once came and sat down on the right hand of me, as you describe; and Dionysodorus and Euthydemus, when they saw him, at first stopped and talked with one another, now and then glancing at us, for I particularly watched them; and then Euthydemus came and sat down by the youth, and the other by me on the left hand; the rest anywhere. I saluted the brothers, whom I had not seen for a long time; and then I said to Cleinias: Here are two wise men, Euthydemus and Dionysodorus, Cleinias, wise not in a small but in a large way of wisdom, for they know all about war, — all that a good general ought to know about the array and command of an army, and the whole art of fighting in armour: and they know about law too, and can teach a man how to use the weapons of the courts when he is injured.

They heard me say this, but only despised me. I observed that they looked at one another, and both of them laughed; and then Euthydemus said: Those, Socrates, are matters which we no longer pursue seriously; to us they are secondary occupations.

Indeed, I said, if such occupations are regarded by you as secondary, what must the principal one be; tell me, I beseech you, what that noble study is?

The teaching of virtue, Socrates, he replied, is our principal occupation; and we believe that we can impart it better and quicker than any man.

My God! I said, and where did you learn that? I always thought, as I was saying just now, that your chief accomplishment was the art of fighting in armour; and I used to say as much of you, for I remember that you professed this when you were here before. But now if you really have the other knowledge, O forgive me: I address you as I would superior beings, and ask you to pardon the impiety of my former expressions. But are you quite sure about this, Dionysodorus and Euthydemus? the promise is so vast, that a feeling of incredulity steals over me.

You may take our word, Socrates, for the fact.

Then I think you happier in having such a treasure than the great king is in the possession of his kingdom. And please to tell me whether you intend to exhibit your wisdom; or what will you do?

That is why we have come hither, Socrates; and our purpose is not only to exhibit, but also to teach any one who likes to learn.

But I can promise you, I said, that every unvirtuous person will want to learn. I shall be the first; and there is the youth Cleinias, and Ctesippus: and here are several others, I said, pointing to the lovers of Cleinias, who were beginning to gather round us. Now Ctesippus was sitting at some distance from Cleinias; and when Euthydemus leaned forward in talking with me, he was prevented from seeing Cleinias, who was between us; and so, partly because he wanted to look at his love, and also because he was interested, he jumped up and stood opposite to us: and all the other admirers of Cleinias, as well as the disciples of Euthydemus and Dionysodorus, followed his example. And these were the persons whom I showed to Euthydemus, telling him that they were all eager to learn: to which Ctesippus and all of them with one voice vehemently assented, and bid him exhibit the power of his wisdom. Then I said: O Euthydemus and Dionysodorus, I earnestly request you to do myself and the company the favour to exhibit. There may be some trouble in giving the whole exhibition; but tell me one thing, — can you make a good man of him only who is already convinced that he ought to learn of you, or of him also who is not convinced, either because he imagines

that virtue is a thing which cannot be taught at all, or that you are not the teachers of it? Has your art power to persuade him, who is of the latter temper of mind, that virtue can be taught; and that you are the men from whom he will best learn it?

Certainly, Socrates, said Dionysodorus; our art will do both.

And you and your brother, Dionysodorus, I said, of all men who are now living are the most likely to stimulate him to philosophy and to the study of virtue?

Yes, Socrates, I rather think that we are.

Then I wish that you would be so good as to defer the other part of the exhibition, and only try to persuade the youth whom you see here that he ought to be a philosopher and study virtue. Exhibit that, and you will confer a great favour on me and on every one present; for the fact is I and all of us are extremely anxious that he should become truly good. His name is Cleinias, and he is the son of Axiochus, and grandson of the old Alcibiades, cousin of the Alcibiades that now is. He is quite young, and we are naturally afraid that some one may get the start of us, and turn his mind in a wrong direction, and he may be ruined. Your visit, therefore, is most happily timed; and I hope that you will make a trial of the young man, and converse with him in our presence, if you have no objection.

These were pretty nearly the expressions which I used; and Euthydemus, in a manly and at the same time encouraging tone, replied: There can be no objection, Socrates, if the young man is only willing to answer questions.

He is quite accustomed to do so, I replied; for his friends often come and ask him questions and argue with him; and therefore he is quite at home in answering.

What followed, Crito, how can I rightly narrate? For not slight is the task of rehearsing infinite wisdom, and therefore, like the poets, I ought to commence my relation with an invocation to Memory and the Muses. Now Euthydemus, if I remember rightly, began nearly as

follows: O Cleinias, are those who learn the wise or the ignorant?

The youth, overpowered by the question blushed, and in his perplexity looked at me for help; and I, knowing that he was disconcerted, said: Take courage, Cleinias, and answer like a man whichever you think; for my belief is that you will derive the greatest benefit from their questions.

Whichever he answers, said Dionysodorus, leaning forward so as to catch my ear, his face beaming with laughter, I prophesy that he will be refuted, Socrates.

While he was speaking to me, Cleinias gave his answer: and therefore I had no time to warn him of the predicament in which he was placed, and he answered that those who learned were the wise.

Euthydemus proceeded: There are some whom you would call teachers, are there not?

The boy assented.

And they are the teachers of those who learn — the grammar-master and the lyre-master used to teach you and other boys; and you were the learners?

Yes.

And when you were learners you did not as yet know the things which you were learning?

No, he said.

And were you wise then?

No, indeed, he said.

But if you were not wise you were unlearned?

Certainly.

You then, learning what you did not know, were unlearned when you were learning?

The youth nodded assent.

Then the unlearned learn, and not the wise, Cleinias, as you imagine.

At these words the followers of Euthydemus, of whom I spoke, like a chorus at the bidding of their director, laughed and cheered. Then, before the youth had time to recover his breath, Dionysodorus cleverly took him in hand, and said: Yes, Cleinias; and when the grammar-master dictated anything to you, were they the wise boys or the unlearned who learned the dictation?

The wise, replied Cleinias.

Then after all the wise are the learners and not the unlearned; and your last answer to Euthydemus was wrong.

Then once more the admirers of the two heroes, in an ecstasy at their wisdom, gave vent to another peal of laughter, while the rest of us were silent and amazed. Euthydemus, observing this, determined to persevere with the youth; and in order to heighten the effect went on asking another similar question, which might be compared to the double turn of an expert dancer. Do those, said he, who learn, learn what they know, or what they do not know?

Again Dionysodorus whispered to me: That, Socrates, is just another of the same sort.

Good heavens, I said; and your last question was so good!

Like all our other questions, Socrates, he replied — inevitable.

I see the reason, I said, why you are in such reputation among your disciples.

Meanwhile Cleinias had answered Euthydemus that those who learned learn what they do not know; and he put him through a series of questions the same as before.

Do you not know letters?

He assented.

All letters?

Yes.

But when the teacher dictates to you, does he not dictate letters?

To this also he assented.

Then if you know all letters, he dictates that which you know?

This again was admitted by him.

Then, said the other, you do not learn that which he dictates; but he only who does not know letters learns?

Nay, said Cleinias; but I do learn.

Then, said he, you learn what you know, if you know all the letters?

He admitted that.

Then, he said, you were wrong in your answer.

The word was hardly out of his mouth when Dionysodorus took up the argument, like a ball which he caught, and had another throw at the youth. Cleinias, he said, Euthydemus is deceiving you. For tell me now, is not learning acquiring knowledge of that which one learns?

Cleinias assented.

And knowing is having knowledge at the time?

He agreed.

And not knowing is not having knowledge at the time?

He admitted that.

And are those who acquire those who have or have not a thing?

Those who have not.

And have you not admitted that those who do not know are of the

number of those who have not?

He nodded assent.

Then those who learn are of the class of those who acquire, and not of those who have?

He agreed.

Then, Cleinias, he said, those who do not know learn, and not those who know.

Euthydemus was proceeding to give the youth a third fall; but I knew that he was in deep water, and therefore, as I wanted to give him a respite lest he should be disheartened, I said to him consolingly: You must not be surprised, Cleinias, at the singularity of their mode of speech: this I say because you may not understand what the two strangers are doing with you; they are only initiating you after the manner of the Corybantes in the mysteries; and this answers to the enthronement, which, if you have ever been initiated, is, as you will know, accompanied by dancing and sport; and now they are just prancing and dancing about you, and will next proceed to initiate you; imagine then that you have gone through the first part of the sophistical ritual, which, as Prodicus says, begins with initiation into the correct use of terms. The two foreign gentlemen, perceiving that you did not know, wanted to explain to you that the word 'to learn' has two meanings, and is used, first, in the sense of acquiring knowledge of some matter of which you previously have no knowledge, and also, when you have the knowledge, in the sense of reviewing this matter, whether something done or spoken by the light of this newly-acquired knowledge; the latter is generally called 'knowing' rather than 'learning,' but the word 'learning' is also used; and you did not see, as they explained to you, that the term is employed of two opposite sorts of men, of those who know, and of those who do not know. There was a similar trick in the second question, when they asked you whether men learn what they know or what they do not know. These parts of learning are not serious, and therefore I say that the gentlemen are not serious, but are only

playing with you. For if a man had all that sort of knowledge that ever was, he would not be at all the wiser; he would only be able to play with men, tripping them up and oversetting them with distinctions of words. He would be like a person who pulls away a stool from some one when he is about to sit down, and then laughs and makes merry at the sight of his friend overturned and laid on his back. And you must regard all that has hitherto passed between you and them as merely play. But in what is to follow I am certain that they will exhibit to you their serious purpose, and keep their promise (I will show them how); for they promised to give me a sample of the hortatory philosophy, but I suppose that they wanted to have a game with you first. And now, Euthydemus and Dionysodorus, I think that we have had enough of this. Will you let me see you explaining to the young man how he is to apply himself to the study of virtue and wisdom? And I will first show you what I conceive to be the nature of the task, and what sort of a discourse I desire to hear; and if I do this in a very inartistic and ridiculous manner, do not laugh at me, for I only venture to improvise before you because I am eager to hear your wisdom: and I must therefore ask you and your disciples to refrain from laughing. And now, O son of Axiochus, let me put a question to you: Do not all men desire happiness? And yet, perhaps, this is one of those ridiculous questions which I am afraid to ask, and which ought not to be asked by a sensible man: for what human being is there who does not desire happiness?

There is no one, said Cleinias, who does not.

Well, then, I said, since we all of us desire happiness, how can we be happy? — that is the next question. Shall we not be happy if we have many good things? And this, perhaps, is even a more simple question than the first, for there can be no doubt of the answer.

He assented.

And what things do we esteem good? No solemn sage is required to tell us this, which may be easily answered; for every one will say that wealth is a good.

Certainly, he said.

And are not health and beauty goods, and other personal gifts?

He agreed.

Can there be any doubt that good birth, and power, and honours in one's own land, are goods?

He assented.

And what other goods are there? I said. What do you say of temperance, justice, courage: do you not verily and indeed think, Cleinias, that we shall be more right in ranking them as goods than in not ranking them as goods? For a dispute might possibly arise about this. What then do you say?

They are goods, said Cleinias.

Very well, I said; and where in the company shall we find a place for wisdom — among the goods or not?

Among the goods.

And now, I said, think whether we have left out any considerable goods.

I do not think that we have, said Cleinias.

Upon recollection, I said, indeed I am afraid that we have left out the greatest of them all.

What is that? he asked.

Fortune, Cleinias, I replied; which all, even the most foolish, admit to be the greatest of goods.

True, he said.

On second thoughts, I added, how narrowly, O son of Axiochus, have you and I escaped making a laughing-stock of ourselves to the strangers.

Why do you say so?

Why, because we have already spoken of good-fortune, and are but repeating ourselves.

What do you mean?

I mean that there is something ridiculous in again putting forward good-fortune, which has a place in the list already, and saying the same thing twice over.

He asked what was the meaning of this, and I replied: Surely wisdom is good-fortune; even a child may know that.

The simple-minded youth was amazed; and, observing his surprise, I said to him: Do you not know, Cleinias, that flute-players are most fortunate and successful in performing on the flute?

He assented.

And are not the scribes most fortunate in writing and reading letters?

Certainly.

Amid the dangers of the sea, again, are any more fortunate on the whole than wise pilots?

None, certainly.

And if you were engaged in war, in whose company would you rather take the risk — in company with a wise general, or with a foolish one?

With a wise one.

And if you were ill, whom would you rather have as a companion in a dangerous illness — a wise physician, or an ignorant one?

A wise one.

You think, I said, that to act with a wise man is more fortunate than to act with an ignorant one?

He assented.

Then wisdom always makes men fortunate: for by wisdom no man would ever err, and therefore he must act rightly and succeed, or his wisdom would be wisdom no longer.

We contrived at last, somehow or other, to agree in a general conclusion, that he who had wisdom had no need of fortune. I then recalled to his mind the previous state of the question. You remember, I said, our making the admission that we should be happy and fortunate if many good things were present with us?

He assented.

And should we be happy by reason of the presence of good things, if they profited us not, or if they profited us?

If they profited us, he said.

And would they profit us, if we only had them and did not use them? For example, if we had a great deal of food and did not eat, or a great deal of drink and did not drink, should we be profited?

Certainly not, he said.

Or would an artisan, who had all the implements necessary for his work, and did not use them, be any the better for the possession of them? For example, would a carpenter be any the better for having all his tools and plenty of wood, if he never worked?

Certainly not, he said.

And if a person had wealth and all the goods of which we were just now speaking, and did not use them, would he be happy because he possessed them?

No indeed, Socrates.

Then, I said, a man who would be happy must not only have the good things, but he must also use them; there is no advantage in merely having them?

True.

Well, Cleinias, but if you have the use as well as the possession of good things, is that sufficient to confer happiness?

Yes, in my opinion.

And may a person use them either rightly or wrongly?

He must use them rightly.

That is quite true, I said. And the wrong use of a thing is far worse than the non-use; for the one is an evil, and the other is neither a good nor an evil. You admit that?

He assented.

Now in the working and use of wood, is not that which gives the right use simply the knowledge of the carpenter?

Nothing else, he said.

And surely, in the manufacture of vessels, knowledge is that which gives the right way of making them?

He agreed.

And in the use of the goods of which we spoke at first — wealth and health and beauty, is not knowledge that which directs us to the right use of them, and regulates our practice about them?

He assented.

Then in every possession and every use of a thing, knowledge is that which gives a man not only good-fortune but success?

He again assented.

And tell me, I said, O tell me, what do possessions profit a man, if he have neither good sense nor wisdom? Would a man be better off, having and doing many things without wisdom, or a few things with wisdom? Look at the matter thus: If he did fewer things would he not

make fewer mistakes? if he made fewer mistakes would he not have fewer misfortunes? and if he had fewer misfortunes would he not be less miserable?

Certainly, he said.

And who would do least — a poor man or a rich man?

A poor man.

A weak man or a strong man?

A weak man.

A noble man or a mean man?

A mean man.

And a coward would do less than a courageous and temperate man?

Yes.

And an indolent man less than an active man?

He assented.

And a slow man less than a quick; and one who had dull perceptions of seeing and hearing less than one who had keen ones?

All this was mutually allowed by us.

Then, I said, Cleinias, the sum of the matter appears to be that the goods of which we spoke before are not to be regarded as goods in themselves, but the degree of good and evil in them depends on whether they are or are not under the guidance of knowledge: under the guidance of ignorance, they are greater evils than their opposites, inasmuch as they are more able to minister to the evil principle which rules them; and when under the guidance of wisdom and prudence, they are greater goods: but in themselves they are nothing?

That, he replied, is obvious.

What then is the result of what has been said? Is not this the result —

that other things are indifferent, and that wisdom is the only good, and ignorance the only evil?

He assented.

Let us consider a further point, I said: Seeing that all men desire happiness, and happiness, as has been shown, is gained by a use, and a right use, of the things of life, and the right use of them, and good-fortune in the use of them, is given by knowledge, — the inference is that everybody ought by all means to try and make himself as wise as he can?

Yes, he said.

And when a man thinks that he ought to obtain this treasure, far more than money, from a father or a guardian or a friend or a suitor, whether citizen or stranger — the eager desire and prayer to them that they would impart wisdom to you, is not at all dishonourable, Cleinias; nor is any one to be blamed for doing any honourable service or ministration to any man, whether a lover or not, if his aim is to get wisdom. Do you agree? I said.

Yes, he said, I quite agree, and think that you are right.

Yes, I said, Cleinias, if only wisdom can be taught, and does not come to man spontaneously; for this is a point which has still to be considered, and is not yet agreed upon by you and me —

But I think, Socrates, that wisdom can be taught, he said.

Best of men, I said, I am delighted to hear you say so; and I am also grateful to you for having saved me from a long and tiresome investigation as to whether wisdom can be taught or not. But now, as you think that wisdom can be taught, and that wisdom only can make a man happy and fortunate, will you not acknowledge that all of us ought to love wisdom, and you individually will try to love her?

Certainly, Socrates, he said; I will do my best.

I was pleased at hearing this; and I turned to Dionysodorus and

Euthydemus and said: That is an example, clumsy and tedious I admit, of the sort of exhortations which I would have you give; and I hope that one of you will set forth what I have been saying in a more artistic style: or at least take up the enquiry where I left off, and proceed to show the youth whether he should have all knowledge; or whether there is one sort of knowledge only which will make him good and happy, and what that is. For, as I was saying at first, the improvement of this young man in virtue and wisdom is a matter which we have very much at heart.

Thus I spoke, Crito, and was all attention to what was coming. I wanted to see how they would approach the question, and where they would start in their exhortation to the young man that he should practise wisdom and virtue. Dionysodorus, who was the elder, spoke first. Everybody's eyes were directed towards him, perceiving that something wonderful might shortly be expected. And certainly they were not far wrong; for the man, Crito, began a remarkable discourse well worth hearing, and wonderfully persuasive regarded as an exhortation to virtue.

Tell me, he said, Socrates and the rest of you who say that you want this young man to become wise, are you in jest or in real earnest?

I was led by this to imagine that they fancied us to have been jesting when we asked them to converse with the youth, and that this made them jest and play, and being under this impression, I was the more decided in saying that we were in profound earnest. Dionysodorus said:

Reflect, Socrates; you may have to deny your words.

I have reflected, I said; and I shall never deny my words.

Well, said he, and so you say that you wish Cleinias to become wise?

Undoubtedly.

And he is not wise as yet?

At least his modesty will not allow him to say that he is.

You wish him, he said, to become wise and not, to be ignorant?

That we do.

You wish him to be what he is not, and no longer to be what he is?

I was thrown into consternation at this.

Taking advantage of my consternation he added: You wish him no longer to be what he is, which can only mean that you wish him to perish. Pretty lovers and friends they must be who want their favourite not to be, or to perish!

When Ctesippus heard this he got very angry (as a lover well might) and said: Stranger of Thuriæ — if politeness would allow me I should say, A plague upon you! What can make you tell such a lie about me and the others, which I hardly like to repeat, as that I wish Cleinias to perish?

Euthydemus replied: And do you think, Ctesippus, that it is possible to tell a lie?

Yes, said Ctesippus; I should be mad to say anything else.

And in telling a lie, do you tell the thing of which you speak or not?

You tell the thing of which you speak.

And he who tells, tells that thing which he tells, and no other?

Yes, said Ctesippus.

And that is a distinct thing apart from other things?

Certainly.

And he who says that thing says that which is?

Yes.

And he who says that which is, says the truth. And therefore Dionysodorus, if he says that which is, says the truth of you and no lie.

Yes, Euthydemus, said Ctesippus; but in saying this, he says what is not.

Euthydemus answered: And that which is not is not?

True.

And that which is not is nowhere?

Nowhere.

And can any one do anything about that which has no existence, or do to Cleinias that which is not and is nowhere?

I think not, said Ctesippus.

Well, but do rhetoricians, when they speak in the assembly, do nothing?

Nay, he said, they do something.

And doing is making?

Yes.

And speaking is doing and making?

He agreed.

Then no one says that which is not, for in saying what is not he would be doing something; and you have already acknowledged that no one can do what is not. And therefore, upon your own showing, no one says what is false; but if Dionysodorus says anything, he says what is true and what is.

Yes, Euthydemus, said Ctesippus; but he speaks of things in a certain way and manner, and not as they really are.

Why, Ctesippus, said Dionysodorus, do you mean to say that any one speaks of things as they are?

Yes, he said — all gentlemen and truth-speaking persons.

And are not good things good, and evil things evil?

He assented.

And you say that gentlemen speak of things as they are?

Yes.

Then the good speak evil of evil things, if they speak of them as they are?

Yes, indeed, he said; and they speak evil of evil men. And if I may give you a piece of advice, you had better take care that they do not speak evil of you, since I can tell you that the good speak evil of the evil.

And do they speak great things of the great, rejoined Euthydemus, and warm things of the warm?

To be sure they do, said Ctesippus; and they speak coldly of the insipid and cold dialectician.

You are abusive, Ctesippus, said Dionysodorus, you are abusive!

Indeed, I am not, Dionysodorus, he replied; for I love you and am giving you friendly advice, and, if I could, would persuade you not like a boor to say in my presence that I desire my beloved, whom I value above all men, to perish.

I saw that they were getting exasperated with one another, so I made a joke with him and said: O Ctesippus, I think that we must allow the strangers to use language in their own way, and not quarrel with them about words, but be thankful for what they give us. If they know how to destroy men in such a way as to make good and sensible men out of bad and foolish ones — whether this is a discovery of their own, or whether they have learned from some one else this new sort of death and destruction which enables them to get rid of a bad man and turn him into a good one — if they know this (and they do know this — at any rate they said just now that this was the secret of their newly-discovered art) — let them, in their phraseology, destroy the

youth and make him wise, and all of us with him. But if you young men do not like to trust yourselves with them, then fiat experimentum in corpore senis; I will be the Carian on whom they shall operate. And here I offer my old person to Dionysodorus; he may put me into the pot, like Medea the Colchian, kill me, boil me, if he will only make me good.

Ctesippus said: And I, Socrates, am ready to commit myself to the strangers; they may skin me alive, if they please (and I am pretty well skinned by them already), if only my skin is made at last, not like that of Marsyas, into a leathern bottle, but into a piece of virtue. And here is Dionysodorus fancying that I am angry with him, when really I am not angry at all; I do but contradict him when I think that he is speaking improperly to me: and you must not confound abuse and contradiction, O illustrious Dionysodorus; for they are quite different things.

Contradiction! said Dionysodorus; why, there never was such a thing.

Certainly there is, he replied; there can be no question of that. Do you, Dionysodorus, maintain that there is not?

You will never prove to me, he said, that you have heard any one contradicting any one else.

Indeed, said Ctesippus; then now you may hear me contradicting Dionysodorus.

Are you prepared to make that good?

Certainly, he said.

Well, have not all things words expressive of them?

Yes.

Of their existence or of their non-existence?

Of their existence.

Yes, Ctesippus, and we just now proved, as you may remember, that no man could affirm a negative; for no one could affirm that which is not.

And what does that signify? said Ctesippus; you and I may contradict all the same for that.

But can we contradict one another, said Dionysodorus, when both of us are describing the same thing? Then we must surely be speaking the same thing?

He assented.

Or when neither of us is speaking of the same thing? For then neither of us says a word about the thing at all?

He granted that proposition also.

But when I describe something and you describe another thing, or I say something and you say nothing — is there any contradiction? How can he who speaks contradict him who speaks not?

Here Ctesippus was silent; and I in my astonishment said: What do you mean, Dionysodorus? I have often heard, and have been amazed to hear, this thesis of yours, which is maintained and employed by the disciples of Protagoras, and others before them, and which to me appears to be quite wonderful, and suicidal as well as destructive, and I think that I am most likely to hear the truth about it from you. The dictum is that there is no such thing as falsehood; a man must either say what is true or say nothing. Is not that your position?

He assented.

But if he cannot speak falsely, may he not think falsely?

No, he cannot, he said.

Then there is no such thing as false opinion?

No, he said.

Then there is no such thing as ignorance, or men who are ignorant; for is not ignorance, if there be such a thing, a mistake of fact?

Certainly, he said.

And that is impossible?

Impossible, he replied.

Are you saying this as a paradox, Dionysodorus; or do you seriously maintain no man to be ignorant?

Refute me, he said.

But how can I refute you, if, as you say, to tell a falsehood is impossible?

Very true, said Euthydemus.

Neither did I tell you just now to refute me, said Dionysodorus; for how can I tell you to do that which is not?

O Euthydemus, I said, I have but a dull conception of these subtleties and excellent devices of wisdom; I am afraid that I hardly understand them, and you must forgive me therefore if I ask a very stupid question: if there be no falsehood or false opinion or ignorance, there can be no such thing as erroneous action, for a man cannot fail of acting as he is acting — that is what you mean?

Yes, he replied.

And now, I said, I will ask my stupid question: If there is no such thing as error in deed, word, or thought, then what, in the name of goodness, do you come hither to teach? And were you not just now saying that you could teach virtue best of all men, to any one who was willing to learn?

And are you such an old fool, Socrates, rejoined Dionysodorus, that you bring up now what I said at first — and if I had said anything last year, I suppose that you would bring that up too — but are non-plussed at the words which I have just uttered?

Why, I said, they are not easy to answer; for they are the words of wise men: and indeed I know not what to make of this word 'nonplussed,' which you used last: what do you mean by it, Dionysodorus? You must mean that I cannot refute your argument. Tell me if the words have any other sense.

No, he replied, they mean what you say. And now answer.

What, before you, Dionysodorus? I said.

Answer, said he.

And is that fair?

Yes, quite fair, he said.

Upon what principle? I said. I can only suppose that you are a very wise man who comes to us in the character of a great logician, and who knows when to answer and when not to answer — and now you will not open your mouth at all, because you know that you ought not.

You prate, he said, instead of answering. But if, my good sir, you admit that I am wise, answer as I tell you.

I suppose that I must obey, for you are master. Put the question.

Are the things which have sense alive or lifeless?

They are alive.

And do you know of any word which is alive?

I cannot say that I do.

Then why did you ask me what sense my words had?

Why, because I was stupid and made a mistake. And yet, perhaps, I was right after all in saying that words have a sense; — what do you say, wise man? If I was not in error, even you will not refute me, and all your wisdom will be non-plussed; but if I did fall into error, then again you are wrong in saying that there is no error, — and this

remark was made by you not quite a year ago. I am inclined to think, however, Dionysodorus and Euthydemus, that this argument lies where it was and is not very likely to advance: even your skill in the subtleties of logic, which is really amazing, has not found out the way of throwing another and not falling yourself, now any more than of old.

Ctesippus said: Men of Chios, Thurii, or however and whatever you call yourselves, I wonder at you, for you seem to have no objection to talking nonsense.

Fearing that there would be high words, I again endeavoured to soothe Ctesippus, and said to him: To you, Ctesippus, I must repeat what I said before to Cleinias — that you do not understand the ways of these philosophers from abroad. They are not serious, but, like the Egyptian wizard, Proteus, they take different forms and deceive us by their enchantments: and let us, like Menelaus, refuse to let them go until they show themselves to us in earnest. When they begin to be in earnest their full beauty will appear: let us then beg and entreat and beseech them to shine forth. And I think that I had better once more exhibit the form in which I pray to behold them; it might be a guide to them. I will go on therefore where I left off, as well as I can, in the hope that I may touch their hearts and move them to pity, and that when they see me deeply serious and interested, they also may be serious. You, Cleinias, I said, shall remind me at what point we left off. Did we not agree that philosophy should be studied? and was not that our conclusion?

Yes, he replied.

And philosophy is the acquisition of knowledge?

Yes, he said.

And what knowledge ought we to acquire? May we not answer with absolute truth — A knowledge which will do us good?

Certainly, he said.

And should we be any the better if we went about having a

knowledge of the places where most gold was hidden in the earth?

Perhaps we should, he said.

But have we not already proved, I said, that we should be none the better off, even if without trouble and digging all the gold which there is in the earth were ours? And if we knew how to convert stones into gold, the knowledge would be of no value to us, unless we also knew how to use the gold? Do you not remember? I said.

I quite remember, he said.

Nor would any other knowledge, whether of money-making, or of medicine, or of any other art which knows only how to make a thing, and not to use it when made, be of any good to us. Am I not right?

He agreed.

And if there were a knowledge which was able to make men immortal, without giving them the knowledge of the way to use the immortality, neither would there be any use in that, if we may argue from the analogy of the previous instances?

To all this he agreed.

Then, my dear boy, I said, the knowledge which we want is one that uses as well as makes?

True, he said.

And our desire is not to be skilful lyre-makers, or artists of that sort — far otherwise; for with them the art which makes is one, and the art which uses is another. Although they have to do with the same, they are divided: for the art which makes and the art which plays on the lyre differ widely from one another. Am I not right?

He agreed.

And clearly we do not want the art of the flute-maker; this is only another of the same sort?

He assented.

But suppose, I said, that we were to learn the art of making speeches — would that be the art which would make us happy?

I should say, no, rejoined Cleinias.

And why should you say so? I asked.

I see, he replied, that there are some composers of speeches who do not know how to use the speeches which they make, just as the makers of lyres do not know how to use the lyres; and also some who are of themselves unable to compose speeches, but are able to use the speeches which the others make for them; and this proves that the art of making speeches is not the same as the art of using them.

Yes, I said; and I take your words to be a sufficient proof that the art of making speeches is not one which will make a man happy. And yet I did think that the art which we have so long been seeking might be discovered in that direction; for the composers of speeches, whenever I meet them, always appear to me to be very extraordinary men, Cleinias, and their art is lofty and divine, and no wonder. For their art is a part of the great art of enchantment, and hardly, if at all, inferior to it: and whereas the art of the enchanter is a mode of charming snakes and spiders and scorpions, and other monsters and pests, this art of their's acts upon dicasts and ecclesiasts and bodies of men, for the charming and pacifying of them. Do you agree with me?

Yes, he said, I think that you are quite right.

Whither then shall we go, I said, and to what art shall we have recourse?

I do not see my way, he said.

But I think that I do, I replied.

And what is your notion? asked Cleinias.

I think that the art of the general is above all others the one of which

the possession is most likely to make a man happy.

I do not think so, he said.

Why not? I said.

The art of the general is surely an art of hunting mankind.

What of that? I said.

Why, he said, no art of hunting extends beyond hunting and capturing; and when the prey is taken the huntsman or fisherman cannot use it; but they hand it over to the cook, and the geometers and astronomers and calculators (who all belong to the hunting class, for they do not make their diagrams, but only find out that which was previously contained in them) — they, I say, not being able to use but only to catch their prey, hand over their inventions to the dialectician to be applied by him, if they have any sense in them.

Good, I said, fairest and wisest Cleinias. And is this true?

Certainly, he said; just as a general when he takes a city or a camp hands over his new acquisition to the statesman, for he does not know how to use them himself; or as the quail-taker transfers the quails to the keeper of them. If we are looking for the art which is to make us blessed, and which is able to use that which it makes or takes, the art of the general is not the one, and some other must be found.

CRITO: And do you mean, Socrates, that the youngster said all this?

SOCRATES: Are you incredulous, Crito?

CRITO: Indeed, I am; for if he did say so, then in my opinion he needs neither Euthydemus nor any one else to be his instructor.

SOCRATES: Perhaps I may have forgotten, and Ctesippus was the real answerer.

CRITO: Ctesippus! nonsense.

SOCRATES: All I know is that I heard these words, and that they were not spoken either by Euthydemus or Dionysodorus. I dare say, my good Crito, that they may have been spoken by some superior person: that I heard them I am certain.

CRITO: Yes, indeed, Socrates, by some one a good deal superior, as I should be disposed to think. But did you carry the search any further, and did you find the art which you were seeking?

SOCRATES: Find! my dear sir, no indeed. And we cut a poor figure; we were like children after larks, always on the point of catching the art, which was always getting away from us. But why should I repeat the whole story? At last we came to the kingly art, and enquired whether that gave and caused happiness, and then we got into a labyrinth, and when we thought we were at the end, came out again at the beginning, having still to seek as much as ever.

CRITO: How did that happen, Socrates?

SOCRATES: I will tell you; the kingly art was identified by us with the political.

CRITO: Well, and what came of that?

SOCRATES: To this royal or political art all the arts, including the art of the general, seemed to render up the supremacy, that being the only one which knew how to use what they produce. Here obviously was the very art which we were seeking — the art which is the source of good government, and which may be described, in the language of Aeschylus, as alone sitting at the helm of the vessel of state, piloting and governing all things, and utilizing them.

CRITO: And were you not right, Socrates?

SOCRATES: You shall judge, Crito, if you are willing to hear what followed; for we resumed the enquiry, and a question of this sort was asked: Does the kingly art, having this supreme authority, do anything for us? To be sure, was the answer. And would not you, Crito, say the same?

CRITO: Yes, I should.

SOCRATES: And what would you say that the kingly art does? If medicine were supposed to have supreme authority over the subordinate arts, and I were to ask you a similar question about that, you would say — it produces health?

CRITO: I should.

SOCRATES: And what of your own art of husbandry, supposing that to have supreme authority over the subject arts — what does that do? Does it not supply us with the fruits of the earth?

CRITO: Yes.

SOCRATES: And what does the kingly art do when invested with supreme power? Perhaps you may not be ready with an answer?

CRITO: Indeed I am not, Socrates.

SOCRATES: No more were we, Crito. But at any rate you know that if this is the art which we were seeking, it ought to be useful.

CRITO: Certainly.

SOCRATES: And surely it ought to do us some good?

CRITO: Certainly, Socrates.

SOCRATES: And Cleinias and I had arrived at the conclusion that knowledge of some kind is the only good.

CRITO: Yes, that was what you were saying.

SOCRATES: All the other results of politics, and they are many, as for example, wealth, freedom, tranquillity, were neither good nor evil in themselves; but the political science ought to make us wise, and impart knowledge to us, if that is the science which is likely to do us good, and make us happy.

CRITO: Yes; that was the conclusion at which you had arrived, according to your report of the conversation.

SOCRATES: And does the kingly art make men wise and good?

CRITO: Why not, Socrates?

SOCRATES: What, all men, and in every respect? and teach them all the arts, — carpentering, and cobbling, and the rest of them?

CRITO: I think not, Socrates.

SOCRATES: But then what is this knowledge, and what are we to do with it? For it is not the source of any works which are neither good nor evil, and gives no knowledge, but the knowledge of itself; what then can it be, and what are we to do with it? Shall we say, Crito, that it is the knowledge by which we are to make other men good?

CRITO: By all means.

SOCRATES: And in what will they be good and useful? Shall we repeat that they will make others good, and that these others will make others again, without ever determining in what they are to be good; for we have put aside the results of politics, as they are called. This is the old, old song over again; and we are just as far as ever, if not farther, from the knowledge of the art or science of happiness.

CRITO: Indeed, Socrates, you do appear to have got into a great perplexity.

SOCRATES: Thereupon, Crito, seeing that I was on the point of shipwreck, I lifted up my voice, and earnestly entreated and called upon the strangers to save me and the youth from the whirlpool of the argument; they were our Castor and Pollux, I said, and they should be serious, and show us in sober earnest what that knowledge was which would enable us to pass the rest of our lives in happiness.

CRITO: And did Euthydemus show you this knowledge?

SOCRATES: Yes, indeed; he proceeded in a lofty strain to the following effect: Would you rather, Socrates, said he, that I should show you this knowledge about which you have been doubting, or shall I prove that you already have it?

What, I said, are you blessed with such a power as this?

Indeed I am.

Then I would much rather that you should prove me to have such a knowledge; at my time of life that will be more agreeable than having to learn.

Then tell me, he said, do you know anything?

Yes, I said, I know many things, but not anything of much importance.

That will do, he said: And would you admit that anything is what it is, and at the same time is not what it is?

Certainly not.

And did you not say that you knew something?

I did.

If you know, you are knowing.

Certainly, of the knowledge which I have.

That makes no difference; — and must you not, if you are knowing, know all things?

Certainly not, I said, for there are many other things which I do not know.

And if you do not know, you are not knowing.

Yes, friend, of that which I do not know.

Still you are not knowing, and you said just now that you were knowing; and therefore you are and are not at the same time, and in reference to the same things.

A pretty clatter, as men say, Euthydemus, this of yours! and will you explain how I possess that knowledge for which we were seeking? Do you mean to say that the same thing cannot be and also not be;

and therefore, since I know one thing, that I know all, for I cannot be knowing and not knowing at the same time, and if I know all things, then I must have the knowledge for which we are seeking — May I assume this to be your ingenious notion?

Out of your own mouth, Socrates, you are convicted, he said.

Well, but, Euthydemus, I said, has that never happened to you? for if I am only in the same case with you and our beloved Dionysodorus, I cannot complain. Tell me, then, you two, do you not know some things, and not know others?

Certainly not, Socrates, said Dionysodorus.

What do you mean, I said; do you know nothing?

Nay, he replied, we do know something.

Then, I said, you know all things, if you know anything?

Yes, all things, he said; and that is as true of you as of us.

O, indeed, I said, what a wonderful thing, and what a great blessing! And do all other men know all things or nothing?

Certainly, he replied; they cannot know some things, and not know others, and be at the same time knowing and not knowing.

Then what is the inference? I said.

They all know all things, he replied, if they know one thing.

O heavens, Dionysodorus, I said, I see now that you are in earnest; hardly have I got you to that point. And do you really and truly know all things, including carpentering and leather-cutting?

Certainly, he said.

And do you know stitching?

Yes, by the gods, we do, and cobbling, too.

And do you know things such as the numbers of the stars and of the

sand?

Certainly; did you think we should say No to that?

By Zeus, said Ctesippus, interrupting, I only wish that you would give me some proof which would enable me to know whether you speak truly.

What proof shall I give you? he said.

Will you tell me how many teeth Euthydemus has? and Euthydemus shall tell how many teeth you have.

Will you not take our word that we know all things?

Certainly not, said Ctesippus: you must further tell us this one thing, and then we shall know that you are speak the truth; if you tell us the number, and we count them, and you are found to be right, we will believe the rest. They fancied that Ctesippus was making game of them, and they refused, and they would only say in answer to each of his questions, that they knew all things. For at last Ctesippus began to throw off all restraint; no question in fact was too bad for him; he would ask them if they knew the foulest things, and they, like wild boars, came rushing on his blows, and fearlessly replied that they did. At last, Crito, I too was carried away by my incredulity, and asked Euthydemus whether Dionysodorus could dance.

Certainly, he replied.

And can he vault among swords, and turn upon a wheel, at his age? has he got to such a height of skill as that?

He can do anything, he said.

And did you always know this?

Always, he said.

When you were children, and at your birth?

They both said that they did.

This we could not believe. And Euthydemus said: You are incredulous, Socrates.

Yes, I said, and I might well be incredulous, if I did not know you to be wise men.

But if you will answer, he said, I will make you confess to similar marvels.

Well, I said, there is nothing that I should like better than to be self-convicted of this, for if I am really a wise man, which I never knew before, and you will prove to me that I know and have always known all things, nothing in life would be a greater gain to me.

Answer then, he said.

Ask, I said, and I will answer.

Do you know something, Socrates, or nothing?

Something, I said.

And do you know with what you know, or with something else?

With what I know; and I suppose that you mean with my soul?

Are you not ashamed, Socrates, of asking a question when you are asked one?

Well, I said; but then what am I to do? for I will do whatever you bid; when I do not know what you are asking, you tell me to answer nevertheless, and not to ask again.

Why, you surely have some notion of my meaning, he said.

Yes, I replied.

Well, then, answer according to your notion of my meaning.

Yes, I said; but if the question which you ask in one sense is understood and answered by me in another, will that please you — if I answer what is not to the point?

That will please me very well; but will not please you equally well, as I imagine.

I certainly will not answer unless I understand you, I said.

You will not answer, he said, according to your view of the meaning, because you will be prating, and are an ancient.

Now I saw that he was getting angry with me for drawing distinctions, when he wanted to catch me in his springes of words. And I remembered that Connus was always angry with me when I opposed him, and then he neglected me, because he thought that I was stupid; and as I was intending to go to Euthydemus as a pupil, I reflected that I had better let him have his way, as he might think me a blockhead, and refuse to take me. So I said: You are a far better dialectician than myself, Euthydemus, for I have never made a profession of the art, and therefore do as you say; ask your questions once more, and I will answer.

Answer then, he said, again, whether you know what you know with something, or with nothing.

Yes, I said; I know with my soul.

The man will answer more than the question; for I did not ask you, he said, with what you know, but whether you know with something.

Again I replied, Through ignorance I have answered too much, but I hope that you will forgive me. And now I will answer simply that I always know what I know with something.

And is that something, he rejoined, always the same, or sometimes one thing, and sometimes another thing?

Always, I replied, when I know, I know with this.

Will you not cease adding to your answers?

My fear is that this word 'always' may get us into trouble.

You, perhaps, but certainly not us. And now answer: Do you always

know with this?

Always; since I am required to withdraw the words ‘when I know.’

You always know with this, or, always knowing, do you know some things with this, and some things with something else, or do you know all things with this?

All that I know, I replied, I know with this.

There again, Socrates, he said, the addition is superfluous.

Well, then, I said, I will take away the words ‘that I know.’

Nay, take nothing away; I desire no favours of you; but let me ask: Would you be able to know all things, if you did not know all things?

Quite impossible.

And now, he said, you may add on whatever you like, for you confess that you know all things.

I suppose that is true, I said, if my qualification implied in the words ‘that I know’ is not allowed to stand; and so I do know all things.

And have you not admitted that you always know all things with that which you know, whether you make the addition of ‘when you know them’ or not? for you have acknowledged that you have always and at once known all things, that is to say, when you were a child, and at your birth, and when you were growing up, and before you were born, and before the heaven and earth existed, you knew all things, if you always know them; and I swear that you shall always continue to know all things, if I am of the mind to make you.

But I hope that you will be of that mind, reverend Euthydemus, I said, if you are really speaking the truth, and yet I a little doubt your power to make good your words unless you have the help of your brother Dionysodorus; then you may do it. Tell me now, both of you, for although in the main I cannot doubt that I really do know all things, when I am told so by men of your prodigious wisdom — how can I say that I know such things, Euthydemus, as that the good are

unjust; come, do I know that or not?

Certainly, you know that.

What do I know?

That the good are not unjust.

Quite true, I said; and that I have always known; but the question is, where did I learn that the good are unjust?

Nowhere, said Dionysodorus.

Then, I said, I do not know this.

You are ruining the argument, said Euthydemus to Dionysodorus; he will be proved not to know, and then after all he will be knowing and not knowing at the same time.

Dionysodorus blushed.

I turned to the other, and said, What do you think, Euthydemus? Does not your omniscient brother appear to you to have made a mistake?

What, replied Dionysodorus in a moment; am I the brother of Euthydemus?

Thereupon I said, Please not to interrupt, my good friend, or prevent Euthydemus from proving to me that I know the good to be unjust; such a lesson you might at least allow me to learn.

You are running away, Socrates, said Dionysodorus, and refusing to answer.

No wonder, I said, for I am not a match for one of you, and a fortiori I must run away from two. I am no Heracles; and even Heracles could not fight against the Hydra, who was a she-Sophist, and had the wit to shoot up many new heads when one of them was cut off; especially when he saw a second monster of a sea-crab, who was also a Sophist, and appeared to have newly arrived from a sea-voyage,

bearing down upon him from the left, opening his mouth and biting. When the monster was growing troublesome he called Iolaus, his nephew, to his help, who ably succoured him; but if my Iolaus, who is my brother Patrocles (the statuary), were to come, he would only make a bad business worse.

And now that you have delivered yourself of this strain, said Dionysodorus, will you inform me whether Iolaus was the nephew of Heracles any more than he is yours?

I suppose that I had best answer you, Dionysodorus, I said, for you will insist on asking — that I pretty well know — out of envy, in order to prevent me from learning the wisdom of Euthydemus.

Then answer me, he said.

Well then, I said, I can only reply that Iolaus was not my nephew at all, but the nephew of Heracles; and his father was not my brother Patrocles, but Iphicles, who has a name rather like his, and was the brother of Heracles.

And is Patrocles, he said, your brother?

Yes, I said, he is my half-brother, the son of my mother, but not of my father.

Then he is and is not your brother.

Not by the same father, my good man, I said, for Chaeredemus was his father, and mine was Sophroniscus.

And was Sophroniscus a father, and Chaeredemus also?

Yes, I said; the former was my father, and the latter his.

Then, he said, Chaeredemus is not a father.

He is not my father, I said.

But can a father be other than a father? or are you the same as a stone?

I certainly do not think that I am a stone, I said, though I am afraid that you may prove me to be one.

Are you not other than a stone?

I am.

And being other than a stone, you are not a stone; and being other than gold, you are not gold?

Very true.

And so Chaeredemus, he said, being other than a father, is not a father?

I suppose that he is not a father, I replied.

For if, said Euthydemus, taking up the argument, Chaeredemus is a father, then Sophroniscus, being other than a father, is not a father; and you, Socrates, are without a father.

Ctesippus, here taking up the argument, said: And is not your father in the same case, for he is other than my father?

Assuredly not, said Euthydemus.

Then he is the same?

He is the same.

I cannot say that I like the connection; but is he only my father, Euthydemus, or is he the father of all other men?

Of all other men, he replied. Do you suppose the same person to be a father and not a father?

Certainly, I did so imagine, said Ctesippus.

And do you suppose that gold is not gold, or that a man is not a man?

They are not 'in pari materia,' Euthydemus, said Ctesippus, and you had better take care, for it is monstrous to suppose that your father is the father of all.

But he is, he replied.

What, of men only, said Ctesippus, or of horses and of all other animals?

Of all, he said.

And your mother, too, is the mother of all?

Yes, our mother too.

Yes; and your mother has a progeny of sea-urchins then?

Yes; and yours, he said.

And gudgeons and puppies and pigs are your brothers?

And yours too.

And your papa is a dog?

And so is yours, he said.

If you will answer my questions, said Dionysodorus, I will soon extract the same admissions from you, Ctesippus. You say that you have a dog.

Yes, a villain of a one, said Ctesippus.

And he has puppies?

Yes, and they are very like himself.

And the dog is the father of them?

Yes, he said, I certainly saw him and the mother of the puppies come together.

And is he not yours?

To be sure he is.

Then he is a father, and he is yours; ergo, he is your father, and the puppies are your brothers.

Let me ask you one little question more, said Dionysodorus, quickly interposing, in order that Ctesippus might not get in his word: You beat this dog?

Ctesippus said, laughing, Indeed I do; and I only wish that I could beat you instead of him.

Then you beat your father, he said.

I should have far more reason to beat yours, said Ctesippus; what could he have been thinking of when he begat such wise sons? much good has this father of you and your brethren the puppies got out of this wisdom of yours.

But neither he nor you, Ctesippus, have any need of much good.

And have you no need, Euthydemus? he said.

Neither I nor any other man; for tell me now, Ctesippus, if you think it good or evil for a man who is sick to drink medicine when he wants it; or to go to war armed rather than unarmed.

Good, I say. And yet I know that I am going to be caught in one of your charming puzzles.

That, he replied, you will discover, if you answer; since you admit medicine to be good for a man to drink, when wanted, must it not be good for him to drink as much as possible; when he takes his medicine, a cartload of hellebore will not be too much for him?

Ctesippus said: Quite so, Euthydemus, that is to say, if he who drinks is as big as the statue of Delphi.

And seeing that in war to have arms is a good thing, he ought to have as many spears and shields as possible?

Very true, said Ctesippus; and do you think, Euthydemus, that he ought to have one shield only, and one spear?

I do.

And would you arm Geryon and Briareus in that way? Considering that you and your companion fight in armour, I thought that you would have known better...Here Euthydemus held his peace, but Dionysodorus returned to the previous answer of Ctesippus and said:

Do you not think that the possession of gold is a good thing?

Yes, said Ctesippus, and the more the better.

And to have money everywhere and always is a good?

Certainly, a great good, he said.

And you admit gold to be a good?

Certainly, he replied.

And ought not a man then to have gold everywhere and always, and as much as possible in himself, and may he not be deemed the happiest of men who has three talents of gold in his belly, and a talent in his pate, and a stater of gold in either eye?

Yes, Euthydemus, said Ctesippus; and the Scythians reckon those who have gold in their own skulls to be the happiest and bravest of men (that is only another instance of your manner of speaking about the dog and father), and what is still more extraordinary, they drink out of their own skulls gilt, and see the inside of them, and hold their own head in their hands.

And do the Scythians and others see that which has the quality of vision, or that which has not? said Euthydemus.

That which has the quality of vision clearly.

And you also see that which has the quality of vision? he said. [Note: the ambiguity of (Greek), 'things visible and able to see,' (Greek), 'the speaking of the silent,' the silent denoting either the speaker or the subject of the speech, cannot be perfectly rendered in English.] Compare Aristot. Soph. Elenchi (Poste's translation): —

‘Of ambiguous propositions the following are instances: —

‘I hope that you the enemy may slay.

‘Whom one knows, he knows. Either the person knowing or the person known is here affirmed to know.

‘What one sees, that one sees: one sees a pillar: ergo, that one pillar sees.

‘What you ARE holding, that you are: you are holding a stone: ergo, a stone you are.

‘Is a speaking of the silent possible? “The silent” denotes either the speaker or the subject of speech.

‘There are three kinds of ambiguity of term or proposition. The first is when there is an equal linguistic propriety in several interpretations; the second when one is improper but customary; the third when the ambiguity arises in the combination of elements that are in themselves unambiguous, as in “knowing letters.” “Knowing” and “letters” are perhaps separately unambiguous, but in combination may imply either that the letters are known, or that they themselves have knowledge. Such are the modes in which propositions and terms may be ambiguous.’

Yes, I do.

Then do you see our garments?

Yes.

Then our garments have the quality of vision.

They can see to any extent, said Ctesippus.

What can they see?

Nothing; but you, my sweet man, may perhaps imagine that they do not see; and certainly, Euthydemus, you do seem to me to have been caught napping when you were not asleep, and that if it be possible

to speak and say nothing — you are doing so.

And may there not be a silence of the speaker? said Dionysodorus.

Impossible, said Ctesippus.

Or a speaking of the silent?

That is still more impossible, he said.

But when you speak of stones, wood, iron bars, do you not speak of the silent?

Not when I pass a smithy; for then the iron bars make a tremendous noise and outcry if they are touched: so that here your wisdom is strangely mistaken; please, however, to tell me how you can be silent when speaking (I thought that Ctesippus was put upon his mettle because Cleinias was present).

When you are silent, said Euthydemus, is there not a silence of all things?

Yes, he said.

But if speaking things are included in all things, then the speaking are silent.

What, said Ctesippus; then all things are not silent?

Certainly not, said Euthydemus.

Then, my good friend, do they all speak?

Yes; those which speak.

Nay, said Ctesippus, but the question which I ask is whether all things are silent or speak?

Neither and both, said Dionysodorus, quickly interposing; I am sure that you will be 'non-plussed' at that answer.

Here Ctesippus, as his manner was, burst into a roar of laughter; he said, That brother of yours, Euthydemus, has got into a dilemma; all

is over with him. This delighted Cleinias, whose laughter made Ctesippus ten times as uproarious; but I cannot help thinking that the rogue must have picked up this answer from them; for there has been no wisdom like theirs in our time. Why do you laugh, Cleinias, I said, at such solemn and beautiful things?

Why, Socrates, said Dionysodorus, did you ever see a beautiful thing?

Yes, Dionysodorus, I replied, I have seen many.

Were they other than the beautiful, or the same as the beautiful?

Now I was in a great quandary at having to answer this question, and I thought that I was rightly served for having opened my mouth at all: I said however, They are not the same as absolute beauty, but they have beauty present with each of them.

And are you an ox because an ox is present with you, or are you Dionysodorus, because Dionysodorus is present with you?

God forbid, I replied.

But how, he said, by reason of one thing being present with another, will one thing be another?

Is that your difficulty? I said. For I was beginning to imitate their skill, on which my heart was set.

Of course, he replied, I and all the world are in a difficulty about the non-existent.

What do you mean, Dionysodorus? I said. Is not the honourable honourable and the base base?

That, he said, is as I please.

And do you please?

Yes, he said.

And you will admit that the same is the same, and the other other; for

surely the other is not the same; I should imagine that even a child will hardly deny the other to be other. But I think, Dionysodorus, that you must have intentionally missed the last question; for in general you and your brother seem to me to be good workmen in your own department, and to do the dialectician's business excellently well.

What, said he, is the business of a good workman? tell me, in the first place, whose business is hammering?

The smith's.

And whose the making of pots?

The potter's.

And who has to kill and skin and mince and boil and roast?

The cook, I said.

And if a man does his business he does rightly?

Certainly.

And the business of the cook is to cut up and skin; you have admitted that?

Yes, I have admitted that, but you must not be too hard upon me.

Then if some one were to kill, mince, boil, roast the cook, he would do his business, and if he were to hammer the smith, and make a pot of the potter, he would do their business.

Poseidon, I said, this is the crown of wisdom; can I ever hope to have such wisdom of my own?

And would you be able, Socrates, to recognize this wisdom when it has become your own?

Certainly, I said, if you will allow me.

What, he said, do you think that you know what is your own?

Yes, I do, subject to your correction; for you are the bottom, and

Euthydemus is the top, of all my wisdom.

Is not that which you would deem your own, he said, that which you have in your own power, and which you are able to use as you would desire, for example, an ox or a sheep — would you not think that which you could sell and give and sacrifice to any god whom you pleased, to be your own, and that which you could not give or sell or sacrifice you would think not to be in your own power?

Yes, I said (for I was certain that something good would come out of the questions, which I was impatient to hear); yes, such things, and such things only are mine.

Yes, he said, and you would mean by animals living beings?

Yes, I said.

You agree then, that those animals only are yours with which you have the power to do all these things which I was just naming?

I agree.

Then, after a pause, in which he seemed to be lost in the contemplation of something great, he said: Tell me, Socrates, have you an ancestral Zeus? Here, anticipating the final move, like a person caught in a net, who gives a desperate twist that he may get away, I said: No, Dionysodorus, I have not.

What a miserable man you must be then, he said; you are not an Athenian at all if you have no ancestral gods or temples, or any other mark of gentility.

Nay, Dionysodorus, I said, do not be rough; good words, if you please; in the way of religion I have altars and temples, domestic and ancestral, and all that other Athenians have.

And have not other Athenians, he said, an ancestral Zeus?

That name, I said, is not to be found among the Ionians, whether colonists or citizens of Athens; an ancestral Apollo there is, who is the father of Ion, and a family Zeus, and a Zeus guardian of the

phratry, and an Athene guardian of the phratry. But the name of ancestral Zeus is unknown to us.

No matter, said Dionysodorus, for you admit that you have Apollo, Zeus, and Athene.

Certainly, I said.

And they are your gods, he said.

Yes, I said, my lords and ancestors.

At any rate they are yours, he said, did you not admit that?

I did, I said; what is going to happen to me?

And are not these gods animals? for you admit that all things which have life are animals; and have not these gods life?

They have life, I said.

Then are they not animals?

They are animals, I said.

And you admitted that of animals those are yours which you could give away or sell or offer in sacrifice, as you pleased?

I did admit that, Euthydemus, and I have no way of escape.

Well then, said he, if you admit that Zeus and the other gods are yours, can you sell them or give them away or do what you will with them, as you would with other animals?

At this I was quite struck dumb, Crito, and lay prostrate. Ctesippus came to the rescue.

Bravo, Heracles, brave words, said he.

Bravo Heracles, or is Heracles a Bravo? said Dionysodorus.

Poseidon, said Ctesippus, what awful distinctions. I will have no more of them; the pair are invincible.

Then, my dear Crito, there was universal applause of the speakers and their words, and what with laughing and clapping of hands and rejoicings the two men were quite overpowered; for hitherto their partisans only had cheered at each successive hit, but now the whole company shouted with delight until the columns of the Lyceum returned the sound, seeming to sympathize in their joy. To such a pitch was I affected myself, that I made a speech, in which I acknowledged that I had never seen the like of their wisdom; I was their devoted servant, and fell to praising and admiring of them. What marvellous dexterity of wit, I said, enabled you to acquire this great perfection in such a short time? There is much, indeed, to admire in your words, Euthydemus and Dionysodorus, but there is nothing that I admire more than your magnanimous disregard of any opinion — whether of the many, or of the grave and reverend seigniors — you regard only those who are like yourselves. And I do verily believe that there are few who are like you, and who would approve of such arguments; the majority of mankind are so ignorant of their value, that they would be more ashamed of employing them in the refutation of others than of being refuted by them. I must further express my approval of your kind and public-spirited denial of all differences, whether of good and evil, white or black, or any other; the result of which is that, as you say, every mouth is sewn up, not excepting your own, which graciously follows the example of others; and thus all ground of offence is taken away. But what appears to me to be more than all is, that this art and invention of yours has been so admirably contrived by you, that in a very short time it can be imparted to any one. I observed that Ctesippus learned to imitate you in no time. Now this quickness of attainment is an excellent thing; but at the same time I would advise you not to have any more public entertainments; there is a danger that men may undervalue an art which they have so easy an opportunity of acquiring; the exhibition would be best of all, if the discussion were confined to your two selves; but if there must be an audience, let him only be present who is willing to pay a handsome fee; — you should be careful of this; — and if you are wise, you will also bid your disciples discourse with no man but you and themselves. For only what is rare is valuable; and ‘water,’ which, as Pindar says, is the

‘best of all things,’ is also the cheapest. And now I have only to request that you will receive Cleinias and me among your pupils.

Such was the discussion, Crito; and after a few more words had passed between us we went away. I hope that you will come to them with me, since they say that they are able to teach any one who will give them money; no age or want of capacity is an impediment. And I must repeat one thing which they said, for your especial benefit, — that the learning of their art did not at all interfere with the business of money-making.

CRITO: Truly, Socrates, though I am curious and ready to learn, yet I fear that I am not like-minded with Euthydemus, but one of the other sort, who, as you were saying, would rather be refuted by such arguments than use them in refutation of others. And though I may appear ridiculous in venturing to advise you, I think that you may as well hear what was said to me by a man of very considerable pretensions — he was a professor of legal oratory — who came away from you while I was walking up and down. ‘Crito,’ said he to me, ‘are you giving no attention to these wise men?’ ‘No, indeed,’ I said to him; ‘I could not get within hearing of them — there was such a crowd.’ ‘You would have heard something worth hearing if you had.’ ‘What was that?’ I said. ‘You would have heard the greatest masters of the art of rhetoric discoursing.’ ‘And what did you think of them?’ I said. ‘What did I think of them?’ he said:— ‘theirs was the sort of discourse which anybody might hear from men who were playing the fool, and making much ado about nothing.’ That was the expression which he used. ‘Surely,’ I said, ‘philosophy is a charming thing.’ ‘Charming!’ he said; ‘what simplicity! philosophy is nought; and I think that if you had been present you would have been ashamed of your friend — his conduct was so very strange in placing himself at the mercy of men who care not what they say, and fasten upon every word. And these, as I was telling you, are supposed to be the most eminent professors of their time. But the truth is, Crito, that the study itself and the men themselves are utterly mean and ridiculous.’ Now censure of the pursuit, Socrates, whether coming from him or from others, appears to me to be undeserved; but as to the impropriety of

holding a public discussion with such men, there, I confess that, in my opinion, he was in the right.

SOCRATES: O Crito, they are marvellous men; but what was I going to say? First of all let me know; — What manner of man was he who came up to you and censured philosophy; was he an orator who himself practises in the courts, or an instructor of orators, who makes the speeches with which they do battle?

CRITO: He was certainly not an orator, and I doubt whether he had ever been into court; but they say that he knows the business, and is a clever man, and composes wonderful speeches.

SOCRATES: Now I understand, Crito; he is one of an amphibious class, whom I was on the point of mentioning — one of those whom Prodicus describes as on the border-ground between philosophers and statesmen — they think that they are the wisest of all men, and that they are generally esteemed the wisest; nothing but the rivalry of the philosophers stands in their way; and they are of the opinion that if they can prove the philosophers to be good for nothing, no one will dispute their title to the palm of wisdom, for that they are themselves really the wisest, although they are apt to be mauled by Euthydemus and his friends, when they get hold of them in conversation. This opinion which they entertain of their own wisdom is very natural; for they have a certain amount of philosophy, and a certain amount of political wisdom; there is reason in what they say, for they argue that they have just enough of both, and so they keep out of the way of all risks and conflicts and reap the fruits of their wisdom.

CRITO: What do you say of them, Socrates? There is certainly something specious in that notion of theirs.

SOCRATES: Yes, Crito, there is more speciousness than truth; they cannot be made to understand the nature of intermediates. For all persons or things, which are intermediate between two other things, and participate in both of them — if one of these two things is good and the other evil, are better than the one and worse than the other; but if they are in a mean between two good things which do not tend

to the same end, they fall short of either of their component elements in the attainment of their ends. Only in the case when the two component elements which do not tend to the same end are evil is the participant better than either. Now, if philosophy and political action are both good, but tend to different ends, and they participate in both, and are in a mean between them, then they are talking nonsense, for they are worse than either; or, if the one be good and the other evil, they are better than the one and worse than the other; only on the supposition that they are both evil could there be any truth in what they say. I do not think that they will admit that their two pursuits are either wholly or partly evil; but the truth is, that these philosopher-politicians who aim at both fall short of both in the attainment of their respective ends, and are really third, although they would like to stand first. There is no need, however, to be angry at this ambition of theirs — which may be forgiven; for every man ought to be loved who says and manfully pursues and works out anything which is at all like wisdom: at the same time we shall do well to see them as they really are.

CRITO: I have often told you, Socrates, that I am in a constant difficulty about my two sons. What am I to do with them? There is no hurry about the younger one, who is only a child; but the other, Critobulus, is getting on, and needs some one who will improve him. I cannot help thinking, when I hear you talk, that there is a sort of madness in many of our anxieties about our children: — in the first place, about marrying a wife of good family to be the mother of them, and then about heaping up money for them — and yet taking no care about their education. But then again, when I contemplate any of those who pretend to educate others, I am amazed. To me, if I am to confess the truth, they all seem to be such outrageous beings: so that I do not know how I can advise the youth to study philosophy.

SOCRATES: Dear Crito, do you not know that in every profession the inferior sort are numerous and good for nothing, and the good are few and beyond all price: for example, are not gymnastic and rhetoric and money-making and the art of the general, noble arts?

CRITO: Certainly they are, in my judgment.

SOCRATES: Well, and do you not see that in each of these arts the many are ridiculous performers?

CRITO: Yes, indeed, that is very true.

SOCRATES: And will you on this account shun all these pursuits yourself and refuse to allow them to your son?

CRITO: That would not be reasonable, Socrates.

SOCRATES: Do you then be reasonable, Crito, and do not mind whether the teachers of philosophy are good or bad, but think only of philosophy herself. Try and examine her well and truly, and if she be evil seek to turn away all men from her, and not your sons only; but if she be what I believe that she is, then follow her and serve her, you and your house, as the saying is, and be of good cheer.

PROTAGORAS

Translated by Benjamin Jowett

This middle dialogue details a debate between Protagoras, a celebrated sophist, and Socrates. The discussion takes place at the home of Callias, who is host to Protagoras while he is in town, and concerns the nature of Sophists, the unity and the ability to teach virtue. A total of twenty-one people are named as present.

Of the twenty-one people who are specifically said to be present, three are known sophists. In addition to Protagoras himself, there are Hippias of Elis and Prodicus of Ceos. Two of the sons of Pericles are said to be there, Paralus and Xanthippus. With the exception of Aristophanes, all of Socrates' named friends from the Symposium are in attendance: Eryximachus the doctor, and Phaedrus are there, and so are the lovers Pausanias and Agathon (who is said to be a mere boy at this point), and Alcibiades.

The dialogue begins with an unnamed friend of Socrates asking him how his pursuit of the young Alcibiades, just now reputed to be growing his first beard, was proceeding. Socrates explains that while he has just been in the company of Alcibiades, he has just come from meeting with someone who is "more beautiful . . . No doubt the wisest of men nowadays — if in your opinion the wisest is Protagoras". Socrates relates the story of how his young friend, Hippocrates, son of Apollodorus, came knocking on his door before daybreak and roused him out of bed. Hippocrates was in a big hurry to be present when Protagoras held court, as he was expected to do, at the home of Callias.

During the dialogue, Socrates broaches the question of whether virtue is one or many things, himself claiming that all virtue is knowledge and therefore one. He argues that the reason people act harmfully, to others or themselves, is because they only see the short term gains while ignoring the long term losses which might outweigh

them, just like one makes errors in judging the size of objects that are far away.

Bust of Plato

INTRODUCTION.

The Protagoras, like several of the Dialogues of Plato, is put into the mouth of Socrates, who describes a conversation which had taken place between himself and the great Sophist at the house of Callias—‘the man who had spent more upon the Sophists than all the rest of the world’ — and in which the learned Hippias and the grammarian Prodicus had also shared, as well as Alcibiades and Critias, both of whom said a few words — in the presence of a distinguished company consisting of disciples of Protagoras and of leading Athenians belonging to the Socratic circle. The dialogue commences with a request on the part of Hippocrates that Socrates would introduce him to the celebrated teacher. He has come before the dawn had risen — so fervid is his zeal. Socrates moderates his excitement and advises him to find out ‘what Protagoras will make of him,’ before he becomes his pupil.

They go together to the house of Callias; and Socrates, after explaining the purpose of their visit to Protagoras, asks the question, ‘What he will make of Hippocrates.’ Protagoras answers, ‘That he will make him a better and a wiser man.’ ‘But in what will he be better?’ — Socrates desires to have a more precise answer. Protagoras replies, ‘That he will teach him prudence in affairs private and public; in short, the science or knowledge of human life.’

This, as Socrates admits, is a noble profession; but he is or rather would have been doubtful, whether such knowledge can be taught, if Protagoras had not assured him of the fact, for two reasons: (1) Because the Athenian people, who recognize in their assemblies the distinction between the skilled and the unskilled in the arts, do not distinguish between the trained politician and the untrained; (2) Because the wisest and best Athenian citizens do not teach their sons political virtue. Will Protagoras answer these objections?

Protagoras explains his views in the form of an apologue, in which, after Prometheus had given men the arts, Zeus is represented as sending Hermes to them, bearing with him Justice and Reverence. These are not, like the arts, to be imparted to a few only, but all men are to be partakers of them. Therefore the Athenian people are right

in distinguishing between the skilled and unskilled in the arts, and not between skilled and unskilled politicians. (1) For all men have the political virtues to a certain degree, and are obliged to say that they have them, whether they have them or not. A man would be thought a madman who professed an art which he did not know; but he would be equally thought a madman if he did not profess a virtue which he had not. (2) And that the political virtues can be taught and acquired, in the opinion of the Athenians, is proved by the fact that they punish evil-doers, with a view to prevention, of course — mere retribution is for beasts, and not for men. (3) Again, would parents who teach her sons lesser matters leave them ignorant of the common duty of citizens? To the doubt of Socrates the best answer is the fact, that the education of youth in virtue begins almost as soon as they can speak, and is continued by the state when they pass out of the parental control. (4) Nor need we wonder that wise and good fathers sometimes have foolish and worthless sons. Virtue, as we were saying, is not the private possession of any man, but is shared by all, only however to the extent of which each individual is by nature capable. And, as a matter of fact, even the worst of civilized mankind will appear virtuous and just, if we compare them with savages. (5) The error of Socrates lies in supposing that there are no teachers of virtue, whereas all men are teachers in a degree. Some, like Protagoras, are better than others, and with this result we ought to be satisfied.

Socrates is highly delighted with the explanation of Protagoras. But he has still a doubt lingering in his mind. Protagoras has spoken of the virtues: are they many, or one? are they parts of a whole, or different names of the same thing? Protagoras replies that they are parts, like the parts of a face, which have their several functions, and no one part is like any other part. This admission, which has been somewhat hastily made, is now taken up and cross-examined by Socrates: —

‘Is justice just, and is holiness holy? And are justice and holiness opposed to one another?’— ‘Then justice is unholy.’ Protagoras would rather say that justice is different from holiness, and yet in a certain point of view nearly the same. He does not, however, escape in this way from the cunning of Socrates, who inveigles him into an

admission that everything has but one opposite. Folly, for example, is opposed to wisdom; and folly is also opposed to temperance; and therefore temperance and wisdom are the same. And holiness has been already admitted to be nearly the same as justice. Temperance, therefore, has now to be compared with justice.

Protagoras, whose temper begins to get a little ruffled at the process to which he has been subjected, is aware that he will soon be compelled by the dialectics of Socrates to admit that the temperate is the just. He therefore defends himself with his favourite weapon; that is to say, he makes a long speech not much to the point, which elicits the applause of the audience.

Here occurs a sort of interlude, which commences with a declaration on the part of Socrates that he cannot follow a long speech, and therefore he must beg Protagoras to speak shorter. As Protagoras declines to accommodate him, he rises to depart, but is detained by Callias, who thinks him unreasonable in not allowing Protagoras the liberty which he takes himself of speaking as he likes. But Alcibiades answers that the two cases are not parallel. For Socrates admits his inability to speak long; will Protagoras in like manner acknowledge his inability to speak short?

Counsels of moderation are urged first in a few words by Critias, and then by Prodicus in balanced and sententious language: and Hippias proposes an umpire. But who is to be the umpire? rejoins Socrates; he would rather suggest as a compromise that Protagoras shall ask and he will answer, and that when Protagoras is tired of asking he himself will ask and Protagoras shall answer. To this the latter yields a reluctant assent.

Protagoras selects as his thesis a poem of Simonides of Ceos, in which he professes to find a contradiction. First the poet says,

‘Hard is it to become good,’

and then reproaches Pittacus for having said, ‘Hard is it to be good.’ How is this to be reconciled? Socrates, who is familiar with the poem, is embarrassed at first, and invokes the aid of Prodicus, the countryman of Simonides, but apparently only with the intention of flattering him into absurdities. First a distinction is drawn between (Greek) to be, and (Greek) to become: to become good is difficult; to be good is easy. Then the word difficult or hard is explained to mean

‘evil’ in the Cean dialect. To all this Prodicus assents; but when Protagoras reclaims, Socrates slyly withdraws Prodicus from the fray, under the pretence that his assent was only intended to test the wits of his adversary. He then proceeds to give another and more elaborate explanation of the whole passage. The explanation is as follows: —

The Lacedaemonians are great philosophers (although this is a fact which is not generally known); and the soul of their philosophy is brevity, which was also the style of primitive antiquity and of the seven sages. Now Pittacus had a saying, ‘Hard is it to be good:’ and Simonides, who was jealous of the fame of this saying, wrote a poem which was designed to controvert it. No, says he, Pittacus; not ‘hard to be good,’ but ‘hard to become good.’ Socrates proceeds to argue in a highly impressive manner that the whole composition is intended as an attack upon Pittacus. This, though manifestly absurd, is accepted by the company, and meets with the special approval of Hippias, who has however a favourite interpretation of his own, which he is requested by Alcibiades to defer.

The argument is now resumed, not without some disdainful remarks of Socrates on the practice of introducing the poets, who ought not to be allowed, any more than flute-girls, to come into good society. Men’s own thoughts should supply them with the materials for discussion. A few soothing flatteries are addressed to Protagoras by Callias and Socrates, and then the old question is repeated, ‘Whether the virtues are one or many?’ To which Protagoras is now disposed to reply, that four out of the five virtues are in some degree similar; but he still contends that the fifth, courage, is unlike the rest. Socrates proceeds to undermine the last stronghold of the adversary, first obtaining from him the admission that all virtue is in the highest degree good: —

The courageous are the confident; and the confident are those who know their business or profession: those who have no such knowledge and are still confident are madmen. This is admitted. Then, says Socrates, courage is knowledge — an inference which Protagoras evades by drawing a futile distinction between the courageous and the confident in a fluent speech.

Socrates renews the attack from another side: he would like to

know whether pleasure is not the only good, and pain the only evil? Protagoras seems to doubt the morality or propriety of assenting to this; he would rather say that ‘some pleasures are good, some pains are evil,’ which is also the opinion of the generality of mankind. What does he think of knowledge? Does he agree with the common opinion that knowledge is overcome by passion? or does he hold that knowledge is power? Protagoras agrees that knowledge is certainly a governing power.

This, however, is not the doctrine of men in general, who maintain that many who know what is best, act contrary to their knowledge under the influence of pleasure. But this opposition of good and evil is really the opposition of a greater or lesser amount of pleasure. Pleasures are evils because they end in pain, and pains are goods because they end in pleasures. Thus pleasure is seen to be the only good; and the only evil is the preference of the lesser pleasure to the greater. But then comes in the illusion of distance. Some art of mensuration is required in order to show us pleasures and pains in their true proportion. This art of mensuration is a kind of knowledge, and knowledge is thus proved once more to be the governing principle of human life, and ignorance the origin of all evil: for no one prefers the less pleasure to the greater, or the greater pain to the less, except from ignorance. The argument is drawn out in an imaginary ‘dialogue within a dialogue,’ conducted by Socrates and Protagoras on the one part, and the rest of the world on the other. Hippias and Prodicus, as well as Protagoras, admit the soundness of the conclusion.

Socrates then applies this new conclusion to the case of courage — the only virtue which still holds out against the assaults of the Socratic dialectic. No one chooses the evil or refuses the good except through ignorance. This explains why cowards refuse to go to war: — because they form a wrong estimate of good, and honour, and pleasure. And why are the courageous willing to go to war? — because they form a right estimate of pleasures and pains, of things terrible and not terrible. Courage then is knowledge, and cowardice is ignorance. And the five virtues, which were originally maintained to have five different natures, after having been easily reduced to two only, at last coalesce in one. The assent of Protagoras to this last

position is extracted with great difficulty.

Socrates concludes by professing his disinterested love of the truth, and remarks on the singular manner in which he and his adversary had changed sides. Protagoras began by asserting, and Socrates by denying, the teachableness of virtue, and now the latter ends by affirming that virtue is knowledge, which is the most teachable of all things, while Protagoras has been striving to show that virtue is not knowledge, and this is almost equivalent to saying that virtue cannot be taught. He is not satisfied with the result, and would like to renew the enquiry with the help of Protagoras in a different order, asking (1) What virtue is, and (2) Whether virtue can be taught. Protagoras declines this offer, but commends Socrates' earnestness and his style of discussion.

The Protagoras is often supposed to be full of difficulties. These are partly imaginary and partly real. The imaginary ones are (1) Chronological, — which were pointed out in ancient times by Athenaeus, and are noticed by Schleiermacher and others, and relate to the impossibility of all the persons in the Dialogue meeting at any one time, whether in the year 425 B.C., or in any other. But Plato, like all writers of fiction, aims only at the probable, and shows in many Dialogues (e.g. the Symposium and Republic, and already in the Laches) an extreme disregard of the historical accuracy which is sometimes demanded of him. (2) The exact place of the Protagoras among the Dialogues, and the date of composition, have also been much disputed. But there are no criteria which afford any real grounds for determining the date of composition; and the affinities of the Dialogues, when they are not indicated by Plato himself, must always to a great extent remain uncertain. (3) There is another class of difficulties, which may be ascribed to preconceived notions of commentators, who imagine that Protagoras the Sophist ought always to be in the wrong, and his adversary Socrates in the right; or that in this or that passage — e.g. in the explanation of good as pleasure — Plato is inconsistent with himself; or that the Dialogue fails in unity, and has not a proper beginning, middle, and ending. They seem to forget that Plato is a dramatic writer who throws his thoughts into both sides of the argument, and certainly does not aim at any unity which is inconsistent with freedom, and with a natural or

even wild manner of treating his subject; also that his mode of revealing the truth is by lights and shadows, and far-off and opposing points of view, and not by dogmatic statements or definite results.

The real difficulties arise out of the extreme subtlety of the work, which, as Socrates says of the poem of Simonides, is a most perfect piece of art. There are dramatic contrasts and interests, threads of philosophy broken and resumed, satirical reflections on mankind, veils thrown over truths which are lightly suggested, and all woven together in a single design, and moving towards one end.

In the introductory scene Plato raises the expectation that a 'great personage' is about to appear on the stage; perhaps with a further view of showing that he is destined to be overthrown by a greater still, who makes no pretensions. Before introducing Hippocrates to him, Socrates thinks proper to warn the youth against the dangers of 'influence,' of which the invidious nature is recognized by Protagoras himself. Hippocrates readily adopts the suggestion of Socrates that he shall learn of Protagoras only the accomplishments which befit an Athenian gentleman, and let alone his 'sophistry.' There is nothing however in the introduction which leads to the inference that Plato intended to blacken the character of the Sophists; he only makes a little merry at their expense.

The 'great personage' is somewhat ostentatious, but frank and honest. He is introduced on a stage which is worthy of him — at the house of the rich Callias, in which are congregated the noblest and wisest of the Athenians. He considers openness to be the best policy, and particularly mentions his own liberal mode of dealing with his pupils, as if in answer to the favourite accusation of the Sophists that they received pay. He is remarkable for the good temper which he exhibits throughout the discussion under the trying and often sophistical cross-examination of Socrates. Although once or twice ruffled, and reluctant to continue the discussion, he parts company on perfectly good terms, and appears to be, as he says of himself, the 'least jealous of mankind.'

Nor is there anything in the sentiments of Protagoras which impairs this pleasing impression of the grave and weighty old man. His real defect is that he is inferior to Socrates in dialectics. The opposition between him and Socrates is not the opposition of good

and bad, true and false, but of the old art of rhetoric and the new science of interrogation and argument; also of the irony of Socrates and the self-assertion of the Sophists. There is quite as much truth on the side of Protagoras as of Socrates; but the truth of Protagoras is based on common sense and common maxims of morality, while that of Socrates is paradoxical or transcendental, and though full of meaning and insight, hardly intelligible to the rest of mankind. Here as elsewhere is the usual contrast between the Sophists representing average public opinion and Socrates seeking for increased clearness and unity of ideas. But to a great extent Protagoras has the best of the argument and represents the better mind of man.

For example: (1) one of the noblest statements to be found in antiquity about the preventive nature of punishment is put into his mouth; (2) he is clearly right also in maintaining that virtue can be taught (which Socrates himself, at the end of the Dialogue, is disposed to concede); and also (3) in his explanation of the phenomenon that good fathers have bad sons; (4) he is right also in observing that the virtues are not like the arts, gifts or attainments of special individuals, but the common property of all: this, which in all ages has been the strength and weakness of ethics and politics, is deeply seated in human nature; (5) there is a sort of half-truth in the notion that all civilized men are teachers of virtue; and more than a half-truth (6) in ascribing to man, who in his outward conditions is more helpless than the other animals, the power of self-improvement; (7) the religious allegory should be noticed, in which the arts are said to be given by Prometheus (who stole them), whereas justice and reverence and the political virtues could only be imparted by Zeus; (8) in the latter part of the Dialogue, when Socrates is arguing that 'pleasure is the only good,' Protagoras deems it more in accordance with his character to maintain that 'some pleasures only are good;' and admits that 'he, above all other men, is bound to say "that wisdom and knowledge are the highest of human things."' "

There is no reason to suppose that in all this Plato is depicting an imaginary Protagoras; he seems to be showing us the teaching of the Sophists under the milder aspect under which he once regarded them. Nor is there any reason to doubt that Socrates is equally an historical character, paradoxical, ironical, tiresome, but seeking for the unity of

virtue and knowledge as for a precious treasure; willing to rest this even on a calculation of pleasure, and irresistible here, as everywhere in Plato, in his intellectual superiority.

The aim of Socrates, and of the Dialogue, is to show the unity of virtue. In the determination of this question the identity of virtue and knowledge is found to be involved. But if virtue and knowledge are one, then virtue can be taught; the end of the Dialogue returns to the beginning. Had Protagoras been allowed by Plato to make the Aristotelian distinction, and say that virtue is not knowledge, but is accompanied with knowledge; or to point out with Aristotle that the same quality may have more than one opposite; or with Plato himself in the *Phaedo* to deny that good is a mere exchange of a greater pleasure for a less — the unity of virtue and the identity of virtue and knowledge would have required to be proved by other arguments.

The victory of Socrates over Protagoras is in every way complete when their minds are fairly brought together. Protagoras falls before him after two or three blows. Socrates partially gains his object in the first part of the Dialogue, and completely in the second. Nor does he appear at any disadvantage when subjected to 'the question' by Protagoras. He succeeds in making his two 'friends,' Prodicus and Hippias, ludicrous by the way; he also makes a long speech in defence of the poem of Simonides, after the manner of the Sophists, showing, as Alcibiades says, that he is only pretending to have a bad memory, and that he and not Protagoras is really a master in the two styles of speaking; and that he can undertake, not one side of the argument only, but both, when Protagoras begins to break down. Against the authority of the poets with whom Protagoras has ingeniously identified himself at the commencement of the Dialogue, Socrates sets up the proverbial philosophers and those masters of brevity the Lacedaemonians. The poets, the Laconizers, and Protagoras are satirized at the same time.

Not having the whole of this poem before us, it is impossible for us to answer certainly the question of Protagoras, how the two passages of Simonides are to be reconciled. We can only follow the indications given by Plato himself. But it seems likely that the reconciliation offered by Socrates is a caricature of the methods of interpretation which were practised by the Sophists — for the

following reasons: (1) The transparent irony of the previous interpretations given by Socrates. (2) The ludicrous opening of the speech in which the Lacedaemonians are described as the true philosophers, and Laconic brevity as the true form of philosophy, evidently with an allusion to Protagoras' long speeches. (3) The manifest futility and absurdity of the explanation of (Greek), which is hardly consistent with the rational interpretation of the rest of the poem. The opposition of (Greek) and (Greek) seems also intended to express the rival doctrines of Socrates and Protagoras, and is a facetious commentary on their differences. (4) The general treatment in Plato both of the Poets and the Sophists, who are their interpreters, and whom he delights to identify with them. (5) The depreciating spirit in which Socrates speaks of the introduction of the poets as a substitute for original conversation, which is intended to contrast with Protagoras' exaltation of the study of them — this again is hardly consistent with the serious defence of Simonides. (6) the marked approval of Hippias, who is supposed at once to catch the familiar sound, just as in the previous conversation Prodicus is represented as ready to accept any distinctions of language however absurd. At the same time Hippias is desirous of substituting a new interpretation of his own; as if the words might really be made to mean anything, and were only to be regarded as affording a field for the ingenuity of the interpreter.

This curious passage is, therefore, to be regarded as Plato's satire on the tedious and hypercritical arts of interpretation which prevailed in his own day, and may be compared with his condemnation of the same arts when applied to mythology in the *Phaedrus*, and with his other parodies, e.g. with the two first speeches in the *Phaedrus* and with the *Menexenus*. Several lesser touches of satire may be observed, such as the claim of philosophy advanced for the Lacedaemonians, which is a parody of the claims advanced for the Poets by Protagoras; the mistake of the Laconizing set in supposing that the Lacedaemonians are a great nation because they bruise their ears; the far-fetched notion, which is 'really too bad,' that Simonides uses the Lesbian (?) word, (Greek), because he is addressing a Lesbian. The whole may also be considered as a satire on those who spin pompous theories out of nothing. As in the arguments of the

Euthydemus and of the Cratylus, the veil of irony is never withdrawn; and we are left in doubt at last how far in this interpretation of Simonides Socrates is 'fooling,' how far he is in earnest.

All the interests and contrasts of character in a great dramatic work like the *Protagoras* are not easily exhausted. The impressiveness of the scene should not be lost upon us, or the gradual substitution of Socrates in the second part for Protagoras in the first. The characters to whom we are introduced at the beginning of the Dialogue all play a part more or less conspicuous towards the end. There is Alcibiades, who is compelled by the necessity of his nature to be a partisan, lending effectual aid to Socrates; there is Critias assuming the tone of impartiality; Callias, here as always inclining to the Sophists, but eager for any intellectual repast; Prodicus, who finds an opportunity for displaying his distinctions of language, which are valueless and pedantic, because they are not based on dialectic; Hippias, who has previously exhibited his superficial knowledge of natural philosophy, to which, as in both the Dialogues called by his name, he now adds the profession of an interpreter of the Poets. The two latter personages have been already damaged by the mock heroic description of them in the introduction. It may be remarked that Protagoras is consistently presented to us throughout as the teacher of moral and political virtue; there is no allusion to the theories of sensation which are attributed to him in the *Theaetetus* and elsewhere, or to his denial of the existence of the gods in a well-known fragment ascribed to him; he is the religious rather than the irreligious teacher in this Dialogue. Also it may be observed that Socrates shows him as much respect as is consistent with his own ironical character; he admits that the dialectic which has overthrown Protagoras has carried himself round to a conclusion opposed to his first thesis. The force of argument, therefore, and not Socrates or Protagoras, has won the day.

But is Socrates serious in maintaining (1) that virtue cannot be taught; (2) that the virtues are one; (3) that virtue is the knowledge of pleasures and pains present and future? These propositions to us have an appearance of paradox — they are really moments or aspects of the truth by the help of which we pass from the old conventional

morality to a higher conception of virtue and knowledge. That virtue cannot be taught is a paradox of the same sort as the profession of Socrates that he knew nothing. Plato means to say that virtue is not brought to a man, but must be drawn out of him; and cannot be taught by rhetorical discourses or citations from the poets. The second question, whether the virtues are one or many, though at first sight distinct, is really a part of the same subject; for if the virtues are to be taught, they must be reducible to a common principle; and this common principle is found to be knowledge. Here, as Aristotle remarks, Socrates and Plato outstep the truth — they make a part of virtue into the whole. Further, the nature of this knowledge, which is assumed to be a knowledge of pleasures and pains, appears to us too superficial and at variance with the spirit of Plato himself. Yet, in this, Plato is only following the historical Socrates as he is depicted to us in Xenophon's *Memorabilia*. Like Socrates, he finds on the surface of human life one common bond by which the virtues are united, — their tendency to produce happiness, — though such a principle is afterwards repudiated by him.

It remains to be considered in what relation the *Protagoras* stands to the other Dialogues of Plato. That it is one of the earlier or purely Socratic works — perhaps the last, as it is certainly the greatest of them — is indicated by the absence of any allusion to the doctrine of reminiscence; and also by the different attitude assumed towards the teaching and persons of the Sophists in some of the later Dialogues. The *Charmides*, *Laches*, *Lysis*, all touch on the question of the relation of knowledge to virtue, and may be regarded, if not as preliminary studies or sketches of the more important work, at any rate as closely connected with it. The *Io* and the lesser *Hippias* contain discussions of the Poets, which offer a parallel to the ironical criticism of Simonides, and are conceived in a similar spirit. The affinity of the *Protagoras* to the *Meno* is more doubtful. For there, although the same question is discussed, 'whether virtue can be taught,' and the relation of *Meno* to the Sophists is much the same as that of *Hippocrates*, the answer to the question is supplied out of the doctrine of ideas; the real Socrates is already passing into the Platonic one. At a later stage of the Platonic philosophy we shall find that both the paradox and the solution of it appear to have been

retracted. The *Phaedo*, the *Gorgias*, and the *Philebus* offer further corrections of the teaching of the Protagoras; in all of them the doctrine that virtue is pleasure, or that pleasure is the chief or only good, is distinctly renounced.

Thus after many preparations and oppositions, both of the characters of men and aspects of the truth, especially of the popular and philosophical aspect; and after many interruptions and detentions by the way, which, as Theodorus says in the *Theaetetus*, are quite as agreeable as the argument, we arrive at the great Socratic thesis that virtue is knowledge. This is an aspect of the truth which was lost almost as soon as it was found; and yet has to be recovered by every one for himself who would pass the limits of proverbial and popular philosophy. The moral and intellectual are always dividing, yet they must be reunited, and in the highest conception of them are inseparable. The thesis of Socrates is not merely a hasty assumption, but may be also deemed an anticipation of some 'metaphysic of the future,' in which the divided elements of human nature are reconciled.

PROTAGORAS

PERSONS OF THE DIALOGUE:

Socrates, who is the narrator of the Dialogue to his Companion. Hippocrates, Alcibiades and Critias. Protagoras, Hippias and Prodicus (Sophists). Callias, a wealthy Athenian.

SCENE: The House of Callias.

COMPANION: Where do you come from, Socrates? And yet I need hardly ask the question, for I know that you have been in chase of the fair Alcibiades. I saw him the day before yesterday; and he had got a beard like a man, — and he is a man, as I may tell you in your ear. But I thought that he was still very charming.

SOCRATES: What of his beard? Are you not of Homer's opinion, who says

‘Youth is most charming when the beard first appears’?

And that is now the charm of Alcibiades.

COMPANION: Well, and how do matters proceed? Have you been visiting him, and was he gracious to you?

SOCRATES: Yes, I thought that he was very gracious; and especially to-day, for I have just come from him, and he has been helping me in an argument. But shall I tell you a strange thing? I paid no attention to him, and several times I quite forgot that he was present.

COMPANION: What is the meaning of this? Has anything happened between you and him? For surely you cannot have discovered a fairer love than he is; certainly not in this city of Athens.

SOCRATES: Yes, much fairer.

COMPANION: What do you mean — a citizen or a foreigner?

SOCRATES: A foreigner.

COMPANION: Of what country?

SOCRATES: Of Abdera.

COMPANION: And is this stranger really in your opinion a fairer love than the son of Cleinias?

SOCRATES: And is not the wiser always the fairer, sweet friend?

COMPANION: But have you really met, Socrates, with some wise one?

SOCRATES: Say rather, with the wisest of all living men, if you are willing to accord that title to Protagoras.

COMPANION: What! Is Protagoras in Athens?

SOCRATES: Yes; he has been here two days.

COMPANION: And do you just come from an interview with him?

SOCRATES: Yes; and I have heard and said many things.

COMPANION: Then, if you have no engagement, suppose that you sit down and tell me what passed, and my attendant here shall give up his place to you.

SOCRATES: To be sure; and I shall be grateful to you for listening.

COMPANION: Thank you, too, for telling us.

SOCRATES: That is thank you twice over. Listen then: —

Last night, or rather very early this morning, Hippocrates, the son of Apollodorus and the brother of Phason, gave a tremendous thump with his staff at my door; some one opened to him, and he came rushing in and bawled out: Socrates, are you awake or asleep?

I knew his voice, and said: Hippocrates, is that you? and do you bring any news?

Good news, he said; nothing but good.

Delightful, I said; but what is the news? and why have you come hither at this unearthly hour?

He drew nearer to me and said: Protagoras is come.

Yes, I replied; he came two days ago: have you only just heard of his arrival?

Yes, by the gods, he said; but not until yesterday evening.

At the same time he felt for the truckle-bed, and sat down at my feet, and then he said: Yesterday quite late in the evening, on my return from Oenoe whither I had gone in pursuit of my runaway slave Satyrus, as I meant to have told you, if some other matter had not come in the way; — on my return, when we had done supper and were about to retire to rest, my brother said to me: Protagoras is come. I was going to you at once, and then I thought that the night was far spent. But the moment sleep left me after my fatigue, I got up and came hither direct.

I, who knew the very courageous madness of the man, said: What is the matter? Has Protagoras robbed you of anything?

He replied, laughing: Yes, indeed he has, Socrates, of the wisdom which he keeps from me.

But, surely, I said, if you give him money, and make friends with him, he will make you as wise as he is himself.

Would to heaven, he replied, that this were the case! He might take all that I have, and all that my friends have, if he pleased. But that is why I have come to you now, in order that you may speak to him on my behalf; for I am young, and also I have never seen nor heard him; (when he visited Athens before I was but a child;) and all men praise him, Socrates; he is reputed to be the most accomplished of speakers. There is no reason why we should not go to him at once, and then we shall find him at home. He lodges, as I hear, with Callias the son of Hipponicus: let us start.

I replied: Not yet, my good friend; the hour is too early. But let us rise and take a turn in the court and wait about there until day-break; when the day breaks, then we will go. For Protagoras is generally at home, and we shall be sure to find him; never fear.

Upon this we got up and walked about in the court, and I thought that I would make trial of the strength of his resolution. So I examined him and put questions to him. Tell me, Hippocrates, I said, as you are going to Protagoras, and will be paying your money to him, what is he to whom you are going? and what will he make of

you? If, for example, you had thought of going to Hippocrates of Cos, the Asclepiad, and were about to give him your money, and some one had said to you: You are paying money to your namesake Hippocrates, O Hippocrates; tell me, what is he that you give him money? how would you have answered?

I should say, he replied, that I gave money to him as a physician.

And what will he make of you?

A physician, he said.

And if you were resolved to go to Polycleitus the Argive, or Pheidias the Athenian, and were intending to give them money, and some one had asked you: What are Polycleitus and Pheidias? and why do you give them this money? — how would you have answered?

I should have answered, that they were statuaries.

And what will they make of you?

A statuary, of course.

Well now, I said, you and I are going to Protagoras, and we are ready to pay him money on your behalf. If our own means are sufficient, and we can gain him with these, we shall be only too glad; but if not, then we are to spend the money of your friends as well. Now suppose, that while we are thus enthusiastically pursuing our object some one were to say to us: Tell me, Socrates, and you Hippocrates, what is Protagoras, and why are you going to pay him money, — how should we answer? I know that Pheidias is a sculptor, and that Homer is a poet; but what appellation is given to Protagoras? how is he designated?

They call him a Sophist, Socrates, he replied.

Then we are going to pay our money to him in the character of a Sophist?

Certainly.

But suppose a person were to ask this further question: And how about yourself? What will Protagoras make of you, if you go to see him?

He answered, with a blush upon his face (for the day was just beginning to dawn, so that I could see him): Unless this differs in some way from the former instances, I suppose that he will make a Sophist of me.

By the gods, I said, and are you not ashamed at having to appear before the Hellenes in the character of a Sophist?

Indeed, Socrates, to confess the truth, I am.

But you should not assume, Hippocrates, that the instruction of Protagoras is of this nature: may you not learn of him in the same way that you learned the arts of the grammarian, or musician, or trainer, not with the view of making any of them a profession, but only as a part of education, and because a private gentleman and freeman ought to know them?

Just so, he said; and that, in my opinion, is a far truer account of the teaching of Protagoras.

I said: I wonder whether you know what you are doing?

And what am I doing?

You are going to commit your soul to the care of a man whom you call a Sophist. And yet I hardly think that you know what a Sophist is; and if not, then you do not even know to whom you are committing your soul and whether the thing to which you commit yourself be good or evil.

I certainly think that I do know, he replied.

Then tell me, what do you imagine that he is?

I take him to be one who knows wise things, he replied, as his name implies.

And might you not, I said, affirm this of the painter and of the carpenter also: Do not they, too, know wise things? But suppose a person were to ask us: In what are the painters wise? We should answer: In what relates to the making of likenesses, and similarly of other things. And if he were further to ask: What is the wisdom of the Sophist, and what is the manufacture over which he presides? — how should we answer him?

How should we answer him, Socrates? What other answer could there be but that he presides over the art which makes men eloquent?

Yes, I replied, that is very likely true, but not enough; for in the answer a further question is involved: Of what does the Sophist make a man talk eloquently? The player on the lyre may be supposed to make a man talk eloquently about that which he makes him understand, that is about playing the lyre. Is not that true?

Yes.

Then about what does the Sophist make him eloquent? Must not he make him eloquent in that which he understands?

Yes, that may be assumed.

And what is that which the Sophist knows and makes his disciple know?

Indeed, he said, I cannot tell.

Then I proceeded to say: Well, but are you aware of the danger which you are incurring? If you were going to commit your body to some one, who might do good or harm to it, would you not carefully consider and ask the opinion of your friends and kindred, and deliberate many days as to whether you should give him the care of your body? But when the soul is in question, which you hold to be of far more value than the body, and upon the good or evil of which depends the well-being of your all, — about this you never consulted either with your father or with your brother or with any one of us who are your companions. But no sooner does this foreigner appear, than you instantly commit your soul to his keeping. In the evening, as you say, you hear of him, and in the morning you go to him, never deliberating or taking the opinion of any one as to whether you ought to intrust yourself to him or not; — you have quite made up your mind that you will at all hazards be a pupil of Protagoras, and are prepared to expend all the property of yourself and of your friends in carrying out at any price this determination, although, as you admit, you do not know him, and have never spoken with him: and you call him a Sophist, but are manifestly ignorant of what a Sophist is; and yet you are going to commit yourself to his keeping.

When he heard me say this, he replied: No other inference, Socrates, can be drawn from your words.

I proceeded: Is not a Sophist, Hippocrates, one who deals wholesale or retail in the food of the soul? To me that appears to be his nature.

And what, Socrates, is the food of the soul?

Surely, I said, knowledge is the food of the soul; and we must take care, my friend, that the Sophist does not deceive us when he praises what he sells, like the dealers wholesale or retail who sell the food of the body; for they praise indiscriminately all their goods, without knowing what are really beneficial or hurtful: neither do their

customers know, with the exception of any trainer or physician who may happen to buy of them. In like manner those who carry about the wares of knowledge, and make the round of the cities, and sell or retail them to any customer who is in want of them, praise them all alike; though I should not wonder, O my friend, if many of them were really ignorant of their effect upon the soul; and their customers equally ignorant, unless he who buys of them happens to be a physician of the soul. If, therefore, you have understanding of what is good and evil, you may safely buy knowledge of Protagoras or of any one; but if not, then, O my friend, pause, and do not hazard your dearest interests at a game of chance. For there is far greater peril in buying knowledge than in buying meat and drink: the one you purchase of the wholesale or retail dealer, and carry them away in other vessels, and before you receive them into the body as food, you may deposit them at home and call in any experienced friend who knows what is good to be eaten or drunken, and what not, and how much, and when; and then the danger of purchasing them is not so great. But you cannot buy the wares of knowledge and carry them away in another vessel; when you have paid for them you must receive them into the soul and go your way, either greatly harmed or greatly benefited; and therefore we should deliberate and take counsel with our elders; for we are still young — too young to determine such a matter. And now let us go, as we were intending, and hear Protagoras; and when we have heard what he has to say, we may take counsel of others; for not only is Protagoras at the house of Callias, but there is Hippias of Elis, and, if I am not mistaken, Prodicus of Ceos, and several other wise men.

To this we agreed, and proceeded on our way until we reached the vestibule of the house; and there we stopped in order to conclude a discussion which had arisen between us as we were going along; and we stood talking in the vestibule until we had finished and come to an understanding. And I think that the door-keeper, who was a eunuch, and who was probably annoyed at the great inroad of the Sophists, must have heard us talking. At any rate, when we knocked at the door, and he opened and saw us, he grumbled: They are Sophists — he is not at home; and instantly gave the door a hearty bang with both his hands. Again we knocked, and he answered

without opening: Did you not hear me say that he is not at home, fellows? But, my friend, I said, you need not be alarmed; for we are not Sophists, and we are not come to see Callias, but we want to see Protagoras; and I must request you to announce us. At last, after a good deal of difficulty, the man was persuaded to open the door.

When we entered, we found Protagoras taking a walk in the cloister; and next to him, on one side, were walking Callias, the son of Hipponicus, and Paralus, the son of Pericles, who, by the mother's side, is his half-brother, and Charmides, the son of Glaucon. On the other side of him were Xanthippus, the other son of Pericles, Philippides, the son of Philomelus; also Antimoerus of Mende, who of all the disciples of Protagoras is the most famous, and intends to make sophistry his profession. A train of listeners followed him; the greater part of them appeared to be foreigners, whom Protagoras had brought with him out of the various cities visited by him in his journeys, he, like Orpheus, attracting them his voice, and they following (*Compare Rep.*). I should mention also that there were some Athenians in the company. Nothing delighted me more than the precision of their movements: they never got into his way at all; but when he and those who were with him turned back, then the band of listeners parted regularly on either side; he was always in front, and they wheeled round and took their places behind him in perfect order.

After him, as Homer says (*Od.*), 'I lifted up my eyes and saw' Hippias the Elean sitting in the opposite cloister on a chair of state, and around him were seated on benches Eryximachus, the son of Acumenus, and Phaedrus the Myrrhinusian, and Andron the son of Androtion, and there were strangers whom he had brought with him from his native city of Elis, and some others: they were putting to Hippias certain physical and astronomical questions, and he, ex cathedra, was determining their several questions to them, and discoursing of them.

Also, 'my eyes beheld Tantalus (*Od.*);' for Prodicus the Cean was at Athens: he had been lodged in a room which, in the days of Hipponicus, was a storehouse; but, as the house was full, Callias had cleared this out and made the room into a guest-chamber. Now Prodicus was still in bed, wrapped up in sheepskins and bedclothes, of which there seemed to be a great heap; and there was sitting by

him on the couches near, Pausanias of the deme of Cerameis, and with Pausanias was a youth quite young, who is certainly remarkable for his good looks, and, if I am not mistaken, is also of a fair and gentle nature. I thought that I heard him called Agathon, and my suspicion is that he is the beloved of Pausanias. There was this youth, and also there were the two Adeimantuses, one the son of Cepis, and the other of Leucolophides, and some others. I was very anxious to hear what Prodicus was saying, for he seems to me to be an all-wise and inspired man; but I was not able to get into the inner circle, and his fine deep voice made an echo in the room which rendered his words inaudible.

No sooner had we entered than there followed us Alcibiades the beautiful, as you say, and I believe you; and also Critias the son of Callaeschrus.

On entering we stopped a little, in order to look about us, and then walked up to Protagoras, and I said: Protagoras, my friend Hippocrates and I have come to see you.

Do you wish, he said, to speak with me alone, or in the presence of the company?

Whichever you please, I said; you shall determine when you have heard the purpose of our visit.

And what is your purpose? he said.

I must explain, I said, that my friend Hippocrates is a native Athenian; he is the son of Apollodorus, and of a great and prosperous house, and he is himself in natural ability quite a match for anybody of his own age. I believe that he aspires to political eminence; and this he thinks that conversation with you is most likely to procure for him. And now you can determine whether you would wish to speak to him of your teaching alone or in the presence of the company.

Thank you, Socrates, for your consideration of me. For certainly a stranger finding his way into great cities, and persuading the flower of the youth in them to leave company of their kinsmen or any other acquaintances, old or young, and live with him, under the idea that they will be improved by his conversation, ought to be very cautious; great jealousies are aroused by his proceedings, and he is the subject of many enmities and conspiracies. Now the art of the Sophist is, as I believe, of great antiquity; but in ancient times those who practised

it, fearing this odium, veiled and disguised themselves under various names, some under that of poets, as Homer, Hesiod, and Simonides, some, of hierophants and prophets, as Orpheus and Musaeus, and some, as I observe, even under the name of gymnastic-masters, like Iccus of Tarentum, or the more recently celebrated Herodicus, now of Selymbria and formerly of Megara, who is a first-rate Sophist. Your own Agathocles pretended to be a musician, but was really an eminent Sophist; also Pythocleides the Cean; and there were many others; and all of them, as I was saying, adopted these arts as veils or disguises because they were afraid of the odium which they would incur. But that is not my way, for I do not believe that they effected their purpose, which was to deceive the government, who were not blinded by them; and as to the people, they have no understanding, and only repeat what their rulers are pleased to tell them. Now to run away, and to be caught in running away, is the very height of folly, and also greatly increases the exasperation of mankind; for they regard him who runs away as a rogue, in addition to any other objections which they have to him; and therefore I take an entirely opposite course, and acknowledge myself to be a Sophist and instructor of mankind; such an open acknowledgement appears to me to be a better sort of caution than concealment. Nor do I neglect other precautions, and therefore I hope, as I may say, by the favour of heaven that no harm will come of the acknowledgment that I am a Sophist. And I have been now many years in the profession — for all my years when added up are many: there is no one here present of whom I might not be the father. Wherefore I should much prefer conversing with you, if you want to speak with me, in the presence of the company.

As I suspected that he would like to have a little display and glorification in the presence of Prodicus and Hippias, and would gladly show us to them in the light of his admirers, I said: But why should we not summon Prodicus and Hippias and their friends to hear us?

Very good, he said.

Suppose, said Callias, that we hold a council in which you may sit and discuss. — This was agreed upon, and great delight was felt at the prospect of hearing wise men talk; we ourselves took the chairs

and benches, and arranged them by Hippias, where the other benches had been already placed. Meanwhile Callias and Alcibiades got Prodicus out of bed and brought in him and his companions.

When we were all seated, Protagoras said: Now that the company are assembled, Socrates, tell me about the young man of whom you were just now speaking.

I replied: I will begin again at the same point, Protagoras, and tell you once more the purport of my visit: this is my friend Hippocrates, who is desirous of making your acquaintance; he would like to know what will happen to him if he associates with you. I have no more to say.

Protagoras answered: Young man, if you associate with me, on the very first day you will return home a better man than you came, and better on the second day than on the first, and better every day than you were on the day before.

When I heard this, I said: Protagoras, I do not at all wonder at hearing you say this; even at your age, and with all your wisdom, if any one were to teach you what you did not know before, you would become better no doubt: but please to answer in a different way — I will explain how by an example. Let me suppose that Hippocrates, instead of desiring your acquaintance, wished to become acquainted with the young man Zeuxippus of Heraclea, who has lately been in Athens, and he had come to him as he has come to you, and had heard him say, as he has heard you say, that every day he would grow and become better if he associated with him: and then suppose that he were to ask him, ‘In what shall I become better, and in what shall I grow?’ — Zeuxippus would answer, ‘In painting.’ And suppose that he went to Orthagoras the Theban, and heard him say the same thing, and asked him, ‘In what shall I become better day by day?’ he would reply, ‘In flute-playing.’ Now I want you to make the same sort of answer to this young man and to me, who am asking questions on his account. When you say that on the first day on which he associates with you he will return home a better man, and on every day will grow in like manner, — in what, Protagoras, will he be better? and about what?

When Protagoras heard me say this, he replied: You ask questions fairly, and I like to answer a question which is fairly put. If

Hippocrates comes to me he will not experience the sort of drudgery with which other Sophists are in the habit of insulting their pupils; who, when they have just escaped from the arts, are taken and driven back into them by these teachers, and made to learn calculation, and astronomy, and geometry, and music (he gave a look at Hippias as he said this); but if he comes to me, he will learn that which he comes to learn. And this is prudence in affairs private as well as public; he will learn to order his own house in the best manner, and he will be able to speak and act for the best in the affairs of the state.

Do I understand you, I said; and is your meaning that you teach the art of politics, and that you promise to make men good citizens?

That, Socrates, is exactly the profession which I make.

Then, I said, you do indeed possess a noble art, if there is no mistake about this; for I will freely confess to you, Protagoras, that I have a doubt whether this art is capable of being taught, and yet I know not how to disbelieve your assertion. And I ought to tell you why I am of opinion that this art cannot be taught or communicated by man to man. I say that the Athenians are an understanding people, and indeed they are esteemed to be such by the other Hellenes. Now I observe that when we are met together in the assembly, and the matter in hand relates to building, the builders are summoned as advisers; when the question is one of ship-building, then the shipwrights; and the like of other arts which they think capable of being taught and learned. And if some person offers to give them advice who is not supposed by them to have any skill in the art, even though he be good-looking, and rich, and noble, they will not listen to him, but laugh and hoot at him, until either he is clamoured down and retires of himself; or if he persist, he is dragged away or put out by the constables at the command of the prytanes. This is their way of behaving about professors of the arts. But when the question is an affair of state, then everybody is free to have a say — carpenter, tinker, cobbler, sailor, passenger; rich and poor, high and low — any one who likes gets up, and no one reproaches him, as in the former case, with not having learned, and having no teacher, and yet giving advice; evidently because they are under the impression that this sort of knowledge cannot be taught. And not only is this true of the state, but of individuals; the best and wisest of our citizens are unable to

impart their political wisdom to others: as for example, Pericles, the father of these young men, who gave them excellent instruction in all that could be learned from masters, in his own department of politics neither taught them, nor gave them teachers; but they were allowed to wander at their own free will in a sort of hope that they would light upon virtue of their own accord. Or take another example: there was Cleinias the younger brother of our friend Alcibiades, of whom this very same Pericles was the guardian; and he being in fact under the apprehension that Cleinias would be corrupted by Alcibiades, took him away, and placed him in the house of Ariphron to be educated; but before six months had elapsed, Ariphron sent him back, not knowing what to do with him. And I could mention numberless other instances of persons who were good themselves, and never yet made any one else good, whether friend or stranger. Now I, Protagoras, having these examples before me, am inclined to think that virtue cannot be taught. But then again, when I listen to your words, I waver; and am disposed to think that there must be something in what you say, because I know that you have great experience, and learning, and invention. And I wish that you would, if possible, show me a little more clearly that virtue can be taught. Will you be so good?

That I will, Socrates, and gladly. But what would you like? Shall I, as an elder, speak to you as younger men in an apologue or myth, or shall I argue out the question?

To this several of the company answered that he should choose for himself.

Well, then, he said, I think that the myth will be more interesting.

Once upon a time there were gods only, and no mortal creatures. But when the time came that these also should be created, the gods fashioned them out of earth and fire and various mixtures of both elements in the interior of the earth; and when they were about to bring them into the light of day, they ordered Prometheus and Epimetheus to equip them, and to distribute to them severally their proper qualities. Epimetheus said to Prometheus: 'Let me distribute, and do you inspect.' This was agreed, and Epimetheus made the distribution. There were some to whom he gave strength without swiftness, while he equipped the weaker with swiftness; some he

armed, and others he left unarmed; and devised for the latter some other means of preservation, making some large, and having their size as a protection, and others small, whose nature was to fly in the air or burrow in the ground; this was to be their way of escape. Thus did he compensate them with the view of preventing any race from becoming extinct. And when he had provided against their destruction by one another, he contrived also a means of protecting them against the seasons of heaven; clothing them with close hair and thick skins sufficient to defend them against the winter cold and able to resist the summer heat, so that they might have a natural bed of their own when they wanted to rest; also he furnished them with hoofs and hair and hard and callous skins under their feet. Then he gave them varieties of food, — herb of the soil to some, to others fruits of trees, and to others roots, and to some again he gave other animals as food. And some he made to have few young ones, while those who were their prey were very prolific; and in this manner the race was preserved. Thus did Epimetheus, who, not being very wise, forgot that he had distributed among the brute animals all the qualities which he had to give, — and when he came to man, who was still unprovided, he was terribly perplexed. Now while he was in this perplexity, Prometheus came to inspect the distribution, and he found that the other animals were suitably furnished, but that man alone was naked and shoeless, and had neither bed nor arms of defence. The appointed hour was approaching when man in his turn was to go forth into the light of day; and Prometheus, not knowing how he could devise his salvation, stole the mechanical arts of Hephaestus and Athene, and fire with them (they could neither have been acquired nor used without fire), and gave them to man. Thus man had the wisdom necessary to the support of life, but political wisdom he had not; for that was in the keeping of Zeus, and the power of Prometheus did not extend to entering into the citadel of heaven, where Zeus dwelt, who moreover had terrible sentinels; but he did enter by stealth into the common workshop of Athene and Hephaestus, in which they used to practise their favourite arts, and carried off Hephaestus' art of working by fire, and also the art of Athene, and gave them to man. And in this way man was supplied with the means of life. But Prometheus is said to have been

afterwards prosecuted for theft, owing to the blunder of Epimetheus.

Now man, having a share of the divine attributes, was at first the only one of the animals who had any gods, because he alone was of their kindred; and he would raise altars and images of them. He was not long in inventing articulate speech and names; and he also constructed houses and clothes and shoes and beds, and drew sustenance from the earth. Thus provided, mankind at first lived dispersed, and there were no cities. But the consequence was that they were destroyed by the wild beasts, for they were utterly weak in comparison of them, and their art was only sufficient to provide them with the means of life, and did not enable them to carry on war against the animals: food they had, but not as yet the art of government, of which the art of war is a part. After a while the desire of self-preservation gathered them into cities; but when they were gathered together, having no art of government, they evil intreated one another, and were again in process of dispersion and destruction. Zeus feared that the entire race would be exterminated, and so he sent Hermes to them, bearing reverence and justice to be the ordering principles of cities and the bonds of friendship and conciliation. Hermes asked Zeus how he should impart justice and reverence among men: — Should he distribute them as the arts are distributed; that is to say, to a favoured few only, one skilled individual having enough of medicine or of any other art for many unskilled ones? ‘Shall this be the manner in which I am to distribute justice and reverence among men, or shall I give them to all?’ ‘To all,’ said Zeus; ‘I should like them all to have a share; for cities cannot exist, if a few only share in the virtues, as in the arts. And further, make a law by my order, that he who has no part in reverence and justice shall be put to death, for he is a plague of the state.’

And this is the reason, Socrates, why the Athenians and mankind in general, when the question relates to carpentering or any other mechanical art, allow but a few to share in their deliberations; and when any one else interferes, then, as you say, they object, if he be not of the favoured few; which, as I reply, is very natural. But when they meet to deliberate about political virtue, which proceeds only by way of justice and wisdom, they are patient enough of any man who speaks of them, as is also natural, because they think that every man

ought to share in this sort of virtue, and that states could not exist if this were otherwise. I have explained to you, Socrates, the reason of this phenomenon.

And that you may not suppose yourself to be deceived in thinking that all men regard every man as having a share of justice or honesty and of every other political virtue, let me give you a further proof, which is this. In other cases, as you are aware, if a man says that he is a good flute-player, or skilful in any other art in which he has no skill, people either laugh at him or are angry with him, and his relations think that he is mad and go and admonish him; but when honesty is in question, or some other political virtue, even if they know that he is dishonest, yet, if the man comes publicly forward and tells the truth about his dishonesty, then, what in the other case was held by them to be good sense, they now deem to be madness. They say that all men ought to profess honesty whether they are honest or not, and that a man is out of his mind who says anything else. Their notion is, that a man must have some degree of honesty; and that if he has none at all he ought not to be in the world.

I have been showing that they are right in admitting every man as a counsellor about this sort of virtue, as they are of opinion that every man is a partaker of it. And I will now endeavour to show further that they do not conceive this virtue to be given by nature, or to grow spontaneously, but to be a thing which may be taught; and which comes to a man by taking pains. No one would instruct, no one would rebuke, or be angry with those whose calamities they suppose to be due to nature or chance; they do not try to punish or to prevent them from being what they are; they do but pity them. Who is so foolish as to chastise or instruct the ugly, or the diminutive, or the feeble? And for this reason. Because he knows that good and evil of this kind is the work of nature and of chance; whereas if a man is wanting in those good qualities which are attained by study and exercise and teaching, and has only the contrary evil qualities, other men are angry with him, and punish and reprove him — of these evil qualities one is impiety, another injustice, and they may be described generally as the very opposite of political virtue. In such cases any man will be angry with another, and reprimand him, — clearly because he thinks that by study and learning, the virtue in which the

other is deficient may be acquired. If you will think, Socrates, of the nature of punishment, you will see at once that in the opinion of mankind virtue may be acquired; no one punishes the evil-doer under the notion, or for the reason, that he has done wrong, — only the unreasonable fury of a beast acts in that manner. But he who desires to inflict rational punishment does not retaliate for a past wrong which cannot be undone; he has regard to the future, and is desirous that the man who is punished, and he who sees him punished, may be deterred from doing wrong again. He punishes for the sake of prevention, thereby clearly implying that virtue is capable of being taught. This is the notion of all who retaliate upon others either privately or publicly. And the Athenians, too, your own citizens, like other men, punish and take vengeance on all whom they regard as evil doers; and hence, we may infer them to be of the number of those who think that virtue may be acquired and taught. Thus far, Socrates, I have shown you clearly enough, if I am not mistaken, that your countrymen are right in admitting the tinker and the cobbler to advise about politics, and also that they deem virtue to be capable of being taught and acquired.

There yet remains one difficulty which has been raised by you about the sons of good men. What is the reason why good men teach their sons the knowledge which is gained from teachers, and make them wise in that, but do nothing towards improving them in the virtues which distinguish themselves? And here, Socrates, I will leave the apologue and resume the argument. Please to consider: Is there or is there not some one quality of which all the citizens must be partakers, if there is to be a city at all? In the answer to this question is contained the only solution of your difficulty; there is no other. For if there be any such quality, and this quality or unity is not the art of the carpenter, or the smith, or the potter, but justice and temperance and holiness and, in a word, manly virtue — if this is the quality of which all men must be partakers, and which is the very condition of their learning or doing anything else, and if he who is wanting in this, whether he be a child only or a grown-up man or woman, must be taught and punished, until by punishment he becomes better, and he who rebels against instruction and punishment is either exiled or condemned to death under the idea that

he is incurable — if what I am saying be true, good men have their sons taught other things and not this, do consider how extraordinary their conduct would appear to be. For we have shown that they think virtue capable of being taught and cultivated both in private and public; and, notwithstanding, they have their sons taught lesser matters, ignorance of which does not involve the punishment of death: but greater things, of which the ignorance may cause death and exile to those who have no training or knowledge of them — aye, and confiscation as well as death, and, in a word, may be the ruin of families — those things, I say, they are supposed not to teach them, — not to take the utmost care that they should learn. How improbable is this, Socrates!

Education and admonition commence in the first years of childhood, and last to the very end of life. Mother and nurse and father and tutor are vying with one another about the improvement of the child as soon as ever he is able to understand what is being said to him: he cannot say or do anything without their setting forth to him that this is just and that is unjust; this is honourable, that is dishonourable; this is holy, that is unholy; do this and abstain from that. And if he obeys, well and good; if not, he is straightened by threats and blows, like a piece of bent or warped wood. At a later stage they send him to teachers, and enjoin them to see to his manners even more than to his reading and music; and the teachers do as they are desired. And when the boy has learned his letters and is beginning to understand what is written, as before he understood only what was spoken, they put into his hands the works of great poets, which he reads sitting on a bench at school; in these are contained many admonitions, and many tales, and praises, and encomia of ancient famous men, which he is required to learn by heart, in order that he may imitate or emulate them and desire to become like them. Then, again, the teachers of the lyre take similar care that their young disciple is temperate and gets into no mischief; and when they have taught him the use of the lyre, they introduce him to the poems of other excellent poets, who are the lyric poets; and these they set to music, and make their harmonies and rhythms quite familiar to the children's souls, in order that they may learn to be more gentle, and harmonious, and rhythmical, and so more fitted

for speech and action; for the life of man in every part has need of harmony and rhythm. Then they send them to the master of gymnastic, in order that their bodies may better minister to the virtuous mind, and that they may not be compelled through bodily weakness to play the coward in war or on any other occasion. This is what is done by those who have the means, and those who have the means are the rich; their children begin to go to school soonest and leave off latest. When they have done with masters, the state again compels them to learn the laws, and live after the pattern which they furnish, and not after their own fancies; and just as in learning to write, the writing-master first draws lines with a style for the use of the young beginner, and gives him the tablet and makes him follow the lines, so the city draws the laws, which were the invention of good lawgivers living in the olden time; these are given to the young man, in order to guide him in his conduct whether he is commanding or obeying; and he who transgresses them is to be corrected, or, in other words, called to account, which is a term used not only in your country, but also in many others, seeing that justice calls men to account. Now when there is all this care about virtue private and public, why, Socrates, do you still wonder and doubt whether virtue can be taught? Cease to wonder, for the opposite would be far more surprising.

But why then do the sons of good fathers often turn out ill? There is nothing very wonderful in this; for, as I have been saying, the existence of a state implies that virtue is not any man's private possession. If so — and nothing can be truer — then I will further ask you to imagine, as an illustration, some other pursuit or branch of knowledge which may be assumed equally to be the condition of the existence of a state. Suppose that there could be no state unless we were all flute-players, as far as each had the capacity, and everybody was freely teaching everybody the art, both in private and public, and reproving the bad player as freely and openly as every man now teaches justice and the laws, not concealing them as he would conceal the other arts, but imparting them — for all of us have a mutual interest in the justice and virtue of one another, and this is the reason why every one is so ready to teach justice and the laws; — suppose, I say, that there were the same readiness and liberality

among us in teaching one another flute-playing, do you imagine, Socrates, that the sons of good flute-players would be more likely to be good than the sons of bad ones? I think not. Would not their sons grow up to be distinguished or undistinguished according to their own natural capacities as flute-players, and the son of a good player would often turn out to be a bad one, and the son of a bad player to be a good one, all flute-players would be good enough in comparison of those who were ignorant and unacquainted with the art of flute-playing? In like manner I would have you consider that he who appears to you to be the worst of those who have been brought up in laws and humanities, would appear to be a just man and a master of justice if he were to be compared with men who had no education, or courts of justice, or laws, or any restraints upon them which compelled them to practise virtue — with the savages, for example, whom the poet Pherecrates exhibited on the stage at the last year's Lenaeon festival. If you were living among men such as the man-haters in his Chorus, you would be only too glad to meet with Eurybates and Phrynondas, and you would sorrowfully long to revisit the rascality of this part of the world. You, Socrates, are discontented, and why? Because all men are teachers of virtue, each one according to his ability; and you say Where are the teachers? You might as well ask, Who teaches Greek? For of that too there will not be any teachers found. Or you might ask, Who is to teach the sons of our artisans this same art which they have learned of their fathers? He and his fellow-workmen have taught them to the best of their ability, — but who will carry them further in their arts? And you would certainly have a difficulty, Socrates, in finding a teacher of them; but there would be no difficulty in finding a teacher of those who are wholly ignorant. And this is true of virtue or of anything else; if a man is better able than we are to promote virtue ever so little, we must be content with the result. A teacher of this sort I believe myself to be, and above all other men to have the knowledge which makes a man noble and good; and I give my pupils their money's-worth, and even more, as they themselves confess. And therefore I have introduced the following mode of payment: — When a man has been my pupil, if he likes he pays my price, but there is no compulsion; and if he does not like, he has only to go into

a temple and take an oath of the value of the instructions, and he pays no more than he declares to be their value.

Such is my Apologue, Socrates, and such is the argument by which I endeavour to show that virtue may be taught, and that this is the opinion of the Athenians. And I have also attempted to show that you are not to wonder at good fathers having bad sons, or at good sons having bad fathers, of which the sons of Polycleitus afford an example, who are the companions of our friends here, Paralus and Xanthippus, but are nothing in comparison with their father; and this is true of the sons of many other artists. As yet I ought not to say the same of Paralus and Xanthippus themselves, for they are young and there is still hope of them.

Protagoras ended, and in my ear

‘So charming left his voice, that I the while Thought him still speaking; still stood fixed to hear (Borrowed by Milton, “Paradise Lost”).’

At length, when the truth dawned upon me, that he had really finished, not without difficulty I began to collect myself, and looking at Hippocrates, I said to him: O son of Apollodorus, how deeply grateful I am to you for having brought me hither; I would not have missed the speech of Protagoras for a great deal. For I used to imagine that no human care could make men good; but I know better now. Yet I have still one very small difficulty which I am sure that Protagoras will easily explain, as he has already explained so much. If a man were to go and consult Pericles or any of our great speakers about these matters, he might perhaps hear as fine a discourse; but then when one has a question to ask of any of them, like books, they can neither answer nor ask; and if any one challenges the least particular of their speech, they go ringing on in a long harangue, like brazen pots, which when they are struck continue to sound unless some one puts his hand upon them; whereas our friend Protagoras can not only make a good speech, as he has already shown, but when he is asked a question he can answer briefly; and when he asks he will wait and hear the answer; and this is a very rare gift. Now I, Protagoras, want to ask of you a little question, which if you will only answer, I shall be quite satisfied. You were saying that virtue can be taught; — that I will take upon your authority, and there is no

one to whom I am more ready to trust. But I marvel at one thing about which I should like to have my mind set at rest. You were speaking of Zeus sending justice and reverence to men; and several times while you were speaking, justice, and temperance, and holiness, and all these qualities, were described by you as if together they made up virtue. Now I want you to tell me truly whether virtue is one whole, of which justice and temperance and holiness are parts; or whether all these are only the names of one and the same thing: that is the doubt which still lingers in my mind.

There is no difficulty, Socrates, in answering that the qualities of which you are speaking are the parts of virtue which is one.

And are they parts, I said, in the same sense in which mouth, nose, and eyes, and ears, are the parts of a face; or are they like the parts of gold, which differ from the whole and from one another only in being larger or smaller?

I should say that they differed, Socrates, in the first way; they are related to one another as the parts of a face are related to the whole face.

And do men have some one part and some another part of virtue? Or if a man has one part, must he also have all the others?

By no means, he said; for many a man is brave and not just, or just and not wise.

You would not deny, then, that courage and wisdom are also parts of virtue?

Most undoubtedly they are, he answered; and wisdom is the noblest of the parts.

And they are all different from one another? I said.

Yes.

And has each of them a distinct function like the parts of the face; — the eye, for example, is not like the ear, and has not the same functions; and the other parts are none of them like one another, either in their functions, or in any other way? I want to know whether the comparison holds concerning the parts of virtue. Do they also differ from one another in themselves and in their functions? For that is clearly what the simile would imply.

Yes, Socrates, you are right in supposing that they differ.

Then, I said, no other part of virtue is like knowledge, or like

justice, or like courage, or like temperance, or like holiness?

No, he answered.

Well then, I said, suppose that you and I enquire into their natures. And first, you would agree with me that justice is of the nature of a thing, would you not? That is my opinion: would it not be yours also?

Mine also, he said.

And suppose that some one were to ask us, saying, 'O Protagoras, and you, Socrates, what about this thing which you were calling justice, is it just or unjust?' — and I were to answer, just: would you vote with me or against me?

With you, he said.

Thereupon I should answer to him who asked me, that justice is of the nature of the just: would not you?

Yes, he said.

And suppose that he went on to say: 'Well now, is there also such a thing as holiness?' — we should answer, 'Yes,' if I am not mistaken?

Yes, he said.

Which you would also acknowledge to be a thing — should we not say so?

He assented.

'And is this a sort of thing which is of the nature of the holy, or of the nature of the unholy?' I should be angry at his putting such a question, and should say, 'Peace, man; nothing can be holy if holiness is not holy.' What would you say? Would you not answer in the same way?

Certainly, he said.

And then after this suppose that he came and asked us, 'What were you saying just now? Perhaps I may not have heard you rightly, but you seemed to me to be saying that the parts of virtue were not the same as one another.' I should reply, 'You certainly heard that said, but not, as you imagine, by me; for I only asked the question; Protagoras gave the answer.' And suppose that he turned to you and said, 'Is this true, Protagoras? and do you maintain that one part of virtue is unlike another, and is this your position?' — how would you answer him?

I could not help acknowledging the truth of what he said, Socrates.

Well then, Protagoras, we will assume this; and now supposing that he proceeded to say further, 'Then holiness is not of the nature of justice, nor justice of the nature of holiness, but of the nature of unholiness; and holiness is of the nature of the not just, and therefore of the unjust, and the unjust is the unholy': how shall we answer him? I should certainly answer him on my own behalf that justice is holy, and that holiness is just; and I would say in like manner on your behalf also, if you would allow me, that justice is either the same with holiness, or very nearly the same; and above all I would assert that justice is like holiness and holiness is like justice; and I wish that you would tell me whether I may be permitted to give this answer on your behalf, and whether you would agree with me.

He replied, I cannot simply agree, Socrates, to the proposition that justice is holy and that holiness is just, for there appears to me to be a difference between them. But what matter? if you please I please; and let us assume, if you will I, that justice is holy, and that holiness is just.

Pardon me, I replied; I do not want this 'if you wish' or 'if you will' sort of conclusion to be proven, but I want you and me to be proven: I mean to say that the conclusion will be best proven if there be no 'if.'

Well, he said, I admit that justice bears a resemblance to holiness, for there is always some point of view in which everything is like every other thing; white is in a certain way like black, and hard is like soft, and the most extreme opposites have some qualities in common; even the parts of the face which, as we were saying before, are distinct and have different functions, are still in a certain point of view similar, and one of them is like another of them. And you may prove that they are like one another on the same principle that all things are like one another; and yet things which are like in some particular ought not to be called alike, nor things which are unlike in some particular, however slight, unlike.

And do you think, I said in a tone of surprise, that justice and holiness have but a small degree of likeness?

Certainly not; any more than I agree with what I understand to be

your view.

Well, I said, as you appear to have a difficulty about this, let us take another of the examples which you mentioned instead. Do you admit the existence of folly?

I do.

And is not wisdom the very opposite of folly?

That is true, he said.

And when men act rightly and advantageously they seem to you to be temperate?

Yes, he said.

And temperance makes them temperate?

Certainly.

And they who do not act rightly act foolishly, and in acting thus are not temperate?

I agree, he said.

Then to act foolishly is the opposite of acting temperately?

He assented.

And foolish actions are done by folly, and temperate actions by temperance?

He agreed.

And that is done strongly which is done by strength, and that which is weakly done, by weakness?

He assented.

And that which is done with swiftness is done swiftly, and that which is done with slowness, slowly?

He assented again.

And that which is done in the same manner, is done by the same; and that which is done in an opposite manner by the opposite?

He agreed.

Once more, I said, is there anything beautiful?

Yes.

To which the only opposite is the ugly?

There is no other.

And is there anything good?

There is.

To which the only opposite is the evil?

There is no other.

And there is the acute in sound?

True.

To which the only opposite is the grave?

There is no other, he said, but that.

Then every opposite has one opposite only and no more?

He assented.

Then now, I said, let us recapitulate our admissions. First of all we admitted that everything has one opposite and not more than one?

We did so.

And we admitted also that what was done in opposite ways was done by opposites?

Yes.

And that which was done foolishly, as we further admitted, was done in the opposite way to that which was done temperately?

Yes.

And that which was done temperately was done by temperance, and that which was done foolishly by folly?

He agreed.

And that which is done in opposite ways is done by opposites?

Yes.

And one thing is done by temperance, and quite another thing by folly?

Yes.

And in opposite ways?

Certainly.

And therefore by opposites: — then folly is the opposite of temperance?

Clearly.

And do you remember that folly has already been acknowledged by us to be the opposite of wisdom?

He assented.

And we said that everything has only one opposite?

Yes.

Then, Protagoras, which of the two assertions shall we renounce? One says that everything has but one opposite; the other that wisdom is distinct from temperance, and that both of them are parts of virtue; and that they are not only distinct, but dissimilar, both in themselves

and in their functions, like the parts of a face. Which of these two assertions shall we renounce? For both of them together are certainly not in harmony; they do not accord or agree: for how can they be said to agree if everything is assumed to have only one opposite and not more than one, and yet folly, which is one, has clearly the two opposites — wisdom and temperance? Is not that true, Protagoras? What else would you say?

He assented, but with great reluctance.

Then temperance and wisdom are the same, as before justice and holiness appeared to us to be nearly the same. And now, Protagoras, I said, we must finish the enquiry, and not faint. Do you think that an unjust man can be temperate in his injustice?

I should be ashamed, Socrates, he said, to acknowledge this, which nevertheless many may be found to assert.

And shall I argue with them or with you? I replied.

I would rather, he said, that you should argue with the many first, if you will.

Whichever you please, if you will only answer me and say whether you are of their opinion or not. My object is to test the validity of the argument; and yet the result may be that I who ask and you who answer may both be put on our trial.

Protagoras at first made a show of refusing, as he said that the argument was not encouraging; at length, he consented to answer.

Now then, I said, begin at the beginning and answer me. You think that some men are temperate, and yet unjust?

Yes, he said; let that be admitted.

And temperance is good sense?

Yes.

And good sense is good counsel in doing injustice?

Granted.

If they succeed, I said, or if they do not succeed?

If they succeed.

And you would admit the existence of goods?

Yes.

And is the good that which is expedient for man?

Yes, indeed, he said: and there are some things which may be inexpedient, and yet I call them good.

I thought that Protagoras was getting ruffled and excited; he seemed to be setting himself in an attitude of war. Seeing this, I minded my business, and gently said: —

When you say, Protagoras, that things inexpedient are good, do you mean inexpedient for man only, or inexpedient altogether? and do you call the latter good?

Certainly not the last, he replied; for I know of many things — meats, drinks, medicines, and ten thousand other things, which are inexpedient for man, and some which are expedient; and some which are neither expedient nor inexpedient for man, but only for horses; and some for oxen only, and some for dogs; and some for no animals, but only for trees; and some for the roots of trees and not for their branches, as for example, manure, which is a good thing when laid about the roots of a tree, but utterly destructive if thrown upon the shoots and young branches; or I may instance olive oil, which is mischievous to all plants, and generally most injurious to the hair of every animal with the exception of man, but beneficial to human hair and to the human body generally; and even in this application (so various and changeable is the nature of the benefit), that which is the greatest good to the outward parts of a man, is a very great evil to his inward parts: and for this reason physicians always forbid their patients the use of oil in their food, except in very small quantities, just enough to extinguish the disagreeable sensation of smell in meats and sauces.

When he had given this answer, the company cheered him. And I said: Protagoras, I have a wretched memory, and when any one makes a long speech to me I never remember what he is talking about. As then, if I had been deaf, and you were going to converse with me, you would have had to raise your voice; so now, having such a bad memory, I will ask you to cut your answers shorter, if you would take me with you.

What do you mean? he said: how am I to shorten my answers? shall I make them too short?

Certainly not, I said.

But short enough?

Yes, I said.

Shall I answer what appears to me to be short enough, or what

appears to you to be short enough?

I have heard, I said, that you can speak and teach others to speak about the same things at such length that words never seemed to fail, or with such brevity that no one could use fewer of them. Please therefore, if you talk with me, to adopt the latter or more compendious method.

Socrates, he replied, many a battle of words have I fought, and if I had followed the method of disputation which my adversaries desired, as you want me to do, I should have been no better than another, and the name of Protagoras would have been nowhere.

I saw that he was not satisfied with his previous answers, and that he would not play the part of answerer any more if he could help; and I considered that there was no call upon me to continue the conversation; so I said: Protagoras, I do not wish to force the conversation upon you if you had rather not, but when you are willing to argue with me in such a way that I can follow you, then I will argue with you. Now you, as is said of you by others and as you say of yourself, are able to have discussions in shorter forms of speech as well as in longer, for you are a master of wisdom; but I cannot manage these long speeches: I only wish that I could. You, on the other hand, who are capable of either, ought to speak shorter as I beg you, and then we might converse. But I see that you are disinclined, and as I have an engagement which will prevent my staying to hear you at greater length (for I have to be in another place), I will depart; although I should have liked to have heard you.

Thus I spoke, and was rising from my seat, when Callias seized me by the right hand, and in his left hand caught hold of this old cloak of mine. He said: We cannot let you go, Socrates, for if you leave us there will be an end of our discussions: I must therefore beg you to remain, as there is nothing in the world that I should like better than to hear you and Protagoras discourse. Do not deny the company this pleasure.

Now I had got up, and was in the act of departure. Son of Hipponicus, I replied, I have always admired, and do now heartily applaud and love your philosophical spirit, and I would gladly comply with your request, if I could. But the truth is that I cannot. And what you ask is as great an impossibility to me, as if you bade

me run a race with Crison of Himera, when in his prime, or with some one of the long or day course runners. To such a request I should reply that I would fain ask the same of my own legs; but they refuse to comply. And therefore if you want to see Crison and me in the same stadium, you must bid him slacken his speed to mine, for I cannot run quickly, and he can run slowly. And in like manner if you want to hear me and Protagoras discoursing, you must ask him to shorten his answers, and keep to the point, as he did at first; if not, how can there be any discussion? For discussion is one thing, and making an oration is quite another, in my humble opinion.

But you see, Socrates, said Callias, that Protagoras may fairly claim to speak in his own way, just as you claim to speak in yours.

Here Alcibiades interposed, and said: That, Callias, is not a true statement of the case. For our friend Socrates admits that he cannot make a speech — in this he yields the palm to Protagoras: but I should be greatly surprised if he yielded to any living man in the power of holding and apprehending an argument. Now if Protagoras will make a similar admission, and confess that he is inferior to Socrates in argumentative skill, that is enough for Socrates; but if he claims a superiority in argument as well, let him ask and answer — not, when a question is asked, slipping away from the point, and instead of answering, making a speech at such length that most of his hearers forget the question at issue (not that Socrates is likely to forget — I will be bound for that, although he may pretend in fun that he has a bad memory). And Socrates appears to me to be more in the right than Protagoras; that is my view, and every man ought to say what he thinks.

When Alcibiades had done speaking, some one — Critias, I believe — went on to say: O Prodicus and Hippias, Callias appears to me to be a partisan of Protagoras: and this led Alcibiades, who loves opposition, to take the other side. But we should not be partisans either of Socrates or of Protagoras; let us rather unite in entreating both of them not to break up the discussion.

Prodicus added: That, Critias, seems to me to be well said, for those who are present at such discussions ought to be impartial hearers of both the speakers; remembering, however, that impartiality is not the same as equality, for both sides should be impartially

heard, and yet an equal meed should not be assigned to both of them; but to the wiser a higher meed should be given, and a lower to the less wise. And I as well as Critias would beg you, Protagoras and Socrates, to grant our request, which is, that you will argue with one another and not wrangle; for friends argue with friends out of goodwill, but only adversaries and enemies wrangle. And then our meeting will be delightful; for in this way you, who are the speakers, will be most likely to win esteem, and not praise only, among us who are your audience; for esteem is a sincere conviction of the hearers' souls, but praise is often an insincere expression of men uttering falsehoods contrary to their conviction. And thus we who are the hearers will be gratified and not pleased; for gratification is of the mind when receiving wisdom and knowledge, but pleasure is of the body when eating or experiencing some other bodily delight. Thus spoke Prodicus, and many of the company applauded his words.

Hippias the sage spoke next. He said: All of you who are here present I reckon to be kinsmen and friends and fellow-citizens, by nature and not by law; for by nature like is akin to like, whereas law is the tyrant of mankind, and often compels us to do many things which are against nature. How great would be the disgrace then, if we, who know the nature of things, and are the wisest of the Hellenes, and as such are met together in this city, which is the metropolis of wisdom, and in the greatest and most glorious house of this city, should have nothing to show worthy of this height of dignity, but should only quarrel with one another like the meanest of mankind! I do pray and advise you, Protagoras, and you, Socrates, to agree upon a compromise. Let us be your peacemakers. And do not you, Socrates, aim at this precise and extreme brevity in discourse, if Protagoras objects, but loosen and let go the reins of speech, that your words may be grander and more becoming to you. Neither do you, Protagoras, go forth on the gale with every sail set out of sight of land into an ocean of words, but let there be a mean observed by both of you. Do as I say. And let me also persuade you to choose an arbiter or overseer or president; he will keep watch over your words and will prescribe their proper length.

This proposal was received by the company with universal approval; Callias said that he would not let me off, and they begged

me to choose an arbiter. But I said that to choose an umpire of discourse would be unseemly; for if the person chosen was inferior, then the inferior or worse ought not to preside over the better; or if he was equal, neither would that be well; for he who is our equal will do as we do, and what will be the use of choosing him? And if you say, 'Let us have a better then,' — to that I answer that you cannot have any one who is wiser than Protagoras. And if you choose another who is not really better, and whom you only say is better, to put another over him as though he were an inferior person would be an unworthy reflection on him; not that, as far as I am concerned, any reflection is of much consequence to me. Let me tell you then what I will do in order that the conversation and discussion may go on as you desire. If Protagoras is not disposed to answer, let him ask and I will answer; and I will endeavour to show at the same time how, as I maintain, he ought to answer: and when I have answered as many questions as he likes to ask, let him in like manner answer me; and if he seems to be not very ready at answering the precise question asked of him, you and I will unite in entreating him, as you entreated me, not to spoil the discussion. And this will require no special arbiter — all of you shall be arbiters.

This was generally approved, and Protagoras, though very much against his will, was obliged to agree that he would ask questions; and when he had put a sufficient number of them, that he would answer in his turn those which he was asked in short replies. He began to put his questions as follows: —

I am of opinion, Socrates, he said, that skill in poetry is the principal part of education; and this I conceive to be the power of knowing what compositions of the poets are correct, and what are not, and how they are to be distinguished, and of explaining when asked the reason of the difference. And I propose to transfer the question which you and I have been discussing to the domain of poetry; we will speak as before of virtue, but in reference to a passage of a poet. Now Simonides says to Scopas the son of Creon the Thessalian:

'Hardly on the one hand can a man become truly good, built four-square in hands and feet and mind, a work without a flaw.'

Do you know the poem? or shall I repeat the whole?

There is no need, I said; for I am perfectly well acquainted with the ode, — I have made a careful study of it.

Very well, he said. And do you think that the ode is a good composition, and true?

Yes, I said, both good and true.

But if there is a contradiction, can the composition be good or true?

No, not in that case, I replied.

And is there not a contradiction? he asked. Reflect.

Well, my friend, I have reflected.

And does not the poet proceed to say, ‘I do not agree with the word of Pittacus, albeit the utterance of a wise man: Hardly can a man be good’? Now you will observe that this is said by the same poet.

I know it.

And do you think, he said, that the two sayings are consistent?

Yes, I said, I think so (at the same time I could not help fearing that there might be something in what he said). And you think otherwise?

Why, he said, how can he be consistent in both? First of all, premising as his own thought, ‘Hardly can a man become truly good’; and then a little further on in the poem, forgetting, and blaming Pittacus and refusing to agree with him, when he says, ‘Hardly can a man be good,’ which is the very same thing. And yet when he blames him who says the same with himself, he blames himself; so that he must be wrong either in his first or his second assertion.

Many of the audience cheered and applauded this. And I felt at first giddy and faint, as if I had received a blow from the hand of an expert boxer, when I heard his words and the sound of the cheering; and to confess the truth, I wanted to get time to think what the meaning of the poet really was. So I turned to Prodicus and called him. Prodicus, I said, Simonides is a countryman of yours, and you ought to come to his aid. I must appeal to you, like the river Scamander in Homer, who, when beleaguered by Achilles, summons the Simois to aid him, saying:

‘Brother dear, let us both together stay the force of the hero (Il.).’

And I summon you, for I am afraid that Protagoras will make an end of Simonides. Now is the time to rehabilitate Simonides, by the application of your philosophy of synonyms, which enables you to distinguish 'will' and 'wish,' and make other charming distinctions like those which you drew just now. And I should like to know whether you would agree with me; for I am of opinion that there is no contradiction in the words of Simonides. And first of all I wish that you would say whether, in your opinion, Prodicus, 'being' is the same as 'becoming.'

Not the same, certainly, replied Prodicus.

Did not Simonides first set forth, as his own view, that 'Hardly can a man become truly good'?

Quite right, said Prodicus.

And then he blames Pittacus, not, as Protagoras imagines, for repeating that which he says himself, but for saying something different from himself. Pittacus does not say as Simonides says, that hardly can a man become good, but hardly can a man be good: and our friend Prodicus would maintain that being, Protagoras, is not the same as becoming; and if they are not the same, then Simonides is not inconsistent with himself. I dare say that Prodicus and many others would say, as Hesiod says,

'On the one hand, hardly can a man become good,
For the gods have made virtue the reward of toil,
But on the other hand, when you have climbed the height,
Then, to retain virtue, however difficult the acquisition, is easy
— (Works and Days).'

Prodicus heard and approved; but Protagoras said: Your correction, Socrates, involves a greater error than is contained in the sentence which you are correcting.

Alas! I said, Protagoras; then I am a sorry physician, and do but aggravate a disorder which I am seeking to cure.

Such is the fact, he said.

How so? I asked.

The poet, he replied, could never have made such a mistake as to say that virtue, which in the opinion of all men is the hardest of all things, can be easily retained.

Well, I said, and how fortunate are we in having Prodicus among

us, at the right moment; for he has a wisdom, Protagoras, which, as I imagine, is more than human and of very ancient date, and may be as old as Simonides or even older. Learned as you are in many things, you appear to know nothing of this; but I know, for I am a disciple of his. And now, if I am not mistaken, you do not understand the word 'hard' (chalepon) in the sense which Simonides intended; and I must correct you, as Prodicus corrects me when I use the word 'awful' (deinon) as a term of praise. If I say that Protagoras or any one else is an 'awfully' wise man, he asks me if I am not ashamed of calling that which is good 'awful'; and then he explains to me that the term 'awful' is always taken in a bad sense, and that no one speaks of being 'awfully' healthy or wealthy, or of 'awful' peace, but of 'awful' disease, 'awful' war, 'awful' poverty, meaning by the term 'awful,' evil. And I think that Simonides and his countrymen the Cean, when they spoke of 'hard' meant 'evil,' or something which you do not understand. Let us ask Prodicus, for he ought to be able to answer questions about the dialect of Simonides. What did he mean, Prodicus, by the term 'hard'?

Evil, said Prodicus.

And therefore, I said, Prodicus, he blames Pittacus for saying, 'Hard is the good,' just as if that were equivalent to saying, Evil is the good.

Yes, he said, that was certainly his meaning; and he is twitting Pittacus with ignorance of the use of terms, which in a Lesbian, who has been accustomed to speak a barbarous language, is natural.

Do you hear, Protagoras, I asked, what our friend Prodicus is saying? And have you an answer for him?

You are entirely mistaken, Prodicus, said Protagoras; and I know very well that Simonides in using the word 'hard' meant what all of us mean, not evil, but that which is not easy — that which takes a great deal of trouble: of this I am positive.

I said: I also incline to believe, Protagoras, that this was the meaning of Simonides, of which our friend Prodicus was very well aware, but he thought that he would make fun, and try if you could maintain your thesis; for that Simonides could never have meant the other is clearly proved by the context, in which he says that God only has this gift. Now he cannot surely mean to say that to be good is

evil, when he afterwards proceeds to say that God only has this gift, and that this is the attribute of him and of no other. For if this be his meaning, Prodicus would impute to Simonides a character of recklessness which is very unlike his countrymen. And I should like to tell you, I said, what I imagine to be the real meaning of Simonides in this poem, if you will test what, in your way of speaking, would be called my skill in poetry; or if you would rather, I will be the listener.

To this proposal Protagoras replied: As you please; — and Hippias, Prodicus, and the others told me by all means to do as I proposed.

Then now, I said, I will endeavour to explain to you my opinion about this poem of Simonides. There is a very ancient philosophy which is more cultivated in Crete and Lacedaemon than in any other part of Hellas, and there are more philosophers in those countries than anywhere else in the world. This, however, is a secret which the Lacedaemonians deny; and they pretend to be ignorant, just because they do not wish to have it thought that they rule the world by wisdom, like the Sophists of whom Protagoras was speaking, and not by valour of arms; considering that if the reason of their superiority were disclosed, all men would be practising their wisdom. And this secret of theirs has never been discovered by the imitators of Lacedaemonian fashions in other cities, who go about with their ears bruised in imitation of them, and have the caestus bound on their arms, and are always in training, and wear short cloaks; for they imagine that these are the practices which have enabled the Lacedaemonians to conquer the other Hellenes. Now when the Lacedaemonians want to unbend and hold free conversation with their wise men, and are no longer satisfied with mere secret intercourse, they drive out all these laconizers, and any other foreigners who may happen to be in their country, and they hold a philosophical seance unknown to strangers; and they themselves forbid their young men to go out into other cities — in this they are like the Cretans — in order that they may not unlearn the lessons which they have taught them. And in Lacedaemon and Crete not only men but also women have a pride in their high cultivation. And hereby you may know that I am right in attributing to the

Lacedaemonians this excellence in philosophy and speculation: If a man converses with the most ordinary Lacedaemonian, he will find him seldom good for much in general conversation, but at any point in the discourse he will be darting out some notable saying, terse and full of meaning, with unerring aim; and the person with whom he is talking seems to be like a child in his hands. And many of our own age and of former ages have noted that the true Lacedaemonian type of character has the love of philosophy even stronger than the love of gymnastics; they are conscious that only a perfectly educated man is capable of uttering such expressions. Such were Thales of Miletus, and Pittacus of Mitylene, and Bias of Priene, and our own Solon, and Cleobulus the Lindian, and Myson the Chenian; and seventh in the catalogue of wise men was the Lacedaemonian Chilo. All these were lovers and emulators and disciples of the culture of the Lacedaemonians, and any one may perceive that their wisdom was of this character; consisting of short memorable sentences, which they severally uttered. And they met together and dedicated in the temple of Apollo at Delphi, as the first-fruits of their wisdom, the far-famed inscriptions, which are in all men's mouths— 'Know thyself,' and 'Nothing too much.'

Why do I say all this? I am explaining that this Lacedaemonian brevity was the style of primitive philosophy. Now there was a saying of Pittacus which was privately circulated and received the approbation of the wise, 'Hard is it to be good.' And Simonides, who was ambitious of the fame of wisdom, was aware that if he could overthrow this saying, then, as if he had won a victory over some famous athlete, he would carry off the palm among his contemporaries. And if I am not mistaken, he composed the entire poem with the secret intention of damaging Pittacus and his saying.

Let us all unite in examining his words, and see whether I am speaking the truth. Simonides must have been a lunatic, if, in the very first words of the poem, wanting to say only that to become good is hard, he inserted (Greek) 'on the one hand' ('on the one hand to become good is hard'); there would be no reason for the introduction of (Greek), unless you suppose him to speak with a hostile reference to the words of Pittacus. Pittacus is saying 'Hard is it to be good,' and he, in refutation of this thesis, rejoins that the truly

hard thing, Pittacus, is to become good, not joining 'truly' with 'good,' but with 'hard.' Not, that the hard thing is to be truly good, as though there were some truly good men, and there were others who were good but not truly good (this would be a very simple observation, and quite unworthy of Simonides); but you must suppose him to make a trajection of the word 'truly' (Greek), construing the saying of Pittacus thus (and let us imagine Pittacus to be speaking and Simonides answering him): 'O my friends,' says Pittacus, 'hard is it to be good,' and Simonides answers, 'In that, Pittacus, you are mistaken; the difficulty is not to be good, but on the one hand, to become good, four-square in hands and feet and mind, without a flaw — that is hard truly.' This way of reading the passage accounts for the insertion of (Greek) 'on the one hand,' and for the position at the end of the clause of the word 'truly,' and all that follows shows this to be the meaning. A great deal might be said in praise of the details of the poem, which is a charming piece of workmanship, and very finished, but such minutiae would be tedious. I should like, however, to point out the general intention of the poem, which is certainly designed in every part to be a refutation of the saying of Pittacus. For he speaks in what follows a little further on as if he meant to argue that although there is a difficulty in becoming good, yet this is possible for a time, and only for a time. But having become good, to remain in a good state and be good, as you, Pittacus, affirm, is not possible, and is not granted to man; God only has this blessing; 'but man cannot help being bad when the force of circumstances overpowers him.' Now whom does the force of circumstance overpower in the command of a vessel? — not the private individual, for he is always overpowered; and as one who is already prostrate cannot be overthrown, and only he who is standing upright but not he who is prostrate can be laid prostrate, so the force of circumstances can only overpower him who, at some time or other, has resources, and not him who is at all times helpless. The descent of a great storm may make the pilot helpless, or the severity of the season the husbandman or the physician; for the good may become bad, as another poet witnesses: —

'The good are sometimes good and sometimes bad.'

But the bad does not become bad; he is always bad. So that when

the force of circumstances overpowers the man of resources and skill and virtue, then he cannot help being bad. And you, Pittacus, are saying, 'Hard is it to be good.' Now there is a difficulty in becoming good; and yet this is possible: but to be good is an impossibility —

'For he who does well is the good man, and he who does ill is the bad.'

But what sort of doing is good in letters? and what sort of doing makes a man good in letters? Clearly the knowing of them. And what sort of well-doing makes a man a good physician? Clearly the knowledge of the art of healing the sick. 'But he who does ill is the bad.' Now who becomes a bad physician? Clearly he who is in the first place a physician, and in the second place a good physician; for he may become a bad one also: but none of us unskilled individuals can by any amount of doing ill become physicians, any more than we can become carpenters or anything of that sort; and he who by doing ill cannot become a physician at all, clearly cannot become a bad physician. In like manner the good may become deteriorated by time, or toil, or disease, or other accident (the only real doing ill is to be deprived of knowledge), but the bad man will never become bad, for he is always bad; and if he were to become bad, he must previously have been good. Thus the words of the poem tend to show that on the one hand a man cannot be continuously good, but that he may become good and may also become bad; and again that

'They are the best for the longest time whom the gods love.'

All this relates to Pittacus, as is further proved by the sequel. For he adds: —

'Therefore I will not throw away my span of life to no purpose in searching after the impossible, hoping in vain to find a perfectly faultless man among those who partake of the fruit of the broad-bosomed earth: if I find him, I will send you word.'

(this is the vehement way in which he pursues his attack upon Pittacus throughout the whole poem):

'But him who does no evil, voluntarily I praise and love; — not even the gods war against necessity.'

All this has a similar drift, for Simonides was not so ignorant as to say that he praised those who did no evil voluntarily, as though there were some who did evil voluntarily. For no wise man, as I believe,

will allow that any human being errs voluntarily, or voluntarily does evil and dishonourable actions; but they are very well aware that all who do evil and dishonourable things do them against their will. And Simonides never says that he praises him who does no evil voluntarily; the word 'voluntarily' applies to himself. For he was under the impression that a good man might often compel himself to love and praise another, and to be the friend and approver of another; and that there might be an involuntary love, such as a man might feel to an unnatural father or mother, or country, or the like. Now bad men, when their parents or country have any defects, look on them with malignant joy, and find fault with them and expose and denounce them to others, under the idea that the rest of mankind will be less likely to take themselves to task and accuse them of neglect; and they blame their defects far more than they deserve, in order that the odium which is necessarily incurred by them may be increased: but the good man dissembles his feelings, and constrains himself to praise them; and if they have wronged him and he is angry, he pacifies his anger and is reconciled, and compels himself to love and praise his own flesh and blood. And Simonides, as is probable, considered that he himself had often had to praise and magnify a tyrant or the like, much against his will, and he also wishes to imply to Pittacus that he does not censure him because he is censorious.

'For I am satisfied' he says, 'when a man is neither bad nor very stupid; and when he knows justice (which is the health of states), and is of sound mind, I will find no fault with him, for I am not given to finding fault, and there are innumerable fools'

(implying that if he delighted in censure he might have abundant opportunity of finding fault).

'All things are good with which evil is unmingled.'

In these latter words he does not mean to say that all things are good which have no evil in them, as you might say 'All things are white which have no black in them,' for that would be ridiculous; but he means to say that he accepts and finds no fault with the moderate or intermediate state.

('I do not hope' he says, 'to find a perfectly blameless man among those who partake of the fruits of the broad-bosomed earth (if I find him, I will send you word); in this sense I praise no man. But he who

is moderately good, and does no evil, is good enough for me, who love and approve every one')

(and here observe that he uses a Lesbian word, *epainemi* (approve), because he is addressing Pittacus,

'Who love and APPROVE every one VOLUNTARILY, who does no evil:')

and that the stop should be put after 'voluntarily'); 'but there are some whom I involuntarily praise and love. And you, Pittacus, I would never have blamed, if you had spoken what was moderately good and true; but I do blame you because, putting on the appearance of truth, you are speaking falsely about the highest matters.' — And this, I said, Prodicus and Protagoras, I take to be the meaning of Simonides in this poem.

Hippias said: I think, Socrates, that you have given a very good explanation of the poem; but I have also an excellent interpretation of my own which I will propound to you, if you will allow me.

Nay, Hippias, said Alcibiades; not now, but at some other time. At present we must abide by the compact which was made between Socrates and Protagoras, to the effect that as long as Protagoras is willing to ask, Socrates should answer; or that if he would rather answer, then that Socrates should ask.

I said: I wish Protagoras either to ask or answer as he is inclined; but I would rather have done with poems and odes, if he does not object, and come back to the question about which I was asking you at first, Protagoras, and by your help make an end of that. The talk about the poets seems to me like a commonplace entertainment to which a vulgar company have recourse; who, because they are not able to converse or amuse one another, while they are drinking, with the sound of their own voices and conversation, by reason of their stupidity, raise the price of flute-girls in the market, hiring for a great sum the voice of a flute instead of their own breath, to be the medium of intercourse among them: but where the company are real gentlemen and men of education, you will see no flute-girls, nor dancing-girls, nor harp-girls; and they have no nonsense or games, but are contented with one another's conversation, of which their own voices are the medium, and which they carry on by turns and in an orderly manner, even though they are very liberal in their

potations. And a company like this of ours, and men such as we profess to be, do not require the help of another's voice, or of the poets whom you cannot interrogate about the meaning of what they are saying; people who cite them declaring, some that the poet has one meaning, and others that he has another, and the point which is in dispute can never be decided. This sort of entertainment they decline, and prefer to talk with one another, and put one another to the proof in conversation. And these are the models which I desire that you and I should imitate. Leaving the poets, and keeping to ourselves, let us try the mettle of one another and make proof of the truth in conversation. If you have a mind to ask, I am ready to answer; or if you would rather, do you answer, and give me the opportunity of resuming and completing our unfinished argument.

I made these and some similar observations; but Protagoras would not distinctly say which he would do. Thereupon Alcibiades turned to Callias, and said: — Do you think, Callias, that Protagoras is fair in refusing to say whether he will or will not answer? for I certainly think that he is unfair; he ought either to proceed with the argument, or distinctly refuse to proceed, that we may know his intention; and then Socrates will be able to discourse with some one else, and the rest of the company will be free to talk with one another.

I think that Protagoras was really made ashamed by these words of Alcibiades, and when the prayers of Callias and the company were superadded, he was at last induced to argue, and said that I might ask and he would answer.

So I said: Do not imagine, Protagoras, that I have any other interest in asking questions of you but that of clearing up my own difficulties. For I think that Homer was very right in saying that

‘When two go together, one sees before the other (Il.),’

for all men who have a companion are readier in deed, word, or thought; but if a man

‘Sees a thing when he is alone,’

he goes about straightway seeking until he finds some one to whom he may show his discoveries, and who may confirm him in them. And I would rather hold discourse with you than with any one, because I think that no man has a better understanding of most things which a good man may be expected to understand, and in particular of virtue. For who is there, but you? — who not only claim to be a good man and a gentleman, for many are this, and yet have not the power of making others good — whereas you are not only good yourself, but also the cause of goodness in others. Moreover such confidence have you in yourself, that although other Sophists conceal their profession, you proclaim in the face of Hellas that you are a Sophist or teacher of virtue and education, and are the first who demanded pay in return. How then can I do otherwise than invite you to the examination of these subjects, and ask questions and consult with you? I must, indeed. And I should like once more to have my memory refreshed by you about the questions which I was asking you at first, and also to have your help in considering them. If I am not mistaken the question was this: Are wisdom and temperance and courage and justice and holiness five names of the same thing? or has each of the names a separate underlying essence and corresponding thing having a peculiar function, no one of them being like any other of them? And you replied that the five names were not the names of the same thing, but that each of them had a separate object, and that all these objects were parts of virtue, not in the same way that the parts of gold are like each other and the whole of which they are parts, but as the parts of the face are unlike the whole of which they are parts and one another, and have each of them a distinct function. I should like to know whether this is still your opinion; or if not, I will ask you to define your meaning, and I shall not take you to task if you now make a different statement. For I dare say that you may have said what you did only in order to make trial of me.

I answer, Socrates, he said, that all these qualities are parts of virtue, and that four out of the five are to some extent similar, and that the fifth of them, which is courage, is very different from the other four, as I prove in this way: You may observe that many men are utterly unrighteous, unholy, intemperate, ignorant, who are

nevertheless remarkable for their courage.

Stop, I said; I should like to think about that. When you speak of brave men, do you mean the confident, or another sort of nature?

Yes, he said; I mean the impetuous, ready to go at that which others are afraid to approach.

In the next place, you would affirm virtue to be a good thing, of which good thing you assert yourself to be a teacher.

Yes, he said; I should say the best of all things, if I am in my right mind.

And is it partly good and partly bad, I said, or wholly good?

Wholly good, and in the highest degree.

Tell me then; who are they who have confidence when diving into a well?

I should say, the divers.

And the reason of this is that they have knowledge?

Yes, that is the reason.

And who have confidence when fighting on horseback — the skilled horseman or the unskilled?

The skilled.

And who when fighting with light shields — the peltasts or the nonpeltasts?

The peltasts. And that is true of all other things, he said, if that is your point: those who have knowledge are more confident than those who have no knowledge, and they are more confident after they have learned than before.

And have you not seen persons utterly ignorant, I said, of these things, and yet confident about them?

Yes, he said, I have seen such persons far too confident.

And are not these confident persons also courageous?

In that case, he replied, courage would be a base thing, for the men of whom we are speaking are surely madmen.

Then who are the courageous? Are they not the confident?

Yes, he said; to that statement I adhere.

And those, I said, who are thus confident without knowledge are really not courageous, but mad; and in that case the wisest are also the most confident, and being the most confident are also the bravest, and upon that view again wisdom will be courage.

Nay, Socrates, he replied, you are mistaken in your remembrance of what was said by me. When you asked me, I certainly did say that the courageous are the confident; but I was never asked whether the confident are the courageous; if you had asked me, I should have answered 'Not all of them': and what I did answer you have not proved to be false, although you proceeded to show that those who have knowledge are more courageous than they were before they had knowledge, and more courageous than others who have no knowledge, and were then led on to think that courage is the same as wisdom. But in this way of arguing you might come to imagine that strength is wisdom. You might begin by asking whether the strong are able, and I should say 'Yes'; and then whether those who know how to wrestle are not more able to wrestle than those who do not know how to wrestle, and more able after than before they had learned, and I should assent. And when I had admitted this, you might use my admissions in such a way as to prove that upon my view wisdom is strength; whereas in that case I should not have admitted, any more than in the other, that the able are strong, although I have admitted that the strong are able. For there is a difference between ability and strength; the former is given by knowledge as well as by madness or rage, but strength comes from nature and a healthy state of the body. And in like manner I say of confidence and courage, that they are not the same; and I argue that the courageous are confident, but not all the confident courageous. For confidence may be given to men by art, and also, like ability, by madness and rage; but courage comes to them from nature and the healthy state of the soul.

I said: You would admit, Protagoras, that some men live well and others ill?

He assented.

And do you think that a man lives well who lives in pain and grief?

He does not.

But if he lives pleasantly to the end of his life, will he not in that case have lived well?

He will.

Then to live pleasantly is a good, and to live unpleasantly an evil?

Yes, he said, if the pleasure be good and honourable.

And do you, Protagoras, like the rest of the world, call some pleasant things evil and some painful things good? — for I am rather disposed to say that things are good in as far as they are pleasant, if they have no consequences of another sort, and in as far as they are painful they are bad.

I do not know, Socrates, he said, whether I can venture to assert in that unqualified manner that the pleasant is the good and the painful the evil. Having regard not only to my present answer, but also to the whole of my life, I shall be safer, if I am not mistaken, in saying that there are some pleasant things which are not good, and that there are some painful things which are good, and some which are not good, and that there are some which are neither good nor evil.

And you would call pleasant, I said, the things which participate in pleasure or create pleasure?

Certainly, he said.

Then my meaning is, that in as far as they are pleasant they are good; and my question would imply that pleasure is a good in itself.

According to your favourite mode of speech, Socrates, ‘Let us reflect about this,’ he said; and if the reflection is to the point, and the result proves that pleasure and good are really the same, then we will agree; but if not, then we will argue.

And would you wish to begin the enquiry? I said; or shall I begin?

You ought to take the lead, he said; for you are the author of the discussion.

May I employ an illustration? I said. Suppose some one who is enquiring into the health or some other bodily quality of another: — he looks at his face and at the tips of his fingers, and then he says, Uncover your chest and back to me that I may have a better view: — that is the sort of thing which I desire in this speculation. Having seen what your opinion is about good and pleasure, I am minded to say to you: Uncover your mind to me, Protagoras, and reveal your opinion about knowledge, that I may know whether you agree with the rest of the world. Now the rest of the world are of opinion that knowledge is a principle not of strength, or of rule, or of command: their notion is that a man may have knowledge, and yet that the knowledge which is in him may be overmastered by anger, or

pleasure, or pain, or love, or perhaps by fear, — just as if knowledge were a slave, and might be dragged about anyhow. Now is that your view? or do you think that knowledge is a noble and commanding thing, which cannot be overcome, and will not allow a man, if he only knows the difference of good and evil, to do anything which is contrary to knowledge, but that wisdom will have strength to help him?

I agree with you, Socrates, said Protagoras; and not only so, but I, above all other men, am bound to say that wisdom and knowledge are the highest of human things.

Good, I said, and true. But are you aware that the majority of the world are of another mind; and that men are commonly supposed to know the things which are best, and not to do them when they might? And most persons whom I have asked the reason of this have said that when men act contrary to knowledge they are overcome by pain, or pleasure, or some of those affections which I was just now mentioning.

Yes, Socrates, he replied; and that is not the only point about which mankind are in error.

Suppose, then, that you and I endeavour to instruct and inform them what is the nature of this affection which they call ‘being overcome by pleasure,’ and which they affirm to be the reason why they do not always do what is best. When we say to them: Friends, you are mistaken, and are saying what is not true, they would probably reply: Socrates and Protagoras, if this affection of the soul is not to be called ‘being overcome by pleasure,’ pray, what is it, and by what name would you describe it?

But why, Socrates, should we trouble ourselves about the opinion of the many, who just say anything that happens to occur to them?

I believe, I said, that they may be of use in helping us to discover how courage is related to the other parts of virtue. If you are disposed to abide by our agreement, that I should show the way in which, as I think, our recent difficulty is most likely to be cleared up, do you follow; but if not, never mind.

You are quite right, he said; and I would have you proceed as you have begun.

Well then, I said, let me suppose that they repeat their question,

What account do you give of that which, in our way of speaking, is termed being overcome by pleasure? I should answer thus: Listen, and Protagoras and I will endeavour to show you. When men are overcome by eating and drinking and other sensual desires which are pleasant, and they, knowing them to be evil, nevertheless indulge in them, would you not say that they were overcome by pleasure? They will not deny this. And suppose that you and I were to go on and ask them again: 'In what way do you say that they are evil, — in that they are pleasant and give pleasure at the moment, or because they cause disease and poverty and other like evils in the future? Would they still be evil, if they had no attendant evil consequences, simply because they give the consciousness of pleasure of whatever nature?' — Would they not answer that they are not evil on account of the pleasure which is immediately given by them, but on account of the after consequences — diseases and the like?

I believe, said Protagoras, that the world in general would answer as you do.

And in causing diseases do they not cause pain? and in causing poverty do they not cause pain; — they would agree to that also, if I am not mistaken?

Protagoras assented.

Then I should say to them, in my name and yours: Do you think them evil for any other reason, except because they end in pain and rob us of other pleasures: — there again they would agree?

We both of us thought that they would.

And then I should take the question from the opposite point of view, and say: 'Friends, when you speak of goods being painful, do you not mean remedial goods, such as gymnastic exercises, and military service, and the physician's use of burning, cutting, drugging, and starving? Are these the things which are good but painful?' — they would assent to me?

He agreed.

'And do you call them good because they occasion the greatest immediate suffering and pain; or because, afterwards, they bring health and improvement of the bodily condition and the salvation of states and power over others and wealth?' — they would agree to the latter alternative, if I am not mistaken?

He assented.

‘Are these things good for any other reason except that they end in pleasure, and get rid of and avert pain? Are you looking to any other standard but pleasure and pain when you call them good?’ — they would acknowledge that they were not?

I think so, said Protagoras.

‘And do you not pursue after pleasure as a good, and avoid pain as an evil?’

He assented.

‘Then you think that pain is an evil and pleasure is a good: and even pleasure you deem an evil, when it robs you of greater pleasures than it gives, or causes pains greater than the pleasure. If, however, you call pleasure an evil in relation to some other end or standard, you will be able to show us that standard. But you have none to show.’

I do not think that they have, said Protagoras.

‘And have you not a similar way of speaking about pain? You call pain a good when it takes away greater pains than those which it has, or gives pleasures greater than the pains: then if you have some standard other than pleasure and pain to which you refer when you call actual pain a good, you can show what that is. But you cannot.’

True, said Protagoras.

Suppose again, I said, that the world says to me: ‘Why do you spend many words and speak in many ways on this subject?’ Excuse me, friends, I should reply; but in the first place there is a difficulty in explaining the meaning of the expression ‘overcome by pleasure’; and the whole argument turns upon this. And even now, if you see any possible way in which evil can be explained as other than pain, or good as other than pleasure, you may still retract. Are you satisfied, then, at having a life of pleasure which is without pain? If you are, and if you are unable to show any good or evil which does not end in pleasure and pain, hear the consequences: — If what you say is true, then the argument is absurd which affirms that a man often does evil knowingly, when he might abstain, because he is seduced and overpowered by pleasure; or again, when you say that a man knowingly refuses to do what is good because he is overcome at the moment by pleasure. And that this is ridiculous will be evident if

only we give up the use of various names, such as pleasant and painful, and good and evil. As there are two things, let us call them by two names — first, good and evil, and then pleasant and painful. Assuming this, let us go on to say that a man does evil knowing that he does evil. But some one will ask, Why? Because he is overcome, is the first answer. And by what is he overcome? the enquirer will proceed to ask. And we shall not be able to reply ‘By pleasure,’ for the name of pleasure has been exchanged for that of good. In our answer, then, we shall only say that he is overcome. ‘By what?’ he will reiterate. By the good, we shall have to reply; indeed we shall. Nay, but our questioner will rejoin with a laugh, if he be one of the swaggering sort, ‘That is too ridiculous, that a man should do what he knows to be evil when he ought not, because he is overcome by good. Is that, he will ask, because the good was worthy or not worthy of conquering the evil?’ And in answer to that we shall clearly reply, Because it was not worthy; for if it had been worthy, then he who, as we say, was overcome by pleasure, would not have been wrong. ‘But how,’ he will reply, ‘can the good be unworthy of the evil, or the evil of the good?’ Is not the real explanation that they are out of proportion to one another, either as greater and smaller, or more and fewer? This we cannot deny. And when you speak of being overcome— ‘what do you mean,’ he will say, ‘but that you choose the greater evil in exchange for the lesser good?’ Admitted. And now substitute the names of pleasure and pain for good and evil, and say, not as before, that a man does what is evil knowingly, but that he does what is painful knowingly, and because he is overcome by pleasure, which is unworthy to overcome. What measure is there of the relations of pleasure to pain other than excess and defect, which means that they become greater and smaller, and more and fewer, and differ in degree? For if any one says: ‘Yes, Socrates, but immediate pleasure differs widely from future pleasure and pain’ — To that I should reply: And do they differ in anything but in pleasure and pain? There can be no other measure of them. And do you, like a skilful weigher, put into the balance the pleasures and the pains, and their nearness and distance, and weigh them, and then say which outweighs the other. If you weigh pleasures against pleasures, you of course take the more and greater; or if you weigh pains against pains,

you take the fewer and the less; or if pleasures against pains, then you choose that course of action in which the painful is exceeded by the pleasant, whether the distant by the near or the near by the distant; and you avoid that course of action in which the pleasant is exceeded by the painful. Would you not admit, my friends, that this is true? I am confident that they cannot deny this.

He agreed with me.

Well then, I shall say, if you agree so far, be so good as to answer me a question: Do not the same magnitudes appear larger to your sight when near, and smaller when at a distance? They will acknowledge that. And the same holds of thickness and number; also sounds, which are in themselves equal, are greater when near, and lesser when at a distance. They will grant that also. Now suppose happiness to consist in doing or choosing the greater, and in not doing or in avoiding the less, what would be the saving principle of human life? Would not the art of measuring be the saving principle; or would the power of appearance? Is not the latter that deceiving art which makes us wander up and down and take the things at one time of which we repent at another, both in our actions and in our choice of things great and small? But the art of measurement would do away with the effect of appearances, and, showing the truth, would fain teach the soul at last to find rest in the truth, and would thus save our life. Would not mankind generally acknowledge that the art which accomplishes this result is the art of measurement?

Yes, he said, the art of measurement.

Suppose, again, the salvation of human life to depend on the choice of odd and even, and on the knowledge of when a man ought to choose the greater or less, either in reference to themselves or to each other, and whether near or at a distance; what would be the saving principle of our lives? Would not knowledge? — a knowledge of measuring, when the question is one of excess and defect, and a knowledge of number, when the question is of odd and even? The world will assent, will they not?

Protagoras himself thought that they would.

Well then, my friends, I say to them; seeing that the salvation of human life has been found to consist in the right choice of pleasures and pains, — in the choice of the more and the fewer, and the greater

and the less, and the nearer and remoter, must not this measuring be a consideration of their excess and defect and equality in relation to each other?

This is undeniably true.

And this, as possessing measure, must undeniably also be an art and science?

They will agree, he said.

The nature of that art or science will be a matter of future consideration; but the existence of such a science furnishes a demonstrative answer to the question which you asked of me and Protagoras. At the time when you asked the question, if you remember, both of us were agreeing that there was nothing mightier than knowledge, and that knowledge, in whatever existing, must have the advantage over pleasure and all other things; and then you said that pleasure often got the advantage even over a man who has knowledge; and we refused to allow this, and you rejoined: O Protagoras and Socrates, what is the meaning of being overcome by pleasure if not this? — tell us what you call such a state: — if we had immediately and at the time answered ‘Ignorance,’ you would have laughed at us. But now, in laughing at us, you will be laughing at yourselves: for you also admitted that men err in their choice of pleasures and pains; that is, in their choice of good and evil, from defect of knowledge; and you admitted further, that they err, not only from defect of knowledge in general, but of that particular knowledge which is called measuring. And you are also aware that the erring act which is done without knowledge is done in ignorance. This, therefore, is the meaning of being overcome by pleasure; — ignorance, and that the greatest. And our friends Protagoras and Prodicus and Hippias declare that they are the physicians of ignorance; but you, who are under the mistaken impression that ignorance is not the cause, and that the art of which I am speaking cannot be taught, neither go yourselves, nor send your children, to the Sophists, who are the teachers of these things — you take care of your money and give them none; and the result is, that you are the worse off both in public and private life: — Let us suppose this to be our answer to the world in general: And now I should like to ask you, Hippias, and you, Prodicus, as well as Protagoras (for the argument

is to be yours as well as ours), whether you think that I am speaking the truth or not?

They all thought that what I said was entirely true.

Then you agree, I said, that the pleasant is the good, and the painful evil. And here I would beg my friend Prodicus not to introduce his distinction of names, whether he is disposed to say pleasurable, delightful, joyful. However, by whatever name he prefers to call them, I will ask you, most excellent Prodicus, to answer in my sense of the words.

Prodicus laughed and assented, as did the others.

Then, my friends, what do you say to this? Are not all actions honourable and useful, of which the tendency is to make life painless and pleasant? The honourable work is also useful and good?

This was admitted.

Then, I said, if the pleasant is the good, nobody does anything under the idea or conviction that some other thing would be better and is also attainable, when he might do the better. And this inferiority of a man to himself is merely ignorance, as the superiority of a man to himself is wisdom.

They all assented.

And is not ignorance the having a false opinion and being deceived about important matters?

To this also they unanimously assented.

Then, I said, no man voluntarily pursues evil, or that which he thinks to be evil. To prefer evil to good is not in human nature; and when a man is compelled to choose one of two evils, no one will choose the greater when he may have the less.

All of us agreed to every word of this.

Well, I said, there is a certain thing called fear or terror; and here, Prodicus, I should particularly like to know whether you would agree with me in defining this fear or terror as expectation of evil.

Protagoras and Hippias agreed, but Prodicus said that this was fear and not terror.

Never mind, Prodicus, I said; but let me ask whether, if our former assertions are true, a man will pursue that which he fears when he is not compelled? Would not this be in flat contradiction to the admission which has been already made, that he thinks the things

which he fears to be evil; and no one will pursue or voluntarily accept that which he thinks to be evil?

That also was universally admitted.

Then, I said, these, Hippias and Prodicus, are our premisses; and I would beg Protagoras to explain to us how he can be right in what he said at first. I do not mean in what he said quite at first, for his first statement, as you may remember, was that whereas there were five parts of virtue none of them was like any other of them; each of them had a separate function. To this, however, I am not referring, but to the assertion which he afterwards made that of the five virtues four were nearly akin to each other, but that the fifth, which was courage, differed greatly from the others. And of this he gave me the following proof. He said: You will find, Socrates, that some of the most impious, and unrighteous, and intemperate, and ignorant of men are among the most courageous; which proves that courage is very different from the other parts of virtue. I was surprised at his saying this at the time, and I am still more surprised now that I have discussed the matter with you. So I asked him whether by the brave he meant the confident. Yes, he replied, and the impetuous or goers. (You may remember, Protagoras, that this was your answer.)

He assented.

Well then, I said, tell us against what are the courageous ready to go — against the same dangers as the cowards?

No, he answered.

Then against something different?

Yes, he said.

Then do cowards go where there is safety, and the courageous where there is danger?

Yes, Socrates, so men say.

Very true, I said. But I want to know against what do you say that the courageous are ready to go — against dangers, believing them to be dangers, or not against dangers?

No, said he; the former case has been proved by you in the previous argument to be impossible.

That, again, I replied, is quite true. And if this has been rightly proven, then no one goes to meet what he thinks to be dangers, since the want of self-control, which makes men rush into dangers, has

been shown to be ignorance.

He assented.

And yet the courageous man and the coward alike go to meet that about which they are confident; so that, in this point of view, the cowardly and the courageous go to meet the same things.

And yet, Socrates, said Protagoras, that to which the coward goes is the opposite of that to which the courageous goes; the one, for example, is ready to go to battle, and the other is not ready.

And is going to battle honourable or disgraceful? I said.

Honourable, he replied.

And if honourable, then already admitted by us to be good; for all honourable actions we have admitted to be good.

That is true; and to that opinion I shall always adhere.

True, I said. But which of the two are they who, as you say, are unwilling to go to war, which is a good and honourable thing?

The cowards, he replied.

And what is good and honourable, I said, is also pleasant?

It has certainly been acknowledged to be so, he replied.

And do the cowards knowingly refuse to go to the nobler, and pleasanter, and better?

The admission of that, he replied, would belie our former admissions.

But does not the courageous man also go to meet the better, and pleasanter, and nobler?

That must be admitted.

And the courageous man has no base fear or base confidence?

True, he replied.

And if not base, then honourable?

He admitted this.

And if honourable, then good?

Yes.

But the fear and confidence of the coward or foolhardy or madman, on the contrary, are base?

He assented.

And these base fears and confidences originate in ignorance and uninstructedness?

True, he said.

Then as to the motive from which the cowards act, do you call it cowardice or courage?

I should say cowardice, he replied.

And have they not been shown to be cowards through their ignorance of dangers?

Assuredly, he said.

And because of that ignorance they are cowards?

He assented.

And the reason why they are cowards is admitted by you to be cowardice?

He again assented.

Then the ignorance of what is and is not dangerous is cowardice?

He nodded assent.

But surely courage, I said, is opposed to cowardice?

Yes.

Then the wisdom which knows what are and are not dangers is opposed to the ignorance of them?

To that again he nodded assent.

And the ignorance of them is cowardice?

To that he very reluctantly nodded assent.

And the knowledge of that which is and is not dangerous is courage, and is opposed to the ignorance of these things?

At this point he would no longer nod assent, but was silent.

And why, I said, do you neither assent nor dissent, Protagoras?

Finish the argument by yourself, he said.

I only want to ask one more question, I said. I want to know whether you still think that there are men who are most ignorant and yet most courageous?

You seem to have a great ambition to make me answer, Socrates, and therefore I will gratify you, and say, that this appears to me to be impossible consistently with the argument.

My only object, I said, in continuing the discussion, has been the desire to ascertain the nature and relations of virtue; for if this were clear, I am very sure that the other controversy which has been carried on at great length by both of us — you affirming and I denying that virtue can be taught — would also become clear. The result of our discussion appears to me to be singular. For if the

argument had a human voice, that voice would be heard laughing at us and saying: 'Protagoras and Socrates, you are strange beings; there are you, Socrates, who were saying that virtue cannot be taught, contradicting yourself now by your attempt to prove that all things are knowledge, including justice, and temperance, and courage, — which tends to show that virtue can certainly be taught; for if virtue were other than knowledge, as Protagoras attempted to prove, then clearly virtue cannot be taught; but if virtue is entirely knowledge, as you are seeking to show, then I cannot but suppose that virtue is capable of being taught. Protagoras, on the other hand, who started by saying that it might be taught, is now eager to prove it to be anything rather than knowledge; and if this is true, it must be quite incapable of being taught.' Now I, Protagoras, perceiving this terrible confusion of our ideas, have a great desire that they should be cleared up. And I should like to carry on the discussion until we ascertain what virtue is, whether capable of being taught or not, lest haply Epimetheus should trip us up and deceive us in the argument, as he forgot us in the story; I prefer your Prometheus to your Epimetheus, for of him I make use, whenever I am busy about these questions, in Promethean care of my own life. And if you have no objection, as I said at first, I should like to have your help in the enquiry.

Protagoras replied: Socrates, I am not of a base nature, and I am the last man in the world to be envious. I cannot but applaud your energy and your conduct of an argument. As I have often said, I admire you above all men whom I know, and far above all men of your age; and I believe that you will become very eminent in philosophy. Let us come back to the subject at some future time; at present we had better turn to something else.

By all means, I said, if that is your wish; for I too ought long since to have kept the engagement of which I spoke before, and only tarried because I could not refuse the request of the noble Callias. So the conversation ended, and we went our way.

GORGIAS

Translated by Benjamin Jowett

This middle dialogue was written circa 380 BC. It concerns Socrates' search for the true definition of rhetoric, as he attempts to identify its essence and unveil the flaws of sophistry. The art of persuasion was widely considered necessary for political and legal advantage in classical Athens, and rhetoricians promoted themselves as teachers of this fundamental skill. Some, like Gorgias, were foreigners attracted to Athens because of its reputation for intellectual and cultural sophistication. In the dialogue, Socrates argues that philosophy is an art, whereas rhetoric is merely a knack. To Socrates, most rhetoric in practice is merely flattery. In order to use rhetoric for good, rhetoric cannot exist alone; it must depend on philosophy to guide its morality. Socrates, therefore, believes that morality is not inherent in rhetoric and that without philosophy, rhetoric is simply used to persuade for personal gain.

The dialogue begins just after Gorgias has given a speech. Callicles says that Gorgias is a guest in his home, and has agreed to a private audience with Socrates and his friend Chaerephon. Socrates gets Gorgias to agree to his cross-examination style of conversation, asks him questions, and praises him for the brevity of his replies. Gorgias remarks that no one has asked him a new question in a long time, and when Socrates asks, assures him that he is just as capable of brevity as of long-windedness.

Socrates ends the dialogue by telling Callicles, Polus, and Gorgias a story that they will regard as a myth, but which he regards as true. He recounts that in the old days, Cronos judged men just before they died, and divided them into two categories. He sent good and righteous men to the Isles of the Blessed, and godless, unrighteous men to the prison of vengeance and punishment called Tartarus. These cases were judged badly because the men were judged while

they were alive and with their clothes on, and the judges were fooled by appearances. Zeus fixed the problem by arranging for people to be dead, and stripped naked. The judge had to be naked too, so he could scan the souls of men without distractions.

INTRODUCTION.
GORGIAS

INTRODUCTION.

In several of the dialogues of Plato, doubts have arisen among his interpreters as to which of the various subjects discussed in them is the main thesis. The speakers have the freedom of conversation; no severe rules of art restrict them, and sometimes we are inclined to think, with one of the *dramatis personae* in the *Theaetetus*, that the digressions have the greater interest. Yet in the most irregular of the dialogues there is also a certain natural growth or unity; the beginning is not forgotten at the end, and numerous allusions and references are interspersed, which form the loose connecting links of the whole. We must not neglect this unity, but neither must we attempt to confine the Platonic dialogue on the Procrustean bed of a single idea. (Compare Introduction to the *Phaedrus*.)

Two tendencies seem to have beset the interpreters of Plato in this matter. First, they have endeavoured to hang the dialogues upon one another by the slightest threads; and have thus been led to opposite and contradictory assertions respecting their order and sequence. The mantle of Schleiermacher has descended upon his successors, who have applied his method with the most various results. The value and use of the method has been hardly, if at all, examined either by him or them. Secondly, they have extended almost indefinitely the scope of each separate dialogue; in this way they think that they have escaped all difficulties, not seeing that what they have gained in generality they have lost in truth and distinctness. Metaphysical conceptions easily pass into one another; and the simpler notions of antiquity, which we can only realize by an effort, imperceptibly blend with the more familiar theories of modern philosophers. An eye for proportion is needed (his own art of measuring) in the study of Plato, as well as of other great artists. We may hardly admit that the moral antithesis of good and pleasure, or the intellectual antithesis of knowledge and opinion, being and appearance, are never far off in a Platonic discussion. But because they are in the background, we should not bring them into the foreground, or expect to discern them equally in all the dialogues.

There may be some advantage in drawing out a little the main

outlines of the building; but the use of this is limited, and may be easily exaggerated. We may give Plato too much system, and alter the natural form and connection of his thoughts. Under the idea that his dialogues are finished works of art, we may find a reason for everything, and lose the highest characteristic of art, which is simplicity. Most great works receive a new light from a new and original mind. But whether these new lights are true or only suggestive, will depend on their agreement with the spirit of Plato, and the amount of direct evidence which can be urged in support of them. When a theory is running away with us, criticism does a friendly office in counselling moderation, and recalling us to the indications of the text.

Like the *Phaedrus*, the *Gorgias* has puzzled students of Plato by the appearance of two or more subjects. Under the cover of rhetoric higher themes are introduced; the argument expands into a general view of the good and evil of man. After making an ineffectual attempt to obtain a sound definition of his art from Gorgias, Socrates assumes the existence of a universal art of flattery or simulation having several branches: — this is the genus of which rhetoric is only one, and not the highest species. To flattery is opposed the true and noble art of life which he who possesses seeks always to impart to others, and which at last triumphs, if not here, at any rate in another world. These two aspects of life and knowledge appear to be the two leading ideas of the dialogue. The true and the false in individuals and states, in the treatment of the soul as well as of the body, are conceived under the forms of true and false art. In the development of this opposition there arise various other questions, such as the two famous paradoxes of Socrates (paradoxes as they are to the world in general, ideals as they may be more worthily called): (1) that to do is worse than to suffer evil; and (2) that when a man has done evil he had better be punished than unpunished; to which may be added (3) a third Socratic paradox or ideal, that bad men do what they think best, but not what they desire, for the desire of all is towards the good. That pleasure is to be distinguished from good is proved by the simultaneousness of pleasure and pain, and by the possibility of the bad having in certain cases pleasures as great as those of the good, or even greater. Not merely rhetoricians, but poets,

musicians, and other artists, the whole tribe of statesmen, past as well as present, are included in the class of flatterers. The true and false finally appear before the judgment-seat of the gods below.

The dialogue naturally falls into three divisions, to which the three characters of Gorgias, Polus, and Callicles respectively correspond; and the form and manner change with the stages of the argument. Socrates is deferential towards Gorgias, playful and yet cutting in dealing with the youthful Polus, ironical and sarcastic in his encounter with Callicles. In the first division the question is asked — What is rhetoric? To this there is no answer given, for Gorgias is soon made to contradict himself by Socrates, and the argument is transferred to the hands of his disciple Polus, who rushes to the defence of his master. The answer has at last to be given by Socrates himself, but before he can even explain his meaning to Polus, he must enlighten him upon the great subject of shams or flatteries. When Polus finds his favourite art reduced to the level of cookery, he replies that at any rate rhetoricians, like despots, have great power. Socrates denies that they have any real power, and hence arise the three paradoxes already mentioned. Although they are strange to him, Polus is at last convinced of their truth; at least, they seem to him to follow legitimately from the premises. Thus the second act of the dialogue closes. Then Callicles appears on the scene, at first maintaining that pleasure is good, and that might is right, and that law is nothing but the combination of the many weak against the few strong. When he is confuted he withdraws from the argument, and leaves Socrates to arrive at the conclusion by himself. The conclusion is that there are two kinds of statesmanship, a higher and a lower — that which makes the people better, and that which only flatters them, and he exhorts Callicles to choose the higher. The dialogue terminates with a mythus of a final judgment, in which there will be no more flattery or disguise, and no further use for the teaching of rhetoric.

The characters of the three interlocutors also correspond to the parts which are assigned to them. Gorgias is the great rhetorician, now advanced in years, who goes from city to city displaying his talents, and is celebrated throughout Greece. Like all the Sophists in the dialogues of Plato, he is vain and boastful, yet he has also a

certain dignity, and is treated by Socrates with considerable respect. But he is no match for him in dialectics. Although he has been teaching rhetoric all his life, he is still incapable of defining his own art. When his ideas begin to clear up, he is unwilling to admit that rhetoric can be wholly separated from justice and injustice, and this lingering sentiment of morality, or regard for public opinion, enables Socrates to detect him in a contradiction. Like Protagoras, he is described as of a generous nature; he expresses his approbation of Socrates' manner of approaching a question; he is quite 'one of Socrates' sort, ready to be refuted as well as to refute,' and very eager that Callicles and Socrates should have the game out. He knows by experience that rhetoric exercises great influence over other men, but he is unable to explain the puzzle how rhetoric can teach everything and know nothing.

Polus is an impetuous youth, a runaway 'colt,' as Socrates describes him, who wanted originally to have taken the place of Gorgias under the pretext that the old man was tired, and now avails himself of the earliest opportunity to enter the lists. He is said to be the author of a work on rhetoric, and is again mentioned in the *Phaedrus*, as the inventor of balanced or double forms of speech (compare *Gorg.*; *Symp.*). At first he is violent and ill-mannered, and is angry at seeing his master overthrown. But in the judicious hands of Socrates he is soon restored to good-humour, and compelled to assent to the required conclusion. Like Gorgias, he is overthrown because he compromises; he is unwilling to say that to do is fairer or more honourable than to suffer injustice. Though he is fascinated by the power of rhetoric, and dazzled by the splendour of success, he is not insensible to higher arguments. Plato may have felt that there would be an incongruity in a youth maintaining the cause of injustice against the world. He has never heard the other side of the question, and he listens to the paradoxes, as they appear to him, of Socrates with evident astonishment. He can hardly understand the meaning of Archelaus being miserable, or of rhetoric being only useful in self-accusation. When the argument with him has fairly run out.

Callicles, in whose house they are assembled, is introduced on the stage: he is with difficulty convinced that Socrates is in earnest; for if these things are true, then, as he says with real emotion, the

foundations of society are upside down. In him another type of character is represented; he is neither sophist nor philosopher, but man of the world, and an accomplished Athenian gentleman. He might be described in modern language as a cynic or materialist, a lover of power and also of pleasure, and unscrupulous in his means of attaining both. There is no desire on his part to offer any compromise in the interests of morality; nor is any concession made by him. Like Thrasymachus in the Republic, though he is not of the same weak and vulgar class, he consistently maintains that might is right. His great motive of action is political ambition; in this he is characteristically Greek. Like Anytus in the Meno, he is the enemy of the Sophists; but favours the new art of rhetoric, which he regards as an excellent weapon of attack and defence. He is a despiser of mankind as he is of philosophy, and sees in the laws of the state only a violation of the order of nature, which intended that the stronger should govern the weaker (compare Republic). Like other men of the world who are of a speculative turn of mind, he generalizes the bad side of human nature, and has easily brought down his principles to his practice. Philosophy and poetry alike supply him with distinctions suited to his view of human life. He has a good will to Socrates, whose talents he evidently admires, while he censures the puerile use which he makes of them. He expresses a keen intellectual interest in the argument. Like Anytus, again, he has a sympathy with other men of the world; the Athenian statesmen of a former generation, who showed no weakness and made no mistakes, such as Miltiades, Themistocles, Pericles, are his favourites. His ideal of human character is a man of great passions and great powers, which he has developed to the utmost, and which he uses in his own enjoyment and in the government of others. Had Critias been the name instead of Callicles, about whom we know nothing from other sources, the opinions of the man would have seemed to reflect the history of his life.

And now the combat deepens. In Callicles, far more than in any sophist or rhetorician, is concentrated the spirit of evil against which Socrates is contending, the spirit of the world, the spirit of the many contending against the one wise man, of which the Sophists, as he describes them in the Republic, are the imitators rather than the

authors, being themselves carried away by the great tide of public opinion. Socrates approaches his antagonist warily from a distance, with a sort of irony which touches with a light hand both his personal vices (probably in allusion to some scandal of the day) and his servility to the populace. At the same time, he is in most profound earnest, as Chaerephon remarks. Callicles soon loses his temper, but the more he is irritated, the more provoking and matter of fact does Socrates become. A repartee of his which appears to have been really made to the 'omniscient' Hippias, according to the testimony of Xenophon (*Mem.*), is introduced. He is called by Callicles a popular declaimer, and certainly shows that he has the power, in the words of Gorgias, of being 'as long as he pleases,' or 'as short as he pleases' (compare *Protag.*). Callicles exhibits great ability in defending himself and attacking Socrates, whom he accuses of trifling and word-splitting; he is scandalized that the legitimate consequences of his own argument should be stated in plain terms; after the manner of men of the world, he wishes to preserve the decencies of life. But he cannot consistently maintain the bad sense of words; and getting confused between the abstract notions of better, superior, stronger, he is easily turned round by Socrates, and only induced to continue the argument by the authority of Gorgias. Once, when Socrates is describing the manner in which the ambitious citizen has to identify himself with the people, he partially recognizes the truth of his words.

The Socrates of the *Gorgias* may be compared with the Socrates of the *Protagoras* and *Meno*. As in other dialogues, he is the enemy of the Sophists and rhetoricians; and also of the statesmen, whom he regards as another variety of the same species. His behaviour is governed by that of his opponents; the least forwardness or egotism on their part is met by a corresponding irony on the part of Socrates. He must speak, for philosophy will not allow him to be silent. He is indeed more ironical and provoking than in any other of Plato's writings: for he is 'fooled to the top of his bent' by the worldliness of Callicles. But he is also more deeply in earnest. He rises higher than even in the *Phaedo* and *Crito*: at first enveloping his moral convictions in a cloud of dust and dialectics, he ends by losing his method, his life, himself, in them. As in the *Protagoras* and *Phaedrus*,

throwing aside the veil of irony, he makes a speech, but, true to his character, not until his adversary has refused to answer any more questions. The presentiment of his own fate is hanging over him. He is aware that Socrates, the single real teacher of politics, as he ventures to call himself, cannot safely go to war with the whole world, and that in the courts of earth he will be condemned. But he will be justified in the world below. Then the position of Socrates and Callicles will be reversed; all those things 'unfit for ears polite' which Callicles has prophesied as likely to happen to him in this life, the insulting language, the box on the ears, will recoil upon his assailant. (Compare Republic, and the similar reversal of the position of the lawyer and the philosopher in the Theaetetus).

There is an interesting allusion to his own behaviour at the trial of the generals after the battle of Arginusae, which he ironically attributes to his ignorance of the manner in which a vote of the assembly should be taken. This is said to have happened 'last year' (B.C. 406), and therefore the assumed date of the dialogue has been fixed at 405 B.C., when Socrates would already have been an old man. The date is clearly marked, but is scarcely reconcilable with another indication of time, viz. the 'recent' usurpation of Archelaus, which occurred in the year 413; and still less with the 'recent' death of Pericles, who really died twenty-four years previously (429 B.C.) and is afterwards reckoned among the statesmen of a past age; or with the mention of Nicias, who died in 413, and is nevertheless spoken of as a living witness. But we shall hereafter have reason to observe, that although there is a general consistency of times and persons in the Dialogues of Plato, a precise dramatic date is an invention of his commentators (Preface to Republic).

The conclusion of the Dialogue is remarkable, (1) for the truly characteristic declaration of Socrates that he is ignorant of the true nature and bearing of these things, while he affirms at the same time that no one can maintain any other view without being ridiculous. The profession of ignorance reminds us of the earlier and more exclusively Socratic Dialogues. But neither in them, nor in the Apology, nor in the Memorabilia of Xenophon, does Socrates express any doubt of the fundamental truths of morality. He evidently regards this 'among the multitude of questions' which agitate human

life 'as the principle which alone remains unshaken.' He does not insist here, any more than in the *Phaedo*, on the literal truth of the myth, but only on the soundness of the doctrine which is contained in it, that doing wrong is worse than suffering, and that a man should be rather than seem; for the next best thing to a man's being just is that he should be corrected and become just; also that he should avoid all flattery, whether of himself or of others; and that rhetoric should be employed for the maintenance of the right only. The revelation of another life is a recapitulation of the argument in a figure.

(2) Socrates makes the singular remark, that he is himself the only true politician of his age. In other passages, especially in the *Apology*, he disclaims being a politician at all. There he is convinced that he or any other good man who attempted to resist the popular will would be put to death before he had done any good to himself or others. Here he anticipates such a fate for himself, from the fact that he is 'the only man of the present day who performs his public duties at all.' The two points of view are not really inconsistent, but the difference between them is worth noticing: Socrates is and is not a public man. Not in the ordinary sense, like Alcibiades or Pericles, but in a higher one; and this will sooner or later entail the same consequences on him. He cannot be a private man if he would; neither can he separate morals from politics. Nor is he unwilling to be a politician, although he foresees the dangers which await him; but he must first become a better and wiser man, for he as well as Callicles is in a state of perplexity and uncertainty. And yet there is an inconsistency: for should not Socrates too have taught the citizens better than to put him to death?

And now, as he himself says, we will 'resume the argument from the beginning.'

Socrates, who is attended by his inseparable disciple, Chaerephon, meets Callicles in the streets of Athens. He is informed that he has just missed an exhibition of Gorgias, which he regrets, because he was desirous, not of hearing Gorgias display his rhetoric, but of interrogating him concerning the nature of his art. Callicles proposes that they shall go with him to his own house, where Gorgias is staying. There they find the great rhetorician and his younger friend and disciple Polus.

SOCRATES: Put the question to him, Chaerephon.

CHAEREPHON: What question?

SOCRATES: Who is he? — such a question as would elicit from a man the answer, ‘I am a cobbler.’

Polus suggests that Gorgias may be tired, and desires to answer for him. ‘Who is Gorgias?’ asks Chaerephon, imitating the manner of his master Socrates. ‘One of the best of men, and a proficient in the best and noblest of experimental arts,’ etc., replies Polus, in rhetorical and balanced phrases. Socrates is dissatisfied at the length and unmeaningness of the answer; he tells the disconcerted volunteer that he has mistaken the quality for the nature of the art, and remarks to Gorgias, that Polus has learnt how to make a speech, but not how to answer a question. He wishes that Gorgias would answer him. Gorgias is willing enough, and replies to the question asked by Chaerephon, — that he is a rhetorician, and in Homeric language, ‘boasts himself to be a good one.’ At the request of Socrates he promises to be brief; for ‘he can be as long as he pleases, and as short as he pleases.’ Socrates would have him bestow his length on others, and proceeds to ask him a number of questions, which are answered by him to his own great satisfaction, and with a brevity which excites the admiration of Socrates. The result of the discussion may be summed up as follows: —

Rhetoric treats of discourse; but music and medicine, and other particular arts, are also concerned with discourse; in what way then does rhetoric differ from them? Gorgias draws a distinction between the arts which deal with words, and the arts which have to do with external actions. Socrates extends this distinction further, and divides all productive arts into two classes: (1) arts which may be carried on in silence; and (2) arts which have to do with words, or in which words are coextensive with action, such as arithmetic, geometry, rhetoric. But still Gorgias could hardly have meant to say that arithmetic was the same as rhetoric. Even in the arts which are concerned with words there are differences. What then distinguishes rhetoric from the other arts which have to do with words? ‘The words which rhetoric uses relate to the best and greatest of human things.’ But tell me, Gorgias, what are the best? ‘Health first, beauty next, wealth third,’ in the words of the old song, or how would you

rank them? The arts will come to you in a body, each claiming precedence and saying that her own good is superior to that of the rest — How will you choose between them? ‘I should say, Socrates, that the art of persuasion, which gives freedom to all men, and to individuals power in the state, is the greatest good.’ But what is the exact nature of this persuasion? — is the persevering retort: You could not describe Zeuxis as a painter, or even as a painter of figures, if there were other painters of figures; neither can you define rhetoric simply as an art of persuasion, because there are other arts which persuade, such as arithmetic, which is an art of persuasion about odd and even numbers. Gorgias is made to see the necessity of a further limitation, and he now defines rhetoric as the art of persuading in the law courts, and in the assembly, about the just and unjust. But still there are two sorts of persuasion: one which gives knowledge, and another which gives belief without knowledge; and knowledge is always true, but belief may be either true or false, — there is therefore a further question: which of the two sorts of persuasion does rhetoric effect in courts of law and assemblies? Plainly that which gives belief and not that which gives knowledge; for no one can impart a real knowledge of such matters to a crowd of persons in a few minutes. And there is another point to be considered: — when the assembly meets to advise about walls or docks or military expeditions, the rhetorician is not taken into counsel, but the architect, or the general. How would Gorgias explain this phenomenon? All who intend to become disciples, of whom there are several in the company, and not Socrates only, are eagerly asking: — About what then will rhetoric teach us to persuade or advise the state?

Gorgias illustrates the nature of rhetoric by adducing the example of Themistocles, who persuaded the Athenians to build their docks and walls, and of Pericles, whom Socrates himself has heard speaking about the middle wall of the Piraeus. He adds that he has exercised a similar power over the patients of his brother Herodicus. He could be chosen a physician by the assembly if he pleased, for no physician could compete with a rhetorician in popularity and influence. He could persuade the multitude of anything by the power of his rhetoric; not that the rhetorician ought to abuse this power any

more than a boxer should abuse the art of self-defence. Rhetoric is a good thing, but, like all good things, may be unlawfully used. Neither is the teacher of the art to be deemed unjust because his pupils are unjust and make a bad use of the lessons which they have learned from him.

Socrates would like to know before he replies, whether Gorgias will quarrel with him if he points out a slight inconsistency into which he has fallen, or whether he, like himself, is one who loves to be refuted. Gorgias declares that he is quite one of his sort, but fears that the argument may be tedious to the company. The company cheer, and Chaerephon and Callicles exhort them to proceed. Socrates gently points out the supposed inconsistency into which Gorgias appears to have fallen, and which he is inclined to think may arise out of a misapprehension of his own. The rhetorician has been declared by Gorgias to be more persuasive to the ignorant than the physician, or any other expert. And he is said to be ignorant, and this ignorance of his is regarded by Gorgias as a happy condition, for he has escaped the trouble of learning. But is he as ignorant of just and unjust as he is of medicine or building? Gorgias is compelled to admit that if he did not know them previously he must learn them from his teacher as a part of the art of rhetoric. But he who has learned carpentry is a carpenter, and he who has learned music is a musician, and he who has learned justice is just. The rhetorician then must be a just man, and rhetoric is a just thing. But Gorgias has already admitted the opposite of this, viz. that rhetoric may be abused, and that the rhetorician may act unjustly. How is the inconsistency to be explained?

The fallacy of this argument is twofold; for in the first place, a man may know justice and not be just — here is the old confusion of the arts and the virtues; — nor can any teacher be expected to counteract wholly the bent of natural character; and secondly, a man may have a degree of justice, but not sufficient to prevent him from ever doing wrong. Polus is naturally exasperated at the sophism, which he is unable to detect; of course, he says, the rhetorician, like every one else, will admit that he knows justice (how can he do otherwise when pressed by the interrogations of Socrates?), but he thinks that great want of manners is shown in bringing the argument

to such a pass. Socrates ironically replies, that when old men trip, the young set them on their legs again; and he is quite willing to retract, if he can be shown to be in error, but upon one condition, which is that Polus studies brevity. Polus is in great indignation at not being allowed to use as many words as he pleases in the free state of Athens. Socrates retorts, that yet harder will be his own case, if he is compelled to stay and listen to them. After some altercation they agree (compare Protag.), that Polus shall ask and Socrates answer.

‘What is the art of Rhetoric?’ says Polus. Not an art at all, replies Socrates, but a thing which in your book you affirm to have created art. Polus asks, ‘What thing?’ and Socrates answers, An experience or routine of making a sort of delight or gratification. ‘But is not rhetoric a fine thing?’ I have not yet told you what rhetoric is. Will you ask me another question — What is cookery? ‘What is cookery?’ An experience or routine of making a sort of delight or gratification. Then they are the same, or rather fall under the same class, and rhetoric has still to be distinguished from cookery. ‘What is rhetoric?’ asks Polus once more. A part of a not very creditable whole, which may be termed flattery, is the reply. ‘But what part?’ A shadow of a part of politics. This, as might be expected, is wholly unintelligible, both to Gorgias and Polus; and, in order to explain his meaning to them, Socrates draws a distinction between shadows or appearances and realities; e.g. there is real health of body or soul, and the appearance of them; real arts and sciences, and the simulations of them. Now the soul and body have two arts waiting upon them, first the art of politics, which attends on the soul, having a legislative part and a judicial part; and another art attending on the body, which has no generic name, but may also be described as having two divisions, one of which is medicine and the other gymnastic. Corresponding with these four arts or sciences there are four shams or simulations of them, mere experiences, as they may be termed, because they give no reason of their own existence. The art of dressing up is the sham or simulation of gymnastic, the art of cookery, of medicine; rhetoric is the simulation of justice, and sophistic of legislation. They may be summed up in an arithmetical formula: —

Tiring: gymnastic:: cookery: medicine:: sophistic: legislation.

And,

Cookery: medicine:: rhetoric: the art of justice.

And this is the true scheme of them, but when measured only by the gratification which they procure, they become jumbled together and return to their aboriginal chaos. Socrates apologizes for the length of his speech, which was necessary to the explanation of the subject, and begs Polus not unnecessarily to retaliate on him.

‘Do you mean to say that the rhetoricians are esteemed flatterers?’ They are not esteemed at all. ‘Why, have they not great power, and can they not do whatever they desire?’ They have no power, and they only do what they think best, and never what they desire; for they never attain the true object of desire, which is the good. ‘As if you, Socrates, would not envy the possessor of despotic power, who can imprison, exile, kill any one whom he pleases.’ But Socrates replies that he has no wish to put any one to death; he who kills another, even justly, is not to be envied, and he who kills him unjustly is to be pitied; it is better to suffer than to do injustice. He does not consider that going about with a dagger and putting men out of the way, or setting a house on fire, is real power. To this Polus assents, on the ground that such acts would be punished, but he is still of opinion that evil-doers, if they are unpunished, may be happy enough. He instances Archelaus, son of Perdiccas, the usurper of Macedonia. Does not Socrates think him happy? — Socrates would like to know more about him; he cannot pronounce even the great king to be happy, unless he knows his mental and moral condition. Polus explains that Archelaus was a slave, being the son of a woman who was the slave of Alcetas, brother of Perdiccas king of Macedon — and he, by every species of crime, first murdering his uncle and then his cousin and half-brother, obtained the kingdom. This was very wicked, and yet all the world, including Socrates, would like to have his place. Socrates dismisses the appeal to numbers; Polus, if he will, may summon all the rich men of Athens, Nicias and his brothers, Aristocrates, the house of Pericles, or any other great family — this is the kind of evidence which is adduced in courts of justice, where truth depends upon numbers. But Socrates employs proof of another sort; his appeal is to one witness only, — that is to say, the person with whom he is speaking; him he will convict out of his own mouth. And he is prepared to show, after his manner, that Archelaus cannot

be a wicked man and yet happy.

The evil-doer is deemed happy if he escapes, and miserable if he suffers punishment; but Socrates thinks him less miserable if he suffers than if he escapes. Polus is of opinion that such a paradox as this hardly deserves refutation, and is at any rate sufficiently refuted by the fact. Socrates has only to compare the lot of the successful tyrant who is the envy of the world, and of the wretch who, having been detected in a criminal attempt against the state, is crucified or burnt to death. Socrates replies, that if they are both criminal they are both miserable, but that the unpunished is the more miserable of the two. At this Polus laughs outright, which leads Socrates to remark that laughter is a new species of refutation. Polus replies, that he is already refuted; for if he will take the votes of the company, he will find that no one agrees with him. To this Socrates rejoins, that he is not a public man, and (referring to his own conduct at the trial of the generals after the battle of Arginusae) is unable to take the suffrages of any company, as he had shown on a recent occasion; he can only deal with one witness at a time, and that is the person with whom he is arguing. But he is certain that in the opinion of any man to do is worse than to suffer evil.

Polus, though he will not admit this, is ready to acknowledge that to do evil is considered the more foul or dishonourable of the two. But what is fair and what is foul; whether the terms are applied to bodies, colours, figures, laws, habits, studies, must they not be defined with reference to pleasure and utility? Polus assents to this latter doctrine, and is easily persuaded that the fouler of two things must exceed either in pain or in hurt. But the doing cannot exceed the suffering of evil in pain, and therefore must exceed in hurt. Thus doing is proved by the testimony of Polus himself to be worse or more hurtful than suffering.

There remains the other question: Is a guilty man better off when he is punished or when he is unpunished? Socrates replies, that what is done justly is suffered justly: if the act is just, the effect is just; if to punish is just, to be punished is just, and therefore fair, and therefore beneficent; and the benefit is that the soul is improved. There are three evils from which a man may suffer, and which affect him in estate, body, and soul; — these are, poverty, disease, injustice;

and the foulest of these is injustice, the evil of the soul, because that brings the greatest hurt. And there are three arts which heal these evils — trading, medicine, justice — and the fairest of these is justice. Happy is he who has never committed injustice, and happy in the second degree he who has been healed by punishment. And therefore the criminal should himself go to the judge as he would to the physician, and purge away his crime. Rhetoric will enable him to display his guilt in proper colours, and to sustain himself and others in enduring the necessary penalty. And similarly if a man has an enemy, he will desire not to punish him, but that he shall go unpunished and become worse and worse, taking care only that he does no injury to himself. These are at least conceivable uses of the art, and no others have been discovered by us.

Here Callicles, who has been listening in silent amazement, asks Chaerephon whether Socrates is in earnest, and on receiving the assurance that he is, proceeds to ask the same question of Socrates himself. For if such doctrines are true, life must have been turned upside down, and all of us are doing the opposite of what we ought to be doing.

Socrates replies in a style of playful irony, that before men can understand one another they must have some common feeling. And such a community of feeling exists between himself and Callicles, for both of them are lovers, and they have both a pair of loves; the beloved of Callicles are the Athenian Demos and Demos the son of Pyrilampes; the beloved of Socrates are Alcibiades and philosophy. The peculiarity of Callicles is that he can never contradict his loves; he changes as his Demos changes in all his opinions; he watches the countenance of both his loves, and repeats their sentiments, and if any one is surprised at his sayings and doings, the explanation of them is, that he is not a free agent, but must always be imitating his two loves. And this is the explanation of Socrates' peculiarities also. He is always repeating what his mistress, Philosophy, is saying to him, who unlike his other love, Alcibiades, is ever the same, ever true. Callicles must refute her, or he will never be at unity with himself; and discord in life is far worse than the discord of musical sounds.

Callicles answers, that Gorgias was overthrown because, as Polus

said, in compliance with popular prejudice he had admitted that if his pupil did not know justice the rhetorician must teach him; and Polus has been similarly entangled, because his modesty led him to admit that to suffer is more honourable than to do injustice. By custom 'yes,' but not by nature, says Callicles. And Socrates is always playing between the two points of view, and putting one in the place of the other. In this very argument, what Polus only meant in a conventional sense has been affirmed by him to be a law of nature. For convention says that 'injustice is dishonourable,' but nature says that 'might is right.' And we are always taming down the nobler spirits among us to the conventional level. But sometimes a great man will rise up and reassert his original rights, trampling under foot all our formularies, and then the light of natural justice shines forth. Pindar says, 'Law, the king of all, does violence with high hand;' as is indeed proved by the example of Heracles, who drove off the oxen of Geryon and never paid for them.

This is the truth, Socrates, as you will be convinced, if you leave philosophy and pass on to the real business of life. A little philosophy is an excellent thing; too much is the ruin of a man. He who has not 'passed his metaphysics' before he has grown up to manhood will never know the world. Philosophers are ridiculous when they take to politics, and I dare say that politicians are equally ridiculous when they take to philosophy: 'Every man,' as Euripides says, 'is fondest of that in which he is best.' Philosophy is graceful in youth, like the lisp of infancy, and should be cultivated as a part of education; but when a grown-up man lisps or studies philosophy, I should like to beat him. None of those over-refined natures ever come to any good; they avoid the busy haunts of men, and skulk in corners, whispering to a few admiring youths, and never giving utterance to any noble sentiments.

For you, Socrates, I have a regard, and therefore I say to you, as Zethus says to Amphion in the play, that you have 'a noble soul disguised in a puerile exterior.' And I would have you consider the danger which you and other philosophers incur. For you would not know how to defend yourself if any one accused you in a law-court, — there you would stand, with gaping mouth and dizzy brain, and might be murdered, robbed, boxed on the ears with impunity. Take

my advice, then, and get a little common sense; leave to others these frivolities; walk in the ways of the wealthy and be wise.

Socrates professes to have found in Callicles the philosopher's touchstone; and he is certain that any opinion in which they both agree must be the very truth. Callicles has all the three qualities which are needed in a critic — knowledge, good-will, frankness; Gorgias and Polus, although learned men, were too modest, and their modesty made them contradict themselves. But Callicles is well-educated; and he is not too modest to speak out (of this he has already given proof), and his good-will is shown both by his own profession and by his giving the same caution against philosophy to Socrates, which Socrates remembers hearing him give long ago to his own clique of friends. He will pledge himself to retract any error into which he may have fallen, and which Callicles may point out. But he would like to know first of all what he and Pindar mean by natural justice. Do they suppose that the rule of justice is the rule of the stronger or of the better? 'There is no difference.' Then are not the many superior to the one, and the opinions of the many better? And their opinion is that justice is equality, and that to do is more dishonourable than to suffer wrong. And as they are the superior or stronger, this opinion of theirs must be in accordance with natural as well as conventional justice. 'Why will you continue splitting words? Have I not told you that the superior is the better?' But what do you mean by the better? Tell me that, and please to be a little milder in your language, if you do not wish to drive me away. 'I mean the worthier, the wiser.' You mean to say that one man of sense ought to rule over ten thousand fools? 'Yes, that is my meaning.' Ought the physician then to have a larger share of meats and drinks? or the weaver to have more coats, or the cobbler larger shoes, or the farmer more seed? 'You are always saying the same things, Socrates.' Yes, and on the same subjects too; but you are never saying the same things. For, first, you defined the superior to be the stronger, and then the wiser, and now something else; — what DO you mean? 'I mean men of political ability, who ought to govern and to have more than the governed.' Than themselves? 'What do you mean?' I mean to say that every man is his own governor. 'I see that you mean those dolts, the temperate. But my doctrine is, that a man should let his desires

grow, and take the means of satisfying them. To the many this is impossible, and therefore they combine to prevent him. But if he is a king, and has power, how base would he be in submitting to them! To invite the common herd to be lord over him, when he might have the enjoyment of all things! For the truth is, Socrates, that luxury and self-indulgence are virtue and happiness; all the rest is mere talk.'

Socrates compliments Callicles on his frankness in saying what other men only think. According to his view, those who want nothing are not happy. 'Why,' says Callicles, 'if they were, stones and the dead would be happy.' Socrates in reply is led into a half-serious, half-comic vein of reflection. 'Who knows,' as Euripides says, 'whether life may not be death, and death life?' Nay, there are philosophers who maintain that even in life we are dead, and that the body (soma) is the tomb (sema) of the soul. And some ingenious Sicilian has made an allegory, in which he represents fools as the uninitiated, who are supposed to be carrying water to a vessel, which is full of holes, in a similarly holey sieve, and this sieve is their own soul. The idea is fanciful, but nevertheless is a figure of a truth which I want to make you acknowledge, viz. that the life of contentment is better than the life of indulgence. Are you disposed to admit that? 'Far otherwise.' Then hear another parable. The life of self-contentment and self-indulgence may be represented respectively by two men, who are filling jars with streams of wine, honey, milk, — the jars of the one are sound, and the jars of the other leaky; the first fills his jars, and has no more trouble with them; the second is always filling them, and would suffer extreme misery if he desisted. Are you of the same opinion still? 'Yes, Socrates, and the figure expresses what I mean. For true pleasure is a perpetual stream, flowing in and flowing out. To be hungry and always eating, to be thirsty and always drinking, and to have all the other desires and to satisfy them, that, as I admit, is my idea of happiness.' And to be itching and always scratching? 'I do not deny that there may be happiness even in that.' And to indulge unnatural desires, if they are abundantly satisfied? Callicles is indignant at the introduction of such topics. But he is reminded by Socrates that they are introduced, not by him, but by the maintainer of the identity of pleasure and good. Will Callicles still maintain this? 'Yes, for the sake of consistency, he will.' The

answer does not satisfy Socrates, who fears that he is losing his touchstone. A profession of seriousness on the part of Callicles reassures him, and they proceed with the argument. Pleasure and good are the same, but knowledge and courage are not the same either with pleasure or good, or with one another. Socrates disproves the first of these statements by showing that two opposites cannot coexist, but must alternate with one another — to be well and ill together is impossible. But pleasure and pain are simultaneous, and the cessation of them is simultaneous; e.g. in the case of drinking and thirsting, whereas good and evil are not simultaneous, and do not cease simultaneously, and therefore pleasure cannot be the same as good.

Callicles has already lost his temper, and can only be persuaded to go on by the interposition of Gorgias. Socrates, having already guarded against objections by distinguishing courage and knowledge from pleasure and good, proceeds: — The good are good by the presence of good, and the bad are bad by the presence of evil. And the brave and wise are good, and the cowardly and foolish are bad. And he who feels pleasure is good, and he who feels pain is bad, and both feel pleasure and pain in nearly the same degree, and sometimes the bad man or coward in a greater degree. Therefore the bad man or coward is as good as the brave or may be even better.

Callicles endeavours now to avert the inevitable absurdity by affirming that he and all mankind admitted some pleasures to be good and others bad. The good are the beneficial, and the bad are the hurtful, and we should choose the one and avoid the other. But this, as Socrates observes, is a return to the old doctrine of himself and Polus, that all things should be done for the sake of the good.

Callicles assents to this, and Socrates, finding that they are agreed in distinguishing pleasure from good, returns to his old division of empirical habits, or shams, or flatteries, which study pleasure only, and the arts which are concerned with the higher interests of soul and body. Does Callicles agree to this division? Callicles will agree to anything, in order that he may get through the argument. Which of the arts then are flatteries? Flute-playing, harp-playing, choral exhibitions, the dithyrambics of Cinesias are all equally condemned on the ground that they give pleasure only; and Meles the harp-

player, who was the father of Cinesias, failed even in that. The stately muse of Tragedy is bent upon pleasure, and not upon improvement. Poetry in general is only a rhetorical address to a mixed audience of men, women, and children. And the orators are very far from speaking with a view to what is best; their way is to humour the assembly as if they were children.

Callicles replies, that this is only true of some of them; others have a real regard for their fellow-citizens. Granted; then there are two species of oratory; the one a flattery, another which has a real regard for the citizens. But where are the orators among whom you find the latter? Callicles admits that there are none remaining, but there were such in the days when Themistocles, Cimon, Miltiades, and the great Pericles were still alive. Socrates replies that none of these were true artists, setting before themselves the duty of bringing order out of disorder. The good man and true orator has a settled design, running through his life, to which he conforms all his words and actions; he desires to implant justice and eradicate injustice, to implant all virtue and eradicate all vice in the minds of his citizens. He is the physician who will not allow the sick man to indulge his appetites with a variety of meats and drinks, but insists on his exercising self-restraint. And this is good for the soul, and better than the unrestrained indulgence which Callicles was recently approving.

Here Callicles, who had been with difficulty brought to this point, turns restive, and suggests that Socrates shall answer his own questions. 'Then,' says Socrates, 'one man must do for two;' and though he had hoped to have given Callicles an 'Amphion' in return for his 'Zethus,' he is willing to proceed; at the same time, he hopes that Callicles will correct him, if he falls into error. He recapitulates the advantages which he has already won: —

The pleasant is not the same as the good — Callicles and I are agreed about that, — but pleasure is to be pursued for the sake of the good, and the good is that of which the presence makes us good; we and all things good have acquired some virtue or other. And virtue, whether of body or soul, of things or persons, is not attained by accident, but is due to order and harmonious arrangement. And the soul which has order is better than the soul which is without order, and is therefore temperate and is therefore good, and the intemperate

is bad. And he who is temperate is also just and brave and pious, and has attained the perfection of goodness and therefore of happiness, and the intemperate whom you approve is the opposite of all this and is wretched. He therefore who would be happy must pursue temperance and avoid intemperance, and if possible escape the necessity of punishment, but if he have done wrong he must endure punishment. In this way states and individuals should seek to attain harmony, which, as the wise tell us, is the bond of heaven and earth, of gods and men. Callicles has never discovered the power of geometrical proportion in both worlds; he would have men aim at disproportion and excess. But if he be wrong in this, and if self-control is the true secret of happiness, then the paradox is true that the only use of rhetoric is in self-accusation, and Polus was right in saying that to do wrong is worse than to suffer wrong, and Gorgias was right in saying that the rhetorician must be a just man. And you were wrong in taunting me with my defenceless condition, and in saying that I might be accused or put to death or boxed on the ears with impunity. For I may repeat once more, that to strike is worse than to be stricken — to do than to suffer. What I said then is now made fast in adamantine bonds. I myself know not the true nature of these things, but I know that no one can deny my words and not be ridiculous. To do wrong is the greatest of evils, and to suffer wrong is the next greatest evil. He who would avoid the last must be a ruler, or the friend of a ruler; and to be the friend he must be the equal of the ruler, and must also resemble him. Under his protection he will suffer no evil, but will he also do no evil? Nay, will he not rather do all the evil which he can and escape? And in this way the greatest of all evils will befall him. ‘But this imitator of the tyrant,’ rejoins Callicles, ‘will kill any one who does not similarly imitate him.’ Socrates replies that he is not deaf, and that he has heard that repeated many times, and can only reply, that a bad man will kill a good one. ‘Yes, and that is the provoking thing.’ Not provoking to a man of sense who is not studying the arts which will preserve him from danger; and this, as you say, is the use of rhetoric in courts of justice. But how many other arts are there which also save men from death, and are yet quite humble in their pretensions — such as the art of swimming, or the art of the pilot? Does not the pilot do men at

least as much service as the rhetorician, and yet for the voyage from Aegina to Athens he does not charge more than two obols, and when he disembarks is quite unassuming in his demeanour? The reason is that he is not certain whether he has done his passengers any good in saving them from death, if one of them is diseased in body, and still more if he is diseased in mind — who can say? The engineer too will often save whole cities, and yet you despise him, and would not allow your son to marry his daughter, or his son to marry yours. But what reason is there in this? For if virtue only means the saving of life, whether your own or another's, you have no right to despise him or any practiser of saving arts. But is not virtue something different from saving and being saved? I would have you rather consider whether you ought not to disregard length of life, and think only how you can live best, leaving all besides to the will of Heaven. For you must not expect to have influence either with the Athenian Demos or with Demos the son of Pyrilampes, unless you become like them. What do you say to this?

‘There is some truth in what you are saying, but I do not entirely believe you.’

That is because you are in love with Demos. But let us have a little more conversation. You remember the two processes — one which was directed to pleasure, the other which was directed to making men as good as possible. And those who have the care of the city should make the citizens as good as possible. But who would undertake a public building, if he had never had a teacher of the art of building, and had never constructed a building before? or who would undertake the duty of state-physician, if he had never cured either himself or any one else? Should we not examine him before we entrusted him with the office? And as Callicles is about to enter public life, should we not examine him? Whom has he made better? For we have already admitted that this is the statesman's proper business. And we must ask the same question about Pericles, and Cimon, and Miltiades, and Themistocles. Whom did they make better? Nay, did not Pericles make the citizens worse? For he gave them pay, and at first he was very popular with them, but at last they condemned him to death. Yet surely he would be a bad tamer of animals who, having received them gentle, taught them to kick and

butt, and man is an animal; and Pericles who had the charge of man only made him wilder, and more savage and unjust, and therefore he could not have been a good statesman. The same tale might be repeated about Cimon, Themistocles, Miltiades. But the charioteer who keeps his seat at first is not thrown out when he gains greater experience and skill. The inference is, that the statesman of a past age were no better than those of our own. They may have been cleverer constructors of docks and harbours, but they did not improve the character of the citizens. I have told you again and again (and I purposely use the same images) that the soul, like the body, may be treated in two ways — there is the meaner and the higher art. You seemed to understand what I said at the time, but when I ask you who were the really good statesmen, you answer — as if I asked you who were the good trainers, and you answered, Thearion, the baker, Mithoecus, the author of the Sicilian cookery-book, Sarambus, the vintner. And you would be affronted if I told you that these are a parcel of cooks who make men fat only to make them thin. And those whom they have fattened applaud them, instead of finding fault with them, and lay the blame of their subsequent disorders on their physicians. In this respect, Callicles, you are like them; you applaud the statesmen of old, who pandered to the vices of the citizens, and filled the city with docks and harbours, but neglected virtue and justice. And when the fit of illness comes, the citizens who in like manner applauded Themistocles, Pericles, and others, will lay hold of you and my friend Alcibiades, and you will suffer for the misdeeds of your predecessors. The old story is always being repeated— ‘after all his services, the ungrateful city banished him, or condemned him to death.’ As if the statesman should not have taught the city better! He surely cannot blame the state for having unjustly used him, any more than the sophist or teacher can find fault with his pupils if they cheat him. And the sophist and orator are in the same case; although you admire rhetoric and despise sophistic, whereas sophistic is really the higher of the two. The teacher of the arts takes money, but the teacher of virtue or politics takes no money, because this is the only kind of service which makes the disciple desirous of requiting his teacher.

Socrates concludes by finally asking, to which of the two modes

of serving the state Callicles invites him:— ‘to the inferior and ministerial one,’ is the ingenuous reply. That is the only way of avoiding death, replies Socrates; and he has heard often enough, and would rather not hear again, that the bad man will kill the good. But he thinks that such a fate is very likely reserved for him, because he remarks that he is the only person who teaches the true art of politics. And very probably, as in the case which he described to Polus, he may be the physician who is tried by a jury of children. He cannot say that he has procured the citizens any pleasure, and if any one charges him with perplexing them, or with reviling their elders, he will not be able to make them understand that he has only been actuated by a desire for their good. And therefore there is no saying what his fate may be. ‘And do you think that a man who is unable to help himself is in a good condition?’ Yes, Callicles, if he have the true self-help, which is never to have said or done any wrong to himself or others. If I had not this kind of self-help, I should be ashamed; but if I die for want of your flattering rhetoric, I shall die in peace. For death is no evil, but to go to the world below laden with offences is the worst of evils. In proof of which I will tell you a tale:

Under the rule of Cronos, men were judged on the day of their death, and when judgment had been given upon them they departed — the good to the islands of the blest, the bad to the house of vengeance. But as they were still living, and had their clothes on at the time when they were being judged, there was favouritism, and Zeus, when he came to the throne, was obliged to alter the mode of procedure, and try them after death, having first sent down Prometheus to take away from them the foreknowledge of death. Minos, Rhadamanthus, and Aeacus were appointed to be the judges; Rhadamanthus for Asia, Aeacus for Europe, and Minos was to hold the court of appeal. Now death is the separation of soul and body, but after death soul and body alike retain their characteristics; the fat man, the dandy, the branded slave, are all distinguishable. Some prince or potentate, perhaps even the great king himself, appears before Rhadamanthus, and he instantly detects him, though he knows not who he is; he sees the scars of perjury and iniquity, and sends him away to the house of torment.

For there are two classes of souls who undergo punishment — the curable and the incurable. The curable are those who are benefited by their punishment; the incurable are such as Archelaus, who benefit others by becoming a warning to them. The latter class are generally kings and potentates; meaner persons, happily for themselves, have not the same power of doing injustice. Sisyphus and Tityus, not Thersites, are supposed by Homer to be undergoing everlasting punishment. Not that there is anything to prevent a great man from being a good one, as is shown by the famous example of Aristeides, the son of Lysimachus. But to Rhadamanthus the souls are only known as good or bad; they are stripped of their dignities and preferments; he despatches the bad to Tartarus, labelled either as curable or incurable, and looks with love and admiration on the soul of some just one, whom he sends to the islands of the blest. Similar is the practice of Aeacus; and Minos overlooks them, holding a golden sceptre, as Odysseus in Homer saw him

‘Wielding a sceptre of gold, and giving laws to the dead.’

My wish for myself and my fellow-men is, that we may present our souls undefiled to the judge in that day; my desire in life is to be able to meet death. And I exhort you, and retort upon you the reproach which you cast upon me, — that you will stand before the judge, gaping, and with dizzy brain, and any one may box you on the ear, and do you all manner of evil.

Perhaps you think that this is an old wives’ fable. But you, who are the three wisest men in Hellas, have nothing better to say, and no one will ever show that to do is better than to suffer evil. A man should study to be, and not merely to seem. If he is bad, he should become good, and avoid all flattery, whether of the many or of the few.

Follow me, then; and if you are looked down upon, that will do you no harm. And when we have practised virtue, we will betake ourselves to politics, but not until we are delivered from the shameful state of ignorance and uncertainty in which we are at present. Let us follow in the way of virtue and justice, and not in the way to which you, Callicles, invite us; for that way is nothing worth.

We will now consider in order some of the principal points of the dialogue. Having regard (1) to the age of Plato and the ironical

character of his writings, we may compare him with himself, and with other great teachers, and we may note in passing the objections of his critics. And then (2) casting one eye upon him, we may cast another upon ourselves, and endeavour to draw out the great lessons which he teaches for all time, stripped of the accidental form in which they are enveloped.

(1) In the *Gorgias*, as in nearly all the other dialogues of Plato, we are made aware that formal logic has as yet no existence. The old difficulty of framing a definition recurs. The illusive analogy of the arts and the virtues also continues. The ambiguity of several words, such as nature, custom, the honourable, the good, is not cleared up. The Sophists are still floundering about the distinction of the real and seeming. Figures of speech are made the basis of arguments. The possibility of conceiving a universal art or science, which admits of application to a particular subject-matter, is a difficulty which remains unsolved, and has not altogether ceased to haunt the world at the present day (compare *Charmides*). The defect of clearness is also apparent in Socrates himself, unless we suppose him to be practising on the simplicity of his opponent, or rather perhaps trying an experiment in dialectics. Nothing can be more fallacious than the contradiction which he pretends to have discovered in the answers of Gorgias (see above). The advantages which he gains over Polus are also due to a false antithesis of pleasure and good, and to an erroneous assertion that an agent and a patient may be described by similar predicates; — a mistake which Aristotle partly shares and partly corrects in the *Nicomachean Ethics*. Traces of a ‘robust sophistry’ are likewise discernible in his argument with Callicles.

(2) Although Socrates professes to be convinced by reason only, yet the argument is often a sort of dialectical fiction, by which he conducts himself and others to his own ideal of life and action. And we may sometimes wish that we could have suggested answers to his antagonists, or pointed out to them the rocks which lay concealed under the ambiguous terms good, pleasure, and the like. But it would be as useless to examine his arguments by the requirements of modern logic, as to criticise this ideal from a merely utilitarian point of view. If we say that the ideal is generally regarded as unattainable, and that mankind will by no means agree in thinking that the

criminal is happier when punished than when unpunished, any more than they would agree to the stoical paradox that a man may be happy on the rack, Plato has already admitted that the world is against him. Neither does he mean to say that Archelaus is tormented by the stings of conscience; or that the sensations of the impaled criminal are more agreeable than those of the tyrant drowned in luxurious enjoyment. Neither is he speaking, as in the Protagoras, of virtue as a calculation of pleasure, an opinion which he afterwards repudiates in the Phaedo. What then is his meaning? His meaning we shall be able to illustrate best by parallel notions, which, whether justifiable by logic or not, have always existed among mankind. We must remind the reader that Socrates himself implies that he will be understood or appreciated by very few.

He is speaking not of the consciousness of happiness, but of the idea of happiness. When a martyr dies in a good cause, when a soldier falls in battle, we do not suppose that death or wounds are without pain, or that their physical suffering is always compensated by a mental satisfaction. Still we regard them as happy, and we would a thousand times rather have their death than a shameful life. Nor is this only because we believe that they will obtain an immortality of fame, or that they will have crowns of glory in another world, when their enemies and persecutors will be proportionably tormented. Men are found in a few instances to do what is right, without reference to public opinion or to consequences. And we regard them as happy on this ground only, much as Socrates' friends in the opening of the Phaedo are described as regarding him; or as was said of another, 'they looked upon his face as upon the face of an angel.' We are not concerned to justify this idealism by the standard of utility or public opinion, but merely to point out the existence of such a sentiment in the better part of human nature.

The idealism of Plato is founded upon this sentiment. He would maintain that in some sense or other truth and right are alone to be sought, and that all other goods are only desirable as means towards these. He is thought to have erred in 'considering the agent only, and making no reference to the happiness of others, as affected by him.' But the happiness of others or of mankind, if regarded as an end, is really quite as ideal and almost as paradoxical to the common

understanding as Plato's conception of happiness. For the greatest happiness of the greatest number may mean also the greatest pain of the individual which will procure the greatest pleasure of the greatest number. Ideas of utility, like those of duty and right, may be pushed to unpleasant consequences. Nor can Plato in the *Gorgias* be deemed purely self-regarding, considering that Socrates expressly mentions the duty of imparting the truth when discovered to others. Nor must we forget that the side of ethics which regards others is by the ancients merged in politics. Both in Plato and Aristotle, as well as in the Stoics, the social principle, though taking another form, is really far more prominent than in most modern treatises on ethics.

The idealizing of suffering is one of the conceptions which have exercised the greatest influence on mankind. Into the theological import of this, or into the consideration of the errors to which the idea may have given rise, we need not now enter. All will agree that the ideal of the Divine Sufferer, whose words the world would not receive, the man of sorrows of whom the Hebrew prophets spoke, has sunk deep into the heart of the human race. It is a similar picture of suffering goodness which Plato desires to portray, not without an allusion to the fate of his master Socrates. He is convinced that, somehow or other, such an one must be happy in life or after death. In the *Republic*, he endeavours to show that his happiness would be assured here in a well-ordered state. But in the actual condition of human things the wise and good are weak and miserable; such an one is like a man fallen among wild beasts, exposed to every sort of wrong and obloquy.

Plato, like other philosophers, is thus led on to the conclusion, that if 'the ways of God' to man are to be 'justified,' the hopes of another life must be included. If the question could have been put to him, whether a man dying in torments was happy still, even if, as he suggests in the *Apology*, 'death be only a long sleep,' we can hardly tell what would have been his answer. There have been a few, who, quite independently of rewards and punishments or of posthumous reputation, or any other influence of public opinion, have been willing to sacrifice their lives for the good of others. It is difficult to say how far in such cases an unconscious hope of a future life, or a general faith in the victory of good in the world, may have supported

the sufferers. But this extreme idealism is not in accordance with the spirit of Plato. He supposes a day of retribution, in which the good are to be rewarded and the wicked punished. Though, as he says in the *Phaedo*, no man of sense will maintain that the details of the stories about another world are true, he will insist that something of the kind is true, and will frame his life with a view to this unknown future. Even in the *Republic* he introduces a future life as an afterthought, when the superior happiness of the just has been established on what is thought to be an immutable foundation. At the same time he makes a point of determining his main thesis independently of remoter consequences.

(3) Plato's theory of punishment is partly vindictive, partly corrective. In the *Gorgias*, as well as in the *Phaedo* and *Republic*, a few great criminals, chiefly tyrants, are reserved as examples. But most men have never had the opportunity of attaining this pre-eminence of evil. They are not incurable, and their punishment is intended for their improvement. They are to suffer because they have sinned; like sick men, they must go to the physician and be healed. On this representation of Plato's the criticism has been made, that the analogy of disease and injustice is partial only, and that suffering, instead of improving men, may have just the opposite effect.

Like the general analogy of the arts and the virtues, the analogy of disease and injustice, or of medicine and justice, is certainly imperfect. But ideas must be given through something; the nature of the mind which is unseen can only be represented under figures derived from visible objects. If these figures are suggestive of some new aspect under which the mind may be considered, we cannot find fault with them for not exactly coinciding with the ideas represented. They partake of the imperfect nature of language, and must not be construed in too strict a manner. That Plato sometimes reasons from them as if they were not figures but realities, is due to the defective logical analysis of his age.

Nor does he distinguish between the suffering which improves and the suffering which only punishes and deters. He applies to the sphere of ethics a conception of punishment which is really derived from criminal law. He does not see that such punishment is only negative, and supplies no principle of moral growth or development.

He is not far off the higher notion of an education of man to be begun in this world, and to be continued in other stages of existence, which is further developed in the Republic. And Christian thinkers, who have ventured out of the beaten track in their meditations on the 'last things,' have found a ray of light in his writings. But he has not explained how or in what way punishment is to contribute to the improvement of mankind. He has not followed out the principle which he affirms in the Republic, that 'God is the author of evil only with a view to good,' and that 'they were the better for being punished.' Still his doctrine of a future state of rewards and punishments may be compared favourably with that perversion of Christian doctrine which makes the everlasting punishment of human beings depend on a brief moment of time, or even on the accident of an accident. And he has escaped the difficulty which has often beset divines, respecting the future destiny of the meaner sort of men (Thersites and the like), who are neither very good nor very bad, by not counting them worthy of eternal damnation.

We do Plato violence in pressing his figures of speech or chains of argument; and not less so in asking questions which were beyond the horizon of his vision, or did not come within the scope of his design. The main purpose of the Gorgias is not to answer questions about a future world, but to place in antagonism the true and false life, and to contrast the judgments and opinions of men with judgment according to the truth. Plato may be accused of representing a superhuman or transcendental virtue in the description of the just man in the Gorgias, or in the companion portrait of the philosopher in the Theaetetus; and at the same time may be thought to be condemning a state of the world which always has existed and always will exist among men. But such ideals act powerfully on the imagination of mankind. And such condemnations are not mere paradoxes of philosophers, but the natural rebellion of the higher sense of right in man against the ordinary conditions of human life. The greatest statesmen have fallen very far short of the political ideal, and are therefore justly involved in the general condemnation.

Subordinate to the main purpose of the dialogue are some other questions, which may be briefly considered: —

a. The antithesis of good and pleasure, which as in other dialogues

is supposed to consist in the permanent nature of the one compared with the transient and relative nature of the other. Good and pleasure, knowledge and sense, truth and opinion, essence and generation, virtue and pleasure, the real and the apparent, the infinite and finite, harmony or beauty and discord, dialectic and rhetoric or poetry, are so many pairs of opposites, which in Plato easily pass into one another, and are seldom kept perfectly distinct. And we must not forget that Plato's conception of pleasure is the Heracleitean flux transferred to the sphere of human conduct. There is some degree of unfairness in opposing the principle of good, which is objective, to the principle of pleasure, which is subjective. For the assertion of the permanence of good is only based on the assumption of its objective character. Had Plato fixed his mind, not on the ideal nature of good, but on the subjective consciousness of happiness, that would have been found to be as transient and precarious as pleasure.

b. The arts or sciences, when pursued without any view to truth, or the improvement of human life, are called flatteries. They are all alike dependent upon the opinion of mankind, from which they are derived. To Plato the whole world appears to be sunk in error, based on self-interest. To this is opposed the one wise man hardly professing to have found truth, yet strong in the conviction that a virtuous life is the only good, whether regarded with reference to this world or to another. Statesmen, Sophists, rhetoricians, poets, are alike brought up for judgment. They are the parodies of wise men, and their arts are the parodies of true arts and sciences. All that they call science is merely the result of that study of the tempers of the Great Beast, which he describes in the Republic.

c. Various other points of contact naturally suggest themselves between the Gorgias and other dialogues, especially the Republic, the Philebus, and the Protagoras. There are closer resemblances both of spirit and language in the Republic than in any other dialogue, the verbal similarity tending to show that they were written at the same period of Plato's life. For the Republic supplies that education and training of which the Gorgias suggests the necessity. The theory of the many weak combining against the few strong in the formation of society (which is indeed a partial truth), is similar in both of them, and is expressed in nearly the same language. The sufferings and fate

of the just man, the powerlessness of evil, and the reversal of the situation in another life, are also points of similarity. The poets, like the rhetoricians, are condemned because they aim at pleasure only, as in the Republic they are expelled the State, because they are imitators, and minister to the weaker side of human nature. That poetry is akin to rhetoric may be compared with the analogous notion, which occurs in the Protagoras, that the ancient poets were the Sophists of their day. In some other respects the Protagoras rather offers a contrast than a parallel. The character of Protagoras may be compared with that of Gorgias, but the conception of happiness is different in the two dialogues; being described in the former, according to the old Socratic notion, as deferred or accumulated pleasure, while in the Gorgias, and in the Phaedo, pleasure and good are distinctly opposed.

This opposition is carried out from a speculative point of view in the Philebus. There neither pleasure nor wisdom are allowed to be the chief good, but pleasure and good are not so completely opposed as in the Gorgias. For innocent pleasures, and such as have no antecedent pains, are allowed to rank in the class of goods. The allusion to Gorgias' definition of rhetoric (Philebus; compare Gorg.), as the art of persuasion, of all arts the best, for to it all things submit, not by compulsion, but of their own free will — marks a close and perhaps designed connection between the two dialogues. In both the ideas of measure, order, harmony, are the connecting links between the beautiful and the good.

In general spirit and character, that is, in irony and antagonism to public opinion, the Gorgias most nearly resembles the Apology, Crito, and portions of the Republic, and like the Philebus, though from another point of view, may be thought to stand in the same relation to Plato's theory of morals which the Theaetetus bears to his theory of knowledge.

d. A few minor points still remain to be summed up: (1) The extravagant irony in the reason which is assigned for the pilot's modest charge; and in the proposed use of rhetoric as an instrument of self-condemnation; and in the mighty power of geometrical equality in both worlds. (2) The reference of the mythus to the previous discussion should not be overlooked: the fate reserved for

incurable criminals such as Archelaus; the retaliation of the box on the ears; the nakedness of the souls and of the judges who are stripped of the clothes or disguises which rhetoric and public opinion have hitherto provided for them (compare Swift's notion that the universe is a suit of clothes, *Tale of a Tub*). The fiction seems to have involved Plato in the necessity of supposing that the soul retained a sort of corporeal likeness after death. (3) The appeal of the authority of Homer, who says that Odysseus saw Minos in his court 'holding a golden sceptre,' which gives verisimilitude to the tale.

It is scarcely necessary to repeat that Plato is playing 'both sides of the game,' and that in criticising the characters of Gorgias and Polus, we are not passing any judgment on historical individuals, but only attempting to analyze the 'dramatis personae' as they were conceived by him. Neither is it necessary to enlarge upon the obvious fact that Plato is a dramatic writer, whose real opinions cannot always be assumed to be those which he puts into the mouth of Socrates, or any other speaker who appears to have the best of the argument; or to repeat the observation that he is a poet as well as a philosopher; or to remark that he is not to be tried by a modern standard, but interpreted with reference to his place in the history of thought and the opinion of his time.

It has been said that the most characteristic feature of the *Gorgias* is the assertion of the right of dissent, or private judgment. But this mode of stating the question is really opposed both to the spirit of Plato and of ancient philosophy generally. For Plato is not asserting any abstract right or duty of toleration, or advantage to be derived from freedom of thought; indeed, in some other parts of his writings (e.g. *Laws*), he has fairly laid himself open to the charge of intolerance. No speculations had as yet arisen respecting the 'liberty of prophesying;' and Plato is not affirming any abstract right of this nature: but he is asserting the duty and right of the one wise and true man to dissent from the folly and falsehood of the many. At the same time he acknowledges the natural result, which he hardly seeks to avert, that he who speaks the truth to a multitude, regardless of consequences, will probably share the fate of Socrates.

The irony of Plato sometimes veils from us the height of idealism to which he soars. When declaring truths which the many will not receive, he puts on an armour which cannot be pierced by them. The weapons of ridicule are taken out of their hands and the laugh is turned against themselves. The disguises which Socrates assumes are like the parables of the New Testament, or the oracles of the Delphian God; they half conceal, half reveal, his meaning. The more he is in earnest, the more ironical he becomes; and he is never more in earnest or more ironical than in the *Gorgias*. He hardly troubles himself to answer seriously the objections of Gorgias and Polus, and therefore he sometimes appears to be careless of the ordinary requirements of logic. Yet in the highest sense he is always logical and consistent with himself. The form of the argument may be paradoxical; the substance is an appeal to the higher reason. He is uttering truths before they can be understood, as in all ages the words of philosophers, when they are first uttered, have found the world unprepared for them. A further misunderstanding arises out of the wildness of his humour; he is supposed not only by Callicles, but by the rest of mankind, to be jesting when he is profoundly serious. At length he makes even Polus in earnest. Finally, he drops the argument, and heedless any longer of the forms of dialectic, he loses himself in a sort of triumph, while at the same time he retaliates upon his adversaries. From this confusion of jest and earnest, we may now return to the ideal truth, and draw out in a simple form the main theses of the dialogue.

First Thesis: —

It is a greater evil to do than to suffer injustice.

Compare the New Testament —

‘It is better to suffer for well doing than for evil doing.’ — 1 Pet.

And the Sermon on the Mount —

‘Blessed are they that are persecuted for righteousness’ sake.’ —

Matt.

The words of Socrates are more abstract than the words of Christ, but they equally imply that the only real evil is moral evil. The righteous may suffer or die, but they have their reward; and even if they had no reward, would be happier than the wicked. The world, represented by Polus, is ready, when they are asked, to acknowledge

that injustice is dishonourable, and for their own sakes men are willing to punish the offender (compare Republic). But they are not equally willing to acknowledge that injustice, even if successful, is essentially evil, and has the nature of disease and death. Especially when crimes are committed on the great scale — the crimes of tyrants, ancient or modern — after a while, seeing that they cannot be undone, and have become a part of history, mankind are disposed to forgive them, not from any magnanimity or charity, but because their feelings are blunted by time, and ‘to forgive is convenient to them.’ The tangle of good and evil can no longer be unravelled; and although they know that the end cannot justify the means, they feel also that good has often come out of evil. But Socrates would have us pass the same judgment on the tyrant now and always; though he is surrounded by his satellites, and has the applauses of Europe and Asia ringing in his ears; though he is the civilizer or liberator of half a continent, he is, and always will be, the most miserable of men. The greatest consequences for good or for evil cannot alter a hair’s breadth the morality of actions which are right or wrong in themselves. This is the standard which Socrates holds up to us. Because politics, and perhaps human life generally, are of a mixed nature we must not allow our principles to sink to the level of our practice.

And so of private individuals — to them, too, the world occasionally speaks of the consequences of their actions: — if they are lovers of pleasure, they will ruin their health; if they are false or dishonest, they will lose their character. But Socrates would speak to them, not of what will be, but of what is — of the present consequence of lowering and degrading the soul. And all higher natures, or perhaps all men everywhere, if they were not tempted by interest or passion, would agree with him — they would rather be the victims than the perpetrators of an act of treachery or of tyranny. Reason tells them that death comes sooner or later to all, and is not so great an evil as an unworthy life, or rather, if rightly regarded, not an evil at all, but to a good man the greatest good. For in all of us there are slumbering ideals of truth and right, which may at any time awaken and develop a new life in us.

Second Thesis: —

It is better to suffer for wrong doing than not to suffer.

There might have been a condition of human life in which the penalty followed at once, and was proportioned to the offence. Moral evil would then be scarcely distinguishable from physical; mankind would avoid vice as they avoid pain or death. But nature, with a view of deepening and enlarging our characters, has for the most part hidden from us the consequences of our actions, and we can only foresee them by an effort of reflection. To awaken in us this habit of reflection is the business of early education, which is continued in maturer years by observation and experience. The spoilt child is in later life said to be unfortunate — he had better have suffered when he was young, and been saved from suffering afterwards. But is not the sovereign equally unfortunate whose education and manner of life are always concealing from him the consequences of his own actions, until at length they are revealed to him in some terrible downfall, which may, perhaps, have been caused not by his own fault? Another illustration is afforded by the pauper and criminal classes, who scarcely reflect at all, except on the means by which they can compass their immediate ends. We pity them, and make allowances for them; but we do not consider that the same principle applies to human actions generally. Not to have been found out in some dishonesty or folly, regarded from a moral or religious point of view, is the greatest of misfortunes. The success of our evil doings is a proof that the gods have ceased to strive with us, and have given us over to ourselves. There is nothing to remind us of our sins, and therefore nothing to correct them. Like our sorrows, they are healed by time;

‘While rank corruption, mining all within,
Infects unseen.’

The ‘accustomed irony’ of Socrates adds a corollary to the argument:— ‘Would you punish your enemy, you should allow him to escape unpunished’ — this is the true retaliation. (Compare the obscure verse of Proverbs, ‘Therefore if thine enemy hunger, feed him,’ etc., quoted in Romans.)

Men are not in the habit of dwelling upon the dark side of their own lives: they do not easily see themselves as others see them. They are very kind and very blind to their own faults; the rhetoric of self-

love is always pleading with them on their own behalf. Adopting a similar figure of speech, Socrates would have them use rhetoric, not in defence but in accusation of themselves. As they are guided by feeling rather than by reason, to their feelings the appeal must be made. They must speak to themselves; they must argue with themselves; they must paint in eloquent words the character of their own evil deeds. To any suffering which they have deserved, they must persuade themselves to submit. Under the figure there lurks a real thought, which, expressed in another form, admits of an easy application to ourselves. For do not we too accuse as well as excuse ourselves? And we call to our aid the rhetoric of prayer and preaching, which the mind silently employs while the struggle between the better and the worse is going on within us. And sometimes we are too hard upon ourselves, because we want to restore the balance which self-love has overthrown or disturbed; and then again we may hear a voice as of a parent consoling us. In religious diaries a sort of drama is often enacted by the consciences of men 'accusing or else excusing them.' For all our life long we are talking with ourselves: — What is thought but speech? What is feeling but rhetoric? And if rhetoric is used on one side only we shall be always in danger of being deceived. And so the words of Socrates, which at first sounded paradoxical, come home to the experience of all of us.

Third Thesis: —

We do not what we will, but what we wish.

Socrates would teach us a lesson which we are slow to learn — that good intentions, and even benevolent actions, when they are not prompted by wisdom, are of no value. We believe something to be for our good which we afterwards find out not to be for our good. The consequences may be inevitable, for they may follow an invariable law, yet they may often be the very opposite of what is expected by us. When we increase pauperism by almsgiving; when we tie up property without regard to changes of circumstances; when we say hastily what we deliberately disapprove; when we do in a moment of passion what upon reflection we regret; when from any want of self-control we give another an advantage over us — we are doing not what we will, but what we wish. All actions of which the

consequences are not weighed and foreseen, are of this impotent and paralytic sort; and the author of them has 'the least possible power' while seeming to have the greatest. For he is actually bringing about the reverse of what he intended. And yet the book of nature is open to him, in which he who runs may read if he will exercise ordinary attention; every day offers him experiences of his own and of other men's characters, and he passes them unheeded by. The contemplation of the consequences of actions, and the ignorance of men in regard to them, seems to have led Socrates to his famous thesis:— 'Virtue is knowledge;' which is not so much an error or paradox as a half truth, seen first in the twilight of ethical philosophy, but also the half of the truth which is especially needed in the present age. For as the world has grown older men have been too apt to imagine a right and wrong apart from consequences; while a few, on the other hand, have sought to resolve them wholly into their consequences. But Socrates, or Plato for him, neither divides nor identifies them; though the time has not yet arrived either for utilitarian or transcendental systems of moral philosophy, he recognizes the two elements which seem to lie at the basis of morality. (Compare the following: 'Now, and for us, it is a time to Hellenize and to praise knowing; for we have Hebraized too much and have overvalued doing. But the habits and discipline received from Hebraism remain for our race an eternal possession. And as humanity is constituted, one must never assign the second rank to-day without being ready to restore them to the first to-morrow.' Sir William W. Hunter, Preface to Orissa.)

Fourth Thesis: —

To be and not to seem is the end of life.

The Greek in the age of Plato admitted praise to be one of the chief incentives to moral virtue, and to most men the opinion of their fellows is a leading principle of action. Hence a certain element of seeming enters into all things; all or almost all desire to appear better than they are, that they may win the esteem or admiration of others. A man of ability can easily feign the language of piety or virtue; and there is an unconscious as well as a conscious hypocrisy which, according to Socrates, is the worst of the two. Again, there is the sophistry of classes and professions. There are the different opinions

about themselves and one another which prevail in different ranks of society. There is the bias given to the mind by the study of one department of human knowledge to the exclusion of the rest; and stronger far the prejudice engendered by a pecuniary or party interest in certain tenets. There is the sophistry of law, the sophistry of medicine, the sophistry of politics, the sophistry of theology. All of these disguises wear the appearance of the truth; some of them are very ancient, and we do not easily disengage ourselves from them; for we have inherited them, and they have become a part of us. The sophistry of an ancient Greek sophist is nothing compared with the sophistry of a religious order, or of a church in which during many ages falsehood has been accumulating, and everything has been said on one side, and nothing on the other. The conventions and customs which we observe in conversation, and the opposition of our interests when we have dealings with one another ('the buyer saith, it is nought — it is nought,' etc.), are always obscuring our sense of truth and right. The sophistry of human nature is far more subtle than the deceit of any one man. Few persons speak freely from their own natures, and scarcely any one dares to think for himself: most of us imperceptibly fall into the opinions of those around us, which we partly help to make. A man who would shake himself loose from them, requires great force of mind; he hardly knows where to begin in the search after truth. On every side he is met by the world, which is not an abstraction of theologians, but the most real of all things, being another name for ourselves when regarded collectively and subjected to the influences of society.

Then comes Socrates, impressed as no other man ever was, with the unreality and untruthfulness of popular opinion, and tells mankind that they must be and not seem. How are they to be? At any rate they must have the spirit and desire to be. If they are ignorant, they must acknowledge their ignorance to themselves; if they are conscious of doing evil, they must learn to do well; if they are weak, and have nothing in them which they can call themselves, they must acquire firmness and consistency; if they are indifferent, they must begin to take an interest in the great questions which surround them. They must try to be what they would fain appear in the eyes of their fellow-men. A single individual cannot easily change public opinion; but he can be true and innocent, simple and independent; he can know what he does, and what he does not know; and though not without an effort, he can form a judgment of his own, at least in common matters. In his most secret actions he can show the same high principle (compare Republic) which he shows when supported and watched by public opinion. And on some fitting occasion, on some question of humanity or truth or right, even an ordinary man, from the natural rectitude of his disposition, may be found to take up arms against a whole tribe of politicians and lawyers, and be too much for them.

Who is the true and who the false statesman? —

The true statesman is he who brings order out of disorder; who first organizes and then administers the government of his own country; and having made a nation, seeks to reconcile the national interests with those of Europe and of mankind. He is not a mere theorist, nor yet a dealer in expedients; the whole and the parts grow together in his mind; while the head is conceiving, the hand is executing. Although obliged to descend to the world, he is not of the world. His thoughts are fixed not on power or riches or extension of territory, but on an ideal state, in which all the citizens have an equal chance of health and life, and the highest education is within the reach of all, and the moral and intellectual qualities of every individual are freely developed, and ‘the idea of good’ is the animating principle of the whole. Not the attainment of freedom alone, or of order alone, but how to unite freedom with order is the

problem which he has to solve.

The statesman who places before himself these lofty aims has undertaken a task which will call forth all his powers. He must control himself before he can control others; he must know mankind before he can manage them. He has no private likes or dislikes; he does not conceal personal enmity under the disguise of moral or political principle: such meannesses, into which men too often fall unintentionally, are absorbed in the consciousness of his mission, and in his love for his country and for mankind. He will sometimes ask himself what the next generation will say of him; not because he is careful of posthumous fame, but because he knows that the result of his life as a whole will then be more fairly judged. He will take time for the execution of his plans; not hurrying them on when the mind of a nation is unprepared for them; but like the Ruler of the Universe Himself, working in the appointed time, for he knows that human life, 'if not long in comparison with eternity' (Republic), is sufficient for the fulfilment of many great purposes. He knows, too, that the work will be still going on when he is no longer here; and he will sometimes, especially when his powers are failing, think of that other 'city of which the pattern is in heaven' (Republic).

The false politician is the serving-man of the state. In order to govern men he becomes like them; their 'minds are married in conjunction;' they 'bear themselves' like vulgar and tyrannical masters, and he is their obedient servant. The true politician, if he would rule men, must make them like himself; he must 'educate his party' until they cease to be a party; he must breathe into them the spirit which will hereafter give form to their institutions. Politics with him are not a mechanism for seeming what he is not, or for carrying out the will of the majority. Himself a representative man, he is the representative not of the lower but of the higher elements of the nation. There is a better (as well as a worse) public opinion of which he seeks to lay hold; as there is also a deeper current of human affairs in which he is borne up when the waves nearer the shore are threatening him. He acknowledges that he cannot take the world by force — two or three moves on the political chess board are all that he can fore see — two or three weeks moves on the political chessboard are all that he can foresee — two or three weeks or

months are granted to him in which he can provide against a coming struggle. But he knows also that there are permanent principles of politics which are always tending to the well-being of states — better administration, better education, the reconciliation of conflicting elements, increased security against external enemies. These are not ‘of to-day or yesterday,’ but are the same in all times, and under all forms of government. Then when the storm descends and the winds blow, though he knows not beforehand the hour of danger, the pilot, not like Plato’s captain in the Republic, half-blind and deaf, but with penetrating eye and quick ear, is ready to take command of the ship and guide her into port.

The false politician asks not what is true, but what is the opinion of the world — not what is right, but what is expedient. The only measures of which he approves are the measures which will pass. He has no intention of fighting an uphill battle; he keeps the roadway of politics. He is unwilling to incur the persecution and enmity which political convictions would entail upon him. He begins with popularity, and in fair weather sails gallantly along. But unpopularity soon follows him. For men expect their leaders to be better and wiser than themselves: to be their guides in danger, their saviours in extremity; they do not really desire them to obey all the ignorant impulses of the popular mind; and if they fail them in a crisis they are disappointed. Then, as Socrates says, the cry of ingratitude is heard, which is most unreasonable; for the people, who have been taught no better, have done what might be expected of them, and their statesmen have received justice at their hands.

The true statesman is aware that he must adapt himself to times and circumstances. He must have allies if he is to fight against the world; he must enlighten public opinion; he must accustom his followers to act together. Although he is not the mere executor of the will of the majority, he must win over the majority to himself. He is their leader and not their follower, but in order to lead he must also follow. He will neither exaggerate nor undervalue the power of a statesman, neither adopting the ‘laissez faire’ nor the ‘paternal government’ principle; but he will, whether he is dealing with children in politics, or with full-grown men, seek to do for the people what the government can do for them, and what, from imperfect

education or deficient powers of combination, they cannot do for themselves. He knows that if he does too much for them they will do nothing; and that if he does nothing for them they will in some states of society be utterly helpless. For the many cannot exist without the few, if the material force of a country is from below, wisdom and experience are from above. It is not a small part of human evils which kings and governments make or cure. The statesman is well aware that a great purpose carried out consistently during many years will at last be executed. He is playing for a stake which may be partly determined by some accident, and therefore he will allow largely for the unknown element of politics. But the game being one in which chance and skill are combined, if he plays long enough he is certain of victory. He will not be always consistent, for the world is changing; and though he depends upon the support of a party, he will remember that he is the minister of the whole. He lives not for the present, but for the future, and he is not at all sure that he will be appreciated either now or then. For he may have the existing order of society against him, and may not be remembered by a distant posterity.

There are always discontented idealists in politics who, like Socrates in the *Gorgias*, find fault with all statesmen past as well as present, not excepting the greatest names of history. Mankind have an uneasy feeling that they ought to be better governed than they are. Just as the actual philosopher falls short of the one wise man, so does the actual statesman fall short of the ideal. And so partly from vanity and egotism, but partly also from a true sense of the faults of eminent men, a temper of dissatisfaction and criticism springs up among those who are ready enough to acknowledge the inferiority of their own powers. No matter whether a statesman makes high professions or none at all — they are reduced sooner or later to the same level. And sometimes the more unscrupulous man is better esteemed than the more conscientious, because he has not equally deceived expectations. Such sentiments may be unjust, but they are widely spread; we constantly find them recurring in reviews and newspapers, and still oftener in private conversation.

We may further observe that the art of government, while in some respects tending to improve, has in others a tendency to degenerate,

as institutions become more popular. Governing for the people cannot easily be combined with governing by the people: the interests of classes are too strong for the ideas of the statesman who takes a comprehensive view of the whole. According to Socrates the true governor will find ruin or death staring him in the face, and will only be induced to govern from the fear of being governed by a worse man than himself (Republic). And in modern times, though the world has grown milder, and the terrible consequences which Plato foretells no longer await an English statesman, any one who is not actuated by a blind ambition will only undertake from a sense of duty a work in which he is most likely to fail; and even if he succeed, will rarely be rewarded by the gratitude of his own generation.

Socrates, who is not a politician at all, tells us that he is the only real politician of his time. Let us illustrate the meaning of his words by applying them to the history of our own country. He would have said that not Pitt or Fox, or Canning or Sir R. Peel, are the real politicians of their time, but Locke, Hume, Adam Smith, Bentham, Ricardo. These during the greater part of their lives occupied an inconsiderable space in the eyes of the public. They were private persons; nevertheless they sowed in the minds of men seeds which in the next generation have become an irresistible power. 'Herein is that saying true, One soweth and another reapeth.' We may imagine with Plato an ideal statesman in whom practice and speculation are perfectly harmonized; for there is no necessary opposition between them. But experience shows that they are commonly divorced — the ordinary politician is the interpreter or executor of the thoughts of others, and hardly ever brings to the birth a new political conception. One or two only in modern times, like the Italian statesman Cavour, have created the world in which they moved. The philosopher is naturally unfitted for political life; his great ideas are not understood by the many; he is a thousand miles away from the questions of the day. Yet perhaps the lives of thinkers, as they are stiller and deeper, are also happier than the lives of those who are more in the public eye. They have the promise of the future, though they are regarded as dreamers and visionaries by their own contemporaries. And when they are no longer here, those who would have been ashamed of them during their lives claim kindred with them, and are proud to be

called by their names. (Compare Thucyd.)

Who is the true poet?

Plato expels the poets from his Republic because they are allied to sense; because they stimulate the emotions; because they are thrice removed from the ideal truth. And in a similar spirit he declares in the Gorgias that the stately muse of tragedy is a votary of pleasure and not of truth. In modern times we almost ridicule the idea of poetry admitting of a moral. The poet and the prophet, or preacher, in primitive antiquity are one and the same; but in later ages they seem to fall apart. The great art of novel writing, that peculiar creation of our own and the last century, which, together with the sister art of review writing, threatens to absorb all literature, has even less of seriousness in her composition. Do we not often hear the novel writer censured for attempting to convey a lesson to the minds of his readers?

Yet the true office of a poet or writer of fiction is not merely to give amusement, or to be the expression of the feelings of mankind, good or bad, or even to increase our knowledge of human nature. There have been poets in modern times, such as Goethe or Wordsworth, who have not forgotten their high vocation of teachers; and the two greatest of the Greek dramatists owe their sublimity to their ethical character. The noblest truths, sung of in the purest and sweetest language, are still the proper material of poetry. The poet clothes them with beauty, and has a power of making them enter into the hearts and memories of men. He has not only to speak of themes above the level of ordinary life, but to speak of them in a deeper and tenderer way than they are ordinarily felt, so as to awaken the feeling of them in others. The old he makes young again; the familiar principle he invests with a new dignity; he finds a noble expression for the common-places of morality and politics. He uses the things of sense so as to indicate what is beyond; he raises us through earth to heaven. He expresses what the better part of us would fain say, and the half-conscious feeling is strengthened by the expression. He is his own critic, for the spirit of poetry and of criticism are not divided in him. His mission is not to disguise men from themselves, but to reveal to them their own nature, and make them better acquainted with the world around them. True poetry is the remembrance of

youth, of love, the embodiment in words of the happiest and holiest moments of life, of the noblest thoughts of man, of the greatest deeds of the past. The poet of the future may return to his greater calling of the prophet or teacher; indeed, we hardly know what may not be effected for the human race by a better use of the poetical and imaginative faculty. The reconciliation of poetry, as of religion, with truth, may still be possible. Neither is the element of pleasure to be excluded. For when we substitute a higher pleasure for a lower we raise men in the scale of existence. Might not the novelist, too, make an ideal, or rather many ideals of social life, better than a thousand sermons? Plato, like the Puritans, is too much afraid of poetic and artistic influences. But he is not without a true sense of the noble purposes to which art may be applied (Republic).

Modern poetry is often a sort of plaything, or, in Plato's language, a flattery, a sophistry, or sham, in which, without any serious purpose, the poet lends wings to his fancy and exhibits his gifts of language and metre. Such an one seeks to gratify the taste of his readers; he has the 'savoir faire,' or trick of writing, but he has not the higher spirit of poetry. He has no conception that true art should bring order out of disorder; that it should make provision for the soul's highest interest; that it should be pursued only with a view to 'the improvement of the citizens.' He ministers to the weaker side of human nature (Republic); he idealizes the sensual; he sings the strain of love in the latest fashion; instead of raising men above themselves he brings them back to the 'tyranny of the many masters,' from which all his life long a good man has been praying to be delivered. And often, forgetful of measure and order, he will express not that which is truest, but that which is strongest. Instead of a great and nobly-executed subject, perfect in every part, some fancy of a heated brain is worked out with the strangest incongruity. He is not the master of his words, but his words — perhaps borrowed from another — the faded reflection of some French or German or Italian writer, have the better of him. Though we are not going to banish the poets, how can we suppose that such utterances have any healing or life-giving influence on the minds of men?

'Let us hear the conclusion of the whole matter:' Art then must be true, and politics must be true, and the life of man must be true and

not a seeming or sham. In all of them order has to be brought out of disorder, truth out of error and falsehood. This is what we mean by the greatest improvement of man. And so, having considered in what way 'we can best spend the appointed time, we leave the result with God.' Plato does not say that God will order all things for the best (compare *Phaedo*), but he indirectly implies that the evils of this life will be corrected in another. And as we are very far from the best imaginable world at present, Plato here, as in the *Phaedo* and *Republic*, supposes a purgatory or place of education for mankind in general, and for a very few a Tartarus or hell. The myth which terminates the dialogue is not the revelation, but rather, like all similar descriptions, whether in the Bible or Plato, the veil of another life. For no visible thing can reveal the invisible. Of this Plato, unlike some commentators on Scripture, is fully aware. Neither will he dogmatize about the manner in which we are 'born again' (*Republic*). Only he is prepared to maintain the ultimate triumph of truth and right, and declares that no one, not even the wisest of the Greeks, can affirm any other doctrine without being ridiculous.

There is a further paradox of ethics, in which pleasure and pain are held to be indifferent, and virtue at the time of action and without regard to consequences is happiness. From this elevation or exaggeration of feeling Plato seems to shrink: he leaves it to the Stoics in a later generation to maintain that when impaled or on the rack the philosopher may be happy (compare *Republic*). It is observable that in the *Republic* he raises this question, but it is not really discussed; the veil of the ideal state, the shadow of another life, are allowed to descend upon it and it passes out of sight. The martyr or sufferer in the cause of right or truth is often supposed to die in raptures, having his eye fixed on a city which is in heaven. But if there were no future, might he not still be happy in the performance of an action which was attended only by a painful death? He himself may be ready to thank God that he was thought worthy to do Him the least service, without looking for a reward; the joys of another life may not have been present to his mind at all. Do we suppose that the mediaeval saint, St. Bernard, St. Francis, St. Catharine of Sienna, or the Catholic priest who lately devoted himself to death by a lingering disease that he might solace and help

others, was thinking of the 'sweets' of heaven? No; the work was already heaven to him and enough. Much less will the dying patriot be dreaming of the praises of man or of an immortality of fame: the sense of duty, of right, and trust in God will be sufficient, and as far as the mind can reach, in that hour. If he were certain that there were no life to come, he would not have wished to speak or act otherwise than he did in the cause of truth or of humanity. Neither, on the other hand, will he suppose that God has forsaken him or that the future is to be a mere blank to him. The greatest act of faith, the only faith which cannot pass away, is his who has not known, but yet has believed. A very few among the sons of men have made themselves independent of circumstances, past, present, or to come. He who has attained to such a temper of mind has already present with him eternal life; he needs no arguments to convince him of immortality; he has in him already a principle stronger than death. He who serves man without the thought of reward is deemed to be a more faithful servant than he who works for hire. May not the service of God, which is the more disinterested, be in like manner the higher? And although only a very few in the course of the world's history — Christ himself being one of them — have attained to such a noble conception of God and of the human soul, yet the ideal of them may be present to us, and the remembrance of them be an example to us, and their lives may shed a light on many dark places both of philosophy and theology.

THE MYTHS OF PLATO.

The myths of Plato are a phenomenon unique in literature. There are four longer ones: these occur in the *Phaedrus*, *Phaedo*, *Gorgias*, and *Republic*. That in the *Republic* is the most elaborate and finished of them. Three of these greater myths, namely those contained in the *Phaedo*, the *Gorgias* and the *Republic*, relate to the destiny of human souls in a future life. The magnificent myth in the *Phaedrus* treats of the immortality, or rather the eternity of the soul, in which is included a former as well as a future state of existence. To these may be added, (1) the myth, or rather fable, occurring in the *Statesman*, in which the life of innocence is contrasted with the ordinary life of man and the consciousness of evil: (2) the legend of the Island of Atlantis, an imaginary history, which is a fragment only, commenced

in the *Timaeus* and continued in the *Critias*: (3) the much less artistic fiction of the foundation of the Cretan colony which is introduced in the preface to the *Laws*, but soon falls into the background: (4) the beautiful but rather artificial tale of Prometheus and Epimetheus narrated in his rhetorical manner by Protagoras in the dialogue called after him: (5) the speech at the beginning of the *Phaedrus*, which is a parody of the orator Lysias; the rival speech of Socrates and the recantation of it. To these may be added (6) the tale of the grasshoppers, and (7) the tale of Thamus and of Theuth, both in the *Phaedrus*: (8) the parable of the Cave (*Republic*), in which the previous argument is recapitulated, and the nature and degrees of knowledge having been previously set forth in the abstract are represented in a picture: (9) the fiction of the earth-born men (*Republic*; compare *Laws*), in which by the adaptation of an old tradition Plato makes a new beginning for his society: (10) the myth of Aristophanes respecting the division of the sexes, *Sym.*: (11) the parable of the noble captain, the pilot, and the mutinous sailors (*Republic*), in which is represented the relation of the better part of the world, and of the philosopher, to the mob of politicians: (12) the ironical tale of the pilot who plies between Athens and Aegina charging only a small payment for saving men from death, the reason being that he is uncertain whether to live or die is better for them (*Gor.*): (13) the treatment of freemen and citizens by physicians and of slaves by their apprentices, — a somewhat laboured figure of speech intended to illustrate the two different ways in which the laws speak to men (*Laws*). There also occur in Plato continuous images; some of them extend over several pages, appearing and reappearing at intervals: such as the bees stinging and stingless (paupers and thieves) in the Eighth Book of the *Republic*, who are generated in the transition from timocracy to oligarchy: the sun, which is to the visible world what the idea of good is to the intellectual, in the Sixth Book of the *Republic*: the composite animal, having the form of a man, but containing under a human skin a lion and a many-headed monster (*Republic*): the great beast, i.e. the populace: and the wild beast within us, meaning the passions which are always liable to break out: the animated comparisons of the degradation of philosophy by the arts to the dishonoured maiden, and of the tyrant to

the parricide, who 'beats his father, having first taken away his arms': the dog, who is your only philosopher: the grotesque and rather paltry image of the argument wandering about without a head (Laws), which is repeated, not improved, from the Gorgias: the argument personified as veiling her face (Republic), as engaged in a chase, as breaking upon us in a first, second and third wave: — on these figures of speech the changes are rung many times over. It is observable that nearly all these parables or continuous images are found in the Republic; that which occurs in the Theaetetus, of the midwifery of Socrates, is perhaps the only exception. To make the list complete, the mathematical figure of the number of the state (Republic), or the numerical interval which separates king from tyrant, should not be forgotten.

The myth in the Gorgias is one of those descriptions of another life which, like the Sixth Aeneid of Virgil, appear to contain reminiscences of the mysteries. It is a vision of the rewards and punishments which await good and bad men after death. It supposes the body to continue and to be in another world what it has become in this. It includes a Paradiso, Purgatorio, and Inferno, like the sister myths of the Phaedo and the Republic. The Inferno is reserved for great criminals only. The argument of the dialogue is frequently referred to, and the meaning breaks through so as rather to destroy the liveliness and consistency of the picture. The structure of the fiction is very slight, the chief point or moral being that in the judgments of another world there is no possibility of concealment: Zeus has taken from men the power of foreseeing death, and brings together the souls both of them and their judges naked and undisguised at the judgment-seat. Both are exposed to view, stripped of the veils and clothes which might prevent them from seeing into or being seen by one another.

The myth of the Phaedo is of the same type, but it is more cosmological, and also more poetical. The beautiful and ingenious fancy occurs to Plato that the upper atmosphere is an earth and heaven in one, a glorified earth, fairer and purer than that in which we dwell. As the fishes live in the ocean, mankind are living in a lower sphere, out of which they put their heads for a moment or two and behold a world beyond. The earth which we inhabit is a sediment

of the coarser particles which drop from the world above, and is to that heavenly earth what the desert and the shores of the ocean are to us. A part of the myth consists of description of the interior of the earth, which gives the opportunity of introducing several mythological names and of providing places of torment for the wicked. There is no clear distinction of soul and body; the spirits beneath the earth are spoken of as souls only, yet they retain a sort of shadowy form when they cry for mercy on the shores of the lake; and the philosopher alone is said to have got rid of the body. All the three myths in Plato which relate to the world below have a place for repentant sinners, as well as other homes or places for the very good and very bad. It is a natural reflection which is made by Plato elsewhere, that the two extremes of human character are rarely met with, and that the generality of mankind are between them. Hence a place must be found for them. In the myth of the *Phaedo* they are carried down the river Acheron to the Acherusian lake, where they dwell, and are purified of their evil deeds, and receive the rewards of their good. There are also incurable sinners, who are cast into Tartarus, there to remain as the penalty of atrocious crimes; these suffer everlastingly. And there is another class of hardly-curable sinners who are allowed from time to time to approach the shores of the Acherusian lake, where they cry to their victims for mercy; which if they obtain they come out into the lake and cease from their torments.

Neither this, nor any of the three greater myths of Plato, nor perhaps any allegory or parable relating to the unseen world, is consistent with itself. The language of philosophy mingles with that of mythology; abstract ideas are transformed into persons, figures of speech into realities. These myths may be compared with the *Pilgrim's Progress* of Bunyan, in which discussions of theology are mixed up with the incidents of travel, and mythological personages are associated with human beings: they are also garnished with names and phrases taken out of Homer, and with other fragments of Greek tradition.

The myth of the *Republic* is more subtle and also more consistent than either of the two others. It has a greater verisimilitude than they have, and is full of touches which recall the experiences of human

life. It will be noticed by an attentive reader that the twelve days during which Er lay in a trance after he was slain coincide with the time passed by the spirits in their pilgrimage. It is a curious observation, not often made, that good men who have lived in a well-governed city (shall we say in a religious and respectable society?) are more likely to make mistakes in their choice of life than those who have had more experience of the world and of evil. It is a more familiar remark that we constantly blame others when we have only ourselves to blame; and the philosopher must acknowledge, however reluctantly, that there is an element of chance in human life with which it is sometimes impossible for man to cope. That men drink more of the waters of forgetfulness than is good for them is a poetical description of a familiar truth. We have many of us known men who, like Odysseus, have wearied of ambition and have only desired rest. We should like to know what became of the infants 'dying almost as soon as they were born,' but Plato only raises, without satisfying, our curiosity. The two companies of souls, ascending and descending at either chasm of heaven and earth, and conversing when they come out into the meadow, the majestic figures of the judges sitting in heaven, the voice heard by Ardiaeus, are features of the great allegory which have an indescribable grandeur and power. The remark already made respecting the inconsistency of the two other myths must be extended also to this: it is at once an orrery, or model of the heavens, and a picture of the Day of Judgment.

The three myths are unlike anything else in Plato. There is an Oriental, or rather an Egyptian element in them, and they have an affinity to the mysteries and to the Orphic modes of worship. To a certain extent they are un-Greek; at any rate there is hardly anything like them in other Greek writings which have a serious purpose; in spirit they are mediaeval. They are akin to what may be termed the underground religion in all ages and countries. They are presented in the most lively and graphic manner, but they are never insisted on as true; it is only affirmed that nothing better can be said about a future life. Plato seems to make use of them when he has reached the limits of human knowledge; or, to borrow an expression of his own, when he is standing on the outside of the intellectual world. They are very simple in style; a few touches bring the picture home to the mind,

and make it present to us. They have also a kind of authority gained by the employment of sacred and familiar names, just as mere fragments of the words of Scripture, put together in any form and applied to any subject, have a power of their own. They are a substitute for poetry and mythology; and they are also a reform of mythology. The moral of them may be summed up in a word or two: After death the Judgment; and 'there is some better thing remaining for the good than for the evil.'

All literature gathers into itself many elements of the past: for example, the tale of the earth-born men in the Republic appears at first sight to be an extravagant fancy, but it is restored to propriety when we remember that it is based on a legendary belief. The art of making stories of ghosts and apparitions credible is said to consist in the manner of telling them. The effect is gained by many literary and conversational devices, such as the previous raising of curiosity, the mention of little circumstances, simplicity, picturesqueness, the naturalness of the occasion, and the like. This art is possessed by Plato in a degree which has never been equalled.

The myth in the Phaedrus is even greater than the myths which have been already described, but is of a different character. It treats of a former rather than of a future life. It represents the conflict of reason aided by passion or righteous indignation on the one hand, and of the animal lusts and instincts on the other. The soul of man has followed the company of some god, and seen truth in the form of the universal before it was born in this world. Our present life is the result of the struggle which was then carried on. This world is relative to a former world, as it is often projected into a future. We ask the question, Where were men before birth? As we likewise enquire, What will become of them after death? The first question is unfamiliar to us, and therefore seems to be unnatural; but if we survey the whole human race, it has been as influential and as widely spread as the other. In the Phaedrus it is really a figure of speech in which the 'spiritual combat' of this life is represented. The majesty and power of the whole passage — especially of what may be called the theme or proem (beginning 'The mind through all her being is immortal') — can only be rendered very inadequately in another language.

The myth in the *Statesman* relates to a former cycle of existence, in which men were born of the earth, and by the reversal of the earth's motion had their lives reversed and were restored to youth and beauty: the dead came to life, the old grew middle-aged, and the middle-aged young; the youth became a child, the child an infant, the infant vanished into the earth. The connection between the reversal of the earth's motion and the reversal of human life is of course verbal only, yet Plato, like theologians in other ages, argues from the consistency of the tale to its truth. The new order of the world was immediately under the government of God; it was a state of innocence in which men had neither wants nor cares, in which the earth brought forth all things spontaneously, and God was to man what man now is to the animals. There were no great estates, or families, or private possessions, nor any traditions of the past, because men were all born out of the earth. This is what Plato calls the 'reign of Cronos;' and in like manner he connects the reversal of the earth's motion with some legend of which he himself was probably the inventor.

The question is then asked, under which of these two cycles of existence was man the happier, — under that of Cronos, which was a state of innocence, or that of Zeus, which is our ordinary life? For a while Plato balances the two sides of the serious controversy, which he has suggested in a figure. The answer depends on another question: What use did the children of Cronos make of their time? They had boundless leisure and the faculty of discoursing, not only with one another, but with the animals. Did they employ these advantages with a view to philosophy, gathering from every nature some addition to their store of knowledge? or, Did they pass their time in eating and drinking and telling stories to one another and to the beasts? — in either case there would be no difficulty in answering. But then, as Plato rather mischievously adds, 'Nobody knows what they did,' and therefore the doubt must remain undetermined.

To the first there succeeds a second epoch. After another natural convulsion, in which the order of the world and of human life is once more reversed, God withdraws his guiding hand, and man is left to the government of himself. The world begins again, and arts and

laws are slowly and painfully invented. A secular age succeeds to a theocratical. In this fanciful tale Plato has dropped, or almost dropped, the garb of mythology. He suggests several curious and important thoughts, such as the possibility of a state of innocence, the existence of a world without traditions, and the difference between human and divine government. He has also carried a step further his speculations concerning the abolition of the family and of property, which he supposes to have no place among the children of Cronos any more than in the ideal state.

It is characteristic of Plato and of his age to pass from the abstract to the concrete, from poetry to reality. Language is the expression of the seen, and also of the unseen, and moves in a region between them. A great writer knows how to strike both these chords, sometimes remaining within the sphere of the visible, and then again comprehending a wider range and soaring to the abstract and universal. Even in the same sentence he may employ both modes of speech not improperly or inharmoniously. It is useless to criticise the broken metaphors of Plato, if the effect of the whole is to create a picture not such as can be painted on canvas, but which is full of life and meaning to the reader. A poem may be contained in a word or two, which may call up not one but many latent images; or half reveal to us by a sudden flash the thoughts of many hearts. Often the rapid transition from one image to another is pleasing to us: on the other hand, any single figure of speech if too often repeated, or worked out too much at length, becomes prosy and monotonous. In theology and philosophy we necessarily include both 'the moral law within and the starry heaven above,' and pass from one to the other (compare for examples Psalms xviii. and xix.). Whether such a use of language is puerile or noble depends upon the genius of the writer or speaker, and the familiarity of the associations employed.

In the myths and parables of Plato the ease and grace of conversation is not forgotten: they are spoken, not written words, stories which are told to a living audience, and so well told that we are more than half-inclined to believe them (compare Phaedrus). As in conversation too, the striking image or figure of speech is not forgotten, but is quickly caught up, and alluded to again and again; as it would still be in our own day in a genial and sympathetic society.

The descriptions of Plato have a greater life and reality than is to be found in any modern writing. This is due to their homeliness and simplicity. Plato can do with words just as he pleases; to him they are indeed 'more plastic than wax' (Republic). We are in the habit of opposing speech and writing, poetry and prose. But he has discovered a use of language in which they are united; which gives a fitting expression to the highest truths; and in which the trifles of courtesy and the familiarities of daily life are not overlooked.

GORGIAS

PERSONS OF THE DIALOGUE:

Callicles, Socrates, Chaerephon, Gorgias, Polus.

SCENE: The house of Callicles.

CALLICLES: The wise man, as the proverb says, is late for a fray, but not for a feast.

SOCRATES: And are we late for a feast?

CALLICLES: Yes, and a delightful feast; for Gorgias has just been exhibiting to us many fine things.

SOCRATES: It is not my fault, Callicles; our friend Chaerephon is to blame; for he would keep us loitering in the Agora.

CHAEREPHON: Never mind, Socrates; the misfortune of which I have been the cause I will also repair; for Gorgias is a friend of mine, and I will make him give the exhibition again either now, or, if you prefer, at some other time.

CALLICLES: What is the matter, Chaerephon — does Socrates want to hear Gorgias?

CHAEREPHON: Yes, that was our intention in coming.

CALLICLES: Come into my house, then; for Gorgias is staying with me, and he shall exhibit to you.

SOCRATES: Very good, Callicles; but will he answer our questions? for I want to hear from him what is the nature of his art, and what it is which he professes and teaches; he may, as you (Chaerephon) suggest, defer the exhibition to some other time.

CALLICLES: There is nothing like asking him, Socrates; and indeed to answer questions is a part of his exhibition, for he was saying only just now, that any one in my house might put any question to him,

and that he would answer.

SOCRATES: How fortunate! will you ask him, Chaerephon — ?

CHAEREPHON: What shall I ask him?

SOCRATES: Ask him who he is.

CHAEREPHON: What do you mean?

SOCRATES: I mean such a question as would elicit from him, if he had been a maker of shoes, the answer that he is a cobbler. Do you understand?

CHAEREPHON: I understand, and will ask him: Tell me, Gorgias, is our friend Callicles right in saying that you undertake to answer any questions which you are asked?

GORGIAS: Quite right, Chaerephon: I was saying as much only just now; and I may add, that many years have elapsed since any one has asked me a new one.

CHAEREPHON: Then you must be very ready, Gorgias.

GORGIAS: Of that, Chaerephon, you can make trial.

POLUS: Yes, indeed, and if you like, Chaerephon, you may make trial of me too, for I think that Gorgias, who has been talking a long time, is tired.

CHAEREPHON: And do you, Polus, think that you can answer better than Gorgias?

POLUS: What does that matter if I answer well enough for you?

CHAEREPHON: Not at all: — and you shall answer if you like.

POLUS: Ask: —

CHAEREPHON: My question is this: If Gorgias had the skill of his brother Herodicus, what ought we to call him? Ought he not to have the name which is given to his brother?

POLUS: Certainly.

CHAEREPHON: Then we should be right in calling him a physician?

POLUS: Yes.

CHAEREPHON: And if he had the skill of Aristophon the son of Aglaophon, or of his brother Polygnotus, what ought we to call him?

POLUS: Clearly, a painter.

CHAEREPHON: But now what shall we call him — what is the art in which he is skilled.

POLUS: O Chaerephon, there are many arts among mankind which are experimental, and have their origin in experience, for experience makes the days of men to proceed according to art, and inexperience according to chance, and different persons in different ways are proficient in different arts, and the best persons in the best arts. And our friend Gorgias is one of the best, and the art in which he is a proficient is the noblest.

SOCRATES: Polus has been taught how to make a capital speech, Gorgias; but he is not fulfilling the promise which he made to Chaerephon.

GORGIAS: What do you mean, Socrates?

SOCRATES: I mean that he has not exactly answered the question which he was asked.

GORGIAS: Then why not ask him yourself?

SOCRATES: But I would much rather ask you, if you are disposed to answer: for I see, from the few words which Polus has uttered, that he has attended more to the art which is called rhetoric than to dialectic.

POLUS: What makes you say so, Socrates?

SOCRATES: Because, Polus, when Chaerephon asked you what was the art which Gorgias knows, you praised it as if you were answering some one who found fault with it, but you never said what the art was.

POLUS: Why, did I not say that it was the noblest of arts?

SOCRATES: Yes, indeed, but that was no answer to the question: nobody asked what was the quality, but what was the nature, of the art, and by what name we were to describe Gorgias. And I would still beg you briefly and clearly, as you answered Chaerephon when he asked you at first, to say what this art is, and what we ought to call Gorgias: Or rather, Gorgias, let me turn to you, and ask the same question, — what are we to call you, and what is the art which you profess?

GORGIAS: Rhetoric, Socrates, is my art.

SOCRATES: Then I am to call you a rhetorician?

GORGIAS: Yes, Socrates, and a good one too, if you would call me that which, in Homeric language, ‘I boast myself to be.’

SOCRATES: I should wish to do so.

GORGIAS: Then pray do.

SOCRATES: And are we to say that you are able to make other men rhetoricians?

GORGIAS: Yes, that is exactly what I profess to make them, not only at Athens, but in all places.

SOCRATES: And will you continue to ask and answer questions, Gorgias, as we are at present doing, and reserve for another occasion the longer mode of speech which Polus was attempting? Will you keep your promise, and answer shortly the questions which are asked of you?

GORGIAS: Some answers, Socrates, are of necessity longer; but I will do my best to make them as short as possible; for a part of my

profession is that I can be as short as any one.

SOCRATES: That is what is wanted, Gorgias; exhibit the shorter method now, and the longer one at some other time.

GORGIAS: Well, I will; and you will certainly say, that you never heard a man use fewer words.

SOCRATES: Very good then; as you profess to be a rhetorician, and a maker of rhetoricians, let me ask you, with what is rhetoric concerned: I might ask with what is weaving concerned, and you would reply (would you not?), with the making of garments?

GORGIAS: Yes.

SOCRATES: And music is concerned with the composition of melodies?

GORGIAS: It is.

SOCRATES: By Here, Gorgias, I admire the surpassing brevity of your answers.

GORGIAS: Yes, Socrates, I do think myself good at that.

SOCRATES: I am glad to hear it; answer me in like manner about rhetoric: with what is rhetoric concerned?

GORGIAS: With discourse.

SOCRATES: What sort of discourse, Gorgias? — such discourse as would teach the sick under what treatment they might get well?

GORGIAS: No.

SOCRATES: Then rhetoric does not treat of all kinds of discourse?

GORGIAS: Certainly not.

SOCRATES: And yet rhetoric makes men able to speak?

GORGIAS: Yes.

SOCRATES: And to understand that about which they speak?

GORGIAS: Of course.

SOCRATES: But does not the art of medicine, which we were just now mentioning, also make men able to understand and speak about the sick?

GORGIAS: Certainly.

SOCRATES: Then medicine also treats of discourse?

GORGIAS: Yes.

SOCRATES: Of discourse concerning diseases?

GORGIAS: Just so.

SOCRATES: And does not gymnastic also treat of discourse concerning the good or evil condition of the body?

GORGIAS: Very true.

SOCRATES: And the same, Gorgias, is true of the other arts: — all of them treat of discourse concerning the subjects with which they severally have to do.

GORGIAS: Clearly.

SOCRATES: Then why, if you call rhetoric the art which treats of discourse, and all the other arts treat of discourse, do you not call them arts of rhetoric?

GORGIAS: Because, Socrates, the knowledge of the other arts has only to do with some sort of external action, as of the hand; but there is no such action of the hand in rhetoric which works and takes effect only through the medium of discourse. And therefore I am justified in saying that rhetoric treats of discourse.

SOCRATES: I am not sure whether I entirely understand you, but I dare say I shall soon know better; please to answer me a question: — you would allow that there are arts?

GORGIAS: Yes.

SOCRATES: As to the arts generally, they are for the most part concerned with doing, and require little or no speaking; in painting, and statuary, and many other arts, the work may proceed in silence; and of such arts I suppose you would say that they do not come within the province of rhetoric.

GORGIAS: You perfectly conceive my meaning, Socrates.

SOCRATES: But there are other arts which work wholly through the medium of language, and require either no action or very little, as, for example, the arts of arithmetic, of calculation, of geometry, and of playing draughts; in some of these speech is pretty nearly co-extensive with action, but in most of them the verbal element is greater — they depend wholly on words for their efficacy and power: and I take your meaning to be that rhetoric is an art of this latter sort?

GORGIAS: Exactly.

SOCRATES: And yet I do not believe that you really mean to call any of these arts rhetoric; although the precise expression which you used was, that rhetoric is an art which works and takes effect only through the medium of discourse; and an adversary who wished to be captious might say, ‘And so, Gorgias, you call arithmetic rhetoric.’ But I do not think that you really call arithmetic rhetoric any more than geometry would be so called by you.

GORGIAS: You are quite right, Socrates, in your apprehension of my meaning.

SOCRATES: Well, then, let me now have the rest of my answer: — seeing that rhetoric is one of those arts which works mainly by the use of words, and there are other arts which also use words, tell me what is that quality in words with which rhetoric is concerned: — Suppose that a person asks me about some of the arts which I was mentioning just now; he might say, ‘Socrates, what is arithmetic?’ and I should reply to him, as you replied to me, that arithmetic is one of those arts which take effect through words. And then he would

proceed to ask: ‘Words about what?’ and I should reply, Words about odd and even numbers, and how many there are of each. And if he asked again: ‘What is the art of calculation?’ I should say, That also is one of the arts which is concerned wholly with words. And if he further said, ‘Concerned with what?’ I should say, like the clerks in the assembly, ‘as aforesaid’ of arithmetic, but with a difference, the difference being that the art of calculation considers not only the quantities of odd and even numbers, but also their numerical relations to themselves and to one another. And suppose, again, I were to say that astronomy is only words — he would ask, ‘Words about what, Socrates?’ and I should answer, that astronomy tells us about the motions of the stars and sun and moon, and their relative swiftness.

GORGIAS: You would be quite right, Socrates.

SOCRATES: And now let us have from you, Gorgias, the truth about rhetoric: which you would admit (would you not?) to be one of those arts which act always and fulfil all their ends through the medium of words?

GORGIAS: True.

SOCRATES: Words which do what? I should ask. To what class of things do the words which rhetoric uses relate?

GORGIAS: To the greatest, Socrates, and the best of human things.

SOCRATES: That again, Gorgias is ambiguous; I am still in the dark: for which are the greatest and best of human things? I dare say that you have heard men singing at feasts the old drinking song, in which the singers enumerate the goods of life, first health, beauty next, thirdly, as the writer of the song says, wealth honestly obtained.

GORGIAS: Yes, I know the song; but what is your drift?

SOCRATES: I mean to say, that the producers of those things which the author of the song praises, that is to say, the physician, the trainer, the money-maker, will at once come to you, and first the physician will say: ‘O Socrates, Gorgias is deceiving you, for my art is

concerned with the greatest good of men and not his.’ And when I ask, Who are you? he will reply, ‘I am a physician.’ What do you mean? I shall say. Do you mean that your art produces the greatest good? ‘Certainly,’ he will answer, ‘for is not health the greatest good? What greater good can men have, Socrates?’ And after him the trainer will come and say, ‘I too, Socrates, shall be greatly surprised if Gorgias can show more good of his art than I can show of mine.’ To him again I shall say, Who are you, honest friend, and what is your business? ‘I am a trainer,’ he will reply, ‘and my business is to make men beautiful and strong in body.’ When I have done with the trainer, there arrives the money-maker, and he, as I expect, will utterly despise them all. ‘Consider Socrates,’ he will say, ‘whether Gorgias or any one else can produce any greater good than wealth.’ Well, you and I say to him, and are you a creator of wealth? ‘Yes,’ he replies. And who are you? ‘A money-maker.’ And do you consider wealth to be the greatest good of man? ‘Of course,’ will be his reply. And we shall rejoin: Yes; but our friend Gorgias contends that his art produces a greater good than yours. And then he will be sure to go on and ask, ‘What good? Let Gorgias answer.’ Now I want you, Gorgias, to imagine that this question is asked of you by them and by me; What is that which, as you say, is the greatest good of man, and of which you are the creator? Answer us.

GORGIAS: That good, Socrates, which is truly the greatest, being that which gives to men freedom in their own persons, and to individuals the power of ruling over others in their several states.

SOCRATES: And what would you consider this to be?

GORGIAS: What is there greater than the word which persuades the judges in the courts, or the senators in the council, or the citizens in the assembly, or at any other political meeting? — if you have the power of uttering this word, you will have the physician your slave, and the trainer your slave, and the money-maker of whom you talk will be found to gather treasures, not for himself, but for you who are able to speak and to persuade the multitude.

SOCRATES: Now I think, Gorgias, that you have very accurately

explained what you conceive to be the art of rhetoric; and you mean to say, if I am not mistaken, that rhetoric is the artificer of persuasion, having this and no other business, and that this is her crown and end. Do you know any other effect of rhetoric over and above that of producing persuasion?

GORGIAS: No: the definition seems to me very fair, Socrates; for persuasion is the chief end of rhetoric.

SOCRATES: Then hear me, Gorgias, for I am quite sure that if there ever was a man who entered on the discussion of a matter from a pure love of knowing the truth, I am such a one, and I should say the same of you.

GORGIAS: What is coming, Socrates?

SOCRATES: I will tell you: I am very well aware that I do not know what, according to you, is the exact nature, or what are the topics of that persuasion of which you speak, and which is given by rhetoric; although I have a suspicion about both the one and the other. And I am going to ask — what is this power of persuasion which is given by rhetoric, and about what? But why, if I have a suspicion, do I ask instead of telling you? Not for your sake, but in order that the argument may proceed in such a manner as is most likely to set forth the truth. And I would have you observe, that I am right in asking this further question: If I asked, ‘What sort of a painter is Zeuxis?’ and you said, ‘The painter of figures,’ should I not be right in asking, ‘What kind of figures, and where do you find them?’

GORGIAS: Certainly.

SOCRATES: And the reason for asking this second question would be, that there are other painters besides, who paint many other figures?

GORGIAS: True.

SOCRATES: But if there had been no one but Zeuxis who painted them, then you would have answered very well?

GORGIAS: Quite so.

SOCRATES: Now I want to know about rhetoric in the same way; — is rhetoric the only art which brings persuasion, or do other arts have the same effect? I mean to say — Does he who teaches anything persuade men of that which he teaches or not?

GORGIAS: He persuades, Socrates, — there can be no mistake about that.

SOCRATES: Again, if we take the arts of which we were just now speaking: — do not arithmetic and the arithmeticians teach us the properties of number?

GORGIAS: Certainly.

SOCRATES: And therefore persuade us of them?

GORGIAS: Yes.

SOCRATES: Then arithmetic as well as rhetoric is an artificer of persuasion?

GORGIAS: Clearly.

SOCRATES: And if any one asks us what sort of persuasion, and about what, — we shall answer, persuasion which teaches the quantity of odd and even; and we shall be able to show that all the other arts of which we were just now speaking are artificers of persuasion, and of what sort, and about what.

GORGIAS: Very true.

SOCRATES: Then rhetoric is not the only artificer of persuasion?

GORGIAS: True.

SOCRATES: Seeing, then, that not only rhetoric works by persuasion, but that other arts do the same, as in the case of the painter, a question has arisen which is a very fair one: Of what persuasion is rhetoric the artificer, and about what? — is not that a

fair way of putting the question?

GORGIAS: I think so.

SOCRATES: Then, if you approve the question, Gorgias, what is the answer?

GORGIAS: I answer, Socrates, that rhetoric is the art of persuasion in courts of law and other assemblies, as I was just now saying, and about the just and unjust.

SOCRATES: And that, Gorgias, was what I was suspecting to be your notion; yet I would not have you wonder if by-and-by I am found repeating a seemingly plain question; for I ask not in order to confute you, but as I was saying that the argument may proceed consecutively, and that we may not get the habit of anticipating and suspecting the meaning of one another's words; I would have you develop your own views in your own way, whatever may be your hypothesis.

GORGIAS: I think that you are quite right, Socrates.

SOCRATES: Then let me raise another question; there is such a thing as 'having learned'?

GORGIAS: Yes.

SOCRATES: And there is also 'having believed'?

GORGIAS: Yes.

SOCRATES: And is the 'having learned' the same as 'having believed,' and are learning and belief the same things?

GORGIAS: In my judgment, Socrates, they are not the same.

SOCRATES: And your judgment is right, as you may ascertain in this way: — If a person were to say to you, 'Is there, Gorgias, a false belief as well as a true?' — you would reply, if I am not mistaken, that there is.

GORGIAS: Yes.

SOCRATES: Well, but is there a false knowledge as well as a true?

GORGIAS: No.

SOCRATES: No, indeed; and this again proves that knowledge and belief differ.

GORGIAS: Very true.

SOCRATES: And yet those who have learned as well as those who have believed are persuaded?

GORGIAS: Just so.

SOCRATES: Shall we then assume two sorts of persuasion, — one which is the source of belief without knowledge, as the other is of knowledge?

GORGIAS: By all means.

SOCRATES: And which sort of persuasion does rhetoric create in courts of law and other assemblies about the just and unjust, the sort of persuasion which gives belief without knowledge, or that which gives knowledge?

GORGIAS: Clearly, Socrates, that which only gives belief.

SOCRATES: Then rhetoric, as would appear, is the artificer of a persuasion which creates belief about the just and unjust, but gives no instruction about them?

GORGIAS: True.

SOCRATES: And the rhetorician does not instruct the courts of law or other assemblies about things just and unjust, but he creates belief about them; for no one can be supposed to instruct such a vast multitude about such high matters in a short time?

GORGIAS: Certainly not.

SOCRATES: Come, then, and let us see what we really mean about rhetoric; for I do not know what my own meaning is as yet. When the assembly meets to elect a physician or a shipwright or any other craftsman, will the rhetorician be taken into counsel? Surely not. For at every election he ought to be chosen who is most skilled; and, again, when walls have to be built or harbours or docks to be constructed, not the rhetorician but the master workman will advise; or when generals have to be chosen and an order of battle arranged, or a position taken, then the military will advise and not the rhetoricians: what do you say, Gorgias? Since you profess to be a rhetorician and a maker of rhetoricians, I cannot do better than learn the nature of your art from you. And here let me assure you that I have your interest in view as well as my own. For likely enough some one or other of the young men present might desire to become your pupil, and in fact I see some, and a good many too, who have this wish, but they would be too modest to question you. And therefore when you are interrogated by me, I would have you imagine that you are interrogated by them. ‘What is the use of coming to you, Gorgias?’ they will say— ‘about what will you teach us to advise the state? — about the just and unjust only, or about those other things also which Socrates has just mentioned?’ How will you answer them?

GORGIAS: I like your way of leading us on, Socrates, and I will endeavour to reveal to you the whole nature of rhetoric. You must have heard, I think, that the docks and the walls of the Athenians and the plan of the harbour were devised in accordance with the counsels, partly of Themistocles, and partly of Pericles, and not at the suggestion of the builders.

SOCRATES: Such is the tradition, Gorgias, about Themistocles; and I myself heard the speech of Pericles when he advised us about the middle wall.

GORGIAS: And you will observe, Socrates, that when a decision has to be given in such matters the rhetoricians are the advisers; they are the men who win their point.

SOCRATES: I had that in my admiring mind, Gorgias, when I asked what is the nature of rhetoric, which always appears to me, when I look at the matter in this way, to be a marvel of greatness.

GORGAS: A marvel, indeed, Socrates, if you only knew how rhetoric comprehends and holds under her sway all the inferior arts. Let me offer you a striking example of this. On several occasions I have been with my brother Herodicus or some other physician to see one of his patients, who would not allow the physician to give him medicine, or apply the knife or hot iron to him; and I have persuaded him to do for me what he would not do for the physician just by the use of rhetoric. And I say that if a rhetorician and a physician were to go to any city, and had there to argue in the Ecclesia or any other assembly as to which of them should be elected state-physician, the physician would have no chance; but he who could speak would be chosen if he wished; and in a contest with a man of any other profession the rhetorician more than any one would have the power of getting himself chosen, for he can speak more persuasively to the multitude than any of them, and on any subject. Such is the nature and power of the art of rhetoric! And yet, Socrates, rhetoric should be used like any other competitive art, not against everybody, — the rhetorician ought not to abuse his strength any more than a pugilist or pancratiast or other master of fence; — because he has powers which are more than a match either for friend or enemy, he ought not therefore to strike, stab, or slay his friends. Suppose a man to have been trained in the palestra and to be a skilful boxer, — he in the fulness of his strength goes and strikes his father or mother or one of his familiars or friends; but that is no reason why the trainers or fencing-masters should be held in detestation or banished from the city; — surely not. For they taught their art for a good purpose, to be used against enemies and evil-doers, in self-defence not in aggression, and others have perverted their instructions, and turned to a bad use their own strength and skill. But not on this account are the teachers bad, neither is the art in fault, or bad in itself; I should rather say that those who make a bad use of the art are to blame. And the same argument holds good of rhetoric; for the rhetorician can speak against all men and upon any subject, — in short, he can persuade

the multitude better than any other man of anything which he pleases, but he should not therefore seek to defraud the physician or any other artist of his reputation merely because he has the power; he ought to use rhetoric fairly, as he would also use his athletic powers. And if after having become a rhetorician he makes a bad use of his strength and skill, his instructor surely ought not on that account to be held in detestation or banished. For he was intended by his teacher to make a good use of his instructions, but he abuses them. And therefore he is the person who ought to be held in detestation, banished, and put to death, and not his instructor.

SOCRATES: You, Gorgias, like myself, have had great experience of disputations, and you must have observed, I think, that they do not always terminate in mutual edification, or in the definition by either party of the subjects which they are discussing; but disagreements are apt to arise — somebody says that another has not spoken truly or clearly; and then they get into a passion and begin to quarrel, both parties conceiving that their opponents are arguing from personal feeling only and jealousy of themselves, not from any interest in the question at issue. And sometimes they will go on abusing one another until the company at last are quite vexed at themselves for ever listening to such fellows. Why do I say this? Why, because I cannot help feeling that you are now saying what is not quite consistent or accordant with what you were saying at first about rhetoric. And I am afraid to point this out to you, lest you should think that I have some animosity against you, and that I speak, not for the sake of discovering the truth, but from jealousy of you. Now if you are one of my sort, I should like to cross-examine you, but if not I will let you alone. And what is my sort? you will ask. I am one of those who are very willing to be refuted if I say anything which is not true, and very willing to refute any one else who says what is not true, and quite as ready to be refuted as to refute; for I hold that this is the greater gain of the two, just as the gain is greater of being cured of a very great evil than of curing another. For I imagine that there is no evil which a man can endure so great as an erroneous opinion about the matters of which we are speaking; and if you claim to be one of my sort, let us have the discussion out, but if you would

rather have done, no matter; — let us make an end of it.

GORGIAS: I should say, Socrates, that I am quite the man whom you indicate; but, perhaps, we ought to consider the audience, for, before you came, I had already given a long exhibition, and if we proceed the argument may run on to a great length. And therefore I think that we should consider whether we may not be detaining some part of the company when they are wanting to do something else.

CHAEREPHON: You hear the audience cheering, Gorgias and Socrates, which shows their desire to listen to you; and for myself, Heaven forbid that I should have any business on hand which would take me away from a discussion so interesting and so ably maintained.

CALLICLES: By the gods, Chaerephon, although I have been present at many discussions, I doubt whether I was ever so much delighted before, and therefore if you go on discoursing all day I shall be the better pleased.

SOCRATES: I may truly say, Callicles, that I am willing, if Gorgias is.

GORGIAS: After all this, Socrates, I should be disgraced if I refused, especially as I have promised to answer all comers; in accordance with the wishes of the company, then, do you begin, and ask of me any question which you like.

SOCRATES: Let me tell you then, Gorgias, what surprises me in your words; though I dare say that you may be right, and I may have misunderstood your meaning. You say that you can make any man, who will learn of you, a rhetorician?

GORGIAS: Yes.

SOCRATES: Do you mean that you will teach him to gain the ears of the multitude on any subject, and this not by instruction but by persuasion?

GORGIAS: Quite so.

SOCRATES: You were saying, in fact, that the rhetorician will have greater powers of persuasion than the physician even in a matter of health?

GORGIAS: Yes, with the multitude, — that is.

SOCRATES: You mean to say, with the ignorant; for with those who know he cannot be supposed to have greater powers of persuasion.

GORGIAS: Very true.

SOCRATES: But if he is to have more power of persuasion than the physician, he will have greater power than he who knows?

GORGIAS: Certainly.

SOCRATES: Although he is not a physician: — is he?

GORGIAS: No.

SOCRATES: And he who is not a physician must, obviously, be ignorant of what the physician knows.

GORGIAS: Clearly.

SOCRATES: Then, when the rhetorician is more persuasive than the physician, the ignorant is more persuasive with the ignorant than he who has knowledge? — is not that the inference?

GORGIAS: In the case supposed: — yes.

SOCRATES: And the same holds of the relation of rhetoric to all the other arts; the rhetorician need not know the truth about things; he has only to discover some way of persuading the ignorant that he has more knowledge than those who know?

GORGIAS: Yes, Socrates, and is not this a great comfort? — not to have learned the other arts, but the art of rhetoric only, and yet to be in no way inferior to the professors of them?

SOCRATES: Whether the rhetorician is or not inferior on this account is a question which we will hereafter examine if the enquiry

is likely to be of any service to us; but I would rather begin by asking, whether he is or is not as ignorant of the just and unjust, base and honourable, good and evil, as he is of medicine and the other arts; I mean to say, does he really know anything of what is good and evil, base or honourable, just or unjust in them; or has he only a way with the ignorant of persuading them that he not knowing is to be esteemed to know more about these things than some one else who knows? Or must the pupil know these things and come to you knowing them before he can acquire the art of rhetoric? If he is ignorant, you who are the teacher of rhetoric will not teach him — it is not your business; but you will make him seem to the multitude to know them, when he does not know them; and seem to be a good man, when he is not. Or will you be unable to teach him rhetoric at all, unless he knows the truth of these things first? What is to be said about all this? By heavens, Gorgias, I wish that you would reveal to me the power of rhetoric, as you were saying that you would.

GORGIAS: Well, Socrates, I suppose that if the pupil does chance not to know them, he will have to learn of me these things as well.

SOCRATES: Say no more, for there you are right; and so he whom you make a rhetorician must either know the nature of the just and unjust already, or he must be taught by you.

GORGIAS: Certainly.

SOCRATES: Well, and is not he who has learned carpentering a carpenter?

GORGIAS: Yes.

SOCRATES: And he who has learned music a musician?

GORGIAS: Yes.

SOCRATES: And he who has learned medicine is a physician, in like manner? He who has learned anything whatever is that which his knowledge makes him.

GORGIAS: Certainly.

SOCRATES: And in the same way, he who has learned what is just is just?

GORGIAS: To be sure.

SOCRATES: And he who is just may be supposed to do what is just?

GORGIAS: Yes.

SOCRATES: And must not the just man always desire to do what is just?

GORGIAS: That is clearly the inference.

SOCRATES: Surely, then, the just man will never consent to do injustice?

GORGIAS: Certainly not.

SOCRATES: And according to the argument the rhetorician must be a just man?

GORGIAS: Yes.

SOCRATES: And will therefore never be willing to do injustice?

GORGIAS: Clearly not.

SOCRATES: But do you remember saying just now that the trainer is not to be accused or banished if the pugilist makes a wrong use of his pugilistic art; and in like manner, if the rhetorician makes a bad and unjust use of his rhetoric, that is not to be laid to the charge of his teacher, who is not to be banished, but the wrong-doer himself who made a bad use of his rhetoric — he is to be banished — was not that said?

GORGIAS: Yes, it was.

SOCRATES: But now we are affirming that the aforesaid rhetorician will never have done injustice at all?

GORGIAS: True.

SOCRATES: And at the very outset, Gorgias, it was said that rhetoric treated of discourse, not (like arithmetic) about odd and even, but about just and unjust? Was not this said?

GORGIAS: Yes.

SOCRATES: I was thinking at the time, when I heard you saying so, that rhetoric, which is always discoursing about justice, could not possibly be an unjust thing. But when you added, shortly afterwards, that the rhetorician might make a bad use of rhetoric I noted with surprise the inconsistency into which you had fallen; and I said, that if you thought, as I did, that there was a gain in being refuted, there would be an advantage in going on with the question, but if not, I would leave off. And in the course of our investigations, as you will see yourself, the rhetorician has been acknowledged to be incapable of making an unjust use of rhetoric, or of willingness to do injustice. By the dog, Gorgias, there will be a great deal of discussion, before we get at the truth of all this.

POLUS: And do even you, Socrates, seriously believe what you are now saying about rhetoric? What! because Gorgias was ashamed to deny that the rhetorician knew the just and the honourable and the good, and admitted that to any one who came to him ignorant of them he could teach them, and then out of this admission there arose a contradiction — the thing which you dearly love, and to which not he, but you, brought the argument by your captious questions — (do you seriously believe that there is any truth in all this?) For will any one ever acknowledge that he does not know, or cannot teach, the nature of justice? The truth is, that there is great want of manners in bringing the argument to such a pass.

SOCRATES: Illustrious Polus, the reason why we provide ourselves with friends and children is, that when we get old and stumble, a younger generation may be at hand to set us on our legs again in our words and in our actions: and now, if I and Gorgias are stumbling, here are you who should raise us up; and I for my part engage to retract any error into which you may think that I have fallen-upon one condition:

POLUS: What condition?

SOCRATES: That you contract, Polus, the prolixity of speech in which you indulged at first.

POLUS: What! do you mean that I may not use as many words as I please?

SOCRATES: Only to think, my friend, that having come on a visit to Athens, which is the most free-spoken state in Hellas, you when you got there, and you alone, should be deprived of the power of speech — that would be hard indeed. But then consider my case: — shall not I be very hardly used, if, when you are making a long oration, and refusing to answer what you are asked, I am compelled to stay and listen to you, and may not go away? I say rather, if you have a real interest in the argument, or, to repeat my former expression, have any desire to set it on its legs, take back any statement which you please; and in your turn ask and answer, like myself and Gorgias — refute and be refuted: for I suppose that you would claim to know what Gorgias knows — would you not?

POLUS: Yes.

SOCRATES: And you, like him, invite any one to ask you about anything which he pleases, and you will know how to answer him?

POLUS: To be sure.

SOCRATES: And now, which will you do, ask or answer?

POLUS: I will ask; and do you answer me, Socrates, the same question which Gorgias, as you suppose, is unable to answer: What is rhetoric?

SOCRATES: Do you mean what sort of an art?

POLUS: Yes.

SOCRATES: To say the truth, Polus, it is not an art at all, in my opinion.

POLUS: Then what, in your opinion, is rhetoric?

SOCRATES: A thing which, as I was lately reading in a book of yours, you say that you have made an art.

POLUS: What thing?

SOCRATES: I should say a sort of experience.

POLUS: Does rhetoric seem to you to be an experience?

SOCRATES: That is my view, but you may be of another mind.

POLUS: An experience in what?

SOCRATES: An experience in producing a sort of delight and gratification.

POLUS: And if able to gratify others, must not rhetoric be a fine thing?

SOCRATES: What are you saying, Polus? Why do you ask me whether rhetoric is a fine thing or not, when I have not as yet told you what rhetoric is?

POLUS: Did I not hear you say that rhetoric was a sort of experience?

SOCRATES: Will you, who are so desirous to gratify others, afford a slight gratification to me?

POLUS: I will.

SOCRATES: Will you ask me, what sort of an art is cookery?

POLUS: What sort of an art is cookery?

SOCRATES: Not an art at all, Polus.

POLUS: What then?

SOCRATES: I should say an experience.

POLUS: In what? I wish that you would explain to me.

SOCRATES: An experience in producing a sort of delight and gratification, Polus.

POLUS: Then are cookery and rhetoric the same?

SOCRATES: No, they are only different parts of the same profession.

POLUS: Of what profession?

SOCRATES: I am afraid that the truth may seem discourteous; and I hesitate to answer, lest Gorgias should imagine that I am making fun of his own profession. For whether or no this is that art of rhetoric which Gorgias practises I really cannot tell: — from what he was just now saying, nothing appeared of what he thought of his art, but the rhetoric which I mean is a part of a not very creditable whole.

GORGIAS: A part of what, Socrates? Say what you mean, and never mind me.

SOCRATES: In my opinion then, Gorgias, the whole of which rhetoric is a part is not an art at all, but the habit of a bold and ready wit, which knows how to manage mankind: this habit I sum up under the word ‘flattery’; and it appears to me to have many other parts, one of which is cookery, which may seem to be an art, but, as I maintain, is only an experience or routine and not an art: — another part is rhetoric, and the art of attiring and sophistry are two others: thus there are four branches, and four different things answering to them. And Polus may ask, if he likes, for he has not as yet been informed, what part of flattery is rhetoric: he did not see that I had not yet answered him when he proceeded to ask a further question: Whether I do not think rhetoric a fine thing? But I shall not tell him whether rhetoric is a fine thing or not, until I have first answered, ‘What is rhetoric?’ For that would not be right, Polus; but I shall be happy to answer, if you will ask me, What part of flattery is rhetoric?

POLUS: I will ask and do you answer? What part of flattery is rhetoric?

SOCRATES: Will you understand my answer? Rhetoric, according to my view, is the ghost or counterfeit of a part of politics.

POLUS: And noble or ignoble?

SOCRATES: Ignoble, I should say, if I am compelled to answer, for I call what is bad ignoble: though I doubt whether you understand what I was saying before.

GORGIAS: Indeed, Socrates, I cannot say that I understand myself.

SOCRATES: I do not wonder, Gorgias; for I have not as yet explained myself, and our friend Polus, colt by name and colt by nature, is apt to run away. (This is an untranslatable play on the name 'Polus,' which means 'a colt.')

GORGIAS: Never mind him, but explain to me what you mean by saying that rhetoric is the counterfeit of a part of politics.

SOCRATES: I will try, then, to explain my notion of rhetoric, and if I am mistaken, my friend Polus shall refute me. We may assume the existence of bodies and of souls?

GORGIAS: Of course.

SOCRATES: You would further admit that there is a good condition of either of them?

GORGIAS: Yes.

SOCRATES: Which condition may not be really good, but good only in appearance? I mean to say, that there are many persons who appear to be in good health, and whom only a physician or trainer will discern at first sight not to be in good health.

GORGIAS: True.

SOCRATES: And this applies not only to the body, but also to the soul: in either there may be that which gives the appearance of health and not the reality?

GORGIAS: Yes, certainly.

SOCRATES: And now I will endeavour to explain to you more clearly what I mean: The soul and body being two, have two arts corresponding to them: there is the art of politics attending on the soul; and another art attending on the body, of which I know no single name, but which may be described as having two divisions, one of them gymnastic, and the other medicine. And in politics there is a legislative part, which answers to gymnastic, as justice does to medicine; and the two parts run into one another, justice having to do with the same subject as legislation, and medicine with the same subject as gymnastic, but with a difference. Now, seeing that there are these four arts, two attending on the body and two on the soul for their highest good; flattery knowing, or rather guessing their natures, has distributed herself into four shams or simulations of them; she puts on the likeness of some one or other of them, and pretends to be that which she simulates, and having no regard for men's highest interests, is ever making pleasure the bait of the unwary, and deceiving them into the belief that she is of the highest value to them. Cookery simulates the disguise of medicine, and pretends to know what food is the best for the body; and if the physician and the cook had to enter into a competition in which children were the judges, or men who had no more sense than children, as to which of them best understands the goodness or badness of food, the physician would be starved to death. A flattery I deem this to be and of an ignoble sort, Polus, for to you I am now addressing myself, because it aims at pleasure without any thought of the best. An art I do not call it, but only an experience, because it is unable to explain or to give a reason of the nature of its own applications. And I do not call any irrational thing an art; but if you dispute my words, I am prepared to argue in defence of them.

Cookery, then, I maintain to be a flattery which takes the form of medicine; and tiring, in like manner, is a flattery which takes the form of gymnastic, and is knavish, false, ignoble, illiberal, working deceitfully by the help of lines, and colours, and enamels, and garments, and making men affect a spurious beauty to the neglect of

the true beauty which is given by gymnastic.

I would rather not be tedious, and therefore I will only say, after the manner of the geometricians (for I think that by this time you will be able to follow)

as tiring: gymnastic:: cookery: medicine;

or rather,

as tiring: gymnastic:: sophistry: legislation;

and

as cookery: medicine:: rhetoric: justice.

And this, I say, is the natural difference between the rhetorician and the sophist, but by reason of their near connection, they are apt to be jumbled up together; neither do they know what to make of themselves, nor do other men know what to make of them. For if the body presided over itself, and were not under the guidance of the soul, and the soul did not discern and discriminate between cookery and medicine, but the body was made the judge of them, and the rule of judgment was the bodily delight which was given by them, then the word of Anaxagoras, that word with which you, friend Polus, are so well acquainted, would prevail far and wide: 'Chaos' would come again, and cookery, health, and medicine would mingle in an indiscriminate mass. And now I have told you my notion of rhetoric, which is, in relation to the soul, what cookery is to the body. I may have been inconsistent in making a long speech, when I would not allow you to discourse at length. But I think that I may be excused, because you did not understand me, and could make no use of my answer when I spoke shortly, and therefore I had to enter into an explanation. And if I show an equal inability to make use of yours, I hope that you will speak at equal length; but if I am able to understand you, let me have the benefit of your brevity, as is only fair: And now you may do what you please with my answer.

POLUS: What do you mean? do you think that rhetoric is flattery?

SOCRATES: Nay, I said a part of flattery; if at your age, Polus, you cannot remember, what will you do by-and-by, when you get older?

POLUS: And are the good rhetoricians meanly regarded in states, under the idea that they are flatterers?

SOCRATES: Is that a question or the beginning of a speech?

POLUS: I am asking a question.

SOCRATES: Then my answer is, that they are not regarded at all.

POLUS: How not regarded? Have they not very great power in states?

SOCRATES: Not if you mean to say that power is a good to the possessor.

POLUS: And that is what I do mean to say.

SOCRATES: Then, if so, I think that they have the least power of all the citizens.

POLUS: What! are they not like tyrants? They kill and despoil and exile any one whom they please.

SOCRATES: By the dog, Polus, I cannot make out at each deliverance of yours, whether you are giving an opinion of your own, or asking a question of me.

POLUS: I am asking a question of you.

SOCRATES: Yes, my friend, but you ask two questions at once.

POLUS: How two questions?

SOCRATES: Why, did you not say just now that the rhetoricians are like tyrants, and that they kill and despoil or exile any one whom they please?

POLUS: I did.

SOCRATES: Well then, I say to you that here are two questions in

one, and I will answer both of them. And I tell you, Polus, that rhetoricians and tyrants have the least possible power in states, as I was just now saying; for they do literally nothing which they will, but only what they think best.

POLUS: And is not that a great power?

SOCRATES: Polus has already said the reverse.

POLUS: Said the reverse! nay, that is what I assert.

SOCRATES: No, by the great — what do you call him? — not you, for you say that power is a good to him who has the power.

POLUS: I do.

SOCRATES: And would you maintain that if a fool does what he thinks best, this is a good, and would you call this great power?

POLUS: I should not.

SOCRATES: Then you must prove that the rhetorician is not a fool, and that rhetoric is an art and not a flattery — and so you will have refuted me; but if you leave me unrefuted, why, the rhetoricians who do what they think best in states, and the tyrants, will have nothing upon which to congratulate themselves, if as you say, power be indeed a good, admitting at the same time that what is done without sense is an evil.

POLUS: Yes; I admit that.

SOCRATES: How then can the rhetoricians or the tyrants have great power in states, unless Polus can refute Socrates, and prove to him that they do as they will?

POLUS: This fellow —

SOCRATES: I say that they do not do as they will; — now refute me.

POLUS: Why, have you not already said that they do as they think

best?

SOCRATES: And I say so still.

POLUS: Then surely they do as they will?

SOCRATES: I deny it.

POLUS: But they do what they think best?

SOCRATES: Aye.

POLUS: That, Socrates, is monstrous and absurd.

SOCRATES: Good words, good Polus, as I may say in your own peculiar style; but if you have any questions to ask of me, either prove that I am in error or give the answer yourself.

POLUS: Very well, I am willing to answer that I may know what you mean.

SOCRATES: Do men appear to you to will that which they do, or to will that further end for the sake of which they do a thing? when they take medicine, for example, at the bidding of a physician, do they will the drinking of the medicine which is painful, or the health for the sake of which they drink?

POLUS: Clearly, the health.

SOCRATES: And when men go on a voyage or engage in business, they do not will that which they are doing at the time; for who would desire to take the risk of a voyage or the trouble of business? — But they will, to have the wealth for the sake of which they go on a voyage.

POLUS: Certainly.

SOCRATES: And is not this universally true? If a man does something for the sake of something else, he wills not that which he does, but that for the sake of which he does it.

POLUS: Yes.

SOCRATES: And are not all things either good or evil, or intermediate and indifferent?

POLUS: To be sure, Socrates.

SOCRATES: Wisdom and health and wealth and the like you would call goods, and their opposites evils?

POLUS: I should.

SOCRATES: And the things which are neither good nor evil, and which partake sometimes of the nature of good and at other times of evil, or of neither, are such as sitting, walking, running, sailing; or, again, wood, stones, and the like: — these are the things which you call neither good nor evil?

POLUS: Exactly so.

SOCRATES: Are these indifferent things done for the sake of the good, or the good for the sake of the indifferent?

POLUS: Clearly, the indifferent for the sake of the good.

SOCRATES: When we walk we walk for the sake of the good, and under the idea that it is better to walk, and when we stand we stand equally for the sake of the good?

POLUS: Yes.

SOCRATES: And when we kill a man we kill him or exile him or despoil him of his goods, because, as we think, it will conduce to our good?

POLUS: Certainly.

SOCRATES: Men who do any of these things do them for the sake of the good?

POLUS: Yes.

SOCRATES: And did we not admit that in doing something for the sake of something else, we do not will those things which we do, but

that other thing for the sake of which we do them?

POLUS: Most true.

SOCRATES: Then we do not will simply to kill a man or to exile him or to despoil him of his goods, but we will to do that which conduces to our good, and if the act is not conducive to our good we do not will it; for we will, as you say, that which is our good, but that which is neither good nor evil, or simply evil, we do not will. Why are you silent, Polus? Am I not right?

POLUS: You are right.

SOCRATES: Hence we may infer, that if any one, whether he be a tyrant or a rhetorician, kills another or exiles another or deprives him of his property, under the idea that the act is for his own interests when really not for his own interests, he may be said to do what seems best to him?

POLUS: Yes.

SOCRATES: But does he do what he wills if he does what is evil? Why do you not answer?

POLUS: Well, I suppose not.

SOCRATES: Then if great power is a good as you allow, will such a one have great power in a state?

POLUS: He will not.

SOCRATES: Then I was right in saying that a man may do what seems good to him in a state, and not have great power, and not do what he wills?

POLUS: As though you, Socrates, would not like to have the power of doing what seemed good to you in the state, rather than not; you would not be jealous when you saw any one killing or despoiling or imprisoning whom he pleased, Oh, no!

SOCRATES: Justly or unjustly, do you mean?

POLUS: In either case is he not equally to be envied?

SOCRATES: Forbear, Polus!

POLUS: Why 'forbear'?

SOCRATES: Because you ought not to envy wretches who are not to be envied, but only to pity them.

POLUS: And are those of whom I spoke wretches?

SOCRATES: Yes, certainly they are.

POLUS: And so you think that he who slays any one whom he pleases, and justly slays him, is pitiable and wretched?

SOCRATES: No, I do not say that of him: but neither do I think that he is to be envied.

POLUS: Were you not saying just now that he is wretched?

SOCRATES: Yes, my friend, if he killed another unjustly, in which case he is also to be pitied; and he is not to be envied if he killed him justly.

POLUS: At any rate you will allow that he who is unjustly put to death is wretched, and to be pitied?

SOCRATES: Not so much, Polus, as he who kills him, and not so much as he who is justly killed.

POLUS: How can that be, Socrates?

SOCRATES: That may very well be, inasmuch as doing injustice is the greatest of evils.

POLUS: But is it the greatest? Is not suffering injustice a greater evil?

SOCRATES: Certainly not.

POLUS: Then would you rather suffer than do injustice?

SOCRATES: I should not like either, but if I must choose between them, I would rather suffer than do.

POLUS: Then you would not wish to be a tyrant?

SOCRATES: Not if you mean by tyranny what I mean.

POLUS: I mean, as I said before, the power of doing whatever seems good to you in a state, killing, banishing, doing in all things as you like.

SOCRATES: Well then, illustrious friend, when I have said my say, do you reply to me. Suppose that I go into a crowded Agora, and take a dagger under my arm. Polus, I say to you, I have just acquired rare power, and become a tyrant; for if I think that any of these men whom you see ought to be put to death, the man whom I have a mind to kill is as good as dead; and if I am disposed to break his head or tear his garment, he will have his head broken or his garment torn in an instant. Such is my great power in this city. And if you do not believe me, and I show you the dagger, you would probably reply: Socrates, in that sort of way any one may have great power — he may burn any house which he pleases, and the docks and triremes of the Athenians, and all their other vessels, whether public or private — but can you believe that this mere doing as you think best is great power?

POLUS: Certainly not such doing as this.

SOCRATES: But can you tell me why you disapprove of such a power?

POLUS: I can.

SOCRATES: Why then?

POLUS: Why, because he who did as you say would be certain to be punished.

SOCRATES: And punishment is an evil?

POLUS: Certainly.

SOCRATES: And you would admit once more, my good sir, that great power is a benefit to a man if his actions turn out to his advantage, and that this is the meaning of great power; and if not, then his power is an evil and is no power. But let us look at the matter in another way: — do we not acknowledge that the things of which we were speaking, the infliction of death, and exile, and the deprivation of property are sometimes a good and sometimes not a good?

POLUS: Certainly.

SOCRATES: About that you and I may be supposed to agree?

POLUS: Yes.

SOCRATES: Tell me, then, when do you say that they are good and when that they are evil — what principle do you lay down?

POLUS: I would rather, Socrates, that you should answer as well as ask that question.

SOCRATES: Well, Polus, since you would rather have the answer from me, I say that they are good when they are just, and evil when they are unjust.

POLUS: You are hard of refutation, Socrates, but might not a child refute that statement?

SOCRATES: Then I shall be very grateful to the child, and equally grateful to you if you will refute me and deliver me from my foolishness. And I hope that refute me you will, and not weary of doing good to a friend.

POLUS: Yes, Socrates, and I need not go far or appeal to antiquity; events which happened only a few days ago are enough to refute you, and to prove that many men who do wrong are happy.

SOCRATES: What events?

POLUS: You see, I presume, that Archelaus the son of Perdiccas is now the ruler of Macedonia?

SOCRATES: At any rate I hear that he is.

POLUS: And do you think that he is happy or miserable?

SOCRATES: I cannot say, Polus, for I have never had any acquaintance with him.

POLUS: And cannot you tell at once, and without having an acquaintance with him, whether a man is happy?

SOCRATES: Most certainly not.

POLUS: Then clearly, Socrates, you would say that you did not even know whether the great king was a happy man?

SOCRATES: And I should speak the truth; for I do not know how he stands in the matter of education and justice.

POLUS: What! and does all happiness consist in this?

SOCRATES: Yes, indeed, Polus, that is my doctrine; the men and women who are gentle and good are also happy, as I maintain, and the unjust and evil are miserable.

POLUS: Then, according to your doctrine, the said Archelaus is miserable?

SOCRATES: Yes, my friend, if he is wicked.

POLUS: That he is wicked I cannot deny; for he had no title at all to the throne which he now occupies, he being only the son of a woman who was the slave of Alcetas the brother of Perdiccas; he himself therefore in strict right was the slave of Alcetas; and if he had meant to do rightly he would have remained his slave, and then, according to your doctrine, he would have been happy. But now he is unspeakably miserable, for he has been guilty of the greatest crimes: in the first place he invited his uncle and master, Alcetas, to come to him, under the pretence that he would restore to him the throne which Perdiccas has usurped, and after entertaining him and his son Alexander, who was his own cousin, and nearly of an age with him, and making them drunk, he threw them into a waggon and carried

them off by night, and slew them, and got both of them out of the way; and when he had done all this wickedness he never discovered that he was the most miserable of all men, and was very far from repenting: shall I tell you how he showed his remorse? he had a younger brother, a child of seven years old, who was the legitimate son of Perdiccas, and to him of right the kingdom belonged; Archelaus, however, had no mind to bring him up as he ought and restore the kingdom to him; that was not his notion of happiness; but not long afterwards he threw him into a well and drowned him, and declared to his mother Cleopatra that he had fallen in while running after a goose, and had been killed. And now as he is the greatest criminal of all the Macedonians, he may be supposed to be the most miserable and not the happiest of them, and I dare say that there are many Athenians, and you would be at the head of them, who would rather be any other Macedonian than Archelaus!

SOCRATES: I praised you at first, Polus, for being a rhetorician rather than a reasoner. And this, as I suppose, is the sort of argument with which you fancy that a child might refute me, and by which I stand refuted when I say that the unjust man is not happy. But, my good friend, where is the refutation? I cannot admit a word which you have been saying.

POLUS: That is because you will not; for you surely must think as I do.

SOCRATES: Not so, my simple friend, but because you will refute me after the manner which rhetoricians practise in courts of law. For there the one party think that they refute the other when they bring forward a number of witnesses of good repute in proof of their allegations, and their adversary has only a single one or none at all. But this kind of proof is of no value where truth is the aim; a man may often be sworn down by a multitude of false witnesses who have a great air of respectability. And in this argument nearly every one, Athenian and stranger alike, would be on your side, if you should bring witnesses in disproof of my statement; — you may, if you will, summon Nicias the son of Niceratus, and let his brothers, who gave the row of tripods which stand in the precincts of Dionysus, come

with him; or you may summon Aristocrates, the son of Scellius, who is the giver of that famous offering which is at Delphi; summon, if you will, the whole house of Pericles, or any other great Athenian family whom you choose; — they will all agree with you: I only am left alone and cannot agree, for you do not convince me; although you produce many false witnesses against me, in the hope of depriving me of my inheritance, which is the truth. But I consider that nothing worth speaking of will have been effected by me unless I make you the one witness of my words; nor by you, unless you make me the one witness of yours; no matter about the rest of the world. For there are two ways of refutation, one which is yours and that of the world in general; but mine is of another sort — let us compare them, and see in what they differ. For, indeed, we are at issue about matters which to know is honourable and not to know disgraceful; to know or not to know happiness and misery — that is the chief of them. And what knowledge can be nobler? or what ignorance more disgraceful than this? And therefore I will begin by asking you whether you do not think that a man who is unjust and doing injustice can be happy, seeing that you think Archelaus unjust, and yet happy? May I assume this to be your opinion?

POLUS: Certainly.

SOCRATES: But I say that this is an impossibility — here is one point about which we are at issue: — very good. And do you mean to say also that if he meets with retribution and punishment he will still be happy?

POLUS: Certainly not; in that case he will be most miserable.

SOCRATES: On the other hand, if the unjust be not punished, then, according to you, he will be happy?

POLUS: Yes.

SOCRATES: But in my opinion, Polus, the unjust or doer of unjust actions is miserable in any case, — more miserable, however, if he be not punished and does not meet with retribution, and less miserable if he be punished and meets with retribution at the hands

of gods and men.

POLUS: You are maintaining a strange doctrine, Socrates.

SOCRATES: I shall try to make you agree with me, O my friend, for as a friend I regard you. Then these are the points at issue between us — are they not? I was saying that to do is worse than to suffer injustice?

POLUS: Exactly so.

SOCRATES: And you said the opposite?

POLUS: Yes.

SOCRATES: I said also that the wicked are miserable, and you refuted me?

POLUS: By Zeus, I did.

SOCRATES: In your own opinion, Polus.

POLUS: Yes, and I rather suspect that I was in the right.

SOCRATES: You further said that the wrong-doer is happy if he be unpunished?

POLUS: Certainly.

SOCRATES: And I affirm that he is most miserable, and that those who are punished are less miserable — are you going to refute this proposition also?

POLUS: A proposition which is harder of refutation than the other, Socrates.

SOCRATES: Say rather, Polus, impossible; for who can refute the truth?

POLUS: What do you mean? If a man is detected in an unjust attempt to make himself a tyrant, and when detected is racked, mutilated, has his eyes burned out, and after having had all sorts of

great injuries inflicted on him, and having seen his wife and children suffer the like, is at last impaled or tarred and burned alive, will he be happier than if he escape and become a tyrant, and continue all through life doing what he likes and holding the reins of government, the envy and admiration both of citizens and strangers? Is that the paradox which, as you say, cannot be refuted?

SOCRATES: There again, noble Polus, you are raising hobgoblins instead of refuting me; just now you were calling witnesses against me. But please to refresh my memory a little; did you say— ‘in an unjust attempt to make himself a tyrant’?

POLUS: Yes, I did.

SOCRATES: Then I say that neither of them will be happier than the other, — neither he who unjustly acquires a tyranny, nor he who suffers in the attempt, for of two miserables one cannot be the happier, but that he who escapes and becomes a tyrant is the more miserable of the two. Do you laugh, Polus? Well, this is a new kind of refutation, — when any one says anything, instead of refuting him to laugh at him.

POLUS: But do you not think, Socrates, that you have been sufficiently refuted, when you say that which no human being will allow? Ask the company.

SOCRATES: O Polus, I am not a public man, and only last year, when my tribe were serving as Prytanes, and it became my duty as their president to take the votes, there was a laugh at me, because I was unable to take them. And as I failed then, you must not ask me to count the suffrages of the company now; but if, as I was saying, you have no better argument than numbers, let me have a turn, and do you make trial of the sort of proof which, as I think, is required; for I shall produce one witness only of the truth of my words, and he is the person with whom I am arguing; his suffrage I know how to take; but with the many I have nothing to do, and do not even address myself to them. May I ask then whether you will answer in turn and have your words put to the proof? For I certainly think that I and you and

every man do really believe, that to do is a greater evil than to suffer injustice: and not to be punished than to be punished.

POLUS: And I should say neither I, nor any man: would you yourself, for example, suffer rather than do injustice?

SOCRATES: Yes, and you, too; I or any man would.

POLUS: Quite the reverse; neither you, nor I, nor any man.

SOCRATES: But will you answer?

POLUS: To be sure, I will; for I am curious to hear what you can have to say.

SOCRATES: Tell me, then, and you will know, and let us suppose that I am beginning at the beginning: which of the two, Polus, in your opinion, is the worst? — to do injustice or to suffer?

POLUS: I should say that suffering was worst.

SOCRATES: And which is the greater disgrace? — Answer.

POLUS: To do.

SOCRATES: And the greater disgrace is the greater evil?

POLUS: Certainly not.

SOCRATES: I understand you to say, if I am not mistaken, that the honourable is not the same as the good, or the disgraceful as the evil?

POLUS: Certainly not.

SOCRATES: Let me ask a question of you: When you speak of beautiful things, such as bodies, colours, figures, sounds, institutions, do you not call them beautiful in reference to some standard: bodies, for example, are beautiful in proportion as they are useful, or as the sight of them gives pleasure to the spectators; can you give any other account of personal beauty?

POLUS: I cannot.

SOCRATES: And you would say of figures or colours generally that they were beautiful, either by reason of the pleasure which they give, or of their use, or of both?

POLUS: Yes, I should.

SOCRATES: And you would call sounds and music beautiful for the same reason?

POLUS: I should.

SOCRATES: Laws and institutions also have no beauty in them except in so far as they are useful or pleasant or both?

POLUS: I think not.

SOCRATES: And may not the same be said of the beauty of knowledge?

POLUS: To be sure, Socrates; and I very much approve of your measuring beauty by the standard of pleasure and utility.

SOCRATES: And deformity or disgrace may be equally measured by the opposite standard of pain and evil?

POLUS: Certainly.

SOCRATES: Then when of two beautiful things one exceeds in beauty, the measure of the excess is to be taken in one or both of these; that is to say, in pleasure or utility or both?

POLUS: Very true.

SOCRATES: And of two deformed things, that which exceeds in deformity or disgrace, exceeds either in pain or evil — must it not be so?

POLUS: Yes.

SOCRATES: But then again, what was the observation which you just now made, about doing and suffering wrong? Did you not say, that suffering wrong was more evil, and doing wrong more

disgraceful?

POLUS: I did.

SOCRATES: Then, if doing wrong is more disgraceful than suffering, the more disgraceful must be more painful and must exceed in pain or in evil or both: does not that also follow?

POLUS: Of course.

SOCRATES: First, then, let us consider whether the doing of injustice exceeds the suffering in the consequent pain: Do the injurers suffer more than the injured?

POLUS: No, Socrates; certainly not.

SOCRATES: Then they do not exceed in pain?

POLUS: No.

SOCRATES: But if not in pain, then not in both?

POLUS: Certainly not.

SOCRATES: Then they can only exceed in the other?

POLUS: Yes.

SOCRATES: That is to say, in evil?

POLUS: True.

SOCRATES: Then doing injustice will have an excess of evil, and will therefore be a greater evil than suffering injustice?

POLUS: Clearly.

SOCRATES: But have not you and the world already agreed that to do injustice is more disgraceful than to suffer?

POLUS: Yes.

SOCRATES: And that is now discovered to be more evil?

POLUS: True.

SOCRATES: And would you prefer a greater evil or a greater dishonour to a less one? Answer, Polus, and fear not; for you will come to no harm if you nobly resign yourself into the healing hand of the argument as to a physician without shrinking, and either say 'Yes' or 'No' to me.

POLUS: I should say 'No.'

SOCRATES: Would any other man prefer a greater to a less evil?

POLUS: No, not according to this way of putting the case, Socrates.

SOCRATES: Then I said truly, Polus, that neither you, nor I, nor any man, would rather do than suffer injustice; for to do injustice is the greater evil of the two.

POLUS: That is the conclusion.

SOCRATES: You see, Polus, when you compare the two kinds of refutations, how unlike they are. All men, with the exception of myself, are of your way of thinking; but your single assent and witness are enough for me, — I have no need of any other, I take your suffrage, and am regardless of the rest. Enough of this, and now let us proceed to the next question; which is, Whether the greatest of evils to a guilty man is to suffer punishment, as you supposed, or whether to escape punishment is not a greater evil, as I supposed. Consider: — You would say that to suffer punishment is another name for being justly corrected when you do wrong?

POLUS: I should.

SOCRATES: And would you not allow that all just things are honourable in so far as they are just? Please to reflect, and tell me your opinion.

POLUS: Yes, Socrates, I think that they are.

SOCRATES: Consider again: — Where there is an agent, must there not also be a patient?

POLUS: I should say so.

SOCRATES: And will not the patient suffer that which the agent does, and will not the suffering have the quality of the action? I mean, for example, that if a man strikes, there must be something which is stricken?

POLUS: Yes.

SOCRATES: And if the striker strikes violently or quickly, that which is struck will be struck violently or quickly?

POLUS: True.

SOCRATES: And the suffering to him who is stricken is of the same nature as the act of him who strikes?

POLUS: Yes.

SOCRATES: And if a man burns, there is something which is burned?

POLUS: Certainly.

SOCRATES: And if he burns in excess or so as to cause pain, the thing burned will be burned in the same way?

POLUS: Truly.

SOCRATES: And if he cuts, the same argument holds — there will be something cut?

POLUS: Yes.

SOCRATES: And if the cutting be great or deep or such as will cause pain, the cut will be of the same nature?

POLUS: That is evident.

SOCRATES: Then you would agree generally to the universal proposition which I was just now asserting: that the affection of the patient answers to the affection of the agent?

POLUS: I agree.

SOCRATES: Then, as this is admitted, let me ask whether being punished is suffering or acting?

POLUS: Suffering, Socrates; there can be no doubt of that.

SOCRATES: And suffering implies an agent?

POLUS: Certainly, Socrates; and he is the punisher.

SOCRATES: And he who punishes rightly, punishes justly?

POLUS: Yes.

SOCRATES: And therefore he acts justly?

POLUS: Justly.

SOCRATES: Then he who is punished and suffers retribution, suffers justly?

POLUS: That is evident.

SOCRATES: And that which is just has been admitted to be honourable?

POLUS: Certainly.

SOCRATES: Then the punisher does what is honourable, and the punished suffers what is honourable?

POLUS: True.

SOCRATES: And if what is honourable, then what is good, for the honourable is either pleasant or useful?

POLUS: Certainly.

SOCRATES: Then he who is punished suffers what is good?

POLUS: That is true.

SOCRATES: Then he is benefited?

POLUS: Yes.

SOCRATES: Do I understand you to mean what I mean by the term 'benefited'? I mean, that if he be justly punished his soul is improved.

POLUS: Surely.

SOCRATES: Then he who is punished is delivered from the evil of his soul?

POLUS: Yes.

SOCRATES: And is he not then delivered from the greatest evil? Look at the matter in this way: — In respect of a man's estate, do you see any greater evil than poverty?

POLUS: There is no greater evil.

SOCRATES: Again, in a man's bodily frame, you would say that the evil is weakness and disease and deformity?

POLUS: I should.

SOCRATES: And do you not imagine that the soul likewise has some evil of her own?

POLUS: Of course.

SOCRATES: And this you would call injustice and ignorance and cowardice, and the like?

POLUS: Certainly.

SOCRATES: So then, in mind, body, and estate, which are three, you have pointed out three corresponding evils — injustice, disease, poverty?

POLUS: True.

SOCRATES: And which of the evils is the most disgraceful? — Is not the most disgraceful of them injustice, and in general the evil of

the soul?

POLUS: By far the most.

SOCRATES: And if the most disgraceful, then also the worst?

POLUS: What do you mean, Socrates?

SOCRATES: I mean to say, that is most disgraceful has been already admitted to be most painful or hurtful, or both.

POLUS: Certainly.

SOCRATES: And now injustice and all evil in the soul has been admitted by us to be most disgraceful?

POLUS: It has been admitted.

SOCRATES: And most disgraceful either because most painful and causing excessive pain, or most hurtful, or both?

POLUS: Certainly.

SOCRATES: And therefore to be unjust and intemperate, and cowardly and ignorant, is more painful than to be poor and sick?

POLUS: Nay, Socrates; the painfulness does not appear to me to follow from your premises.

SOCRATES: Then, if, as you would argue, not more painful, the evil of the soul is of all evils the most disgraceful; and the excess of disgrace must be caused by some preternatural greatness, or extraordinary hurtfulness of the evil.

POLUS: Clearly.

SOCRATES: And that which exceeds most in hurtfulness will be the greatest of evils?

POLUS: Yes.

SOCRATES: Then injustice and intemperance, and in general the depravity of the soul, are the greatest of evils?

POLUS: That is evident.

SOCRATES: Now, what art is there which delivers us from poverty? Does not the art of making money?

POLUS: Yes.

SOCRATES: And what art frees us from disease? Does not the art of medicine?

POLUS: Very true.

SOCRATES: And what from vice and injustice? If you are not able to answer at once, ask yourself whither we go with the sick, and to whom we take them.

POLUS: To the physicians, Socrates.

SOCRATES: And to whom do we go with the unjust and intemperate?

POLUS: To the judges, you mean.

SOCRATES: — Who are to punish them?

POLUS: Yes.

SOCRATES: And do not those who rightly punish others, punish them in accordance with a certain rule of justice?

POLUS: Clearly.

SOCRATES: Then the art of money-making frees a man from poverty; medicine from disease; and justice from intemperance and injustice?

POLUS: That is evident.

SOCRATES: Which, then, is the best of these three?

POLUS: Will you enumerate them?

SOCRATES: Money-making, medicine, and justice.

POLUS: Justice, Socrates, far excels the two others.

SOCRATES: And justice, if the best, gives the greatest pleasure or advantage or both?

POLUS: Yes.

SOCRATES: But is the being healed a pleasant thing, and are those who are being healed pleased?

POLUS: I think not.

SOCRATES: A useful thing, then?

POLUS: Yes.

SOCRATES: Yes, because the patient is delivered from a great evil; and this is the advantage of enduring the pain — that you get well?

POLUS: Certainly.

SOCRATES: And would he be the happier man in his bodily condition, who is healed, or who never was out of health?

POLUS: Clearly he who was never out of health.

SOCRATES: Yes; for happiness surely does not consist in being delivered from evils, but in never having had them.

POLUS: True.

SOCRATES: And suppose the case of two persons who have some evil in their bodies, and that one of them is healed and delivered from evil, and another is not healed, but retains the evil — which of them is the most miserable?

POLUS: Clearly he who is not healed.

SOCRATES: And was not punishment said by us to be a deliverance from the greatest of evils, which is vice?

POLUS: True.

SOCRATES: And justice punishes us, and makes us more just, and is the medicine of our vice?

POLUS: True.

SOCRATES: He, then, has the first place in the scale of happiness who has never had vice in his soul; for this has been shown to be the greatest of evils.

POLUS: Clearly.

SOCRATES: And he has the second place, who is delivered from vice?

POLUS: True.

SOCRATES: That is to say, he who receives admonition and rebuke and punishment?

POLUS: Yes.

SOCRATES: Then he lives worst, who, having been unjust, has no deliverance from injustice?

POLUS: Certainly.

SOCRATES: That is, he lives worst who commits the greatest crimes, and who, being the most unjust of men, succeeds in escaping rebuke or correction or punishment; and this, as you say, has been accomplished by Archelaus and other tyrants and rhetoricians and potentates? (Compare Republic.)

POLUS: True.

SOCRATES: May not their way of proceeding, my friend, be compared to the conduct of a person who is afflicted with the worst of diseases and yet contrives not to pay the penalty to the physician for his sins against his constitution, and will not be cured, because, like a child, he is afraid of the pain of being burned or cut: — Is not that a parallel case?

POLUS: Yes, truly.

SOCRATES: He would seem as if he did not know the nature of health and bodily vigour; and if we are right, Polus, in our previous conclusions, they are in a like case who strive to evade justice, which they see to be painful, but are blind to the advantage which ensues from it, not knowing how far more miserable a companion a diseased soul is than a diseased body; a soul, I say, which is corrupt and unrighteous and unholy. And hence they do all that they can to avoid punishment and to avoid being released from the greatest of evils; they provide themselves with money and friends, and cultivate to the utmost their powers of persuasion. But if we, Polus, are right, do you see what follows, or shall we draw out the consequences in form?

POLUS: If you please.

SOCRATES: Is it not a fact that injustice, and the doing of injustice, is the greatest of evils?

POLUS: That is quite clear.

SOCRATES: And further, that to suffer punishment is the way to be released from this evil?

POLUS: True.

SOCRATES: And not to suffer, is to perpetuate the evil?

POLUS: Yes.

SOCRATES: To do wrong, then, is second only in the scale of evils; but to do wrong and not to be punished, is first and greatest of all?

POLUS: That is true.

SOCRATES: Well, and was not this the point in dispute, my friend? You deemed Archelaus happy, because he was a very great criminal and unpunished: I, on the other hand, maintained that he or any other who like him has done wrong and has not been punished, is, and ought to be, the most miserable of all men; and that the doer of injustice is more miserable than the sufferer; and he who escapes

punishment, more miserable than he who suffers. — Was not that what I said?

POLUS: Yes.

SOCRATES: And it has been proved to be true?

POLUS: Certainly.

SOCRATES: Well, Polus, but if this is true, where is the great use of rhetoric? If we admit what has been just now said, every man ought in every way to guard himself against doing wrong, for he will thereby suffer great evil?

POLUS: True.

SOCRATES: And if he, or any one about whom he cares, does wrong, he ought of his own accord to go where he will be immediately punished; he will run to the judge, as he would to the physician, in order that the disease of injustice may not be rendered chronic and become the incurable cancer of the soul; must we not allow this consequence, Polus, if our former admissions are to stand: — is any other inference consistent with them?

POLUS: To that, Socrates, there can be but one answer.

SOCRATES: Then rhetoric is of no use to us, Polus, in helping a man to excuse his own injustice, that of his parents or friends, or children or country; but may be of use to any one who holds that instead of excusing he ought to accuse — himself above all, and in the next degree his family or any of his friends who may be doing wrong; he should bring to light the iniquity and not conceal it, that so the wrong-doer may suffer and be made whole; and he should even force himself and others not to shrink, but with closed eyes like brave men to let the physician operate with knife or searing iron, not regarding the pain, in the hope of attaining the good and the honourable; let him who has done things worthy of stripes, allow himself to be scourged, if of bonds, to be bound, if of a fine, to be fined, if of exile, to be exiled, if of death, to die, himself being the first to accuse himself and his own relations, and using rhetoric to

this end, that his and their unjust actions may be made manifest, and that they themselves may be delivered from injustice, which is the greatest evil. Then, Polus, rhetoric would indeed be useful. Do you say 'Yes' or 'No' to that?

POLUS: To me, Socrates, what you are saying appears very strange, though probably in agreement with your premises.

SOCRATES: Is not this the conclusion, if the premises are not disproven?

POLUS: Yes; it certainly is.

SOCRATES: And from the opposite point of view, if indeed it be our duty to harm another, whether an enemy or not — I except the case of self-defence — then I have to be upon my guard — but if my enemy injures a third person, then in every sort of way, by word as well as deed, I should try to prevent his being punished, or appearing before the judge; and if he appears, I should contrive that he should escape, and not suffer punishment: if he has stolen a sum of money, let him keep what he has stolen and spend it on him and his, regardless of religion and justice; and if he have done things worthy of death, let him not die, but rather be immortal in his wickedness; or, if this is not possible, let him at any rate be allowed to live as long as he can. For such purposes, Polus, rhetoric may be useful, but is of small if of any use to him who is not intending to commit injustice; at least, there was no such use discovered by us in the previous discussion.

CALLICLES: Tell me, Chaerephon, is Socrates in earnest, or is he joking?

CHAEREPHON: I should say, Callicles, that he is in most profound earnest; but you may well ask him.

CALLICLES: By the gods, and I will. Tell me, Socrates, are you in earnest, or only in jest? For if you are in earnest, and what you say is true, is not the whole of human life turned upside down; and are we not doing, as would appear, in everything the opposite of what we

ought to be doing?

SOCRATES: O Callicles, if there were not some community of feelings among mankind, however varying in different persons — I mean to say, if every man's feelings were peculiar to himself and were not shared by the rest of his species — I do not see how we could ever communicate our impressions to one another. I make this remark because I perceive that you and I have a common feeling. For we are lovers both, and both of us have two loves apiece: — I am the lover of Alcibiades, the son of Cleinias, and of philosophy; and you of the Athenian Demus, and of Demus the son of Pylilampes. Now, I observe that you, with all your cleverness, do not venture to contradict your favourite in any word or opinion of his; but as he changes you change, backwards and forwards. When the Athenian Demus denies anything that you are saying in the assembly, you go over to his opinion; and you do the same with Demus, the fair young son of Pylilampes. For you have not the power to resist the words and ideas of your loves; and if a person were to express surprise at the strangeness of what you say from time to time when under their influence, you would probably reply to him, if you were honest, that you cannot help saying what your loves say unless they are prevented; and that you can only be silent when they are. Now you must understand that my words are an echo too, and therefore you need not wonder at me; but if you want to silence me, silence philosophy, who is my love, for she is always telling me what I am now telling you, my friend; neither is she capricious like my other love, for the son of Cleinias says one thing to-day and another thing to-morrow, but philosophy is always true. She is the teacher at whose words you are now wondering, and you have heard her yourself. Her you must refute, and either show, as I was saying, that to do injustice and to escape punishment is not the worst of all evils; or, if you leave her word unrefuted, by the dog the god of Egypt, I declare, O Callicles, that Callicles will never be at one with himself, but that his whole life will be a discord. And yet, my friend, I would rather that my lyre should be inharmonious, and that there should be no music in the chorus which I provided; aye, or that the whole world should be at odds with me, and oppose me, rather than that I myself should

be at odds with myself, and contradict myself.

CALLICLES: O Socrates, you are a regular declaimer, and seem to be running riot in the argument. And now you are declaiming in this way because Polus has fallen into the same error himself of which he accused Gorgias: — for he said that when Gorgias was asked by you, whether, if some one came to him who wanted to learn rhetoric, and did not know justice, he would teach him justice, Gorgias in his modesty replied that he would, because he thought that mankind in general would be displeased if he answered ‘No’; and then in consequence of this admission, Gorgias was compelled to contradict himself, that being just the sort of thing in which you delight. Whereupon Polus laughed at you deservedly, as I think; but now he has himself fallen into the same trap. I cannot say very much for his wit when he conceded to you that to do is more dishonourable than to suffer injustice, for this was the admission which led to his being entangled by you; and because he was too modest to say what he thought, he had his mouth stopped. For the truth is, Socrates, that you, who pretend to be engaged in the pursuit of truth, are appealing now to the popular and vulgar notions of right, which are not natural, but only conventional. Convention and nature are generally at variance with one another: and hence, if a person is too modest to say what he thinks, he is compelled to contradict himself; and you, in your ingenuity perceiving the advantage to be thereby gained, slyly ask of him who is arguing conventionally a question which is to be determined by the rule of nature; and if he is talking of the rule of nature, you slip away to custom: as, for instance, you did in this very discussion about doing and suffering injustice. When Polus was speaking of the conventionally dishonourable, you assailed him from the point of view of nature; for by the rule of nature, to suffer injustice is the greater disgrace because the greater evil; but conventionally, to do evil is the more disgraceful. For the suffering of injustice is not the part of a man, but of a slave, who indeed had better die than live; since when he is wronged and trampled upon, he is unable to help himself, or any other about whom he cares. The reason, as I conceive, is that the makers of laws are the majority who are weak; and they make laws and distribute praises and censures

with a view to themselves and to their own interests; and they terrify the stronger sort of men, and those who are able to get the better of them, in order that they may not get the better of them; and they say, that dishonesty is shameful and unjust; meaning, by the word injustice, the desire of a man to have more than his neighbours; for knowing their own inferiority, I suspect that they are too glad of equality. And therefore the endeavour to have more than the many, is conventionally said to be shameful and unjust, and is called injustice (compare Republic), whereas nature herself intimates that it is just for the better to have more than the worse, the more powerful than the weaker; and in many ways she shows, among men as well as among animals, and indeed among whole cities and races, that justice consists in the superior ruling over and having more than the inferior. For on what principle of justice did Xerxes invade Hellas, or his father the Scythians? (not to speak of numberless other examples). Nay, but these are the men who act according to nature; yes, by Heaven, and according to the law of nature: not, perhaps, according to that artificial law, which we invent and impose upon our fellows, of whom we take the best and strongest from their youth upwards, and tame them like young lions, — charming them with the sound of the voice, and saying to them, that with equality they must be content, and that the equal is the honourable and the just. But if there were a man who had sufficient force, he would shake off and break through, and escape from all this; he would trample under foot all our formulas and spells and charms, and all our laws which are against nature: the slave would rise in rebellion and be lord over us, and the light of natural justice would shine forth. And this I take to be the sentiment of Pindar, when he says in his poem, that

‘Law is the king of all, of mortals as well as of immortals;’

this, as he says,

‘Makes might to be right, doing violence with highest hand; as I infer from the deeds of Heracles, for without buying them—’ (Fragm. Incert. 151 (Bockh).) — I do not remember the exact words, but the meaning is, that without buying them, and without their being given to him, he carried off the oxen of Geryon, according to the law of

natural right, and that the oxen and other possessions of the weaker and inferior properly belong to the stronger and superior. And this is true, as you may ascertain, if you will leave philosophy and go on to higher things: for philosophy, Socrates, if pursued in moderation and at the proper age, is an elegant accomplishment, but too much philosophy is the ruin of human life. Even if a man has good parts, still, if he carries philosophy into later life, he is necessarily ignorant of all those things which a gentleman and a person of honour ought to know; he is inexperienced in the laws of the State, and in the language which ought to be used in the dealings of man with man, whether private or public, and utterly ignorant of the pleasures and desires of mankind and of human character in general. And people of this sort, when they betake themselves to politics or business, are as ridiculous as I imagine the politicians to be, when they make their appearance in the arena of philosophy. For, as Euripides says,

‘Every man shines in that and pursues that, and devotes the greatest portion of the day to that in which he most excels,’ (Antiope, fragm. 20 (Dindorf).)

but anything in which he is inferior, he avoids and depreciates, and praises the opposite from partiality to himself, and because he thinks that he will thus praise himself. The true principle is to unite them. Philosophy, as a part of education, is an excellent thing, and there is no disgrace to a man while he is young in pursuing such a study; but when he is more advanced in years, the thing becomes ridiculous, and I feel towards philosophers as I do towards those who lisp and imitate children. For I love to see a little child, who is not of an age to speak plainly, lisping at his play; there is an appearance of grace and freedom in his utterance, which is natural to his childish years. But when I hear some small creature carefully articulating its words, I am offended; the sound is disagreeable, and has to my ears the twang of slavery. So when I hear a man lisping, or see him playing like a child, his behaviour appears to me ridiculous and unmanly and worthy of stripes. And I have the same feeling about students of philosophy; when I see a youth thus engaged, — the study appears to me to be in character, and becoming a man of liberal education, and

him who neglects philosophy I regard as an inferior man, who will never aspire to anything great or noble. But if I see him continuing the study in later life, and not leaving off, I should like to beat him, Socrates; for, as I was saying, such a one, even though he have good natural parts, becomes effeminate. He flies from the busy centre and the market-place, in which, as the poet says, men become distinguished; he creeps into a corner for the rest of his life, and talks in a whisper with three or four admiring youths, but never speaks out like a freeman in a satisfactory manner. Now I, Socrates, am very well inclined towards you, and my feeling may be compared with that of Zethus towards Amphion, in the play of Euripides, whom I was mentioning just now: for I am disposed to say to you much what Zethus said to his brother, that you, Socrates, are careless about the things of which you ought to be careful; and that you

‘Who have a soul so noble, are remarkable for a puerile exterior; Neither in a court of justice could you state a case, or give any reason or proof, Or offer valiant counsel on another’s behalf.’

And you must not be offended, my dear Socrates, for I am speaking out of good-will towards you, if I ask whether you are not ashamed of being thus defenceless; which I affirm to be the condition not of you only but of all those who will carry the study of philosophy too far. For suppose that some one were to take you, or any one of your sort, off to prison, declaring that you had done wrong when you had done no wrong, you must allow that you would not know what to do: — there you would stand giddy and gaping, and not having a word to say; and when you went up before the Court, even if the accuser were a poor creature and not good for much, you would die if he were disposed to claim the penalty of death. And yet, Socrates, what is the value of

‘An art which converts a man of sense into a fool,’

who is helpless, and has no power to save either himself or others, when he is in the greatest danger and is going to be despoiled by his enemies of all his goods, and has to live, simply deprived of his rights of citizenship? — he being a man who, if I may use the expression, may be boxed on the ears with impunity. Then, my good friend, take my advice, and refute no more:

‘Learn the philosophy of business, and acquire the reputation of wisdom. But leave to others these niceties,’

whether they are to be described as follies or absurdities:

‘For they will only Give you poverty for the inmate of your dwelling.’

Cease, then, emulating these paltry splitters of words, and emulate only the man of substance and honour, who is well to do.

SOCRATES: If my soul, Callicles, were made of gold, should I not rejoice to discover one of those stones with which they test gold, and the very best possible one to which I might bring my soul; and if the stone and I agreed in approving of her training, then I should know that I was in a satisfactory state, and that no other test was needed by

me.

CALLICLES: What is your meaning, Socrates?

SOCRATES: I will tell you; I think that I have found in you the desired touchstone.

CALLICLES: Why?

SOCRATES: Because I am sure that if you agree with me in any of the opinions which my soul forms, I have at last found the truth indeed. For I consider that if a man is to make a complete trial of the good or evil of the soul, he ought to have three qualities — knowledge, good-will, outspokenness, which are all possessed by you. Many whom I meet are unable to make trial of me, because they are not wise as you are; others are wise, but they will not tell me the truth, because they have not the same interest in me which you have; and these two strangers, Gorgias and Polus, are undoubtedly wise men and my very good friends, but they are not outspoken enough, and they are too modest. Why, their modesty is so great that they are driven to contradict themselves, first one and then the other of them, in the face of a large company, on matters of the highest moment. But you have all the qualities in which these others are deficient, having received an excellent education; to this many Athenians can testify. And you are my friend. Shall I tell you why I think so? I know that you, Callicles, and Tisander of Aphidnae, and Andron the son of Androtion, and Nausicydes of the deme of Cholargos, studied together: there were four of you, and I once heard you advising with one another as to the extent to which the pursuit of philosophy should be carried, and, as I know, you came to the conclusion that the study should not be pushed too much into detail. You were cautioning one another not to be overwise; you were afraid that too much wisdom might unconsciously to yourselves be the ruin of you. And now when I hear you giving the same advice to me which you then gave to your most intimate friends, I have a sufficient evidence of your real good-will to me. And of the frankness of your nature and freedom from modesty I am assured by yourself, and the assurance is confirmed by your last speech. Well then, the inference in the present

case clearly is, that if you agree with me in an argument about any point, that point will have been sufficiently tested by us, and will not require to be submitted to any further test. For you could not have agreed with me, either from lack of knowledge or from superfluity of modesty, nor yet from a desire to deceive me, for you are my friend, as you tell me yourself. And therefore when you and I are agreed, the result will be the attainment of perfect truth. Now there is no nobler enquiry, Callicles, than that which you censure me for making, — What ought the character of a man to be, and what his pursuits, and how far is he to go, both in maturer years and in youth? For be assured that if I err in my own conduct I do not err intentionally, but from ignorance. Do not then desist from advising me, now that you have begun, until I have learned clearly what this is which I am to practise, and how I may acquire it. And if you find me assenting to your words, and hereafter not doing that to which I assented, call me ‘dolt,’ and deem me unworthy of receiving further instruction. Once more, then, tell me what you and Pindar mean by natural justice: Do you not mean that the superior should take the property of the inferior by force; that the better should rule the worse, the noble have more than the mean? Am I not right in my recollection?

CALLICLES: Yes; that is what I was saying, and so I still aver.

SOCRATES: And do you mean by the better the same as the superior? for I could not make out what you were saying at the time — whether you meant by the superior the stronger, and that the weaker must obey the stronger, as you seemed to imply when you said that great cities attack small ones in accordance with natural right, because they are superior and stronger, as though the superior and stronger and better were the same; or whether the better may be also the inferior and weaker, and the superior the worse, or whether better is to be defined in the same way as superior: — this is the point which I want to have cleared up. Are the superior and better and stronger the same or different?

CALLICLES: I say unequivocally that they are the same.

SOCRATES: Then the many are by nature superior to the one,

against whom, as you were saying, they make the laws?

CALLICLES: Certainly.

SOCRATES: Then the laws of the many are the laws of the superior?

CALLICLES: Very true.

SOCRATES: Then they are the laws of the better; for the superior class are far better, as you were saying?

CALLICLES: Yes.

SOCRATES: And since they are superior, the laws which are made by them are by nature good?

CALLICLES: Yes.

SOCRATES: And are not the many of opinion, as you were lately saying, that justice is equality, and that to do is more disgraceful than to suffer injustice? — is that so or not? Answer, Callicles, and let no modesty be found to come in the way; do the many think, or do they not think thus? — I must beg of you to answer, in order that if you agree with me I may fortify myself by the assent of so competent an authority.

CALLICLES: Yes; the opinion of the many is what you say.

SOCRATES: Then not only custom but nature also affirms that to do is more disgraceful than to suffer injustice, and that justice is equality; so that you seem to have been wrong in your former assertion, when accusing me you said that nature and custom are opposed, and that I, knowing this, was dishonestly playing between them, appealing to custom when the argument is about nature, and to nature when the argument is about custom?

CALLICLES: This man will never cease talking nonsense. At your age, Socrates, are you not ashamed to be catching at words and chuckling over some verbal slip? do you not see — have I not told you already, that by superior I mean better: do you imagine me to say, that if a rabble of slaves and nondescripts, who are of no use

except perhaps for their physical strength, get together, their ipsissima verba are laws?

SOCRATES: Ho! my philosopher, is that your line?

CALLICLES: Certainly.

SOCRATES: I was thinking, Callicles, that something of the kind must have been in your mind, and that is why I repeated the question, — What is the superior? I wanted to know clearly what you meant; for you surely do not think that two men are better than one, or that your slaves are better than you because they are stronger? Then please to begin again, and tell me who the better are, if they are not the stronger; and I will ask you, great Sir, to be a little milder in your instructions, or I shall have to run away from you.

CALLICLES: You are ironical.

SOCRATES: No, by the hero Zethus, Callicles, by whose aid you were just now saying many ironical things against me, I am not: — tell me, then, whom you mean, by the better?

CALLICLES: I mean the more excellent.

SOCRATES: Do you not see that you are yourself using words which have no meaning and that you are explaining nothing? — will you tell me whether you mean by the better and superior the wiser, or if not, whom?

CALLICLES: Most assuredly, I do mean the wiser.

SOCRATES: Then according to you, one wise man may often be superior to ten thousand fools, and he ought to rule them, and they ought to be his subjects, and he ought to have more than they should. This is what I believe that you mean (and you must not suppose that I am word-catching), if you allow that the one is superior to the ten thousand?

CALLICLES: Yes; that is what I mean, and that is what I conceive to be natural justice — that the better and wiser should rule and have

more than the inferior.

SOCRATES: Stop there, and let me ask you what you would say in this case: Let us suppose that we are all together as we are now; there are several of us, and we have a large common store of meats and drinks, and there are all sorts of persons in our company having various degrees of strength and weakness, and one of us, being a physician, is wiser in the matter of food than all the rest, and he is probably stronger than some and not so strong as others of us — will he not, being wiser, be also better than we are, and our superior in this matter of food?

CALLICLES: Certainly.

SOCRATES: Either, then, he will have a larger share of the meats and drinks, because he is better, or he will have the distribution of all of them by reason of his authority, but he will not expend or make use of a larger share of them on his own person, or if he does, he will be punished; — his share will exceed that of some, and be less than that of others, and if he be the weakest of all, he being the best of all will have the smallest share of all, Callicles: — am I not right, my friend?

CALLICLES: You talk about meats and drinks and physicians and other nonsense; I am not speaking of them.

SOCRATES: Well, but do you admit that the wiser is the better? Answer 'Yes' or 'No.'

CALLICLES: Yes.

SOCRATES: And ought not the better to have a larger share?

CALLICLES: Not of meats and drinks.

SOCRATES: I understand: then, perhaps, of coats — the skilfullest weaver ought to have the largest coat, and the greatest number of them, and go about clothed in the best and finest of them?

CALLICLES: Fudge about coats!

SOCRATES: Then the skilfullest and best in making shoes ought to have the advantage in shoes; the shoemaker, clearly, should walk about in the largest shoes, and have the greatest number of them?

CALLICLES: Fudge about shoes! What nonsense are you talking?

SOCRATES: Or, if this is not your meaning, perhaps you would say that the wise and good and true husbandman should actually have a larger share of seeds, and have as much seed as possible for his own land?

CALLICLES: How you go on, always talking in the same way, Socrates!

SOCRATES: Yes, Callicles, and also about the same things.

CALLICLES: Yes, by the Gods, you are literally always talking of cobblers and fullers and cooks and doctors, as if this had to do with our argument.

SOCRATES: But why will you not tell me in what a man must be superior and wiser in order to claim a larger share; will you neither accept a suggestion, nor offer one?

CALLICLES: I have already told you. In the first place, I mean by superiors not cobblers or cooks, but wise politicians who understand the administration of a state, and who are not only wise, but also valiant and able to carry out their designs, and not the men to faint from want of soul.

SOCRATES: See now, most excellent Callicles, how different my charge against you is from that which you bring against me, for you reproach me with always saying the same; but I reproach you with never saying the same about the same things, for at one time you were defining the better and the superior to be the stronger, then again as the wiser, and now you bring forward a new notion; the superior and the better are now declared by you to be the more courageous: I wish, my good friend, that you would tell me, once for all, whom you affirm to be the better and superior, and in what they are better?

CALLICLES: I have already told you that I mean those who are wise and courageous in the administration of a state — they ought to be the rulers of their states, and justice consists in their having more than their subjects.

SOCRATES: But whether rulers or subjects will they or will they not have more than themselves, my friend?

CALLICLES: What do you mean?

SOCRATES: I mean that every man is his own ruler; but perhaps you think that there is no necessity for him to rule himself; he is only required to rule others?

CALLICLES: What do you mean by his ‘ruling over himself’?

SOCRATES: A simple thing enough; just what is commonly said, that a man should be temperate and master of himself, and ruler of his own pleasures and passions.

CALLICLES: What innocence! you mean those fools, — the temperate?

SOCRATES: Certainly: — any one may know that to be my meaning.

CALLICLES: Quite so, Socrates; and they are really fools, for how can a man be happy who is the servant of anything? On the contrary, I plainly assert, that he who would truly live ought to allow his desires to wax to the uttermost, and not to chastise them; but when they have grown to their greatest he should have courage and intelligence to minister to them and to satisfy all his longings. And this I affirm to be natural justice and nobility. To this however the many cannot attain; and they blame the strong man because they are ashamed of their own weakness, which they desire to conceal, and hence they say that intemperance is base. As I have remarked already, they enslave the nobler natures, and being unable to satisfy their pleasures, they praise temperance and justice out of their own cowardice. For if a man had been originally the son of a king, or had a nature capable of acquiring an empire or a tyranny or sovereignty,

what could be more truly base or evil than temperance — to a man like him, I say, who might freely be enjoying every good, and has no one to stand in his way, and yet has admitted custom and reason and the opinion of other men to be lords over him? — must not he be in a miserable plight whom the reputation of justice and temperance hinders from giving more to his friends than to his enemies, even though he be a ruler in his city? Nay, Socrates, for you profess to be a votary of the truth, and the truth is this: — that luxury and intemperance and licence, if they be provided with means, are virtue and happiness — all the rest is a mere bauble, agreements contrary to nature, foolish talk of men, nothing worth. (Compare Republic.)

SOCRATES: There is a noble freedom, Callicles, in your way of approaching the argument; for what you say is what the rest of the world think, but do not like to say. And I must beg of you to persevere, that the true rule of human life may become manifest. Tell me, then: — you say, do you not, that in the rightly-developed man the passions ought not to be controlled, but that we should let them grow to the utmost and somehow or other satisfy them, and that this is virtue?

CALLICLES: Yes; I do.

SOCRATES: Then those who want nothing are not truly said to be happy?

CALLICLES: No indeed, for then stones and dead men would be the happiest of all.

SOCRATES: But surely life according to your view is an awful thing; and indeed I think that Euripides may have been right in saying,

‘Who knows if life be not death and death life;’

and that we are very likely dead; I have heard a philosopher say that at this moment we are actually dead, and that the body (soma) is our tomb (sema (compare Phaedr.)), and that the part of the soul which is the seat of the desires is liable to be tossed about by words and blown

up and down; and some ingenious person, probably a Sicilian or an Italian, playing with the word, invented a tale in which he called the soul — because of its believing and make-believe nature — a vessel (An untranslatable pun, — *dia to pithanon te kai pistikon onomase pithon.*), and the ignorant he called the uninitiated or leaky, and the place in the souls of the uninitiated in which the desires are seated, being the intemperate and incontinent part, he compared to a vessel full of holes, because it can never be satisfied. He is not of your way of thinking, Callicles, for he declares, that of all the souls in Hades, meaning the invisible world (*aeides*), these uninitiated or leaky persons are the most miserable, and that they pour water into a vessel which is full of holes out of a colander which is similarly perforated. The colander, as my informer assures me, is the soul, and the soul which he compares to a colander is the soul of the ignorant, which is likewise full of holes, and therefore incontinent, owing to a bad memory and want of faith. These notions are strange enough, but they show the principle which, if I can, I would fain prove to you; that you should change your mind, and, instead of the intemperate and insatiate life, choose that which is orderly and sufficient and has a due provision for daily needs. Do I make any impression on you, and are you coming over to the opinion that the orderly are happier than the intemperate? Or do I fail to persuade you, and, however many tales I rehearse to you, do you continue of the same opinion still?

CALLICLES: The latter, Socrates, is more like the truth.

SOCRATES: Well, I will tell you another image, which comes out of the same school: — Let me request you to consider how far you would accept this as an account of the two lives of the temperate and intemperate in a figure: — There are two men, both of whom have a number of casks; the one man has his casks sound and full, one of wine, another of honey, and a third of milk, besides others filled with other liquids, and the streams which fill them are few and scanty, and he can only obtain them with a great deal of toil and difficulty; but when his casks are once filled he has no need to feed them any more, and has no further trouble with them or care about them. The other,

in like manner, can procure streams, though not without difficulty; but his vessels are leaky and unsound, and night and day he is compelled to be filling them, and if he pauses for a moment, he is in an agony of pain. Such are their respective lives: — And now would you say that the life of the intemperate is happier than that of the temperate? Do I not convince you that the opposite is the truth?

CALLICLES: You do not convince me, Socrates, for the one who has filled himself has no longer any pleasure left; and this, as I was just now saying, is the life of a stone: he has neither joy nor sorrow after he is once filled; but the pleasure depends on the superabundance of the influx.

SOCRATES: But the more you pour in, the greater the waste; and the holes must be large for the liquid to escape.

CALLICLES: Certainly.

SOCRATES: The life which you are now depicting is not that of a dead man, or of a stone, but of a cormorant; you mean that he is to be hungry and eating?

CALLICLES: Yes.

SOCRATES: And he is to be thirsting and drinking?

CALLICLES: Yes, that is what I mean; he is to have all his desires about him, and to be able to live happily in the gratification of them.

SOCRATES: Capital, excellent; go on as you have begun, and have no shame; I, too, must disencumber myself of shame: and first, will you tell me whether you include itching and scratching, provided you have enough of them and pass your life in scratching, in your notion of happiness?

CALLICLES: What a strange being you are, Socrates! a regular mob-orator.

SOCRATES: That was the reason, Callicles, why I scared Polus and Gorgias, until they were too modest to say what they thought; but

you will not be too modest and will not be scared, for you are a brave man. And now, answer my question.

CALLICLES: I answer, that even the scratcher would live pleasantly.

SOCRATES: And if pleasantly, then also happily?

CALLICLES: To be sure.

SOCRATES: But what if the itching is not confined to the head? Shall I pursue the question? And here, Callicles, I would have you consider how you would reply if consequences are pressed upon you, especially if in the last resort you are asked, whether the life of a catamite is not terrible, foul, miserable? Or would you venture to say, that they too are happy, if they only get enough of what they want?

CALLICLES: Are you not ashamed, Socrates, of introducing such topics into the argument?

SOCRATES: Well, my fine friend, but am I the introducer of these topics, or he who says without any qualification that all who feel pleasure in whatever manner are happy, and who admits of no distinction between good and bad pleasures? And I would still ask, whether you say that pleasure and good are the same, or whether there is some pleasure which is not a good?

CALLICLES: Well, then, for the sake of consistency, I will say that they are the same.

SOCRATES: You are breaking the original agreement, Callicles, and will no longer be a satisfactory companion in the search after truth, if you say what is contrary to your real opinion.

CALLICLES: Why, that is what you are doing too, Socrates.

SOCRATES: Then we are both doing wrong. Still, my dear friend, I would ask you to consider whether pleasure, from whatever source derived, is the good; for, if this be true, then the disagreeable consequences which have been darkly intimated must follow, and many others.

CALLICLES: That, Socrates, is only your opinion.

SOCRATES: And do you, Callicles, seriously maintain what you are saying?

CALLICLES: Indeed I do.

SOCRATES: Then, as you are in earnest, shall we proceed with the argument?

CALLICLES: By all means. (Or, 'I am in profound earnest.')

SOCRATES: Well, if you are willing to proceed, determine this question for me: — There is something, I presume, which you would call knowledge?

CALLICLES: There is.

SOCRATES: And were you not saying just now, that some courage implied knowledge?

CALLICLES: I was.

SOCRATES: And you were speaking of courage and knowledge as two things different from one another?

CALLICLES: Certainly I was.

SOCRATES: And would you say that pleasure and knowledge are the same, or not the same?

CALLICLES: Not the same, O man of wisdom.

SOCRATES: And would you say that courage differed from pleasure?

CALLICLES: Certainly.

SOCRATES: Well, then, let us remember that Callicles, the Acharnian, says that pleasure and good are the same; but that knowledge and courage are not the same, either with one another, or with the good.

CALLICLES: And what does our friend Socrates, of Foxton, say — does he assent to this, or not?

SOCRATES: He does not assent; neither will Callicles, when he sees himself truly. You will admit, I suppose, that good and evil fortune are opposed to each other?

CALLICLES: Yes.

SOCRATES: And if they are opposed to each other, then, like health and disease, they exclude one another; a man cannot have them both, or be without them both, at the same time?

CALLICLES: What do you mean?

SOCRATES: Take the case of any bodily affection: — a man may have the complaint in his eyes which is called ophthalmia?

CALLICLES: To be sure.

SOCRATES: But he surely cannot have the same eyes well and sound at the same time?

CALLICLES: Certainly not.

SOCRATES: And when he has got rid of his ophthalmia, has he got rid of the health of his eyes too? Is the final result, that he gets rid of them both together?

CALLICLES: Certainly not.

SOCRATES: That would surely be marvellous and absurd?

CALLICLES: Very.

SOCRATES: I suppose that he is affected by them, and gets rid of them in turns?

CALLICLES: Yes.

SOCRATES: And he may have strength and weakness in the same way, by fits?

CALLICLES: Yes.

SOCRATES: Or swiftness and slowness?

CALLICLES: Certainly.

SOCRATES: And does he have and not have good and happiness, and their opposites, evil and misery, in a similar alternation? (Compare Republic.)

CALLICLES: Certainly he has.

SOCRATES: If then there be anything which a man has and has not at the same time, clearly that cannot be good and evil — do we agree? Please not to answer without consideration.

CALLICLES: I entirely agree.

SOCRATES: Go back now to our former admissions. — Did you say that to hunger, I mean the mere state of hunger, was pleasant or painful?

CALLICLES: I said painful, but that to eat when you are hungry is pleasant.

SOCRATES: I know; but still the actual hunger is painful: am I not right?

CALLICLES: Yes.

SOCRATES: And thirst, too, is painful?

CALLICLES: Yes, very.

SOCRATES: Need I adduce any more instances, or would you agree that all wants or desires are painful?

CALLICLES: I agree, and therefore you need not adduce any more instances.

SOCRATES: Very good. And you would admit that to drink, when you are thirsty, is pleasant?

CALLICLES: Yes.

SOCRATES: And in the sentence which you have just uttered, the word 'thirsty' implies pain?

CALLICLES: Yes.

SOCRATES: And the word 'drinking' is expressive of pleasure, and of the satisfaction of the want?

CALLICLES: Yes.

SOCRATES: There is pleasure in drinking?

CALLICLES: Certainly.

SOCRATES: When you are thirsty?

SOCRATES: And in pain?

CALLICLES: Yes.

SOCRATES: Do you see the inference: — that pleasure and pain are simultaneous, when you say that being thirsty, you drink? For are they not simultaneous, and do they not affect at the same time the same part, whether of the soul or the body? — which of them is affected cannot be supposed to be of any consequence: Is not this true?

CALLICLES: It is.

SOCRATES: You said also, that no man could have good and evil fortune at the same time?

CALLICLES: Yes, I did.

SOCRATES: But you admitted, that when in pain a man might also have pleasure?

CALLICLES: Clearly.

SOCRATES: Then pleasure is not the same as good fortune, or pain the same as evil fortune, and therefore the good is not the same as the

pleasant?

CALLICLES: I wish I knew, Socrates, what your quibbling means.

SOCRATES: You know, Callicles, but you affect not to know.

CALLICLES: Well, get on, and don't keep fooling: then you will know what a wiseacre you are in your admonition of me.

SOCRATES: Does not a man cease from his thirst and from his pleasure in drinking at the same time?

CALLICLES: I do not understand what you are saying.

GORGIAS: Nay, Callicles, answer, if only for our sakes; — we should like to hear the argument out.

CALLICLES: Yes, Gorgias, but I must complain of the habitual trifling of Socrates; he is always arguing about little and unworthy questions.

GORGIAS: What matter? Your reputation, Callicles, is not at stake. Let Socrates argue in his own fashion.

CALLICLES: Well, then, Socrates, you shall ask these little peddling questions, since Gorgias wishes to have them.

SOCRATES: I envy you, Callicles, for having been initiated into the great mysteries before you were initiated into the lesser. I thought that this was not allowable. But to return to our argument: — Does not a man cease from thirsting and from the pleasure of drinking at the same moment?

CALLICLES: True.

SOCRATES: And if he is hungry, or has any other desire, does he not cease from the desire and the pleasure at the same moment?

CALLICLES: Very true.

SOCRATES: Then he ceases from pain and pleasure at the same moment?

CALLICLES: Yes.

SOCRATES: But he does not cease from good and evil at the same moment, as you have admitted: do you still adhere to what you said?

CALLICLES: Yes, I do; but what is the inference?

SOCRATES: Why, my friend, the inference is that the good is not the same as the pleasant, or the evil the same as the painful; there is a cessation of pleasure and pain at the same moment; but not of good and evil, for they are different. How then can pleasure be the same as good, or pain as evil? And I would have you look at the matter in another light, which could hardly, I think, have been considered by you when you identified them: Are not the good good because they have good present with them, as the beautiful are those who have beauty present with them?

CALLICLES: Yes.

SOCRATES: And do you call the fools and cowards good men? For you were saying just now that the courageous and the wise are the good — would you not say so?

CALLICLES: Certainly.

SOCRATES: And did you never see a foolish child rejoicing?

CALLICLES: Yes, I have.

SOCRATES: And a foolish man too?

CALLICLES: Yes, certainly; but what is your drift?

SOCRATES: Nothing particular, if you will only answer.

CALLICLES: Yes, I have.

SOCRATES: And did you ever see a sensible man rejoicing or sorrowing?

CALLICLES: Yes.

SOCRATES: Which rejoice and sorrow most — the wise or the foolish?

CALLICLES: They are much upon a par, I think, in that respect.

SOCRATES: Enough: And did you ever see a coward in battle?

CALLICLES: To be sure.

SOCRATES: And which rejoiced most at the departure of the enemy, the coward or the brave?

CALLICLES: I should say ‘most’ of both; or at any rate, they rejoiced about equally.

SOCRATES: No matter; then the cowards, and not only the brave, rejoice?

CALLICLES: Greatly.

SOCRATES: And the foolish; so it would seem?

CALLICLES: Yes.

SOCRATES: And are only the cowards pained at the approach of their enemies, or are the brave also pained?

CALLICLES: Both are pained.

SOCRATES: And are they equally pained?

CALLICLES: I should imagine that the cowards are more pained.

SOCRATES: And are they not better pleased at the enemy’s departure?

CALLICLES: I dare say.

SOCRATES: Then are the foolish and the wise and the cowards and the brave all pleased and pained, as you were saying, in nearly equal degree; but are the cowards more pleased and pained than the brave?

CALLICLES: Yes.

SOCRATES: But surely the wise and brave are the good, and the foolish and the cowardly are the bad?

CALLICLES: Yes.

SOCRATES: Then the good and the bad are pleased and pained in a nearly equal degree?

CALLICLES: Yes.

SOCRATES: Then are the good and bad good and bad in a nearly equal degree, or have the bad the advantage both in good and evil? (i.e. in having more pleasure and more pain.)

CALLICLES: I really do not know what you mean.

SOCRATES: Why, do you not remember saying that the good were good because good was present with them, and the evil because evil; and that pleasures were goods and pains evils?

CALLICLES: Yes, I remember.

SOCRATES: And are not these pleasures or goods present to those who rejoice — if they do rejoice?

CALLICLES: Certainly.

SOCRATES: Then those who rejoice are good when goods are present with them?

CALLICLES: Yes.

SOCRATES: And those who are in pain have evil or sorrow present with them?

CALLICLES: Yes.

SOCRATES: And would you still say that the evil are evil by reason of the presence of evil?

CALLICLES: I should.

SOCRATES: Then those who rejoice are good, and those who are in

pain evil?

CALLICLES: Yes.

SOCRATES: The degrees of good and evil vary with the degrees of pleasure and of pain?

CALLICLES: Yes.

SOCRATES: Have the wise man and the fool, the brave and the coward, joy and pain in nearly equal degrees? or would you say that the coward has more?

CALLICLES: I should say that he has.

SOCRATES: Help me then to draw out the conclusion which follows from our admissions; for it is good to repeat and review what is good twice and thrice over, as they say. Both the wise man and the brave man we allow to be good?

CALLICLES: Yes.

SOCRATES: And the foolish man and the coward to be evil?

CALLICLES: Certainly.

SOCRATES: And he who has joy is good?

CALLICLES: Yes.

SOCRATES: And he who is in pain is evil?

CALLICLES: Certainly.

SOCRATES: The good and evil both have joy and pain, but, perhaps, the evil has more of them?

CALLICLES: Yes.

SOCRATES: Then must we not infer, that the bad man is as good and bad as the good, or, perhaps, even better? — is not this a further inference which follows equally with the preceding from the assertion that the good and the pleasant are the same: — can this be

denied, Callicles?

CALLICLES: I have been listening and making admissions to you, Socrates; and I remark that if a person grants you anything in play, you, like a child, want to keep hold and will not give it back. But do you really suppose that I or any other human being denies that some pleasures are good and others bad?

SOCRATES: Alas, Callicles, how unfair you are! you certainly treat me as if I were a child, sometimes saying one thing, and then another, as if you were meaning to deceive me. And yet I thought at first that you were my friend, and would not have deceived me if you could have helped. But I see that I was mistaken; and now I suppose that I must make the best of a bad business, as they said of old, and take what I can get out of you. — Well, then, as I understand you to say, I may assume that some pleasures are good and others evil?

CALLICLES: Yes.

SOCRATES: The beneficial are good, and the hurtful are evil?

CALLICLES: To be sure.

SOCRATES: And the beneficial are those which do some good, and the hurtful are those which do some evil?

CALLICLES: Yes.

SOCRATES: Take, for example, the bodily pleasures of eating and drinking, which we were just now mentioning — you mean to say that those which promote health, or any other bodily excellence, are good, and their opposites evil?

CALLICLES: Certainly.

SOCRATES: And in the same way there are good pains and there are evil pains?

CALLICLES: To be sure.

SOCRATES: And ought we not to choose and use the good pleasures

and pains?

CALLICLES: Certainly.

SOCRATES: But not the evil?

CALLICLES: Clearly.

SOCRATES: Because, if you remember, Polus and I have agreed that all our actions are to be done for the sake of the good; — and will you agree with us in saying, that the good is the end of all our actions, and that all our actions are to be done for the sake of the good, and not the good for the sake of them? — will you add a third vote to our two?

CALLICLES: I will.

SOCRATES: Then pleasure, like everything else, is to be sought for the sake of that which is good, and not that which is good for the sake of pleasure?

CALLICLES: To be sure.

SOCRATES: But can every man choose what pleasures are good and what are evil, or must he have art or knowledge of them in detail?

CALLICLES: He must have art.

SOCRATES: Let me now remind you of what I was saying to Gorgias and Polus; I was saying, as you will not have forgotten, that there were some processes which aim only at pleasure, and know nothing of a better and worse, and there are other processes which know good and evil. And I considered that cookery, which I do not call an art, but only an experience, was of the former class, which is concerned with pleasure, and that the art of medicine was of the class which is concerned with the good. And now, by the god of friendship, I must beg you, Callicles, not to jest, or to imagine that I am jesting with you; do not answer at random and contrary to your real opinion — for you will observe that we are arguing about the way of human life; and to a man who has any sense at all, what

question can be more serious than this? — whether he should follow after that way of life to which you exhort me, and act what you call the manly part of speaking in the assembly, and cultivating rhetoric, and engaging in public affairs, according to the principles now in vogue; or whether he should pursue the life of philosophy; — and in what the latter way differs from the former. But perhaps we had better first try to distinguish them, as I did before, and when we have come to an agreement that they are distinct, we may proceed to consider in what they differ from one another, and which of them we should choose. Perhaps, however, you do not even now understand what I mean?

CALLICLES: No, I do not.

SOCRATES: Then I will explain myself more clearly: seeing that you and I have agreed that there is such a thing as good, and that there is such a thing as pleasure, and that pleasure is not the same as good, and that the pursuit and process of acquisition of the one, that is pleasure, is different from the pursuit and process of acquisition of the other, which is good — I wish that you would tell me whether you agree with me thus far or not — do you agree?

CALLICLES: I do.

SOCRATES: Then I will proceed, and ask whether you also agree with me, and whether you think that I spoke the truth when I further said to Gorgias and Polus that cookery in my opinion is only an experience, and not an art at all; and that whereas medicine is an art, and attends to the nature and constitution of the patient, and has principles of action and reason in each case, cookery in attending upon pleasure never regards either the nature or reason of that pleasure to which she devotes herself, but goes straight to her end, nor ever considers or calculates anything, but works by experience and routine, and just preserves the recollection of what she has usually done when producing pleasure. And first, I would have you consider whether I have proved what I was saying, and then whether there are not other similar processes which have to do with the soul — some of them processes of art, making a provision for the soul's

highest interest — others despising the interest, and, as in the previous case, considering only the pleasure of the soul, and how this may be acquired, but not considering what pleasures are good or bad, and having no other aim but to afford gratification, whether good or bad. In my opinion, Callicles, there are such processes, and this is the sort of thing which I term flattery, whether concerned with the body or the soul, or whenever employed with a view to pleasure and without any consideration of good and evil. And now I wish that you would tell me whether you agree with us in this notion, or whether you differ.

CALLICLES: I do not differ; on the contrary, I agree; for in that way I shall soonest bring the argument to an end, and shall oblige my friend Gorgias.

SOCRATES: And is this notion true of one soul, or of two or more?

CALLICLES: Equally true of two or more.

SOCRATES: Then a man may delight a whole assembly, and yet have no regard for their true interests?

CALLICLES: Yes.

SOCRATES: Can you tell me the pursuits which delight mankind — or rather, if you would prefer, let me ask, and do you answer, which of them belong to the pleasurable class, and which of them not? In the first place, what say you of flute-playing? Does not that appear to be an art which seeks only pleasure, Callicles, and thinks of nothing else?

CALLICLES: I assent.

SOCRATES: And is not the same true of all similar arts, as, for example, the art of playing the lyre at festivals?

CALLICLES: Yes.

SOCRATES: And what do you say of the choral art and of dithyrambic poetry? — are not they of the same nature? Do you

imagine that Cinesias the son of Meles cares about what will tend to the moral improvement of his hearers, or about what will give pleasure to the multitude?

CALLICLES: There can be no mistake about Cinesias, Socrates.

SOCRATES: And what do you say of his father, Meles the harp-player? Did he perform with any view to the good of his hearers? Could he be said to regard even their pleasure? For his singing was an infliction to his audience. And of harp-playing and dithyrambic poetry in general, what would you say? Have they not been invented wholly for the sake of pleasure?

CALLICLES: That is my notion of them.

SOCRATES: And as for the Muse of Tragedy, that solemn and august personage — what are her aspirations? Is all her aim and desire only to give pleasure to the spectators, or does she fight against them and refuse to speak of their pleasant vices, and willingly proclaim in word and song truths welcome and unwelcome? — which in your judgment is her character?

CALLICLES: There can be no doubt, Socrates, that Tragedy has her face turned towards pleasure and the gratification of the audience.

SOCRATES: And is not that the sort of thing, Callicles, which we were just now describing as flattery?

CALLICLES: Quite true.

SOCRATES: Well now, suppose that we strip all poetry of song and rhythm and metre, there will remain speech? (Compare Republic.)

CALLICLES: To be sure.

SOCRATES: And this speech is addressed to a crowd of people?

CALLICLES: Yes.

SOCRATES: Then poetry is a sort of rhetoric?

CALLICLES: True.

SOCRATES: And do not the poets in the theatres seem to you to be rhetoricians?

CALLICLES: Yes.

SOCRATES: Then now we have discovered a sort of rhetoric which is addressed to a crowd of men, women, and children, freemen and slaves. And this is not much to our taste, for we have described it as having the nature of flattery.

CALLICLES: Quite true.

SOCRATES: Very good. And what do you say of that other rhetoric which addresses the Athenian assembly and the assemblies of freemen in other states? Do the rhetoricians appear to you always to aim at what is best, and do they seek to improve the citizens by their speeches, or are they too, like the rest of mankind, bent upon giving them pleasure, forgetting the public good in the thought of their own interest, playing with the people as with children, and trying to amuse them, but never considering whether they are better or worse for this?

CALLICLES: I must distinguish. There are some who have a real care of the public in what they say, while others are such as you describe.

SOCRATES: I am contented with the admission that rhetoric is of two sorts; one, which is mere flattery and disgraceful declamation; the other, which is noble and aims at the training and improvement of the souls of the citizens, and strives to say what is best, whether welcome or unwelcome, to the audience; but have you ever known such a rhetoric; or if you have, and can point out any rhetorician who is of this stamp, who is he?

CALLICLES: But, indeed, I am afraid that I cannot tell you of any such among the orators who are at present living.

SOCRATES: Well, then, can you mention any one of a former

generation, who may be said to have improved the Athenians, who found them worse and made them better, from the day that he began to make speeches? for, indeed, I do not know of such a man.

CALLICLES: What! did you never hear that Themistocles was a good man, and Cimon and Miltiades and Pericles, who is just lately dead, and whom you heard yourself?

SOCRATES: Yes, Callicles, they were good men, if, as you said at first, true virtue consists only in the satisfaction of our own desires and those of others; but if not, and if, as we were afterwards compelled to acknowledge, the satisfaction of some desires makes us better, and of others, worse, and we ought to gratify the one and not the other, and there is an art in distinguishing them, — can you tell me of any of these statesmen who did distinguish them?

CALLICLES: No, indeed, I cannot.

SOCRATES: Yet, surely, Callicles, if you look you will find such a one. Suppose that we just calmly consider whether any of these was such as I have described. Will not the good man, who says whatever he says with a view to the best, speak with a reference to some standard and not at random; just as all other artists, whether the painter, the builder, the shipwright, or any other look all of them to their own work, and do not select and apply at random what they apply, but strive to give a definite form to it? The artist disposes all things in order, and compels the one part to harmonize and accord with the other part, until he has constructed a regular and systematic whole; and this is true of all artists, and in the same way the trainers and physicians, of whom we spoke before, give order and regularity to the body: do you deny this?

CALLICLES: No; I am ready to admit it.

SOCRATES: Then the house in which order and regularity prevail is good; that in which there is disorder, evil?

CALLICLES: Yes.

SOCRATES: And the same is true of a ship?

CALLICLES: Yes.

SOCRATES: And the same may be said of the human body?

CALLICLES: Yes.

SOCRATES: And what would you say of the soul? Will the good soul be that in which disorder is prevalent, or that in which there is harmony and order?

CALLICLES: The latter follows from our previous admissions.

SOCRATES: What is the name which is given to the effect of harmony and order in the body?

CALLICLES: I suppose that you mean health and strength?

SOCRATES: Yes, I do; and what is the name which you would give to the effect of harmony and order in the soul? Try and discover a name for this as well as for the other.

CALLICLES: Why not give the name yourself, Socrates?

SOCRATES: Well, if you had rather that I should, I will; and you shall say whether you agree with me, and if not, you shall refute and answer me. 'Healthy,' as I conceive, is the name which is given to the regular order of the body, whence comes health and every other bodily excellence: is that true or not?

CALLICLES: True.

SOCRATES: And 'lawful' and 'law' are the names which are given to the regular order and action of the soul, and these make men lawful and orderly: — and so we have temperance and justice: have we not?

CALLICLES: Granted.

SOCRATES: And will not the true rhetorician who is honest and understands his art have his eye fixed upon these, in all the words which he addresses to the souls of men, and in all his actions, both in

what he gives and in what he takes away? Will not his aim be to implant justice in the souls of his citizens and take away injustice, to implant temperance and take away intemperance, to implant every virtue and take away every vice? Do you not agree?

CALLICLES: I agree.

SOCRATES: For what use is there, Callicles, in giving to the body of a sick man who is in a bad state of health a quantity of the most delightful food or drink or any other pleasant thing, which may be really as bad for him as if you gave him nothing, or even worse if rightly estimated. Is not that true?

CALLICLES: I will not say No to it.

SOCRATES: For in my opinion there is no profit in a man's life if his body is in an evil plight — in that case his life also is evil: am I not right?

CALLICLES: Yes.

SOCRATES: When a man is in health the physicians will generally allow him to eat when he is hungry and drink when he is thirsty, and to satisfy his desires as he likes, but when he is sick they hardly suffer him to satisfy his desires at all: even you will admit that?

CALLICLES: Yes.

SOCRATES: And does not the same argument hold of the soul, my good sir? While she is in a bad state and is senseless and intemperate and unjust and unholy, her desires ought to be controlled, and she ought to be prevented from doing anything which does not tend to her own improvement.

CALLICLES: Yes.

SOCRATES: Such treatment will be better for the soul herself?

CALLICLES: To be sure.

SOCRATES: And to restrain her from her appetites is to chastise

her?

CALLICLES: Yes.

SOCRATES: Then restraint or chastisement is better for the soul than intemperance or the absence of control, which you were just now preferring?

CALLICLES: I do not understand you, Socrates, and I wish that you would ask some one who does.

SOCRATES: Here is a gentleman who cannot endure to be improved or to subject himself to that very chastisement of which the argument speaks!

CALLICLES: I do not heed a word of what you are saying, and have only answered hitherto out of civility to Gorgias.

SOCRATES: What are we to do, then? Shall we break off in the middle?

CALLICLES: You shall judge for yourself.

SOCRATES: Well, but people say that ‘a tale should have a head and not break off in the middle,’ and I should not like to have the argument going about without a head (compare Laws); please then to go on a little longer, and put the head on.

CALLICLES: How tyrannical you are, Socrates! I wish that you and your argument would rest, or that you would get some one else to argue with you.

SOCRATES: But who else is willing? — I want to finish the argument.

CALLICLES: Cannot you finish without my help, either talking straight on, or questioning and answering yourself?

SOCRATES: Must I then say with Epicharmus, ‘Two men spoke before, but now one shall be enough’? I suppose that there is absolutely no help. And if I am to carry on the enquiry by myself, I

will first of all remark that not only I but all of us should have an ambition to know what is true and what is false in this matter, for the discovery of the truth is a common good. And now I will proceed to argue according to my own notion. But if any of you think that I arrive at conclusions which are untrue you must interpose and refute me, for I do not speak from any knowledge of what I am saying; I am an enquirer like yourselves, and therefore, if my opponent says anything which is of force, I shall be the first to agree with him. I am speaking on the supposition that the argument ought to be completed; but if you think otherwise let us leave off and go our ways.

GORGIAS: I think, Socrates, that we should not go our ways until you have completed the argument; and this appears to me to be the wish of the rest of the company; I myself should very much like to hear what more you have to say.

SOCRATES: I too, Gorgias, should have liked to continue the argument with Callicles, and then I might have given him an 'Amphion' in return for his 'Zethus'; but since you, Callicles, are unwilling to continue, I hope that you will listen, and interrupt me if I seem to you to be in error. And if you refute me, I shall not be angry with you as you are with me, but I shall inscribe you as the greatest of benefactors on the tablets of my soul.

CALLICLES: My good fellow, never mind me, but get on.

SOCRATES: Listen to me, then, while I recapitulate the argument: — Is the pleasant the same as the good? Not the same. Callicles and I are agreed about that. And is the pleasant to be pursued for the sake of the good? or the good for the sake of the pleasant? The pleasant is to be pursued for the sake of the good. And that is pleasant at the presence of which we are pleased, and that is good at the presence of which we are good? To be sure. And we are good, and all good things whatever are good when some virtue is present in us or them? That, Callicles, is my conviction. But the virtue of each thing, whether body or soul, instrument or creature, when given to them in the best way comes to them not by chance but as the result of the order and truth and art which are imparted to them: Am I not right? I

maintain that I am. And is not the virtue of each thing dependent on order or arrangement? Yes, I say. And that which makes a thing good is the proper order inhering in each thing? Such is my view. And is not the soul which has an order of her own better than that which has no order? Certainly. And the soul which has order is orderly? Of course. And that which is orderly is temperate? Assuredly. And the temperate soul is good? No other answer can I give, Callicles dear; have you any?

CALLICLES: Go on, my good fellow.

SOCRATES: Then I shall proceed to add, that if the temperate soul is the good soul, the soul which is in the opposite condition, that is, the foolish and intemperate, is the bad soul. Very true.

And will not the temperate man do what is proper, both in relation to the gods and to men; — for he would not be temperate if he did not? Certainly he will do what is proper. In his relation to other men he will do what is just; and in his relation to the gods he will do what is holy; and he who does what is just and holy must be just and holy? Very true. And must he not be courageous? for the duty of a temperate man is not to follow or to avoid what he ought not, but what he ought, whether things or men or pleasures or pains, and patiently to endure when he ought; and therefore, Callicles, the temperate man, being, as we have described, also just and courageous and holy, cannot be other than a perfectly good man, nor can the good man do otherwise than well and perfectly whatever he does; and he who does well must of necessity be happy and blessed, and the evil man who does evil, miserable: now this latter is he whom you were applauding — the intemperate who is the opposite of the temperate. Such is my position, and these things I affirm to be true. And if they are true, then I further affirm that he who desires to be happy must pursue and practise temperance and run away from intemperance as fast as his legs will carry him: he had better order his life so as not to need punishment; but if either he or any of his friends, whether private individual or city, are in need of punishment, then justice must be done and he must suffer punishment, if he would be happy. This appears to me to be the aim which a man ought to

have, and towards which he ought to direct all the energies both of himself and of the state, acting so that he may have temperance and justice present with him and be happy, not suffering his lusts to be unrestrained, and in the never-ending desire satisfy them leading a robber's life. Such a one is the friend neither of God nor man, for he is incapable of communion, and he who is incapable of communion is also incapable of friendship. And philosophers tell us, Callicles, that communion and friendship and orderliness and temperance and justice bind together heaven and earth and gods and men, and that this universe is therefore called Cosmos or order, not disorder or misrule, my friend. But although you are a philosopher you seem to me never to have observed that geometrical equality is mighty, both among gods and men; you think that you ought to cultivate inequality or excess, and do not care about geometry. — Well, then, either the principle that the happy are made happy by the possession of justice and temperance, and the miserable miserable by the possession of vice, must be refuted, or, if it is granted, what will be the consequences? All the consequences which I drew before, Callicles, and about which you asked me whether I was in earnest when I said that a man ought to accuse himself and his son and his friend if he did anything wrong, and that to this end he should use his rhetoric — all those consequences are true. And that which you thought that Polus was led to admit out of modesty is true, viz., that, to do injustice, if more disgraceful than to suffer, is in that degree worse; and the other position, which, according to Polus, Gorgias admitted out of modesty, that he who would truly be a rhetorician ought to be just and have a knowledge of justice, has also turned out to be true.

And now, these things being as we have said, let us proceed in the next place to consider whether you are right in throwing in my teeth that I am unable to help myself or any of my friends or kinsmen, or to save them in the extremity of danger, and that I am in the power of another like an outlaw to whom any one may do what he likes, — he may box my ears, which was a brave saying of yours; or take away my goods or banish me, or even do his worst and kill me; a condition which, as you say, is the height of disgrace. My answer to you is one

which has been already often repeated, but may as well be repeated once more. I tell you, Callicles, that to be boxed on the ears wrongfully is not the worst evil which can befall a man, nor to have my purse or my body cut open, but that to smite and slay me and mine wrongfully is far more disgraceful and more evil; aye, and to despoil and enslave and pillage, or in any way at all to wrong me and mine, is far more disgraceful and evil to the doer of the wrong than to me who am the sufferer. These truths, which have been already set forth as I state them in the previous discussion, would seem now to have been fixed and riveted by us, if I may use an expression which is certainly bold, in words which are like bonds of iron and adamant; and unless you or some other still more enterprising hero shall break them, there is no possibility of denying what I say. For my position has always been, that I myself am ignorant how these things are, but that I have never met any one who could say otherwise, any more than you can, and not appear ridiculous. This is my position still, and if what I am saying is true, and injustice is the greatest of evils to the doer of injustice, and yet there is if possible a greater than this greatest of evils (compare Republic), in an unjust man not suffering retribution, what is that defence of which the want will make a man truly ridiculous? Must not the defence be one which will avert the greatest of human evils? And will not the worst of all defences be that with which a man is unable to defend himself or his family or his friends? — and next will come that which is unable to avert the next greatest evil; thirdly that which is unable to avert the third greatest evil; and so of other evils. As is the greatness of evil so is the honour of being able to avert them in their several degrees, and the disgrace of not being able to avert them. Am I not right Callicles?

CALLICLES: Yes, quite right.

SOCRATES: Seeing then that there are these two evils, the doing injustice and the suffering injustice — and we affirm that to do injustice is a greater, and to suffer injustice a lesser evil — by what devices can a man succeed in obtaining the two advantages, the one of not doing and the other of not suffering injustice? must he have the power, or only the will to obtain them? I mean to ask whether a

man will escape injustice if he has only the will to escape, or must he have provided himself with the power?

CALLICLES: He must have provided himself with the power; that is clear.

SOCRATES: And what do you say of doing injustice? Is the will only sufficient, and will that prevent him from doing injustice, or must he have provided himself with power and art; and if he have not studied and practised, will he be unjust still? Surely you might say, Callicles, whether you think that Polus and I were right in admitting the conclusion that no one does wrong voluntarily, but that all do wrong against their will?

CALLICLES: Granted, Socrates, if you will only have done.

SOCRATES: Then, as would appear, power and art have to be provided in order that we may do no injustice?

CALLICLES: Certainly.

SOCRATES: And what art will protect us from suffering injustice, if not wholly, yet as far as possible? I want to know whether you agree with me; for I think that such an art is the art of one who is either a ruler or even tyrant himself, or the equal and companion of the ruling power.

CALLICLES: Well said, Socrates; and please to observe how ready I am to praise you when you talk sense.

SOCRATES: Think and tell me whether you would approve of another view of mine: To me every man appears to be most the friend of him who is most like to him — like to like, as ancient sages say: Would you not agree to this?

CALLICLES: I should.

SOCRATES: But when the tyrant is rude and uneducated, he may be expected to fear any one who is his superior in virtue, and will never be able to be perfectly friendly with him.

CALLICLES: That is true.

SOCRATES: Neither will he be the friend of any one who is greatly his inferior, for the tyrant will despise him, and will never seriously regard him as a friend.

CALLICLES: That again is true.

SOCRATES: Then the only friend worth mentioning, whom the tyrant can have, will be one who is of the same character, and has the same likes and dislikes, and is at the same time willing to be subject and subservient to him; he is the man who will have power in the state, and no one will injure him with impunity: — is not that so?

CALLICLES: Yes.

SOCRATES: And if a young man begins to ask how he may become great and formidable, this would seem to be the way — he will accustom himself, from his youth upward, to feel sorrow and joy on the same occasions as his master, and will contrive to be as like him as possible?

CALLICLES: Yes.

SOCRATES: And in this way he will have accomplished, as you and your friends would say, the end of becoming a great man and not suffering injury?

CALLICLES: Very true.

SOCRATES: But will he also escape from doing injury? Must not the very opposite be true, — if he is to be like the tyrant in his injustice, and to have influence with him? Will he not rather contrive to do as much wrong as possible, and not be punished?

CALLICLES: True.

SOCRATES: And by the imitation of his master and by the power which he thus acquires will not his soul become bad and corrupted, and will not this be the greatest evil to him?

CALLICLES: You always contrive somehow or other, Socrates, to invert everything: do you not know that he who imitates the tyrant will, if he has a mind, kill him who does not imitate him and take away his goods?

SOCRATES: Excellent Callicles, I am not deaf, and I have heard that a great many times from you and from Polus and from nearly every man in the city, but I wish that you would hear me too. I dare say that he will kill him if he has a mind — the bad man will kill the good and true.

CALLICLES: And is not that just the provoking thing?

SOCRATES: Nay, not to a man of sense, as the argument shows: do you think that all our cares should be directed to prolonging life to the uttermost, and to the study of those arts which secure us from danger always; like that art of rhetoric which saves men in courts of law, and which you advise me to cultivate?

CALLICLES: Yes, truly, and very good advice too.

SOCRATES: Well, my friend, but what do you think of swimming; is that an art of any great pretensions?

CALLICLES: No, indeed.

SOCRATES: And yet surely swimming saves a man from death, and there are occasions on which he must know how to swim. And if you despise the swimmers, I will tell you of another and greater art, the art of the pilot, who not only saves the souls of men, but also their bodies and properties from the extremity of danger, just like rhetoric. Yet his art is modest and unpretending: it has no airs or pretences of doing anything extraordinary, and, in return for the same salvation which is given by the pleader, demands only two obols, if he brings us from Aegina to Athens, or for the longer voyage from Pontus or Egypt, at the utmost two drachmae, when he has saved, as I was just now saying, the passenger and his wife and children and goods, and safely disembarked them at the Piraeus, — this is the payment which he asks in return for so great a boon; and he who is the master of the

art, and has done all this, gets out and walks about on the sea-shore by his ship in an unassuming way. For he is able to reflect and is aware that he cannot tell which of his fellow-passengers he has benefited, and which of them he has injured in not allowing them to be drowned. He knows that they are just the same when he has disembarked them as when they embarked, and not a whit better either in their bodies or in their souls; and he considers that if a man who is afflicted by great and incurable bodily diseases is only to be pitied for having escaped, and is in no way benefited by him in having been saved from drowning, much less he who has great and incurable diseases, not of the body, but of the soul, which is the more valuable part of him; neither is life worth having nor of any profit to the bad man, whether he be delivered from the sea, or the law-courts, or any other devourer; — and so he reflects that such a one had better not live, for he cannot live well. (Compare Republic.)

And this is the reason why the pilot, although he is our saviour, is not usually conceited, any more than the engineer, who is not at all behind either the general, or the pilot, or any one else, in his saving power, for he sometimes saves whole cities. Is there any comparison between him and the pleader? And if he were to talk, Callicles, in your grandiose style, he would bury you under a mountain of words, declaring and insisting that we ought all of us to be engine-makers, and that no other profession is worth thinking about; he would have plenty to say. Nevertheless you despise him and his art, and sneeringly call him an engine-maker, and you will not allow your daughters to marry his son, or marry your son to his daughters. And yet, on your principle, what justice or reason is there in your refusal? What right have you to despise the engine-maker, and the others whom I was just now mentioning? I know that you will say, 'I am better, and better born.' But if the better is not what I say, and virtue consists only in a man saving himself and his, whatever may be his character, then your censure of the engine-maker, and of the physician, and of the other arts of salvation, is ridiculous. O my friend! I want you to see that the noble and the good may possibly be something different from saving and being saved: — May not he who is truly a man cease to care about living a certain time? — he

knows, as women say, that no man can escape fate, and therefore he is not fond of life; he leaves all that with God, and considers in what way he can best spend his appointed term; — whether by assimilating himself to the constitution under which he lives, as you at this moment have to consider how you may become as like as possible to the Athenian people, if you mean to be in their good graces, and to have power in the state; whereas I want you to think and see whether this is for the interest of either of us; — I would not have us risk that which is dearest on the acquisition of this power, like the Thessalian enchantresses, who, as they say, bring down the moon from heaven at the risk of their own perdition. But if you suppose that any man will show you the art of becoming great in the city, and yet not conforming yourself to the ways of the city, whether for better or worse, then I can only say that you are mistaken, Callides; for he who would deserve to be the true natural friend of the Athenian Demus, aye, or of Pyrilampes' darling who is called after them, must be by nature like them, and not an imitator only. He, then, who will make you most like them, will make you as you desire, a statesman and orator: for every man is pleased when he is spoken to in his own language and spirit, and dislikes any other. But perhaps you, sweet Callicles, may be of another mind. What do you say?

CALLICLES: Somehow or other your words, Socrates, always appear to me to be good words; and yet, like the rest of the world, I am not quite convinced by them. (Compare Symp.: 1 Alcib.)

SOCRATES: The reason is, Callicles, that the love of Demus which abides in your soul is an adversary to me; but I dare say that if we recur to these same matters, and consider them more thoroughly, you may be convinced for all that. Please, then, to remember that there are two processes of training all things, including body and soul; in the one, as we said, we treat them with a view to pleasure, and in the other with a view to the highest good, and then we do not indulge but resist them: was not that the distinction which we drew?

CALLICLES: Very true.

SOCRATES: And the one which had pleasure in view was just a vulgar flattery: — was not that another of our conclusions?

CALLICLES: Be it so, if you will have it.

SOCRATES: And the other had in view the greatest improvement of that which was ministered to, whether body or soul?

CALLICLES: Quite true.

SOCRATES: And must we not have the same end in view in the treatment of our city and citizens? Must we not try and make them as good as possible? For we have already discovered that there is no use in imparting to them any other good, unless the mind of those who are to have the good, whether money, or office, or any other sort of power, be gentle and good. Shall we say that?

CALLICLES: Yes, certainly, if you like.

SOCRATES: Well, then, if you and I, Callicles, were intending to set about some public business, and were advising one another to undertake buildings, such as walls, docks or temples of the largest size, ought we not to examine ourselves, first, as to whether we know or do not know the art of building, and who taught us? — would not that be necessary, Callicles?

CALLICLES: True.

SOCRATES: In the second place, we should have to consider whether we had ever constructed any private house, either of our own or for our friends, and whether this building of ours was a success or not; and if upon consideration we found that we had had good and eminent masters, and had been successful in constructing many fine buildings, not only with their assistance, but without them, by our own unaided skill — in that case prudence would not dissuade us from proceeding to the construction of public works. But if we had no master to show, and only a number of worthless buildings or none at all, then, surely, it would be ridiculous in us to attempt public works, or to advise one another to undertake them. Is not this true?

CALLICLES: Certainly.

SOCRATES: And does not the same hold in all other cases? If you and I were physicians, and were advising one another that we were competent to practise as state-physicians, should I not ask about you, and would you not ask about me, Well, but how about Socrates himself, has he good health? and was any one else ever known to be cured by him, whether slave or freeman? And I should make the same enquiries about you. And if we arrived at the conclusion that no one, whether citizen or stranger, man or woman, had ever been any the better for the medical skill of either of us, then, by Heaven, Callicles, what an absurdity to think that we or any human being should be so silly as to set up as state-physicians and advise others like ourselves to do the same, without having first practised in private, whether successfully or not, and acquired experience of the art! Is not this, as they say, to begin with the big jar when you are learning the potter's art; which is a foolish thing?

CALLICLES: True.

SOCRATES: And now, my friend, as you are already beginning to be a public character, and are admonishing and reproaching me for not being one, suppose that we ask a few questions of one another. Tell me, then, Callicles, how about making any of the citizens better? Was there ever a man who was once vicious, or unjust, or intemperate, or foolish, and became by the help of Callicles good and noble? Was there ever such a man, whether citizen or stranger, slave or freeman? Tell me, Callicles, if a person were to ask these questions of you, what would you answer? Whom would you say that you had improved by your conversation? There may have been good deeds of this sort which were done by you as a private person, before you came forward in public. Why will you not answer?

CALLICLES: You are contentious, Socrates.

SOCRATES: Nay, I ask you, not from a love of contention, but because I really want to know in what way you think that affairs should be administered among us — whether, when you come to the

administration of them, you have any other aim but the improvement of the citizens? Have we not already admitted many times over that such is the duty of a public man? Nay, we have surely said so; for if you will not answer for yourself I must answer for you. But if this is what the good man ought to effect for the benefit of his own state, allow me to recall to you the names of those whom you were just now mentioning, Pericles, and Cimon, and Miltiades, and Themistocles, and ask whether you still think that they were good citizens.

CALLICLES: I do.

SOCRATES: But if they were good, then clearly each of them must have made the citizens better instead of worse?

CALLICLES: Yes.

SOCRATES: And, therefore, when Pericles first began to speak in the assembly, the Athenians were not so good as when he spoke last?

CALLICLES: Very likely.

SOCRATES: Nay, my friend, 'likely' is not the word; for if he was a good citizen, the inference is certain.

CALLICLES: And what difference does that make?

SOCRATES: None; only I should like further to know whether the Athenians are supposed to have been made better by Pericles, or, on the contrary, to have been corrupted by him; for I hear that he was the first who gave the people pay, and made them idle and cowardly, and encouraged them in the love of talk and money.

CALLICLES: You heard that, Socrates, from the laconising set who bruise their ears.

SOCRATES: But what I am going to tell you now is not mere hearsay, but well known both to you and me: that at first, Pericles was glorious and his character unimpeached by any verdict of the Athenians — this was during the time when they were not so good

— yet afterwards, when they had been made good and gentle by him, at the very end of his life they convicted him of theft, and almost put him to death, clearly under the notion that he was a malefactor.

CALLICLES: Well, but how does that prove Pericles' badness?

SOCRATES: Why, surely you would say that he was a bad manager of asses or horses or oxen, who had received them originally neither kicking nor butting nor biting him, and implanted in them all these savage tricks? Would he not be a bad manager of any animals who received them gentle, and made them fiercer than they were when he received them? What do you say?

CALLICLES: I will do you the favour of saying 'yes.'

SOCRATES: And will you also do me the favour of saying whether man is an animal?

CALLICLES: Certainly he is.

SOCRATES: And was not Pericles a shepherd of men?

CALLICLES: Yes.

SOCRATES: And if he was a good political shepherd, ought not the animals who were his subjects, as we were just now acknowledging, to have become more just, and not more unjust?

CALLICLES: Quite true.

SOCRATES: And are not just men gentle, as Homer says? — or are you of another mind?

CALLICLES: I agree.

SOCRATES: And yet he really did make them more savage than he received them, and their savageness was shown towards himself; which he must have been very far from desiring.

CALLICLES: Do you want me to agree with you?

SOCRATES: Yes, if I seem to you to speak the truth.

CALLICLES: Granted then.

SOCRATES: And if they were more savage, must they not have been more unjust and inferior?

CALLICLES: Granted again.

SOCRATES: Then upon this view, Pericles was not a good statesman?

CALLICLES: That is, upon your view.

SOCRATES: Nay, the view is yours, after what you have admitted. Take the case of Cimon again. Did not the very persons whom he was serving ostracize him, in order that they might not hear his voice for ten years? and they did just the same to Themistocles, adding the penalty of exile; and they voted that Miltiades, the hero of Marathon, should be thrown into the pit of death, and he was only saved by the Prytanis. And yet, if they had been really good men, as you say, these things would never have happened to them. For the good charioteers are not those who at first keep their place, and then, when they have broken-in their horses, and themselves become better charioteers, are thrown out — that is not the way either in charioteering or in any profession. — What do you think?

CALLICLES: I should think not.

SOCRATES: Well, but if so, the truth is as I have said already, that in the Athenian State no one has ever shown himself to be a good statesman — you admitted that this was true of our present statesmen, but not true of former ones, and you preferred them to the others; yet they have turned out to be no better than our present ones; and therefore, if they were rhetoricians, they did not use the true art of rhetoric or of flattery, or they would not have fallen out of favour.

CALLICLES: But surely, Socrates, no living man ever came near any one of them in his performances.

SOCRATES: O, my dear friend, I say nothing against them regarded as the serving-men of the State; and I do think that they were

certainly more serviceable than those who are living now, and better able to gratify the wishes of the State; but as to transforming those desires and not allowing them to have their way, and using the powers which they had, whether of persuasion or of force, in the improvement of their fellow citizens, which is the prime object of the truly good citizen, I do not see that in these respects they were a whit superior to our present statesmen, although I do admit that they were more clever at providing ships and walls and docks, and all that. You and I have a ridiculous way, for during the whole time that we are arguing, we are always going round and round to the same point, and constantly misunderstanding one another. If I am not mistaken, you have admitted and acknowledged more than once, that there are two kinds of operations which have to do with the body, and two which have to do with the soul: one of the two is ministerial, and if our bodies are hungry provides food for them, and if they are thirsty gives them drink, or if they are cold supplies them with garments, blankets, shoes, and all that they crave. I use the same images as before intentionally, in order that you may understand me the better. The purveyor of the articles may provide them either wholesale or retail, or he may be the maker of any of them, — the baker, or the cook, or the weaver, or the shoemaker, or the currier; and in so doing, being such as he is, he is naturally supposed by himself and every one to minister to the body. For none of them know that there is another art — an art of gymnastic and medicine which is the true minister of the body, and ought to be the mistress of all the rest, and to use their results according to the knowledge which she has and they have not, of the real good or bad effects of meats and drinks on the body. All other arts which have to do with the body are servile and menial and illiberal; and gymnastic and medicine are, as they ought to be, their mistresses. Now, when I say that all this is equally true of the soul, you seem at first to know and understand and assent to my words, and then a little while afterwards you come repeating, Has not the State had good and noble citizens? and when I ask you who they are, you reply, seemingly quite in earnest, as if I had asked, Who are or have been good trainers? — and you had replied, Thearion, the baker, Mithoecus, who wrote the Sicilian cookery-book, Sarambus, the vintner: these are ministers of the body, first-

rate in their art; for the first makes admirable loaves, the second excellent dishes, and the third capital wine; — to me these appear to be the exact parallel of the statesmen whom you mention. Now you would not be altogether pleased if I said to you, My friend, you know nothing of gymnastics; those of whom you are speaking to me are only the ministers and purveyors of luxury, who have no good or noble notions of their art, and may very likely be filling and fattening men's bodies and gaining their approval, although the result is that they lose their original flesh in the long run, and become thinner than they were before; and yet they, in their simplicity, will not attribute their diseases and loss of flesh to their entertainers; but when in after years the unhealthy surfeit brings the attendant penalty of disease, he who happens to be near them at the time, and offers them advice, is accused and blamed by them, and if they could they would do him some harm; while they proceed to eulogize the men who have been the real authors of the mischief. And that, Callicles, is just what you are now doing. You praise the men who feasted the citizens and satisfied their desires, and people say that they have made the city great, not seeing that the swollen and ulcerated condition of the State is to be attributed to these elder statesmen; for they have filled the city full of harbours and docks and walls and revenues and all that, and have left no room for justice and temperance. And when the crisis of the disorder comes, the people will blame the advisers of the hour, and applaud Themistocles and Cimon and Pericles, who are the real authors of their calamities; and if you are not careful they may assail you and my friend Alcibiades, when they are losing not only their new acquisitions, but also their original possessions; not that you are the authors of these misfortunes of theirs, although you may perhaps be accessories to them. A great piece of work is always being made, as I see and am told, now as of old; about our statesmen. When the State treats any of them as malefactors, I observe that there is a great uproar and indignation at the supposed wrong which is done to them; 'after all their many services to the State, that they should unjustly perish,' — so the tale runs. But the cry is all a lie; for no statesman ever could be unjustly put to death by the city of which he is the head. The case of the professed statesman is, I believe, very much like that of the professed sophist; for the sophists, although

they are wise men, are nevertheless guilty of a strange piece of folly; professing to be teachers of virtue, they will often accuse their disciples of wronging them, and defrauding them of their pay, and showing no gratitude for their services. Yet what can be more absurd than that men who have become just and good, and whose injustice has been taken away from them, and who have had justice implanted in them by their teachers, should act unjustly by reason of the injustice which is not in them? Can anything be more irrational, my friends, than this? You, Callicles, compel me to be a mob-orator, because you will not answer.

CALLICLES: And you are the man who cannot speak unless there is some one to answer?

SOCRATES: I suppose that I can; just now, at any rate, the speeches which I am making are long enough because you refuse to answer me. But I adjure you by the god of friendship, my good sir, do tell me whether there does not appear to you to be a great inconsistency in saying that you have made a man good, and then blaming him for being bad?

CALLICLES: Yes, it appears so to me.

SOCRATES: Do you never hear our professors of education speaking in this inconsistent manner?

CALLICLES: Yes, but why talk of men who are good for nothing?

SOCRATES: I would rather say, why talk of men who profess to be rulers, and declare that they are devoted to the improvement of the city, and nevertheless upon occasion declaim against the utter vileness of the city: — do you think that there is any difference between one and the other? My good friend, the sophist and the rhetorician, as I was saying to Polus, are the same, or nearly the same; but you ignorantly fancy that rhetoric is a perfect thing, and sophistry a thing to be despised; whereas the truth is, that sophistry is as much superior to rhetoric as legislation is to the practice of law, or gymnastic to medicine. The orators and sophists, as I am inclined to think, are the only class who cannot complain of the mischief

ensuing to themselves from that which they teach others, without in the same breath accusing themselves of having done no good to those whom they profess to benefit. Is not this a fact?

CALLICLES: Certainly it is.

SOCRATES: If they were right in saying that they make men better, then they are the only class who can afford to leave their remuneration to those who have been benefited by them. Whereas if a man has been benefited in any other way, if, for example, he has been taught to run by a trainer, he might possibly defraud him of his pay, if the trainer left the matter to him, and made no agreement with him that he should receive money as soon as he had given him the utmost speed; for not because of any deficiency of speed do men act unjustly, but by reason of injustice.

CALLICLES: Very true.

SOCRATES: And he who removes injustice can be in no danger of being treated unjustly: he alone can safely leave the honorarium to his pupils, if he be really able to make them good — am I not right? (Compare Protag.)

CALLICLES: Yes.

SOCRATES: Then we have found the reason why there is no dishonour in a man receiving pay who is called in to advise about building or any other art?

CALLICLES: Yes, we have found the reason.

SOCRATES: But when the point is, how a man may become best himself, and best govern his family and state, then to say that you will give no advice gratis is held to be dishonourable?

CALLICLES: True.

SOCRATES: And why? Because only such benefits call forth a desire to requite them, and there is evidence that a benefit has been conferred when the benefactor receives a return; otherwise not. Is

this true?

CALLICLES: It is.

SOCRATES: Then to which service of the State do you invite me? determine for me. Am I to be the physician of the State who will strive and struggle to make the Athenians as good as possible; or am I to be the servant and flatterer of the State? Speak out, my good friend, freely and fairly as you did at first and ought to do again, and tell me your entire mind.

CALLICLES: I say then that you should be the servant of the State.

SOCRATES: The flatterer? well, sir, that is a noble invitation.

CALLICLES: The Mysian, Socrates, or what you please. For if you refuse, the consequences will be —

SOCRATES: Do not repeat the old story — that he who likes will kill me and get my money; for then I shall have to repeat the old answer, that he will be a bad man and will kill the good, and that the money will be of no use to him, but that he will wrongly use that which he wrongly took, and if wrongly, basely, and if basely, hurtfully.

CALLICLES: How confident you are, Socrates, that you will never come to harm! you seem to think that you are living in another country, and can never be brought into a court of justice, as you very likely may be brought by some miserable and mean person.

SOCRATES: Then I must indeed be a fool, Callicles, if I do not know that in the Athenian State any man may suffer anything. And if I am brought to trial and incur the dangers of which you speak, he will be a villain who brings me to trial — of that I am very sure, for no good man would accuse the innocent. Nor shall I be surprised if I am put to death. Shall I tell you why I anticipate this?

CALLICLES: By all means.

SOCRATES: I think that I am the only or almost the only Athenian

living who practises the true art of politics; I am the only politician of my time. Now, seeing that when I speak my words are not uttered with any view of gaining favour, and that I look to what is best and not to what is most pleasant, having no mind to use those arts and graces which you recommend, I shall have nothing to say in the justice court. And you might argue with me, as I was arguing with Polus: — I shall be tried just as a physician would be tried in a court of little boys at the indictment of the cook. What would he reply under such circumstances, if some one were to accuse him, saying, ‘O my boys, many evil things has this man done to you: he is the death of you, especially of the younger ones among you, cutting and burning and starving and suffocating you, until you know not what to do; he gives you the bitterest potions, and compels you to hunger and thirst. How unlike the variety of meats and sweets on which I feasted you!’ What do you suppose that the physician would be able to reply when he found himself in such a predicament? If he told the truth he could only say, ‘All these evil things, my boys, I did for your health,’ and then would there not just be a clamour among a jury like that? How they would cry out!

CALLICLES: I dare say.

SOCRATES: Would he not be utterly at a loss for a reply?

CALLICLES: He certainly would.

SOCRATES: And I too shall be treated in the same way, as I well know, if I am brought before the court. For I shall not be able to rehearse to the people the pleasures which I have procured for them, and which, although I am not disposed to envy either the procurers or enjoyers of them, are deemed by them to be benefits and advantages. And if any one says that I corrupt young men, and perplex their minds, or that I speak evil of old men, and use bitter words towards them, whether in private or public, it is useless for me to reply, as I truly might:— ‘All this I do for the sake of justice, and with a view to your interest, my judges, and to nothing else.’ And therefore there is no saying what may happen to me.

CALLICLES: And do you think, Socrates, that a man who is thus defenceless is in a good position?

SOCRATES: Yes, Callicles, if he have that defence, which as you have often acknowledged he should have — if he be his own defence, and have never said or done anything wrong, either in respect of gods or men; and this has been repeatedly acknowledged by us to be the best sort of defence. And if any one could convict me of inability to defend myself or others after this sort, I should blush for shame, whether I was convicted before many, or before a few, or by myself alone; and if I died from want of ability to do so, that would indeed grieve me. But if I died because I have no powers of flattery or rhetoric, I am very sure that you would not find me repining at death. For no man who is not an utter fool and coward is afraid of death itself, but he is afraid of doing wrong. For to go to the world below having one's soul full of injustice is the last and worst of all evils. And in proof of what I say, if you have no objection, I should like to tell you a story.

CALLICLES: Very well, proceed; and then we shall have done.

SOCRATES: Listen, then, as story-tellers say, to a very pretty tale, which I dare say that you may be disposed to regard as a fable only, but which, as I believe, is a true tale, for I mean to speak the truth. Homer tells us (Il.), how Zeus and Poseidon and Pluto divided the empire which they inherited from their father. Now in the days of Cronos there existed a law respecting the destiny of man, which has always been, and still continues to be in Heaven, — that he who has lived all his life in justice and holiness shall go, when he is dead, to the Islands of the Blessed, and dwell there in perfect happiness out of the reach of evil; but that he who has lived unjustly and impiously shall go to the house of vengeance and punishment, which is called Tartarus. And in the time of Cronos, and even quite lately in the reign of Zeus, the judgment was given on the very day on which the men were to die; the judges were alive, and the men were alive; and the consequence was that the judgments were not well given. Then Pluto and the authorities from the Islands of the Blessed came to Zeus, and said that the souls found their way to the wrong places. Zeus said: 'I

shall put a stop to this; the judgments are not well given, because the persons who are judged have their clothes on, for they are alive; and there are many who, having evil souls, are apparelled in fair bodies, or encased in wealth or rank, and, when the day of judgment arrives, numerous witnesses come forward and testify on their behalf that they have lived righteously. The judges are awed by them, and they themselves too have their clothes on when judging; their eyes and ears and their whole bodies are interposed as a veil before their own souls. All this is a hindrance to them; there are the clothes of the judges and the clothes of the judged. — What is to be done? I will tell you: — In the first place, I will deprive men of the foreknowledge of death, which they possess at present: this power which they have Prometheus has already received my orders to take from them: in the second place, they shall be entirely stripped before they are judged, for they shall be judged when they are dead; and the judge too shall be naked, that is to say, dead — he with his naked soul shall pierce into the other naked souls; and they shall die suddenly and be deprived of all their kindred, and leave their brave attire strewn upon the earth — conducted in this manner, the judgment will be just. I knew all about the matter before any of you, and therefore I have made my sons judges; two from Asia, Minos and Rhadamanthus, and one from Europe, Aeacus. And these, when they are dead, shall give judgment in the meadow at the parting of the ways, whence the two roads lead, one to the Islands of the Blessed, and the other to Tartarus. Rhadamanthus shall judge those who come from Asia, and Aeacus those who come from Europe. And to Minos I shall give the primacy, and he shall hold a court of appeal, in case either of the two others are in any doubt: — then the judgment respecting the last journey of men will be as just as possible.’

From this tale, Callicles, which I have heard and believe, I draw the following inferences: — Death, if I am right, is in the first place the separation from one another of two things, soul and body; nothing else. And after they are separated they retain their several natures, as in life; the body keeps the same habit, and the results of treatment or accident are distinctly visible in it: for example, he who by nature or training or both, was a tall man while he was alive, will remain as he was, after he is dead; and the fat man will remain fat; and so on; and the dead man, who in life had a fancy to have flowing hair, will have flowing hair. And if he was marked with the whip and had the prints of the scourge, or of wounds in him when he was alive, you might see the same in the dead body; and if his limbs were broken or misshapen when he was alive, the same appearance would be visible in the dead. And in a word, whatever was the habit of the body during life would be distinguishable after death, either perfectly, or in a great measure and for a certain time. And I should imagine that this is equally true of the soul, Callicles; when a man is stripped of the body, all the natural or acquired affections of the soul are laid open to view. — And when they come to the judge, as those from Asia come to Rhadamanthus, he places them near him and inspects them quite impartially, not knowing whose the soul is: perhaps he may lay hands on the soul of the great king, or of some other king or potentate, who has no soundness in him, but his soul is marked with the whip, and is full of the prints and scars of perjuries and crimes with which each action has stained him, and he is all crooked with falsehood and imposture, and has no straightness, because he has lived without truth. Him Rhadamanthus beholds, full of all deformity and disproportion, which is caused by licence and luxury and insolence and incontinence, and despatches him ignominiously to his prison, and there he undergoes the punishment which he deserves.

Now the proper office of punishment is twofold: he who is rightly punished ought either to become better and profit by it, or he ought to be made an example to his fellows, that they may see what he suffers, and fear and become better. Those who are improved when they are punished by gods and men, are those whose sins are curable;

and they are improved, as in this world so also in another, by pain and suffering; for there is no other way in which they can be delivered from their evil. But they who have been guilty of the worst crimes, and are incurable by reason of their crimes, are made examples; for, as they are incurable, the time has passed at which they can receive any benefit. They get no good themselves, but others get good when they behold them enduring for ever the most terrible and painful and fearful sufferings as the penalty of their sins — there they are, hanging up as examples, in the prison-house of the world below, a spectacle and a warning to all unrighteous men who come thither. And among them, as I confidently affirm, will be found Archelaus, if Polus truly reports of him, and any other tyrant who is like him. Of these fearful examples, most, as I believe, are taken from the class of tyrants and kings and potentates and public men, for they are the authors of the greatest and most impious crimes, because they have the power. And Homer witnesses to the truth of this; for they are always kings and potentates whom he has described as suffering everlasting punishment in the world below: such were Tantalus and Sisyphus and Tityus. But no one ever described Thersites, or any private person who was a villain, as suffering everlasting punishment, or as incurable. For to commit the worst crimes, as I am inclined to think, was not in his power, and he was happier than those who had the power. No, Callicles, the very bad men come from the class of those who have power (compare Republic). And yet in that very class there may arise good men, and worthy of all admiration they are, for where there is great power to do wrong, to live and to die justly is a hard thing, and greatly to be praised, and few there are who attain to this. Such good and true men, however, there have been, and will be again, at Athens and in other states, who have fulfilled their trust righteously; and there is one who is quite famous all over Hellas, Aristides, the son of Lysimachus. But, in general, great men are also bad, my friend.

As I was saying, Rhadamanthus, when he gets a soul of the bad kind, knows nothing about him, neither who he is, nor who his parents are; he knows only that he has got hold of a villain; and seeing this, he stamps him as curable or incurable, and sends him away to Tartarus,

whither he goes and receives his proper recompense. Or, again, he looks with admiration on the soul of some just one who has lived in holiness and truth; he may have been a private man or not; and I should say, Callicles, that he is most likely to have been a philosopher who has done his own work, and not troubled himself with the doings of other men in his lifetime; him Rhadamanthus sends to the Islands of the Blessed. Aeacus does the same; and they both have sceptres, and judge; but Minos alone has a golden sceptre and is seated looking on, as Odysseus in Homer declares that he saw him:

‘Holding a sceptre of gold, and giving laws to the dead.’

Now I, Callicles, am persuaded of the truth of these things, and I consider how I shall present my soul whole and undefiled before the judge in that day. Renouncing the honours at which the world aims, I desire only to know the truth, and to live as well as I can, and, when I die, to die as well as I can. And, to the utmost of my power, I exhort all other men to do the same. And, in return for your exhortation of me, I exhort you also to take part in the great combat, which is the combat of life, and greater than every other earthly conflict. And I retort your reproach of me, and say, that you will not be able to help yourself when the day of trial and judgment, of which I was speaking, comes upon you; you will go before the judge, the son of Aegina, and, when he has got you in his grip and is carrying you off, you will gape and your head will swim round, just as mine would in the courts of this world, and very likely some one will shamefully box you on the ears, and put upon you any sort of insult.

Perhaps this may appear to you to be only an old wife’s tale, which you will condemn. And there might be reason in your condemning such tales, if by searching we could find out anything better or truer: but now you see that you and Polus and Gorgias, who are the three wisest of the Greeks of our day, are not able to show that we ought to live any life which does not profit in another world as well as in this. And of all that has been said, nothing remains unshaken but the saying, that to do injustice is more to be avoided than to suffer injustice, and that the reality and not the appearance of virtue is to be

followed above all things, as well in public as in private life; and that when any one has been wrong in anything, he is to be chastised, and that the next best thing to a man being just is that he should become just, and be chastised and punished; also that he should avoid all flattery of himself as well as of others, of the few or of the many: and rhetoric and any other art should be used by him, and all his actions should be done always, with a view to justice.

Follow me then, and I will lead you where you will be happy in life and after death, as the argument shows. And never mind if some one despises you as a fool, and insults you, if he has a mind; let him strike you, by Zeus, and do you be of good cheer, and do not mind the insulting blow, for you will never come to any harm in the practice of virtue, if you are a really good and true man. When we have practised virtue together, we will apply ourselves to politics, if that seems desirable, or we will advise about whatever else may seem good to us, for we shall be better able to judge then. In our present condition we ought not to give ourselves airs, for even on the most important subjects we are always changing our minds; so utterly stupid are we! Let us, then, take the argument as our guide, which has revealed to us that the best way of life is to practise justice and every virtue in life and death. This way let us go; and in this exhort all men to follow, not in the way to which you trust and in which you exhort me to follow you; for that way, Callicles, is nothing worth.

MENO

Translated by Benjamin Jowett

This dialogue pursues the definition of virtue. The first part is written in the Socratic dialectical style, resulting with Meno being reduced to confusion. In the dialogue, Socrates introduces positive ideas, such as the immortality of the soul, the theory of knowledge as recollection, the method of hypothesis and culminating with the distinction between knowledge and true belief.

The dialogue begins with Meno, who is visiting Athens from Thessaly with a large entourage of slaves attending him, meeting Socrates. Young, good-looking and well-born, Meno is a student of Gorgias, a prominent sophist whose views on virtue clearly influence Meno's. He claims early on in the dialogue that he has held forth many times on the subject of virtue, and in front of large audiences.

The dialogue is famous for Socrates' use of one of Meno's slaves to demonstrate his idea of anamnesis, that certain knowledge is innate and "recollected" by the soul through proper inquiry.

A contemporary bust of Socrates

INTRODUCTION.
ON THE IDEAS OF PLATO.
MENO

INTRODUCTION.

This Dialogue begins abruptly with a question of Meno, who asks, 'whether virtue can be taught.' Socrates replies that he does not as yet know what virtue is, and has never known anyone who did. 'Then he cannot have met Gorgias when he was at Athens.' Yes, Socrates had met him, but he has a bad memory, and has forgotten what Gorgias said. Will Meno tell him his own notion, which is probably not very different from that of Gorgias? 'O yes — nothing easier: there is the virtue of a man, of a woman, of an old man, and of a child; there is a virtue of every age and state of life, all of which may be easily described.'

Socrates reminds Meno that this is only an enumeration of the virtues and not a definition of the notion which is common to them all. In a second attempt Meno defines virtue to be 'the power of command.' But to this, again, exceptions are taken. For there must be a virtue of those who obey, as well as of those who command; and the power of command must be justly or not unjustly exercised. Meno is very ready to admit that justice is virtue: 'Would you say virtue or a virtue, for there are other virtues, such as courage, temperance, and the like; just as round is a figure, and black and white are colours, and yet there are other figures and other colours. Let Meno take the examples of figure and colour, and try to define them.' Meno confesses his inability, and after a process of interrogation, in which Socrates explains to him the nature of a 'simile in multis,' Socrates himself defines figure as 'the accompaniment of colour.' But some one may object that he does not know the meaning of the word 'colour;' and if he is a candid friend, and not a mere disputant, Socrates is willing to furnish him with a simpler and more philosophical definition, into which no disputed word is allowed to intrude: 'Figure is the limit of form.' Meno imperiously insists that he must still have a definition of colour. Some raillery follows; and at length Socrates is induced to reply, 'that colour is the effluence of form, sensible, and in due proportion to the sight.' This definition is exactly suited to the taste of Meno, who welcomes the familiar language of Gorgias and Empedocles.

Socrates is of opinion that the more abstract or dialectical definition of figure is far better.

Now that Meno has been made to understand the nature of a general definition, he answers in the spirit of a Greek gentleman, and in the words of a poet, 'that virtue is to delight in things honourable, and to have the power of getting them.' This is a nearer approximation than he has yet made to a complete definition, and, regarded as a piece of proverbial or popular morality, is not far from the truth. But the objection is urged, 'that the honourable is the good,' and as every one equally desires the good, the point of the definition is contained in the words, 'the power of getting them.' 'And they must be got justly or with justice.' The definition will then stand thus: 'Virtue is the power of getting good with justice.' But justice is a part of virtue, and therefore virtue is the getting of good with a part of virtue. The definition repeats the word defined.

Meno complains that the conversation of Socrates has the effect of a torpedo's shock upon him. When he talks with other persons he has plenty to say about virtue; in the presence of Socrates, his thoughts desert him. Socrates replies that he is only the cause of perplexity in others, because he is himself perplexed. He proposes to continue the enquiry. But how, asks Meno, can he enquire either into what he knows or into what he does not know? This is a sophistical puzzle, which, as Socrates remarks, saves a great deal of trouble to him who accepts it. But the puzzle has a real difficulty latent under it, to which Socrates will endeavour to find a reply. The difficulty is the origin of knowledge: —

He has heard from priests and priestesses, and from the poet Pindar, of an immortal soul which is born again and again in successive periods of existence, returning into this world when she has paid the penalty of ancient crime, and, having wandered over all places of the upper and under world, and seen and known all things at one time or other, is by association out of one thing capable of recovering all. For nature is of one kindred; and every soul has a seed or germ which may be developed into all knowledge. The existence of this latent knowledge is further proved by the interrogation of one of Meno's slaves, who, in the skilful hands of Socrates, is made to acknowledge some elementary relations of geometrical figures. The

theorem that the square of the diagonal is double the square of the side — that famous discovery of primitive mathematics, in honour of which the legendary Pythagoras is said to have sacrificed a hecatomb — is elicited from him. The first step in the process of teaching has made him conscious of his own ignorance. He has had the ‘torpedo’s shock’ given him, and is the better for the operation. But whence had the uneducated man this knowledge? He had never learnt geometry in this world; nor was it born with him; he must therefore have had it when he was not a man. And as he always either was or was not a man, he must have always had it. (Compare *Phaedo*.)

After Socrates has given this specimen of the true nature of teaching, the original question of the teachableness of virtue is renewed. Again he professes a desire to know ‘what virtue is’ first. But he is willing to argue the question, as mathematicians say, under an hypothesis. He will assume that if virtue is knowledge, then virtue can be taught. (This was the stage of the argument at which the *Protagoras* concluded.)

Socrates has no difficulty in showing that virtue is a good, and that goods, whether of body or mind, must be under the direction of knowledge. Upon the assumption just made, then, virtue is teachable. But where are the teachers? There are none to be found. This is extremely discouraging. Virtue is no sooner discovered to be teachable, than the discovery follows that it is not taught. Virtue, therefore, is and is not teachable.

In this dilemma an appeal is made to Anytus, a respectable and well-to-do citizen of the old school, and a family friend of Meno, who happens to be present. He is asked ‘whether Meno shall go to the Sophists and be taught.’ The suggestion throws him into a rage. ‘To whom, then, shall Meno go?’ asks Socrates. To any Athenian gentleman — to the great Athenian statesmen of past times. Socrates replies here, as elsewhere (*Laches*, *Prot.*), that Themistocles, Pericles, and other great men, had sons to whom they would surely, if they could have done so, have imparted their own political wisdom; but no one ever heard that these sons of theirs were remarkable for anything except riding and wrestling and similar accomplishments. Anytus is angry at the imputation which is cast on his favourite statesmen, and on a class to which he supposes himself to belong; he

breaks off with a significant hint. The mention of another opportunity of talking with him, and the suggestion that Meno may do the Athenian people a service by pacifying him, are evident allusions to the trial of Socrates.

Socrates returns to the consideration of the question 'whether virtue is teachable,' which was denied on the ground that there are no teachers of it: (for the Sophists are bad teachers, and the rest of the world do not profess to teach). But there is another point which we failed to observe, and in which Gorgias has never instructed Meno, nor Prodicus Socrates. This is the nature of right opinion. For virtue may be under the guidance of right opinion as well as of knowledge; and right opinion is for practical purposes as good as knowledge, but is incapable of being taught, and is also liable, like the images of Daedalus, to 'walk off,' because not bound by the tie of the cause. This is the sort of instinct which is possessed by statesmen, who are not wise or knowing persons, but only inspired or divine. The higher virtue, which is identical with knowledge, is an ideal only. If the statesman had this knowledge, and could teach what he knew, he would be like Tiresias in the world below,— 'he alone has wisdom, but the rest flit like shadows.'

This Dialogue is an attempt to answer the question, Can virtue be taught? No one would either ask or answer such a question in modern times. But in the age of Socrates it was only by an effort that the mind could rise to a general notion of virtue as distinct from the particular virtues of courage, liberality, and the like. And when a hazy conception of this ideal was attained, it was only by a further effort that the question of the teachableness of virtue could be resolved.

The answer which is given by Plato is paradoxical enough, and seems rather intended to stimulate than to satisfy enquiry. Virtue is knowledge, and therefore virtue can be taught. But virtue is not taught, and therefore in this higher and ideal sense there is no virtue and no knowledge. The teaching of the Sophists is confessedly inadequate, and Meno, who is their pupil, is ignorant of the very nature of general terms. He can only produce out of their armoury the sophism, 'that you can neither enquire into what you know nor into what you do not know;' to which Socrates replies by his theory of

reminiscence.

To the doctrine that virtue is knowledge, Plato has been constantly tending in the previous Dialogues. But the new truth is no sooner found than it vanishes away. 'If there is knowledge, there must be teachers; and where are the teachers?' There is no knowledge in the higher sense of systematic, connected, reasoned knowledge, such as may one day be attained, and such as Plato himself seems to see in some far off vision of a single science. And there are no teachers in the higher sense of the word; that is to say, no real teachers who will arouse the spirit of enquiry in their pupils, and not merely instruct them in rhetoric or impart to them ready-made information for a fee of 'one' or of 'fifty drachms.' Plato is desirous of deepening the notion of education, and therefore he asserts the paradox that there are no educators. This paradox, though different in form, is not really different from the remark which is often made in modern times by those who would depreciate either the methods of education commonly employed, or the standard attained — that 'there is no true education among us.'

There remains still a possibility which must not be overlooked. Even if there be no true knowledge, as is proved by 'the wretched state of education,' there may be right opinion, which is a sort of guessing or divination resting on no knowledge of causes, and incommunicable to others. This is the gift which our statesmen have, as is proved by the circumstance that they are unable to impart their knowledge to their sons. Those who are possessed of it cannot be said to be men of science or philosophers, but they are inspired and divine.

There may be some trace of irony in this curious passage, which forms the concluding portion of the Dialogue. But Plato certainly does not mean to intimate that the supernatural or divine is the true basis of human life. To him knowledge, if only attainable in this world, is of all things the most divine. Yet, like other philosophers, he is willing to admit that 'probability is the guide of life (Butler's Analogy.);' and he is at the same time desirous of contrasting the wisdom which governs the world with a higher wisdom. There are many instincts, judgments, and anticipations of the human mind which cannot be reduced to rule, and of which the grounds cannot

always be given in words. A person may have some skill or latent experience which he is able to use himself and is yet unable to teach others, because he has no principles, and is incapable of collecting or arranging his ideas. He has practice, but not theory; art, but not science. This is a true fact of psychology, which is recognized by Plato in this passage. But he is far from saying, as some have imagined, that inspiration or divine grace is to be regarded as higher than knowledge. He would not have preferred the poet or man of action to the philosopher, or the virtue of custom to the virtue based upon ideas.

Also here, as in the *Ion* and *Phaedrus*, Plato appears to acknowledge an unreasoning element in the higher nature of man. The philosopher only has knowledge, and yet the statesman and the poet are inspired. There may be a sort of irony in regarding in this way the gifts of genius. But there is no reason to suppose that he is deriding them, any more than he is deriding the phenomena of love or of enthusiasm in the *Symposium*, or of oracles in the *Apology*, or of divine intimations when he is speaking of the *daemonium* of Socrates. He recognizes the lower form of right opinion, as well as the higher one of science, in the spirit of one who desires to include in his philosophy every aspect of human life; just as he recognizes the existence of popular opinion as a fact, and the Sophists as the expression of it.

This Dialogue contains the first intimation of the doctrine of reminiscence and of the immortality of the soul. The proof is very slight, even slighter than in the *Phaedo* and *Republic*. Because men had abstract ideas in a previous state, they must have always had them, and their souls therefore must have always existed. For they must always have been either men or not men. The fallacy of the latter words is transparent. And Socrates himself appears to be conscious of their weakness; for he adds immediately afterwards, 'I have said some things of which I am not altogether confident.' (Compare *Phaedo*.) It may be observed, however, that the fanciful notion of pre-existence is combined with a true but partial view of the origin and unity of knowledge, and of the association of ideas. Knowledge is prior to any particular knowledge, and exists not in the previous state of the individual, but of the race. It is potential, not

actual, and can only be appropriated by strenuous exertion.

The idealism of Plato is here presented in a less developed form than in the *Phaedo* and *Phaedrus*. Nothing is said of the pre-existence of ideas of justice, temperance, and the like. Nor is Socrates positive of anything but the duty of enquiry. The doctrine of reminiscence too is explained more in accordance with fact and experience as arising out of the affinities of nature (ate tes thuseos oles suggenous ouses). Modern philosophy says that all things in nature are dependent on one another; the ancient philosopher had the same truth latent in his mind when he affirmed that out of one thing all the rest may be recovered. The subjective was converted by him into an objective; the mental phenomenon of the association of ideas (compare *Phaedo*) became a real chain of existences. The germs of two valuable principles of education may also be gathered from the 'words of priests and priestesses:' (1) that true knowledge is a knowledge of causes (compare Aristotle's theory of episteme); and (2) that the process of learning consists not in what is brought to the learner, but in what is drawn out of him.

Some lesser points of the dialogue may be noted, such as (1) the acute observation that Meno prefers the familiar definition, which is embellished with poetical language, to the better and truer one; or (2) the shrewd reflection, which may admit of an application to modern as well as to ancient teachers, that the Sophists having made large fortunes; this must surely be a criterion of their powers of teaching, for that no man could get a living by shoemaking who was not a good shoemaker; or (3) the remark conveyed, almost in a word, that the verbal sceptic is saved the labour of thought and enquiry (ouden dei to toiouto zeteseos). Characteristic also of the temper of the Socratic enquiry is, (4) the proposal to discuss the teachableness of virtue under an hypothesis, after the manner of the mathematicians; and (5) the repetition of the favourite doctrine which occurs so frequently in the earlier and more Socratic Dialogues, and gives a colour to all of them — that mankind only desire evil through ignorance; (6) the experiment of eliciting from the slave-boy the mathematical truth which is latent in him, and (7) the remark that he is all the better for knowing his ignorance.

The character of Meno, like that of Critias, has no relation to the

actual circumstances of his life. Plato is silent about his treachery to the ten thousand Greeks, which Xenophon has recorded, as he is also silent about the crimes of Critias. He is a Thessalian Alcibiades, rich and luxurious — a spoilt child of fortune, and is described as the hereditary friend of the great king. Like Alcibiades he is inspired with an ardent desire of knowledge, and is equally willing to learn of Socrates and of the Sophists. He may be regarded as standing in the same relation to Gorgias as Hippocrates in the *Protagoras* to the other great Sophist. He is the sophisticated youth on whom Socrates tries his cross-examining powers, just as in the *Charmides*, the *Lysis*, and the *Euthydemus*, ingenuous boyhood is made the subject of a similar experiment. He is treated by Socrates in a half-playful manner suited to his character; at the same time he appears not quite to understand the process to which he is being subjected. For he is exhibited as ignorant of the very elements of dialectics, in which the Sophists have failed to instruct their disciple. His definition of virtue as ‘the power and desire of attaining things honourable,’ like the first definition of justice in the *Republic*, is taken from a poet. His answers have a sophistical ring, and at the same time show the sophistical incapacity to grasp a general notion.

Anytus is the type of the narrow-minded man of the world, who is indignant at innovation, and equally detests the popular teacher and the true philosopher. He seems, like Aristophanes, to regard the new opinions, whether of Socrates or the Sophists, as fatal to Athenian greatness. He is of the same class as Calicles in the *Gorgias*, but of a different variety; the immoral and sophistical doctrines of Calicles are not attributed to him. The moderation with which he is described is remarkable, if he be the accuser of Socrates, as is apparently indicated by his parting words. Perhaps Plato may have been desirous of showing that the accusation of Socrates was not to be attributed to badness or malevolence, but rather to a tendency in men’s minds. Or he may have been regardless of the historical truth of the characters of his dialogue, as in the case of Meno and Critias. Like Chaerephon (*Apol.*) the real Anytus was a democrat, and had joined Thrasybulus in the conflict with the thirty.

The *Protagoras* arrived at a sort of hypothetical conclusion, that if ‘virtue is knowledge, it can be taught.’ In the *Euthydemus*, Socrates

himself offered an example of the manner in which the true teacher may draw out the mind of youth; this was in contrast to the quibbling follies of the Sophists. In the *Meno* the subject is more developed; the foundations of the enquiry are laid deeper, and the nature of knowledge is more distinctly explained. There is a progression by antagonism of two opposite aspects of philosophy. But at the moment when we approach nearest, the truth doubles upon us and passes out of our reach. We seem to find that the ideal of knowledge is irreconcilable with experience. In human life there is indeed the profession of knowledge, but right opinion is our actual guide. There is another sort of progress from the general notions of Socrates, who asked simply, 'what is friendship?' 'what is temperance?' 'what is courage?' as in the *Lysis*, *Charmides*, *Laches*, to the transcendentalism of Plato, who, in the second stage of his philosophy, sought to find the nature of knowledge in a prior and future state of existence.

The difficulty in framing general notions which has appeared in this and in all the previous Dialogues recurs in the *Gorgias* and *Theaetetus* as well as in the *Republic*. In the *Gorgias* too the statesmen reappear, but in stronger opposition to the philosopher. They are no longer allowed to have a divine insight, but, though acknowledged to have been clever men and good speakers, are denounced as 'blind leaders of the blind.' The doctrine of the immortality of the soul is also carried further, being made the foundation not only of a theory of knowledge, but of a doctrine of rewards and punishments. In the *Republic* the relation of knowledge to virtue is described in a manner more consistent with modern distinctions. The existence of the virtues without the possession of knowledge in the higher or philosophical sense is admitted to be possible. Right opinion is again introduced in the *Theaetetus* as an account of knowledge, but is rejected on the ground that it is irrational (as here, because it is not bound by the tie of the cause), and also because the conception of false opinion is given up as hopeless. The doctrines of Plato are necessarily different at different times of his life, as new distinctions are realized, or new stages of thought attained by him. We are not therefore justified, in order to take away the appearance of inconsistency, in attributing to him

hidden meanings or remote allusions.

There are no external criteria by which we can determine the date of the *Meno*. There is no reason to suppose that any of the Dialogues of Plato were written before the death of Socrates; the *Meno*, which appears to be one of the earliest of them, is proved to have been of a later date by the allusion of Anytus.

We cannot argue that Plato was more likely to have written, as he has done, of *Meno* before than after his miserable death; for we have already seen, in the examples of *Charmides* and *Critias*, that the characters in Plato are very far from resembling the same characters in history. The repulsive picture which is given of him in the *Anabasis* of Xenophon, where he also appears as the friend of Aristippus 'and a fair youth having lovers,' has no other trait of likeness to the *Meno* of Plato.

The place of the *Meno* in the series is doubtfully indicated by internal evidence. The main character of the Dialogue is Socrates; but to the 'general definitions' of Socrates is added the Platonic doctrine of reminiscence. The problems of virtue and knowledge have been discussed in the *Lysis*, *Laches*, *Charmides*, and *Protagoras*; the puzzle about knowing and learning has already appeared in the *Euthydemus*. The doctrines of immortality and pre-existence are carried further in the *Phaedrus* and *Phaedo*; the distinction between opinion and knowledge is more fully developed in the *Theaetetus*. The lessons of Prodicus, whom he facetiously calls his master, are still running in the mind of Socrates. Unlike the later Platonic Dialogues, the *Meno* arrives at no conclusion. Hence we are led to place the Dialogue at some point of time later than the *Protagoras*, and earlier than the *Phaedrus* and *Gorgias*. The place which is assigned to it in this work is due mainly to the desire to bring together in a single volume all the Dialogues which contain allusions to the trial and death of Socrates.

ON THE IDEAS OF PLATO.

Plato's doctrine of ideas has attained an imaginary clearness and definiteness which is not to be found in his own writings. The popular account of them is partly derived from one or two passages in his Dialogues interpreted without regard to their poetical environment. It is due also to the misunderstanding of him by the Aristotelian school; and the erroneous notion has been further narrowed and has become fixed by the realism of the schoolmen. This popular view of the Platonic ideas may be summed up in some such formula as the following: 'Truth consists not in particulars, but in universals, which have a place in the mind of God, or in some far-off heaven. These were revealed to men in a former state of existence, and are recovered by reminiscence (*anamnesis*) or association from sensible things. The sensible things are not realities, but shadows only, in relation to the truth.' These unmeaning propositions are hardly suspected to be a caricature of a great theory of knowledge, which Plato in various ways and under many figures of speech is seeking to unfold. Poetry has been converted into dogma; and it is not remarked that the Platonic ideas are to be found only in about a third of Plato's writings and are not confined to him. The forms which they assume are numerous, and if taken literally, inconsistent with one another. At one time we are in the clouds of mythology, at another among the abstractions of mathematics or metaphysics; we pass imperceptibly from one to the other. Reason and fancy are mingled in the same passage. The ideas are sometimes described as many, coextensive with the universals of sense and also with the first principles of ethics; or again they are absorbed into the single idea of good, and subordinated to it. They are not more certain than facts, but they are equally certain (*Phaedo*). They are both personal and impersonal. They are abstract terms: they are also the causes of things; and they are even transformed into the demons or spirits by whose help God made the world. And the idea of good (*Republic*) may without violence be converted into the Supreme Being, who 'because He was good' created all things (*Tim.*).

It would be a mistake to try and reconcile these differing modes of

thought. They are not to be regarded seriously as having a distinct meaning. They are parables, prophecies, myths, symbols, revelations, aspirations after an unknown world. They derive their origin from a deep religious and contemplative feeling, and also from an observation of curious mental phenomena. They gather up the elements of the previous philosophies, which they put together in a new form. Their great diversity shows the tentative character of early endeavours to think. They have not yet settled down into a single system. Plato uses them, though he also criticises them; he acknowledges that both he and others are always talking about them, especially about the Idea of Good; and that they are not peculiar to himself (*Phaedo*; *Republic*; *Soph.*). But in his later writings he seems to have laid aside the old forms of them. As he proceeds he makes for himself new modes of expression more akin to the Aristotelian logic.

Yet amid all these varieties and incongruities, there is a common meaning or spirit which pervades his writings, both those in which he treats of the ideas and those in which he is silent about them. This is the spirit of idealism, which in the history of philosophy has had many names and taken many forms, and has in a measure influenced those who seemed to be most averse to it. It has often been charged with inconsistency and fancifulness, and yet has had an elevating effect on human nature, and has exercised a wonderful charm and interest over a few spirits who have been lost in the thought of it. It has been banished again and again, but has always returned. It has attempted to leave the earth and soar heavenwards, but soon has found that only in experience could any solid foundation of knowledge be laid. It has degenerated into pantheism, but has again emerged. No other knowledge has given an equal stimulus to the mind. It is the science of sciences, which are also ideas, and under either aspect require to be defined. They can only be thought of in due proportion when conceived in relation to one another. They are the glasses through which the kingdoms of science are seen, but at a distance. All the greatest minds, except when living in an age of reaction against them, have unconsciously fallen under their power.

The account of the Platonic ideas in the *Meno* is the simplest and clearest, and we shall best illustrate their nature by giving this first

and then comparing the manner in which they are described elsewhere, e.g. in the *Phaedrus*, *Phaedo*, *Republic*; to which may be added the criticism of them in the *Parmenides*, the personal form which is attributed to them in the *Timaeus*, the logical character which they assume in the *Sophist* and *Philebus*, and the allusion to them in the *Laws*. In the *Cratylus* they dawn upon him with the freshness of a newly-discovered thought.

The *Meno* goes back to a former state of existence, in which men did and suffered good and evil, and received the reward or punishment of them until their sin was purged away and they were allowed to return to earth. This is a tradition of the olden time, to which priests and poets bear witness. The souls of men returning to earth bring back a latent memory of ideas, which were known to them in a former state. The recollection is awakened into life and consciousness by the sight of the things which resemble them on earth. The soul evidently possesses such innate ideas before she has had time to acquire them. This is proved by an experiment tried on one of *Meno's* slaves, from whom Socrates elicits truths of arithmetic and geometry, which he had never learned in this world. He must therefore have brought them with him from another.

The notion of a previous state of existence is found in the verses of Empedocles and in the fragments of Heracleitus. It was the natural answer to two questions, 'Whence came the soul? What is the origin of evil?' and prevailed far and wide in the east. It found its way into Hellas probably through the medium of Orphic and Pythagorean rites and mysteries. It was easier to think of a former than of a future life, because such a life has really existed for the race though not for the individual, and all men come into the world, if not 'trailing clouds of glory,' at any rate able to enter into the inheritance of the past. In the *Phaedrus*, as well as in the *Meno*, it is this former rather than a future life on which Plato is disposed to dwell. There the Gods, and men following in their train, go forth to contemplate the heavens, and are borne round in the revolutions of them. There they see the divine forms of justice, temperance, and the like, in their unchangeable beauty, but not without an effort more than human. The soul of man is likened to a charioteer and two steeds, one mortal, the other immortal. The charioteer and the mortal steed are in fierce conflict;

at length the animal principle is finally overpowered, though not extinguished, by the combined energies of the passionate and rational elements. This is one of those passages in Plato which, partaking both of a philosophical and poetical character, is necessarily indistinct and inconsistent. The magnificent figure under which the nature of the soul is described has not much to do with the popular doctrine of the ideas. Yet there is one little trait in the description which shows that they are present to Plato's mind, namely, the remark that the soul, which had seen truths in the form of the universal, cannot again return to the nature of an animal.

In the *Phaedo*, as in the *Meno*, the origin of ideas is sought for in a previous state of existence. There was no time when they could have been acquired in this life, and therefore they must have been recovered from another. The process of recovery is no other than the ordinary law of association, by which in daily life the sight of one thing or person recalls another to our minds, and by which in scientific enquiry from any part of knowledge we may be led on to infer the whole. It is also argued that ideas, or rather ideals, must be derived from a previous state of existence because they are more perfect than the sensible forms of them which are given by experience. But in the *Phaedo* the doctrine of ideas is subordinate to the proof of the immortality of the soul. 'If the soul existed in a previous state, then it will exist in a future state, for a law of alternation pervades all things.' And, 'If the ideas exist, then the soul exists; if not, not.' It is to be observed, both in the *Meno* and the *Phaedo*, that Socrates expresses himself with diffidence. He speaks in the *Phaedo* of the words with which he has comforted himself and his friends, and will not be too confident that the description which he has given of the soul and her mansions is exactly true, but he 'ventures to think that something of the kind is true.' And in the *Meno*, after dwelling upon the immortality of the soul, he adds, 'Of some things which I have said I am not altogether confident' (compare *Apology*; *Gorgias*). From this class of uncertainties he exempts the difference between truth and appearance, of which he is absolutely convinced.

In the *Republic* the ideas are spoken of in two ways, which though not contradictory are different. In the tenth book they are represented

as the genera or general ideas under which individuals having a common name are contained. For example, there is the bed which the carpenter makes, the picture of the bed which is drawn by the painter, the bed existing in nature of which God is the author. Of the latter all visible beds are only the shadows or reflections. This and similar illustrations or explanations are put forth, not for their own sake, or as an exposition of Plato's theory of ideas, but with a view of showing that poetry and the mimetic arts are concerned with an inferior part of the soul and a lower kind of knowledge. On the other hand, in the 6th and 7th books of the Republic we reach the highest and most perfect conception, which Plato is able to attain, of the nature of knowledge. The ideas are now finally seen to be one as well as many, causes as well as ideas, and to have a unity which is the idea of good and the cause of all the rest. They seem, however, to have lost their first aspect of universals under which individuals are contained, and to have been converted into forms of another kind, which are inconsistently regarded from the one side as images or ideals of justice, temperance, holiness and the like; from the other as hypotheses, or mathematical truths or principles.

In the Timaeus, which in the series of Plato's works immediately follows the Republic, though probably written some time afterwards, no mention occurs of the doctrine of ideas. Geometrical forms and arithmetical ratios furnish the laws according to which the world is created. But though the conception of the ideas as genera or species is forgotten or laid aside, the distinction of the visible and intellectual is as firmly maintained as ever. The IDEA of good likewise disappears and is superseded by the conception of a personal God, who works according to a final cause or principle of goodness which he himself is. No doubt is expressed by Plato, either in the Timaeus or in any other dialogue, of the truths which he conceives to be the first and highest. It is not the existence of God or the idea of good which he approaches in a tentative or hesitating manner, but the investigations of physiology. These he regards, not seriously, as a part of philosophy, but as an innocent recreation (Tim.).

Passing on to the Parmenides, we find in that dialogue not an exposition or defence of the doctrine of ideas, but an assault upon them, which is put into the mouth of the veteran Parmenides, and

might be ascribed to Aristotle himself, or to one of his disciples. The doctrine which is assailed takes two or three forms, but fails in any of them to escape the dialectical difficulties which are urged against it. It is admitted that there are ideas of all things, but the manner in which individuals partake of them, whether of the whole or of the part, and in which they become like them, or how ideas can be either within or without the sphere of human knowledge, or how the human and divine can have any relation to each other, is held to be incapable of explanation. And yet, if there are no universal ideas, what becomes of philosophy? (Parmenides.) In the *Sophist* the theory of ideas is spoken of as a doctrine held not by Plato, but by another sect of philosophers, called 'the Friends of Ideas,' probably the Megarians, who were very distinct from him, if not opposed to him (*Sophist*). Nor in what may be termed Plato's abridgement of the history of philosophy (*Soph.*), is any mention made such as we find in the first book of Aristotle's *Metaphysics*, of the derivation of such a theory or of any part of it from the Pythagoreans, the Eleatics, the Heracleiteans, or even from Socrates. In the *Philebus*, probably one of the latest of the Platonic Dialogues, the conception of a personal or semi-personal deity expressed under the figure of mind, the king of all, who is also the cause, is retained. The one and many of the *Phaedrus* and *Theaetetus* is still working in the mind of Plato, and the correlation of ideas, not of 'all with all,' but of 'some with some,' is asserted and explained. But they are spoken of in a different manner, and are not supposed to be recovered from a former state of existence. The metaphysical conception of truth passes into a psychological one, which is continued in the *Laws*, and is the final form of the Platonic philosophy, so far as can be gathered from his own writings (see especially *Laws*). In the *Laws* he harps once more on the old string, and returns to general notions: — these he acknowledges to be many, and yet he insists that they are also one. The guardian must be made to recognize the truth, for which he has contended long ago in the *Protagoras*, that the virtues are four, but they are also in some sense one (*Laws*; compare *Protagoras*).

So various, and if regarded on the surface only, inconsistent, are the statements of Plato respecting the doctrine of ideas. If we attempted to harmonize or to combine them, we should make out of

them, not a system, but the caricature of a system. They are the ever-varying expression of Plato's Idealism. The terms used in them are in their substance and general meaning the same, although they seem to be different. They pass from the subject to the object, from earth (diesseits) to heaven (jenseits) without regard to the gulf which later theology and philosophy have made between them. They are also intended to supplement or explain each other. They relate to a subject of which Plato himself would have said that 'he was not confident of the precise form of his own statements, but was strong in the belief that something of the kind was true.' It is the spirit, not the letter, in which they agree — the spirit which places the divine above the human, the spiritual above the material, the one above the many, the mind before the body.

The stream of ancient philosophy in the Alexandrian and Roman times widens into a lake or sea, and then disappears underground to reappear after many ages in a distant land. It begins to flow again under new conditions, at first confined between high and narrow banks, but finally spreading over the continent of Europe. It is and is not the same with ancient philosophy. There is a great deal in modern philosophy which is inspired by ancient. There is much in ancient philosophy which was 'born out of due time; and before men were capable of understanding it. To the fathers of modern philosophy, their own thoughts appeared to be new and original, but they carried with them an echo or shadow of the past, coming back by recollection from an elder world. Of this the enquirers of the seventeenth century, who to themselves appeared to be working out independently the enquiry into all truth, were unconscious. They stood in a new relation to theology and natural philosophy, and for a time maintained towards both an attitude of reserve and separation. Yet the similarities between modern and ancient thought are greater far than the differences. All philosophy, even that part of it which is said to be based upon experience, is really ideal; and ideas are not only derived from facts, but they are also prior to them and extend far beyond them, just as the mind is prior to the senses.

Early Greek speculation culminates in the ideas of Plato, or rather in the single idea of good. His followers, and perhaps he himself, having arrived at this elevation, instead of going forwards went

backwards from philosophy to psychology, from ideas to numbers. But what we perceive to be the real meaning of them, an explanation of the nature and origin of knowledge, will always continue to be one of the first problems of philosophy.

Plato also left behind him a most potent instrument, the forms of logic — arms ready for use, but not yet taken out of their armoury. They were the late birth of the early Greek philosophy, and were the only part of it which has had an uninterrupted hold on the mind of Europe. Philosophies come and go; but the detection of fallacies, the framing of definitions, the invention of methods still continue to be the main elements of the reasoning process.

Modern philosophy, like ancient, begins with very simple conceptions. It is almost wholly a reflection on self. It might be described as a quickening into life of old words and notions latent in the semi-barbarous Latin, and putting a new meaning into them. Unlike ancient philosophy, it has been unaffected by impressions derived from outward nature: it arose within the limits of the mind itself. From the time of Descartes to Hume and Kant it has had little or nothing to do with facts of science. On the other hand, the ancient and mediaeval logic retained a continuous influence over it, and a form like that of mathematics was easily impressed upon it; the principle of ancient philosophy which is most apparent in it is scepticism; we must doubt nearly every traditional or received notion, that we may hold fast one or two. The being of God in a personal or impersonal form was a mental necessity to the first thinkers of modern times: from this alone all other ideas could be deduced. There had been an obscure presentiment of ‘cognito, ergo sum’ more than 2000 years previously. The Eleatic notion that being and thought were the same was revived in a new form by Descartes. But now it gave birth to consciousness and self-reflection: it awakened the ‘ego’ in human nature. The mind naked and abstract has no other certainty but the conviction of its own existence. ‘I think, therefore I am;’ and this thought is God thinking in me, who has also communicated to the reason of man his own attributes of thought and extension — these are truly imparted to him because God is true (compare Republic). It has been often remarked that Descartes, having begun by dismissing all presuppositions,

introduces several: he passes almost at once from scepticism to dogmatism. It is more important for the illustration of Plato to observe that he, like Plato, insists that God is true and incapable of deception (Republic) — that he proceeds from general ideas, that many elements of mathematics may be found in him. A certain influence of mathematics both on the form and substance of their philosophy is discernible in both of them. After making the greatest opposition between thought and extension, Descartes, like Plato, supposes them to be reunited for a time, not in their own nature but by a special divine act (compare Phaedrus), and he also supposes all the parts of the human body to meet in the pineal gland, that alone affording a principle of unity in the material frame of man. It is characteristic of the first period of modern philosophy, that having begun (like the Presocratics) with a few general notions, Descartes first falls absolutely under their influence, and then quickly discards them. At the same time he is less able to observe facts, because they are too much magnified by the glasses through which they are seen. The common logic says ‘the greater the extension, the less the comprehension,’ and we may put the same thought in another way and say of abstract or general ideas, that the greater the abstraction of them, the less are they capable of being applied to particular and concrete natures.

Not very different from Descartes in his relation to ancient philosophy is his successor Spinoza, who lived in the following generation. The system of Spinoza is less personal and also less dualistic than that of Descartes. In this respect the difference between them is like that between Xenophanes and Parmenides. The teaching of Spinoza might be described generally as the Jewish religion reduced to an abstraction and taking the form of the Eleatic philosophy. Like Parmenides, he is overpowered and intoxicated with the idea of Being or God. The greatness of both philosophies consists in the immensity of a thought which excludes all other thoughts; their weakness is the necessary separation of this thought from actual existence and from practical life. In neither of them is there any clear opposition between the inward and outward world. The substance of Spinoza has two attributes, which alone are cognizable by man, thought and extension; these are in extreme

opposition to one another, and also in inseparable identity. They may be regarded as the two aspects or expressions under which God or substance is unfolded to man. Here a step is made beyond the limits of the Eleatic philosophy. The famous theorem of Spinoza, 'Omnis determinatio est negatio,' is already contained in the 'negation is relation' of Plato's Sophist. The grand description of the philosopher in Republic VI, as the spectator of all time and all existence, may be paralleled with another famous expression of Spinoza, 'Contemplatio rerum sub specie eternitatis.' According to Spinoza finite objects are unreal, for they are conditioned by what is alien to them, and by one another. Human beings are included in the number of them. Hence there is no reality in human action and no place for right and wrong. Individuality is accident. The boasted freedom of the will is only a consciousness of necessity. Truth, he says, is the direction of the reason towards the infinite, in which all things repose; and herein lies the secret of man's well-being. In the exaltation of the reason or intellect, in the denial of the voluntariness of evil (Timaeus; Laws) Spinoza approaches nearer to Plato than in his conception of an infinite substance. As Socrates said that virtue is knowledge, so Spinoza would have maintained that knowledge alone is good, and what contributes to knowledge useful. Both are equally far from any real experience or observation of nature. And the same difficulty is found in both when we seek to apply their ideas to life and practice. There is a gulf fixed between the infinite substance and finite objects or individuals of Spinoza, just as there is between the ideas of Plato and the world of sense.

Removed from Spinoza by less than a generation is the philosopher Leibnitz, who after deepening and intensifying the opposition between mind and matter, reunites them by his preconcerted harmony (compare again Phaedrus). To him all the particles of matter are living beings which reflect on one another, and in the least of them the whole is contained. Here we catch a reminiscence both of the omoiomere, or similar particles of Anaxagoras, and of the world-animal of the Timaeus.

In Bacon and Locke we have another development in which the mind of man is supposed to receive knowledge by a new method and to work by observation and experience. But we may remark that it is

the idea of experience, rather than experience itself, with which the mind is filled. It is a symbol of knowledge rather than the reality which is vouchsafed to us. The Organon of Bacon is not much nearer to actual facts than the Organon of Aristotle or the Platonic idea of good. Many of the old rags and ribbons which defaced the garment of philosophy have been stripped off, but some of them still adhere. A crude conception of the ideas of Plato survives in the 'forms' of Bacon. And on the other hand, there are many passages of Plato in which the importance of the investigation of facts is as much insisted upon as by Bacon. Both are almost equally superior to the illusions of language, and are constantly crying out against them, as against other idols.

Locke cannot be truly regarded as the author of sensationalism any more than of idealism. His system is based upon experience, but with him experience includes reflection as well as sense. His analysis and construction of ideas has no foundation in fact; it is only the dialectic of the mind 'talking to herself.' The philosophy of Berkeley is but the transposition of two words. For objects of sense he would substitute sensations. He imagines himself to have changed the relation of the human mind towards God and nature; they remain the same as before, though he has drawn the imaginary line by which they are divided at a different point. He has annihilated the outward world, but it instantly reappears governed by the same laws and described under the same names.

A like remark applies to David Hume, of whose philosophy the central principle is the denial of the relation of cause and effect. He would deprive men of a familiar term which they can ill afford to lose; but he seems not to have observed that this alteration is merely verbal and does not in any degree affect the nature of things. Still less did he remark that he was arguing from the necessary imperfection of language against the most certain facts. And here, again, we may find a parallel with the ancients. He goes beyond facts in his scepticism, as they did in their idealism. Like the ancient Sophists, he relegates the more important principles of ethics to custom and probability. But crude and unmeaning as this philosophy is, it exercised a great influence on his successors, not unlike that which Locke exercised upon Berkeley and Berkeley upon Hume

himself. All three were both sceptical and ideal in almost equal degrees. Neither they nor their predecessors had any true conception of language or of the history of philosophy. Hume's paradox has been forgotten by the world, and did not any more than the scepticism of the ancients require to be seriously refuted. Like some other philosophical paradoxes, it would have been better left to die out. It certainly could not be refuted by a philosophy such as Kant's, in which, no less than in the previously mentioned systems, the history of the human mind and the nature of language are almost wholly ignored, and the certainty of objective knowledge is transferred to the subject; while absolute truth is reduced to a figment, more abstract and narrow than Plato's ideas, of 'thing in itself,' to which, if we reason strictly, no predicate can be applied.

The question which Plato has raised respecting the origin and nature of ideas belongs to the infancy of philosophy; in modern times it would no longer be asked. Their origin is only their history, so far as we know it; there can be no other. We may trace them in language, in philosophy, in mythology, in poetry, but we cannot argue *a priori* about them. We may attempt to shake them off, but they are always returning, and in every sphere of science and human action are tending to go beyond facts. They are thought to be innate, because they have been familiar to us all our lives, and we can no longer dismiss them from our mind. Many of them express relations of terms to which nothing exactly or nothing at all in *rerum natura* corresponds. We are not such free agents in the use of them as we sometimes imagine. Fixed ideas have taken the most complete possession of some thinkers who have been most determined to renounce them, and have been vehemently affirmed when they could be least explained and were incapable of proof. The world has often been led away by a word to which no distinct meaning could be attached. Abstractions such as 'authority,' 'equality,' 'utility,' 'liberty,' 'pleasure,' 'experience,' 'consciousness,' 'chance,' 'substance,' 'matter,' 'atom,' and a heap of other metaphysical and theological terms, are the source of quite as much error and illusion and have as little relation to actual facts as the ideas of Plato. Few students of theology or philosophy have sufficiently reflected how quickly the bloom of a philosophy passes away; or how hard it is for

one age to understand the writings of another; or how nice a judgment is required of those who are seeking to express the philosophy of one age in the terms of another. The 'eternal truths' of which metaphysicians speak have hardly ever lasted more than a generation. In our own day schools or systems of philosophy which have once been famous have died before the founders of them. We are still, as in Plato's age, groping about for a new method more comprehensive than any of those which now prevail; and also more permanent. And we seem to see at a distance the promise of such a method, which can hardly be any other than the method of idealized experience, having roots which strike far down into the history of philosophy. It is a method which does not divorce the present from the past, or the part from the whole, or the abstract from the concrete, or theory from fact, or the divine from the human, or one science from another, but labours to connect them. Along such a road we have proceeded a few steps, sufficient, perhaps, to make us reflect on the want of method which prevails in our own day. In another age, all the branches of knowledge, whether relating to God or man or nature, will become the knowledge of 'the revelation of a single science' (Symp.), and all things, like the stars in heaven, will shed their light upon one another.

MENO

PERSONS OF THE DIALOGUE:

Meno, Socrates, A Slave of Meno (Boy), Anytus.

MENO: Can you tell me, Socrates, whether virtue is acquired by teaching or by practice; or if neither by teaching nor by practice, then whether it comes to man by nature, or in what other way?

SOCRATES: O Meno, there was a time when the Thessalians were famous among the other Hellenes only for their riches and their riding; but now, if I am not mistaken, they are equally famous for their wisdom, especially at Larisa, which is the native city of your friend Aristippus. And this is Gorgias' doing; for when he came there, the flower of the Aleuadae, among them your admirer Aristippus, and the other chiefs of the Thessalians, fell in love with his wisdom. And he has taught you the habit of answering questions in a grand and bold style, which becomes those who know, and is the style in which he himself answers all comers; and any Hellene who likes may ask him anything. How different is our lot! my dear Meno. Here at Athens there is a dearth of the commodity, and all wisdom seems to have emigrated from us to you. I am certain that if you were to ask any Athenian whether virtue was natural or acquired, he would laugh in your face, and say: 'Stranger, you have far too good an opinion of me, if you think that I can answer your question. For I literally do not know what virtue is, and much less whether it is acquired by teaching or not.' And I myself, Meno, living as I do in this region of poverty, am as poor as the rest of the world; and I confess with shame that I know literally nothing about virtue; and when I do not know the 'quid' of anything how can I know the 'quale'? How, if I knew nothing at all of Meno, could I tell if he was fair, or the opposite of fair; rich and noble, or the reverse of rich and noble? Do you think that I could?

MENO: No, indeed. But are you in earnest, Socrates, in saying that you do not know what virtue is? And am I to carry back this report of

you to Thessaly?

SOCRATES: Not only that, my dear boy, but you may say further that I have never known of any one else who did, in my judgment.

MENO: Then you have never met Gorgias when he was at Athens?

SOCRATES: Yes, I have.

MENO: And did you not think that he knew?

SOCRATES: I have not a good memory, Meno, and therefore I cannot now tell what I thought of him at the time. And I dare say that he did know, and that you know what he said: please, therefore, to remind me of what he said; or, if you would rather, tell me your own view; for I suspect that you and he think much alike.

MENO: Very true.

SOCRATES: Then as he is not here, never mind him, and do you tell me: By the gods, Meno, be generous, and tell me what you say that virtue is; for I shall be truly delighted to find that I have been mistaken, and that you and Gorgias do really have this knowledge; although I have been just saying that I have never found anybody who had.

MENO: There will be no difficulty, Socrates, in answering your question. Let us take first the virtue of a man — he should know how to administer the state, and in the administration of it to benefit his friends and harm his enemies; and he must also be careful not to suffer harm himself. A woman's virtue, if you wish to know about that, may also be easily described: her duty is to order her house, and keep what is indoors, and obey her husband. Every age, every condition of life, young or old, male or female, bond or free, has a different virtue: there are virtues numberless, and no lack of definitions of them; for virtue is relative to the actions and ages of each of us in all that we do. And the same may be said of vice, Socrates (Compare Arist. Pol.).

SOCRATES: How fortunate I am, Meno! When I ask you for one

virtue, you present me with a swarm of them (Compare Theaet.), which are in your keeping. Suppose that I carry on the figure of the swarm, and ask of you, What is the nature of the bee? and you answer that there are many kinds of bees, and I reply: But do bees differ as bees, because there are many and different kinds of them; or are they not rather to be distinguished by some other quality, as for example beauty, size, or shape? How would you answer me?

MENO: I should answer that bees do not differ from one another, as bees.

SOCRATES: And if I went on to say: That is what I desire to know, Meno; tell me what is the quality in which they do not differ, but are all alike; — would you be able to answer?

MENO: I should.

SOCRATES: And so of the virtues, however many and different they may be, they have all a common nature which makes them virtues; and on this he who would answer the question, ‘What is virtue?’ would do well to have his eye fixed: Do you understand?

MENO: I am beginning to understand; but I do not as yet take hold of the question as I could wish.

SOCRATES: When you say, Meno, that there is one virtue of a man, another of a woman, another of a child, and so on, does this apply only to virtue, or would you say the same of health, and size, and strength? Or is the nature of health always the same, whether in man or woman?

MENO: I should say that health is the same, both in man and woman.

SOCRATES: And is not this true of size and strength? If a woman is strong, she will be strong by reason of the same form and of the same strength subsisting in her which there is in the man. I mean to say that strength, as strength, whether of man or woman, is the same. Is there any difference?

MENO: I think not.

SOCRATES: And will not virtue, as virtue, be the same, whether in a child or in a grown-up person, in a woman or in a man?

MENO: I cannot help feeling, Socrates, that this case is different from the others.

SOCRATES: But why? Were you not saying that the virtue of a man was to order a state, and the virtue of a woman was to order a house?

MENO: I did say so.

SOCRATES: And can either house or state or anything be well ordered without temperance and without justice?

MENO: Certainly not.

SOCRATES: Then they who order a state or a house temperately or justly order them with temperance and justice?

MENO: Certainly.

SOCRATES: Then both men and women, if they are to be good men and women, must have the same virtues of temperance and justice?

MENO: True.

SOCRATES: And can either a young man or an elder one be good, if they are intemperate and unjust?

MENO: They cannot.

SOCRATES: They must be temperate and just?

MENO: Yes.

SOCRATES: Then all men are good in the same way, and by participation in the same virtues?

MENO: Such is the inference.

SOCRATES: And they surely would not have been good in the same

way, unless their virtue had been the same?

MENO: They would not.

SOCRATES: Then now that the sameness of all virtue has been proven, try and remember what you and Gorgias say that virtue is.

MENO: Will you have one definition of them all?

SOCRATES: That is what I am seeking.

MENO: If you want to have one definition of them all, I know not what to say, but that virtue is the power of governing mankind.

SOCRATES: And does this definition of virtue include all virtue? Is virtue the same in a child and in a slave, Meno? Can the child govern his father, or the slave his master; and would he who governed be any longer a slave?

MENO: I think not, Socrates.

SOCRATES: No, indeed; there would be small reason in that. Yet once more, fair friend; according to you, virtue is ‘the power of governing;’ but do you not add ‘justly and not unjustly’?

MENO: Yes, Socrates; I agree there; for justice is virtue.

SOCRATES: Would you say ‘virtue,’ Meno, or ‘a virtue’?

MENO: What do you mean?

SOCRATES: I mean as I might say about anything; that a round, for example, is ‘a figure’ and not simply ‘figure,’ and I should adopt this mode of speaking, because there are other figures.

MENO: Quite right; and that is just what I am saying about virtue — that there are other virtues as well as justice.

SOCRATES: What are they? tell me the names of them, as I would tell you the names of the other figures if you asked me.

MENO: Courage and temperance and wisdom and magnanimity are

virtues; and there are many others.

SOCRATES: Yes, Meno; and again we are in the same case: in searching after one virtue we have found many, though not in the same way as before; but we have been unable to find the common virtue which runs through them all.

MENO: Why, Socrates, even now I am not able to follow you in the attempt to get at one common notion of virtue as of other things.

SOCRATES: No wonder; but I will try to get nearer if I can, for you know that all things have a common notion. Suppose now that some one asked you the question which I asked before: Meno, he would say, what is figure? And if you answered 'roundness,' he would reply to you, in my way of speaking, by asking whether you would say that roundness is 'figure' or 'a figure;' and you would answer 'a figure.'

MENO: Certainly.

SOCRATES: And for this reason — that there are other figures?

MENO: Yes.

SOCRATES: And if he proceeded to ask, What other figures are there? you would have told him.

MENO: I should.

SOCRATES: And if he similarly asked what colour is, and you answered whiteness, and the questioner rejoined, Would you say that whiteness is colour or a colour? you would reply, A colour, because there are other colours as well.

MENO: I should.

SOCRATES: And if he had said, Tell me what they are? — you would have told him of other colours which are colours just as much as whiteness.

MENO: Yes.

SOCRATES: And suppose that he were to pursue the matter in my way, he would say: Ever and anon we are landed in particulars, but this is not what I want; tell me then, since you call them by a common name, and say that they are all figures, even when opposed to one another, what is that common nature which you designate as figure — which contains straight as well as round, and is no more one than the other — that would be your mode of speaking?

MENO: Yes.

SOCRATES: And in speaking thus, you do not mean to say that the round is round any more than straight, or the straight any more straight than round?

MENO: Certainly not.

SOCRATES: You only assert that the round figure is not more a figure than the straight, or the straight than the round?

MENO: Very true.

SOCRATES: To what then do we give the name of figure? Try and answer. Suppose that when a person asked you this question either about figure or colour, you were to reply, Man, I do not understand what you want, or know what you are saying; he would look rather astonished and say: Do you not understand that I am looking for the ‘simile in multis’? And then he might put the question in another form: Meno, he might say, what is that ‘simile in multis’ which you call figure, and which includes not only round and straight figures, but all? Could you not answer that question, Meno? I wish that you would try; the attempt will be good practice with a view to the answer about virtue.

MENO: I would rather that you should answer, Socrates.

SOCRATES: Shall I indulge you?

MENO: By all means.

SOCRATES: And then you will tell me about virtue?

MENO: I will.

SOCRATES: Then I must do my best, for there is a prize to be won.

MENO: Certainly.

SOCRATES: Well, I will try and explain to you what figure is. What do you say to this answer? — Figure is the only thing which always follows colour. Will you be satisfied with it, as I am sure that I should be, if you would let me have a similar definition of virtue?

MENO: But, Socrates, it is such a simple answer.

SOCRATES: Why simple?

MENO: Because, according to you, figure is that which always follows colour.

(SOCRATES: Granted.)

MENO: But if a person were to say that he does not know what colour is, any more than what figure is — what sort of answer would you have given him?

SOCRATES: I should have told him the truth. And if he were a philosopher of the eristic and antagonistic sort, I should say to him: You have my answer, and if I am wrong, your business is to take up the argument and refute me. But if we were friends, and were talking as you and I are now, I should reply in a milder strain and more in the dialectician's vein; that is to say, I should not only speak the truth, but I should make use of premises which the person interrogated would be willing to admit. And this is the way in which I shall endeavour to approach you. You will acknowledge, will you not, that there is such a thing as an end, or termination, or extremity? — all which words I use in the same sense, although I am aware that Prodicus might draw distinctions about them: but still you, I am sure, would speak of a thing as ended or terminated — that is all which I am saying — not anything very difficult.

MENO: Yes, I should; and I believe that I understand your meaning.

SOCRATES: And you would speak of a surface and also of a solid, as for example in geometry.

MENO: Yes.

SOCRATES: Well then, you are now in a condition to understand my definition of figure. I define figure to be that in which the solid ends; or, more concisely, the limit of solid.

MENO: And now, Socrates, what is colour?

SOCRATES: You are outrageous, Meno, in thus plaguing a poor old man to give you an answer, when you will not take the trouble of remembering what is Gorgias' definition of virtue.

MENO: When you have told me what I ask, I will tell you, Socrates.

SOCRATES: A man who was blindfolded has only to hear you talking, and he would know that you are a fair creature and have still many lovers.

MENO: Why do you think so?

SOCRATES: Why, because you always speak in imperatives: like all beauties when they are in their prime, you are tyrannical; and also, as I suspect, you have found out that I have weakness for the fair, and therefore to humour you I must answer.

MENO: Please do.

SOCRATES: Would you like me to answer you after the manner of Gorgias, which is familiar to you?

MENO: I should like nothing better.

SOCRATES: Do not he and you and Empedocles say that there are certain effluences of existence?

MENO: Certainly.

SOCRATES: And passages into which and through which the effluences pass?

MENO: Exactly.

SOCRATES: And some of the effluences fit into the passages, and some of them are too small or too large?

MENO: True.

SOCRATES: And there is such a thing as sight?

MENO: Yes.

SOCRATES: And now, as Pindar says, 'read my meaning:' — colour is an effluence of form, commensurate with sight, and palpable to sense.

MENO: That, Socrates, appears to me to be an admirable answer.

SOCRATES: Why, yes, because it happens to be one which you have been in the habit of hearing: and your wit will have discovered, I suspect, that you may explain in the same way the nature of sound and smell, and of many other similar phenomena.

MENO: Quite true.

SOCRATES: The answer, Meno, was in the orthodox solemn vein, and therefore was more acceptable to you than the other answer about figure.

MENO: Yes.

SOCRATES: And yet, O son of Alexidemus, I cannot help thinking that the other was the better; and I am sure that you would be of the same opinion, if you would only stay and be initiated, and were not compelled, as you said yesterday, to go away before the mysteries.

MENO: But I will stay, Socrates, if you will give me many such answers.

SOCRATES: Well then, for my own sake as well as for yours, I will do my very best; but I am afraid that I shall not be able to give you very many as good: and now, in your turn, you are to fulfil your

promise, and tell me what virtue is in the universal; and do not make a singular into a plural, as the facetious say of those who break a thing, but deliver virtue to me whole and sound, and not broken into a number of pieces: I have given you the pattern.

MENO: Well then, Socrates, virtue, as I take it, is when he, who desires the honourable, is able to provide it for himself; so the poet says, and I say too —

‘Virtue is the desire of things honourable and the power of attaining them.’

SOCRATES: And does he who desires the honourable also desire the good?

MENO: Certainly.

SOCRATES: Then are there some who desire the evil and others who desire the good? Do not all men, my dear sir, desire good?

MENO: I think not.

SOCRATES: There are some who desire evil?

MENO: Yes.

SOCRATES: Do you mean that they think the evils which they desire, to be good; or do they know that they are evil and yet desire them?

MENO: Both, I think.

SOCRATES: And do you really imagine, Meno, that a man knows evils to be evils and desires them notwithstanding?

MENO: Certainly I do.

SOCRATES: And desire is of possession?

MENO: Yes, of possession.

SOCRATES: And does he think that the evils will do good to him

who possesses them, or does he know that they will do him harm?

MENO: There are some who think that the evils will do them good, and others who know that they will do them harm.

SOCRATES: And, in your opinion, do those who think that they will do them good know that they are evils?

MENO: Certainly not.

SOCRATES: Is it not obvious that those who are ignorant of their nature do not desire them; but they desire what they suppose to be goods although they are really evils; and if they are mistaken and suppose the evils to be goods they really desire goods?

MENO: Yes, in that case.

SOCRATES: Well, and do those who, as you say, desire evils, and think that evils are hurtful to the possessor of them, know that they will be hurt by them?

MENO: They must know it.

SOCRATES: And must they not suppose that those who are hurt are miserable in proportion to the hurt which is inflicted upon them?

MENO: How can it be otherwise?

SOCRATES: But are not the miserable ill-fated?

MENO: Yes, indeed.

SOCRATES: And does any one desire to be miserable and ill-fated?

MENO: I should say not, Socrates.

SOCRATES: But if there is no one who desires to be miserable, there is no one, Meno, who desires evil; for what is misery but the desire and possession of evil?

MENO: That appears to be the truth, Socrates, and I admit that nobody desires evil.

SOCRATES: And yet, were you not saying just now that virtue is the desire and power of attaining good?

MENO: Yes, I did say so.

SOCRATES: But if this be affirmed, then the desire of good is common to all, and one man is no better than another in that respect?

MENO: True.

SOCRATES: And if one man is not better than another in desiring good, he must be better in the power of attaining it?

MENO: Exactly.

SOCRATES: Then, according to your definition, virtue would appear to be the power of attaining good?

MENO: I entirely approve, Socrates, of the manner in which you now view this matter.

SOCRATES: Then let us see whether what you say is true from another point of view; for very likely you may be right: — You affirm virtue to be the power of attaining goods?

MENO: Yes.

SOCRATES: And the goods which you mean are such as health and wealth and the possession of gold and silver, and having office and honour in the state — those are what you would call goods?

MENO: Yes, I should include all those.

SOCRATES: Then, according to Meno, who is the hereditary friend of the great king, virtue is the power of getting silver and gold; and would you add that they must be gained piously, justly, or do you deem this to be of no consequence? And is any mode of acquisition, even if unjust and dishonest, equally to be deemed virtue?

MENO: Not virtue, Socrates, but vice.

SOCRATES: Then justice or temperance or holiness, or some other

part of virtue, as would appear, must accompany the acquisition, and without them the mere acquisition of good will not be virtue.

MENO: Why, how can there be virtue without these?

SOCRATES: And the non-acquisition of gold and silver in a dishonest manner for oneself or another, or in other words the want of them, may be equally virtue?

MENO: True.

SOCRATES: Then the acquisition of such goods is no more virtue than the non-acquisition and want of them, but whatever is accompanied by justice or honesty is virtue, and whatever is devoid of justice is vice.

MENO: It cannot be otherwise, in my judgment.

SOCRATES: And were we not saying just now that justice, temperance, and the like, were each of them a part of virtue?

MENO: Yes.

SOCRATES: And so, Meno, this is the way in which you mock me.

MENO: Why do you say that, Socrates?

SOCRATES: Why, because I asked you to deliver virtue into my hands whole and unbroken, and I gave you a pattern according to which you were to frame your answer; and you have forgotten already, and tell me that virtue is the power of attaining good justly, or with justice; and justice you acknowledge to be a part of virtue.

MENO: Yes.

SOCRATES: Then it follows from your own admissions, that virtue is doing what you do with a part of virtue; for justice and the like are said by you to be parts of virtue.

MENO: What of that?

SOCRATES: What of that! Why, did not I ask you to tell me the

nature of virtue as a whole? And you are very far from telling me this; but declare every action to be virtue which is done with a part of virtue; as though you had told me and I must already know the whole of virtue, and this too when frittered away into little pieces. And, therefore, my dear Meno, I fear that I must begin again and repeat the same question: What is virtue? for otherwise, I can only say, that every action done with a part of virtue is virtue; what else is the meaning of saying that every action done with justice is virtue? Ought I not to ask the question over again; for can any one who does not know virtue know a part of virtue?

MENO: No; I do not say that he can.

SOCRATES: Do you remember how, in the example of figure, we rejected any answer given in terms which were as yet unexplained or unadmitted?

MENO: Yes, Socrates; and we were quite right in doing so.

SOCRATES: But then, my friend, do not suppose that we can explain to any one the nature of virtue as a whole through some unexplained portion of virtue, or anything at all in that fashion; we should only have to ask over again the old question, What is virtue? Am I not right?

MENO: I believe that you are.

SOCRATES: Then begin again, and answer me, What, according to you and your friend Gorgias, is the definition of virtue?

MENO: O Socrates, I used to be told, before I knew you, that you were always doubting yourself and making others doubt; and now you are casting your spells over me, and I am simply getting bewitched and enchanted, and am at my wits' end. And if I may venture to make a jest upon you, you seem to me both in your appearance and in your power over others to be very like the flat torpedo fish, who torpifies those who come near him and touch him, as you have now torpified me, I think. For my soul and my tongue are really torpid, and I do not know how to answer you; and though I

have been delivered of an infinite variety of speeches about virtue before now, and to many persons — and very good ones they were, as I thought — at this moment I cannot even say what virtue is. And I think that you are very wise in not voyaging and going away from home, for if you did in other places as you do in Athens, you would be cast into prison as a magician.

SOCRATES: You are a rogue, Meno, and had all but caught me.

MENO: What do you mean, Socrates?

SOCRATES: I can tell why you made a simile about me.

MENO: Why?

SOCRATES: In order that I might make another simile about you. For I know that all pretty young gentlemen like to have pretty similes made about them — as well they may — but I shall not return the compliment. As to my being a torpedo, if the torpedo is torpid as well as the cause of torpidity in others, then indeed I am a torpedo, but not otherwise; for I perplex others, not because I am clear, but because I am utterly perplexed myself. And now I know not what virtue is, and you seem to be in the same case, although you did once perhaps know before you touched me. However, I have no objection to join with you in the enquiry.

MENO: And how will you enquire, Socrates, into that which you do not know? What will you put forth as the subject of enquiry? And if you find what you want, how will you ever know that this is the thing which you did not know?

SOCRATES: I know, Meno, what you mean; but just see what a tiresome dispute you are introducing. You argue that a man cannot enquire either about that which he knows, or about that which he does not know; for if he knows, he has no need to enquire; and if not, he cannot; for he does not know the very subject about which he is to enquire (Compare Aristot. Post. Anal.).

MENO: Well, Socrates, and is not the argument sound?

SOCRATES: I think not.

MENO: Why not?

SOCRATES: I will tell you why: I have heard from certain wise men and women who spoke of things divine that —

MENO: What did they say?

SOCRATES: They spoke of a glorious truth, as I conceive.

MENO: What was it? and who were they?

SOCRATES: Some of them were priests and priestesses, who had studied how they might be able to give a reason of their profession: there have been poets also, who spoke of these things by inspiration, like Pindar, and many others who were inspired. And they say — mark, now, and see whether their words are true — they say that the soul of man is immortal, and at one time has an end, which is termed dying, and at another time is born again, but is never destroyed. And the moral is, that a man ought to live always in perfect holiness. ‘For in the ninth year Persephone sends the souls of those from whom she has received the penalty of ancient crime back again from beneath into the light of the sun above, and these are they who become noble kings and mighty men and great in wisdom and are called saintly heroes in after ages.’ The soul, then, as being immortal, and having been born again many times, and having seen all things that exist, whether in this world or in the world below, has knowledge of them all; and it is no wonder that she should be able to call to remembrance all that she ever knew about virtue, and about everything; for as all nature is akin, and the soul has learned all things; there is no difficulty in her eliciting or as men say learning, out of a single recollection all the rest, if a man is strenuous and does not faint; for all enquiry and all learning is but recollection. And therefore we ought not to listen to this sophistical argument about the impossibility of enquiry: for it will make us idle; and is sweet only to the sluggard; but the other saying will make us active and inquisitive. In that confiding, I will gladly enquire with you into the nature of virtue.

MENO: Yes, Socrates; but what do you mean by saying that we do not learn, and that what we call learning is only a process of recollection? Can you teach me how this is?

SOCRATES: I told you, Meno, just now that you were a rogue, and now you ask whether I can teach you, when I am saying that there is no teaching, but only recollection; and thus you imagine that you will involve me in a contradiction.

MENO: Indeed, Socrates, I protest that I had no such intention. I only asked the question from habit; but if you can prove to me that what you say is true, I wish that you would.

SOCRATES: It will be no easy matter, but I will try to please you to the utmost of my power. Suppose that you call one of your numerous attendants, that I may demonstrate on him.

MENO: Certainly. Come hither, boy.

SOCRATES: He is Greek, and speaks Greek, does he not?

MENO: Yes, indeed; he was born in the house.

SOCRATES: Attend now to the questions which I ask him, and observe whether he learns of me or only remembers.

MENO: I will.

SOCRATES: Tell me, boy, do you know that a figure like this is a square?

BOY: I do.

SOCRATES: And you know that a square figure has these four lines equal?

BOY: Certainly.

SOCRATES: And these lines which I have drawn through the middle of the square are also equal?

BOY: Yes.

SOCRATES: A square may be of any size?

BOY: Certainly.

SOCRATES: And if one side of the figure be of two feet, and the other side be of two feet, how much will the whole be? Let me explain: if in one direction the space was of two feet, and in the other direction of one foot, the whole would be of two feet taken once?

BOY: Yes.

SOCRATES: But since this side is also of two feet, there are twice two feet?

BOY: There are.

SOCRATES: Then the square is of twice two feet?

BOY: Yes.

SOCRATES: And how many are twice two feet? count and tell me.

BOY: Four, Socrates.

SOCRATES: And might there not be another square twice as large as this, and having like this the lines equal?

BOY: Yes.

SOCRATES: And of how many feet will that be?

BOY: Of eight feet.

SOCRATES: And now try and tell me the length of the line which forms the side of that double square: this is two feet — what will that be?

BOY: Clearly, Socrates, it will be double.

SOCRATES: Do you observe, Meno, that I am not teaching the boy anything, but only asking him questions; and now he fancies that he knows how long a line is necessary in order to produce a figure of eight square feet; does he not?

MENO: Yes.

SOCRATES: And does he really know?

MENO: Certainly not.

SOCRATES: He only guesses that because the square is double, the line is double.

MENO: True.

SOCRATES: Observe him while he recalls the steps in regular order. (To the Boy:) Tell me, boy, do you assert that a double space comes from a double line? Remember that I am not speaking of an oblong, but of a figure equal every way, and twice the size of this — that is to say of eight feet; and I want to know whether you still say that a double square comes from double line?

BOY: Yes.

SOCRATES: But does not this line become doubled if we add another such line here?

BOY: Certainly.

SOCRATES: And four such lines will make a space containing eight feet?

BOY: Yes.

SOCRATES: Let us describe such a figure: Would you not say that this is the figure of eight feet?

BOY: Yes.

SOCRATES: And are there not these four divisions in the figure, each of which is equal to the figure of four feet?

BOY: True.

SOCRATES: And is not that four times four?

BOY: Certainly.

SOCRATES: And four times is not double?

BOY: No, indeed.

SOCRATES: But how much?

BOY: Four times as much.

SOCRATES: Therefore the double line, boy, has given a space, not twice, but four times as much.

BOY: True.

SOCRATES: Four times four are sixteen — are they not?

BOY: Yes.

SOCRATES: What line would give you a space of eight feet, as this gives one of sixteen feet; — do you see?

BOY: Yes.

SOCRATES: And the space of four feet is made from this half line?

BOY: Yes.

SOCRATES: Good; and is not a space of eight feet twice the size of this, and half the size of the other?

BOY: Certainly.

SOCRATES: Such a space, then, will be made out of a line greater than this one, and less than that one?

BOY: Yes; I think so.

SOCRATES: Very good; I like to hear you say what you think. And now tell me, is not this a line of two feet and that of four?

BOY: Yes.

SOCRATES: Then the line which forms the side of eight feet ought to be more than this line of two feet, and less than the other of four

feet?

BOY: It ought.

SOCRATES: Try and see if you can tell me how much it will be.

BOY: Three feet.

SOCRATES: Then if we add a half to this line of two, that will be the line of three. Here are two and there is one; and on the other side, here are two also and there is one: and that makes the figure of which you speak?

BOY: Yes.

SOCRATES: But if there are three feet this way and three feet that way, the whole space will be three times three feet?

BOY: That is evident.

SOCRATES: And how much are three times three feet?

BOY: Nine.

SOCRATES: And how much is the double of four?

BOY: Eight.

SOCRATES: Then the figure of eight is not made out of a line of three?

BOY: No.

SOCRATES: But from what line? — tell me exactly; and if you would rather not reckon, try and show me the line.

BOY: Indeed, Socrates, I do not know.

SOCRATES: Do you see, Meno, what advances he has made in his power of recollection? He did not know at first, and he does not know now, what is the side of a figure of eight feet: but then he thought that he knew, and answered confidently as if he knew, and had no difficulty; now he has a difficulty, and neither knows nor

fancies that he knows.

MENO: True.

SOCRATES: Is he not better off in knowing his ignorance?

MENO: I think that he is.

SOCRATES: If we have made him doubt, and given him the 'torpedo's shock,' have we done him any harm?

MENO: I think not.

SOCRATES: We have certainly, as would seem, assisted him in some degree to the discovery of the truth; and now he will wish to remedy his ignorance, but then he would have been ready to tell all the world again and again that the double space should have a double side.

MENO: True.

SOCRATES: But do you suppose that he would ever have enquired into or learned what he fancied that he knew, though he was really ignorant of it, until he had fallen into perplexity under the idea that he did not know, and had desired to know?

MENO: I think not, Socrates.

SOCRATES: Then he was the better for the torpedo's touch?

MENO: I think so.

SOCRATES: Mark now the farther development. I shall only ask him, and not teach him, and he shall share the enquiry with me: and do you watch and see if you find me telling or explaining anything to him, instead of eliciting his opinion. Tell me, boy, is not this a square of four feet which I have drawn?

BOY: Yes.

SOCRATES: And now I add another square equal to the former one?

BOY: Yes.

SOCRATES: And a third, which is equal to either of them?

BOY: Yes.

SOCRATES: Suppose that we fill up the vacant corner?

BOY: Very good.

SOCRATES: Here, then, there are four equal spaces?

BOY: Yes.

SOCRATES: And how many times larger is this space than this other?

BOY: Four times.

SOCRATES: But it ought to have been twice only, as you will remember.

BOY: True.

SOCRATES: And does not this line, reaching from corner to corner, bisect each of these spaces?

BOY: Yes.

SOCRATES: And are there not here four equal lines which contain this space?

BOY: There are.

SOCRATES: Look and see how much this space is.

BOY: I do not understand.

SOCRATES: Has not each interior line cut off half of the four spaces?

BOY: Yes.

SOCRATES: And how many spaces are there in this section?

BOY: Four.

SOCRATES: And how many in this?

BOY: Two.

SOCRATES: And four is how many times two?

BOY: Twice.

SOCRATES: And this space is of how many feet?

BOY: Of eight feet.

SOCRATES: And from what line do you get this figure?

BOY: From this.

SOCRATES: That is, from the line which extends from corner to corner of the figure of four feet?

BOY: Yes.

SOCRATES: And that is the line which the learned call the diagonal. And if this is the proper name, then you, Meno's slave, are prepared to affirm that the double space is the square of the diagonal?

BOY: Certainly, Socrates.

SOCRATES: What do you say of him, Meno? Were not all these answers given out of his own head?

MENO: Yes, they were all his own.

SOCRATES: And yet, as we were just now saying, he did not know?

MENO: True.

SOCRATES: But still he had in him those notions of his — had he not?

MENO: Yes.

SOCRATES: Then he who does not know may still have true notions

of that which he does not know?

MENO: He has.

SOCRATES: And at present these notions have just been stirred up in him, as in a dream; but if he were frequently asked the same questions, in different forms, he would know as well as any one at last?

MENO: I dare say.

SOCRATES: Without any one teaching him he will recover his knowledge for himself, if he is only asked questions?

MENO: Yes.

SOCRATES: And this spontaneous recovery of knowledge in him is recollection?

MENO: True.

SOCRATES: And this knowledge which he now has must he not either have acquired or always possessed?

MENO: Yes.

SOCRATES: But if he always possessed this knowledge he would always have known; or if he has acquired the knowledge he could not have acquired it in this life, unless he has been taught geometry; for he may be made to do the same with all geometry and every other branch of knowledge. Now, has any one ever taught him all this? You must know about him, if, as you say, he was born and bred in your house.

MENO: And I am certain that no one ever did teach him.

SOCRATES: And yet he has the knowledge?

MENO: The fact, Socrates, is undeniable.

SOCRATES: But if he did not acquire the knowledge in this life, then he must have had and learned it at some other time?

MENO: Clearly he must.

SOCRATES: Which must have been the time when he was not a man?

MENO: Yes.

SOCRATES: And if there have been always true thoughts in him, both at the time when he was and was not a man, which only need to be awakened into knowledge by putting questions to him, his soul must have always possessed this knowledge, for he always either was or was not a man?

MENO: Obviously.

SOCRATES: And if the truth of all things always existed in the soul, then the soul is immortal. Wherefore be of good cheer, and try to recollect what you do not know, or rather what you do not remember.

MENO: I feel, somehow, that I like what you are saying.

SOCRATES: And I, Meno, like what I am saying. Some things I have said of which I am not altogether confident. But that we shall be better and braver and less helpless if we think that we ought to enquire, than we should have been if we indulged in the idle fancy that there was no knowing and no use in seeking to know what we do not know; — that is a theme upon which I am ready to fight, in word and deed, to the utmost of my power.

MENO: There again, Socrates, your words seem to me excellent.

SOCRATES: Then, as we are agreed that a man should enquire about that which he does not know, shall you and I make an effort to enquire together into the nature of virtue?

MENO: By all means, Socrates. And yet I would much rather return to my original question, Whether in seeking to acquire virtue we should regard it as a thing to be taught, or as a gift of nature, or as coming to men in some other way?

SOCRATES: Had I the command of you as well as of myself, Meno,

I would not have enquired whether virtue is given by instruction or not, until we had first ascertained 'what it is.' But as you think only of controlling me who am your slave, and never of controlling yourself, — such being your notion of freedom, I must yield to you, for you are irresistible. And therefore I have now to enquire into the qualities of a thing of which I do not as yet know the nature. At any rate, will you condescend a little, and allow the question 'Whether virtue is given by instruction, or in any other way,' to be argued upon hypothesis? As the geometrician, when he is asked whether a certain triangle is capable being inscribed in a certain circle (Or, whether a certain area is capable of being inscribed as a triangle in a certain circle.), will reply: 'I cannot tell you as yet; but I will offer a hypothesis which may assist us in forming a conclusion: If the figure be such that when you have produced a given side of it (Or, when you apply it to the given line, i.e. the diameter of the circle (autou).), the given area of the triangle falls short by an area corresponding to the part produced (Or, similar to the area so applied.), then one consequence follows, and if this is impossible then some other; and therefore I wish to assume a hypothesis before I tell you whether this triangle is capable of being inscribed in the circle': — that is a geometrical hypothesis. And we too, as we know not the nature and qualities of virtue, must ask, whether virtue is or is not taught, under a hypothesis: as thus, if virtue is of such a class of mental goods, will it be taught or not? Let the first hypothesis be that virtue is or is not knowledge, — in that case will it be taught or not? or, as we were just now saying, 'remembered'? For there is no use in disputing about the name. But is virtue taught or not? or rather, does not every one see that knowledge alone is taught?

MENO: I agree.

SOCRATES: Then if virtue is knowledge, virtue will be taught?

MENO: Certainly.

SOCRATES: Then now we have made a quick end of this question: if virtue is of such a nature, it will be taught; and if not, not?

MENO: Certainly.

SOCRATES: The next question is, whether virtue is knowledge or of another species?

MENO: Yes, that appears to be the question which comes next in order.

SOCRATES: Do we not say that virtue is a good? — This is a hypothesis which is not set aside.

MENO: Certainly.

SOCRATES: Now, if there be any sort of good which is distinct from knowledge, virtue may be that good; but if knowledge embraces all good, then we shall be right in thinking that virtue is knowledge?

MENO: True.

SOCRATES: And virtue makes us good?

MENO: Yes.

SOCRATES: And if we are good, then we are profitable; for all good things are profitable?

MENO: Yes.

SOCRATES: Then virtue is profitable?

MENO: That is the only inference.

SOCRATES: Then now let us see what are the things which severally profit us. Health and strength, and beauty and wealth — these, and the like of these, we call profitable?

MENO: True.

SOCRATES: And yet these things may also sometimes do us harm: would you not think so?

MENO: Yes.

SOCRATES: And what is the guiding principle which makes them profitable or the reverse? Are they not profitable when they are rightly used, and hurtful when they are not rightly used?

MENO: Certainly.

SOCRATES: Next, let us consider the goods of the soul: they are temperance, justice, courage, quickness of apprehension, memory, magnanimity, and the like?

MENO: Surely.

SOCRATES: And such of these as are not knowledge, but of another sort, are sometimes profitable and sometimes hurtful; as, for example, courage wanting prudence, which is only a sort of confidence? When a man has no sense he is harmed by courage, but when he has sense he is profited?

MENO: True.

SOCRATES: And the same may be said of temperance and quickness of apprehension; whatever things are learned or done with sense are profitable, but when done without sense they are hurtful?

MENO: Very true.

SOCRATES: And in general, all that the soul attempts or endures, when under the guidance of wisdom, ends in happiness; but when she is under the guidance of folly, in the opposite?

MENO: That appears to be true.

SOCRATES: If then virtue is a quality of the soul, and is admitted to be profitable, it must be wisdom or prudence, since none of the things of the soul are either profitable or hurtful in themselves, but they are all made profitable or hurtful by the addition of wisdom or of folly; and therefore if virtue is profitable, virtue must be a sort of wisdom or prudence?

MENO: I quite agree.

SOCRATES: And the other goods, such as wealth and the like, of which we were just now saying that they are sometimes good and sometimes evil, do not they also become profitable or hurtful, accordingly as the soul guides and uses them rightly or wrongly; just as the things of the soul herself are benefited when under the guidance of wisdom and harmed by folly?

MENO: True.

SOCRATES: And the wise soul guides them rightly, and the foolish soul wrongly.

MENO: Yes.

SOCRATES: And is not this universally true of human nature? All other things hang upon the soul, and the things of the soul herself hang upon wisdom, if they are to be good; and so wisdom is inferred to be that which profits — and virtue, as we say, is profitable?

MENO: Certainly.

SOCRATES: And thus we arrive at the conclusion that virtue is either wholly or partly wisdom?

MENO: I think that what you are saying, Socrates, is very true.

SOCRATES: But if this is true, then the good are not by nature good?

MENO: I think not.

SOCRATES: If they had been, there would assuredly have been discerners of characters among us who would have known our future great men; and on their showing we should have adopted them, and when we had got them, we should have kept them in the citadel out of the way of harm, and set a stamp upon them far rather than upon a piece of gold, in order that no one might tamper with them; and when they grew up they would have been useful to the state?

MENO: Yes, Socrates, that would have been the right way.

SOCRATES: But if the good are not by nature good, are they made good by instruction?

MENO: There appears to be no other alternative, Socrates. On the supposition that virtue is knowledge, there can be no doubt that virtue is taught.

SOCRATES: Yes, indeed; but what if the supposition is erroneous?

MENO: I certainly thought just now that we were right.

SOCRATES: Yes, Meno; but a principle which has any soundness should stand firm not only just now, but always.

MENO: Well; and why are you so slow of heart to believe that knowledge is virtue?

SOCRATES: I will try and tell you why, Meno. I do not retract the assertion that if virtue is knowledge it may be taught; but I fear that I have some reason in doubting whether virtue is knowledge: for consider now and say whether virtue, and not only virtue but anything that is taught, must not have teachers and disciples?

MENO: Surely.

SOCRATES: And conversely, may not the art of which neither teachers nor disciples exist be assumed to be incapable of being taught?

MENO: True; but do you think that there are no teachers of virtue?

SOCRATES: I have certainly often enquired whether there were any, and taken great pains to find them, and have never succeeded; and many have assisted me in the search, and they were the persons whom I thought the most likely to know. Here at the moment when he is wanted we fortunately have sitting by us Anytus, the very person of whom we should make enquiry; to him then let us repair. In the first place, he is the son of a wealthy and wise father, Anthemion, who acquired his wealth, not by accident or gift, like Ismenias the Theban (who has recently made himself as rich as

Polycrates), but by his own skill and industry, and who is a well-conditioned, modest man, not insolent, or overbearing, or annoying; moreover, this son of his has received a good education, as the Athenian people certainly appear to think, for they choose him to fill the highest offices. And these are the sort of men from whom you are likely to learn whether there are any teachers of virtue, and who they are. Please, Anytus, to help me and your friend Meno in answering our question, Who are the teachers? Consider the matter thus: If we wanted Meno to be a good physician, to whom should we send him? Should we not send him to the physicians?

ANYTUS: Certainly.

SOCRATES: Or if we wanted him to be a good cobbler, should we not send him to the cobblers?

ANYTUS: Yes.

SOCRATES: And so forth?

ANYTUS: Yes.

SOCRATES: Let me trouble you with one more question. When we say that we should be right in sending him to the physicians if we wanted him to be a physician, do we mean that we should be right in sending him to those who profess the art, rather than to those who do not, and to those who demand payment for teaching the art, and profess to teach it to any one who will come and learn? And if these were our reasons, should we not be right in sending him?

ANYTUS: Yes.

SOCRATES: And might not the same be said of flute-playing, and of the other arts? Would a man who wanted to make another a flute-player refuse to send him to those who profess to teach the art for money, and be plaguing other persons to give him instruction, who are not professed teachers and who never had a single disciple in that branch of knowledge which he wishes him to acquire — would not such conduct be the height of folly?

ANYTUS: Yes, by Zeus, and of ignorance too.

SOCRATES: Very good. And now you are in a position to advise with me about my friend Meno. He has been telling me, Anytus, that he desires to attain that kind of wisdom and virtue by which men order the state or the house, and honour their parents, and know when to receive and when to send away citizens and strangers, as a good man should. Now, to whom should he go in order that he may learn this virtue? Does not the previous argument imply clearly that we should send him to those who profess and avouch that they are the common teachers of all Hellas, and are ready to impart instruction to any one who likes, at a fixed price?

ANYTUS: Whom do you mean, Socrates?

SOCRATES: You surely know, do you not, Anytus, that these are the people whom mankind call Sophists?

ANYTUS: By Heracles, Socrates, forbear! I only hope that no friend or kinsman or acquaintance of mine, whether citizen or stranger, will ever be so mad as to allow himself to be corrupted by them; for they are a manifest pest and corrupting influence to those who have to do with them.

SOCRATES: What, Anytus? Of all the people who profess that they know how to do men good, do you mean to say that these are the only ones who not only do them no good, but positively corrupt those who are entrusted to them, and in return for this disservice have the face to demand money? Indeed, I cannot believe you; for I know of a single man, Protagoras, who made more out of his craft than the illustrious Pheidias, who created such noble works, or any ten other statuaries. How could that be? A mender of old shoes, or patcher up of clothes, who made the shoes or clothes worse than he received them, could not have remained thirty days undetected, and would very soon have starved; whereas during more than forty years, Protagoras was corrupting all Hellas, and sending his disciples from him worse than he received them, and he was never found out. For, if I am not mistaken, he was about seventy years old at his death, forty

of which were spent in the practice of his profession; and during all that time he had a good reputation, which to this day he retains: and not only Protagoras, but many others are well spoken of; some who lived before him, and others who are still living. Now, when you say that they deceived and corrupted the youth, are they to be supposed to have corrupted them consciously or unconsciously? Can those who were deemed by many to be the wisest men of Hellas have been out of their minds?

ANYTUS: Out of their minds! No, Socrates; the young men who gave their money to them were out of their minds, and their relations and guardians who entrusted their youth to the care of these men were still more out of their minds, and most of all, the cities who allowed them to come in, and did not drive them out, citizen and stranger alike.

SOCRATES: Has any of the Sophists wronged you, Anytus? What makes you so angry with them?

ANYTUS: No, indeed, neither I nor any of my belongings has ever had, nor would I suffer them to have, anything to do with them.

SOCRATES: Then you are entirely unacquainted with them?

ANYTUS: And I have no wish to be acquainted.

SOCRATES: Then, my dear friend, how can you know whether a thing is good or bad of which you are wholly ignorant?

ANYTUS: Quite well; I am sure that I know what manner of men these are, whether I am acquainted with them or not.

SOCRATES: You must be a diviner, Anytus, for I really cannot make out, judging from your own words, how, if you are not acquainted with them, you know about them. But I am not enquiring of you who are the teachers who will corrupt Meno (let them be, if you please, the Sophists); I only ask you to tell him who there is in this great city who will teach him how to become eminent in the virtues which I was just now describing. He is the friend of your family, and you will oblige him.

ANYTUS: Why do you not tell him yourself?

SOCRATES: I have told him whom I supposed to be the teachers of these things; but I learn from you that I am utterly at fault, and I dare say that you are right. And now I wish that you, on your part, would tell me to whom among the Athenians he should go. Whom would you name?

ANYTUS: Why single out individuals? Any Athenian gentleman, taken at random, if he will mind him, will do far more good to him than the Sophists.

SOCRATES: And did those gentlemen grow of themselves; and without having been taught by any one, were they nevertheless able to teach others that which they had never learned themselves?

ANYTUS: I imagine that they learned of the previous generation of gentlemen. Have there not been many good men in this city?

SOCRATES: Yes, certainly, Anytus; and many good statesmen also there always have been and there are still, in the city of Athens. But the question is whether they were also good teachers of their own virtue; — not whether there are, or have been, good men in this part of the world, but whether virtue can be taught, is the question which we have been discussing. Now, do we mean to say that the good men of our own and of other times knew how to impart to others that virtue which they had themselves; or is virtue a thing incapable of being communicated or imparted by one man to another? That is the question which I and Meno have been arguing. Look at the matter in your own way: Would you not admit that Themistocles was a good man?

ANYTUS: Certainly; no man better.

SOCRATES: And must not he then have been a good teacher, if any man ever was a good teacher, of his own virtue?

ANYTUS: Yes certainly, — if he wanted to be so.

SOCRATES: But would he not have wanted? He would, at any rate,

have desired to make his own son a good man and a gentleman; he could not have been jealous of him, or have intentionally abstained from imparting to him his own virtue. Did you never hear that he made his son Cleophantus a famous horseman; and had him taught to stand upright on horseback and hurl a javelin, and to do many other marvellous things; and in anything which could be learned from a master he was well trained? Have you not heard from our elders of him?

ANYTUS: I have.

SOCRATES: Then no one could say that his son showed any want of capacity?

ANYTUS: Very likely not.

SOCRATES: But did any one, old or young, ever say in your hearing that Cleophantus, son of Themistocles, was a wise or good man, as his father was?

ANYTUS: I have certainly never heard any one say so.

SOCRATES: And if virtue could have been taught, would his father Themistocles have sought to train him in these minor accomplishments, and allowed him who, as you must remember, was his own son, to be no better than his neighbours in those qualities in which he himself excelled?

ANYTUS: Indeed, indeed, I think not.

SOCRATES: Here was a teacher of virtue whom you admit to be among the best men of the past. Let us take another, — Aristides, the son of Lysimachus: would you not acknowledge that he was a good man?

ANYTUS: To be sure I should.

SOCRATES: And did not he train his son Lysimachus better than any other Athenian in all that could be done for him by the help of masters? But what has been the result? Is he a bit better than any

other mortal? He is an acquaintance of yours, and you see what he is like. There is Pericles, again, magnificent in his wisdom; and he, as you are aware, had two sons, Paralus and Xanthippus.

ANYTUS: I know.

SOCRATES: And you know, also, that he taught them to be unrivalled horsemen, and had them trained in music and gymnastics and all sorts of arts — in these respects they were on a level with the best — and had he no wish to make good men of them? Nay, he must have wished it. But virtue, as I suspect, could not be taught. And that you may not suppose the incompetent teachers to be only the meaner sort of Athenians and few in number, remember again that Thucydides had two sons, Melesias and Stephanus, whom, besides giving them a good education in other things, he trained in wrestling, and they were the best wrestlers in Athens: one of them he committed to the care of Xanthias, and the other of Eudorus, who had the reputation of being the most celebrated wrestlers of that day. Do you remember them?

ANYTUS: I have heard of them.

SOCRATES: Now, can there be a doubt that Thucydides, whose children were taught things for which he had to spend money, would have taught them to be good men, which would have cost him nothing, if virtue could have been taught? Will you reply that he was a mean man, and had not many friends among the Athenians and allies? Nay, but he was of a great family, and a man of influence at Athens and in all Hellas, and, if virtue could have been taught, he would have found out some Athenian or foreigner who would have made good men of his sons, if he could not himself spare the time from cares of state. Once more, I suspect, friend Anytus, that virtue is not a thing which can be taught?

ANYTUS: Socrates, I think that you are too ready to speak evil of men: and, if you will take my advice, I would recommend you to be careful. Perhaps there is no city in which it is not easier to do men harm than to do them good, and this is certainly the case at Athens,

as I believe that you know.

SOCRATES: O Meno, think that Anytus is in a rage. And he may well be in a rage, for he thinks, in the first place, that I am defaming these gentlemen; and in the second place, he is of opinion that he is one of them himself. But some day he will know what is the meaning of defamation, and if he ever does, he will forgive me. Meanwhile I will return to you, Meno; for I suppose that there are gentlemen in your region too?

MENO: Certainly there are.

SOCRATES: And are they willing to teach the young? and do they profess to be teachers? and do they agree that virtue is taught?

MENO: No indeed, Socrates, they are anything but agreed; you may hear them saying at one time that virtue can be taught, and then again the reverse.

SOCRATES: Can we call those teachers who do not acknowledge the possibility of their own vocation?

MENO: I think not, Socrates.

SOCRATES: And what do you think of these Sophists, who are the only professors? Do they seem to you to be teachers of virtue?

MENO: I often wonder, Socrates, that Gorgias is never heard promising to teach virtue: and when he hears others promising he only laughs at them; but he thinks that men should be taught to speak.

SOCRATES: Then do you not think that the Sophists are teachers?

MENO: I cannot tell you, Socrates; like the rest of the world, I am in doubt, and sometimes I think that they are teachers and sometimes not.

SOCRATES: And are you aware that not you only and other politicians have doubts whether virtue can be taught or not, but that Theognis the poet says the very same thing?

MENO: Where does he say so?

SOCRATES: In these elegiac verses (Theog.):

‘Eat and drink and sit with the mighty, and make yourself agreeable to them; for from the good you will learn what is good, but if you mix with the bad you will lose the intelligence which you already have.’

Do you observe that here he seems to imply that virtue can be taught?

MENO: Clearly.

SOCRATES: But in some other verses he shifts about and says (Theog.):

‘If understanding could be created and put into a man, then they’ (who were able to perform this feat) ‘would have obtained great rewards.’

And again: —

‘Never would a bad son have sprung from a good sire, for he would have heard the voice of instruction; but not by teaching will you ever make a bad man into a good one.’

And this, as you may remark, is a contradiction of the other.

MENO: Clearly.

SOCRATES: And is there anything else of which the professors are affirmed not only not to be teachers of others, but to be ignorant themselves, and bad at the knowledge of that which they are professing to teach? or is there anything about which even the acknowledged ‘gentlemen’ are sometimes saying that ‘this thing can be taught,’ and sometimes the opposite? Can you say that they are teachers in any true sense whose ideas are in such confusion?

MENO: I should say, certainly not.

SOCRATES: But if neither the Sophists nor the gentlemen are teachers, clearly there can be no other teachers?

MENO: No.

SOCRATES: And if there are no teachers, neither are there disciples?

MENO: Agreed.

SOCRATES: And we have admitted that a thing cannot be taught of which there are neither teachers nor disciples?

MENO: We have.

SOCRATES: And there are no teachers of virtue to be found anywhere?

MENO: There are not.

SOCRATES: And if there are no teachers, neither are there scholars?

MENO: That, I think, is true.

SOCRATES: Then virtue cannot be taught?

MENO: Not if we are right in our view. But I cannot believe, Socrates, that there are no good men: And if there are, how did they come into existence?

SOCRATES: I am afraid, Meno, that you and I are not good for much, and that Gorgias has been as poor an educator of you as Prodicus has been of me. Certainly we shall have to look to ourselves, and try to find some one who will help in some way or other to improve us. This I say, because I observe that in the previous discussion none of us remarked that right and good action is possible to man under other guidance than that of knowledge (episteme); — and indeed if this be denied, there is no seeing how there can be any good men at all.

MENO: How do you mean, Socrates?

SOCRATES: I mean that good men are necessarily useful or

profitable. Were we not right in admitting this? It must be so.

MENO: Yes.

SOCRATES: And in supposing that they will be useful only if they are true guides to us of action — there we were also right?

MENO: Yes.

SOCRATES: But when we said that a man cannot be a good guide unless he have knowledge (phrhoneisis), this we were wrong.

MENO: What do you mean by the word ‘right’?

SOCRATES: I will explain. If a man knew the way to Larisa, or anywhere else, and went to the place and led others thither, would he not be a right and good guide?

MENO: Certainly.

SOCRATES: And a person who had a right opinion about the way, but had never been and did not know, might be a good guide also, might he not?

MENO: Certainly.

SOCRATES: And while he has true opinion about that which the other knows, he will be just as good a guide if he thinks the truth, as he who knows the truth?

MENO: Exactly.

SOCRATES: Then true opinion is as good a guide to correct action as knowledge; and that was the point which we omitted in our speculation about the nature of virtue, when we said that knowledge only is the guide of right action; whereas there is also right opinion.

MENO: True.

SOCRATES: Then right opinion is not less useful than knowledge?

MENO: The difference, Socrates, is only that he who has knowledge

will always be right; but he who has right opinion will sometimes be right, and sometimes not.

SOCRATES: What do you mean? Can he be wrong who has right opinion, so long as he has right opinion?

MENO: I admit the cogency of your argument, and therefore, Socrates, I wonder that knowledge should be preferred to right opinion — or why they should ever differ.

SOCRATES: And shall I explain this wonder to you?

MENO: Do tell me.

SOCRATES: You would not wonder if you had ever observed the images of Daedalus (Compare Euthyphro); but perhaps you have not got them in your country?

MENO: What have they to do with the question?

SOCRATES: Because they require to be fastened in order to keep them, and if they are not fastened they will play truant and run away.

MENO: Well, what of that?

SOCRATES: I mean to say that they are not very valuable possessions if they are at liberty, for they will walk off like runaway slaves; but when fastened, they are of great value, for they are really beautiful works of art. Now this is an illustration of the nature of true opinions: while they abide with us they are beautiful and fruitful, but they run away out of the human soul, and do not remain long, and therefore they are not of much value until they are fastened by the tie of the cause; and this fastening of them, friend Meno, is recollection, as you and I have agreed to call it. But when they are bound, in the first place, they have the nature of knowledge; and, in the second place, they are abiding. And this is why knowledge is more honourable and excellent than true opinion, because fastened by a chain.

MENO: What you are saying, Socrates, seems to be very like the

truth.

SOCRATES: I too speak rather in ignorance; I only conjecture. And yet that knowledge differs from true opinion is no matter of conjecture with me. There are not many things which I profess to know, but this is most certainly one of them.

MENO: Yes, Socrates; and you are quite right in saying so.

SOCRATES: And am I not also right in saying that true opinion leading the way perfects action quite as well as knowledge?

MENO: There again, Socrates, I think you are right.

SOCRATES: Then right opinion is not a whit inferior to knowledge, or less useful in action; nor is the man who has right opinion inferior to him who has knowledge?

MENO: True.

SOCRATES: And surely the good man has been acknowledged by us to be useful?

MENO: Yes.

SOCRATES: Seeing then that men become good and useful to states, not only because they have knowledge, but because they have right opinion, and that neither knowledge nor right opinion is given to man by nature or acquired by him — (do you imagine either of them to be given by nature?

MENO: Not I.)

SOCRATES: Then if they are not given by nature, neither are the good by nature good?

MENO: Certainly not.

SOCRATES: And nature being excluded, then came the question whether virtue is acquired by teaching?

MENO: Yes.

SOCRATES: If virtue was wisdom (or knowledge), then, as we thought, it was taught?

MENO: Yes.

SOCRATES: And if it was taught it was wisdom?

MENO: Certainly.

SOCRATES: And if there were teachers, it might be taught; and if there were no teachers, not?

MENO: True.

SOCRATES: But surely we acknowledged that there were no teachers of virtue?

MENO: Yes.

SOCRATES: Then we acknowledged that it was not taught, and was not wisdom?

MENO: Certainly.

SOCRATES: And yet we admitted that it was a good?

MENO: Yes.

SOCRATES: And the right guide is useful and good?

MENO: Certainly.

SOCRATES: And the only right guides are knowledge and true opinion — these are the guides of man; for things which happen by chance are not under the guidance of man: but the guides of man are true opinion and knowledge.

MENO: I think so too.

SOCRATES: But if virtue is not taught, neither is virtue knowledge.

MENO: Clearly not.

SOCRATES: Then of two good and useful things, one, which is knowledge, has been set aside, and cannot be supposed to be our guide in political life.

MENO: I think not.

SOCRATES: And therefore not by any wisdom, and not because they were wise, did Themistocles and those others of whom Anytus spoke govern states. This was the reason why they were unable to make others like themselves — because their virtue was not grounded on knowledge.

MENO: That is probably true, Socrates.

SOCRATES: But if not by knowledge, the only alternative which remains is that statesmen must have guided states by right opinion, which is in politics what divination is in religion; for diviners and also prophets say many things truly, but they know not what they say.

MENO: So I believe.

SOCRATES: And may we not, Meno, truly call those men ‘divine’ who, having no understanding, yet succeed in many a grand deed and word?

MENO: Certainly.

SOCRATES: Then we shall also be right in calling divine those whom we were just now speaking of as diviners and prophets, including the whole tribe of poets. Yes, and statesmen above all may be said to be divine and illumined, being inspired and possessed of God, in which condition they say many grand things, not knowing what they say.

MENO: Yes.

SOCRATES: And the women too, Meno, call good men divine — do they not? and the Spartans, when they praise a good man, say ‘that he is a divine man.’

MENO: And I think, Socrates, that they are right; although very

likely our friend Anytus may take offence at the word.

SOCRATES: I do not care; as for Anytus, there will be another opportunity of talking with him. To sum up our enquiry — the result seems to be, if we are at all right in our view, that virtue is neither natural nor acquired, but an instinct given by God to the virtuous. Nor is the instinct accompanied by reason, unless there may be supposed to be among statesmen some one who is capable of educating statesmen. And if there be such an one, he may be said to be among the living what Homer says that Tiresias was among the dead, ‘he alone has understanding; but the rest are flitting shades’; and he and his virtue in like manner will be a reality among shadows.

MENO: That is excellent, Socrates.

SOCRATES: Then, Meno, the conclusion is that virtue comes to the virtuous by the gift of God. But we shall never know the certain truth until, before asking how virtue is given, we enquire into the actual nature of virtue. I fear that I must go away, but do you, now that you are persuaded yourself, persuade our friend Anytus. And do not let him be so exasperated; if you can conciliate him, you will have done good service to the Athenian people.

MENEXENUS

Translated by Benjamin Jowett

Featuring Socrates and his friend Menexenus, this middle dialogue consists mainly of a lengthy funeral oration, satirising Pericles' famous oration in Thucydides' history of the Peloponnesian War. In the original oration, Pericles advises the Athenians not to yield to their opponents the Spartan's demands, since they are militarily stronger. It served as an unabashed declaration of Athens' right to supremacy simply due to their strength.

Menexenus is one of the few extant sources on the practice of Athenian funeral oratory, even though it is a parody.

Pericles, the famous Athenian general and leader

INTRODUCTION.

The *Menexenus* has more the character of a rhetorical exercise than any other of the Platonic works. The writer seems to have wished to emulate Thucydides, and the far slighter work of Lysias. In his rivalry with the latter, to whom in the *Phaedrus* Plato shows a strong antipathy, he is entirely successful, but he is not equal to Thucydides. The *Menexenus*, though not without real Hellenic interest, falls very far short of the rugged grandeur and political insight of the great historian. The fiction of the speech having been invented by Aspasia is well sustained, and is in the manner of Plato, notwithstanding the anachronism which puts into her mouth an allusion to the peace of Antalcidas, an event occurring forty years after the date of the supposed oration. But Plato, like Shakespeare, is careless of such anachronisms, which are not supposed to strike the mind of the reader. The effect produced by these grandiloquent orations on Socrates, who does not recover after having heard one of them for three days and more, is truly Platonic.

Such discourses, if we may form a judgment from the three which are extant (for the so-called Funeral Oration of Demosthenes is a bad and spurious imitation of Thucydides and Lysias), conformed to a regular type. They began with Gods and ancestors, and the legendary history of Athens, to which succeeded an almost equally fictitious account of later times. The Persian war usually formed the centre of the narrative; in the age of Isocrates and Demosthenes the Athenians were still living on the glories of Marathon and Salamis. The *Menexenus* veils in panegyric the weak places of Athenian history. The war of Athens and Boeotia is a war of liberation; the Athenians gave back the Spartans taken at Sphacteria out of kindness — indeed, the only fault of the city was too great kindness to their enemies, who were more honoured than the friends of others (compare Thucyd., which seems to contain the germ of the idea); we democrats are the aristocracy of virtue, and the like. These are the platitudes and falsehoods in which history is disguised. The taking of Athens is hardly mentioned.

The author of the *Menexenus*, whether Plato or not, is evidently

intending to ridicule the practice, and at the same time to show that he can beat the rhetoricians in their own line, as in the *Phaedrus* he may be supposed to offer an example of what Lysias might have said, and of how much better he might have written in his own style. The orators had recourse to their favourite *loci communes*, one of which, as we find in Lysias, was the shortness of the time allowed them for preparation. But Socrates points out that they had them always ready for delivery, and that there was no difficulty in improvising any number of such orations. To praise the Athenians among the Athenians was easy, — to praise them among the Lacedaemonians would have been a much more difficult task. Socrates himself has turned rhetorician, having learned of a woman, Aspasia, the mistress of Pericles; and any one whose teachers had been far inferior to his own — say, one who had learned from Antiphon the Rhamnusian — would be quite equal to the task of praising men to themselves. When we remember that Antiphon is described by Thucydides as the best pleader of his day, the satire on him and on the whole tribe of rhetoricians is transparent.

The ironical assumption of Socrates, that he must be a good orator because he had learnt of Aspasia, is not coarse, as Schleiermacher supposes, but is rather to be regarded as fanciful. Nor can we say that the offer of Socrates to dance naked out of love for Menexenus, is any more un-Platonic than the threat of physical force which *Phaedrus* uses towards Socrates. Nor is there any real vulgarity in the fear which Socrates expresses that he will get a beating from his mistress, Aspasia: this is the natural exaggeration of what might be expected from an imperious woman. Socrates is not to be taken seriously in all that he says, and Plato, both in the *Symposium* and elsewhere, is not slow to admit a sort of Aristophanic humour. How a great original genius like Plato might or might not have written, what was his conception of humour, or what limits he would have prescribed to himself, if any, in drawing the picture of the Silenus Socrates, are problems which no critical instinct can determine.

On the other hand, the dialogue has several Platonic traits, whether original or imitated may be uncertain. Socrates, when he departs from his character of a ‘know nothing’ and delivers a speech, generally pretends that what he is speaking is not his own

composition. Thus in the *Cratylus* he is run away with; in the *Phaedrus* he has heard somebody say something — is inspired by the genius loci; in the *Symposium* he derives his wisdom from Diotima of Mantinea, and the like. But he does not impose on *Menexenus* by his dissimulation. Without violating the character of Socrates, Plato, who knows so well how to give a hint, or some one writing in his name, intimates clearly enough that the speech in the *Menexenus* like that in the *Phaedrus* is to be attributed to Socrates. The address of the dead to the living at the end of the oration may also be compared to the numerous addresses of the same kind which occur in Plato, in whom the dramatic element is always tending to prevail over the rhetorical. The remark has been often made, that in the *Funeral Oration* of Thucydides there is no allusion to the existence of the dead. But in the *Menexenus* a future state is clearly, although not strongly, asserted.

Whether the *Menexenus* is a genuine writing of Plato, or an imitation only, remains uncertain. In either case, the thoughts are partly borrowed from the *Funeral Oration* of Thucydides; and the fact that they are so, is not in favour of the genuineness of the work. Internal evidence seems to leave the question of authorship in doubt. There are merits and there are defects which might lead to either conclusion. The form of the greater part of the work makes the enquiry difficult; the introduction and the finale certainly wear the look either of Plato or of an extremely skilful imitator. The excellence of the forgery may be fairly adduced as an argument that it is not a forgery at all. In this uncertainty the express testimony of Aristotle, who quotes, in the *Rhetoric*, the well-known words, 'It is easy to praise the Athenians among the Athenians,' from the *Funeral Oration*, may perhaps turn the balance in its favour. It must be remembered also that the work was famous in antiquity, and is included in the Alexandrian catalogues of Platonic writings.

MENEXENUS.

PERSONS OF THE DIALOGUE:

Socrates and Menexenus.

SOCRATES: Whence come you, Menexenus? Are you from the Agora?

MENEXENUS: Yes, Socrates; I have been at the Council.

SOCRATES: And what might you be doing at the Council? And yet I need hardly ask, for I see that you, believing yourself to have arrived at the end of education and of philosophy, and to have had enough of them, are mounting upwards to things higher still, and, though rather young for the post, are intending to govern us elder men, like the rest of your family, which has always provided some one who kindly took care of us.

MENEXENUS: Yes, Socrates, I shall be ready to hold office, if you allow and advise that I should, but not if you think otherwise. I went to the council chamber because I heard that the Council was about to choose some one who was to speak over the dead. For you know that there is to be a public funeral?

SOCRATES: Yes, I know. And whom did they choose?

MENEXENUS: No one; they delayed the election until tomorrow, but I believe that either Archinus or Dion will be chosen.

SOCRATES: O Menexenus! Death in battle is certainly in many respects a noble thing. The dead man gets a fine and costly funeral, although he may have been poor, and an elaborate speech is made over him by a wise man who has long ago prepared what he has to say, although he who is praised may not have been good for much. The speakers praise him for what he has done and for what he has not done — that is the beauty of them — and they steal away our souls with their embellished words; in every conceivable form they

praise the city; and they praise those who died in war, and all our ancestors who went before us; and they praise ourselves also who are still alive, until I feel quite elevated by their laudations, and I stand listening to their words, Menexenus, and become enchanted by them, and all in a moment I imagine myself to have become a greater and nobler and finer man than I was before. And if, as often happens, there are any foreigners who accompany me to the speech, I become suddenly conscious of having a sort of triumph over them, and they seem to experience a corresponding feeling of admiration at me, and at the greatness of the city, which appears to them, when they are under the influence of the speaker, more wonderful than ever. This consciousness of dignity lasts me more than three days, and not until the fourth or fifth day do I come to my senses and know where I am; in the meantime I have been living in the Islands of the Blest. Such is the art of our rhetoricians, and in such manner does the sound of their words keep ringing in my ears.

MENEXENUS: You are always making fun of the rhetoricians, Socrates; this time, however, I am inclined to think that the speaker who is chosen will not have much to say, for he has been called upon to speak at a moment's notice, and he will be compelled almost to improvise.

SOCRATES: But why, my friend, should he not have plenty to say? Every rhetorician has speeches ready made; nor is there any difficulty in improvising that sort of stuff. Had the orator to praise Athenians among Peloponnesians, or Peloponnesians among Athenians, he must be a good rhetorician who could succeed and gain credit. But there is no difficulty in a man's winning applause when he is contending for fame among the persons whom he is praising.

MENEXENUS: Do you think not, Socrates?

SOCRATES: Certainly 'not.'

MENEXENUS: Do you think that you could speak yourself if there should be a necessity, and if the Council were to choose you?

SOCRATES: That I should be able to speak is no great wonder, Menexenus, considering that I have an excellent mistress in the art of rhetoric, — she who has made so many good speakers, and one who was the best among all the Hellenes — Pericles, the son of Xanthippus.

MENEXENUS: And who is she? I suppose that you mean Aspasia.

SOCRATES: Yes, I do; and besides her I had Connus, the son of Metrobius, as a master, and he was my master in music, as she was in rhetoric. No wonder that a man who has received such an education should be a finished speaker; even the pupil of very inferior masters, say, for example, one who had learned music of Lamprus, and rhetoric of Antiphon the Rhamnusian, might make a figure if he were to praise the Athenians among the Athenians.

MENEXENUS: And what would you be able to say if you had to speak?

SOCRATES: Of my own wit, most likely nothing; but yesterday I heard Aspasia composing a funeral oration about these very dead. For she had been told, as you were saying, that the Athenians were going to choose a speaker, and she repeated to me the sort of speech which he should deliver, partly improvising and partly from previous thought, putting together fragments of the funeral oration which Pericles spoke, but which, as I believe, she composed.

MENEXENUS: And can you remember what Aspasia said?

SOCRATES: I ought to be able, for she taught me, and she was ready to strike me because I was always forgetting.

MENEXENUS: Then why will you not rehearse what she said?

SOCRATES: Because I am afraid that my mistress may be angry with me if I publish her speech.

MENEXENUS: Nay, Socrates, let us have the speech, whether Aspasia's or any one else's, no matter. I hope that you will oblige me.

SOCRATES: But I am afraid that you will laugh at me if I continue the games of youth in old age.

MENEXENUS: Far otherwise, Socrates; let us by all means have the speech.

SOCRATES: Truly I have such a disposition to oblige you, that if you bid me dance naked I should not like to refuse, since we are alone. Listen then: If I remember rightly, she began as follows, with the mention of the dead: — (Thucyd.)

There is a tribute of deeds and of words. The departed have already had the first, when going forth on their destined journey they were attended on their way by the state and by their friends; the tribute of words remains to be given to them, as is meet and by law ordained. For noble words are a memorial and a crown of noble actions, which are given to the doers of them by the hearers. A word is needed which will duly praise the dead and gently admonish the living, exhorting the brethren and descendants of the departed to imitate their virtue, and consoling their fathers and mothers and the survivors, if any, who may chance to be alive of the previous generation. What sort of a word will this be, and how shall we rightly begin the praises of these brave men? In their life they rejoiced their own friends with their valour, and their death they gave in exchange for the salvation of the living. And I think that we should praise them in the order in which nature made them good, for they were good because they were sprung from good fathers. Wherefore let us first of all praise the goodness of their birth; secondly, their nurture and education; and then let us set forth how noble their actions were, and how worthy of the education which they had received.

And first as to their birth. Their ancestors were not strangers, nor are these their descendants sojourners only, whose fathers have come from another country; but they are the children of the soil, dwelling and living in their own land. And the country which brought them up is not like other countries, a stepmother to her children, but their own true mother; she bore them and nourished them and received them, and in her bosom they now repose. It is meet and right, therefore,

that we should begin by praising the land which is their mother, and that will be a way of praising their noble birth.

The country is worthy to be praised, not only by us, but by all mankind; first, and above all, as being dear to the Gods. This is proved by the strife and contention of the Gods respecting her. And ought not the country which the Gods praise to be praised by all mankind? The second praise which may be fairly claimed by her, is that at the time when the whole earth was sending forth and creating diverse animals, tame and wild, she our mother was free and pure from savage monsters, and out of all animals selected and brought forth man, who is superior to the rest in understanding, and alone has justice and religion. And a great proof that she brought forth the common ancestors of us and of the departed, is that she provided the means of support for her offspring. For as a woman proves her motherhood by giving milk to her young ones (and she who has no fountain of milk is not a mother), so did this our land prove that she was the mother of men, for in those days she alone and first of all brought forth wheat and barley for human food, which is the best and noblest sustenance for man, whom she regarded as her true offspring. And these are truer proofs of motherhood in a country than in a woman, for the woman in her conception and generation is but the imitation of the earth, and not the earth of the woman. And of the fruit of the earth she gave a plenteous supply, not only to her own, but to others also; and afterwards she made the olive to spring up to be a boon to her children, and to help them in their toils. And when she had herself nursed them and brought them up to manhood, she gave them Gods to be their rulers and teachers, whose names are well known, and need not now be repeated. They are the Gods who first ordered our lives, and instructed us in the arts for the supply of our daily needs, and taught us the acquisition and use of arms for the defence of the country.

Thus born into the world and thus educated, the ancestors of the departed lived and made themselves a government, which I ought briefly to commemorate. For government is the nurture of man, and the government of good men is good, and of bad men bad. And I

must show that our ancestors were trained under a good government, and for this reason they were good, and our contemporaries are also good, among whom our departed friends are to be reckoned. Then as now, and indeed always, from that time to this, speaking generally, our government was an aristocracy — a form of government which receives various names, according to the fancies of men, and is sometimes called democracy, but is really an aristocracy or government of the best which has the approval of the many. For kings we have always had, first hereditary and then elected, and authority is mostly in the hands of the people, who dispense offices and power to those who appear to be most deserving of them. Neither is a man rejected from weakness or poverty or obscurity of origin, nor honoured by reason of the opposite, as in other states, but there is one principle — he who appears to be wise and good is a governor and ruler. The basis of this our government is equality of birth; for other states are made up of all sorts and unequal conditions of men, and therefore their governments are unequal; there are tyrannies and there are oligarchies, in which the one party are slaves and the others masters. But we and our citizens are brethren, the children all of one mother, and we do not think it right to be one another's masters or servants; but the natural equality of birth compels us to seek for legal equality, and to recognize no superiority except in the reputation of virtue and wisdom.

And so their and our fathers, and these, too, our brethren, being nobly born and having been brought up in all freedom, did both in their public and private capacity many noble deeds famous over the whole world. They were the deeds of men who thought that they ought to fight both against Hellenes for the sake of Hellenes on behalf of freedom, and against barbarians in the common interest of Hellas. Time would fail me to tell of their defence of their country against the invasion of Eumolpus and the Amazons, or of their defence of the Argives against the Cadmeians, or of the Heracleids against the Argives; besides, the poets have already declared in song to all mankind their glory, and therefore any commemoration of their deeds in prose which we might attempt would hold a second place. They already have their reward, and I say no more of them; but there

are other worthy deeds of which no poet has worthily sung, and which are still wooing the poet's muse. Of these I am bound to make honourable mention, and shall invoke others to sing of them also in lyric and other strains, in a manner becoming the actors. And first I will tell how the Persians, lords of Asia, were enslaving Europe, and how the children of this land, who were our fathers, held them back. Of these I will speak first, and praise their valour, as is meet and fitting. He who would rightly estimate them should place himself in thought at that time, when the whole of Asia was subject to the third king of Persia. The first king, Cyrus, by his valour freed the Persians, who were his countrymen, and subjected the Medes, who were their lords, and he ruled over the rest of Asia, as far as Egypt; and after him came his son, who ruled all the accessible part of Egypt and Libya; the third king was Darius, who extended the land boundaries of the empire to Scythia, and with his fleet held the sea and the islands. None presumed to be his equal; the minds of all men were enthralled by him — so many and mighty and warlike nations had the power of Persia subdued. Now Darius had a quarrel against us and the Eretrians, because, as he said, we had conspired against Sardis, and he sent 500,000 men in transports and vessels of war, and 300 ships, and Datis as commander, telling him to bring the Eretrians and Athenians to the king, if he wished to keep his head on his shoulders. He sailed against the Eretrians, who were reputed to be amongst the noblest and most warlike of the Hellenes of that day, and they were numerous, but he conquered them all in three days; and when he had conquered them, in order that no one might escape, he searched the whole country after this manner: his soldiers, coming to the borders of Eretria and spreading from sea to sea, joined hands and passed through the whole country, in order that they might be able to tell the king that no one had escaped them. And from Eretria they went to Marathon with a like intention, expecting to bind the Athenians in the same yoke of necessity in which they had bound the Eretrians. Having effected one-half of their purpose, they were in the act of attempting the other, and none of the Hellenes dared to assist either the Eretrians or the Athenians, except the Lacedaemonians, and they arrived a day too late for the battle; but the rest were panic-stricken and kept quiet, too happy in having escaped for a time. He

who has present to his mind that conflict will know what manner of men they were who received the onset of the barbarians at Marathon, and chastened the pride of the whole of Asia, and by the victory which they gained over the barbarians first taught other men that the power of the Persians was not invincible, but that hosts of men and the multitude of riches alike yield to valour. And I assert that those men are the fathers not only of ourselves, but of our liberties and of the liberties of all who are on the continent, for that was the action to which the Hellenes looked back when they ventured to fight for their own safety in the battles which ensued: they became disciples of the men of Marathon. To them, therefore, I assign in my speech the first place, and the second to those who fought and conquered in the sea fights at Salamis and Artemisium; for of them, too, one might have many things to say — of the assaults which they endured by sea and land, and how they repelled them. I will mention only that act of theirs which appears to me to be the noblest, and which followed that of Marathon and came nearest to it; for the men of Marathon only showed the Hellenes that it was possible to ward off the barbarians by land, the many by the few; but there was no proof that they could be defeated by ships, and at sea the Persians retained the reputation of being invincible in numbers and wealth and skill and strength. This is the glory of the men who fought at sea, that they dispelled the second terror which had hitherto possessed the Hellenes, and so made the fear of numbers, whether of ships or men, to cease among them. And so the soldiers of Marathon and the sailors of Salamis became the schoolmasters of Hellas; the one teaching and habituating the Hellenes not to fear the barbarians at sea, and the others not to fear them by land. Third in order, for the number and valour of the combatants, and third in the salvation of Hellas, I place the battle of Plataea. And now the Lacedaemonians as well as the Athenians took part in the struggle; they were all united in this greatest and most terrible conflict of all; wherefore their virtues will be celebrated in times to come, as they are now celebrated by us. But at a later period many Hellenic tribes were still on the side of the barbarians, and there was a report that the great king was going to make a new attempt upon the Hellenes, and therefore justice requires that we should also make mention of those who crowned the previous work

of our salvation, and drove and purged away all barbarians from the sea. These were the men who fought by sea at the river Eurymedon, and who went on the expedition to Cyprus, and who sailed to Egypt and divers other places; and they should be gratefully remembered by us, because they compelled the king in fear for himself to look to his own safety instead of plotting the destruction of Hellas.

And so the war against the barbarians was fought out to the end by the whole city on their own behalf, and on behalf of their countrymen. There was peace, and our city was held in honour; and then, as prosperity makes men jealous, there succeeded a jealousy of her, and jealousy begat envy, and so she became engaged against her will in a war with the Hellenes. On the breaking out of war, our citizens met the Lacedaemonians at Tanagra, and fought for the freedom of the Boeotians; the issue was doubtful, and was decided by the engagement which followed. For when the Lacedaemonians had gone on their way, leaving the Boeotians, whom they were aiding, on the third day after the battle of Tanagra, our countrymen conquered at Oenophyta, and righteously restored those who had been unrighteously exiled. And they were the first after the Persian war who fought on behalf of liberty in aid of Hellenes against Hellenes; they were brave men, and freed those whom they aided, and were the first too who were honourably interred in this sepulchre by the state. Afterwards there was a mighty war, in which all the Hellenes joined, and devastated our country, which was very ungrateful of them; and our countrymen, after defeating them in a naval engagement and taking their leaders, the Spartans, at Sphagia, when they might have destroyed them, spared their lives, and gave them back, and made peace, considering that they should war with the fellow-countrymen only until they gained a victory over them, and not because of the private anger of the state destroy the common interest of Hellas; but that with barbarians they should war to the death. Worthy of praise are they also who waged this war, and are here interred; for they proved, if any one doubted the superior prowess of the Athenians in the former war with the barbarians, that their doubts had no foundation — showing by their victory in the civil war with Hellas, in which they subdued the other chief state of

the Hellenes, that they could conquer single-handed those with whom they had been allied in the war against the barbarians. After the peace there followed a third war, which was of a terrible and desperate nature, and in this many brave men who are here interred lost their lives — many of them had won victories in Sicily, whither they had gone over the seas to fight for the liberties of the Leontines, to whom they were bound by oaths; but, owing to the distance, the city was unable to help them, and they lost heart and came to misfortune, their very enemies and opponents winning more renown for valour and temperance than the friends of others. Many also fell in naval engagements at the Hellespont, after having in one day taken all the ships of the enemy, and defeated them in other naval engagements. And what I call the terrible and desperate nature of the war, is that the other Hellenes, in their extreme animosity towards the city, should have entered into negotiations with their bitterest enemy, the king of Persia, whom they, together with us, had expelled; — him, without us, they again brought back, barbarian against Hellenes, and all the hosts, both of Hellenes and barbarians, were united against Athens. And then shone forth the power and valour of our city. Her enemies had supposed that she was exhausted by the war, and our ships were blockaded at Mitylene. But the citizens themselves embarked, and came to the rescue with sixty other ships, and their valour was confessed of all men, for they conquered their enemies and delivered their friends. And yet by some evil fortune they were left to perish at sea, and therefore are not interred here. Ever to be remembered and honoured are they, for by their valour not only that sea-fight was won for us, but the entire war was decided by them, and through them the city gained the reputation of being invincible, even though attacked by all mankind. And that reputation was a true one, for the defeat which came upon us was our own doing. We were never conquered by others, and to this day we are still unconquered by them; but we were our own conquerors, and received defeat at our own hands. Afterwards there was quiet and peace abroad, but there sprang up war at home; and, if men are destined to have civil war, no one could have desired that his city should take the disorder in a milder form. How joyful and natural was the reconciliation of those who came from the Piraeus and those

who came from the city; with what moderation did they order the war against the tyrants in Eleusis, and in a manner how unlike what the other Hellenes expected! And the reason of this gentleness was the veritable tie of blood, which created among them a friendship as of kinsmen, faithful not in word only, but in deed. And we ought also to remember those who then fell by one another's hands, and on such occasions as these to reconcile them with sacrifices and prayers, praying to those who have power over them, that they may be reconciled even as we are reconciled. For they did not attack one another out of malice or enmity, but they were unfortunate. And that such was the fact we ourselves are witnesses, who are of the same race with them, and have mutually received and granted forgiveness of what we have done and suffered. After this there was perfect peace, and the city had rest; and her feeling was that she forgave the barbarians, who had severely suffered at her hands and severely retaliated, but that she was indignant at the ingratitude of the Hellenes, when she remembered how they had received good from her and returned evil, having made common cause with the barbarians, depriving her of the ships which had once been their salvation, and dismantling our walls, which had preserved their own from falling. She thought that she would no longer defend the Hellenes, when enslaved either by one another or by the barbarians, and did accordingly. This was our feeling, while the Lacedaemonians were thinking that we who were the champions of liberty had fallen, and that their business was to subject the remaining Hellenes. And why should I say more? for the events of which I am speaking happened not long ago and we can all of us remember how the chief peoples of Hellas, Argives and Boeotians and Corinthians, came to feel the need of us, and, what is the greatest miracle of all, the Persian king himself was driven to such extremity as to come round to the opinion, that from this city, of which he was the destroyer, and from no other, his salvation would proceed.

And if a person desired to bring a deserved accusation against our city, he would find only one charge which he could justly urge — that she was too compassionate and too favourable to the weaker side. And in this instance she was not able to hold out or keep her

resolution of refusing aid to her injurers when they were being enslaved, but she was softened, and did in fact send out aid, and delivered the Hellenes from slavery, and they were free until they afterwards enslaved themselves. Whereas, to the great king she refused to give the assistance of the state, for she could not forget the trophies of Marathon and Salamis and Plataea; but she allowed exiles and volunteers to assist him, and they were his salvation. And she herself, when she was compelled, entered into the war, and built walls and ships, and fought with the Lacedaemonians on behalf of the Parians. Now the king fearing this city and wanting to stand aloof, when he saw the Lacedaemonians growing weary of the war at sea, asked of us, as the price of his alliance with us and the other allies, to give up the Hellenes in Asia, whom the Lacedaemonians had previously handed over to him, he thinking that we should refuse, and that then he might have a pretence for withdrawing from us. About the other allies he was mistaken, for the Corinthians and Argives and Boeotians, and the other states, were quite willing to let them go, and swore and covenanted, that, if he would pay them money, they would make over to him the Hellenes of the continent, and we alone refused to give them up and swear. Such was the natural nobility of this city, so sound and healthy was the spirit of freedom among us, and the instinctive dislike of the barbarian, because we are pure Hellenes, having no admixture of barbarism in us. For we are not like many others, descendants of Pelops or Cadmus or Egyptus or Danaus, who are by nature barbarians, and yet pass for Hellenes, and dwell in the midst of us; but we are pure Hellenes, uncontaminated by any foreign element, and therefore the hatred of the foreigner has passed unadulterated into the life-blood of the city. And so, notwithstanding our noble sentiments, we were again isolated, because we were unwilling to be guilty of the base and unholy act of giving up Hellenes to barbarians. And we were in the same case as when we were subdued before; but, by the favour of Heaven, we managed better, for we ended the war without the loss of our ships or walls or colonies; the enemy was only too glad to be quit of us. Yet in this war we lost many brave men, such as were those who fell owing to the ruggedness of the ground at the battle of Corinth, or by treason at Lechaem. Brave men, too, were those who

delivered the Persian king, and drove the Lacedaemonians from the sea. I remind you of them, and you must celebrate them together with me, and do honour to their memories.

Such were the actions of the men who are here interred, and of others who have died on behalf of their country; many and glorious things I have spoken of them, and there are yet many more and more glorious things remaining to be told — many days and nights would not suffice to tell of them. Let them not be forgotten, and let every man remind their descendants that they also are soldiers who must not desert the ranks of their ancestors, or from cowardice fall behind. Even as I exhort you this day, and in all future time, whenever I meet with any of you, shall continue to remind and exhort you, O ye sons of heroes, that you strive to be the bravest of men. And I think that I ought now to repeat what your fathers desired to have said to you who are their survivors, when they went out to battle, in case anything happened to them. I will tell you what I heard them say, and what, if they had only speech, they would fain be saying, judging from what they then said. And you must imagine that you hear them saying what I now repeat to you: —

‘Sons, the event proves that your fathers were brave men; for we might have lived dishonourably, but have preferred to die honourably rather than bring you and your children into disgrace, and rather than dishonour our own fathers and forefathers; considering that life is not life to one who is a dishonour to his race, and that to such a one neither men nor Gods are friendly, either while he is on the earth or after death in the world below. Remember our words, then, and whatever is your aim let virtue be the condition of the attainment of your aim, and know that without this all possessions and pursuits are dishonourable and evil. For neither does wealth bring honour to the owner, if he be a coward; of such a one the wealth belongs to another, and not to himself. Nor does beauty and strength of body, when dwelling in a base and cowardly man, appear comely, but the reverse of comely, making the possessor more conspicuous, and manifesting forth his cowardice. And all knowledge, when separated from justice and virtue, is seen to be cunning and not wisdom;

wherefore make this your first and last and constant and all-absorbing aim, to exceed, if possible, not only us but all your ancestors in virtue; and know that to excel you in virtue only brings us shame, but that to be excelled by you is a source of happiness to us. And we shall most likely be defeated, and you will most likely be victors in the contest, if you learn so to order your lives as not to abuse or waste the reputation of your ancestors, knowing that to a man who has any self-respect, nothing is more dishonourable than to be honoured, not for his own sake, but on account of the reputation of his ancestors. The honour of parents is a fair and noble treasure to their posterity, but to have the use of a treasure of wealth and honour, and to leave none to your successors, because you have neither money nor reputation of your own, is alike base and dishonourable. And if you follow our precepts you will be received by us as friends, when the hour of destiny brings you hither; but if you neglect our words and are disgraced in your lives, no one will welcome or receive you. This is the message which is to be delivered to our children.

‘Some of us have fathers and mothers still living, and we would urge them, if, as is likely, we shall die, to bear the calamity as lightly as possible, and not to condole with one another; for they have sorrows enough, and will not need any one to stir them up. While we gently heal their wounds, let us remind them that the Gods have heard the chief part of their prayers; for they prayed, not that their children might live for ever, but that they might be brave and renowned. And this, which is the greatest good, they have attained. A mortal man cannot expect to have everything in his own life turning out according to his will; and they, if they bear their misfortunes bravely, will be truly deemed brave fathers of the brave. But if they give way to their sorrows, either they will be suspected of not being our parents, or we of not being such as our panegyrists declare. Let not either of the two alternatives happen, but rather let them be our chief and true panegyrists, who show in their lives that they are true men, and had men for their sons. Of old the saying, “Nothing too much,” appeared to be, and really was, well said. For he whose happiness rests with himself, if possible, wholly, and if not, as far as is possible,

— who is not hanging in suspense on other men, or changing with the vicissitude of their fortune, — has his life ordered for the best. He is the temperate and valiant and wise; and when his riches come and go, when his children are given and taken away, he will remember the proverb— “Neither rejoicing overmuch nor grieving overmuch,” for he relies upon himself. And such we would have our parents to be — that is our word and wish, and as such we now offer ourselves, neither lamenting overmuch, nor fearing overmuch, if we are to die at this time. And we entreat our fathers and mothers to retain these feelings throughout their future life, and to be assured that they will not please us by sorrowing and lamenting over us. But, if the dead have any knowledge of the living, they will displease us most by making themselves miserable and by taking their misfortunes too much to heart, and they will please us best if they bear their loss lightly and temperately. For our life will have the noblest end which is vouchsafed to man, and should be glorified rather than lamented. And if they will direct their minds to the care and nurture of our wives and children, they will soonest forget their misfortunes, and live in a better and nobler way, and be dearer to us.

‘This is all that we have to say to our families: and to the state we would say — Take care of our parents and of our sons: let her worthily cherish the old age of our parents, and bring up our sons in the right way. But we know that she will of her own accord take care of them, and does not need any exhortation of ours.’

This, O ye children and parents of the dead, is the message which they bid us deliver to you, and which I do deliver with the utmost seriousness. And in their name I beseech you, the children, to imitate your fathers, and you, parents, to be of good cheer about yourselves; for we will nourish your age, and take care of you both publicly and privately in any place in which one of us may meet one of you who are the parents of the dead. And the care of you which the city shows, you know yourselves; for she has made provision by law concerning the parents and children of those who die in war; the highest authority is specially entrusted with the duty of watching over them above all other citizens, and they will see that your fathers

and mothers have no wrong done to them. The city herself shares in the education of the children, desiring as far as it is possible that their orphanhood may not be felt by them; while they are children she is a parent to them, and when they have arrived at man's estate she sends them to their several duties, in full armour clad; and bringing freshly to their minds the ways of their fathers, she places in their hands the instruments of their fathers' virtues; for the sake of the omen, she would have them from the first begin to rule over their own houses arrayed in the strength and arms of their fathers. And as for the dead, she never ceases honouring them, celebrating in common for all rites which become the property of each; and in addition to this, holding gymnastic and equestrian contests, and musical festivals of every sort. She is to the dead in the place of a son and heir, and to their sons in the place of a father, and to their parents and elder kindred in the place of a guardian — ever and always caring for them. Considering this, you ought to bear your calamity the more gently; for thus you will be most endeared to the dead and to the living, and your sorrows will heal and be healed. And now do you and all, having lamented the dead in common according to the law, go your ways.

You have heard, Menexenus, the oration of Aspasia the Milesian.

MENEXENUS: Truly, Socrates, I marvel that Aspasia, who is only a woman, should be able to compose such a speech; she must be a rare one.

SOCRATES: Well, if you are incredulous, you may come with me and hear her.

MENEXENUS: I have often met Aspasia, Socrates, and know what she is like.

SOCRATES: Well, and do you not admire her, and are you not grateful for her speech?

MENEXENUS: Yes, Socrates, I am very grateful to her or to him who told you, and still more to you who have told me.

SOCRATES: Very good. But you must take care not to tell of me, and then at some future time I will repeat to you many other excellent political speeches of hers.

MENEXENUS: Fear not, only let me hear them, and I will keep the secret.

SOCRATES: Then I will keep my promise.

SYMPOSIUM

Translated by Benjamin Jowett

Written circa 385BC, this famous dialogue seeks to understand the true nature of love and introduces for the first time the concept of Platonic love. Throughout the dialogue, love is examined in a sequence of speeches by men attending a symposium, a drinking party. Each guest delivers an encomium in praise of the god Eros, representing love. The party takes place at the house of the tragedian Agathon in Athens, and features famous real-life characters, including the comedic dramatist Aristophanes and the young and charismatic politician Alcibiades.

Symposium culminates with Socrates' speech, in which he propounds that the highest purpose of love is to become a philosopher, namely a lover of wisdom. The dialogue has been used as a source by social historians seeking to throw light on life in ancient Athens, in particular upon sexual behaviour, and the symposium as an institution.

INTRODUCTION.
SYMPOSIUM

Alcibiades and Aristophanes, two of the guests at the symposium

INTRODUCTION.

Of all the works of Plato the Symposium is the most perfect in form, and may be truly thought to contain more than any commentator has ever dreamed of; or, as Goethe said of one of his own writings, more than the author himself knew. For in philosophy as in prophecy glimpses of the future may often be conveyed in words which could hardly have been understood or interpreted at the time when they were uttered (compare Symp.) — which were wiser than the writer of them meant, and could not have been expressed by him if he had been interrogated about them. Yet Plato was not a mystic, nor in any degree affected by the Eastern influences which afterwards overspread the Alexandrian world. He was not an enthusiast or a sentimentalist, but one who aspired only to see reasoned truth, and whose thoughts are clearly explained in his language. There is no foreign element either of Egypt or of Asia to be found in his writings. And more than any other Platonic work the Symposium is Greek both in style and subject, having a beauty ‘as of a statue,’ while the companion Dialogue of the Phaedrus is marked by a sort of Gothic irregularity. More too than in any other of his Dialogues, Plato is emancipated from former philosophies. The genius of Greek art seems to triumph over the traditions of Pythagorean, Eleatic, or Megarian systems, and ‘the old quarrel of poetry and philosophy’ has at least a superficial reconciliation. (Rep.)

An unknown person who had heard of the discourses in praise of love spoken by Socrates and others at the banquet of Agathon is desirous of having an authentic account of them, which he thinks that he can obtain from Apollodorus, the same excitable, or rather ‘mad’ friend of Socrates, who is afterwards introduced in the Phaedo. He had imagined that the discourses were recent. There he is mistaken: but they are still fresh in the memory of his informant, who had just been repeating them to Glaucon, and is quite prepared to have another rehearsal of them in a walk from the Piræus to Athens. Although he had not been present himself, he had heard them from the best authority. Aristodemus, who is described as having been in past times a humble but inseparable attendant of Socrates, had

reported them to him (compare Xen. Mem.).

The narrative which he had heard was as follows: —

Aristodemus meeting Socrates in holiday attire, is invited by him to a banquet at the house of Agathon, who had been sacrificing in thanksgiving for his tragic victory on the day previous. But no sooner has he entered the house than he finds that he is alone; Socrates has stayed behind in a fit of abstraction, and does not appear until the banquet is half over. On his appearing he and the host jest a little; the question is then asked by Pausanias, one of the guests, ‘What shall they do about drinking? as they had been all well drunk on the day before, and drinking on two successive days is such a bad thing.’ This is confirmed by the authority of Eryximachus the physician, who further proposes that instead of listening to the flute-girl and her ‘noise’ they shall make speeches in honour of love, one after another, going from left to right in the order in which they are reclining at the table. All of them agree to this proposal, and Phaedrus, who is the ‘father’ of the idea, which he has previously communicated to Eryximachus, begins as follows: —

He descants first of all upon the antiquity of love, which is proved by the authority of the poets; secondly upon the benefits which love gives to man. The greatest of these is the sense of honour and dishonour. The lover is ashamed to be seen by the beloved doing or suffering any cowardly or mean act. And a state or army which was made up only of lovers and their loves would be invincible. For love will convert the veriest coward into an inspired hero.

And there have been true loves not only of men but of women also. Such was the love of Alcestis, who dared to die for her husband, and in recompense of her virtue was allowed to come again from the dead. But Orpheus, the miserable harper, who went down to Hades alive, that he might bring back his wife, was mocked with an apparition only, and the gods afterwards contrived his death as the punishment of his cowardliness. The love of Achilles, like that of Alcestis, was courageous and true; for he was willing to avenge his lover Patroclus, although he knew that his own death would immediately follow: and the gods, who honour the love of the beloved above that of the lover, rewarded him, and sent him to the islands of the blest.

Pausanias, who was sitting next, then takes up the tale: — He says that Phaedrus should have distinguished the heavenly love from the earthly, before he praised either. For there are two loves, as there are two Aphrodites — one the daughter of Uranus, who has no mother and is the elder and wiser goddess, and the other, the daughter of Zeus and Dione, who is popular and common. The first of the two loves has a noble purpose, and delights only in the intelligent nature of man, and is faithful to the end, and has no shadow of wantonness or lust. The second is the coarser kind of love, which is a love of the body rather than of the soul, and is of women and boys as well as of men. Now the actions of lovers vary, like every other sort of action, according to the manner of their performance. And in different countries there is a difference of opinion about male loves. Some, like the Boeotians, approve of them; others, like the Ionians, and most of the barbarians, disapprove of them; partly because they are aware of the political dangers which ensue from them, as may be seen in the instance of Harmodius and Aristogeiton. At Athens and Sparta there is an apparent contradiction about them. For at times they are encouraged, and then the lover is allowed to play all sorts of fantastic tricks; he may swear and forswear himself (and ‘at lovers’ perjuries they say Jove laughs’); he may be a servant, and lie on a mat at the door of his love, without any loss of character; but there are also times when elders look grave and guard their young relations, and personal remarks are made. The truth is that some of these loves are disgraceful and others honourable. The vulgar love of the body which takes wing and flies away when the bloom of youth is over, is disgraceful, and so is the interested love of power or wealth; but the love of the noble mind is lasting. The lover should be tested, and the beloved should not be too ready to yield. The rule in our country is that the beloved may do the same service to the lover in the way of virtue which the lover may do to him.

A voluntary service to be rendered for the sake of virtue and wisdom is permitted among us; and when these two customs — one the love of youth, the other the practice of virtue and philosophy — meet in one, then the lovers may lawfully unite. Nor is there any disgrace to a disinterested lover in being deceived: but the interested lover is doubly disgraced, for if he loses his love he loses his

character; whereas the noble love of the other remains the same, although the object of his love is unworthy: for nothing can be nobler than love for the sake of virtue. This is that love of the heavenly goddess which is of great price to individuals and cities, making them work together for their improvement.

The turn of Aristophanes comes next; but he has the hiccough, and therefore proposes that Eryximachus the physician shall cure him or speak in his turn. Eryximachus is ready to do both, and after prescribing for the hiccough, speaks as follows: —

He agrees with Pausanias in maintaining that there are two kinds of love; but his art has led him to the further conclusion that the empire of this double love extends over all things, and is to be found in animals and plants as well as in man. In the human body also there are two loves; and the art of medicine shows which is the good and which is the bad love, and persuades the body to accept the good and reject the bad, and reconciles conflicting elements and makes them friends. Every art, gymnastic and husbandry as well as medicine, is the reconciliation of opposites; and this is what Heracleitus meant, when he spoke of a harmony of opposites: but in strictness he should rather have spoken of a harmony which succeeds opposites, for an agreement of disagreements there cannot be. Music too is concerned with the principles of love in their application to harmony and rhythm. In the abstract, all is simple, and we are not troubled with the twofold love; but when they are applied in education with their accompaniments of song and metre, then the discord begins. Then the old tale has to be repeated of fair Urania and the coarse Polyhymnia, who must be indulged sparingly, just as in my own art of medicine care must be taken that the taste of the epicure be gratified without inflicting upon him the attendant penalty of disease.

There is a similar harmony or disagreement in the course of the seasons and in the relations of moist and dry, hot and cold, hoar frost and blight; and diseases of all sorts spring from the excesses or disorders of the element of love. The knowledge of these elements of love and discord in the heavenly bodies is termed astronomy, in the relations of men towards gods and parents is called divination. For divination is the peacemaker of gods and men, and works by a knowledge of the tendencies of merely human loves to piety and

impiety. Such is the power of love; and that love which is just and temperate has the greatest power, and is the source of all our happiness and friendship with the gods and with one another. I dare say that I have omitted to mention many things which you, Aristophanes, may supply, as I perceive that you are cured of the hiccough.

Aristophanes is the next speaker: —

He professes to open a new vein of discourse, in which he begins by treating of the origin of human nature. The sexes were originally three, men, women, and the union of the two; and they were made round — having four hands, four feet, two faces on a round neck, and the rest to correspond. Terrible was their strength and swiftness; and they were essaying to scale heaven and attack the gods. Doubt reigned in the celestial councils; the gods were divided between the desire of quelling the pride of man and the fear of losing the sacrifices. At last Zeus hit upon an expedient. Let us cut them in two, he said; then they will only have half their strength, and we shall have twice as many sacrifices. He spake, and split them as you might split an egg with a hair; and when this was done, he told Apollo to give their faces a twist and re-arrange their persons, taking out the wrinkles and tying the skin in a knot about the navel. The two halves went about looking for one another, and were ready to die of hunger in one another's arms. Then Zeus invented an adjustment of the sexes, which enabled them to marry and go their way to the business of life. Now the characters of men differ accordingly as they are derived from the original man or the original woman, or the original man-woman. Those who come from the man-woman are lascivious and adulterous; those who come from the woman form female attachments; those who are a section of the male follow the male and embrace him, and in him all their desires centre. The pair are inseparable and live together in pure and manly affection; yet they cannot tell what they want of one another. But if Hephaestus were to come to them with his instruments and propose that they should be melted into one and remain one here and hereafter, they would acknowledge that this was the very expression of their want. For love is the desire of the whole, and the pursuit of the whole is called love. There was a time when the two sexes were only one, but now God

has halved them, — much as the Lacedaemonians have cut up the Arcadians, — and if they do not behave themselves he will divide them again, and they will hop about with half a nose and face in basso relievo. Wherefore let us exhort all men to piety, that we may obtain the goods of which love is the author, and be reconciled to God, and find our own true loves, which rarely happens in this world. And now I must beg you not to suppose that I am alluding to Pausanias and Agathon (compare Protag.), for my words refer to all mankind everywhere.

Some raillery ensues first between Aristophanes and Eryximachus, and then between Agathon, who fears a few select friends more than any number of spectators at the theatre, and Socrates, who is disposed to begin an argument. This is speedily repressed by Phaedrus, who reminds the disputants of their tribute to the god. Agathon's speech follows: —

He will speak of the god first and then of his gifts: He is the fairest and blessedest and best of the gods, and also the youngest, having had no existence in the old days of Iapetus and Cronos when the gods were at war. The things that were done then were done of necessity and not of love. For love is young and dwells in soft places, — not like Ate in Homer, walking on the skulls of men, but in their hearts and souls, which are soft enough. He is all flexibility and grace, and his habitation is among the flowers, and he cannot do or suffer wrong; for all men serve and obey him of their own free will, and where there is love there is obedience, and where obedience, there is justice; for none can be wronged of his own free will. And he is temperate as well as just, for he is the ruler of the desires, and if he rules them he must be temperate. Also he is courageous, for he is the conqueror of the lord of war. And he is wise too; for he is a poet, and the author of poesy in others. He created the animals; he is the inventor of the arts; all the gods are his subjects; he is the fairest and best himself, and the cause of what is fairest and best in others; he makes men to be of one mind at a banquet, filling them with affection and emptying them of disaffection; the pilot, helper, defender, saviour of men, in whose footsteps let every man follow, chanting a strain of love. Such is the discourse, half playful, half serious, which I dedicate to the god.

The turn of Socrates comes next. He begins by remarking satirically that he has not understood the terms of the original agreement, for he fancied that they meant to speak the true praises of love, but now he finds that they only say what is good of him, whether true or false. He begs to be absolved from speaking falsely, but he is willing to speak the truth, and proposes to begin by questioning Agathon. The result of his questions may be summed up as follows: —

Love is of something, and that which love desires is not that which love is or has; for no man desires that which he is or has. And love is of the beautiful, and therefore has not the beautiful. And the beautiful is the good, and therefore, in wanting and desiring the beautiful, love also wants and desires the good. Socrates professes to have asked the same questions and to have obtained the same answers from Diotima, a wise woman of Mantinea, who, like Agathon, had spoken first of love and then of his works. Socrates, like Agathon, had told her that Love is a mighty god and also fair, and she had shown him in return that Love was neither, but in a mean between fair and foul, good and evil, and not a god at all, but only a great demon or intermediate power (compare the speech of Eryximachus) who conveys to the gods the prayers of men, and to men the commands of the gods.

Socrates asks: Who are his father and mother? To this Diotima replies that he is the son of Plenty and Poverty, and partakes of the nature of both, and is full and starved by turns. Like his mother he is poor and squalid, lying on mats at doors (compare the speech of Pausanias); like his father he is bold and strong, and full of arts and resources. Further, he is in a mean between ignorance and knowledge: — in this he resembles the philosopher who is also in a mean between the wise and the ignorant. Such is the nature of Love, who is not to be confused with the beloved.

But Love desires the beautiful; and then arises the question, What does he desire of the beautiful? He desires, of course, the possession of the beautiful; — but what is given by that? For the beautiful let us substitute the good, and we have no difficulty in seeing the possession of the good to be happiness, and Love to be the desire of happiness, although the meaning of the word has been too often

confined to one kind of love. And Love desires not only the good, but the everlasting possession of the good. Why then is there all this flutter and excitement about love? Because all men and women at a certain age are desirous of bringing to the birth. And love is not of beauty only, but of birth in beauty; this is the principle of immortality in a mortal creature. When beauty approaches, then the conceiving power is benign and diffuse; when foulness, she is averted and morose.

But why again does this extend not only to men but also to animals? Because they too have an instinct of immortality. Even in the same individual there is a perpetual succession as well of the parts of the material body as of the thoughts and desires of the mind; nay, even knowledge comes and goes. There is no sameness of existence, but the new mortality is always taking the place of the old. This is the reason why parents love their children — for the sake of immortality; and this is why men love the immortality of fame. For the creative soul creates not children, but conceptions of wisdom and virtue, such as poets and other creators have invented. And the noblest creations of all are those of legislators, in honour of whom temples have been raised. Who would not sooner have these children of the mind than the ordinary human ones? (Compare Bacon's Essays, 8:— 'Certainly the best works and of greatest merit for the public have proceeded from the unmarried or childless men; which both in affection and means have married and endowed the public.')

I will now initiate you, she said, into the greater mysteries; for he who would proceed in due course should love first one fair form, and then many, and learn the connexion of them; and from beautiful bodies he should proceed to beautiful minds, and the beauty of laws and institutions, until he perceives that all beauty is of one kindred; and from institutions he should go on to the sciences, until at last the vision is revealed to him of a single science of universal beauty, and then he will behold the everlasting nature which is the cause of all, and will be near the end. In the contemplation of that supreme being of love he will be purified of earthly leaven, and will behold beauty, not with the bodily eye, but with the eye of the mind, and will bring forth true creations of virtue and wisdom, and be the friend of God and heir of immortality.

Such, Phaedrus, is the tale which I heard from the stranger of Mantinea, and which you may call the encomium of love, or what you please.

The company applaud the speech of Socrates, and Aristophanes is about to say something, when suddenly a band of revellers breaks into the court, and the voice of Alcibiades is heard asking for Agathon. He is led in drunk, and welcomed by Agathon, whom he has come to crown with a garland. He is placed on a couch at his side, but suddenly, on recognizing Socrates, he starts up, and a sort of conflict is carried on between them, which Agathon is requested to appease. Alcibiades then insists that they shall drink, and has a large wine-cooler filled, which he first empties himself, and then fills again and passes on to Socrates. He is informed of the nature of the entertainment; and is ready to join, if only in the character of a drunken and disappointed lover he may be allowed to sing the praises of Socrates: —

He begins by comparing Socrates first to the busts of Silenus, which have images of the gods inside them; and, secondly, to Marsyas the flute-player. For Socrates produces the same effect with the voice which Marsyas did with the flute. He is the great speaker and enchanter who ravishes the souls of men; the convincer of hearts too, as he has convinced Alcibiades, and made him ashamed of his mean and miserable life. Socrates at one time seemed about to fall in love with him; and he thought that he would thereby gain a wonderful opportunity of receiving lessons of wisdom. He narrates the failure of his design. He has suffered agonies from him, and is at his wit's end. He then proceeds to mention some other particulars of the life of Socrates; how they were at Potidaea together, where Socrates showed his superior powers of enduring cold and fatigue; how on one occasion he had stood for an entire day and night absorbed in reflection amid the wonder of the spectators; how on another occasion he had saved Alcibiades' life; how at the battle of Delium, after the defeat, he might be seen stalking about like a pelican, rolling his eyes as Aristophanes had described him in the *Clouds*. He is the most wonderful of human beings, and absolutely unlike anyone but a satyr. Like the satyr in his language too; for he uses the commonest words as the outward mask of the divinest

truths.

When Alcibiades has done speaking, a dispute begins between him and Agathon and Socrates. Socrates piques Alcibiades by a pretended affection for Agathon. Presently a band of revellers appears, who introduce disorder into the feast; the sober part of the company, Eryximachus, Phaedrus, and others, withdraw; and Aristodemus, the follower of Socrates, sleeps during the whole of a long winter's night. When he wakes at cockcrow the revellers are nearly all asleep. Only Socrates, Aristophanes, and Agathon hold out; they are drinking from a large goblet, which they pass round, and Socrates is explaining to the two others, who are half-asleep, that the genius of tragedy is the same as that of comedy, and that the writer of tragedy ought to be a writer of comedy also. And first Aristophanes drops, and then, as the day is dawning, Agathon. Socrates, having laid them to rest, takes a bath and goes to his daily avocations until the evening. Aristodemus follows.

...

If it be true that there are more things in the Symposium of Plato than any commentator has dreamed of, it is also true that many things have been imagined which are not really to be found there. Some writings hardly admit of a more distinct interpretation than a musical composition; and every reader may form his own accompaniment of thought or feeling to the strain which he hears. The Symposium of Plato is a work of this character, and can with difficulty be rendered in any words but the writer's own. There are so many half-lights and cross-lights, so much of the colour of mythology, and of the manner of sophistry adhering — rhetoric and poetry, the playful and the serious, are so subtly intermingled in it, and vestiges of old philosophy so curiously blend with germs of future knowledge, that agreement among interpreters is not to be expected. The expression '*poema magis putandum quam comicorum poetarum*,' which has been applied to all the writings of Plato, is especially applicable to the Symposium.

The power of love is represented in the Symposium as running through all nature and all being: at one end descending to animals and plants, and attaining to the highest vision of truth at the other. In an age when man was seeking for an expression of the world around

him, the conception of love greatly affected him. One of the first distinctions of language and of mythology was that of gender; and at a later period the ancient physicist, anticipating modern science, saw, or thought that he saw, a sex in plants; there were elective affinities among the elements, marriages of earth and heaven. (Aesch. *Frag. Dan.*) Love became a mythic personage whom philosophy, borrowing from poetry, converted into an efficient cause of creation. The traces of the existence of love, as of number and figure, were everywhere discerned; and in the Pythagorean list of opposites male and female were ranged side by side with odd and even, finite and infinite.

But Plato seems also to be aware that there is a mystery of love in man as well as in nature, extending beyond the mere immediate relation of the sexes. He is conscious that the highest and noblest things in the world are not easily severed from the sensual desires, or may even be regarded as a spiritualized form of them. We may observe that Socrates himself is not represented as originally unimpassioned, but as one who has overcome his passions; the secret of his power over others partly lies in his passionate but self-controlled nature. In the *Phaedrus* and *Symposium* love is not merely the feeling usually so called, but the mystical contemplation of the beautiful and the good. The same passion which may wallow in the mire is capable of rising to the loftiest heights — of penetrating the inmost secret of philosophy. The highest love is the love not of a person, but of the highest and purest abstraction. This abstraction is the far-off heaven on which the eye of the mind is fixed in fond amazement. The unity of truth, the consistency of the warring elements of the world, the enthusiasm for knowledge when first beaming upon mankind, the relativity of ideas to the human mind, and of the human mind to ideas, the faith in the invisible, the adoration of the eternal nature, are all included, consciously or unconsciously, in Plato's doctrine of love.

The successive speeches in praise of love are characteristic of the speakers, and contribute in various degrees to the final result; they are all designed to prepare the way for Socrates, who gathers up the threads anew, and skims the highest points of each of them. But they are not to be regarded as the stages of an idea, rising above one

another to a climax. They are fanciful, partly facetious performances, 'yet also having a certain measure of seriousness,' which the successive speakers dedicate to the god. All of them are rhetorical and poetical rather than dialectical, but glimpses of truth appear in them. When Eryximachus says that the principles of music are simple in themselves, but confused in their application, he touches lightly upon a difficulty which has troubled the moderns as well as the ancients in music, and may be extended to the other applied sciences. That confusion begins in the concrete, was the natural feeling of a mind dwelling in the world of ideas. When Pausanias remarks that personal attachments are inimical to despots. The experience of Greek history confirms the truth of his remark. When Aristophanes declares that love is the desire of the whole, he expresses a feeling not unlike that of the German philosopher, who says that 'philosophy is home sickness.' When Agathon says that no man 'can be wronged of his own free will,' he is alluding playfully to a serious problem of Greek philosophy (compare Arist. Nic. Ethics). So naturally does Plato mingle jest and earnest, truth and opinion in the same work.

The characters — of Phaedrus, who has been the cause of more philosophical discussions than any other man, with the exception of Simmias the Theban (Phaedrus); of Aristophanes, who disguises under comic imagery a serious purpose; of Agathon, who in later life is satirized by Aristophanes in the *Thesmophoriazusae*, for his effeminate manners and the feeble rhythms of his verse; of Alcibiades, who is the same strange contrast of great powers and great vices, which meets us in history — are drawn to the life; and we may suppose the less-known characters of Pausanias and Eryximachus to be also true to the traditional recollection of them (compare *Phaedr.*, *Protag.*; and compare *Sympos.* with *Phaedr.*). We may also remark that Aristodemus is called 'the little' in Xenophon's *Memorabilia* (compare *Symp.*).

The speeches have been said to follow each other in pairs: Phaedrus and Pausanias being the ethical, Eryximachus and Aristophanes the physical speakers, while in Agathon and Socrates poetry and philosophy blend together. The speech of Phaedrus is also described as the mythological, that of Pausanias as the political, that

of Eryximachus as the scientific, that of Aristophanes as the artistic (!), that of Socrates as the philosophical. But these and similar distinctions are not found in Plato; — they are the points of view of his critics, and seem to impede rather than to assist us in understanding him.

When the turn of Socrates comes round he cannot be allowed to disturb the arrangement made at first. With the leave of Phaedrus he asks a few questions, and then he throws his argument into the form of a speech (compare *Gorg.*, *Protag.*). But his speech is really the narrative of a dialogue between himself and Diotima. And as at a banquet good manners would not allow him to win a victory either over his host or any of the guests, the superiority which he gains over Agathon is ingeniously represented as having been already gained over himself by her. The artifice has the further advantage of maintaining his accustomed profession of ignorance (compare *Menex.*). Even his knowledge of the mysteries of love, to which he lays claim here and elsewhere (*Lys.*), is given by Diotima.

The speeches are attested to us by the very best authority. The madman Apollodorus, who for three years past has made a daily study of the actions of Socrates — to whom the world is summed up in the words ‘Great is Socrates’ — he has heard them from another ‘madman,’ Aristodemus, who was the ‘shadow’ of Socrates in days of old, like him going about barefooted, and who had been present at the time. ‘Would you desire better witness?’ The extraordinary narrative of Alcibiades is ingeniously represented as admitted by Socrates, whose silence when he is invited to contradict gives consent to the narrator. We may observe, by the way, (1) how the very appearance of Aristodemus by himself is a sufficient indication to Agathon that Socrates has been left behind; also, (2) how the courtesy of Agathon anticipates the excuse which Socrates was to have made on Aristodemus’ behalf for coming uninvited; (3) how the story of the fit or trance of Socrates is confirmed by the mention which Alcibiades makes of a similar fit of abstraction occurring when he was serving with the army at Potidaea; like (4) the drinking powers of Socrates and his love of the fair, which receive a similar attestation in the concluding scene; or the attachment of Aristodemus, who is not forgotten when Socrates takes his departure.

(5) We may notice the manner in which Socrates himself regards the first five speeches, not as true, but as fanciful and exaggerated encomiums of the god Love; (6) the satirical character of them, shown especially in the appeals to mythology, in the reasons which are given by Zeus for reconstructing the frame of man, or by the Boeotians and Eleans for encouraging male loves; (7) the ruling passion of Socrates for dialectics, who will argue with Agathon instead of making a speech, and will only speak at all upon the condition that he is allowed to speak the truth. We may note also the touch of Socratic irony, (8) which admits of a wide application and reveals a deep insight into the world: — that in speaking of holy things and persons there is a general understanding that you should praise them, not that you should speak the truth about them — this is the sort of praise which Socrates is unable to give. Lastly, (9) we may remark that the banquet is a real banquet after all, at which love is the theme of discourse, and huge quantities of wine are drunk.

The discourse of Phaedrus is half-mythical, half-ethical; and he himself, true to the character which is given him in the Dialogue bearing his name, is half-sophist, half-enthusiast. He is the critic of poetry also, who compares Homer and Aeschylus in the insipid and irrational manner of the schools of the day, characteristically reasoning about the probability of matters which do not admit of reasoning. He starts from a noble text: 'That without the sense of honour and dishonour neither states nor individuals ever do any good or great work.' But he soon passes on to more common-place topics. The antiquity of love, the blessing of having a lover, the incentive which love offers to daring deeds, the examples of Alcestis and Achilles, are the chief themes of his discourse. The love of women is regarded by him as almost on an equality with that of men; and he makes the singular remark that the gods favour the return of love which is made by the beloved more than the original sentiment, because the lover is of a nobler and diviner nature.

There is something of a sophistical ring in the speech of Phaedrus, which recalls the first speech in imitation of Lysias, occurring in the Dialogue called the Phaedrus. This is still more marked in the speech of Pausanias which follows; and which is at once hyperlogical in form and also extremely confused and pedantic. Plato is attacking the

logical feebleness of the sophists and rhetoricians, through their pupils, not forgetting by the way to satirize the monotonous and unmeaning rhythms which Prodicus and others were introducing into Attic prose (compare Protag.). Of course, he is 'playing both sides of the game,' as in the *Gorgias* and *Phaedrus*; but it is not necessary in order to understand him that we should discuss the fairness of his mode of proceeding. The love of Pausanias for Agathon has already been touched upon in the *Protagoras*, and is alluded to by Aristophanes. Hence he is naturally the upholder of male loves, which, like all the other affections or actions of men, he regards as varying according to the manner of their performance. Like the sophists and like Plato himself, though in a different sense, he begins his discussion by an appeal to mythology, and distinguishes between the elder and younger love. The value which he attributes to such loves as motives to virtue and philosophy is at variance with modern and Christian notions, but is in accordance with Hellenic sentiment. The opinion of Christendom has not altogether condemned passionate friendships between persons of the same sex, but has certainly not encouraged them, because though innocent in themselves in a few temperaments they are liable to degenerate into fearful evil. Pausanias is very earnest in the defence of such loves; and he speaks of them as generally approved among Hellenes and disapproved by barbarians. His speech is 'more words than matter,' and might have been composed by a pupil of Lysias or of Prodicus, although there is no hint given that Plato is specially referring to them. As Eryximachus says, 'he makes a fair beginning, but a lame ending.'

Plato transposes the two next speeches, as in the *Republic* he would transpose the virtues and the mathematical sciences. This is done partly to avoid monotony, partly for the sake of making Aristophanes 'the cause of wit in others,' and also in order to bring the comic and tragic poet into juxtaposition, as if by accident. A suitable 'expectation' of Aristophanes is raised by the ludicrous circumstance of his having the hiccough, which is appropriately cured by his substitute, the physician Eryximachus. To Eryximachus Love is the good physician; he sees everything as an intelligent physicist, and, like many professors of his art in modern times,

attempts to reduce the moral to the physical; or recognises one law of love which pervades them both. There are loves and strifes of the body as well as of the mind. Like Hippocrates the Asclepiad, he is a disciple of Heracleitus, whose conception of the harmony of opposites he explains in a new way as the harmony after discord; to his common sense, as to that of many moderns as well as ancients, the identity of contradictories is an absurdity. His notion of love may be summed up as the harmony of man with himself in soul as well as body, and of all things in heaven and earth with one another.

Aristophanes is ready to laugh and make laugh before he opens his mouth, just as Socrates, true to his character, is ready to argue before he begins to speak. He expresses the very genius of the old comedy, its coarse and forcible imagery, and the licence of its language in speaking about the gods. He has no sophistical notions about love, which is brought back by him to its common-sense meaning of love between intelligent beings. His account of the origin of the sexes has the greatest (comic) probability and verisimilitude. Nothing in Aristophanes is more truly Aristophanic than the description of the human monster whirling round on four arms and four legs, eight in all, with incredible rapidity. Yet there is a mixture of earnestness in this jest; three serious principles seem to be insinuated: — first, that man cannot exist in isolation; he must be reunited if he is to be perfected: secondly, that love is the mediator and reconciler of poor, divided human nature: thirdly, that the loves of this world are an indistinct anticipation of an ideal union which is not yet realized.

The speech of Agathon is conceived in a higher strain, and receives the real, if half-ironical, approval of Socrates. It is the speech of the tragic poet and a sort of poem, like tragedy, moving among the gods of Olympus, and not among the elder or Orphic deities. In the idea of the antiquity of love he cannot agree; love is not of the olden time, but present and youthful ever. The speech may be compared with that speech of Socrates in the *Phaedrus* in which he describes himself as talking dithyrambs. It is at once a preparation for Socrates and a foil to him. The rhetoric of Agathon elevates the soul to ‘sunlit heights,’ but at the same time contrasts with the natural and necessary eloquence of Socrates. Agathon contributes the

distinction between love and the works of love, and also hints incidentally that love is always of beauty, which Socrates afterwards raises into a principle. While the consciousness of discord is stronger in the comic poet Aristophanes, Agathon, the tragic poet, has a deeper sense of harmony and reconciliation, and speaks of Love as the creator and artist.

All the earlier speeches embody common opinions coloured with a tinge of philosophy. They furnish the material out of which Socrates proceeds to form his discourse, starting, as in other places, from mythology and the opinions of men. From Phaedrus he takes the thought that love is stronger than death; from Pausanias, that the true love is akin to intellect and political activity; from Eryximachus, that love is a universal phenomenon and the great power of nature; from Aristophanes, that love is the child of want, and is not merely the love of the congenial or of the whole, but (as he adds) of the good; from Agathon, that love is of beauty, not however of beauty only, but of birth in beauty. As it would be out of character for Socrates to make a lengthened harangue, the speech takes the form of a dialogue between Socrates and a mysterious woman of foreign extraction. She elicits the final truth from one who knows nothing, and who, speaking by the lips of another, and himself a despiser of rhetoric, is proved also to be the most consummate of rhetoricians (compare Menexenus).

The last of the six discourses begins with a short argument which overthrows not only Agathon but all the preceding speakers by the help of a distinction which has escaped them. Extravagant praises have been ascribed to Love as the author of every good; no sort of encomium was too high for him, whether deserved and true or not. But Socrates has no talent for speaking anything but the truth, and if he is to speak the truth of Love he must honestly confess that he is not a good at all: for love is of the good, and no man can desire that which he has. This piece of dialectics is ascribed to Diotima, who has already urged upon Socrates the argument which he urges against Agathon. That the distinction is a fallacy is obvious; it is almost acknowledged to be so by Socrates himself. For he who has beauty or good may desire more of them; and he who has beauty or good in himself may desire beauty and good in others. The fallacy seems to

arise out of a confusion between the abstract ideas of good and beauty, which do not admit of degrees, and their partial realization in individuals.

But Diotima, the prophetess of Mantinea, whose sacred and superhuman character raises her above the ordinary proprieties of women, has taught Socrates far more than this about the art and mystery of love. She has taught him that love is another aspect of philosophy. The same want in the human soul which is satisfied in the vulgar by the procreation of children, may become the highest aspiration of intellectual desire. As the Christian might speak of hungering and thirsting after righteousness; or of divine loves under the figure of human (compare Eph. 'This is a great mystery, but I speak concerning Christ and the church'); as the mediaeval saint might speak of the 'fruitio Dei,' as Dante saw all things contained in his love of Beatrice, so Plato would have us absorb all other loves and desires in the love of knowledge. Here is the beginning of Neoplatonism, or rather, perhaps, a proof (of which there are many) that the so-called mysticism of the East was not strange to the Greek of the fifth century before Christ. The first tumult of the affections was not wholly subdued; there were longings of a creature moving about in worlds not realized, which no art could satisfy. To most men reason and passion appear to be antagonistic both in idea and fact. The union of the greatest comprehension of knowledge and the burning intensity of love is a contradiction in nature, which may have existed in a far-off primeval age in the mind of some Hebrew prophet or other Eastern sage, but has now become an imagination only. Yet this 'passion of the reason' is the theme of the Symposium of Plato. And as there is no impossibility in supposing that 'one king, or son of a king, may be a philosopher,' so also there is a probability that there may be some few — perhaps one or two in a whole generation — in whom the light of truth may not lack the warmth of desire. And if there be such natures, no one will be disposed to deny that 'from them flow most of the benefits of individuals and states;' and even from imperfect combinations of the two elements in teachers or statesmen great good may often arise.

Yet there is a higher region in which love is not only felt, but satisfied, in the perfect beauty of eternal knowledge, beginning with

the beauty of earthly things, and at last reaching a beauty in which all existence is seen to be harmonious and one. The limited affection is enlarged, and enabled to behold the ideal of all things. And here the highest summit which is reached in the Symposium is seen also to be the highest summit which is attained in the Republic, but approached from another side; and there is 'a way upwards and downwards,' which is the same and not the same in both. The ideal beauty of the one is the ideal good of the other; regarded not with the eye of knowledge, but of faith and desire; and they are respectively the source of beauty and the source of good in all other things. And by the steps of a 'ladder reaching to heaven' we pass from images of visible beauty (Greek), and from the hypotheses of the Mathematical sciences, which are not yet based upon the idea of good, through the concrete to the abstract, and, by different paths arriving, behold the vision of the eternal (compare Symp. (Greek) Republic (Greek) also Phaedrus). Under one aspect 'the idea is love'; under another, 'truth.' In both the lover of wisdom is the 'spectator of all time and of all existence.' This is a 'mystery' in which Plato also obscurely intimates the union of the spiritual and fleshly, the interpenetration of the moral and intellectual faculties.

The divine image of beauty which resides within Socrates has been revealed; the Silenus, or outward man, has now to be exhibited. The description of Socrates follows immediately after the speech of Socrates; one is the complement of the other. At the height of divine inspiration, when the force of nature can no further go, by way of contrast to this extreme idealism, Alcibiades, accompanied by a troop of revellers and a flute-girl, staggers in, and being drunk is able to tell of things which he would have been ashamed to make known if he had been sober. The state of his affections towards Socrates, unintelligible to us and perverted as they appear, affords an illustration of the power ascribed to the loves of man in the speech of Pausanias. He does not suppose his feelings to be peculiar to himself: there are several other persons in the company who have been equally in love with Socrates, and like himself have been deceived by him. The singular part of this confession is the combination of the most degrading passion with the desire of virtue and improvement. Such an union is not wholly untrue to human nature, which is

capable of combining good and evil in a degree beyond what we can easily conceive. In imaginative persons, especially, the God and beast in man seem to part asunder more than is natural in a well-regulated mind. The Platonic Socrates (for of the real Socrates this may be doubted: compare his public rebuke of Critias for his shameful love of Euthydemus in Xenophon, *Memorabilia*) does not regard the greatest evil of Greek life as a thing not to be spoken of; but it has a ridiculous element (Plato's *Symp.*), and is a subject for irony, no less than for moral reprobation (compare Plato's *Symp.*). It is also used as a figure of speech which no one interpreted literally (compare Xen. *Symp.*). Nor does Plato feel any repugnance, such as would be felt in modern times, at bringing his great master and hero into connexion with nameless crimes. He is contented with representing him as a saint, who has won 'the Olympian victory' over the temptations of human nature. The fault of taste, which to us is so glaring and which was recognized by the Greeks of a later age (Athenaeus), was not perceived by Plato himself. We are still more surprised to find that the philosopher is incited to take the first step in his upward progress (*Symp.*) by the beauty of young men and boys, which was alone capable of inspiring the modern feeling of romance in the Greek mind. The passion of love took the spurious form of an enthusiasm for the ideal of beauty — a worship as of some godlike image of an Apollo or Antinous. But the love of youth when not depraved was a love of virtue and modesty as well as of beauty, the one being the expression of the other; and in certain Greek states, especially at Sparta and Thebes, the honourable attachment of a youth to an elder man was a part of his education. The 'army of lovers and their beloved who would be invincible if they could be united by such a tie' (*Symp.*), is not a mere fiction of Plato's, but seems actually to have existed at Thebes in the days of Epaminondas and Pelopidas, if we may believe writers cited anonymously by Plutarch, *Pelop. Vit.* It is observable that Plato never in the least degree excuses the depraved love of the body (compare *Charm.*; *Rep.*; *Laws*; *Symp.*; and once more Xenophon, *Mem.*), nor is there any Greek writer of mark who condones or approves such connexions. But owing partly to the puzzling nature of the subject these friendships are spoken of by Plato in a manner different from

that customary among ourselves. To most of them we should hesitate to ascribe, any more than to the attachment of Achilles and Patroclus in Homer, an immoral or licentious character. There were many, doubtless, to whom the love of the fair mind was the noblest form of friendship (Rep.), and who deemed the friendship of man with man to be higher than the love of woman, because altogether separated from the bodily appetites. The existence of such attachments may be reasonably attributed to the inferiority and seclusion of woman, and the want of a real family or social life and parental influence in Hellenic cities; and they were encouraged by the practice of gymnastic exercises, by the meetings of political clubs, and by the tie of military companionship. They were also an educational institution: a young person was specially entrusted by his parents to some elder friend who was expected by them to train their son in manly exercises and in virtue. It is not likely that a Greek parent committed him to a lover, any more than we should to a schoolmaster, in the expectation that he would be corrupted by him, but rather in the hope that his morals would be better cared for than was possible in a great household of slaves.

It is difficult to adduce the authority of Plato either for or against such practices or customs, because it is not always easy to determine whether he is speaking of 'the heavenly and philosophical love, or of the coarse Polyhymnia:' and he often refers to this (e.g. in the Symposium) half in jest, yet 'with a certain degree of seriousness.' We observe that they entered into one part of Greek literature, but not into another, and that the larger part is free from such associations. Indecency was an element of the ludicrous in the old Greek Comedy, as it has been in other ages and countries. But effeminate love was always condemned as well as ridiculed by the Comic poets; and in the New Comedy the allusions to such topics have disappeared. They seem to have been no longer tolerated by the greater refinement of the age. False sentiment is found in the Lyric and Elegiac poets; and in mythology 'the greatest of the Gods' (Rep.) is not exempt from evil imputations. But the morals of a nation are not to be judged of wholly by its literature. Hellas was not necessarily more corrupted in the days of the Persian and Peloponnesian wars, or of Plato and the Orators, than England in the time of Fielding and Smollett, or France

in the nineteenth century. No one supposes certain French novels to be a representation of ordinary French life. And the greater part of Greek literature, beginning with Homer and including the tragedians, philosophers, and, with the exception of the Comic poets (whose business was to raise a laugh by whatever means), all the greater writers of Hellas who have been preserved to us, are free from the taint of indecency.

Some general considerations occur to our mind when we begin to reflect on this subject. (1) That good and evil are linked together in human nature, and have often existed side by side in the world and in man to an extent hardly credible. We cannot distinguish them, and are therefore unable to part them; as in the parable 'they grow together unto the harvest:' it is only a rule of external decency by which society can divide them. Nor should we be right in inferring from the prevalence of any one vice or corruption that a state or individual was demoralized in their whole character. Not only has the corruption of the best been sometimes thought to be the worst, but it may be remarked that this very excess of evil has been the stimulus to good (compare Plato, *Laws*, where he says that in the most corrupt cities individuals are to be found beyond all praise). (2) It may be observed that evils which admit of degrees can seldom be rightly estimated, because under the same name actions of the most different degrees of culpability may be included. No charge is more easily set going than the imputation of secret wickedness (which cannot be either proved or disproved and often cannot be defined) when directed against a person of whom the world, or a section of it, is predisposed to think evil. And it is quite possible that the malignity of Greek scandal, aroused by some personal jealousy or party enmity, may have converted the innocent friendship of a great man for a noble youth into a connexion of another kind. Such accusations were brought against several of the leading men of Hellas, e.g. Cimon, Alcibiades, Critias, Demosthenes, Epaminondas: several of the Roman emperors were assailed by similar weapons which have been used even in our own day against statesmen of the highest character. (3) While we know that in this matter there is a great gulf fixed between Greek and Christian Ethics, yet, if we would do justice to the Greeks, we must also acknowledge that there was a greater

outspokenness among them than among ourselves about the things which nature hides, and that the more frequent mention of such topics is not to be taken as the measure of the prevalence of offences, or as a proof of the general corruption of society. It is likely that every religion in the world has used words or practised rites in one age, which have become distasteful or repugnant to another. We cannot, though for different reasons, trust the representations either of Comedy or Satire; and still less of Christian Apologists. (4) We observe that at Thebes and Lacedemon the attachment of an elder friend to a beloved youth was often deemed to be a part of his education; and was encouraged by his parents — it was only shameful if it degenerated into licentiousness. Such we may believe to have been the tie which united Asophychus and Cephisodorus with the great Epaminondas in whose companionship they fell (Plutarch, *Amat.*; Athenaeus on the authority of Theopompus). (5) A small matter: there appears to be a difference of custom among the Greeks and among ourselves, as between ourselves and continental nations at the present time, in modes of salutation. We must not suspect evil in the hearty kiss or embrace of a male friend ‘returning from the army at Potidaea’ any more than in a similar salutation when practised by members of the same family. But those who make these admissions, and who regard, not without pity, the victims of such illusions in our own day, whose life has been blasted by them, may be none the less resolved that the natural and healthy instincts of mankind shall alone be tolerated (Greek); and that the lesson of manliness which we have inherited from our fathers shall not degenerate into sentimentalism or effeminacy. The possibility of an honourable connexion of this kind seems to have died out with Greek civilization. Among the Romans, and also among barbarians, such as the Celts and Persians, there is no trace of such attachments existing in any noble or virtuous form.

(Compare Hoeck’s *Creta* and the admirable and exhaustive article of Meier in Ersch and Grueber’s *Cyclopedia* on this subject; Plutarch, *Amatores*; Athenaeus; Lysias *contra Simonem*; Aesch. c. *Timarchum*.)

The character of Alcibiades in the *Symposium* is hardly less remarkable than that of Socrates, and agrees with the picture given of

him in the first of the two Dialogues which are called by his name, and also with the slight sketch of him in the *Protagoras*. He is the impersonation of lawlessness— ‘the lion’s whelp, who ought not to be reared in the city,’ yet not without a certain generosity which gained the hearts of men, — strangely fascinated by Socrates, and possessed of a genius which might have been either the destruction or salvation of Athens. The dramatic interest of the character is heightened by the recollection of his after history. He seems to have been present to the mind of Plato in the description of the democratic man of the *Republic* (compare also *Alcibiades* 1).

There is no criterion of the date of the *Symposium*, except that which is furnished by the allusion to the division of Arcadia after the destruction of Mantinea. This took place in the year B.C. 384, which is the forty-fourth year of Plato’s life. The *Symposium* cannot therefore be regarded as a youthful work. As Mantinea was restored in the year 369, the composition of the Dialogue will probably fall between 384 and 369. Whether the recollection of the event is more likely to have been renewed at the destruction or restoration of the city, rather than at some intermediate period, is a consideration not worth raising.

The *Symposium* is connected with the *Phaedrus* both in style and subject; they are the only Dialogues of Plato in which the theme of love is discussed at length. In both of them philosophy is regarded as a sort of enthusiasm or madness; Socrates is himself ‘a prophet new inspired’ with Bacchanalian revelry, which, like his philosophy, he characteristically pretends to have derived not from himself but from others. The *Phaedo* also presents some points of comparison with the *Symposium*. For there, too, philosophy might be described as ‘dying for love;’ and there are not wanting many touches of humour and fancy, which remind us of the *Symposium*. But while the *Phaedo* and *Phaedrus* look backwards and forwards to past and future states of existence, in the *Symposium* there is no break between this world and another; and we rise from one to the other by a regular series of steps or stages, proceeding from the particulars of sense to the universal of reason, and from one universal to many, which are finally reunited in a single science (compare *Rep.*). At first immortality means only the succession of existences; even

knowledge comes and goes. Then follows, in the language of the mysteries, a higher and a higher degree of initiation; at last we arrive at the perfect vision of beauty, not relative or changing, but eternal and absolute; not bounded by this world, or in or out of this world, but an aspect of the divine, extending over all things, and having no limit of space or time: this is the highest knowledge of which the human mind is capable. Plato does not go on to ask whether the individual is absorbed in the sea of light and beauty or retains his personality. Enough for him to have attained the true beauty or good, without enquiring precisely into the relation in which human beings stood to it. That the soul has such a reach of thought, and is capable of partaking of the eternal nature, seems to imply that she too is eternal (compare *Phaedrus*). But Plato does not distinguish the eternal in man from the eternal in the world or in God. He is willing to rest in the contemplation of the idea, which to him is the cause of all things (*Rep.*), and has no strength to go further.

The *Symposium* of Xenophon, in which Socrates describes himself as a pander, and also discourses of the difference between sensual and sentimental love, likewise offers several interesting points of comparison. But the suspicion which hangs over other writings of Xenophon, and the numerous minute references to the *Phaedrus* and *Symposium*, as well as to some of the other writings of Plato, throw a doubt on the genuineness of the work. The *Symposium* of Xenophon, if written by him at all, would certainly show that he wrote against Plato, and was acquainted with his works. Of this hostility there is no trace in the *Memorabilia*. Such a rivalry is more characteristic of an imitator than of an original writer. The (so-called) *Symposium* of Xenophon may therefore have no more title to be regarded as genuine than the confessedly spurious *Apology*.

There are no means of determining the relative order in time of the *Phaedrus*, *Symposium*, *Phaedo*. The order which has been adopted in this translation rests on no other principle than the desire to bring together in a series the memorials of the life of Socrates.

SYMPOSIUM

PERSONS OF THE DIALOGUE:

Apollodorus, who repeats to his companion the dialogue which he had heard from Aristodemus, and had already once narrated to Glaucon. Phaedrus, Pausanias, Eryximachus, Aristophanes, Agathon, Socrates, Alcibiades, A Troop of Revellers.

SCENE: The House of Agathon.

Concerning the things about which you ask to be informed I believe that I am not ill-prepared with an answer. For the day before yesterday I was coming from my own home at Phalerum to the city, and one of my acquaintance, who had caught a sight of me from behind, calling out playfully in the distance, said: Apollodorus, O thou Phalerian (Probably a play of words on (Greek), 'bald-headed.') man, halt! So I did as I was bid; and then he said, I was looking for you, Apollodorus, only just now, that I might ask you about the speeches in praise of love, which were delivered by Socrates, Alcibiades, and others, at Agathon's supper. Phoenix, the son of Philip, told another person who told me of them; his narrative was very indistinct, but he said that you knew, and I wish that you would give me an account of them. Who, if not you, should be the reporter of the words of your friend? And first tell me, he said, were you present at this meeting?

Your informant, Glaucon, I said, must have been very indistinct indeed, if you imagine that the occasion was recent; or that I could have been of the party.

Why, yes, he replied, I thought so.

Impossible: I said. Are you ignorant that for many years Agathon has not resided at Athens; and not three have elapsed since I became acquainted with Socrates, and have made it my daily business to know all that he says and does. There was a time when I was running about the world, fancying myself to be well employed, but I was really a most wretched being, no better than you are now. I thought that I ought to do anything rather than be a philosopher.

Well, he said, jesting apart, tell me when the meeting occurred.

In our boyhood, I replied, when Agathon won the prize with his first tragedy, on the day after that on which he and his chorus offered the sacrifice of victory.

Then it must have been a long while ago, he said; and who told you — did Socrates?

No indeed, I replied, but the same person who told Phoenix; — he was a little fellow, who never wore any shoes, Aristodemus, of the deme of Cydathenaeum. He had been at Agathon's feast; and I think that in those days there was no one who was a more devoted admirer of Socrates. Moreover, I have asked Socrates about the truth of some parts of his narrative, and he confirmed them. Then, said Glaucon, let us have the tale over again; is not the road to Athens just made for conversation? And so we walked, and talked of the discourses on love; and therefore, as I said at first, I am not ill-prepared to comply with your request, and will have another rehearsal of them if you like. For to speak or to hear others speak of philosophy always gives me the greatest pleasure, to say nothing of the profit. But when I hear another strain, especially that of you rich men and traders, such conversation displeases me; and I pity you who are my companions, because you think that you are doing something when in reality you are doing nothing. And I dare say that you pity me in return, whom you regard as an unhappy creature, and very probably you are right. But I certainly know of you what you only think of me — there is the difference.

COMPANION: I see, Apollodorus, that you are just the same — always speaking evil of yourself, and of others; and I do believe that you pity all mankind, with the exception of Socrates, yourself first of all, true in this to your old name, which, however deserved, I know not how you acquired, of Apollodorus the madman; for you are always raging against yourself and everybody but Socrates.

APOLLODORUS: Yes, friend, and the reason why I am said to be mad, and out of my wits, is just because I have these notions of myself and you; no other evidence is required.

COMPANION: No more of that, Apollodorus; but let me renew my request that you would repeat the conversation.

APOLLODORUS: Well, the tale of love was on this wise: — But

perhaps I had better begin at the beginning, and endeavour to give you the exact words of Aristodemus:

He said that he met Socrates fresh from the bath and sandalled; and as the sight of the sandals was unusual, he asked him whither he was going that he had been converted into such a beau: —

To a banquet at Agathon's, he replied, whose invitation to his sacrifice of victory I refused yesterday, fearing a crowd, but promising that I would come to-day instead; and so I have put on my finery, because he is such a fine man. What say you to going with me unasked?

I will do as you bid me, I replied.

Follow then, he said, and let us demolish the proverb: —

‘To the feasts of inferior men the good unbidden go;’

instead of which our proverb will run: —

‘To the feasts of the good the good unbidden go;’

and this alteration may be supported by the authority of Homer himself, who not only demolishes but literally outrages the proverb. For, after picturing Agamemnon as the most valiant of men, he makes Menelaus, who is but a fainthearted warrior, come unbidden (*Iliad*) to the banquet of Agamemnon, who is feasting and offering sacrifices, not the better to the worse, but the worse to the better.

I rather fear, Socrates, said Aristodemus, lest this may still be my case; and that, like Menelaus in Homer, I shall be the inferior person, who

‘To the feasts of the wise unbidden goes.’

But I shall say that I was bidden of you, and then you will have to make an excuse.

‘Two going together,’

he replied, in Homeric fashion, one or other of them may invent an excuse by the way (*Iliad*).

This was the style of their conversation as they went along. Socrates dropped behind in a fit of abstraction, and desired Aristodemus, who was waiting, to go on before him. When he reached the house of Agathon he found the doors wide open, and a comical thing happened. A servant coming out met him, and led him at once into the banqueting-hall in which the guests were reclining, for the banquet was about to begin. Welcome, Aristodemus, said

Agathon, as soon as he appeared — you are just in time to sup with us; if you come on any other matter put it off, and make one of us, as I was looking for you yesterday and meant to have asked you, if I could have found you. But what have you done with Socrates?

I turned round, but Socrates was nowhere to be seen; and I had to explain that he had been with me a moment before, and that I came by his invitation to the supper.

You were quite right in coming, said Agathon; but where is he himself?

He was behind me just now, as I entered, he said, and I cannot think what has become of him.

Go and look for him, boy, said Agathon, and bring him in; and do you, Aristodemus, meanwhile take the place by Eryximachus.

The servant then assisted him to wash, and he lay down, and presently another servant came in and reported that our friend Socrates had retired into the portico of the neighbouring house. 'There he is fixed,' said he, 'and when I call to him he will not stir.'

How strange, said Agathon; then you must call him again, and keep calling him.

Let him alone, said my informant; he has a way of stopping anywhere and losing himself without any reason. I believe that he will soon appear; do not therefore disturb him.

Well, if you think so, I will leave him, said Agathon. And then, turning to the servants, he added, 'Let us have supper without waiting for him. Serve up whatever you please, for there is no one to give you orders; hitherto I have never left you to yourselves. But on this occasion imagine that you are our hosts, and that I and the company are your guests; treat us well, and then we shall commend you.' After this, supper was served, but still no Socrates; and during the meal Agathon several times expressed a wish to send for him, but Aristodemus objected; and at last when the feast was about half over — for the fit, as usual, was not of long duration — Socrates entered. Agathon, who was reclining alone at the end of the table, begged that he would take the place next to him; that 'I may touch you,' he said, 'and have the benefit of that wise thought which came into your mind in the portico, and is now in your possession; for I am certain that you would not have come away until you had found what you

sought.'

How I wish, said Socrates, taking his place as he was desired, that wisdom could be infused by touch, out of the fuller into the emptier man, as water runs through wool out of a fuller cup into an emptier one; if that were so, how greatly should I value the privilege of reclining at your side! For you would have filled me full with a stream of wisdom plenteous and fair; whereas my own is of a very mean and questionable sort, no better than a dream. But yours is bright and full of promise, and was manifested forth in all the splendour of youth the day before yesterday, in the presence of more than thirty thousand Hellenes.

You are mocking, Socrates, said Agathon, and ere long you and I will have to determine who bears off the palm of wisdom — of this Dionysus shall be the judge; but at present you are better occupied with supper.

Socrates took his place on the couch, and supped with the rest; and then libations were offered, and after a hymn had been sung to the god, and there had been the usual ceremonies, they were about to commence drinking, when Pausanias said, And now, my friends, how can we drink with least injury to ourselves? I can assure you that I feel severely the effect of yesterday's potations, and must have time to recover; and I suspect that most of you are in the same predicament, for you were of the party yesterday. Consider then: How can the drinking be made easiest?

I entirely agree, said Aristophanes, that we should, by all means, avoid hard drinking, for I was myself one of those who were yesterday drowned in drink.

I think that you are right, said Eryximachus, the son of Acumenus; but I should still like to hear one other person speak: Is Agathon able to drink hard?

I am not equal to it, said Agathon.

Then, said Eryximachus, the weak heads like myself, Aristodemus, Phaedrus, and others who never can drink, are fortunate in finding that the stronger ones are not in a drinking mood. (I do not include Socrates, who is able either to drink or to abstain, and will not mind, whichever we do.) Well, as of none of the company seem disposed to drink much, I may be forgiven for saying,

as a physician, that drinking deep is a bad practice, which I never follow, if I can help, and certainly do not recommend to another, least of all to any one who still feels the effects of yesterday's carouse.

I always do what you advise, and especially what you prescribe as a physician, rejoined Phaedrus the Myrrhinusian, and the rest of the company, if they are wise, will do the same.

It was agreed that drinking was not to be the order of the day, but that they were all to drink only so much as they pleased.

Then, said Eryximachus, as you are all agreed that drinking is to be voluntary, and that there is to be no compulsion, I move, in the next place, that the flute-girl, who has just made her appearance, be told to go away and play to herself, or, if she likes, to the women who are within (compare Prot.). To-day let us have conversation instead; and, if you will allow me, I will tell you what sort of conversation. This proposal having been accepted, Eryximachus proceeded as follows: —

I will begin, he said, after the manner of Melanippe in Euripides, 'Not mine the word'

which I am about to speak, but that of Phaedrus. For often he says to me in an indignant tone:— 'What a strange thing it is, Eryximachus, that, whereas other gods have poems and hymns made in their honour, the great and glorious god, Love, has no encomiast among all the poets who are so many. There are the worthy sophists too — the excellent Prodicus for example, who have descanted in prose on the virtues of Heracles and other heroes; and, what is still more extraordinary, I have met with a philosophical work in which the utility of salt has been made the theme of an eloquent discourse; and many other like things have had a like honour bestowed upon them. And only to think that there should have been an eager interest created about them, and yet that to this day no one has ever dared worthily to hymn Love's praises! So entirely has this great deity been neglected.' Now in this Phaedrus seems to me to be quite right, and therefore I want to offer him a contribution; also I think that at the present moment we who are here assembled cannot do better than honour the god Love. If you agree with me, there will be no lack of conversation; for I mean to propose that each of us in turn, going

from left to right, shall make a speech in honour of Love. Let him give us the best which he can; and Phaedrus, because he is sitting first on the left hand, and because he is the father of the thought, shall begin.

No one will vote against you, Eryximachus, said Socrates. How can I oppose your motion, who profess to understand nothing but matters of love; nor, I presume, will Agathon and Pausanias; and there can be no doubt of Aristophanes, whose whole concern is with Dionysus and Aphrodite; nor will any one disagree of those whom I see around me. The proposal, as I am aware, may seem rather hard upon us whose place is last; but we shall be contented if we hear some good speeches first. Let Phaedrus begin the praise of Love, and good luck to him. All the company expressed their assent, and desired him to do as Socrates bade him.

Aristodemus did not recollect all that was said, nor do I recollect all that he related to me; but I will tell you what I thought most worthy of remembrance, and what the chief speakers said.

Phaedrus began by affirming that Love is a mighty god, and wonderful among gods and men, but especially wonderful in his birth. For he is the eldest of the gods, which is an honour to him; and a proof of his claim to this honour is, that of his parents there is no memorial; neither poet nor prose-writer has ever affirmed that he had any. As Hesiod says: —

‘First Chaos came, and then broad-bosomed Earth, The everlasting seat of all that is, And Love.’

In other words, after Chaos, the Earth and Love, these two, came into being. Also Parmenides sings of Generation:

‘First in the train of gods, he fashioned Love.’

And Acusilaus agrees with Hesiod. Thus numerous are the witnesses who acknowledge Love to be the eldest of the gods. And not only is he the eldest, he is also the source of the greatest benefits to us. For I know not any greater blessing to a young man who is beginning life than a virtuous lover, or to the lover than a beloved youth. For the principle which ought to be the guide of men who would nobly live — that principle, I say, neither kindred, nor honour, nor wealth, nor any other motive is able to implant so well as love. Of what am I speaking? Of the sense of honour and dishonour,

without which neither states nor individuals ever do any good or great work. And I say that a lover who is detected in doing any dishonourable act, or submitting through cowardice when any dishonour is done to him by another, will be more pained at being detected by his beloved than at being seen by his father, or by his companions, or by any one else. The beloved too, when he is found in any disgraceful situation, has the same feeling about his lover. And if there were only some way of contriving that a state or an army should be made up of lovers and their loves (compare Rep.), they would be the very best governors of their own city, abstaining from all dishonour, and emulating one another in honour; and when fighting at each other's side, although a mere handful, they would overcome the world. For what lover would not choose rather to be seen by all mankind than by his beloved, either when abandoning his post or throwing away his arms? He would be ready to die a thousand deaths rather than endure this. Or who would desert his beloved or fail him in the hour of danger? The veriest coward would become an inspired hero, equal to the bravest, at such a time; Love would inspire him. That courage which, as Homer says, the god breathes into the souls of some heroes, Love of his own nature infuses into the lover.

Love will make men dare to die for their beloved — love alone; and women as well as men. Of this, Alcestis, the daughter of Pelias, is a monument to all Hellas; for she was willing to lay down her life on behalf of her husband, when no one else would, although he had a father and mother; but the tenderness of her love so far exceeded theirs, that she made them seem to be strangers in blood to their own son, and in name only related to him; and so noble did this action of hers appear to the gods, as well as to men, that among the many who have done virtuously she is one of the very few to whom, in admiration of her noble action, they have granted the privilege of returning alive to earth; such exceeding honour is paid by the gods to the devotion and virtue of love. But Orpheus, the son of Oeagrus, the harper, they sent empty away, and presented to him an apparition only of her whom he sought, but herself they would not give up, because he showed no spirit; he was only a harp-player, and did not dare like Alcestis to die for love, but was contriving how he might

enter Hades alive; moreover, they afterwards caused him to suffer death at the hands of women, as the punishment of his cowardliness. Very different was the reward of the true love of Achilles towards his lover Patroclus — his lover and not his love (the notion that Patroclus was the beloved one is a foolish error into which Aeschylus has fallen, for Achilles was surely the fairer of the two, fairer also than all the other heroes; and, as Homer informs us, he was still beardless, and younger far). And greatly as the gods honour the virtue of love, still the return of love on the part of the beloved to the lover is more admired and valued and rewarded by them, for the lover is more divine; because he is inspired by God. Now Achilles was quite aware, for he had been told by his mother, that he might avoid death and return home, and live to a good old age, if he abstained from slaying Hector. Nevertheless he gave his life to revenge his friend, and dared to die, not only in his defence, but after he was dead. Wherefore the gods honoured him even above Alcestis, and sent him to the Islands of the Blest. These are my reasons for affirming that Love is the eldest and noblest and mightiest of the gods; and the chiefest author and giver of virtue in life, and of happiness after death.

This, or something like this, was the speech of Phaedrus; and some other speeches followed which Aristodemus did not remember; the next which he repeated was that of Pausanias. Phaedrus, he said, the argument has not been set before us, I think, quite in the right form; — we should not be called upon to praise Love in such an indiscriminate manner. If there were only one Love, then what you said would be well enough; but since there are more Loves than one, — should have begun by determining which of them was to be the theme of our praises. I will amend this defect; and first of all I will tell you which Love is deserving of praise, and then try to hymn the praiseworthy one in a manner worthy of him. For we all know that Love is inseparable from Aphrodite, and if there were only one Aphrodite there would be only one Love; but as there are two goddesses there must be two Loves. And am I not right in asserting that there are two goddesses? The elder one, having no mother, who is called the heavenly Aphrodite — she is the daughter of Uranus; the younger, who is the daughter of Zeus and Dione — her we call

common; and the Love who is her fellow-worker is rightly named common, as the other love is called heavenly. All the gods ought to have praise given to them, but not without distinction of their natures; and therefore I must try to distinguish the characters of the two Loves. Now actions vary according to the manner of their performance. Take, for example, that which we are now doing, drinking, singing and talking — these actions are not in themselves either good or evil, but they turn out in this or that way according to the mode of performing them; and when well done they are good, and when wrongly done they are evil; and in like manner not every love, but only that which has a noble purpose, is noble and worthy of praise. The Love who is the offspring of the common Aphrodite is essentially common, and has no discrimination, being such as the meaner sort of men feel, and is apt to be of women as well as of youths, and is of the body rather than of the soul — the most foolish beings are the objects of this love which desires only to gain an end, but never thinks of accomplishing the end nobly, and therefore does good and evil quite indiscriminately. The goddess who is his mother is far younger than the other, and she was born of the union of the male and female, and partakes of both. But the offspring of the heavenly Aphrodite is derived from a mother in whose birth the female has no part, — she is from the male only; this is that love which is of youths, and the goddess being older, there is nothing of wantonness in her. Those who are inspired by this love turn to the male, and delight in him who is the more valiant and intelligent nature; any one may recognise the pure enthusiasts in the very character of their attachments. For they love not boys, but intelligent beings whose reason is beginning to be developed, much about the time at which their beards begin to grow. And in choosing young men to be their companions, they mean to be faithful to them, and pass their whole life in company with them, not to take them in their inexperience, and deceive them, and play the fool with them, or run away from one to another of them. But the love of young boys should be forbidden by law, because their future is uncertain; they may turn out good or bad, either in body or soul, and much noble enthusiasm may be thrown away upon them; in this matter the good are a law to themselves, and the coarser sort of lovers ought to be

restrained by force; as we restrain or attempt to restrain them from fixing their affections on women of free birth. These are the persons who bring a reproach on love; and some have been led to deny the lawfulness of such attachments because they see the impropriety and evil of them; for surely nothing that is decorously and lawfully done can justly be censured. Now here and in Lacedaemon the rules about love are perplexing, but in most cities they are simple and easily intelligible; in Elis and Boeotia, and in countries having no gifts of eloquence, they are very straightforward; the law is simply in favour of these connexions, and no one, whether young or old, has anything to say to their discredit; the reason being, as I suppose, that they are men of few words in those parts, and therefore the lovers do not like the trouble of pleading their suit. In Ionia and other places, and generally in countries which are subject to the barbarians, the custom is held to be dishonourable; loves of youths share the evil repute in which philosophy and gymnastics are held, because they are inimical to tyranny; for the interests of rulers require that their subjects should be poor in spirit (compare Arist. Politics), and that there should be no strong bond of friendship or society among them, which love, above all other motives, is likely to inspire, as our Athenian tyrants learned by experience; for the love of Aristogeiton and the constancy of Harmodius had a strength which undid their power. And, therefore, the ill-repute into which these attachments have fallen is to be ascribed to the evil condition of those who make them to be ill-reputed; that is to say, to the self-seeking of the governors and the cowardice of the governed; on the other hand, the indiscriminate honour which is given to them in some countries is attributable to the laziness of those who hold this opinion of them. In our own country a far better principle prevails, but, as I was saying, the explanation of it is rather perplexing. For, observe that open loves are held to be more honourable than secret ones, and that the love of the noblest and highest, even if their persons are less beautiful than others, is especially honourable. Consider, too, how great is the encouragement which all the world gives to the lover; neither is he supposed to be doing anything dishonourable; but if he succeeds he is praised, and if he fail he is blamed. And in the pursuit of his love the custom of mankind allows him to do many strange things, which philosophy

would bitterly censure if they were done from any motive of interest, or wish for office or power. He may pray, and entreat, and supplicate, and swear, and lie on a mat at the door, and endure a slavery worse than that of any slave — in any other case friends and enemies would be equally ready to prevent him, but now there is no friend who will be ashamed of him and admonish him, and no enemy will charge him with meanness or flattery; the actions of a lover have a grace which ennobles them; and custom has decided that they are highly commendable and that there no loss of character in them; and, what is strangest of all, he only may swear and forswear himself (so men say), and the gods will forgive his transgression, for there is no such thing as a lover's oath. Such is the entire liberty which gods and men have allowed the lover, according to the custom which prevails in our part of the world. From this point of view a man fairly argues that in Athens to love and to be loved is held to be a very honourable thing. But when parents forbid their sons to talk with their lovers, and place them under a tutor's care, who is appointed to see to these things, and their companions and equals cast in their teeth anything of the sort which they may observe, and their elders refuse to silence the reprovers and do not rebuke them — any one who reflects on all this will, on the contrary, think that we hold these practices to be most disgraceful. But, as I was saying at first, the truth as I imagine is, that whether such practices are honourable or whether they are dishonourable is not a simple question; they are honourable to him who follows them honourably, dishonourable to him who follows them dishonourably. There is dishonour in yielding to the evil, or in an evil manner; but there is honour in yielding to the good, or in an honourable manner. Evil is the vulgar lover who loves the body rather than the soul, inasmuch as he is not even stable, because he loves a thing which is in itself unstable, and therefore when the bloom of youth which he was desiring is over, he takes wing and flies away, in spite of all his words and promises; whereas the love of the noble disposition is life-long, for it becomes one with the everlasting. The custom of our country would have both of them proven well and truly, and would have us yield to the one sort of lover and avoid the other, and therefore encourages some to pursue, and others to fly; testing both the lover and beloved in contests and

trials, until they show to which of the two classes they respectively belong. And this is the reason why, in the first place, a hasty attachment is held to be dishonourable, because time is the true test of this as of most other things; and secondly there is a dishonour in being overcome by the love of money, or of wealth, or of political power, whether a man is frightened into surrender by the loss of them, or, having experienced the benefits of money and political corruption, is unable to rise above the seductions of them. For none of these things are of a permanent or lasting nature; not to mention that no generous friendship ever sprang from them. There remains, then, only one way of honourable attachment which custom allows in the beloved, and this is the way of virtue; for as we admitted that any service which the lover does to him is not to be accounted flattery or a dishonour to himself, so the beloved has one way only of voluntary service which is not dishonourable, and this is virtuous service.

For we have a custom, and according to our custom any one who does service to another under the idea that he will be improved by him either in wisdom, or in some other particular of virtue — such a voluntary service, I say, is not to be regarded as a dishonour, and is not open to the charge of flattery. And these two customs, one the love of youth, and the other the practice of philosophy and virtue in general, ought to meet in one, and then the beloved may honourably indulge the lover. For when the lover and beloved come together, having each of them a law, and the lover thinks that he is right in doing any service which he can to his gracious loving one; and the other that he is right in showing any kindness which he can to him who is making him wise and good; the one capable of communicating wisdom and virtue, the other seeking to acquire them with a view to education and wisdom, when the two laws of love are fulfilled and meet in one — then, and then only, may the beloved yield with honour to the lover. Nor when love is of this disinterested sort is there any disgrace in being deceived, but in every other case there is equal disgrace in being or not being deceived. For he who is gracious to his lover under the impression that he is rich, and is disappointed of his gains because he turns out to be poor, is disgraced all the same: for he has done his best to show that he would give himself up to any one's 'uses base' for the sake of

money; but this is not honourable. And on the same principle he who gives himself to a lover because he is a good man, and in the hope that he will be improved by his company, shows himself to be virtuous, even though the object of his affection turn out to be a villain, and to have no virtue; and if he is deceived he has committed a noble error. For he has proved that for his part he will do anything for anybody with a view to virtue and improvement, than which there can be nothing nobler. Thus noble in every case is the acceptance of another for the sake of virtue. This is that love which is the love of the heavenly goddess, and is heavenly, and of great price to individuals and cities, making the lover and the beloved alike eager in the work of their own improvement. But all other loves are the offspring of the other, who is the common goddess. To you, Phaedrus, I offer this my contribution in praise of love, which is as good as I could make extempore.

Pausanias came to a pause — this is the balanced way in which I have been taught by the wise to speak; and Aristodemus said that the turn of Aristophanes was next, but either he had eaten too much, or from some other cause he had the hiccough, and was obliged to change turns with Eryximachus the physician, who was reclining on the couch below him. Eryximachus, he said, you ought either to stop my hiccough, or to speak in my turn until I have left off.

I will do both, said Eryximachus: I will speak in your turn, and do you speak in mine; and while I am speaking let me recommend you to hold your breath, and if after you have done so for some time the hiccough is no better, then gargle with a little water; and if it still continues, tickle your nose with something and sneeze; and if you sneeze once or twice, even the most violent hiccough is sure to go. I will do as you prescribe, said Aristophanes, and now get on.

Eryximachus spoke as follows: Seeing that Pausanias made a fair beginning, and but a lame ending, I must endeavour to supply his deficiency. I think that he has rightly distinguished two kinds of love. But my art further informs me that the double love is not merely an affection of the soul of man towards the fair, or towards anything, but is to be found in the bodies of all animals and in productions of the earth, and I may say in all that is; such is the conclusion which I seem to have gathered from my own art of medicine, whence I learn

how great and wonderful and universal is the deity of love, whose empire extends over all things, divine as well as human. And from medicine I will begin that I may do honour to my art. There are in the human body these two kinds of love, which are confessedly different and unlike, and being unlike, they have loves and desires which are unlike; and the desire of the healthy is one, and the desire of the diseased is another; and as Pausanias was just now saying that to indulge good men is honourable, and bad men dishonourable: — so too in the body the good and healthy elements are to be indulged, and the bad elements and the elements of disease are not to be indulged, but discouraged. And this is what the physician has to do, and in this the art of medicine consists: for medicine may be regarded generally as the knowledge of the loves and desires of the body, and how to satisfy them or not; and the best physician is he who is able to separate fair love from foul, or to convert one into the other; and he who knows how to eradicate and how to implant love, whichever is required, and can reconcile the most hostile elements in the constitution and make them loving friends, is a skilful practitioner. Now the most hostile are the most opposite, such as hot and cold, bitter and sweet, moist and dry, and the like. And my ancestor, Asclepius, knowing how to implant friendship and accord in these elements, was the creator of our art, as our friends the poets here tell us, and I believe them; and not only medicine in every branch but the arts of gymnastic and husbandry are under his dominion. Any one who pays the least attention to the subject will also perceive that in music there is the same reconciliation of opposites; and I suppose that this must have been the meaning of Heracleitus, although his words are not accurate; for he says that The One is united by disunion, like the harmony of the bow and the lyre. Now there is an absurdity saying that harmony is discord or is composed of elements which are still in a state of discord. But what he probably meant was, that harmony is composed of differing notes of higher or lower pitch which disagreed once, but are now reconciled by the art of music; for if the higher and lower notes still disagreed, there could be no harmony, — clearly not. For harmony is a symphony, and symphony is an agreement; but an agreement of disagreements while they disagree there cannot be; you cannot harmonize that which disagrees.

In like manner rhythm is compounded of elements short and long, once differing and now in accord; which accordance, as in the former instance, medicine, so in all these other cases, music implants, making love and unison to grow up among them; and thus music, too, is concerned with the principles of love in their application to harmony and rhythm. Again, in the essential nature of harmony and rhythm there is no difficulty in discerning love which has not yet become double. But when you want to use them in actual life, either in the composition of songs or in the correct performance of airs or metres composed already, which latter is called education, then the difficulty begins, and the good artist is needed. Then the old tale has to be repeated of fair and heavenly love — the love of Urania the fair and heavenly muse, and of the duty of accepting the temperate, and those who are as yet intemperate only that they may become temperate, and of preserving their love; and again, of the vulgar Polyhymnia, who must be used with circumspection that the pleasure be enjoyed, but may not generate licentiousness; just as in my own art it is a great matter so to regulate the desires of the epicure that he may gratify his tastes without the attendant evil of disease. Whence I infer that in music, in medicine, in all other things human as well as divine, both loves ought to be noted as far as may be, for they are both present.

The course of the seasons is also full of both these principles; and when, as I was saying, the elements of hot and cold, moist and dry, attain the harmonious love of one another and blend in temperance and harmony, they bring to men, animals, and plants health and plenty, and do them no harm; whereas the wanton love, getting the upper hand and affecting the seasons of the year, is very destructive and injurious, being the source of pestilence, and bringing many other kinds of diseases on animals and plants; for hoar-frost and hail and blight spring from the excesses and disorders of these elements of love, which to know in relation to the revolutions of the heavenly bodies and the seasons of the year is termed astronomy. Furthermore all sacrifices and the whole province of divination, which is the art of communion between gods and men — these, I say, are concerned only with the preservation of the good and the cure of the evil love. For all manner of impiety is likely to ensue if, instead of accepting

and honouring and reverencing the harmonious love in all his actions, a man honours the other love, whether in his feelings towards gods or parents, towards the living or the dead. Wherefore the business of divination is to see to these loves and to heal them, and divination is the peacemaker of gods and men, working by a knowledge of the religious or irreligious tendencies which exist in human loves. Such is the great and mighty, or rather omnipotent force of love in general. And the love, more especially, which is concerned with the good, and which is perfected in company with temperance and justice, whether among gods or men, has the greatest power, and is the source of all our happiness and harmony, and makes us friends with the gods who are above us, and with one another. I dare say that I too have omitted several things which might be said in praise of Love, but this was not intentional, and you, Aristophanes, may now supply the omission or take some other line of commendation; for I perceive that you are rid of the hiccough.

Yes, said Aristophanes, who followed, the hiccough is gone; not, however, until I applied the sneezing; and I wonder whether the harmony of the body has a love of such noises and ticklings, for I no sooner applied the sneezing than I was cured.

Eryximachus said: Beware, friend Aristophanes, although you are going to speak, you are making fun of me; and I shall have to watch and see whether I cannot have a laugh at your expense, when you might speak in peace.

You are right, said Aristophanes, laughing. I will unsay my words; but do you please not to watch me, as I fear that in the speech which I am about to make, instead of others laughing with me, which is to the manner born of our muse and would be all the better, I shall only be laughed at by them.

Do you expect to shoot your bolt and escape, Aristophanes? Well, perhaps if you are very careful and bear in mind that you will be called to account, I may be induced to let you off.

Aristophanes professed to open another vein of discourse; he had a mind to praise Love in another way, unlike that either of Pausanias or Eryximachus. Mankind, he said, judging by their neglect of him, have never, as I think, at all understood the power of Love. For if they had understood him they would surely have built noble temples

and altars, and offered solemn sacrifices in his honour; but this is not done, and most certainly ought to be done: since of all the gods he is the best friend of men, the helper and the healer of the ills which are the great impediment to the happiness of the race. I will try to describe his power to you, and you shall teach the rest of the world what I am teaching you. In the first place, let me treat of the nature of man and what has happened to it; for the original human nature was not like the present, but different. The sexes were not two as they are now, but originally three in number; there was man, woman, and the union of the two, having a name corresponding to this double nature, which had once a real existence, but is now lost, and the word 'Androgynous' is only preserved as a term of reproach. In the second place, the primeval man was round, his back and sides forming a circle; and he had four hands and four feet, one head with two faces, looking opposite ways, set on a round neck and precisely alike; also four ears, two privy members, and the remainder to correspond. He could walk upright as men now do, backwards or forwards as he pleased, and he could also roll over and over at a great pace, turning on his four hands and four feet, eight in all, like tumblers going over and over with their legs in the air; this was when he wanted to run fast. Now the sexes were three, and such as I have described them; because the sun, moon, and earth are three; and the man was originally the child of the sun, the woman of the earth, and the man-woman of the moon, which is made up of sun and earth, and they were all round and moved round and round like their parents. Terrible was their might and strength, and the thoughts of their hearts were great, and they made an attack upon the gods; of them is told the tale of Otys and Ephialtes who, as Homer says, dared to scale heaven, and would have laid hands upon the gods. Doubt reigned in the celestial councils. Should they kill them and annihilate the race with thunderbolts, as they had done the giants, then there would be an end of the sacrifices and worship which men offered to them; but, on the other hand, the gods could not suffer their insolence to be unrestrained. At last, after a good deal of reflection, Zeus discovered a way. He said: 'Methinks I have a plan which will humble their pride and improve their manners; men shall continue to exist, but I will cut them in two and then they will be diminished in strength and

increased in numbers; this will have the advantage of making them more profitable to us. They shall walk upright on two legs, and if they continue insolent and will not be quiet, I will split them again and they shall hop about on a single leg.' He spoke and cut men in two, like a sorb-apple which is halved for pickling, or as you might divide an egg with a hair; and as he cut them one after another, he bade Apollo give the face and the half of the neck a turn in order that the man might contemplate the section of himself: he would thus learn a lesson of humility. Apollo was also bidden to heal their wounds and compose their forms. So he gave a turn to the face and pulled the skin from the sides all over that which in our language is called the belly, like the purses which draw in, and he made one mouth at the centre, which he fastened in a knot (the same which is called the navel); he also moulded the breast and took out most of the wrinkles, much as a shoemaker might smooth leather upon a last; he left a few, however, in the region of the belly and navel, as a memorial of the primeval state. After the division the two parts of man, each desiring his other half, came together, and throwing their arms about one another, entwined in mutual embraces, longing to grow into one, they were on the point of dying from hunger and self-neglect, because they did not like to do anything apart; and when one of the halves died and the other survived, the survivor sought another mate, man or woman as we call them, — being the sections of entire men or women, — and clung to that. They were being destroyed, when Zeus in pity of them invented a new plan: he turned the parts of generation round to the front, for this had not been always their position, and they sowed the seed no longer as hitherto like grasshoppers in the ground, but in one another; and after the transposition the male generated in the female in order that by the mutual embraces of man and woman they might breed, and the race might continue; or if man came to man they might be satisfied, and rest, and go their ways to the business of life: so ancient is the desire of one another which is implanted in us, reuniting our original nature, making one of two, and healing the state of man. Each of us when separated, having one side only, like a flat fish, is but the indenture of a man, and he is always looking for his other half. Men who are a section of that double nature which was once called Androgynous are

lovers of women; adulterers are generally of this breed, and also adulterous women who lust after men: the women who are a section of the woman do not care for men, but have female attachments; the female companions are of this sort. But they who are a section of the male follow the male, and while they are young, being slices of the original man, they hang about men and embrace them, and they are themselves the best of boys and youths, because they have the most manly nature. Some indeed assert that they are shameless, but this is not true; for they do not act thus from any want of shame, but because they are valiant and manly, and have a manly countenance, and they embrace that which is like them. And these when they grow up become our statesmen, and these only, which is a great proof of the truth of what I am saying. When they reach manhood they are lovers of youth, and are not naturally inclined to marry or beget children, — if at all, they do so only in obedience to the law; but they are satisfied if they may be allowed to live with one another unwedded; and such a nature is prone to love and ready to return love, always embracing that which is akin to him. And when one of them meets with his other half, the actual half of himself, whether he be a lover of youth or a lover of another sort, the pair are lost in an amazement of love and friendship and intimacy, and one will not be out of the other's sight, as I may say, even for a moment: these are the people who pass their whole lives together; yet they could not explain what they desire of one another. For the intense yearning which each of them has towards the other does not appear to be the desire of lover's intercourse, but of something else which the soul of either evidently desires and cannot tell, and of which she has only a dark and doubtful presentiment. Suppose Hephaestus, with his instruments, to come to the pair who are lying side by side and to say to them, 'What do you people want of one another?' they would be unable to explain. And suppose further, that when he saw their perplexity he said: 'Do you desire to be wholly one; always day and night to be in one another's company? for if this is what you desire, I am ready to melt you into one and let you grow together, so that being two you shall become one, and while you live live a common life as if you were a single man, and after your death in the world below still be one departed soul instead of two — I ask whether this

is what you lovingly desire, and whether you are satisfied to attain this?' — there is not a man of them who when he heard the proposal would deny or would not acknowledge that this meeting and melting into one another, this becoming one instead of two, was the very expression of his ancient need (compare Arist. Pol.). And the reason is that human nature was originally one and we were a whole, and the desire and pursuit of the whole is called love. There was a time, I say, when we were one, but now because of the wickedness of mankind God has dispersed us, as the Arcadians were dispersed into villages by the Lacedaemonians (compare Arist. Pol.). And if we are not obedient to the gods, there is a danger that we shall be split up again and go about in basso-relievo, like the profile figures having only half a nose which are sculptured on monuments, and that we shall be like tallies. Wherefore let us exhort all men to piety, that we may avoid evil, and obtain the good, of which Love is to us the lord and minister; and let no one oppose him — he is the enemy of the gods who opposes him. For if we are friends of the God and at peace with him we shall find our own true loves, which rarely happens in this world at present. I am serious, and therefore I must beg Eryximachus not to make fun or to find any allusion in what I am saying to Pausanias and Agathon, who, as I suspect, are both of the manly nature, and belong to the class which I have been describing. But my words have a wider application — they include men and women everywhere; and I believe that if our loves were perfectly accomplished, and each one returning to his primeval nature had his original true love, then our race would be happy. And if this would be best of all, the best in the next degree and under present circumstances must be the nearest approach to such an union; and that will be the attainment of a congenial love. Wherefore, if we would praise him who has given to us the benefit, we must praise the god Love, who is our greatest benefactor, both leading us in this life back to our own nature, and giving us high hopes for the future, for he promises that if we are pious, he will restore us to our original state, and heal us and make us happy and blessed. This, Eryximachus, is my discourse of love, which, although different to yours, I must beg you to leave unassailed by the shafts of your ridicule, in order that each may have his turn; each, or rather either,

for Agathon and Socrates are the only ones left.

Indeed, I am not going to attack you, said Eryximachus, for I thought your speech charming, and did I not know that Agathon and Socrates are masters in the art of love, I should be really afraid that they would have nothing to say, after the world of things which have been said already. But, for all that, I am not without hopes.

Socrates said: You played your part well, Eryximachus; but if you were as I am now, or rather as I shall be when Agathon has spoken, you would, indeed, be in a great strait.

You want to cast a spell over me, Socrates, said Agathon, in the hope that I may be disconcerted at the expectation raised among the audience that I shall speak well.

I should be strangely forgetful, Agathon replied Socrates, of the courage and magnanimity which you showed when your own compositions were about to be exhibited, and you came upon the stage with the actors and faced the vast theatre altogether undismayed, if I thought that your nerves could be fluttered at a small party of friends.

Do you think, Socrates, said Agathon, that my head is so full of the theatre as not to know how much more formidable to a man of sense a few good judges are than many fools?

Nay, replied Socrates, I should be very wrong in attributing to you, Agathon, that or any other want of refinement. And I am quite aware that if you happened to meet with any whom you thought wise, you would care for their opinion much more than for that of the many. But then we, having been a part of the foolish many in the theatre, cannot be regarded as the select wise; though I know that if you chanced to be in the presence, not of one of ourselves, but of some really wise man, you would be ashamed of disgracing yourself before him — would you not?

Yes, said Agathon.

But before the many you would not be ashamed, if you thought that you were doing something disgraceful in their presence?

Here Phaedrus interrupted them, saying: not answer him, my dear Agathon; for if he can only get a partner with whom he can talk, especially a good-looking one, he will no longer care about the completion of our plan. Now I love to hear him talk; but just at

present I must not forget the encomium on Love which I ought to receive from him and from every one. When you and he have paid your tribute to the god, then you may talk.

Very good, Phaedrus, said Agathon; I see no reason why I should not proceed with my speech, as I shall have many other opportunities of conversing with Socrates. Let me say first how I ought to speak, and then speak: —

The previous speakers, instead of praising the god Love, or unfolding his nature, appear to have congratulated mankind on the benefits which he confers upon them. But I would rather praise the god first, and then speak of his gifts; this is always the right way of praising everything. May I say without impiety or offence, that of all the blessed gods he is the most blessed because he is the fairest and best? And he is the fairest: for, in the first place, he is the youngest, and of his youth he is himself the witness, fleeing out of the way of age, who is swift enough, swifter truly than most of us like: — Love hates him and will not come near him; but youth and love live and move together — like to like, as the proverb says. Many things were said by Phaedrus about Love in which I agree with him; but I cannot agree that he is older than Iapetus and Kronos: — not so; I maintain him to be the youngest of the gods, and youthful ever. The ancient doings among the gods of which Hesiod and Parmenides spoke, if the tradition of them be true, were done of Necessity and not of Love; had Love been in those days, there would have been no chaining or mutilation of the gods, or other violence, but peace and sweetness, as there is now in heaven, since the rule of Love began. Love is young and also tender; he ought to have a poet like Homer to describe his tenderness, as Homer says of Ate, that she is a goddess and tender: —

‘Her feet are tender, for she sets her steps,
Not on the ground but on the heads of men.’

herein is an excellent proof of her tenderness, — that she walks not upon the hard but upon the soft. Let us adduce a similar proof of the tenderness of Love; for he walks not upon the earth, nor yet upon the skulls of men, which are not so very soft, but in the hearts and souls of both gods and men, which are of all things the softest: in them he walks and dwells and makes his home. Not in every soul

without exception, for where there is hardness he departs, where there is softness there he dwells; and nestling always with his feet and in all manner of ways in the softest of soft places, how can he be other than the softest of all things? Of a truth he is the tenderest as well as the youngest, and also he is of flexile form; for if he were hard and without flexure he could not enfold all things, or wind his way into and out of every soul of man undiscovered. And a proof of his flexibility and symmetry of form is his grace, which is universally admitted to be in an especial manner the attribute of Love; ungrace and love are always at war with one another. The fairness of his complexion is revealed by his habitation among the flowers; for he dwells not amid bloomless or fading beauties, whether of body or soul or aught else, but in the place of flowers and scents, there he sits and abides. Concerning the beauty of the god I have said enough; and yet there remains much more which I might say. Of his virtue I have now to speak: his greatest glory is that he can neither do nor suffer wrong to or from any god or any man; for he suffers not by force if he suffers; force comes not near him, neither when he acts does he act by force. For all men in all things serve him of their own free will, and where there is voluntary agreement, there, as the laws which are the lords of the city say, is justice. And not only is he just but exceedingly temperate, for Temperance is the acknowledged ruler of the pleasures and desires, and no pleasure ever masters Love; he is their master and they are his servants; and if he conquers them he must be temperate indeed. As to courage, even the God of War is no match for him; he is the captive and Love is the lord, for love, the love of Aphrodite, masters him, as the tale runs; and the master is stronger than the servant. And if he conquers the bravest of all others, he must be himself the bravest. Of his courage and justice and temperance I have spoken, but I have yet to speak of his wisdom; and according to the measure of my ability I must try to do my best. In the first place he is a poet (and here, like Eryximachus, I magnify my art), and he is also the source of poesy in others, which he could not be if he were not himself a poet. And at the touch of him every one becomes a poet, even though he had no music in him before (A fragment of the *Sthenoaoea* of Euripides.); this also is a proof that Love is a good poet and accomplished in all

the fine arts; for no one can give to another that which he has not himself, or teach that of which he has no knowledge. Who will deny that the creation of the animals is his doing? Are they not all the works of his wisdom, born and begotten of him? And as to the artists, do we not know that he only of them whom love inspires has the light of fame? — he whom Love touches not walks in darkness. The arts of medicine and archery and divination were discovered by Apollo, under the guidance of love and desire; so that he too is a disciple of Love. Also the melody of the Muses, the metallurgy of Hephaestus, the weaving of Athene, the empire of Zeus over gods and men, are all due to Love, who was the inventor of them. And so Love set in order the empire of the gods — the love of beauty, as is evident, for with deformity Love has no concern. In the days of old, as I began by saying, dreadful deeds were done among the gods, for they were ruled by Necessity; but now since the birth of Love, and from the Love of the beautiful, has sprung every good in heaven and earth. Therefore, Phaedrus, I say of Love that he is the fairest and best in himself, and the cause of what is fairest and best in all other things. And there comes into my mind a line of poetry in which he is said to be the god who

‘Gives peace on earth and calms the stormy deep, Who stills the winds and bids the sufferer sleep.’

This is he who empties men of disaffection and fills them with affection, who makes them to meet together at banquets such as these: in sacrifices, feasts, dances, he is our lord — who sends courtesy and sends away discourtesy, who gives kindness ever and never gives unkindness; the friend of the good, the wonder of the wise, the amazement of the gods; desired by those who have no part in him, and precious to those who have the better part in him; parent of delicacy, luxury, desire, fondness, softness, grace; regardful of the good, regardless of the evil: in every word, work, wish, fear — saviour, pilot, comrade, helper; glory of gods and men, leader best and brightest: in whose footsteps let every man follow, sweetly singing in his honour and joining in that sweet strain with which love charms the souls of gods and men. Such is the speech, Phaedrus, half-playful, yet having a certain measure of seriousness, which, according to my ability, I dedicate to the god.

When Agathon had done speaking, Aristodemus said that there was a general cheer; the young man was thought to have spoken in a manner worthy of himself, and of the god. And Socrates, looking at Eryximachus, said: Tell me, son of Acumenus, was there not reason in my fears? and was I not a true prophet when I said that Agathon would make a wonderful oration, and that I should be in a strait?

The part of the prophecy which concerns Agathon, replied Eryximachus, appears to me to be true; but not the other part — that you will be in a strait.

Why, my dear friend, said Socrates, must not I or any one be in a strait who has to speak after he has heard such a rich and varied discourse? I am especially struck with the beauty of the concluding words — who could listen to them without amazement? When I reflected on the immeasurable inferiority of my own powers, I was ready to run away for shame, if there had been a possibility of escape. For I was reminded of Gorgias, and at the end of his speech I fancied that Agathon was shaking at me the Gorginian or Gorgonian head of the great master of rhetoric, which was simply to turn me and my speech into stone, as Homer says (*Odyssey*), and strike me dumb. And then I perceived how foolish I had been in consenting to take my turn with you in praising love, and saying that I too was a master of the art, when I really had no conception how anything ought to be praised. For in my simplicity I imagined that the topics of praise should be true, and that this being presupposed, out of the true the speaker was to choose the best and set them forth in the best manner. And I felt quite proud, thinking that I knew the nature of true praise, and should speak well. Whereas I now see that the intention was to attribute to Love every species of greatness and glory, whether really belonging to him or not, without regard to truth or falsehood — that was no matter; for the original proposal seems to have been not that each of you should really praise Love, but only that you should appear to praise him. And so you attribute to Love every imaginable form of praise which can be gathered anywhere; and you say that ‘he is all this,’ and ‘the cause of all that,’ making him appear the fairest and best of all to those who know him not, for you cannot impose upon those who know him. And a noble and solemn hymn of praise have you rehearsed. But as I misunderstood the nature of the praise

when I said that I would take my turn, I must beg to be absolved from the promise which I made in ignorance, and which (as Euripides would say (Eurip. *Hyppolytus*)) was a promise of the lips and not of the mind. Farewell then to such a strain: for I do not praise in that way; no, indeed, I cannot. But if you like to hear the truth about love, I am ready to speak in my own manner, though I will not make myself ridiculous by entering into any rivalry with you. Say then, Phaedrus, whether you would like to have the truth about love, spoken in any words and in any order which may happen to come into my mind at the time. Will that be agreeable to you?

Aristodemus said that Phaedrus and the company bid him speak in any manner which he thought best. Then, he added, let me have your permission first to ask Agathon a few more questions, in order that I may take his admissions as the premisses of my discourse.

I grant the permission, said Phaedrus: put your questions. Socrates then proceeded as follows: —

In the magnificent oration which you have just uttered, I think that you were right, my dear Agathon, in proposing to speak of the nature of Love first and afterwards of his works — that is a way of beginning which I very much approve. And as you have spoken so eloquently of his nature, may I ask you further, Whether love is the love of something or of nothing? And here I must explain myself: I do not want you to say that love is the love of a father or the love of a mother — that would be ridiculous; but to answer as you would, if I asked is a father a father of something? to which you would find no difficulty in replying, of a son or daughter: and the answer would be right.

Very true, said Agathon.

And you would say the same of a mother?

He assented.

Yet let me ask you one more question in order to illustrate my meaning: Is not a brother to be regarded essentially as a brother of something?

Certainly, he replied.

That is, of a brother or sister?

Yes, he said.

And now, said Socrates, I will ask about Love: — Is Love of

something or of nothing?

Of something, surely, he replied.

Keep in mind what this is, and tell me what I want to know — whether Love desires that of which love is.

Yes, surely.

And does he possess, or does he not possess, that which he loves and desires?

Probably not, I should say.

Nay, replied Socrates, I would have you consider whether ‘necessarily’ is not rather the word. The inference that he who desires something is in want of something, and that he who desires nothing is in want of nothing, is in my judgment, Agathon, absolutely and necessarily true. What do you think?

I agree with you, said Agathon.

Very good. Would he who is great, desire to be great, or he who is strong, desire to be strong?

That would be inconsistent with our previous admissions.

True. For he who is anything cannot want to be that which he is?

Very true.

And yet, added Socrates, if a man being strong desired to be strong, or being swift desired to be swift, or being healthy desired to be healthy, in that case he might be thought to desire something which he already has or is. I give the example in order that we may avoid misconception. For the possessors of these qualities, Agathon, must be supposed to have their respective advantages at the time, whether they choose or not; and who can desire that which he has? Therefore, when a person says, I am well and wish to be well, or I am rich and wish to be rich, and I desire simply to have what I have — to him we shall reply: ‘You, my friend, having wealth and health and strength, want to have the continuance of them; for at this moment, whether you choose or no, you have them. And when you say, I desire that which I have and nothing else, is not your meaning that you want to have what you now have in the future?’ He must agree with us — must he not?

He must, replied Agathon.

Then, said Socrates, he desires that what he has at present may be preserved to him in the future, which is equivalent to saying that he

desires something which is non-existent to him, and which as yet he has not got:

Very true, he said.

Then he and every one who desires, desires that which he has not already, and which is future and not present, and which he has not, and is not, and of which he is in want; — these are the sort of things which love and desire seek?

Very true, he said.

Then now, said Socrates, let us recapitulate the argument. First, is not love of something, and of something too which is wanting to a man?

Yes, he replied.

Remember further what you said in your speech, or if you do not remember I will remind you: you said that the love of the beautiful set in order the empire of the gods, for that of deformed things there is no love — did you not say something of that kind?

Yes, said Agathon.

Yes, my friend, and the remark was a just one. And if this is true, Love is the love of beauty and not of deformity?

He assented.

And the admission has been already made that Love is of something which a man wants and has not?

True, he said.

Then Love wants and has not beauty?

Certainly, he replied.

And would you call that beautiful which wants and does not possess beauty?

Certainly not.

Then would you still say that love is beautiful?

Agathon replied: I fear that I did not understand what I was saying.

You made a very good speech, Agathon, replied Socrates; but there is yet one small question which I would fain ask: — Is not the good also the beautiful?

Yes.

Then in wanting the beautiful, love wants also the good?

I cannot refute you, Socrates, said Agathon: — Let us assume that

what you say is true.

Say rather, beloved Agathon, that you cannot refute the truth; for Socrates is easily refuted.

And now, taking my leave of you, I would rehearse a tale of love which I heard from Diotima of Mantinea (compare 1 Alcibiades), a woman wise in this and in many other kinds of knowledge, who in the days of old, when the Athenians offered sacrifice before the coming of the plague, delayed the disease ten years. She was my instructress in the art of love, and I shall repeat to you what she said to me, beginning with the admissions made by Agathon, which are nearly if not quite the same which I made to the wise woman when she questioned me: I think that this will be the easiest way, and I shall take both parts myself as well as I can (compare Gorgias). As you, Agathon, suggested (*supra*), I must speak first of the being and nature of Love, and then of his works. First I said to her in nearly the same words which he used to me, that Love was a mighty god, and likewise fair; and she proved to me as I proved to him that, by my own showing, Love was neither fair nor good. ‘What do you mean, Diotima,’ I said, ‘is love then evil and foul?’ ‘Hush,’ she cried; ‘must that be foul which is not fair?’ ‘Certainly,’ I said. ‘And is that which is not wise, ignorant? do you not see that there is a mean between wisdom and ignorance?’ ‘And what may that be?’ I said. ‘Right opinion,’ she replied; ‘which, as you know, being incapable of giving a reason, is not knowledge (for how can knowledge be devoid of reason? nor again, ignorance, for neither can ignorance attain the truth), but is clearly something which is a mean between ignorance and wisdom.’ ‘Quite true,’ I replied. ‘Do not then insist,’ she said, ‘that what is not fair is of necessity foul, or what is not good evil; or infer that because love is not fair and good he is therefore foul and evil; for he is in a mean between them.’ ‘Well,’ I said, ‘Love is surely admitted by all to be a great god.’ ‘By those who know or by those who do not know?’ ‘By all.’ ‘And how, Socrates,’ she said with a smile, ‘can Love be acknowledged to be a great god by those who say that he is not a god at all?’ ‘And who are they?’ I said. ‘You and I are two of them,’ she replied. ‘How can that be?’ I said. ‘It is quite intelligible,’ she replied; ‘for you yourself would acknowledge that the gods are happy and fair — of course you would — would you

dare to say that any god was not?' 'Certainly not,' I replied. 'And you mean by the happy, those who are the possessors of things good or fair?' 'Yes.' 'And you admitted that Love, because he was in want, desires those good and fair things of which he is in want?' 'Yes, I did.' 'But how can he be a god who has no portion in what is either good or fair?' 'Impossible.' 'Then you see that you also deny the divinity of Love.'

'What then is Love?' I asked; 'Is he mortal?' 'No.' 'What then?' 'As in the former instance, he is neither mortal nor immortal, but in a mean between the two.' 'What is he, Diotima?' 'He is a great spirit (daimon), and like all spirits he is intermediate between the divine and the mortal.' 'And what,' I said, 'is his power?' 'He interprets,' she replied, 'between gods and men, conveying and taking across to the gods the prayers and sacrifices of men, and to men the commands and replies of the gods; he is the mediator who spans the chasm which divides them, and therefore in him all is bound together, and through him the arts of the prophet and the priest, their sacrifices and mysteries and charms, and all prophecy and incantation, find their way. For God mingles not with man; but through Love all the intercourse and converse of God with man, whether awake or asleep, is carried on. The wisdom which understands this is spiritual; all other wisdom, such as that of arts and handicrafts, is mean and vulgar. Now these spirits or intermediate powers are many and diverse, and one of them is Love.' 'And who,' I said, 'was his father, and who his mother?' 'The tale,' she said, 'will take time; nevertheless I will tell you. On the birthday of Aphrodite there was a feast of the gods, at which the god Poros or Plenty, who is the son of Metis or Discretion, was one of the guests. When the feast was over, Penia or Poverty, as the manner is on such occasions, came about the doors to beg. Now Plenty who was the worse for nectar (there was no wine in those days), went into the garden of Zeus and fell into a heavy sleep, and Poverty considering her own straitened circumstances, plotted to have a child by him, and accordingly she lay down at his side and conceived Love, who partly because he is naturally a lover of the beautiful, and because Aphrodite is herself beautiful, and also because he was born on her birthday, is her follower and attendant. And as his parentage is, so also are his

fortunes. In the first place he is always poor, and anything but tender and fair, as the many imagine him; and he is rough and squalid, and has no shoes, nor a house to dwell in; on the bare earth exposed he lies under the open heaven, in the streets, or at the doors of houses, taking his rest; and like his mother he is always in distress. Like his father too, whom he also partly resembles, he is always plotting against the fair and good; he is bold, enterprising, strong, a mighty hunter, always weaving some intrigue or other, keen in the pursuit of wisdom, fertile in resources; a philosopher at all times, terrible as an enchanter, sorcerer, sophist. He is by nature neither mortal nor immortal, but alive and flourishing at one moment when he is in plenty, and dead at another moment, and again alive by reason of his father's nature. But that which is always flowing in is always flowing out, and so he is never in want and never in wealth; and, further, he is in a mean between ignorance and knowledge. The truth of the matter is this: No god is a philosopher or seeker after wisdom, for he is wise already; nor does any man who is wise seek after wisdom. Neither do the ignorant seek after wisdom. For herein is the evil of ignorance, that he who is neither good nor wise is nevertheless satisfied with himself: he has no desire for that of which he feels no want.' 'But who then, Diotima,' I said, 'are the lovers of wisdom, if they are neither the wise nor the foolish?' 'A child may answer that question,' she replied; 'they are those who are in a mean between the two; Love is one of them. For wisdom is a most beautiful thing, and Love is of the beautiful; and therefore Love is also a philosopher or lover of wisdom, and being a lover of wisdom is in a mean between the wise and the ignorant. And of this too his birth is the cause; for his father is wealthy and wise, and his mother poor and foolish. Such, my dear Socrates, is the nature of the spirit Love. The error in your conception of him was very natural, and as I imagine from what you say, has arisen out of a confusion of love and the beloved, which made you think that love was all beautiful. For the beloved is the truly beautiful, and delicate, and perfect, and blessed; but the principle of love is of another nature, and is such as I have described.'

I said, 'O thou stranger woman, thou sayest well; but, assuming Love to be such as you say, what is the use of him to men?' 'That,

Socrates,' she replied, 'I will attempt to unfold: of his nature and birth I have already spoken; and you acknowledge that love is of the beautiful. But some one will say: Of the beautiful in what, Socrates and Diotima? — or rather let me put the question more clearly, and ask: When a man loves the beautiful, what does he desire?' I answered her 'That the beautiful may be his.' 'Still,' she said, 'the answer suggests a further question: What is given by the possession of beauty?' 'To what you have asked,' I replied, 'I have no answer ready.' 'Then,' she said, 'let me put the word "good" in the place of the beautiful, and repeat the question once more: If he who loves loves the good, what is it then that he loves?' 'The possession of the good,' I said. 'And what does he gain who possesses the good?' 'Happiness,' I replied; 'there is less difficulty in answering that question.' 'Yes,' she said, 'the happy are made happy by the acquisition of good things. Nor is there any need to ask why a man desires happiness; the answer is already final.' 'You are right.' I said. 'And is this wish and this desire common to all? and do all men always desire their own good, or only some men? — what say you?' 'All men,' I replied; 'the desire is common to all.' 'Why, then,' she rejoined, 'are not all men, Socrates, said to love, but only some of them? whereas you say that all men are always loving the same things.' 'I myself wonder,' I said, 'why this is.' 'There is nothing to wonder at,' she replied; 'the reason is that one part of love is separated off and receives the name of the whole, but the other parts have other names.' 'Give an illustration,' I said. She answered me as follows: 'There is poetry, which, as you know, is complex and manifold. All creation or passage of non-being into being is poetry or making, and the processes of all art are creative; and the masters of arts are all poets or makers.' 'Very true.' 'Still,' she said, 'you know that they are not called poets, but have other names; only that portion of the art which is separated off from the rest, and is concerned with music and metre, is termed poetry, and they who possess poetry in this sense of the word are called poets.' 'Very true,' I said. 'And the same holds of love. For you may say generally that all desire of good and happiness is only the great and subtle power of love; but they who are drawn towards him by any other path, whether the path of money-making or gymnastics or philosophy, are not called lovers —

the name of the whole is appropriated to those whose affection takes one form only — they alone are said to love, or to be lovers.’ ‘I dare say,’ I replied, ‘that you are right.’ ‘Yes,’ she added, ‘and you hear people say that lovers are seeking for their other half; but I say that they are seeking neither for the half of themselves, nor for the whole, unless the half or the whole be also a good. And they will cut off their own hands and feet and cast them away, if they are evil; for they love not what is their own, unless perchance there be some one who calls what belongs to him the good, and what belongs to another the evil. For there is nothing which men love but the good. Is there anything?’ ‘Certainly, I should say, that there is nothing.’ ‘Then,’ she said, ‘the simple truth is, that men love the good.’ ‘Yes,’ I said. ‘To which must be added that they love the possession of the good?’ ‘Yes, that must be added.’ ‘And not only the possession, but the everlasting possession of the good?’ ‘That must be added too.’ ‘Then love,’ she said, ‘may be described generally as the love of the everlasting possession of the good?’ ‘That is most true.’

‘Then if this be the nature of love, can you tell me further,’ she said, ‘what is the manner of the pursuit? what are they doing who show all this eagerness and heat which is called love? and what is the object which they have in view? Answer me.’ ‘Nay, Diotima,’ I replied, ‘if I had known, I should not have wondered at your wisdom, neither should I have come to learn from you about this very matter.’ ‘Well,’ she said, ‘I will teach you: — The object which they have in view is birth in beauty, whether of body or soul.’ ‘I do not understand you,’ I said; ‘the oracle requires an explanation.’ ‘I will make my meaning clearer,’ she replied. ‘I mean to say, that all men are bringing to the birth in their bodies and in their souls. There is a certain age at which human nature is desirous of procreation — procreation which must be in beauty and not in deformity; and this procreation is the union of man and woman, and is a divine thing; for conception and generation are an immortal principle in the mortal creature, and in the inharmonious they can never be. But the deformed is always inharmonious with the divine, and the beautiful harmonious. Beauty, then, is the destiny or goddess of parturition who presides at birth, and therefore, when approaching beauty, the conceiving power is propitious, and diffusive, and benign, and begets

and bears fruit: at the sight of ugliness she frowns and contracts and has a sense of pain, and turns away, and shrivels up, and not without a pang refrains from conception. And this is the reason why, when the hour of conception arrives, and the teeming nature is full, there is such a flutter and ecstasy about beauty whose approach is the alleviation of the pain of travail. For love, Socrates, is not, as you imagine, the love of the beautiful only.' 'What then?' 'The love of generation and of birth in beauty.' 'Yes,' I said. 'Yes, indeed,' she replied. 'But why of generation?' 'Because to the mortal creature, generation is a sort of eternity and immortality,' she replied; 'and if, as has been already admitted, love is of the everlasting possession of the good, all men will necessarily desire immortality together with good: Wherefore love is of immortality.'

All this she taught me at various times when she spoke of love. And I remember her once saying to me, 'What is the cause, Socrates, of love, and the attendant desire? See you not how all animals, birds, as well as beasts, in their desire of procreation, are in agony when they take the infection of love, which begins with the desire of union; whereto is added the care of offspring, on whose behalf the weakest are ready to battle against the strongest even to the uttermost, and to die for them, and will let themselves be tormented with hunger or suffer anything in order to maintain their young. Man may be supposed to act thus from reason; but why should animals have these passionate feelings? Can you tell me why?' Again I replied that I did not know. She said to me: 'And do you expect ever to become a master in the art of love, if you do not know this?' 'But I have told you already, Diotima, that my ignorance is the reason why I come to you; for I am conscious that I want a teacher; tell me then the cause of this and of the other mysteries of love.' 'Marvel not,' she said, 'if you believe that love is of the immortal, as we have several times acknowledged; for here again, and on the same principle too, the mortal nature is seeking as far as is possible to be everlasting and immortal: and this is only to be attained by generation, because generation always leaves behind a new existence in the place of the old. Nay even in the life of the same individual there is succession and not absolute unity: a man is called the same, and yet in the short interval which elapses between youth and age, and in which every

animal is said to have life and identity, he is undergoing a perpetual process of loss and reparation — hair, flesh, bones, blood, and the whole body are always changing. Which is true not only of the body, but also of the soul, whose habits, tempers, opinions, desires, pleasures, pains, fears, never remain the same in any one of us, but are always coming and going; and equally true of knowledge, and what is still more surprising to us mortals, not only do the sciences in general spring up and decay, so that in respect of them we are never the same; but each of them individually experiences a like change. For what is implied in the word “recollection,” but the departure of knowledge, which is ever being forgotten, and is renewed and preserved by recollection, and appears to be the same although in reality new, according to that law of succession by which all mortal things are preserved, not absolutely the same, but by substitution, the old worn-out mortality leaving another new and similar existence behind — unlike the divine, which is always the same and not another? And in this way, Socrates, the mortal body, or mortal anything, partakes of immortality; but the immortal in another way. Marvel not then at the love which all men have of their offspring; for that universal love and interest is for the sake of immortality.’

I was astonished at her words, and said: ‘Is this really true, O thou wise Diotima?’ And she answered with all the authority of an accomplished sophist: ‘Of that, Socrates, you may be assured; — think only of the ambition of men, and you will wonder at the senselessness of their ways, unless you consider how they are stirred by the love of an immortality of fame. They are ready to run all risks greater far than they would have run for their children, and to spend money and undergo any sort of toil, and even to die, for the sake of leaving behind them a name which shall be eternal. Do you imagine that Alcestis would have died to save Admetus, or Achilles to avenge Patroclus, or your own Codrus in order to preserve the kingdom for his sons, if they had not imagined that the memory of their virtues, which still survives among us, would be immortal? Nay,’ she said, ‘I am persuaded that all men do all things, and the better they are the more they do them, in hope of the glorious fame of immortal virtue; for they desire the immortal.

‘Those who are pregnant in the body only, betake themselves to

women and beget children — this is the character of their love; their offspring, as they hope, will preserve their memory and giving them the blessedness and immortality which they desire in the future. But souls which are pregnant — for there certainly are men who are more creative in their souls than in their bodies — conceive that which is proper for the soul to conceive or contain. And what are these conceptions? — wisdom and virtue in general. And such creators are poets and all artists who are deserving of the name inventor. But the greatest and fairest sort of wisdom by far is that which is concerned with the ordering of states and families, and which is called temperance and justice. And he who in youth has the seed of these implanted in him and is himself inspired, when he comes to maturity desires to beget and generate. He wanders about seeking beauty that he may beget offspring — for in deformity he will beget nothing — and naturally embraces the beautiful rather than the deformed body; above all when he finds a fair and noble and well-nurtured soul, he embraces the two in one person, and to such an one he is full of speech about virtue and the nature and pursuits of a good man; and he tries to educate him; and at the touch of the beautiful which is ever present to his memory, even when absent, he brings forth that which he had conceived long before, and in company with him tends that which he brings forth; and they are married by a far nearer tie and have a closer friendship than those who beget mortal children, for the children who are their common offspring are fairer and more immortal. Who, when he thinks of Homer and Hesiod and other great poets, would not rather have their children than ordinary human ones? Who would not emulate them in the creation of children such as theirs, which have preserved their memory and given them everlasting glory? Or who would not have such children as Lycurgus left behind him to be the saviours, not only of Lacedaemon, but of Hellas, as one may say? There is Solon, too, who is the revered father of Athenian laws; and many others there are in many other places, both among Hellenes and barbarians, who have given to the world many noble works, and have been the parents of virtue of every kind; and many temples have been raised in their honour for the sake of children such as theirs; which were never raised in honour of any one, for the sake of his mortal children.

‘These are the lesser mysteries of love, into which even you, Socrates, may enter; to the greater and more hidden ones which are the crown of these, and to which, if you pursue them in a right spirit, they will lead, I know not whether you will be able to attain. But I will do my utmost to inform you, and do you follow if you can. For he who would proceed aright in this matter should begin in youth to visit beautiful forms; and first, if he be guided by his instructor aright, to love one such form only — out of that he should create fair thoughts; and soon he will of himself perceive that the beauty of one form is akin to the beauty of another; and then if beauty of form in general is his pursuit, how foolish would he be not to recognize that the beauty in every form is and the same! And when he perceives this he will abate his violent love of the one, which he will despise and deem a small thing, and will become a lover of all beautiful forms; in the next stage he will consider that the beauty of the mind is more honourable than the beauty of the outward form. So that if a virtuous soul have but a little comeliness, he will be content to love and tend him, and will search out and bring to the birth thoughts which may improve the young, until he is compelled to contemplate and see the beauty of institutions and laws, and to understand that the beauty of them all is of one family, and that personal beauty is a trifle; and after laws and institutions he will go on to the sciences, that he may see their beauty, being not like a servant in love with the beauty of one youth or man or institution, himself a slave mean and narrow-minded, but drawing towards and contemplating the vast sea of beauty, he will create many fair and noble thoughts and notions in boundless love of wisdom; until on that shore he grows and waxes strong, and at last the vision is revealed to him of a single science, which is the science of beauty everywhere. To this I will proceed; please to give me your very best attention:

‘He who has been instructed thus far in the things of love, and who has learned to see the beautiful in due order and succession, when he comes toward the end will suddenly perceive a nature of wondrous beauty (and this, Socrates, is the final cause of all our former toils) — a nature which in the first place is everlasting, not growing and decaying, or waxing and waning; secondly, not fair in one point of view and foul in another, or at one time or in one

relation or at one place fair, at another time or in another relation or at another place foul, as if fair to some and foul to others, or in the likeness of a face or hands or any other part of the bodily frame, or in any form of speech or knowledge, or existing in any other being, as for example, in an animal, or in heaven, or in earth, or in any other place; but beauty absolute, separate, simple, and everlasting, which without diminution and without increase, or any change, is imparted to the ever-growing and perishing beauties of all other things. He who from these ascending under the influence of true love, begins to perceive that beauty, is not far from the end. And the true order of going, or being led by another, to the things of love, is to begin from the beauties of earth and mount upwards for the sake of that other beauty, using these as steps only, and from one going on to two, and from two to all fair forms, and from fair forms to fair practices, and from fair practices to fair notions, until from fair notions he arrives at the notion of absolute beauty, and at last knows what the essence of beauty is. This, my dear Socrates,' said the stranger of Mantinea, 'is that life above all others which man should live, in the contemplation of beauty absolute; a beauty which if you once beheld, you would see not to be after the measure of gold, and garments, and fair boys and youths, whose presence now entrances you; and you and many a one would be content to live seeing them only and conversing with them without meat or drink, if that were possible — you only want to look at them and to be with them. But what if man had eyes to see the true beauty — the divine beauty, I mean, pure and clear and unalloyed, not clogged with the pollutions of mortality and all the colours and vanities of human life — thither looking, and holding converse with the true beauty simple and divine? Remember how in that communion only, beholding beauty with the eye of the mind, he will be enabled to bring forth, not images of beauty, but realities (for he has hold not of an image but of a reality), and bringing forth and nourishing true virtue to become the friend of God and be immortal, if mortal man may. Would that be an ignoble life?'

Such, Phaedrus — and I speak not only to you, but to all of you — were the words of Diotima; and I am persuaded of their truth. And being persuaded of them, I try to persuade others, that in the attainment of this end human nature will not easily find a helper

better than love: And therefore, also, I say that every man ought to honour him as I myself honour him, and walk in his ways, and exhort others to do the same, and praise the power and spirit of love according to the measure of my ability now and ever.

The words which I have spoken, you, Phaedrus, may call an encomium of love, or anything else which you please.

When Socrates had done speaking, the company applauded, and Aristophanes was beginning to say something in answer to the allusion which Socrates had made to his own speech, when suddenly there was a great knocking at the door of the house, as of revellers, and the sound of a flute-girl was heard. Agathon told the attendants to go and see who were the intruders. 'If they are friends of ours,' he said, 'invite them in, but if not, say that the drinking is over.' A little while afterwards they heard the voice of Alcibiades resounding in the court; he was in a great state of intoxication, and kept roaring and shouting 'Where is Agathon? Lead me to Agathon,' and at length, supported by the flute-girl and some of his attendants, he found his way to them. 'Hail, friends,' he said, appearing at the door crowned with a massive garland of ivy and violets, his head flowing with ribands. 'Will you have a very drunken man as a companion of your revels? Or shall I crown Agathon, which was my intention in coming, and go away? For I was unable to come yesterday, and therefore I am here to-day, carrying on my head these ribands, that taking them from my own head, I may crown the head of this fairest and wisest of men, as I may be allowed to call him. Will you laugh at me because I am drunk? Yet I know very well that I am speaking the truth, although you may laugh. But first tell me; if I come in shall we have the understanding of which I spoke (supra Will you have a very drunken man? etc.)? Will you drink with me or not?'

The company were vociferous in begging that he would take his place among them, and Agathon specially invited him. Thereupon he was led in by the people who were with him; and as he was being led, intending to crown Agathon, he took the ribands from his own head and held them in front of his eyes; he was thus prevented from seeing Socrates, who made way for him, and Alcibiades took the vacant place between Agathon and Socrates, and in taking the place he embraced Agathon and crowned him. Take off his sandals, said Agathon, and let him make a third on the same couch.

By all means; but who makes the third partner in our revels? said Alcibiades, turning round and starting up as he caught sight of Socrates. By Heracles, he said, what is this? here is Socrates always lying in wait for me, and always, as his way is, coming out at all

sorts of unsuspected places: and now, what have you to say for yourself, and why are you lying here, where I perceive that you have contrived to find a place, not by a joker or lover of jokes, like Aristophanes, but by the fairest of the company?

Socrates turned to Agathon and said: I must ask you to protect me, Agathon; for the passion of this man has grown quite a serious matter to me. Since I became his admirer I have never been allowed to speak to any other fair one, or so much as to look at them. If I do, he goes wild with envy and jealousy, and not only abuses me but can hardly keep his hands off me, and at this moment he may do me some harm. Please to see to this, and either reconcile me to him, or, if he attempts violence, protect me, as I am in bodily fear of his mad and passionate attempts.

There can never be reconciliation between you and me, said Alcibiades; but for the present I will defer your chastisement. And I must beg you, Agathon, to give me back some of the ribands that I may crown the marvellous head of this universal despot — I would not have him complain of me for crowning you, and neglecting him, who in conversation is the conqueror of all mankind; and this not only once, as you were the day before yesterday, but always. Whereupon, taking some of the ribands, he crowned Socrates, and again reclined.

Then he said: You seem, my friends, to be sober, which is a thing not to be endured; you must drink — for that was the agreement under which I was admitted — and I elect myself master of the feast until you are well drunk. Let us have a large goblet, Agathon, or rather, he said, addressing the attendant, bring me that wine-cooler. The wine-cooler which had caught his eye was a vessel holding more than two quarts — this he filled and emptied, and bade the attendant fill it again for Socrates. Observe, my friends, said Alcibiades, that this ingenious trick of mine will have no effect on Socrates, for he can drink any quantity of wine and not be at all nearer being drunk. Socrates drank the cup which the attendant filled for him.

Eryximachus said: What is this, Alcibiades? Are we to have neither conversation nor singing over our cups; but simply to drink as if we were thirsty?

Alcibiades replied: Hail, worthy son of a most wise and worthy

sire!

The same to you, said Eryximachus; but what shall we do?

That I leave to you, said Alcibiades.

‘The wise physician skilled our wounds to heal (from Pope’s Homer, II.)’

shall prescribe and we will obey. What do you want?

Well, said Eryximachus, before you appeared we had passed a resolution that each one of us in turn should make a speech in praise of love, and as good a one as he could: the turn was passed round from left to right; and as all of us have spoken, and you have not spoken but have well drunken, you ought to speak, and then impose upon Socrates any task which you please, and he on his right hand neighbour, and so on.
